A note on the twisting deformation of a non-homogeneous shaft containing a circular crack.

23 p3346 A72-43708

Spline transformation of independent variable for free transverse vibration of elastic bars with piecewise constant rigidity, calculating resonant frequencies

23 p3348 A72-43793

Infinite rectangular elastic bar surface mass distribution effects on harmonic wave propagation modes, obtaining approximate solution by expanding displacement as power series

23 p3352 A72-44123

ELASTIC BENDING

Statically indeterminate and determinate elastic beams optimal design for maximum-minimum deflection under distributed load

04 p0590 A72-15192

Saint Venant problem for orthotropic almost cylindrical beams, investigating elongation, bending due to couple and transversal loads and torsion due to torque

04 p0594 A72-15747

Hingeless rotor helicopter blade steady state response with nonuniform inflow and elastic blade bending

[AIAA PAPER 72-65]

05 p0741 A72-16933

Elasticity theory equations for orthotropic plate bending, derived from combination variational and difference-differential procedures

05 p0741 A72-17144

Reinforcing fiber frame incurvation influence on elasticity and thermal expansion coefficients of composite material

08 p1194 A72-21754

Elastic rectangular plate instability in pure bending along two perpendicular directions solved by Karman nonlinear equation reduction to partial differential equations integration

08 p1247 A72-21817

Linear uncoupled quasi-static thermoelasticity theory for thermal bending of nonuniformly heated parallelogram-shaped plates

09 p1400 A72-22710

Glass content and temperature effects on fabric reinforced plastic laminates static behavior, analyzing tensile and bending strength and elastic moduli

10 p1501 A72-24660

Upper yield stress effect on bending and torsion, noting relationship to strain rate

11 p1659 A72-25894

Anisotropic cylindrical beam bending by transverse load in elastic plane, reducing to Almansi problem

11 p1736 A72-26091

Viscoelasticity analysis of bending displacements in thin walled closed cylindrical shell loaded by moving moment

11 p1739 A72-26920

Third approximation solution to elastic bending equilibrium equations of Vekua plate theory in form of holomorphic functions

12 p1880 A72-27237

Fatigue testing machine for material behavior under elastoplastic bending loads with constant or smoothly varying programmed vibration frequency and amplitude

12 p1795 A72-27463

Boussinesq solution for elastic surface deflection due to continuous pressure with polynomial distribution over triangular area

12 p1884 A72-27568

Fatigue strength and cumulative damage in fiberglass-epoxy composite specimens under unsteady elastic bending loads, determining loading spectrum effect on service life

13 p1983 A72-28562

Elastic bending of rectangular continuous orthotropic plate with variable rigidities and elastic foundation coefficients for discontinuous boundary conditions along one edge

16 p2467 A72-33118

Bending and torsional mode deformations of two dimensional elastic wing under sinusoidal and random gust

16 p2469 A72-33229

Load capacity of tension-bent and compression-bent circular plates

19 p2877 A72-38161

Plane bending problems in the theory of elasticity for nonhomogeneous solids

19 p2877 A72-38162

Elastoplastic axisymmetric bending of a clamped circular plate under the action of a conically-distributed variable load

20 p2978 A72-39022

Improved method for determining shear stresses and checking the strength of circular cylinders in transverse bending

23 p3349 A72-43968

Compliance calibrations of a contoured and face grooved double cantilever beam specimen.

24 p3413 A72-44817

ELASTIC BODIES

Perturbed vibrational motion in isotropic elastic solid, using nonlinear Truesdell equations

01 p0101 A72-10039

Group matrix representation theory application to elastic spacecraft stabilization

01 p0135 A72-10497

Finite element method extension using computer program for solving problems of elastic bodies in contact with stiffness method advantages

01 p0141 A72-11047

Natural vibrations and resonant stresses of turbomachine blade rings and elastic bodies with cyclic symmetry, noting paradoxical frequency decrease

01 p0143 A72-11369

Thermal stresses, temperature distribution and displacement fields in elastic solid with spherical cavity and external crack

01 p0144 A72-11385

Affine similarity in static problems with mixed boundary conditions for inhomogeneous anisotropic linearly and nonlinearly elastic and viscoelastic and elastoplastic bodies

02 p0288 A72-11607

Elastic stability of body under conservative loads, deriving energy criterion with thermodynamic laws

02 p0292 A72-12003

Hereditarily elastic body model with various tensile and compressive strengths, using elasticity theory with differing moduli

02 p0294 A72-12429

Surface subsidence in semiinfinite resilient elastic solid mass supporting annular load distributed over circular ring

02 p0297 A72-12616

Static isotropic elastic body first and second boundary value problems solutions for inside and outside m dimensional sphere

02 p0300 A72-12876

Elastic bodies deformations theory, formulating boundary value problems

03 p0443 A72-13451

Double forces distribution over elastic body surface from Lamé equation describing static defects, discussing Kupradse potential and sources corresponding to plane dislocations and cracks

03 p0444 A72-13501

Elasticity tensor formulas for wave propagation, vibration and stability of deformed isotropic solids

03 p0448 A72-13887

Dual integral equations method application to elastic bodies with plane circular cracks in torsion

03 p0452 A72-14135

Statistical methods of stress and reliability analyses of elastic systems under random external loads

03 p0453 A72-14206

Closed quasi-linear cubic theory of viscoelasticity for bodies with force and moment physical nonlinearity

03 p0454 A72-14218

Homogeneous first order solutions to Lamé equations in statistical elasticity theory, yielding harmonic surface displacement for elastic body

03 p0454 A72-14371

Multipurpose optimal design of elastic structures with piecewise uniform cross section for load states and prescribed stiffness by energy methods

[AD-743418]

03 p0455 A72-14386

Infinite elastic-plastic beam impact by semiinfinite elastic rod, computing strain-time profiles

04 p0583 A72-14447

Elastic shaft bonded to dissimilar elastic disk, considering torsion problem

04 p0583 A72-14449

Stress-strain tensor component relations for isotropic elastic bodies with different tension and compression resistance

04 p0586 A72-15008

Statically indeterminate and determinate elastic beams optimal design for maximum-minimum deflection under distributed load

04 p0590 A72-15192

One-dimensional compression/expansion shock waves propagation in elastic nonheat conducting bodies, deriving differential equation for shock amplitude time rate of change

04 p0592 A72-15547

Transient stress analysis for sudden twisting of penny-shaped crack in infinite elastic body under torsion, using integral transform

[ASME PAPER 71-WA/APM-10]

05 p0734 A72-15969

Continuous bodies incremental deformation and stability under initial stress, discussing relationships for elasticity constants and material stress tensors

[ASME PAPER 71-WA/APM-9]

05 p0734 A72-15970

Nonlinear self excited oscillations in uniformly distributed oscillators interacting with traveling transverse or surface waves of elastic body

06 p0849 A72-18698

Combined rotational motions of free solid and coupled elastic bodies oscillations around center of mass with nutation passive dampers

06 p0850 A72-18707

Mechanical system of elastically coupled bodies carrying identical vibrators, examining self synchronization behavior

06 p0850 A72-18713

Stress-strain state determination in elastic parallelepiped by net point method and matrix filtering

07 p1091 A72-19754

Elastic body dynamics partial differential equations transformation into boundary value problem for Monge-Ampere equation

07 p1095 A72-20218

Class of homogeneous polynomial solutions to differential equations of motion of elastic body

08 p1242 A72-20912

Liquid fuel elastic rocket motion stability in supersonic flight, using vibration and thrust vector control equations for dynamic properties description

08 p1241 A72-21633

Elastic stability of nonlinearly elastic anisotropic body analyzed via variational principles in three dimensional theory

08 p1246 A72-21707

Stable equilibrium conditions for linear elastic body, using Reissner functional

08 p1248 A72-21819

Homogeneous linear approximations in uncoupled problems of thermoradiative elasticity and plasticity of solid body under nonuniform heating and radioactive radiation

09 p1401 A72-22720

Rayleigh type transverse surface wave existence in continuous elastic body with nonlocal interaction

09 p1403 A72-22748

Thermal diffusion in solids subject to deformation, using classical elasticity theory body force analogy for variational and reciprocal theorems

09 p1403 A72-22757

Discrete elasticity concept based on analysis of material points, lines, surfaces or rigid bodies interconnected by hyperelastic continuous bodies

09 p1403 A72-22759

Energy methods for nonlinear viscoelastic bodies based on constitutive relations affecting critical state in advanced creep

09 p1403 A72-22764

Random vibration of linearly elastic lumped mass systems containing, nonlinear damping to ideal stationary Gaussian white noise excitation

09 p1408 A72-23460

Numerical computation of bilateral bounds for arbitrary vectorial and tensorial field quantities of elastic bodies eigenvibration states, applying to thin rectangular plate

09 p1409 A72-23566

Nonlinear elasticity theory variational principles modification for finite deformation of elastic body

10 p1557 A72-24428

Classical boundary value problems in theory of thermal stresses in piecewise continuous anisotropic elastic bodies under coupling conditions

10 p1563 A72-24994

Asymptotic dynamic response of infinite beam on elastic foundation to randomly moving load

11 p1727 A72-25292

Coupled mode model for dynamic interaction between flexible rotary machines and elastic supporting structures

[AIAA PAPER 72-375]

11 p1730 A72-25399

Elastic body transverse impact against vibrating rectangular plate with allowance for rotatory inertia and shearing forces, using wave equation

11 p1732 A72-25532

Equilibrium stability of hyperelastic bodies under finite strain, deriving differential equations and boundary conditions of critical equilibrium states

11 p1686 A72-25916

Surface waves propagation in inhomogeneous elastic body, deriving wave equations asymptotic solutions

11 p1689 A72-26384

Variational minimum principle for two elastic bodies frictionless contact, discussing Hertzian and non-Hertzian normal half space problems

11 p1690 A72-26667

Mellin transforms for finite elastic disk radial crack stress intensity factor and energy formulae in terms of Fredholm equation solution, considering constant loading case

11 p1738 A72-26724

Three dimensional nonlinearly elastic anisotropic body with arbitrary elastic potential examined for large initial deformations, considering stress-strain state

12 p1877 A72-27077

Finite element equations for hybrid coordinate dynamic analysis of interconnected rigid bodies with elastic flexible appendages for use in spacecraft simulation

12 p1876 A72-27257

Dead load static stability of elastic solids in terms of zero moment condition of Beatty theory

12 p1883 A72-27557

Stress intensity factor of Griffith crack in elastic solid opened by thin symmetric wedge, using triple integral equations

12 p1883 A72-27558

Uniqueness of solutions to displacement problem for unbounded bodies in linear elastodynamics

12 p1884 A72-27564

- Elastic rod system stationary vibrations under combinational parametric resonance due to internal energy dissipation, using matrix method
12 p1885 A72-27969
- Velocity behavior of shear waves propagating in uniaxially prestressed isotropic elastic body
12 p1886 A72-27982
- Perfect and imperfect plastic column buckling, describing bifurcation and stability theory for elastic-plastic and rigid-plastic bodies
13 p2054 A72-28480
- Optimal design of elastic structures, emphasizing stability and response under applied static and dynamic loads
13 p2054 A72-28487
- Nonlinear transverse forced resonant oscillations in isotropic elastic body and ideally conducting compressible fluid flowing in external magnetic field
13 p2010 A72-28719
- Variational principles for linearized dynamic and static problems of elastic incompressible bodies for highly elastic initial deformations
13 p2059 A72-29499
- Wiener Hopf integral equation for problem of smooth stamp impression into elastic wedge face, solving by gamma and hypergeometric functions
13 p2059 A72-29500
- Notch stress concentration in disk with elastic core under tension, using finite element method
13 p2060 A72-29600
- Variational form to determine equations and boundary conditions for elastic isotropic homogeneous nonferromagnetic body subjected to external load, temperature and electromagnetic field actions
13 p2061 A72-29797
- Three dimensional axisymmetric problem for stressed state of elastic homogeneous cylindrical orthotropic bodies of revolution, using method based on small parameters
13 p2062 A72-29948
- Gradient catastrophe /solution derivative discontinuity/ occurrence time for quasi-linear hyperbolic differential equations describing elastic string oscillations
14 p2130 A72-30194
- Random deflection function for taut string on elastic foundation subject to random loads, using invariant imbedding method and Fokker-Planck equations
15 p2273 A72-31311
- Tapered elastic rod transient behavior under end impact due to mass striking, computing fixed end stress, struck end velocity and impact time duration
15 p2323 A72-31404
- Approximate values for elastic body stresses and displacements based on finite element method and virtual displacements and minimum potential energy principles equivalence
15 p2323 A72-31477
- Elastic body stress concentration problem formulation as singular integral operator eigenvalue problem for half space
15 p2323 A72-31478
- Schaefer stress representation for elastokinetics of linearly elastic isotropic homogeneous body under small deformations and torsions
15 p2324 A72-31486
- Rough surface elastic bodies stress calculation, using asymptotic method of boundary conditions
15 p2327 A72-31736
- Filler influence on critical load and buckling zone size in circular elastic three layer ring under uniformly distributed vertical load in rigid cavity
15 p2328 A72-31745
- Exact nonlinear equation derived approximation for second order effects in thermoelasticity theory for isotropic and transversely isotropic heat conducting elastic materials
15 p2329 A72-32282
- Dynamic boundary value problems for elastic materials with microstructure reduction to tensor equations of motion subject to initial and boundary conditions
15 p2329 A72-32283
- Thermal stresses in plane elasticity for doubly connected regions, considering temperature distribution, stress state problem formulation and nonconcentric annulus
15 p2329 A72-32287
- Elastic longitudinal or shear wave scattering by movable rigid sphere embedded in elastic solid, showing inverse Rayleigh limit dependence
16 p2423 A72-32988
- Forced vibrations of thick homogeneous anisotropic elastic sphere, studying dynamic response to uniformly distributed internal and external pressure
16 p2424 A72-33147
- Sudden heating-induced deflection of rectangular plate fitted into equal sized excavation in elastic foundation with relatively very low thermal conductivity
16 p2475 A72-33148
- Uniqueness principle application to construction of gravitational field generated by complex of elastic bodies for mass tensor
16 p2424 A72-33366
- Energetic boundedness conditions for internal work of deformation in elastic isotropic body
16 p2470 A72-33527
- Equations of motion for small vibrations superposed on time depending deformation of elastic body, discussing acoustic wave propagation
16 p2425 A72-33590
- Dynamic stress field solution to plane strain crack propagation in elastic body under general loading at constant and nonlinear extension rate
16 p2470 A72-33612
- Finite length inhomogeneous elastic rod free vibration, deriving asymptotic expressions for eigenvalues and eigenfunctions
17 p2625 A72-34320
- The plane solution for anisotropic elastic wedges under normal and shear loading.
[ASME PAPER 72-APM-13] 17 p2629 A72-34802
- Continuous elastic systems flutter and divergence instability under nonconservative loading, determining slopes of loading-frequency curves
17 p2633 A72-35255
- Thermo-elastic interactions in an infinite elastic solid due to a concentrated transient heat source.

06 p0897 A72-17970
- Multiple elastic postbuckling path generation at coincident branching points for system with many degrees of freedom
07 p1087 A72-19113
- Dynamic buckling of elastic shallow structures under periodic loading, determining critical load upper and lower bounds by energy method
07 p1090 A72-19731
- Dynamic buckling and plate to shell transition of thick spherical caps under large amplitude axisymmetric flexural vibrations
08 p1249 A72-22135
- Elastic and plastic buckling analysis of uniformly compressed rectangular plates, using Kantorovich method
09 p1408 A72-23556
- Finite element structural analysis for local buckling stresses in flat plates, panels and thin walled columns, deriving elastic and geometric stiffness matrices
[AIAA PAPER 72-354] 11 p1729 A72-25383
- Dynamic nonlinear elastic response of buckling sensitive cylindrical shells to lateral pressure loading, using numerical and computerized analysis
[AIAA PAPER 72-357] 11 p1729 A72-25386
- Rib reinforced cylindrical shell supercritical post-buckling strains, allowing for geometrical surface deflection
12 p1885 A72-27976
- Equilibrium state stability in elastic conservative system, relating system postbuckling behavior to critical branching point
13 p2054 A72-28478
- Structural approach to elastic stability in buckling problems, simplifying deformation concepts and loading condition definition
13 p2054 A72-28479
- Finite plane elastic buckling deformations of incompressible composite columns reinforced by straight parallel fibers
13 p2059 A72-29599
- Combined axial compression and shear deformation effect on elastic columns buckling behavior, evaluating third order polynomials eigenvalues by computerized Newton-Raphson technique
14 p2168 A72-30934
- Dynamic response and buckling mode of elastically supported circular plates with initial tension under arbitrary surface load
15 p2332 A72-32578
- Perturbation scheme for branching analysis of post-buckling behavior in elastic spherical shells
16 p2465 A72-33001
- Edge-loaded rectangular plate buckling behavior in elastoplastic range between proportional limit and yield point
16 p2466 A72-33020
- Equilibrium equations and boundary conditions for elastic buckling of open cylindrical sandwich shell under compressive forces applied to freely supported edges
16 p2467 A72-33116
- Axisymmetrical stability loss in elastic cylindrical shell under longitudinal and transverse impact waves, discussing buckling and similarity parameter for simulation
16 p2468 A72-33159
- Thin walled elastic structures optimization by overall and local buckling coincidence, discussing compression column design
16 p2468 A72-33200
- Elastic buckling of simply supported sandwich panels with fiber reinforced laminated face plates and honeycomb cores subjected to uniform end loading
16 p2469 A72-33405
- Imperfect circular cylindrical shells creep and elastic buckling under nonuniform external loads, solving ordinary differential equations via finite difference technique
16 p2474 A72-34133
- Magnetoelastic buckling of beams and thin plates of magnetically soft material.
[ASME PAPER 72-APM-35] 17 p2624 A72-34311
- Dynamic buckling of shallow circular cylindrical hinged panel under axial compression
17 p2626 A72-34665

Monograph - The elastic flexural-torsional buckling of beam-columns by discrete element techniques

17 p2634 A72-35548

Coordinate transformation for perturbation analysis of elastic structural system imperfections influence on elastic buckling

18 p2732 A72-36079

Clamped flat skew plates stability under inplane stresses in terms of oblique components, calculating elastic buckling coefficients via energy method

18 p2736 A72-36931

Symmetrical and antisymmetrical wrinkling of sandwich panels.

18 p2736 A72-37056

Internal buckling of a laminated medium.

18 p2737 A72-37059

Application of conformal transformation to the variational method - Buckling loads of polygonal plates.

18 p2738 A72-37074

A proof of the accuracy of a set of simplified buckling equations for circular cylindrical elastic shells.

18 p2739 A72-37091

Buckling of an elastic cylindrical shell during longitudinal impact against an obstacle

19 p2870 A72-37322

Continuum and finite element branching studies of the circular plate.

22 p3235 A72-42603

Fiber composite columns under compression.

23 p3344 A72-43494

Asymmetric imperfections effect on spherical elastic shell buckling strength under uniform external pressure

23 p3351 A72-44104

Column buckling under random initial deformations influence, determining mean square nonstationary deflection by Green function technique

23 p3351 A72-44106

ELASTIC COLLISIONS

U ELASTIC SCATTERING

ELASTIC CONSTANTS

U ELASTIC PROPERTIES

ELASTIC CYLINDERS

Two-layered plane strain elastic cylinder with cracked inner bore under internal pressure loading, obtaining stress intensity factors by finite element method

01 p0141 A72-10994

Computer algorithm of initial functions for elastic thick finite hollow axisymmetric cylinders under static conditions

02 p0288 A72-11604

Axially symmetric torsional waves in elastic circular composite cylinders, plotting dispersion diagrams

04 p0590 A72-15185

Elastic analysis of circular cylinders with stress singularities from boundary discontinuities, mixed displacement and axial load conditions [ASME PAPER 71-WA/APM-18]

05 p0733 A72-15962

Eccentric circular ring elastic contact with rigid symmetric dies under equal diametrically opposite loads

05 p0738 A72-16329

Resonant frequency, phase velocities and dispersion curves for wave propagation in isotropic elastic cylinders

06 p0895 A72-17854

Numerical approximation of Pochhammer-Chree longitudinal vibration modes in elastic cylinders by quadratic spline functions

07 p1087 A72-18797

Local stability of thin walled isotropic elastic cylinder, deriving characteristic equations for critical load calculation

08 p1242 A72-20969

Snapping process dynamics of shallow elastic hinged cylindrical panel of rectangular planform under gaseous, liquid and solid loads

08 p1242 A72-21228

Somigliani dislocations effect in infinite elastic cylinder, determining stresses in form of eigenfunctions expansions

09 p1398 A72-22491

Fundamental vibrations of long circular cylinder made of micropolar elastic solid, discussing dispersion equations

09 p1398 A72-22620

Wave propagation in bonded discretely inhomogeneous elastic cylindrical rods, including longitudinal and radial motions

09 p1409 A72-23563

Stress distribution determination for long isotropic elastic cylinder with strip crack on diametral plane by complex variable technique and Fredholm equation solution

09 p1409 A72-23574

Dynamic contact problems of die or bandage on elastic layer surface or cylinder, analyzing vibrationally induced elastic waves

10 p1558 A72-24779

Algebraic equations for displacement and stress vectors at faces and interfaces of elastic multilayered cylinders and infinite wedges, using matrix method

12 p1884 A72-27565

Vibrations and plane wave propagation in laminated elastic plates and cylinders, noting finite element method for conical shells

[AIAA PAPER 72-406]

13 p2056 A72-28959

Series solution for coaxial spherical cavity effect on torsional stress of finite length elastic circular cylinder

13 p2059 A72-29491

Thermal stresses in elastic cylinder for variable linear expansion coefficient and temperature, noting welded seam between two constant temperature cylinders

13 p2059 A72-29492

Dynamic contact problems of stamps bands oscillation on elastic layer surface or cylinder, analyzing vibrationally induced elastic waves

14 p2163 A72-30223

Stress analysis of two coaxially conjugated elastic isotropic cylinders under compression loads in terms of Fourier-Bessel series

15 p2323 A72-31447

Coupled oscillations of inviscid homogeneous liquid with free surface under vacuum or gas filled space in elastic cylindrical container

15 p2217 A72-31472

Thermoelastic stress analysis of stamps bands oscillation heated along helix, calculating stress function for given surface temperature distribution

15 p2333 A72-32687

Strain energy method for finite deformation of solid and tubular cylinders of incompressible isotropic elastic material, noting torsional and tensile tests on natural rubber

16 p2468 A72-33198

Somigliani dislocations effect in infinite elastic cylinder, determining stresses in form of eigenfunctions expansions

17 p2626 A72-34654

Elastic cylindrical antenna detection relationship to gravitational radiation sources

17 p2584 A72-35914

Fluid oscillations in a partially filled cylindrical tank with a spring supported elastic floor.

18 p2684 A72-37062

Propagation and attenuation of harmonic waves in a viscoelastic circular cylinder.

18 p2738 A72-37070

Axial-symmetric deformations of a rubber-like cylinder under initial stress.

18 p2738 A72-37081

Thermal circular and radial stresses in elastic orthotropic cylinders with anisotropic expansion coefficients

19 p2872 A72-37535

Dynamic stability of axisymmetrically heated glass fiber reinforced cylindrical plastic shells which are coupled with elastic cylinders

19 p2872 A72-37539

Propagation of Rayleigh waves on visco-elastic cylindrical surfaces placed in a magnetic field.

22 p3207 A72-42876

On the propagation of Love type waves in an infinite cylinder with rigidity and density varying linearly with the radial distance.

22 p3207 A72-42878

Reflection of pulses at the interface between an elastic rod and an elastic half-space.

23 p3314 A72-44119

Free vibrations of thick, layered cylinders having finite length with various boundary conditions.

24 p3425 A72-44884

ELASTIC DAMPING

Maximum logarithmic decrement vs frequency of damped oscillation of elastic thin beam including internal and viscous resistance

01 p0144 A72-11384

Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibrations, showing test results consistency with materials microdeformation theory

05 p0671 A72-15987

Forced transverse vibration damping of end loaded elastic cantilever beam, determining hysteresis loop contour from resonance curves

06 p0900 A72-18673

Torsional oscillation damping in circular rods coated with viscoelastic material as function of resonant frequency

07 p1087 A72-18924

Free oscillations frequencies and mode shapes determination of two parallel elastically coupled rods of variable cross section, applying Bubnov-Galerkin iterative method

08 p1243 A72-21231

Angular rigidity of support shaft elastic suspension of dynamically adjustable gyroscope

09 p1307 A72-22348

Higher order forces effect on shock absorbing systems of masses interconnected by elastic and damping members of aircraft landing gears

09 p1318 A72-22861

Slip contact joint frictional damping of vibration of beam on elastic support

09 p1408 A72-23464

Motion and stable equilibrium position of horizontal rotor with nonlinear elastic and internal damping properties, discussing stress-strain-time relations of shaft filaments

09 p1409 A72-23613

Dynamic shear modulus and damping of polystyrene composites filled with glass, salt and foam, including skin effect correction

10 p1500 A72-24260

Damping additions for plates using constrained thin viscoelastic sheets and metallic layers

11 p1688 A72-26063

Closed form solution for dynamic response of infinite plate with elastic foundation and damping under arbitrary initial conditions and load distribution

12 p1883 A72-27559

Axial compression stability critical load and buckling of cylindrical shells resting on Winklerian elastic base, using dynamic programming

12 p1885 A72-27972

Vibratory effects of disturbances transmitted from vehicle to viscoelastic vibroprotective damping coating in presence and absence of resonance

13 p2055 A72-28558

Torsional vibration damping in circular rods coated with viscoelastic material, noting technique effectiveness at certain resonant frequencies

13 p2058 A72-29209

Elastic damping of spin stabilized space stations nutational oscillations induced by time-variant moments of inertia

15 p2319 A72-31458

Material damping effect on rotating system stability as function of critical angular velocity, using elastic continuum whirling shaft model

16 p2465 A72-32986

A comparison of approximate methods for solving non-conservative problems of elastic stability.

17 p2634 A72-35410

Equipment vibration isolation principles, discussing damping, viscoelastic materials and shock absorbers

18 p2731 A72-35992

The effect of an elastic edge restraint on the forced vibration of a rectangular plate.

18 p2737 A72-37066

A certain generalization of the hysteresis loop contour equations to the case of an asymmetric cycle

19 p2876 A72-38003

Thermoelastic martensite caused elastic vibration damping in Cu-Al-Ni alloy, observing shape memory effect

22 p3190 A72-42442

The damping properties of elastically supported sandwich plates.

24 p3458 A72-44915

Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibrations, showing test results consistency with materials microdeformation theory

24 p3415 A72-45729

ELASTIC DEFORMATION

NT ELASTIC BENDING

NT ELASTIC BUCKLING

Human spine elastic deformation due to bending stresses, presenting statistical data on caudocephalad acceleration effects in vertebral column injuries

01 p0016 A72-10111

Stokes and Love integral representations for elastodynamic displacement fields in elastic solid deduced by potential theory method

01 p0138 A72-10513

Trapezoidal isoparametric and triangular singularity elements for crack tip elastic stress intensity factor for mesh having small number of degrees of freedom

01 p0140 A72-10992

Stroboscopic measurement of elastic untwisting angles of axial compressor rotor vanes under centrifugal and aerodynamic forces

01 p0143 A72-11371

Thermal stresses, temperature distribution and displacement fields in elastic solid with spherical cavity and external crack

01 p0144 A72-11385

Geometrical method in nonlinear shell theory for supercritical elastic deformation determination, considering stability loss and dynamics problems

02 p0289 A72-11612

Linear creep properties in continuous media for wide time-variable parameters range of instantaneous elastic deformation under simple loads

02 p0289 A72-11616

Elastoplastic deformation in medium with initial dislocations and temperature field, expressing kinetic stress and distortion tensors by Hamiltonian derivatives

02 p0290 A72-11630

Deformation, stress and singularity in cylindrical shells under concentrated circumferential loads, comparing with two dimensional elasticity and plate bending

02 p0291 A72-11662

- Elastic strain effects in ball bearing supports on motion of gyroscope Cardan suspension
02 p0231 A72-12565
- Finite element formulation for nonlinear large deflection elastic analysis of displacements and stresses in thin plate structures
02 p0298 A72-12657
- Elastic bodies deformations theory, formulating boundary value problems
03 p0443 A72-13451
- Deformation kinetics relationship to scale effect in notched samples during elastoplastic loading phase
03 p0443 A72-13455
- Double forces distribution over elastic body surface from Lamé equation describing static defects, discussing Kupradse potential and sources corresponding to plane dislocations and cracks
03 p0444 A72-13501
- Stresses due to initial elastic deformations in orthotropic thin plate strip, expressing Dirac function by Fourier series and integral
03 p0444 A72-13505
- Axisymmetric Reissner-Sagoci problem in linear micropolar elasticity for stress and displacement under load applied by rigid circular disk
03 p0448 A72-13890
- Variable-modulus isotropic material finite elastic deformation, deriving two dimensional stress concentration by dual series expansion
03 p0452 A72-14132
- Stress channelling in transversely isotropic elastic composites, comparing classical theory with ideal fiber reinforced composite plane deformation theory
03 p0455 A72-14385
- Displacements in nonhomogeneous elastic layer, investigating uniformly distributed load surface settling behavior dependence on layer depth relationship to loaded area width
03 p0455 A72-14387
- Nonlinear elastoplastic deformations of flexible shells of revolution, calculating stress concentration at circular hole in spherical shell
04 p0588 A72-15049
- Closed form equations for constrained torsion of turbine blades, estimating elastic twist and cross sectional depilation on analog computer
04 p0589 A72-15166
- Elastic strip stresses and displacements, using eigenfunctions with coefficients determined by variational principles
[ASME PAPER 71-APMW-24] 04 p0589 A72-15181
- Dynamic theory of thin elastic beams under large deflection, taking into account shear deformation and axial stress resultants
[ASME PAPER 71-APM-EE] 04 p0590 A72-15183
- Uniform circular plates axisymmetric elastic deformation under various static loadings and boundary conditions, solving flexural equilibrium equations
04 p0590 A72-15184
- Continuous bodies incremental deformation and stability under initial stress, discussing relationships for elasticity constants and material stress tensors
[ASME PAPER 71-WA/APM-9] 05 p0734 A72-15970
- First and second order moduli of elasticity for finitely deformed elastic materials, deriving acceleration waves propagation condition and growth equation
05 p0735 A72-16028
- Tensor calculus theorem application to elastic isotropic materials finite deformation, considering acceleration waves propagation and moduli of elasticity
05 p0735 A72-16029
- Rectangular variable thickness plate deflection under uniform lateral pressure, solving nonlinear partial differential equations with variable coefficients by iterative procedure
05 p0738 A72-16533
- Variational principles for elasticity theory problem of three dimensional linearly elastic incompressible anisotropic body with highly elastic deformations
05 p0741 A72-17143
- Inverse periodic plane deformation of isotropic elastoplastic surface with infinite series of curvilinear holes
05 p0741 A72-17146
- Thermoelasticity equations for thermal shock effect on freely supported circular plate, describing deformation and temperature field interactions
05 p0741 A72-17147
- Isotropic continuum model of elastic interaction of edge and screw dislocation with nearby inclusion
06 p0894 A72-17492
- Stress and displacement solutions to elastic deformation of homogeneous and composite anisotropic near cylindrical bodies, using Almansi algorithm
06 p0894 A72-17688
- Critical review on data accuracy of maximum principal elastic stresses and deflections of thin initially flat square isotropic plates under uniform normal pressure
06 p0894 A72-17796
- Hollow rubber impact absorber stiffness and deformation characteristics derivation by classical elasticity theory, noting accuracy
06 p0895 A72-17797
- Green-Naghdi nonlinear thermodynamics of elastic-plastic deformation at finite strain, discussing relationship to nonisothermal theory
06 p0896 A72-17921
- Large elastic deformation problems analysis by incremental finite element technique, using variational principles
07 p1087 A72-18782
- Classical elasticity displacement problem solution by integral equation method based on Betti tensor counterpart of Green procedure in potential theory
07 p1026 A72-18813
- Stress-strain state relationship to crack development morphology in elastic strain region of austenitic steel sample under cyclic bending
07 p1013 A72-19769
- Minimum weight design of elastic sandwich beam with segmentwise constant stiffness under displacement and stress constraints, using iterative solution and finite element analysis
[AD-745488] 07 p1092 A72-19825
- Stress-strain behavior of steel under elastic compression at 4.2 K, observing discontinuous twinning
07 p1020 A72-20413
- Nonlinear theory of thin walled open elastic beams with deformations by large cross sectional rotation, using potential energy principle
07 p1096 A72-20430
- Elastohydrodynamic lubrication of soft elastic-deformed contact surfaces, determining lubricant film thickness as function of inlet and outlet parameters
07 p0998 A72-20530
- Elastic-plastic deformation of thin membrane shells
08 p1244 A72-21290
- Rheological model of reticular polymers and glass fiber reinforced plastics based on stress-strain relationship during damped creep elastic deformation
08 p1191 A72-21499
- Time varying external pressure effect on creep collapse of long thin walled quasielliptic cylindrical shell, taking into account elastic deformation
08 p1245 A72-21612
- Strength analysis of thin elastoplastic shell with allowance for compressibility, relating loads and moments to deformation of middle surface
08 p1246 A72-21712
- Nonlinear viscoelastic body model for stress relaxation of amorphous linear polymers below vitrification temperature for various deformations, temperatures and deformation speeds
08 p1194 A72-21751
- Residual temperature stresses and deformations during thermal treatment of thick walled glass fiber reinforced plastic wound cylinders and rings
08 p1194 A72-21755
- Contact problem of semiinfinite plate deflection on linearly deformed half space with depth dependent elasticity modulus
08 p1247 A72-21808
- Stress-deformation effects on gasket joint of metal seals at high pressures
08 p1178 A72-21933
- German monograph on model concept for erosion mechanism involved in crystalline material surface bombardment covering particle elastic deformation during impact
09 p1397 A72-22324
- Thin walled Bourdon tube manometric spring deformation analysis by Ritz method in second approximation
09 p1397 A72-22349
- Axisymmetric deformation of hollow elongated elastic ellipsoid, using Lamé equilibrium equations
09 p1400 A72-22708
- Stress-strain state of circular conical shell of linearly variable thickness within small elastoplastic deformation theory, assuming specific convective heat transfer at surface
09 p1401 A72-22722
- Boundary value problems in micropolar theory of elasticity, obtaining displacement and rotation vectors from singular integral equations
09 p1402 A72-22745
- Crack propagation in elastic layer under antiplane state of deformation for arbitrarily distributed shearing forces on crack surface
09 p1404 A72-22766
- Elastic dislocation theory of Chandler wobble excitation by earthquakes
09 p1299 A72-22802
- Magnetization and elastic stresses effect on Ni dislocations movement due to domain wall interactions
09 p1371 A72-22866
- Infinite elastic solid deformation in antiplane strain mode, discussing corresponding strain model with continuous distribution of slipping edge dislocations
09 p1405 A72-22919
- Continuum model for cylindrical and spherical elastic laminated composites deformation, using balance and constitutive equations
09 p1405 A72-22992
- Drift angle effect on rolling wheel pneumatic tire lateral and angular deformation amplitudes, deriving formula for reaction forces
09 p1351 A72-23176
- Linear theory of elasticity application to wave propagation in homogeneous isotropic material with deformable microstructure, presenting approximate solution method
09 p1353 A72-23552
- Elastoplastic deformation of Zn single crystals under uniaxial tensile loads, noting critical stresses relationship to current pulses
10 p1553 A72-23766
- Elasticity theory for unsymmetric deformation of nonhomogeneous anisotropic cylindrical shells, using Donnell equations
10 p1555 A72-24252
- Piston exerting pressure on liquid filled cylinder, determining deformation state based on thin elastic orthotropic plate theory
10 p1556 A72-24266
- Nonlinear elasticity theory variational principles modification for finite deformation of elastic body
10 p1557 A72-24428
- Solid body elastic deformation potential energy and structure calculation on computer by finite element method and calculus of variations
10 p1559 A72-24924
- Nonlinear dynamic response of single elastic cables with low initial tension, examining free and forced vibrations with incremental deformations theory
10 p1560 A72-25185
- Impact-produced deformations in nonlinear viscoelastic rod of finite length, studying pulse propagation as nonlinear boundary value problem
11 p1685 A72-25353
- Equations of motion for structural flexibility influence on dual spin spacecraft dynamic response, noting elastic deformations and rotation rates coupling
[AIAA PAPER 72-348] 11 p1725 A72-25377
- Heterogeneous shear deformation effect on dynamic response of laminated plates for various local elastic deformation and interface conditions
[AIAA PAPER 72-398] 11 p1731 A72-25419
- Variational equations of motion for three layered laminated sandwich beam vibrations, assuming small elastic deformations and axial and bending motion
[AIAA PAPER 72-399] 11 p1731 A72-25420
- Torsional stress analysis of rectangular beam composed of two elastic materials, using complex variable and conformal mapping
11 p1733 A72-25444
- Nonlinear elastic suspension system with two spring pairs in parallel, measuring nondimensional load versus deflection curve and frequency response
11 p1736 A72-26007
- Resultant material and spatial energy propagation vectors for waves of small amplitude superposed on large static deformation in elastic materials
12 p1879 A72-27123
- Geometrically nonlinear structure elastic stress propagation, deformation and dynamic response under impact, using finite element matrix displacement method and computer programs
12 p1879 A72-27189
- Plane unstable deformation and stability loss of incompressible laminated composites under highly elastic strains
12 p1880 A72-27229
- Dynamics snap-through instability existence conditions in nonlinear plane deformation of shallow circular cylindrical elastic shell under impulsive loading
12 p1880 A72-27241
- Harmonic equation for antiplane shear deformation of elastic composite materials with multiple circular inclusions
12 p1883 A72-27562
- Stokes-Helmholtz decomposition role in displacement potentials derivation in elasticity
12 p1884 A72-27569
- Elastoplastic deformation effects on load bearing capacity of samples with stress concentrators under alternating cyclic loading, obtaining nomograms by digital computer
12 p1887 A72-28228
- Canonical equations of motion for continuous elastic system, predicting critical buckling loads for unbonded deformation
13 p2054 A72-28482
- Uniaxial elastic deformation pressure effects on electronic conduction in tetrahedrally bonded amorphous semiconducting thin films as function of temperature
13 p2021 A72-28574
- Room temperature uniaxial tension tests for elastic deformation of steel samples, showing quadratic stress-strain function
13 p1977 A72-29008
- Elastic deformation and rigidity of rectangular, circular and elliptic gimbals for gyroscope suspension
13 p1957 A72-29272
- Boussinesq problem for homogeneous viscoelastic half space governed by deformation law of typical body under concentrated or sinusoidal loads
13 p2062 A72-30092

Elastic deformations of porous Cu, Mo and W fiber materials after pressing and sintering due to residual stress relaxation

14 p2106 A72-30151

Transverse strain coefficient for steel box-section beam under tension, presenting test values for deformations before and beyond elastic limit

14 p2166 A72-30692

Berger equation inconsistencies for large deflections of thin elastic plates with freely moveable edges

14 p2169 A72-31173

Hingeless elastic helicopter blades coupled flap-lag motion under quasi-steady aerodynamic loads, reducing equations of motion to coupled nonlinear differential equations

15 p2180 A72-31211

Mechanical properties of composite materials, discussing elastic deformation and failure modes

15 p2260 A72-31442

Transverse impacts of hard cones on elastic membranes for various apex angles, using high speed photography

15 p2323 A72-31445

Schaefer stress representation for elastokinetics of linearly elastic isotropic homogeneous body under small deformations and torsions

15 p2324 A72-31486

Elastic deformation of thin walled spherical and cylindrical shells and associated rings under external loads for small displacements

15 p2325 A72-31604

High amplitude ultrasonic stress waves effect on metals elastic and plastic deformation characteristics, verifying model for sound waves-lattice structure interactions

15 p2328 A72-31842

Displacement and stress field for elastic solid containing cruciform crack with unequal length arms

15 p2330 A72-32292

Thin walled elastic shells stability under finite deformations, deriving equilibrium conditions and constitutive equations

15 p2330 A72-32464

Nearly incompressible elastic solid compressibility effects theory, applying to annular wedge straightening, stretching and shearing and cylindrical tube telescopic shear problems

15 p2330 A72-32477

Stress and displacement solution to Lamé problem for multilayer spherical vessels and cylindrical tubes in nonlinear elasticity theory

15 p2333 A72-32679

Elastic-viscoplastic solution for deformation of impulsively loaded strain rate sensitive steel rings

16 p2464 A72-32916

Reversible instantaneous deformations and internal energy in viscoelastic incompressible fluids, using Oldroyd and De Witt hydrodynamic models

16 p2376 A72-32937

Strain energy methods for stability of finitely deformed elastic membranes under conservative loading

16 p2465 A72-33002

Yield conditions formulation restrictions for large elastoplastic deformations, discussing isotropic and anisotropic hardening

16 p2396 A72-33024

Radial vibrations and plane wave propagation in elastic deforming sphere with superimposed time dependent displacement field

16 p2467 A72-33117

Stability loss condition for long rectangular cross section band from nonlinear elastic material with internal constraints, discussing critical loads and deformations

16 p2467 A72-33120

Line and surface defect treatments of elastic media dislocation field, noting nonuniqueness with respect to Burgers and jump conditions

16 p2467 A72-33141

Optimal composite structures of multilayer spherical vessels in terms of elastic deformation under critical loads in thermal field

16 p2467 A72-33158

Small disturbance behavior in laminar boundary layer on elastic surface experiencing deformation under perturbing pressure, noting surface resilience effect

16 p2377 A72-33164

Strain energy method for finite deformation of solid and tubular cylinders of incompressible isotropic elastic material, noting torsional and tensile tests on natural rubber

16 p2468 A72-33198

Equilibrium equation for elastic deformation effect on free electricity redistribution in thin electroconductive shells

16 p2469 A72-33271

Energetic boundedness conditions for internal work of deformation in elastic isotropic body

16 p2470 A72-33527

Equations of motion for small vibrations superposed on time depending deformation of elastic body, discussing acoustic wave propagation

16 p2425 A72-33590

Shock wave propagation in incompressible elastic Mooney-Rivlin material for arbitrary homogeneous strain state

16 p2426 A72-33788

Rotating disk with eccentric elliptic insert determining elastic field in inclusion by complex variable technique

16 p2427 A72-33790

Unified description of structures behavior subject to elastic, creep and plastic deformations

16 p2473 A72-34117

Energy theorems for creep constitutive relationships, discussing total deformation of body composed of elastic-creeping material with allowance for stress redistribution effects

16 p2473 A72-34118

Inflation pressure caused deformations of thin toroidal shells, discussing wrinkle development due to pressure reduction

[ASME PAPER 72-APM-32] 17 p2628 A72-34787

Dynamically loaded elastic, viscous, plastic and rigid, viscoplastic structures instantaneous mode responses definitions and characterization by variational criteria with isometric constraints

[ASME PAPER 72-APM-17] 17 p2628 A72-34799

Flexure of micropolar elastic beams.

17 p2631 A72-35056

Conical and cylindrical shell deformation with nonlinear one dimensional wave processes, describing algorithm for method of characteristics application

18 p2735 A72-36664

On the two-dimensional deformation of a semi-infinite porous elastic medium.

18 p2736 A72-36929

Bending of rectangular plates of linearly varying thickness

18 p2736 A72-36991

Forced axisymmetric response of fluid filled spherical shells.

18 p2684 A72-37063

Heat production effects in general linearized thermoviscoelasticity theory, deriving equations of motion, state and energy and boundary conditions for intensely strained objects

19 p2871 A72-37526

Elastic stability theory of compressible and incompressible composite media

19 p2871 A72-37530

Anisotropic circular cylinder stress analysis under uniaxial load, calculating elastic deformation

19 p2872 A72-37536

Variational principles of the nonlinear theory of elasticity - Case of superposition of a small deformation on a finite deformation.

19 p2872 A72-37559

Aluminium, II - A review of deformation properties of high purity aluminium and dilute aluminium alloys.

19 p2818 A72-37832

Regularities in the deformation and failure of commercial iron in a complex stress state under low-temperature conditions

19 p2818 A72-38005

Low-frequency wavelike process of deformation in a seminfinite cylindrical shell immersed in a compressible fluid

19 p2877 A72-38157

Theory for transverse vibrations of beams during elastoplastic deformations

19 p2877 A72-38179

Post-critical deformations of a cylindrical shell subject to the action of external pressure and a temperature field

19 p2878 A72-38472

Spherelike deformations of a balloon.

19 p2878 A72-38716

Features of deformation and stress distribution in a laminated plastic

20 p2944 A72-38948

Large elastic deformations of an incompressible material heteroresistant to tensile and compressive strains

20 p2978 A72-39021

Deformation of the earth by surface loads.

20 p2916 A72-39335

Axisymmetric impact of compactible rods subjected to finite deformations.

21 p3117 A72-40455

A multi-continuum theory for composite elastic materials.

21 p3072 A72-40676

On the asymptotically spherical deformations of arbitrary membranes of revolution fixed along an edge and inflated by large pressures - A nonlinear boundary layer phenomenon.

21 p3118 A72-40840

Time dependent deformation of isotropic viscoelastic materials, discussing rectilinear shear, circular cylinder torsion, spiral shear of layer and conical layer torsion

21 p3119 A72-41075

Hysteresis curve equation for calculation of elastoplastic deformations caused by forced vibrations, taking into account medium compressibility and inertial forces

21 p3123 A72-41359

Epoxy-thiocol binder viscoelastic deformation under short and long term loads, noting stress-strain linearity limit

21 p3073 A72-41360

Constitutive equations of generalized Brandt-Reuss theory of elastoplastic deformation, noting second order effects

21 p3124 A72-41506

Theory of slow elastic-plastic deformation of polycrystalline metals with micro-stresses as latent variables descriptive of the state of the material.

21 p3124 A72-41508

Line integral expressions along line singularity loop for elastic strain and curvature, observing plastic dislocations, distortions and rotations

21 p3125 A72-41511

Calculation of sandwich shells of revolution at large elastic-plastic deflections.

21 p3125 A72-41512

Disclinations theory described by plastic and elastic distortions, considering line singularity and dislocation loop

21 p3125 A72-41513

Nonlinear equilibrium equations for hinged flat circular and spherical membranes under large axisymmetric elastic deformations due to internal pressure

21 p3125 A72-41516

Book - Analysis of plates.

21 p3125 A72-41530

Multilayer shell theories with allowance for transverse shear and transverse normal deformation of layers, noting viscoelastic material and anisotropic shallow shells

21 p3125 A72-41537

Methods of studying three-dimensional problems of stability in the presence of highly elastic strains

21 p3126 A72-41538

Equilibrium and elastic deformation equations for closed cylindrical shells with arbitrary cross section and variable wall thickness

21 p3126 A72-41551

Asymptotic analysis of the behavior of an elastic rod under aperiodic intense loading

21 p3127 A72-41670

Allowance for the hysteresis behavior of a continuous medium in a complex state of stress under conditions of simple cyclic loading

21 p3127 A72-41711

Solution for shallow shells of revolution with allowance for large deflections by the method of integral relations

22 p3232 A72-41869

Stress-strain state of an isotropic half-plane with an elliptic hole, deformed by concentrated loads

22 p3233 A72-42057

Stress-strain state at holes in plates in the case of asymmetric buckling modes

22 p3233 A72-42059

Analogs between linearized and linear problems in elasticity theory in the case of uniform initial states

22 p3233 A72-42061

Elastic isotropic plates stability for nonlinear stress-strain relations, noting effect of deformation tensor invariant on critical load magnitude

22 p3234 A72-42275

On the effect of the form of the strain energy function on the solution of a boundary-value problem in finite elasticity.

22 p3236 A72-42606

The application of the finite element displacement method to problems of elastoplastic deformation.

22 p3238 A72-42832

Optimization of the range of elastic behavior of unidirectional composites by prestraining.

22 p3194 A72-43041

Continual theory of dislocations and the theory of small elastoplastic deformations

23 p3345 A72-43584

Experimental analysis of the stress distribution in the vicinity of a nonwelded rigid circular inclusion in the interior of a plate stressed in monoaxial tension

23 p3346 A72-43691

Nonlinear thin elastic plate deformation differential relations and static boundary conditions along contour, verifying theory by bending experiment on rectangular plate

23 p3348 A72-43791

Elastic and plastic deformations in torsional moment loaded rod, noting successive approximation for stress functions

23 p3348 A72-43794

Reissner-Sagoci problem for seminfinite elastic solid stress and displacement determination, discussing generalization to nonhomogeneous media with circular part under axisymmetric twisting

23 p3314 A72-44266

Computation of post-yield behaviour in notch-bend and tension testpieces.

24 p3456 A72-44796

Elastic bodies deformations theory, formulating boundary value problems

24 p3458 A72-44926

Deformation kinetics relationship to scale effect in notched samples during elastoplastic loading phase

24 p3458 A72-44930

- Pure antiplane stress and equilibrium of isotropic elastic beams, considering suspended cylinders 24 p3459 A72-44989
- ELASTIC MEDIA**
- Plane strain analysis of two bonded semiinfinite elastic media with different thermomechanical properties and cracks, calculating stress factors and maximum stress angles 01 p0140 A72-10990
- Continuum mechanics models of macroscopically inhomogeneous elastic medium with microstructure, using moment theory 02 p0288 A72-11608
- Wave propagation in nonlocal isotropic elastic medium of ordinary kinematic structure with energy density as functional of displacement gradient field 02 p0288 A72-11609
- Variational perturbation problem solution in power series form for elliptic functional description of elastic continuous medium state by Euler-Lagrange equations 02 p0259 A72-12233
- Elastic continuous media nonlinear models approximation, obtaining Euler-Lagrange functions 02 p0259 A72-12234
- Homogeneous isotropic elastic medium free vibration in unbounded space, obtaining relativistic relations in wave field from mathematical model 03 p0389 A72-13425
- Fracture mechanics of interfacial cracks between two bonded dissimilar anisotropic elastic half spaces, presenting two dimensional analysis of stress fields 03 p0446 A72-13707
- Continuous solid medium electroelastic equations of state, obtaining solution by variational principles application 03 p0390 A72-13916
- Anisotropic media elastoplastic behavior, developing plastic deformation theory from stress-strain relationships for linearly elastic media 03 p0454 A72-14216
- Linear elastic Cosserat continuum mixed boundary-initial value problem uniqueness theorem, using Kirchhoff proof in classical elastostatics 03 p0382 A72-14363
- Stress intensity and plane dilatational wave diffraction in elastic material with finite crack 04 p0583 A72-14459
- Semiinfinite elastic solid response to arbitrary axially directed line load, transforming simultaneous partial differential equations by Hankel transforms [ASME PAPER 71-APMW-1] 04 p0589 A72-15180
- Nonhomogeneous elastic structure with quasi-permeable coefficients, deriving mechanical model by continuum spectral theory 04 p0594 A72-15745
- Equilibrium equations solution for displacements of inhomogeneous isotropic elastic media 05 p0739 A72-16588
- Layer potentials continuity in theory of vibrations of elastic medium 06 p0894 A72-17556
- Matrices of fundamental solutions constructed for loading singularities and Green method in unbounded micropolar elastic continuum 07 p1095 A72-20243
- Stress intensity factor of crack near inclusion in infinite elastic plane, using numerical methods 09 p1398 A72-22531
- Tensionless contact area between beam and elastic half space determined by approximate technique 09 p1398 A72-22623
- Thermal stress-strain state analysis of nonlinear elastic medium by small parameter method 09 p1400 A72-22717
- Crack propagation in elastic layer under antiplane state of deformation for arbitrarily distributed shearing forces on crack surface 09 p1404 A72-22766
- Infinite elastic solid deformation in antiplane strain mode, discussing corresponding strain model with continuous distribution of slipping edge dislocations 09 p1405 A72-22919
- One dimensional shock wave propagation in inhomogeneous elastic materials, showing wave amplitude behavior dependence on critical jump in strain gradient 09 p1405 A72-22990
- Homogeneous isotropic elastic medium thermoelasticity equations based on variational principles noting definite integrals solutions by means of delayed potentials 09 p1406 A72-23070
- Stress concentration in elastic composite reinforced by two dimensional continuous parallel fiber array with one broken fiber 09 p1339 A72-23172
- Stress wave reflection and transmission at interfaces between homogeneous isotropic linear elastic materials 09 p1353 A72-23501
- Coupling of interstitial liquid and porous elastic medium deformation, calculating solidification by numerical integration of partial differential equations system of I-lame type 10 p1465 A72-24116
- Dynamic stress concentration around elliptical discontinuities in elastic medium, considering rigid and empty cavity scatterers for compression and vertically polarized shear incident waves 10 p1554 A72-24180
- Thermal stresses and displacements in elastic medium containing parallel circular cracks, using perturbation technique 10 p1560 A72-25045
- Distributed elastic system discrete model mass, stiffness and damping matrices derivation from dynamic test response data 11 p1728 A72-25375
- Constitutive equations for bimodulus elastic materials, postulating rheological model based on anisotropy stress-strain laws 11 p1736 A72-25984
- Axissymmetric stress field in infinite homogeneous isotropic elastic solid with crack surrounding cylindrical cavity, solving elastic equilibrium equations 11 p1738 A72-26720
- Resultant material and spatial energy propagation vectors for waves of small amplitude superposed on large static deformation in elastic materials 12 p1879 A72-27123
- Elastic inhomogeneous continuum stability dependence on internal stress tensors field and boundary conditions, noting application to composite materials 12 p1843 A72-27171
- Screw dislocation with free surface interaction in inhomogeneous elastic medium with continuously varying elastic moduli 12 p1881 A72-27253
- Equations of motion for oriented and multipolar discrete elastic media, noting elements formed by sets of free material points 12 p1845 A72-27394
- Resonant frequency and vibration modes of variable cross section bar in elastic medium under transversal force, noting dynamic programming combined with optimization principle 12 p1845 A72-27538
- Ultimate safe load estimates for stability of isotropic elastic materials 12 p1883 A72-27563
- Plane longitudinal displacement wave reflection from fixed surface in micropolar elastic half space, presenting reflection laws and amplitude ratios for specific cases 13 p2056 A72-29001
- Boundary value problems in dynamics of Cosserat infinite elastic medium with finite crack, noting couple stresses effect on dynamic stress concentration 14 p2164 A72-30299
- Instrument to determine steady and unsteady stress state of elastic fluids in viscometric flow, noting rheological measurements in solved polymers 14 p2094 A72-30421
- Magnetoelastic effects in elastic dielectric analysis based on continuum with single magnetic moment, noting magnetically saturated material 15 p2274 A72-31482
- Thermal stress and temperature distribution in rigidly bounded elastic half-space, taking into account coupling effects 15 p2325 A72-31637
- Elastic properties of media with cracks, discussing elastic anisotropy and crack distribution 15 p2327 A72-31733
- Longitudinal shear crack propagation after stability loss in infinite elastic medium, discussing wave diffraction at edges 15 p2327 A72-31734
- Numerical solution of singular integral equations system for stress concentration in elastic plane with curvilinear crack 15 p2327 A72-31735
- Displacement and stress field for elastic solid containing cruciform crack with unequal length arms 15 p2330 A72-32292
- Nonlinear elastic material approximation by piecewise linear material with linear boundary value problems, discussing isotropic case based on singular surfaces theory 15 p2330 A72-32295
- Nonlinear anisotropic elastic constitutive equations for micromorphic and micropolar mixtures, investigating plane wave propagation via field equations with restricted coupling 15 p2278 A72-32446
- Elastic dilatational field association with twist disclination loop interaction with free surface of two phase system interface 15 p2331 A72-32504
- Incompressible elastico-viscous liquid steady state laminar source flow between stationary infinite porous disks, noting Reynolds number effects 15 p2219 A72-32512
- Antiplane shear wave diffraction by two coplanar Griffith cracks in infinite isotropic homogeneous elastic medium 16 p2464 A72-32919
- Linearly elastic, transversely isotropic multilayer system, presenting stress and stability problem for two dimensional strain states 16 p2466 A72-33022
- Displacements, rotations and stresses equilibrium equations solution for plane micropolar elastic half space, using exponential Fourier transforms 16 p2466 A72-33105
- Line and surface defect treatments of elastic media dislocation field, noting nonuniqueness with respect to Burgers and jump conditions 16 p2467 A72-33141
- Cosserat couple stresses theory application to time varying concentrated forces induced displacements in infinite elastic space 16 p2469 A72-33385
- Nonlinear equations of discrete elastic Cosserat media from multipolar media equations, studying small rotation theory 16 p2425 A72-33591
- Nonlinear theory of two dimensional and three dimensional discrete elastic Cosserat media, noting application to reinforced shells and lattice type structures 16 p2425 A72-33592
- Shock wave propagation in incompressible elastic Mooney-Rivlin material for arbitrary homogeneous strain state 16 p2426 A72-33788
- Control volume method for finite amplitude shock front propagation in hyperelastic materials, solving steady state conservation equations 16 p2427 A72-33830
- Prestrained and annealed elastic materials stress-strain relationship calculation in plastic range, compared with tensile and compression load tests results 16 p2472 A72-33948
- Magnetized deformable media in general relativity. 17 p2584 A72-35911
- Mechanical structure and component stress measurement by reinforced concrete, microconcrete, elastic and plastic models 18 p2733 A72-36370
- Mathematical model and simulation for contact problems involving elastic half spaces and viscoelastic and friction effects 18 p2734 A72-36371
- Propagation mechanism of tensor wave in solid elastic body due to impact. 18 p2734 A72-36377
- Microrinhomogeneous elastic media with moduli tensor as coordinate random function, investigating stress and strain tensors 18 p2735 A72-36668
- On the two-dimensional deformation of a semi-infinite porous elastic medium. 18 p2736 A72-36929
- Equilibrium equations solution for displacements of inhomogeneous isotropic elastic media 19 p2872 A72-37560
- Vibrations of elastically connected ring systems. 19 p2873 A72-37692
- A universal connexion for waves in anisotropic media. 19 p2875 A72-37840
- Fourier-Bessel superposition and Laplace transformation methods for surface displacement produced by time dependent dipole in elastic half space, noting buried dipole case 19 p2876 A72-37887
- Applicability of the small parameter method to the estimation of stresses in nonhomogeneous elastic media 19 p2876 A72-38153
- Rayleigh wave effects in an elastic half-space. 20 p2980 A72-39615

- Equivoluminal vibration modes of multipolar elastic plate with traction free faces
07 p1089 A72-19646
- Moment stresses and deflections of rigidly clamped hinged and simply supported square elastic plates beyond elastic limit, deriving equilibrium and strain compatibility equations
07 p1091 A72-19759
- Stress-strain state in elastic plate with small radial cracks and circular hole under hydrostatic tension
07 p1091 A72-19765
- Finite element method for elastic plastic sandwich plates analysis, presenting Lagrange multipliers interpretation
07 p1093 A72-19951
- Boundary conditions for unsteady flow fields bounded by incompressible elastic thick plane wall fixed to rigid surface
07 p0972 A72-20113
- Contact problem of semiinfinite plate deflection on linearly deformed half space with depth dependent elasticity modulus
08 p1247 A72-21808
- Plane wave propagation in laminated reinforced elastic plates with difference-differential equations analysis
08 p1247 A72-21809
- Elastic rectangular plate instability in pure bending along two perpendicular directions solved by Karman nonlinear equation reduction to partial differential equations integration
08 p1247 A72-21817
- Stress analysis of isotropic linearly elastic square plate of constant thickness loaded by concentrated forces at edges
09 p1399 A72-22698
- Linear uncoupled quasi-static thermoelasticity theory for thermal bending of nonuniformly heated parallelogram-shaped plates
09 p1400 A72-22710
- Trapezoidal plate thermoelasticity problem for various thermal load distributions, solving Poisson equation for sectorial annular region
09 p1400 A72-22711
- Stressed state of circular elastic plate with prestiffed equiaxial disk
09 p1406 A72-23181
- Mixed boundary elasticity solutions for plane with cuts on real axis, using hyperelliptic Riemann surface
10 p1553 A72-23768
- Plane harmonic compression waves scattering by circular holes in thin elastic plate, calculating dynamic stresses concentration
10 p1554 A72-24179
- Maximum dynamic to static deflection ratio for thermally induced vibrations of elastic beams and plates, considering damping and axial load effects [ASME PAPER 71-APM-UU]
10 p1554 A72-24185
- Crack arrest in transversely loaded elastic plates from fracture mechanics combined with stress intensity factor for tensile and compression loads
10 p1499 A72-24890
- Crack shape and plastic energy dissipation rate relation to plate thickness and applied stress for penny-shaped crack in elastic plate
10 p1559 A72-24896
- Constrained zones and stress intensity factors in cracked thin elastic plates under combined tensile and shear loads
11 p1735 A72-25893
- Infinite elastic thick plate with loads symmetrical to axis of revolution and middle plane, analyzing stress functions, Fourier-Bessel expansion and photoelastic experiment
11 p1626 A72-26427
- Dynamic deflection of elastic rectangular plate hinged to rigid base moving under sinusoidal pressure impulse action, noting base inertia effect
12 p1879 A72-27091
- Approximate theory for high frequency elastic plate vibrations in terms of thickness mode expansion
12 p1881 A72-27251
- Stress concentration in infinite elastic isotropic disk with circular hole under internal tensile loading
12 p1882 A72-27320
- Vibrations and plane wave propagation in laminated elastic plates and cylinders, noting finite element method for conical shells
13 p2056 A72-28959
- Plane stressed state of elastic rectangular plate solved by method of summary representations
13 p2057 A72-29067
- Stress-strain state of elastic rectangular plate under arbitrary edge forces on displacements
13 p2058 A72-29458
- Unsteady spherical shock wave effect on thin infinite elastic plate covering acoustic semispace, using integral transformation method
13 p1943 A72-29946
- Rigid smooth body pressing into elastic plate surface subjected to cylindrical bending, discussing contact problem and transverse shear strain
13 p2062 A72-29950
- Computerized optimal design by nonlinear programming for minimum weight elastic plates crossed with rigid ribs for vibrational loading to meet natural frequencies condition
14 p2165 A72-30576
- Thin elastic plates finite displacement flexure behavior, using piecewise linear finite element incremental stiffness technique
14 p2168 A72-30933
- Berger equation inconsistencies for large deflections of thin elastic plates with freely moveable edges
14 p2169 A72-31173
- Real time focused image holographic interferometry for deformation recording in diffusively reflecting plate under compression
15 p2233 A72-31415
- Elastic plates and shallow shells in finite deflection, obtaining iterative solution with good convergence for thermal stresses
15 p2324 A72-31488
- Contact problems for elastic semiplane reinforced with symmetric and asymmetric loaded elastic stiffeners
15 p2329 A72-32281
- Buckling behavior of simply supported elastic folded plate structures without and with transverse stiffeners under symmetrical and asymmetrical uniform vertical loads
15 p2332 A72-32562
- Rigidity effect of reinforcing rings on stressed state of physically nonlinear perforated elastic plates
15 p2333 A72-32683
- Thin elastic isotropic plates and shells thickness variation for rigidity functional stationary value, reducing problem to stress-strain state equations simultaneous solution
15 p2333 A72-32688
- Homogeneous differential equations of elastic rectangular plates with linear thickness variation, using Gran Olsson solution
16 p2471 A72-33682
- Elastic sandwich plates analysis with core layer as orthotropic Cosserat surface supporting force and moment stresses
16 p2471 A72-33787
- Uniformly propagating finite crack in elastic strip of finite width, using two dimensional dynamic equations of elasticity

17 p2539 A72-34915
- Nonlinear panel response from a turbulent boundary layer.
17 p2632 A72-35228

Thickness-punch size ratio effects on stress state response of elastic plates and beams in flat contact under symmetric loads due to rigid punches
18 p2734 A72-36378

Sonic boom duration effects on thin circular elastic plate transient axisymmetric vibration via Hankel and Laplace transforms
18 p2734 A72-36409

Variational principle based three dimensional elasticity theory of micropolar anisotropic sandwich plates, considering transverse shear and strains and rotatory inertia
18 p2737 A72-37057

Classical plate theory for variable-thickness isotropic elastic axisymmetric circular plates in partial contact with each other and with rigid smooth surfaces of revolution
18 p2738 A72-37072

Application of conformal transformation to the variational method - Buckling loads of polygonal plates.
18 p2738 A72-37074

Stability analysis of internal pressure loaded crack in adhesive layer bonding elastic plate to rigid base using energy and critical load intensity criteria
19 p2870 A72-37245

Elastic impact on a three-layer plate in the presence of concentrated masses and nonlinear restraints
19 p2877 A72-38159

Uniformly loaded thin elastic isotropic circular plate with partly clamped and simply supported edges, determining deflection via solution of biharmonic differential equation
20 p2979 A72-39331

Stress intensity factors for transversely loaded elastic plates and their application to predictions of crack arrest.
20 p2981 A72-39956

Plane strain bending of laminated fibre-reinforced plates.
20 p2982 A72-40021

Free vibrations of finite element plates subjected to complex middle-plane force systems.
21 p3116 A72-40330

Stress distribution at crack tips in elastic plate loaded by two concentrated opposite forces perpendicular to crack
21 p3123 A72-41389

On the collision of a cold elastic plate with a hot elasto-plastic plate.
21 p3124 A72-41482

Mixed finite element analysis of elasto-plastic plates in bending.
21 p3124 A72-41502

Stress concentration around curvilinear holes in plates according to Reissner's theory
21 p3126 A72-41543

Weight minimization for elastic circular plates of variable thickness under uniformly distributed load with given stress function conditions
22 p3232 A72-41896

Model studies of plate and shell stability
22 p3233 A72-42055

Elastic isotropic plates stability for nonlinear stress-strain relations, noting effect of deformation tensor invariant on critical load magnitude
22 p3234 A72-42275

Bending of a rectangular plate with a clamped edge and an internal symmetric cut
22 p3234 A72-42291

Numerical solution of bending stresses in elastic cantilever plates under surface and edge loads, noting boundary layer, load concentration and sweep back effects
22 p3236 A72-42609

Extensional vibration of a certain type of composite circular plate with a central hole.
22 p3240 A72-42879

The method of Muskhelishvili applied to coupled isotropic elastic plates
22 p3242 A72-43202

Nonlinear thin elastic plate deformation differential relations and static boundary conditions along contour, verifying theory by bending experiment on rectangular plate
23 p3348 A72-43791

Approximate stress-strain state determination in plate weakened by arbitrarily oriented rectilinear cracks and circular holes in elasticity theory
23 p3349 A72-43801

Dynamic response of circular plates to pulse loads.
23 p3354 A72-44254

Non-linear flexural vibration of orthotropic skew plates.
23 p3355 A72-44375

Stress distributions in a semi-infinite plate with a row of circular holes.
23 p3355 A72-44398

Variable cross section elastic stringer end loaded longitudinal force transmission to stiffened elastic plate
24 p3458 A72-44940

Numerical analysis of natural frequency spectrum of plastic plate free vibrations in compressible inviscid fluid
24 p3459 A72-45003

Action of a moving load on a composite shell with elastic filer
24 p3459 A72-45262

Three dimensional elasticity mixed boundary value problems associated with Laplace equation in half space, including slotted regions and stamp contact solutions
02 p0289 A72-11610

Winding fiber reinforced plastics, investigating fiber curvature effects on elastic constants and tensile strength optimization
02 p0248 A72-11626

Composite rotating sphere with concentric inhomogeneity of elastic constants and outer boundary free from tractions, calculating stress by digital computer
02 p0259 A72-12180

Micropolar elastic theory axial symmetric problems, deriving differential equations for elastic potential and half space
02 p0260 A72-12239

Crack notched three point loaded bend specimens plain strain fracture toughness determination, showing relation between elastic work and stress intensity factor
03 p0442 A72-12960

Rolled metals and alloys with various lattice types and packing defect energies, showing elastic properties isotropy and Young modulus anisotropy
03 p0371 A72-13188

Ritz approximation to two dimensional strain elasticity and heat flow boundary value problems, considering piecewise linear and cubic functions for complete triangulation
03 p0381 A72-13620

French book on thin elastic structures vibration, describing antivibrational devices and rotating machines balancing
03 p0445 A72-13682

Temperature field analysis in locally heated cylindrical shell for stressed state production with lowest elastic energy
03 p0456 A72-13733

Stress distribution at contour of connected region in plane elasticity solved for half plane and circle
03 p0449 A72-13909

Polarization and stress tensor characteristics as function of interaction between mechanical, thermal and electromagnetic processes in elastic isotropic dielectrics
03 p0390 A72-14103

Two dimensional elasticity theory, discussing first, second and mixed boundary value problems solution in contour integral form
03 p0451 A72-14116

Soviet papers on elasticity and inelasticity covering deformable media mechanics, continuum mechanics, polymer materials, random inputs, stress concentration, ductility and crystallization temperature properties
03 p0453 A72-14205

Bi-harmonic stress and displacement potentials for two dimensional boundary problems in elasticity theory, using Galerkin method
03 p0453 A72-14207

Bi-harmonic problem of displacements in plane theory of elasticity, analyzing stress-strain state by iterative solution in series form
03 p0454 A72-14312

Torsion of hollow beam consisting of two homogeneous isotropic rods with different elastic properties and simply connected cross sections, solving by conformal mapping
04 p0586 A72-14992

Stress-strain tensor component relations for isotropic elastic bodies with different tension and compression resistance
04 p0586 A72-15008

Nonlinear hereditary elasticity theory boundary value problem solution using complex potentials in successive approximation algorithm for stress concentration and nonlinear creep analysis
04 p0588 A72-15059

Elastic stiffener bonded to elastic half plane with different mechanical properties, reducing governing integral equation to infinite system of linear algebraic equations
[ASME PAPER 71-APM-TT] 04 p0589 A72-15182

Fiber reinforced composites with transversely isotropic constituents, discussing various mathematical models for elastic constants calculation
04 p0590 A72-15189

Dynamic boundary value problem for elastic half space with rotational concentrated moment of variable magnitude, using Fourier and Laplace transforms
04 p0591 A72-15198

Continuous linear elastic systems characteristic vibrations differential operator eigenvalues lower bounds calculation, obtaining Green integral operator first invariant upper bound via stress function
04 p0540 A72-15706

Elastic stress field in hollow circular cylindrical anisotropic body under surface tractions expressed as Fourier series
[ASME PAPER 71-WA/APM-13] 05 p0734 A72-15967

Elastic boundary value problems static and geometric field parameters pointwise upper and lower bounds, determining solution coefficients by error energy minimization
05 p0735 A72-16062

Elastically supported cantilever stability with continuous lateral restraint under uniform distributed axial load, developing boundary conditions
05 p0737 A72-16118

Asymmetric micropolar elasticity plane problem, solving equilibrium equations with Fourier transformation for displacements, rotation and stresses
05 p0737 A72-16296

Discrete elasticity theory constitutive and motion equations, considering finite difference and partial differential equations
05 p0737 A72-16297

Plane theory of elasticity for infinite triangular wedge with notched apex, reducing problem to non-homogeneous Hilbert problem
05 p0737 A72-16301

Mass concept for moving crack, relating stress concentrations of elastic field with crack inertia
05 p0673 A72-16306

Periodic integral convolution equations in elasticity theory and non-mathematical physics, demonstrating solution existence
05 p0739 A72-16589

Elasticity theory three-dimensional axisymmetric problem reduction to two-dimensional analytical function boundary value problem
05 p0739 A72-16591

Variational principles for elasticity theory problem of three dimensional linearly elastic incompressible anisotropic body with highly elastic deformations
05 p0741 A72-17143

Elasticity theory equations for orthotropic plate bending, derived from combination variational and difference-differential procedures
05 p0741 A72-17144

Subgroup structure of symmetry group g of stress tensor for stored energy function in hyperelasticity
06 p0893 A72-17302

Fiber pull-out from elastic matrix, calculating shear stress and load distribution dependence on elastic properties and fiber length
06 p0897 A72-18152

Dog mesentery terminal venous microvessel distensibility characteristics from response to arterial and venous pressure changes

06 p0765 A72-18196

Elastic constants measurement using vibrating wire strain gages on diametrically loaded circular disk and ring specimens

06 p0818 A72-18325

Temperature and deformation velocity effects on elasticity and tensile strength of Mo and Nb alloys

06 p0833 A72-18636

Elastic systems nonlinear oscillations with moving inertial loads, noting standing waves superposition

06 p0901 A72-18706

Dual stress, strain and displacement formulations of linear finite element elasticity, showing Finzi stress function applicability

07 p1087 A72-18780

Limiting equilibrium of elastic half space with randomly oriented crack

07 p1092 A72-19780

Elastic equilibrium of infinite wedge with apical asymmetric notch, reducing to Hilbert problem for holomorphic vectors

07 p1093 A72-19976

Elasticity theory axisymmetric problem for hollow cone, analyzing stress-strain state and boundary value problem by asymptotic methods

07 p1093 A72-19980

Cold brittleness of transition metal alloys with bcc lattices, discussing elastic characteristics, packing defects energy, plastic deformation and rhodium admixture

07 p1018 A72-20143

Stressed state of infinite isotropic plate weakened by curvilinear hole with elastic plug, using asymptotic integration method

07 p1094 A72-20212

Maximum stress concentration in two dimensional elasticity theory for half plane and circle as function of contour distribution, using Cauchy-Buniakovskii inequality in Banach space

07 p1095 A72-20325

Heat treatment effect on elastic properties of steel clad material for devices in sulfuric acid, discussing structural changes and optimal conditions

07 p1020 A72-20415

Perturbation solution to nonlinear nonuniform torsion of thin walled open elastic beams with strain hardening dependent on torque-rotation behavior

07 p1096 A72-20431

Interatomic force model for elastic properties of alpha quartz and alkali halides generalized for specified structure under arbitrary pressure

07 p0980 A72-20519

Sphere unsteady motion in viscoelastic liquids, noting falling-ball technique use for elastic parameters determination

07 p0973 A72-20549

Elastic properties of bonded orthotropic layer plates, finding good agreement with fiberglass reinforced plastic laminates

07 p1097 A72-20596

Elasticity and potential theory axisymmetric problems solution for sphere and spherical cavity, constructing x-analytic functions for boundary surfaces

08 p1242 A72-20908

Torsional bending vibrations mode shapes of space frame with variable elastic and mass characteristics, determining eigenvalue error limits

08 p1205 A72-20957

Axisymmetric elasticity theory problems for stress-strain state of space with spherical incision, obtaining solutions with p-analytic functions

08 p1242 A72-20960

Dynamic programming application to computer algorithm construction for elasticity theory two dimensional problems, solving boundary value problem for elliptic differential equation

08 p1243 A72-21235

Stress concentration and elastohereditary values at curvilinear hole in fiberglass reinforced plastic plate under bending moment

08 p1243 A72-21237

Integral operators functions approximation for elasticity and materials aging equations, noting transcendental functions in solutions

08 p1243 A72-21239

Lattice type structures as discrete elasticity problem, determining potential of thin rods connecting rigid nodes pairs from equations of motion and constitutive equations

08 p1244 A72-21302

Tensile strength estimation for two dimensional composite with brittle matrix and randomly orientated discontinuous elastic fibrous reinforcement

08 p1244 A72-21324

Projective geometry method for elastic curve shape of equilibrium-state thin rod subject to end forces

08 p1209 A72-21365

Bending and torsion of thin isotropic rod with identical principal rigidities in bending, writing elastic curve equation in cylindrical coordinate system

08 p1209 A72-21367

Critical compressive stresses leading to instability of layer fastened to elastic half space

08 p1244 A72-21368

Uniqueness theorem for dynamic infinitesimal invariant theory of hereditary elasticity, defining conditions of continuity and positive determinability

08 p1246 A72-21708

Reinforcing fiber frame incurvation influence on elasticity and thermal expansion coefficients of composite material

08 p1194 A72-21754

Elasticity theory doubly periodic problem for unbounded anisotropic plate weakened by system of identical arbitrary holes with self balanced loads

08 p1246 A72-21807

Elasticity theory method for nonlinear stress-strain relationships in thin anisotropic shells, discussing fiberglass reinforced cylindrical shell

08 p1247 A72-21810

Heavy falling body elastic impact against circular plate center analyzed by Timoshenko type wave equation

08 p1247 A72-21814

Interaction between two noncoplanar parallel staggered elastic cracks with narrow spacing, calculating stress intensity required for crack propagation

09 p1397 A72-22250

German monograph on optimum principle for numerical representation of surfaces, discussing association with elasticity theory extremal requirements

09 p1340 A72-22319

German monograph on finite element method for elastic impact at half space, analyzing elasticity and inertia effects on energy absorption and contact time

09 p1397 A72-22338

Penny shaped interface crack between elastic layer and half space, calculating stress intensity factors and strain energy release rate for aluminum-epoxy combination

09 p1398 A72-22530

Potential equations and singularities methods comparison for two dimensional flow field cascades and stress distribution elasticity theories

09 p1260 A72-22627

Thermoelastic disturbance wave front propagation in elastic half space after thermal shock at surface

09 p1399 A72-22705

Axisymmetrically heated orthotropic multilayer cylindrical shell with shear sensitive couplings and elastic stiffener, investigating stability and critical force under compression

09 p1402 A72-22735

Micropolar elasticity plane problem singular solution based on stress equations and elastic potentials methods, discussing thermal stress concentration

09 p1402 A72-22743

Boundary value problems in micropolar theory of elasticity, obtaining displacement and rotation vectors from singular integral equations

09 p1402 A72-22745

Optimization of load-carrying elastic lattice structures designed on prescribed surface

09 p1402 A72-22746

Discrete elasticity concept based on analysis of material points, lines, surfaces or rigid bodies interconnected by hyperelastic continuous bodies

09 p1403 A72-22759

Crack propagation in two dimensional geometry with isotropic homogeneous and linearly elastic properties under in-plane tension loading

09 p1405 A72-22921

Book on tensor analysis and continuum mechanics covering strain, permutation and stress tensors, vector and tensor comparison, application to elasticity and shell theory, etc

09 p1406 A72-23000

Plane shock wave propagation in polytropic plastic body with elastic unloading properties, deriving closed form solution for time dependent stepwise decreasing load

09 p1353 A72-23554

Hartman-Olech theorem to prove asymptotic stability of mechanical system with nonlinear elastic characteristic, analyzing differential equations of motion

09 p1343 A72-23612

Gruneisen tensor relationship to elastic and thermal properties of anisotropic quartz fiber-phenolic composite

10 p1500 A72-24251

Macroscopic elastic constants of three dimensional multilaminar composites with anisotropic layers, assuming stress and displacement continuity

10 p1555 A72-24256

Plane and antiplane elasticity boundary value problems reduced to integral equations by dislocation layers, noting closed form solutions for half and whole space

10 p1557 A72-24561

Linear elastic fracture mechanics extension to fiber reinforced plastic composite laminates, noting dependence on homogeneous mode validity

[AIAA PAPER 72-384]

11 p1730 A72-25406

Elastic constants and bond stress distribution for discontinuous fiber-reinforced three dimensional composite subjected to uniaxial tension

[AIAA PAPER 72-397]

11 p1731 A72-25418

Asymmetric three layer beam design for elastic impact, proposing functional equation integration by computer method

11 p1732 A72-25531

Longitudinal and transverse vibrations and transient response of elastically coupled nonlinear mechanical system

11 p1732 A72-25534

Cylindrical panel natural vibrations, describing motion of base with dynamic elasticity equations

11 p1733 A72-25539

Linear contingency method for elasticity theory of anisotropic plane with elliptic hole, deriving boundary value problems solutions

11 p1733 A72-25543

Elastic constants of dilute Mo-Re alloys with bcc structure, determining randomly distributed point defects low concentration effects with T-matrix method

11 p1656 A72-25724

Be elastic constants at 25-300 C, using ultrasonic pulse technique

11 p1657 A72-25774

Elastic r-value variation in Ti sheet from direct measurement of width and thickness strains

11 p1659 A72-25895

Dynamical torsion theory of rods deduced from linear elasticity equations, using averaging technique

11 p1736 A72-25987

Control theory application to nonlinear elastic analysis of trusses, partitioning structure into statically determinate stages

11 p1736 A72-25989

Elasticity theory dynamic equations solutions concentrated near longitudinal or transverse wave beams propagating in inhomogeneous isotropic space

11 p1689 A72-26383

Speed and mechanical work measurements during knee bending and immediate or delayed leg extension exercise, showing muscle elastic potential energy utilization

11 p1587 A72-26615

Nonlocal elasticity theory from global equilibrium and second thermodynamics laws, deriving constitutive equations from Clausius-Duhem inequality and Gibbs thermodynamics

11 p1738 A72-26721

Constitutive equations for nonlocal theory of polar elastic dielectrics interaction with quasi-static electric field, using variational principle

11 p1738 A72-26723

Electrical and thermal conductivity, elastic properties and resistance to bending of porous tungsten in porosities region

11 p1665 A72-26868

Bending of unbounded plate coupled to elastic isotropic half space with vertical and horizontal springs, calculating contact stresses by double Fourier transforms

12 p1878 A72-27082

Symmetric discrete elastic conservative structural systems stability boundary estimation through reduction to linear equation recursive solution, using perturbation method

12 p1880 A72-27242

Crystal-morphology role in refraction of cold drawn polyethylene samples of varying lamellar thickness and density, relating elastic restoring force to crystal deformation

12 p1832 A72-27283

Stress boundary value problems for infinite wedges in linear elasticity theory solved by Mellin transforms

12 p1883 A72-27561

Elastic fields of dislocation loop in two phase material consisting of isotropic elastic half spaces

12 p1884 A72-27567

Added elastic load tests for thoracic elastance change effects on human response to carbon dioxide inhalation, using rebreathing technique

12 p1762 A72-27726

Nonresonant mode and nutation damping of rotational-vibrational motion of free solid body with elastic elements

12 p1846 A72-27968

Iterative solution existence for elastic equilibrium problem of thin plates and shells near boundary layer

12 p1886 A72-27997

Stress-strain state in pure bending for infinite elastic strip with circular central hole, using integral Fourier transforms

13 p2053 A72-28390

Stress calculation in inflexible overlapping cemented joint of orthotropic layers, taking into account joining geometry and elastic properties anisotropy

13 p1962 A72-28396

Singular moment stress homogeneous solutions of plane problem with semiinfinite cut in elasticity theory

13 p2056 A72-28773

Series representations of p-analytic functions in Legendre functions of first and second kind, applying to axisymmetric problems solution in elasticity theory

13 p2057 A72-29079

Mars and moon cores elastic properties inferred from hydrostatic equilibrium based on observed data for total mass, radius and moment of inertia

13 p2048 A72-29809

Axisymmetric geometry and load finite element structural analysis of isotropic elastic materials for parametric and optimization studies

13 p2062 A72-29875

Microinhomogeneous solid bodies elastic fields and effective moduli calculation method within framework of random field theory, using singular approximation

13 p2062 A72-29884

Two dimensional boundary value problems of elasticity for simply connected noncanonical domains, using small parameter method

13 p2062 A72-29952

Minimum weight elastic structure designs under dynamic loads with constraints on stress displacements and natural oscillation frequencies

13 p2062 A72-30009

Shock waves internal structure in gas of elastic spheres, solving nonlinear Boltzmann equation

13 p1944 A72-30029

Modified finite element method application to plane elastic area elementary triangles strained and stressed state description by polynomial algebraic expressions and harmonic functions

14 p2163 A72-30188

Elastic effects in metal hardness testing with blunt indenter, considering indentation in rigid plastic manner

14 p2113 A72-30268

Elastic crack tip stress fields, considering weight function

15 p2322 A72-31347

Nonlinear Cosserat continuum theory of elasticity, discussing kinematics and stressed state as functions of angular velocity, acceleration, volume forces and moments

15 p2274 A72-31476

Three dimensional elasticity boundary value problems solution via multidimensional Fourier transforms, applying to semiinfinite solid and hollow cones

15 p2324 A72-31481

Dispersed particle shape effect on elastic behavior of magnesium oxide composites at low graphite concentrations

15 p2260 A72-31585

Elastic properties of media with cracks, discussing elastic anisotropy and crack distribution

15 p2327 A72-31733

First boundary value problem solution for circle in static elasticity theory using Fredholm equation and source-sink method

15 p2328 A72-31849

Papers on elasticity and thermoelasticity covering contact problems, stress effects on elastic wave propagation velocity, self excited thermal waves, diffraction, nonlinear thermoelasticity, etc

15 p2329 A72-32280

Uniqueness, existence and smoothness theorems for elliptic dynamic boundary problems in elasticity theory

15 p2329 A72-32286

Plasticity, elastic relaxation and stress-strain relation characterization for Schofield-Scott Blair media, using nonequilibrium thermodynamics method

15 p2331 A72-32482

Carbon and graphite fiber reinforced composites elastic constants derived from ultrasonic immersion technique

15 p2261 A72-32503

Large amplitude deflections and induced stresses in uniformly pressure loaded circular plate on elastic foundation, using von Karman coupled nonlinear partial differential equations

15 p2331 A72-32558

Static boundary value problem of axisymmetric elasticity for elastic isotropic media with small energy contribution to potential due to moment effects

16 p2464 A72-32934

Completeness proof for linear elasticity theory set of three harmonic functions based on theory of linear differential equations with constant coefficients

16 p2466 A72-33018

Interaction forces between two dislocations in infinite weakly anisotropic media with bcc crystal lattice elastic properties

16 p2424 A72-33146

Inverse transformations in mathematical models of elasticity and plasticity problems reducible to biharmonic equation

16 p2468 A72-33163

Nb-Mo alloys elastic constants anomalous temperature dependence, proposing phase changes role and relationship to neutron diffraction and specific heat

16 p2405 A72-33167

Elastic-plastic-viscous model for creep analysis of rheo-mobile materials, taking into account cracks and other defects

16 p2412 A72-34116

Variational methods for dispersion relations and elastic properties of composite materials.

[ASME PAPER 71-APMW-21] 17 p2623 A72-34302

Russian book on metal fatigue and inelasticity covering structural inhomogeneities, static and dynamic loading, failure mechanisms, deformation, temperature effects and test methods

17 p2566 A72-34649

On the introduction of potential functions in linear elasticity

17 p2627 A72-34773

Dissipative periodic process theory for application to elasticity and distributed parameter and hereditary systems defined by partial and functional differential equations

17 p2575 A72-34867

Elastic behavior of multilayered bidirectional composites.

17 p2632 A72-35234

Elastic vibrations in roller bearings. I - The rotating mass is balanced with respect to its own rotation axis

17 p2561 A72-35894

Ultrasonic tests for incipient fatigue, hardness and elastic constants-tensile strength relationship in metals

18 p2690 A72-36125

Ultrasonic velocity measurement of elastic constants of Al-Al3Ni unidirectionally solidified eutectic.

18 p2701 A72-36591

On axisymmetric vibration in a transversely isotropic finite cylindrical shell acted upon by a magnetic field.

18 p2711 A72-36755

Hypo-elastic dielectrics. I - Constitutive equations. II - Birefringence in simple shear.

18 p2720 A72-37043

A sandwiched layer of dissimilar material weakened by crack-like imperfections.

18 p2737 A72-37058

Wave propagation in half plane consisting of two joined elastic quarter planes under in-plane disturbances normal to free surface, obtaining stresses at interface

18 p2738 A72-37069

Infinite plate with a supported reinforced circular hole.

18 p2738 A72-37071

A non-linear integral-type theory of inelasticity for transversely isotropic materials.

18 p2738 A72-37075

Nonstationary parametric response of a nonlinear column.

18 p2738 A72-37079

On strain energy and constitutive relations for alkali metals.

18 p2703 A72-37087

Experimental determination of viscoelastic characteristics

18 p2740 A72-37211

Point-loaded discs and blocks applicable to tensile testing of brittle materials.

19 p2870 A72-37223

An initial value method for dual integral equations.

19 p2824 A72-37413

Linear physical and nonlinear geometric formulation of design problem for prestressed rubber parts based on elasticity theory in terms of assembly requirements

19 p2871 A72-37428

Thermal expansion at elevated temperatures. III - A hemispherical laminar composite of pyrolytic graphite, silicon carbide and its constituents between 300 and 800 K.

19 p2822 A72-37463

Periodic integral convolution equations in elasticity theory and mathematical physics, demonstrating solution existence

19 p2872 A72-37561

Elasticity theory three-dimensional axisymmetric problem reduction to two dimensional analytic function boundary value problem

19 p2872 A72-37563

German monograph - Computation of the stress condition in homogeneous anisotropic discs with the aid of an integral equation method

19 p2873 A72-37660

Mixed boundary value problem in the theory of elasticity for a half-space with circular lines of separation between boundary conditions

19 p2876 A72-38152

Method of sources for solving axisymmetrical problems in the theory of elasticity

19 p2877 A72-38202

Solution manifolds for dynamic elasticity equations corresponding to the action of a concentrated load

19 p2878 A72-38213

Elastic constants of niobium-molybdenum alloys in the temperature range -190 to +100 C.

19 p2821 A72-38591

Energy propagation in a Cauchy elastic material.

19 p2878 A72-38718

Large elastic deformations of an incompressible material heteroresistant to tensile and compressive strains

20 p2978 A72-39021

Tensile and compressive flow strength and work hardening behavior in maraging steels, attributing strength differential to nonlinear elastic interactions between interstitials and dislocations

20 p2979 A72-39467

Elasticity of some mantle crystal structures. I - Pleonaste and hercynite spinel.

20 p2917 A72-39478

Beams on bilinear elastic foundations.

20 p2980 A72-39692

Thin elastic rings subjected to radial load sets

[ASME PAPER 71-WA/DE-2] 20 p2980 A72-39812

Elastic analysis for a radial crack in a circular ring.

20 p2981 A72-39959

Elasticity theory axisymmetric problem for hollow cones analyzing stress-strain state and boundary value problem by asymptotic methods

20 p2982 A72-40036

Stress induced martensitic transformation relationship to shape memory effect compared with superelasticity, transformation plasticity and reversible linear change

21 p3065 A72-40091

Electrical modeling of the plane problem of elasticity theory in terms of stresses

21 p3116 A72-40164

Singular moment stresses in homogeneous solutions of plane problem with semiinfinite cut within elasticity theory

21 p3116 A72-40274

Another boundary value problem of the linear theory of elasticity in regions with a fractionally-grained boundary

21 p3119 A72-41091

Elastic isotropic material mechanical and thermal constitutive equations restrictions investigation to ensure local stability under perturbations of deformation gradient and temperature field

21 p3120 A72-41203

Six dimensional vector space of stresses in elastic piecewise linear material divided into separate regions having different linear stress-strain relation

21 p3122 A72-41345

Method of eigenfunctions in problems of thermoelasticity and electroelasticity

21 p3122 A72-41348

Constitutive equations and boundary value problems in discrete theory of elasticity, noting linear systems of prismatic rods and lattice type shells

21 p3123 A72-41390

Stresses in bonded materials with a crack perpendicular to the interface.

21 p3124 A72-41396

The stress intensity factors of a radial crack in a finite rotating elastic disc.

21 p3124 A72-41397

On the plastic behaviour of time dependent materials - Theoretical and experimental investigation.

21 p3124 A72-41504

Non-linear elastic constitutive equations.

21 p3125 A72-41514

Experimental investigation of the elastic characteristics of composite bearings in turbine machinery for the purpose of increasing their efficiency and reliability during nonlinear vibrations of the rotor

22 p3181 A72-41860

Quasi-regularity of infinite systems in problems of two-dimensional elasticity theory for doubly connected domains

22 p3233 A72-42063

Integral equations and transformations in application to problems of elasticity theory

22 p3236 A72-42625

Minimum weight elastic structure designs under dynamic loads with nonlinear constraints on stress displacements and natural oscillation frequencies

22 p3236 A72-42737

The dynamic viscoelastic properties of some non-crystalline metals.

22 p3214 A72-42792

Effects of non-homogeneity on the stresses in a rotating cylinder.

22 p3240 A72-42877

Stress-strain state induced by local physicochemical transformations in a layer

22 p3242 A72-43164

Plane problem of elasticity theory for known normal and tangential stress tensor components at boundary of simply connected region, calculating stress concentration

23 p3344 A72-43353

Edge and screw dislocations induced stress fields in isotropic medium, using Kauderer nonlinear elasticity theory

23 p3345 A72-43622

Construction of the solution of a two-dimensional mixed boundary value problem for an arbitrary doubly connected region

23 p3345 A72-43629

Bearing supports elasticity effect on pendulum vibration of rigid rotating shaft with disk, noting vibrational frequencies relation to resonant frequencies

23 p3293 A72-43668

Elastic stiffness of AT-2 and AT-3 titanium alloys and their welds at high and low temperatures

23 p3302 A72-43966

A new variational principle for finite elastic displacements.

23 p3350 A72-44047

- On the solution of plane, orthotropic elasticity problems by an integral method. [ASME PAPER 72-APM-BB] 23 p3350 A72-44056
- Stability and vibration of transversely isotropic beams under initial stress. 23 p3350 A72-44057
- The elastic analysis of the part-circular surface flow problem by the alternating method. 23 p3353 A72-44232
- Numerical evaluation of elastic stress intensity factors by the boundary-integral equation method. 23 p3353 A72-44233
- Nonlinear elastic torsion analysis for aerospace materials. 23 p3354 A72-44251
- Zeta core for sandwich construction with rigidity-to-weight ratio comparable to honeycomb core, discussing elastic properties and cost. 23 p3355 A72-44495
- The calculation of elastic tanks partially filled with liquids for prediction of the Pogo effect. 24 p3392 A72-45152
- Boron and carbon contents effect on elastic properties strength and ductility of electron beam melted Mo-B alloys. 24 p3414 A72-45381

ELASTIC SCATTERING

- Laser radar application to air pollution measurement, discussing techniques and instrumentation utilizing elastic, Raman and fluorescence scattering [AIAA PAPER 71-1056] 01 p0028 A72-10527
- Electrical conductivities dependence on assumed values of elastic collision cross sections of electrons with neutral and charged particles in low temperature plasma. 01 p0110 A72-11205
- Low energy phase shifts for elastic scattering of electrons by Li and Na. 03 p0391 A72-13745
- Radiation damage in MgO, ZnO and magnesium difluoride, considering energy dependence and roles of radiolysis and elastic collisions. 03 p0404 A72-14088
- Elastic scattering without dissociation of nitrogen molecular ions by noble gas targets in 0.3-3 keV range, analyzing energy loss. 03 p0393 A72-14357
- Heuristic theory of positron-helium elastic scattering phase shifts and cross sections. 03 p0393 A72-14399
- Proton elastic scattering by deuterons in backward hemisphere, examining normal and center of mass scattering angle and differential cross section. 04 p0551 A72-14437
- Random method to solve basic rarefied gas/Boltzmann equation, applying to elastic collisions. 04 p0551 A72-14518
- Intermolecular potentials determination by inverting phase shifts obtained from high resolution measurements of protons differential elastic scattering by rare gas atoms. 04 p0552 A72-14577
- Measuring apparatus for differential cross sections of charge transfer and elastic scattering of atomic projectiles by gas targets. 04 p0553 A72-15539
- Small distance range anisotropic intermolecular interaction potentials for carbon dioxide and nitrogen oxide from beams elastic scattering data. 06 p0852 A72-17983
- Quasi-elastic scattering differential cross section for nonpolarized IR radiation in electron plasma of semiconductors in strong elastic fields. 09 p1366 A72-22210
- Elastic singlet p wave phase shift calculation for electron scattering by H atom and He cation, using time dependent Hartree-Fock perturbation theory. 09 p1355 A72-22786
- Va crystal lattice interatomic bonds and elastic and inelastic X ray scattering intensity calculation. 09 p1329 A72-23042
- Low energy elastic scattering cross section measurements for helium-nitrogen system, using two collimated aerodynamically intensified crossed molecular beams. 10 p1515 A72-24338
- Reduced mass and asymmetry differences effects on elastic collision integrals and thermal diffusion factors for isotopic hydrogen molecules. 10 p1515 A72-24340
- Elastic, inelastic and reactive scattering experiments with low, high and intermediate energy molecular beams. 11 p1691 A72-25675
- Elastic and one-phonon inelastic scattering of monoenergetic He atoms from cleaved LiF crystal surface. 15 p2281 A72-31862
- Redistribution of resonance radiation. 1 - The effect of collisions. 17 p2605 A72-34534
- Absolute differential cross sections of electrons elastically scattered on neon atom. 18 p2713 A72-36952

- Analysis of pion-helium scattering for the pion charge form factor. 19 p2837 A72-37922
- Elastic scattering of 600-MeV protons from H, D, He-3, and He-4. 19 p2837 A72-38025
- Nonelastic interactions of nucleons and pi mesons with complex nuclei at energies below 3 GeV. 19 p2837 A72-38027
- Interpretation of experimental differential elastic scattering cross section for H⁺/+ Ne. 20 p2956 A72-39721
- Application of the Harris-Nesbet method to a dipole coupling potential. 21 p3083 A72-40103
- Cross sections calculations for electron-oxygen scattering using the polarized orbital close coupling theory. 21 p3087 A72-40472
- Angular distribution of electrons elastically scattered from N₂. 21 p3088 A72-40777
- Elastic electron-neutral interaction in argon in the vicinity of the Ramsauer minimum. 22 p3211 A72-42642
- Light scattering studies in amorphous media. 22 p3206 A72-42798
- Coherent/incoherent elastic/inelastic neutron scattering in amorphous solids, presenting neutron intensity and correlation functions. 22 p3206 A72-42799
- Multifireball theory of particle production in inelastic high energy interactions, using elastic scattering amplitude for inelastic processes model. 23 p3316 A72-44412
- Electron scattering by molecules with and without vibrational excitation. IV - Elastic scattering and excitation of the first vibrational level for N₂ and CO at 20 eV. 24 p3427 A72-45304
- Electron scattering by molecules with and without vibrational excitation. V - Elastic scattering and non-resonant vibrational excitation of N₂ at 30-83 eV. 24 p3427 A72-45305

ELASTIC SHEETS

- Elastic unbounded homogeneous layer separation from half plane under normal load pressures, determining contact area with base for elastic moduli relationships. 08 p1243 A72-21233
- Longitudinal and transverse waves propagation and decay in elastic membranes with allowance for coupling effects, using Hadamard method. 16 p2465 A72-32983
- Stress concentration in elastic layer with circular slot analyzed by reducing mixed boundary value problem to initial condition problem via invariant imbedding. 16 p2471 A72-33827

ELASTIC SHELLS

- Differential equations derived for elastic-plastic behavior of rotationally symmetric shells, approximating in finite difference forms and solved by elimination method. 01 p0138 A72-10394
- Wave propagation in thin elastic shells by similar formation of shell and nonlinear elasticity theories equations. 01 p0142 A72-11197
- Temperature fields and stresses in thin elastic non-ferromagnetic electrically conducting cylindrical shells heated by induction determined from heat source distribution and thin shell theory relations. 02 p0290 A72-11631
- Acoustic field hf asymptotic characteristics after sound transmission through elastic shell, using integro-differential equations system. 03 p0388 A72-12917
- Homogeneous isotropic thin elastic shells under forces along edge and with faces free of tractions, deriving refined interior equilibrium equations. 03 p0447 A72-13882
- First approximation of linear elastic shell theory using split constitutive equation of stress tensor. 03 p0454 A72-14341
- Mathematical models of elastic shells and rods, discussing virtual work, operator classifications, deformations and constitutive equations. 03 p0454 A72-14344
- Pressure field calculations for random vibrations in wide class of elastic shells containing acoustic medium, discussing turbulent boundary layer-caused pulsations. 04 p0586 A72-15010
- Thin walled elastic axisymmetric fluid filled tanks under longitudinal vibrations, determining dynamic characteristics. 04 p0586 A72-15011
- Iteration method error estimates for thin elastic shell basic stressed state and simple fringe effect relation to boundary stressed state. 04 p0586 A72-15012
- Canonical form for boundary conditions of thin elastic shells with oscillating loads applied on edges. 04 p0587 A72-15013

Nonlinear elastoplastic deformations of flexible shells of revolution, calculating stress concentration at circular hole in spherical shell. 04 p0588 A72-15049

Critical load limit and stability of elastic isotropic and orthotropic cylindrical shells, using net-point method for end conditions. 04 p0588 A72-15053

Radiated pressure field in unbounded acoustic medium produced by pulsed elastic cylindrical circular shell. 04 p0590 A72-15188

Stress and strain approximate analysis for thin elastic shells by rational derivation of two dimensional differential and constitutive equations [AD-745612]. 04 p0592 A72-15506

Shell bending and Timoshenko-type theory to solve stresses of semiinfinite elastic circular cylindrical shells produced by radial pressure pulses [ASME PAPER 71-WA/APM-16]. 05 p0733 A72-15964

Stress state of variable thickness long elastic shallow shell in bending and torsion, applying equations to large turbine blades. 05 p0735 A72-15986

Thin elastic shell postbuckling behavior from asymptotic integration solution for differential equations, permitting dynamic effect modeling. 05 p0738 A72-16425

Equilibrium conditions of closed elastic spherical shell under uniform nearly critical compression loads, determining shell deformation in Hilbert spaces. 05 p0739 A72-16587

Flutter of thin elastic circular cylindrical fluid filled shells, presenting potential flow theory for coupled hydrodynamic forces. 06 p0894 A72-17763

Thin walled elastic isotropic shallow shell with thermal boundary conditions, obtaining thermoelastic solution in series form. 06 p0899 A72-18657

Shallow elastic shell under periodic distributed torque loading, investigating static stability enhancement through nonlinear boundary value problem periodic solutions. 06 p0900 A72-18697

Nonlinear resonance oscillations of flexible rod and elastic cylindrical shell under potential and nonpotential forces, investigating motion instability. 06 p0900 A72-18704

Optimal rigid-plastic limit load analysis of spherical shells under nonsymmetrical loadings, using SUMT and Rosenbrock method. 07 p1087 A72-18791

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function. 07 p1034 A72-18922

Dynamic behavior of stiffened hollow viscoelastic cylinder and elastic shell-contained sphere, taking into account compressibility and internal pressure. 07 p1090 A72-19751

Stress-strain state of unclamped thin elastic zero curvature shell under three component surface load and tangential boundary forces. 07 p1095 A72-20313

Asymptotic eigenvalue density estimates for edge-hinged thin elastic rectangular shell, determining shell stability linear equation solution conditions. 07 p1095 A72-20324

Wave propagation in hollow elastic/viscoplastic sphere under impact load, assuming Mises condition, isotropic hardening and incompressibility. 07 p1096 A72-20429

Axial impact of semiinfinite elastic cylindrical shell filled with inviscid compressible fluid, obtaining equations of motion. 08 p1149 A72-21166

Uniaxially stressed elastic/soft shells with fold formation during compressive strain, formulating equilibrium and boundary conditions for uniaxial region. 08 p1247 A72-21812

Orthotropic circular cylindrical elastic shell vibration mode shape analysis by Vlasov equations, using asymptotic method. 08 p1247 A72-21813

Variable wall thickness influence on axisymmetric vibrations frequencies and reduced masses of cylindrical elastic shell filled with ideal incompressible fluid. 08 p1247 A72-21815

Elastic shell geometry and rigidity effects on critical load in pure bending within structurally orthotropic theory, taking into account reinforcing rib eccentricity. 08 p1247 A72-21816

Normal axial impact of thin liquid filled elastic cylindrical shell with rigid bottom on compressible fluid half space surface. 09 p1350 A72-22207

Stress-strain state produced by asymmetric physical and thermal loads in thin orthotropic viscoelastic shells of revolution. 09 p1399 A72-22702

Axisymmetric deformation of hollow elongated elastic ellipsoid, using Lamé equilibrium equations. 09 p1400 A72-22708

Thermal insulations in form of thin shells of revolution with rigid external and elastic internal layers resting on rigid core
09 p1400 A72-22713

Nonuniformly heated infinite elastic cylindrical shell stability under axial compression loads
09 p1402 A72-22734

Torsional behavior of twisted elastic orthotropic cylindrical shells after stability loss, using energy method
09 p1404 A72-22771

Rotationally symmetric stress and strain distribution in anisotropic elastic shells of revolution
[AD-745622] 09 p1405 A72-22944

Nonlinear random radial vibration of elastic cylindrical shell under load, using stochastic linearization and correlation analysis
09 p1409 A72-23606

Natural axisymmetric vibration of thin elastic shell of revolution, deriving eigenvalues convergence to spectrum lower bound by asymptotic method
10 p1557 A72-24429

Direct numerical integration scheme for viscoelastoplastic response of isotropic axisymmetric shells under impulsive loads
[AIAA PAPER 72-400] 11 p1731 A72-25421

Asymmetrically stiffened elastic cylindrical shells under axial compression, calculating critical loads for various end conditions
11 p1733 A72-25541

Hollow elastic momentless spherical shell translatory displacements in compressible fluid under nonstationary spherical wave
12 p1880 A72-27234

Elastic truncated thin conical shell response to dynamically applied axial force from numerical solution of nonlinear equations
12 p1881 A72-27244

Structural effects of meridian imperfections in symmetrically loaded elastic thin shell of revolution
12 p1881 A72-27255

Linearized elastic equilibrium stability equations for orthotropic cylindrical shell under critical axial compression
12 p1885 A72-27970

Acoustic pressure wave effect on motion of elastic conical shell fastened in rigid screen, using Timoshenko theory
13 p2055 A72-28772

Oscillations and acoustic emission by interacting elastic shells in connecting medium, using quadratures with Green function
13 p2004 A72-29208

Inhomogeneous viscoelastic shell stability, determining correlation functions for first approximations of sag, stress functions and critical time alterations
13 p2062 A72-29886

Dynamic behavior of thin walled semiinfinite elastic cylindrical shell with liquid under axial impact loads
13 p1943 A72-30008

Stress analysis of thick walled hollow viscoelastic circular cylinder enclosed in elastic shell and subjected to nonlinear creep conditions, noting temperature effects
14 p2165 A72-30439

Average stress and strain across thickness of liquid filled cylindrical elastic thin walled shell with rigid bottom under axial impact loads
14 p2166 A72-30698

Distributed parameter system approximation by system with finite freedom degrees number, solving stability and vibration of elastic shells for eigenvalue densening case
15 p2327 A72-31739

Elastic shell initial stress effects on dynamic response in all free vibration modes, considering transverse shear and normal strains
15 p2328 A72-32021

Thin walled elastic shells stability under finite deformations, deriving equilibrium conditions and constitutive equations
15 p2330 A72-32464

Preloaded thin walled open section elastic column dynamic stability under free longitudinal vibrations, deriving criterion for flexural and torsional vibrations nonlinear coupling
15 p2332 A72-32560

Natural frequency distribution theory of thin elastic shells under random vibrations in wideband field
15 p2332 A72-32677

Thin elastic isotropic plates and shells thickness variation for rigidity functional stationary value, reducing problem to stress-strain state equations simultaneous solution
15 p2333 A72-32688

Longitudinal, transverse and bending waves propagation in elastic shells, using Hadamard method within linear shell theory
16 p2465 A72-32982

Perturbation scheme for branching analysis of postbuckling behavior in elastic spherical shells
16 p2465 A72-33001

Linear theory for spirally sinusoidal stress distributions in elastic helicoidal shells applied to pure bending problem
16 p2465 A72-33003

Matrix progression method analysis of free vibration problem for cantilever thin circular cylindrical elastic shells, using Flugge equations
16 p2475 A72-34173

Analysis of wave propagation in elastic cylindrical shells by the perturbation method.
17 p2623 A72-34307

Contact pressure between an elastic spherical shell and a rigid plate.
[ASME PAPER 72-APM-31] 17 p2628 A72-34788

Numerical solution of problems of large deformations for spherical elastic shells
17 p2634 A72-35421

Elastic momentless shell completely filled with ideal incompressible liquid, detailing small steady free vibrations
18 p2681 A72-36667

Radial vibration of a composite cylindrical shell subjected to a magnetic field.
18 p2711 A72-36753

A proof of the accuracy of a set of simplified buckling equations for circular cylindrical elastic shells.
18 p2739 A72-37091

Equilibrium conditions of closed elastic spherical shell under uniform nearly critical compression loads, determining shell deformation in Hilbert spaces
19 p2872 A72-37558

Complex transforms method for Timoshenko theory of elastic shells, deriving transverse shear strain equations for shallow shells
19 p2876 A72-38154

Zero-moment reinforced axisymmetric shells
19 p2876 A72-38155

Heat-conduction equations for multilayer shells
19 p2881 A72-38158

Dispersion of flexural waves in circular cylindrical shells.
20 p2982 A72-39975

Stresses in a circular cylindrical shell having two circular cutouts.
20 p2982 A72-40063

Finite element large deflection analysis of elastic-plastic shells of revolution subjected to axisymmetric loading.
20 p2982 A72-40064

Plane acoustic pressure wave effect on motion of thin elastic truncated conical shell fastened in rigid screen, using Timoshenko theory
21 p3116 A72-40263

Differential equation reduction via coordinate transformation to algebraic form for problems characterization in elastic shell Cosserat surface theory
21 p3119 A72-41103

Buckling of inelastic cylindrical shells under axial impact.
21 p3124 A72-41507

Influence of elastic constants on the stability margins and weight characteristics of fiberglass-reinforced shells
22 p3196 A72-41864

Symmetry transformations for thin elastic shells.
22 p3234 A72-42398

Dynamic behavior of thin walled semiinfinite elastic cylindrical shell with compressible liquid under axial impact loads
22 p3167 A72-42736

Rotatory vibration of a thick spherical shell of isotropic non-homogeneous elastic material.
22 p3240 A72-42880

Torsional vibration of an orthotropic cylindrical shell.
22 p3240 A72-42881

Dynamic loading of a fluid-filled spherical shell.
22 p3240 A72-42891

First order constraints in three dimensional continuous elastic fibrous media and thin shells, presenting equilibrium equations
23 p3349 A72-43825

Theory of thin elastic shells applied to pipe bends subjected to bending and internal pressure.
24 p3456 A72-44795

Stress state of variable thickness long elastic shallow shell in bending and torsion, applying equations to large turbine blades
24 p3460 A72-45728

ELASTIC STABILITY
U DAMPING
ELASTIC STRENGTH
U PROPORTIONAL LIMIT
ELASTIC SYSTEMS

Whirling elastic shaft-disk system, investigating interaction effects of external and linear/nonlinear material damping, elastic restoring forces and inertia forces
01 p0101 A72-10036

Axial and radial displacements determination in rotor center of gravity for gyroscope with elastic suspension
03 p0360 A72-13560

Multimass multiply branched multistage elastic systems natural frequencies and oscillation modes, presenting algorithm and iterative calculation procedure
03 p0449 A72-13913

Magnetic damping comparison with internal viscous damping effect on circulatory elastic system equilibrium stability
05 p0689 A72-16061

Two-mirror optical system to study energy dissipation in elastic systems subjected to cyclic straining and vibrations
06 p0819 A72-18649

Vibration simulation of elastohysteretic systems on analog computers using photocurrent-voltage relationship of polycrystalline photoresistors
06 p0900 A72-18674

Nonlinear elastic systems with distributed parameters, obtaining single frequency mode random oscillations solution of boundary value problem by asymptotic method and Markov process
06 p0850 A72-18700

Sufficient conditions for asymptotic stability and instability for elastic systems with dissipation, using Liapunov direct method
07 p1026 A72-18809

Linear mechanical elastic systems divergence with infinitely large frequency onset, noting discrete cantilever beam under nonconservative forces
[ASME PAPER 71-APM-DDD] 10 p1555 A72-24189

Varied states superimposed on finite elements in discrete elasticity, noting small oscillations superposition on arbitrary motion of elastic system
12 p1845 A72-27393

Equilibrium state stability in elastic conservative system, relating system postbuckling behavior to critical branching point
13 p2054 A72-28478

Structural approach to elastic stability in buckling problems, simplifying deformation concepts and loading condition definition
13 p2054 A72-28479

Canonical equations of motion for continuous elastic system, predicting critical buckling loads for unbounded deformation
13 p2054 A72-28482

Complex elastic systems natural frequencies computation from measured dynamic response to harmonic excitation, applying to helicopter and transport aircraft
14 p2164 A72-30326

Dynamic stability of elastic systems under broadband random excitation, presenting solution for straight rod under axial pulsating forces via perturbation method
15 p2274 A72-31460

The elastic stability of two-parameter nonconservative systems.
[ASME PAPER 72-APM-43] 17 p2627 A72-34782

Coordinate transformation for perturbation analysis of elastic structural system imperfections influence on elastic buckling
18 p2732 A72-36079

Higher vibration modes by matrix iteration.
18 p2736 A72-36772

Elastically supported dry two degrees of freedom tuned gyroscopes, analyzing open-loop transfer function for characteristic errors
19 p2794 A72-37280

The effects of discrete masses and elastic supports on continuous beam natural frequencies.
21 p3116 A72-40335

- Constant stress effect on propagation velocity of elastic waves in three dimensional body, considering earth crust and earthquake prediction applications
 15 p3239 A72-32284
- Elastic wave diffraction on multiconnected cylindrical or spherical regions in nonsymmetric elasticity theory, determining constants of series solution
 15 p2330 A72-32290
- Plane wave dispersion and nonlocal elasticity equations linearization, demonstrating continuum treatment of lattice dynamics
 15 p2330 A72-32445
- Elastic wave scattering by moving slab, calculating reflection and transmission coefficients for various incidence angles, frequencies and motion velocities
 15 p2219 A72-32476
- Nondispersive guidance structure for acoustic surface waves due to velocity reduction of thin conducting strip on piezoelectric substrate
 15 p2278 A72-32506
- Longitudinal, transverse and bending waves propagation in elastic shells, using Hadamard method within linear shell theory
 16 p2465 A72-32982
- Shock tube diaphragm rupture effect on density distribution in rarefaction wave as function of time, using mirror laser interferometer measurement
 16 p2390 A72-33161
- Elastic wave diffraction by rigid ellipsoid, deriving scattering cross section for incident P wave from integral equation solution
 16 p2426 A72-33659
- Transient elastic wave propagation in circular cylinder during sudden torsional shear stress application to end surface, noting surface particle velocity and stress
 16 p2426 A72-33660
- Sonic boom induced pressure wave propagation and attenuation in water, comparing ballistic range measurements with theoretical predictions
 [AIAA PAPER 72-654] 16 p2349 A72-34080
- Acoustic edge scattering of elastic surface waves
 17 p2579 A72-34227
- Variational methods for dispersion relations and elastic properties of composite materials
 [ASME PAPER 71-APMW-21] 17 p2623 A72-34302
- Guided elastic wave propagation near curved surfaces and in nonconstant thickness layers, discussing asymptotic solution and applications to Love, Rayleigh and Lamb waves
 [ASME PAPER 72-APM-00] 17 p2580 A72-34306
- High-frequency ultrasonic devices
 17 p2526 A72-34564
- Longitudinal pulses propagation in straight hollow circular elastic tubes, presenting strain-time records
 [ASME PAPER 72-APM-10] 17 p2629 A72-34806
- WKB large frequency expansion solution for elastic waves propagating into inhomogeneous elastic medium with harmonic periodicity, using perturbation method
 [ASME PAPER 72-APM-3] 17 p2630 A72-34810
- Elastic wave propagation in a joined cylindrical-conical-cylindrical shell
 [SESA PAPER 1983] 17 p2630 A72-34819
- Theory for the excitation of SHF elastic waves by multiple-film transducers / Allowance for the influence of metallic and dielectric layers/
 17 p2529 A72-34843
- Propagation mechanism of tensor wave in solid elastic body due to impact
 18 p2734 A72-36377
- Theory of elastic wave propagation in composite materials
 18 p2703 A72-36395
- Scattering of elastic waves by moving objects
 18 p2709 A72-36403
- Reflection and refraction of elastic waves in edge-impacted rectangular plates
 18 p2737 A72-37065
- A study of thermoelastic waves by the method of characteristics
 18 p2737 A72-37068
- Wave-front singularities for two-dimensional anisotropic elastic waves
 18 p2739 A72-37175
- Bending waves diffraction and scattering by mass impedance loadings of infinite plane plate, considering point load and semiinfinite rib arrays
 18 p2739 A72-37203
- Effect of electrode thickness on the frequency response of a piezoelectric transducer
 18 p2693 A72-37218
- A note on the low frequency diffraction of elastic waves by a Griffith crack
 19 p2870 A72-37414
- A device for recording acoustic signals of crack formation in brittle materials
 19 p2802 A72-38018
- Analysis of piezoelectric thin-film transducers for elastic surface waves
 19 p2804 A72-38607
- Martin-Ludford gas expansion into vacuum, investigating rarefaction wave penetration and flow characteristics
 19 p2788 A72-38715
- Constitutive equations and wave propagation of anisotropic perfectly plastic materials
 19 p2878 A72-38800
- Elastic wave propagation in a rod of finite length with a variable cross section
 20 p2978 A72-39321
- Boundary-layer effects on pressure variations in Ludwig tubes
 20 p2914 A72-39620
- Steady solutions of generalized Korteweg-de Vries equation for oscillatory solitary waves in dispersive media
 21 p3089 A72-40197
- Plane acoustic pressure wave effect on motion of thin elastic truncated conical shell fastened in rigid screen, using Timoshenko theory
 21 p3116 A72-40263
- Variational theorems for harmonic waves in elastic composites with periodic structures, considering wave propagation in layered and in fiber reinforced composites
 21 p3119 A72-41101
- Elastic wave energy absorption in structures under dynamic loads, noting fatigue fracturing decrease with energy transfer into damping medium
 21 p3126 A72-41540
- Diffraction of an elastic wave at a disk
 21 p3127 A72-41669
- Crack tip stress field alteration via elastic pulses for changing crack trajectory or fracturing process termination, using polarization optical method
 21 p3061 A72-41824
- Rarefaction wave generation by solar wind shock wave interaction with magnetosphere, noting geomagnetic field weakening during magnetic storm
 22 p3217 A72-41894

- Bending waves propagation through flat plate forming rigid sound bridge between two parallel plates, calculating energy transfer at LF oscillations
22 p3234 A72-42128
- Finite difference theory for Lamé equations of elastic waves propagation in two dimensional body under mixed boundary conditions
22 p3234 A72-42144
- Wave propagation in a truncated conical shell.
22 p3235 A72-42524
- Dynamic photoelasticity application to periodic/vibrating and pulse/stress wave fields, considering loading rate effect on material fringe value
22 p3237 A72-42767
- Some recent experimental investigations in stress-wave propagation and fracture.
22 p3237 A72-42768
- Reflection of pulses at the interface between an elastic rod and an elastic half-space.
23 p3314 A72-44119
- A new concept for correcting the attenuation effects in a shock tube.
24 p3388 A72-44985
- Plane thermoelastic one-dimensional waves in an inhomogeneous medium with allowance for connectedness
24 p3459 A72-45266
- Thermoelastic waves propagation in homogeneous isotropic medium, considering potential functions
24 p3460 A72-45598
- ELASTICITY**
U ELASTIC PROPERTIES
ELASTICIZERS
U PLASTICIZERS
ELASTODYNAMICS
NT ELASTIC DAMPING
NT ELASTOHYDRODYNAMICS
Book on uniqueness theorems in linear elasticity covering three and two dimensional elastostatics, whole and half spaces, mixed boundary value problems, elastodynamics, etc
01 p0136 A72-10003
- Perturbed vibrational motion in isotropic elastic solid, using nonlinear Truesdell equations
01 p0101 A72-10039
- Stokes and Love integral representations for elastodynamic displacement fields in elastic solid deduced by potential theory method
01 p0138 A72-10513
- Linear viscoelasticity theory dynamic functions, deriving delay and relaxation times distribution functions in polymers
02 p0293 A72-12211
- Elasticity theory Lamé difference equations system solved by two-step iteration procedure based on Samarski regularization
03 p0447 A72-13727
- Infinitely long Euler-Bernoulli damped periodic aluminum beam with elastic springs, determining distance for steady state sinusoidal response to spatial decay
05 p0736 A72-16111
- Mathematical modeling of discrete nonconservative dynamic elastic systems for finite sensitivity, using Liapunov stability
06 p0840 A72-18320
- Solution uniqueness in physically nonlinear viscoelasticity dynamic theory
08 p1195 A72-21761
- Nonstable oscillating motions positive measure set in dynamic system with noncompact phase space, considering elastically rebounded falling sphere on horizontal plate
08 p1210 A72-22188
- Linear viscoelasticity theory dynamic functions, deriving delay and relaxation times distribution functions in polymers
11 p1734 A72-25709
- Elastodynamics three dimensional problems formulation using displacement potential functions
12 p1883 A72-27544
- Uniqueness of solutions to displacement problem for unbounded bodies in linear elastodynamics
12 p1884 A72-27564
- Eigenstate field parameter bounds in elastomechanics natural vibration problems
13 p2059 A72-29598
- Boundary value problems in dynamics of Cosserat infinite elastic medium with finite crack, noting couple stresses effect on dynamic stress concentration
14 p2164 A72-30299
- Schaefer stress representation for elastokinetics of linearly elastic isotropic homogeneous body under small deformations and torsions
15 p2324 A72-31486
- Nonlinearity effects on finite amplitude, plane uniform oblique shock wave reflection, using inviscid gas analogous solution techniques
16 p2426 A72-33661
- Uniformly propagating finite crack in elastic strip of finite width, using two dimensional dynamic equations of elasticity
16 p2471 A72-33831
- Elastic vibrations in roller bearings. 1 - The rotating mass is balanced with respect to its own rotation axis
17 p2561 A72-35894
- On the dynamic response of an infinite Bernoulli-Euler beam.
18 p2735 A72-36758
- Book on classical relativity theory covering relativistic kinematics and mechanics, tensor calculus, electrodynamics, gravitational fields and effects, elastic continua mechanics, thermomechanics and cosmology
18 p2712 A72-36850
- Some properties pertaining to the stability of circulatory systems.
18 p2737 A72-37060
- Oscillatory flow of a viscous fluid in a flexible walled two dimensional channel.
18 p2684 A72-37064
- Astroelasticity in design and analysis of flexible space vehicles, presenting dynamics and control considerations
18 p2738 A72-37082
- An eigenfunction method for solving the second boundary-value problem in the theory of elasticity
19 p2877 A72-38182
- A technique for numerical solution of boundary value problems in the plane theory of elasticity by the finite-difference method
19 p2878 A72-38204
- Proof of existence theorems for the principal dynamic problems of thermoelasticity
20 p2978 A72-39317
- On the choice of a reference state in the application of Hamilton's principle in elastodynamics.
20 p2979 A72-39420
- Stress functions in three-dimensional elastodynamics.
21 p3117 A72-40677
- Diffraction of an elastic wave at a disk
21 p3127 A72-41669
- Invariant solutions of the differential equations of the uniform motion of a Hooke medium
22 p3233 A72-42058
- Analogies between linearized and linear problems in elasticity theory in the case of uniform initial states
22 p3233 A72-42061
- Three dimensional thermoelastodynamic theory for elastic beams, deriving nonlinear motion equations by combined expansion and variational methods
22 p3235 A72-42523
- Dynamic photoelasticity application to periodic/vibrating and pulse/stress wave fields, considering loading rate effect on material fringe value
22 p3237 A72-42767
- Elastodynamic theory of natural symmetrical vibrations of sandwich plates, assuming filler motion and layer displacements governed by Lamé and Kirchhoff equations
23 p3348 A72-43790
- A difference method for plane problems in magnetoelastodynamics.
23 p3321 A72-44051
- [ASME PAPER 72-APM-A] Drag spectra of simple structures in turbulence.
23 p3281 A72-44102
- ELASTOHYDRODYNAMICS**
Full lubrication characteristics, discussing pressure pump, viscosity, MHD, volume elasticity, centrifugal and rheodynamic techniques
03 p0365 A72-14299
- Isothermal elastohydrodynamic theory for full range of pressure-viscosity coefficient, considering film thickness effect
06 p0821 A72-17805
- Elastohydrodynamic lubrication of soft elastic-deformed contact surfaces, determining lubricant film thickness as function of inlet and outlet parameters
07 p0998 A72-20530
- Elastohydrodynamic lubrication - Conference, Leeds University, England, April 1972
12 p1816 A72-28107
- Reciprocating O ring seal sliding friction behavior prediction by elastohydrodynamic theory, noting dwell time, acceleration rate and previous deceleration effects
12 p1816 A72-28110
- Shear modulus of liquids at elastohydrodynamic lubrication pressures.
21 p3059 A72-40688
- ELASTOMERS**
NT THIOPLASTICS
Helicopter elastomeric bearing rotors, discussing downtime and cost reduction, maintenance, endurance and inspection
01 p0073 A72-10150
- Adhesive materials based on room temperature vulcanizing silicone elastomers for space shuttle vehicle reusable surface insulation bonding
01 p0075 A72-10763
- Elastomeric protective coating requirements from existing electrochemical metallic corrosion theories
03 p0364 A72-14238
- Free radicals formation during elastomers mechanical degradation by grinding below and above glass transition point at liquid nitrogen and room temperatures
04 p0484 A72-15264
- Internal strain measurement in solid elastomeric materials by radioactive implant method using pinhole camera or multichannel collimator
07 p0992 A72-20583
- Liquid polysulfide rubber, discussing fabrication method and physical properties
07 p1024 A72-20603
- Clam seals comparison with elastomers, discussing aircraft use, contamination, inspection, corrosion and erosion, surface finish, service life and cost
08 p1179 A72-21941
- Elastomeric silicone ablator heat shields thermal characteristics from NASA Planetary Atmosphere Experiments Test vehicle earth atmosphere entry measurements
13 p2064 A72-28953
- Silicone based elastomers acoustic excitation damping properties at 213-423 K, discussing testing technique and results at 200-1000 Hz
13 p1957 A72-29090
- Experimental determination of ultrasonic wave velocities in plastics, elastomers, and syntactic foam as a function of temperature.
18 p2703 A72-36415
- Use of a loaded silicon elastomer for insulation of channel multipliers of onboard electrons
18 p2670 A72-37140
- Isolator elastomers properties, discussing spring isolators, combination springs and pneumatic systems
19 p2806 A72-37550
- The fracture energy and some mechanical properties of a polyurethane elastomer.
19 p2823 A72-38450
- Recent developments in silicone elastomers for macroencapsulation.
20 p2944 A72-39492
- Elastomers fracture strength and failure modes under tension, tearing, ozone cracking, fatigue and abrasive wear associated with viscous resistance energy losses
23 p3305 A72-43506
- Molecular mechanical aspects of the isothermal rupture of elastomers.
23 p3305 A72-43507
- ELASTOPLASTICITY**
Differential equations derived for elastic-plastic behavior of rotationally symmetric shells, approximating in finite difference forms and solved by elimination method
01 p0138 A72-10394
- Thin walled sandwich cylindrical shells under internal pressure, calculating elastic-plastic zone propagation
01 p0141 A72-11001
- Affine similarity in static problems with mixed boundary conditions for inhomogeneous anisotropic linearly and nonlinearly elastic and viscoelastic and elastoplastic bodies
02 p0288 A72-11607
- Nonlinear photoelasticity, elastoplasticity and creep problems studies by optical polarization methods, comparing transparent model and photoelastic coating techniques
02 p0289 A72-11613
- Plate buckling elastoplastic process derivation allowing for secondary plastic deformation onset, examining stress discontinuity at overloading and unloading zones boundary
02 p0289 A72-11614
- One dimensional elastoplastic wave propagation symposia review emphasizing elastoviscoplastic media, jet penetration into half space and polymer tests by transverse impact
02 p0290 A72-11628
- Inhomogeneous microstructure elastoplastic medium, examining strain and work in plastic deformation
02 p0293 A72-12427
- Elastoplastic problem of stress concentration in orthotropic plate with circular hole under balanced biaxial tension of infinity
02 p0293 A72-12428
- Anisotropic and compressible work hardening materials three dimensional elastoplastic flow quasi-linear theory, deriving boundary integral equations
02 p0296 A72-12530
- Three layer plates elastoplastic stability, describing breakdown conditions by five differential equations with five unknown variables
02 p0299 A72-12690
- Elastoplastic material crack propagation behavior under arbitrary loading, introducing plastic zone, intensity and retardation factor concepts
02 p0300 A72-12726
- [DGLR PAPER 71-111] Microinhomogeneous elastoplastic cyclically strain hardenable material under symmetric loading, calculating stress-strain relationship
03 p0443 A72-13453
- Thermal stress concentration at circular heat-insulated hole in plate with elastoplastic strains, assuming temperature independent mechanical properties
03 p0445 A72-13575
- Optimal shape calculation for partially elastic and elastoplastic column under conservative load based on static stability criterion
03 p0447 A72-13851

Elastoplastic stress distribution in thin spherical metallic shells with cylindrical branch pipe under internal pressure

03 p0448 A72-13905

Elastic-plastic stress-strain analysis of beams with uniform cross section under combined loadings by finite element method

03 p0449 A72-13975

Elastoplastic bodies with crack at tip, determining limiting loads and crack propagation from variational relations

03 p0451 A72-14117

Crack growth in elastoplastic and viscous media under cyclic loading

03 p0452 A72-14137

Stress concentration problems in two and three dimensional elastoplasticity, using Ilyushin small deformation theory

03 p0453 A72-14213

Elastoplastic stability of structural rods in unloadable systems, considering load carrying capacity increase by critical state onset delay

03 p0454 A72-14214

Infinite elastic-plastic beam impact by semiinfinite elastic rod, computing strain-time profiles

04 p0583 A72-14447

Elastoplastic circular plates optimum shakedown design under cyclic loading

04 p0585 A72-14613

Elastoplastic body random vibration analysis by statistical linearization, obtaining free elastic vibration mode shapes and damping constants

04 p0586 A72-15005

Stress-strain increment relations for materials with different compression and tension resistance under orthogonal loading

04 p0586 A72-15007

Discrete variable approach for stress wave propagation in axisymmetric layered elastic-plastic solids

04 p0593 A72-15626

Error bounds on elastic-plastic strain wave measurements, considering one dimensional wave propagation in semiinfinite bar

[ASME PAPER 71-MET-W]

05 p0731 A72-15789

Elastoplastic creep analysis for cylindrical pressure vessel structural response during cyclic thermal shock, internal pressure and extended high temperature loading

[ASME PAPER 71-WA/PVP-12]

05 p0732 A72-15911

Turbine casing components stresses in presence of creep, demonstrating calculation method validity for thick-walled structures by elastoplastic analogy

05 p0734 A72-15985

Subcritical crack extension in elastoplastic or viscoelastic-plastic matrix, showing similar mathematical representations for fatigue crack propagation and creep rupture under sustained loads

05 p0737 A72-16302

Inverse periodic plane deformation of isotropic elastoplastic surface with infinite series of curvilinear holes

05 p0741 A72-17146

Complex potentials for nonlinear elasticity, creep and small elastoplastic deformations, applying to stress concentration at curvilinear hole in infinite plate

05 p0742 A72-17183

Green-Naghdi nonlinear thermodynamics of elastic-plastic deformation at finite strain, discussing relationship to nonisothermal theory

06 p0896 A72-17921

Stress concentrations at circular holes and inclusions in elastoplastic strain hardening plate under tension and shear

06 p0897 A72-18316

Elastic-plastic strain measurement on flat steel surfaces by moiré gratings, using electroluminescent source and crossing jig

06 p0818 A72-18323

Stationary small elastoplastic longitudinal forced vibrations of rods with internal resonance obtaining asymptotic solution of nonlinear partial differential equations

06 p0900 A72-18676

Small elastoplastic cyclic strain effects on internal friction and energy dissipation in metals during vibrations

06 p0834 A72-18679

Error analysis of finite element solutions for elastic-plastic sandwich plates

07 p1086 A72-18779

Creep and plastic deformation analysis of riveted joint elements using elastoplastic theory

07 p1087 A72-18982

Finite element method application to fracture mechanics problems of stress concentration and intensity factors and elastoplastic response to cyclic loading

07 p1088 A72-19130

Elastoplastic stressed state of thin cylindrical shells with circular hole, using small strain theory

07 p1092 A72-19896

Shock wave propagation and structure in elastoplastic material with translational work hardening, obtaining closed system of discontinuity equations

07 p1093 A72-19977

Circular elastoplastic beam under combined torsion and tension via Mindlin elastic model for materials with microstructure, taking into account work hardening

07 p1097 A72-20534

Book on plasticity theory covering stress and strain as basic concepts of continuum mechanics, differential equations of motion, plastic flow, yield criteria, elastic-plastic equilibrium, plane strain, etc

08 p1244 A72-21477

Strength analysis of thin elastoplastic shell with allowance for compressibility, relating loads and moments to deformation of middle surface

08 p1246 A72-21712

Necking instability in rectangular elastoplastic plate under biaxial tension, obtaining condition for equilibrium bifurcation by variational method

09 p1398 A72-22532

Elastoplastic stressed state of multilayer cylinder during loading, unloading and cyclic loading processes

09 p1401 A72-22721

Finite difference analysis of dynamic deformation of thin elastoplastic shells of revolution under intense heating

09 p1401 A72-22728

Elastoplastic analysis of unidirectional filament reinforced boron/aluminum and boron/epoxy composites under longitudinal loading, using finite element techniques

10 p1555 A72-24254

Direct numerical integration scheme for viscoelastoplastic response of isotropic axisymmetric shells under impulsive loads

[AIAA PAPER 72-400]

11 p1731 A72-25421

Two dimensional elastoplastic finite element analysis of structural members under cyclic thermal-mechanical loadings

[ASME PAPER 72-GT-1]

11 p1734 A72-25604

Upper yield stress effect on elastoplastic behavior of mild steel in bending and torsion, noting relationship to strain rate

11 p1659 A72-25894

Elastic-plastic analysis of large deflection of axisymmetrically loaded circular plates, using incremental theory

11 p1737 A72-26426

Fatigue testing machine for material behavior under elastoplastic bending loads with constant or smoothly varying programmed vibration frequency and amplitude

12 p1795 A72-27463

Acceleration waves propagation in elastic-plastic strain hardening rate independent solids, obtaining solution for discontinuity change in strength in homogeneously prestressed medium

12 p1846 A72-27729

Nonlinear fracture toughness determination via three point bending test simulation by elastic-plastic finite element computer program

12 p1830 A72-27731

Elastoplastic deformation effects on load bearing capacity of samples with stress concentrators under alternating cyclic loading, obtaining nomograms by digital computer

12 p1887 A72-28228

Variational solution to axisymmetric problem of rigid stamp quasi-static impression into elastoplastic half space

13 p2053 A72-28387

Unloading wave propagation in semiinfinite elastoplastic cylindrical rod for concave stress-strain diagram with no initial linear segment

13 p2053 A72-28388

Closed form solutions for one dimensional nonlinear waves in strain rate-sensitive elastoplastic material, describing dispersed wave motion behind propagating shock front

14 p2164 A72-30298

Elastoplastic equilibrium theorems for solid subjected to variable external effects, considering perfectly plastic and arbitrary hardening materials

14 p2165 A72-30574

Constitutive equations for incremental stress-strain relations in elastoplastic media, noting plane stress and strain in isotropic materials

14 p2131 A72-30715

Finite element method for nonlinear analysis of nuclear reactor structures, noting elasticity, viscoelasticity and elastoplasticity problems

[SMRT PAPER M 2/2]

14 p2166 A72-30724

Loading conditions effect on relaxation and creep in inhomogeneous hereditary elastoplastic polycrystalline materials

14 p2168 A72-30953

Elastoplastic stress concentration near elliptic hole in plate loaded in smallest axis direction

15 p2325 A72-31606

Nonlinear creep, viscoelasticity and elastoplasticity boundary value problems, discussing matrix constitutive differential equation formulation and higher order numerical methods

15 p2326 A72-31712

Stress-strain state of spherical body in centrally symmetric temperature field, noting elastoplastic interface and continuity conditions

15 p2327 A72-31742

Variational principle for boundary value problem of elastic-plastic torsion of circular bars under quasi-static finite deformation

16 p2464 A72-32914

Edge-loaded rectangular plate buckling behavior in elastoplastic range between proportional limit and yield point

16 p2466 A72-33020

Yield conditions formulation restrictions for large elastoplastic deformations, discussing isotropic and anisotropic hardening

16 p2396 A72-33024

Elastoplastic torsion of homogeneous and inhomogeneous torus segments of arbitrary cross section, noting plastic bands propagation with increasing torque

16 p2467 A72-33119

Elastic-plastic medium yield zone spread from penny shaped crack determined from continuous distribution of dislocations, noting system energy change

16 p2468 A72-33226

Temperature dependent elastoplastic wing assemblies and continua analysis via matrix displacement method

16 p2471 A72-33791

Three dimensional elastoviscoplastic theory for complex structures static-dynamic creep deformation under time varying stress and temperature fields, generalizing Odqvist-Hoff law

16 p2473 A72-34121

Growth of an acceleration wave in an elastoplastic isotropic medium undergoing finite deformation

17 p2580 A72-34277

The hodograph transformation in plastic waves with discontinuous loading conditions

[ASME PAPER 71-APMW-12]

17 p2624 A72-34308

Elastic-plastic systems under dynamic loadings, discussing compounded shakedown load solution by zero work and direct search methods

[ASME PAPER 71-APMW-27]

17 p2624 A72-34309

Elastic-plastic medium with doubly periodic square array of circular cylindrical voids, obtaining finite element solution for uniaxial deformation by variational principle

[ASME PAPER 72-APM-36]

17 p2628 A72-34784

Elastoplastic bending of rectangular plates with large deflection

[ASME PAPER 72-APM-34]

17 p2628 A72-34785

On uniqueness in ideally elastoplastic problems in case of nonassociated flow rules

[ASME PAPER 72-APM-33]

17 p2628 A72-34786

Determination of the unloading boundary in transverse impact of an elastic-plastic string

[ASME PAPER 72-APM-12]

17 p2629 A72-34804

Finite element analysis of elastoplastic structures with temperature dependent mechanical properties

17 p2631 A72-34947

Elastoplastic structural analysis from design viewpoint, discussing load limits and stability estimates based on large deformation assumption

17 p2632 A72-35113

Elasto-visco-plastic constitutive equations for quasi-static structures calculations

[ONERA, TP NO. 1089]

19 p2875 A72-37763

Refractory materials cyclic elastoplastic tests under shear with holding creep, showing relationship between creep rate and recurrent static deformation

19 p2876 A72-38007

Theory for transverse vibrations of beams during elastoplastic deformations

19 p2877 A72-38179

Computer solution of dynamic problems for bending of beams and thin plates beyond the elastic limit under alternating loads

19 p2877 A72-38194

An analytical approach to the non propagating crack problem using the finite element method

20 p2977 A72-38882

Elastoplastic axisymmetric bending of a clamped circular plate under the action of a conically distributed variable load

20 p2978 A72-39022

Finite element large deflection analysis of elastic-plastic shells of revolution subjected to axisymmetric loading

20 p2982 A72-40064

Combined tension-torsion elastic-plastic waves as propagating singular surfaces

21 p3121 A72-41244

Stress-strain state of thin circular perforated Cu plate under uniform tensile load, showing applicability of small elastoplastic finite deformation theory

21 p3122 A72-41351

On the collision of a cold elastic plate with a hot elasto-plastic plate

21 p3124 A72-41482

Mixed finite element analysis of elasto-plastic plates in bending

21 p3124 A72-41502

Constitutive equations of generalized Brandt-Reuss theory of elastoplastic deformation, noting second order effects 21 p3124 A72-41506

Convergence of the homogeneous linear approximation method in problems of plasticity theory of inhomogeneous bodies 22 p3232 A72-41911

Fiber glass reinforced plastics elastoplastic behavior due to microcrack propagating across matrix, using elastic index of work done 22 p3232 A72-41943

Stress concentration at an elliptic hole in an elastoplastic body 22 p3233 A72-42060

Stability of elastoplastic rod under external conservative and nonconservative forces, discussing non-conservative component effect and critical load magnitude 22 p3234 A72-42149

The application of the finite element displacement method to problems of elastoplastic deformation. 22 p3238 A72-42832

Stress concentration around a circular hole in an elastoplastic medium under the action of a temperature field and omnidirectional tension 23 p3344 A72-43418

Continual theory of dislocations and the theory of small elastoplastic deformations 23 p3345 A72-43584

Equilibrium equations and deformation of elastoplastic thin isotropic cylindrical shell with circular hole, noting nonlinear partial differential equations for plate displacements 23 p3345 A72-43587

Path independent integrals to predict onset of crack instability in an elastic plastic material. 23 p3346 A72-43711

Dynamic model for microinhomogeneous elastoplastic medium under cyclic loads with varying amplitude 23 p3347 A72-43729

Elastoplastic computation of thin cylindrical shells under cyclic loading 23 p3348 A72-43786

Stability of an elastoplastic rod of varying resistance to tension and compression with allowance for the initial stresses 23 p3352 A72-44162

Changes in the physical properties of metals subjected to elastoplastic deformation 23 p3303 A72-44199

Elasto-plastic stress analysis - A generalization for various constitutive relations including strain softening. 24 p3457 A72-44880

Microinhomogeneous elastoplastic cyclically strain hardenable material under symmetric loading, calculating stress-strain relationship 24 p3458 A72-44928

Equation of state relating time variations of stress and strain in elastoplastic material under tension 24 p3459 A72-45069

Some extremal properties and energy theorems for inelastic materials and their relationship to the deformation theory of plasticity. 24 p3460 A72-45692

On dual energy theorems for a class of elastoplastic problems due to G. Maier. 24 p3460 A72-45693

Turbine casing components stresses in presence of creep, demonstrating calculation method validity for thick-walled structures by elastoplastic analogy 24 p3460 A72-45727

ELASTOSTATICS

Book on uniqueness theorems in linear elasticity covering three and two dimensional elastostatics, whole and half spaces, mixed boundary value problems, elastodynamics, etc 01 p0136 A72-10003

Linear elastic Cosserat continuum mixed boundary-initial value problem uniqueness theorem, using Kirchhoff proof in classical elastostatics 03 p0382 A72-14363

Tensile load elastostatic transfer from rectangular cross section web to two infinite parallel sheets, deriving Cauchy type integral equation for adhesive bond force density 07 p1095 A72-20241

Plane elastostatic problem of stress concentration near flat interface inclusion in bonded dissimilar materials 09 p1405 A72-22997

Volume averages of stress and strain changes induced by Poisson ratio variation in boundary value problems of three dimensional classical elastostatics 12 p1884 A72-27566

A technique for numerical solution of boundary value problems in the plane theory of elasticity by the finite-difference method 19 p2878 A72-38204

Singular stress concentration at sharp edge of wedge in contact with half plane in elastostatics 21 p3119 A72-41104

Dependence of linear elasticity solutions on the elastic constants. II - Dependence on the shear modulus in elastostatics. 21 p3119 A72-41106

Methods of studying three-dimensional problems of stability in the presence of highly elastic strains 21 p3126 A72-41538

Plane elastostatic analysis of V grooved rectangular plates notch angle and specimen geometry effects on stress intensity factors and fracture toughness measurements 23 p3346 A72-43703

Transfer matrix approach for determining stresses and displacements in elastostatics of laminated composites [ASCE PREPRINT 1674] 23 p3351 A72-44105

ELDO LAUNCH VEHICLE

Organization, management, contract placement and financing of CECLES/ELDO European multinational program for launcher development 01 p0146 A72-10947

Industrial challenge of European space R and D programs, discussing ELDO Europa I launcher vehicle and ESRO-HEOS satellite technological problems 01 p0146 A72-10948

ELDO launch vehicle cryogenic tanks fabrication, discussing Al alloy selection and mechanical properties at low temperatures, manufacturing processes and thermal insulation 09 p1318 A72-22690

ELECTRA AIRCRAFT

Unpredicted structural vibration in Comet and Electra aircraft, Graf Zeppelin dirigible, missile antennas, etc 02 p0292 A72-12002

ELECTRETS

Ammonia beam maser with electret focuser providing semipermanent molecular separation under high vacuum for use in relaxation studies 01 p0081 A72-11187

Capacitive electret pressure sensors calibration for interior measurements in turbine engines, jets and exhaust nozzles 09 p1310 A72-22815

Properties of the electrostatic field of a system of annular electrets and possibilities of its application for focusing in molecular generators 19 p2804 A72-38538

ELECTRIC ANALOGIES

U ANALOGIES

ELECTRIC APPLIANCES

U ELECTRIC EQUIPMENT

ELECTRIC ARCS

NT MERCURY ARCS

Heat transfer from augmented flames and plasma jets based on magnetically rotated arcs, measuring transfer rate as function of electromagnetic torque 02 p0301 A72-12031

Anode heat flux for cascade atmospheric Ar arc of Maecker type, checking anode heat transfer model validity 02 p0302 A72-12266

Transformation of differential equations describing interaction between electric arc and gas flow by taking temperature as independent variable, considering Laval nozzle example 03 p0344 A72-14392

Thermal and I-V characteristics of dc plasmatron with vortex stabilized arc, interelectrode insert and diverging arc channel for various nozzle diameters 05 p0694 A72-15854

Electric arc in submerged gas jet, investigating laminar combustion zone extent, thermal layer radius and electric field strength 06 p0861 A72-17903

Approximate solution to Elenbass-Geller equation of arc electric and radiation characteristics as function of thermal conductivity by Galerkin method 07 p1043 A72-19879

Axial arc column interaction with shock waves and high velocity gas flow effects in forced convection, proposing heat transfer theory 07 p1047 A72-20548

German monograph on electric arc behavior in narrow channel with plasma cooling by channel wall and continuously decreasing current for switching applications 10 p1517 A72-23773

Solid body model for electric arc acceleration in thermionic cathode rail accelerator, discussing plasma mass effects [AIAA PAPER 72-412] 11 p1706 A72-26162

HF follower currents effect on dc arc I-V characteristics, indicating use of HF follower arc for quasi-steady arc power control 13 p2017 A72-29645

Electric arc plasma, predicting elements addition and electron density alteration effects on radial temperature distribution 14 p2139 A72-30778

Electric arc plasma, investigating reaction energy effects on radial temperature distribution 14 p2139 A72-30779

Dc arc plasma, investigating applied magnetic field, trace elements and gap spacing effects on spectral line intensity spatial distribution 14 p2139 A72-30783

Spectrochemical trace analyses in electric arc plasma, examining external magnetic field effects on spectral line intensity variation 14 p2139 A72-30784

Thermal and I-V characteristics of dc plasmatron with vortex stabilized arc, interelectrode insert and diverging arc channel for various nozzle diameters 15 p2283 A72-31271

Gas shielded strip electrode welding and cladding, discussing electric arc behavior, weld bead penetration depth, drop transfer speed, weld microstructure, etc 15 p2243 A72-31324

Numerical results of carbon dioxide-nitrogen-water gas dynamic laser comparison with arc-driven supersonic laser in gas dynamic mode 15 p2250 A72-32517

High voltage dc arc interrupter for use in high power pulse generators and switching application in high voltage dc power transmission system 15 p2201 A72-32569

Fusion reactor RF heating below 100 MHz, discussing coil structures and arcing and cooling problems in main fusion region 16 p2433 A72-32813

Steady state magnetically balanced cross flow arc, calculating flow and temperature fields and boundary shape under assumption of two independent variables [AIAA PAPER 72-687] 16 p2439 A72-34055

Energy transfer of thermal coupled radiation with turbulent convection in electric arcs in atmospheric air plasma [AIAA PAPER 72-685] 16 p2480 A72-34057

Atmospheric organic vapor effects on electric contact erosion, deriving showering arc duration, gap breakdown, arc number and energy 18 p2665 A72-36118

1970-1971 Holm Seminar supplement to bibliography and abstracts on electrical contacts, circuit breakers and arc phenomena. 18 p2665 A72-36120

The determination of diffusion coefficient for Na in dc arc plasma by measurements of intensity distribution of emitted light. 18 p2716 A72-36959

German monograph - Behavior of an electric arc produced by an exploding wire in a granular medium 19 p2834 A72-37483

Measurements of plasma velocity distributions in free-burning dc arcs up to 2160 A. 20 p2958 A72-39644

A system of disc-stabilized dc arc and solution nebulization device for the investigation of multicomponent plasmas. 21 p3039 A72-40213

Ar plasma diagnostics from stabilized arc emission spectra, noting thermodynamic equilibrium in central zone of arc channel 22 p3209 A72-41880

ELECTRIC BATTERIES

NT ALKALINE BATTERIES

NT METAL AIR BATTERIES

NT NICKEL CADMIUM BATTERIES

NT SILVER CADMIUM BATTERIES

NT STORAGE BATTERIES

NT ZINC-OXYGEN BATTERIES

Rechargeable oxygen electrode research program for hydrogen oxygen fuel cells and metal-oxygen batteries, discussing KOH solutions effects 04 p0466 A72-14675

Positive electrode materials for high energy density batteries with Li negative electrode, calculating discharge emf for various salts 06 p0760 A72-17575

Thermoelectric cooling battery performance of solar cell system, determining low temperature current requirements under various thermal loads 10 p1423 A72-24317

Hydrazine fuel cell development, electrochemical problems and applications, noting batteries with air oxidant 16 p2351 A72-33886

Normal, highly conducting and ion-exchanging solid electrolytes structure and conductivity, with particular attention to rechargeable silver halide batteries 16 p2352 A72-33899

Parallel operation of the solar generator and battery on the Symphonie satellite 18 p2648 A72-36681

ELECTRIC BRIDGES

Square wave source gated detector bridge for precise resistance measurement, discussing design and performance, and application in Pt resistance thermometry 06 p0785 A72-18244

Bridge circuit to minimize parasitic electrical disturbances in resistance strain gage measurements of dynamic stresses in impact tests 06 p0819 A72-18672

Self balancing ac bridge with double conversion of unbalance-signal and low capacitance sensor for displacement measurement

11 p1634 A72-26459

Antoniou bridge type gyrator circuit stability, showing sensitivity to resistors ratio variations

12 p1792 A72-27698

Two fluid model application to microbridges between superconductors, investigating superconducting particles number time variation possibility

13 p2023 A72-29789

Small temperature variation measurement by temperature sensor switching, using multipoint electronic automatic recording bridge with polarized relay

16 p2395 A72-33967

A six-phase bridge rectifier circuit with a reduced number of controlled rectifiers and a rigid external characteristic during high-level regulation

19 p2774 A72-38585

Electric model of bridging losses and optimal insulation layer thickness for small size resistance strain gages

21 p3056 A72-41367

Application of N equalizing and compensating signals in a single-cell reciprocal magnetoelectric transducer

24 p3386 A72-45315

ELECTRIC CHARGE

NT ELECTRIC DIPOLES

NT ELECTROSTATIC CHARGE

NT ION CHARGE

NT SPACE CHARGE

NT TRAVELING CHARGE

Electromechanical coupling and acoustic impedance response in piezoelectric transducer with diffusion under fixed charge

11 p1636 A72-26590

Nonlinear sheath admittance, currents and charges associated with high peak voltage drive on VLF-ELF dipole antenna moving in ionosphere

11 p1599 A72-26769

Scaling hypothesis and limiting fragmentation mechanism for cosmic ray muon production, noting energy independent charge ratio

15 p2298 A72-31289

The ignited mode of cesium thermionic diode. II - The charge influence on the volt-ampere characteristics.

18 p2647 A72-36211

Quantum fields interaction with classical sources on Schwarzschild background, noting mass, charge and angular momentum as sole measurable quantum numbers of black hole

18 p2726 A72-36716

Cosmic ray muon sea level momentum spectra and charge ratios geomagnetic latitude dependence measurements by spark chamber technique

19 p2853 A72-38754

ELECTRIC CHOPPERS

Capacitor-fed parallel chopper as phase sensitive demodulator, discussing design, stability, linearity and wide dynamic frequency range

04 p0507 A72-15522

Electromechanical filter with attenuation poles consisting of multi-mode vibrators.

21 p3036 A72-41828

ELECTRIC CIRCUITS

U CIRCUITS

ELECTRIC COILS

NT MAGNETIC COILS

Weakly damped Alfvén ion-cyclotron waves and fast magnetoacoustic waves in infinite plasma cylinder inserted into current bearing finite coil

07 p1046 A72-20516

Relay circuits malfunction due to interactions between coil induced currents and diode coil shunts, discussing circuit design and operating conditions

15 p2204 A72-31217

Application of N equalizing and compensating signals in a single-cell reciprocal magnetoelectric transducer

24 p3386 A72-45315

ELECTRIC CONDUCTORS

Plane electromagnetic wave scattering by imperfectly conducting cylinder with radially inhomogeneous dielectric coating, using phase shift method for evaluation

01 p0024 A72-10130

Automatic device using tetragonal conducting film sheets to feed graphic information into computer

02 p0187 A72-12279

Diffraction of plane electromagnetic waves of arbitrary orientation and incidence on triangular grid of cylindrical conductors

02 p0183 A72-12753

Induced current distribution in flat narrow conducting strip moving in inhomogeneous magnetic field, presenting current field and densities

03 p0311 A72-13564

Compression wave propagation from cylindrical cavity in weakly conducting magnetoelectric medium under unperturbed magnetic field

03 p0452 A72-14129

MHD squeeze film lubrication between electrically conducting parallel plates, showing graphically approach time under magnetic field in free space

05 p0665 A72-16031

Thin film conductors, distributed film resistors and capacitors design and associated IC layout to form functional arrays

06 p0790 A72-18574

Radially conducting cone wave spectrum calculation for noncophasal excitation, noting circularly polarized TEM and elliptically polarized TM wave amplitudes

07 p0938 A72-19003

Ideally conducting convex body mean differential monostatic scattering cross section, considering wavelength to body dimensions ratio

07 p0938 A72-19018

Nd-YAG laser system generating gold conductor patterns on ceramic substrates, using numerical control system for Si production

07 p1002 A72-19213

Rf excitation of external terminated longitudinal conductor axially parallel to rocket skin by transverse electromagnetic field, deriving currents in cable-connecting impedances

07 p0956 A72-19555

One- and two-conductor transmission lines electromagnetically coupled to rocket, deriving current bounds in load impedances under incident plane monochromatic wave

07 p0956 A72-19556

Bulk conductors dc field distribution applications to electrical resistivity measurements and nondestructive testing

07 p0998 A72-20461

Plane electromagnetic wave reflection from conducting convex cylinder in radially inhomogeneous absorbing medium, deriving equations for beam trajectories calculation

08 p1131 A72-20742

Surface current density of perfectly conducting polygonal cylinders for axially polarized incident electromagnetic field

09 p1350 A72-22247

Dipole moment expression for Rayleigh scattering field from finite closed perfectly conducting body irradiated by LF plane electromagnetic wave [AD-742573]

10 p1434 A72-23720

Plane electromagnetic wave diffraction on ideally conducting convex body of large electrical dimensions, obtaining Maxwell equations asymptotic solution

10 p1436 A72-24577

Phase velocity and Landau damping of ion acoustic waves propagating through plasma boundary layer at conducting sphere or cylinder based on two fluid model

10 p1523 A72-24746

Secondary diffraction from close edges on perfectly conducting bodies, representing scattered field by iterative surface current density replacement technique

10 p1440 A72-24938

Automatic device using tetragonal conducting film sheets to feed graphic information into computer

11 p1601 A72-25704

Induced current distribution in flat narrow conducting strip moving in inhomogeneous magnetic field, presenting current field and densities

11 p1691 A72-26751

Radar backscattering cross section and power of conducting cylindrical spacecraft in compressible electron-ion plasma environment

12 p1779 A72-27173

Electronic heating test arrangement for high temperature testing of metals and electrically conducting ceramics in vacuum, describing temperature control systems

12 p1796 A72-28249

Electromagnetic wave diffraction on ideally conducting homogeneous bodies of revolution with arbitrary complex permittivity and permeability, using variables separation method

13 p1920 A72-29279

Electric field and volume charge density distribution in bipolar conductivity semiconductor with recombination instability

15 p2291 A72-31392

Convective heat transfer in fully developed MHD channel flow between two parallel electrically conducting plates

15 p2335 A72-31636

Space charge electron flow between parallel conducting walls, developing relativistic method for potential and field distribution time variation

15 p2279 A72-32510

The behavior of electromagnetic fields at edges.

17 p2513 A72-34357

Conducting body radar scattering control by reactive loading, discussing field pattern synthesis for real current with least mean-square approximation

17 p2513 A72-34358

Averaged boundary conditions for a grid consisting of nonparallel and nonrectilinear conductors positioned on a nonplanar surface

17 p2529 A72-34830

Closed magnetic fields of helical ring currents on concentric spheres surrounded by conductor/Tornado trap/

17 p2588 A72-34855

Electromagnetic waves on a conducting infinite cylinder in a magnetoelectric medium.

17 p2517 A72-35399

Plane electromagnetic waves diffraction at arbitrary orientation and incidence on triangular grid of cylindrical conductors

20 p2902 A72-39059

Scattering of electromagnetic pulse waves by conducting wedge in an uniaxially anisotropic medium.

20 p2903 A72-39269

The relationship between the thick film conductor and substrate and its influence on conductor properties.

20 p2908 A72-39494

Radiation patterns of an antenna near a conducting strip.

21 p3015 A72-40365

Diffraction of electromagnetic plane waves by infinite slit perforated in a conducting screen with finite thickness.

21 p3022 A72-41267

Diffraction of an electromagnetic wave by a noninfinitely conductive cylindrical object of arbitrary cross section

22 p3153 A72-41991

Radar cross sections of conducting bodies of revolution, noting electric/magnetic polarizability tensors in L.F. Rayleigh scattering

24 p3381 A72-45639

ELECTRIC CONNECTORS

Papers on microwave advances covering precision coaxial connectors, O-type linear beam devices, electron dynamics and energy conversion and junction circulators

03 p0424 A72-13229

Microwave precision coaxial connectors in terms of dimensional specifications, material properties, surface characteristics and other parameters for transmission standards effects

03 p0330 A72-13230

Laminate materials, sockets and connectors for cost-effective high temperature accelerated life testing of IC

03 p0336 A72-14283

Refractory metal multilevel interconnection systems, comparing materials fabrication, yield and circuit performance with diffused Si planar runs and polycrystalline Si films

05 p0636 A72-16362

Semipermanent and permanent pressure connections in electronic systems, discussing design and performance evaluation

06 p0791 A72-18580

Permanent electric connections by alloy and solid phase bonding and fusion welding, considering surface contamination, interface contact, activation energy and connection stability

06 p0822 A72-18581

Reliable interconnections for U.S. Army avionics, determining best technique for terminating flat conductor cables with electrical connectors

10 p1447 A72-24012

Silicon solar cell interconnectors design for 5-10 years mission life, considering launch induced vibration stresses and thermal cycling stresses during mission

12 p1758 A72-28037

Friction and wear of electroplated hard gold deposits for connectors

18 p2693 A72-35981

The lightning arrester-connector - A new concept in system electrical protection.

20 p2889 A72-38989

ELECTRIC CONTACTS

Solar cells with improved photoelectric efficiency, describing use of noncorroding Ti-Pd-Ag contacts, titanium oxide antireflection layer and welded cell joints

06 p0760 A72-17751

Papers on thin film and semiconductor IC and contact and connection technology

06 p0790 A72-18570

Electrical contacts conduction principles, considering circuit voltage, current, variable resistance and resistive, mechanical, heating and adhesive properties

06 p0791 A72-18578

Switching contacts performance principles, noting inductive energy role in electrical breakdown voltage determination

06 p0791 A72-18579

Semipermanent and permanent pressure connections in electronic systems, discussing design and performance evaluation

06 p0791 A72-18580

Electric contact phenomena in ultraclean and specifically contaminated metallic systems, noting re-

sistance relationship to load curves and surface conditions
10 p1448 A72-24172

Delayed pulse echo and through-transmission ultrasonic techniques for nondestructive inspection and quality control of braze bonds in high current electric contact assemblies
10 p1487 A72-24173

Electron distribution near semiconductor-metal contact, discussing current carriers quantum properties effects
13 p2021 A72-28679

Electrical contacts - 1972; Proceedings of the Sixth International Conference on Electrical Contact Phenomena, Chicago, Ill., June 5-9, 1972.
18 p2664 A72-35979

Tribological properties of gold for electric contacts.
18 p2693 A72-35980

Friction, wear and noise of slip ring and brush contacts for synchronous satellite use.
18 p2693 A72-35982

Evaluation of gold electrodeposits for use in dry circuit applications.
18 p2664 A72-35983

Evaluation of testing methods for gold plated or gold clad contacts.
18 p2664 A72-35984

Pd-Al intermetallic compound contact materials.
18 p2698 A72-35985

1972 seminar supplement to bibliography and abstracts on electrical contacts, circuit breakers and arc phenomena.
18 p2664 A72-35986

Electrical contacts - 1971; Proceedings of the Seventeenth Annual Holm Seminar on Electric Contact Phenomena, Chicago, Ill., October 13-15, 1971.
18 p2665 A72-36114

Electric contact phenomena in ultra clean and specifically contaminated systems.
18 p2717 A72-36115

Nondestructive ultrasonic inspection of braze bonds in high current electrical contact assemblies.
18 p2695 A72-36116

The testing of contact materials for slip rings and brushes for space application.
18 p2698 A72-36117

Atmospheric organic vapor effects on electric contact erosion, deriving showering arc duration, gap breakdown, arc number and energy
18 p2665 A72-36118

Contact contamination - Formation of carbonaceous deposits on electrical contacts.
18 p2665 A72-36119

1970-1971 Holm Seminar supplement to bibliography and abstracts on electrical contacts, circuit breakers and arc phenomena.
18 p2665 A72-36120

The effect of contacts on microwave emission from InSb.
19 p2844 A72-37728

Installation for the simultaneous measurement of the functional properties of sliding contacts
20 p2928 A72-39936

Influence of fluctuations on the electromagnetic properties of Josephson tunneling contacts
22 p3208 A72-43124

Investigation of the nature of photostimulated exoelectronic emission during the friction of precision contacts
22 p3183 A72-43158

Properties of a superconducting point contact contained in a resonator
23 p3324 A72-44221

ELECTRIC CONTROL

Electrical control of fixation and erasure of holographic patterns in ferroelectric materials
07 p0981 A72-18880

Optimal test conditions in magneto-optical control by electrical system for subsurface defects detection, obtaining tangential magnetic field on carbon steel plates
07 p0991 A72-20421

Automatic remote mechanical system parameter control by electrical elements, introducing rigidity for mass sensitive measurement in dynamometry
16 p2370 A72-33956

A six-phase bridge rectifier circuit with a reduced number of controlled rectifiers and a rigid external characteristic during high-level regulation
19 p2774 A72-38585

Concorde electrically signalled fly by wire control system with mechanical linkages for standby fail-safe redundancy
21 p2994 A72-41068

Electrical components in gas turbine control systems.
22 p3216 A72-42521

Electrohydraulic stand for vibration strength testing, discussing system design, specifications, frequency-amplitude characteristics and applications
23 p3278 A72-43760

ELECTRIC CORONA

Positive corona streamers interactions with cloud droplets atomized from water and glycerin solution, discussing atmospheric significance
06 p0841 A72-17823

Powder concentration effects on corona particle charging efficiency of aerosols for electrogasdynamic generators
06 p0760 A72-18335

Plasma corona electron temperature decoupling from core of solid deuterium pellet heated in vacuum by convergent laser beams
16 p2433 A72-32810

ELECTRIC CURRENT

NT ALTERNATING CURRENT

NT ARC DISCHARGES

NT AURORAL ELECTROJET

NT BEAM CURRENTS

NT DIRECT CURRENT

NT TELLURIC CURRENTS

NT THRESHOLD CURRENTS

NT TOROIDAL DISCHARGE

Plasma hydrodynamic Buneman current instability under strong electric field, considering nonlinear stage in one dimensional case
01 p0105 A72-10024

Acoustic instability of plasma with current under equilibrium ionization and moderate neutral gas pressures
01 p0109 A72-10485

MHD instabilities of plasma with current, using two fluid model in crossed magnetic-electric fields
01 p0109 A72-10486

Rocket-borne measurement of particle fluxes and currents in auroral arc, determining pitch-angle distribution of electron and proton energies
01 p0120 A72-10897

Geomagnetic dynamo theory postulating magnetic field by self excitation due to electric currents within earth core
02 p0220 A72-12086

Affined RC or RL networks, investigating real and equal or imaginary, conjugate and inverse voltage and current transmittances
02 p0197 A72-12240

Electrostatic charging mechanisms leading to streaming current generation in moving fluids, considering initial discharge, electrode change and mobility charging current
02 p0261 A72-12553

Computer investigation of three fluid electrical current sheet model, solving magnetic annular shock tube problem
02 p0200 A72-12659

Spatial distribution of total magnetic vector and of electric currents in unipolar sunspot
03 p0428 A72-13300

Solar proton flare connection with strong electric currents, discussing net magnetic flux changes and electric conductivity and field strength
03 p0410 A72-13326

Spreading currents in parabolic rotating coordinates, determining magnetic field components consistent with Laplace equation series expansion
03 p0311 A72-13565

Intense pulsed electron beam production by current flow through narrow gap filled with plasma
03 p0396 A72-13656

Gamma and neutron radiation effects on bipolar transistor current gain response predicted from multiple linear regression analysis
03 p0335 A72-14091

Metal-insulator-metal tunneling junction, calculating effect of localized impurity states in barrier on tunneling current
03 p0404 A72-14267

Pulsed current changes in positive column of He and Ne discharges, observing gradient and electron concentration transient behavior
03 p0399 A72-14348

Gradient-recombination current instability in high resistance compensated semiconductors
04 p0561 A72-15084

Stationary viscous incompressible conducting fluid in conical flow, investigating diverging and converging electric current effects
04 p0558 A72-15342

Magnetospheric current effects on geomagnetic field structure, noting electron and proton precipitation into auroral zone
05 p0657 A72-16275

Current drainage from dilute plasma to high voltage probe via holes in Kapton H polyimide film, quartz and fluorinated ethylene propylene type C
05 p0696 A72-16815

Current reversal effect on anodic aluminum oxide film prepared in phosphate electrolyte, using electron microscope and isotopic labeling
05 p0667 A72-17056

Stationary plasma flow interaction with axisymmetric spatially periodic magnetic field in presence of Hall effect, determining electric currents structure
05 p0701 A72-17241

Static high pressure spherical plasma probe theories verification, showing saturation currents and I-V characteristics agreement with calculated values
06 p0853 A72-17416

Thermal and electrical characteristics of plasmatrons with interelectrode partition and distributed air supply, determining efficiency dependence on current
07 p1040 A72-18996

Flow field induced by electric current jet in incompressible viscous conducting fluid, solving nonlinear momentum equation by series expansion procedure
07 p0967 A72-19504

Transport phenomena theory for semiconductors in strong electric fields, examining negative differential conductivity and nonmonotonic current behavior
07 p1048 A72-19637

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering heavy current carrying filaments equilibrium and boundary value problems
07 p1035 A72-19975

Cavity formation and drop transfer time correlation with welding current in powder covered /submerged/ arc welding, using high speed X ray photography
07 p0998 A72-20396

Electrolyte flow rate, electric current intensity and tool electrode shape influence on surface finish quality in precision electrochemical machining
08 p1175 A72-21044

Thermostimulated autophotocurrent emission from Cr-alloyed p-type GaAs electrode, determining spectral distribution and light and electric field effects on current
08 p1216 A72-21071

Transverse and longitudinal current fluctuations in degenerate nonparabolic semiconductors in strong electric field
08 p1216 A72-21074

Thyristors junction area current rise time extension, discussing emitter field regional delay times as function of p-n-p structural properties
08 p1140 A72-21266

Asymptotic expressions for electromagnetic field and currents induced in unbounded dense plasma by relativistic electron beam passage
08 p1215 A72-21721

Electrochemical tests, noting electric potential, current and electrode impedance measurements for corrosion rate and oxidizing power evaluation
08 p1189 A72-22105

Thermal and electric flow analogy application to heat transfer determination on basis of three dimensional model
09 p1410 A72-22628

Current carrier flow parameter fluctuations associated with steady state transport noise in semiconductor devices, considering generation-recombination processes, drift, diffusion and dielectric relaxation
09 p1288 A72-23125

Contractible current loop model for radius variations, induction current, temperature and inertia center velocity in plasmoid interacting with axially symmetric magnetic field
09 p1361 A72-23202

Single helix magnetic field with axial current, discussing field lines rotatory transformation and magnetic well and shear effect on plasma behavior
09 p1363 A72-23216

Double helix magnetic field in longitudinal and axial current fields of stellarators, noting rotatory transformation and shear of field lines
09 p1363 A72-23217

MHD generator duct external loop electric current maximization by working material resistivity tensor optimal distribution
10 p1521 A72-24434

Alloy p-n-p junction transistor diffusion capacity variation with emitter current as function of temperature at 80-320 K
10 p1451 A72-24558

Declinational component of geomagnetic lunar tide diurnal variations, noting effects of electric currents induced in oceans
11 p1622 A72-26103

Radial small-signal gain profile measurement in carbon dioxide laser discharge tube explained by axial gas temperature increase with discharge current
11 p1647 A72-26145

Current flow across double layer plasma in SERT 2 type hollow cathode ion thruster, using Langmuir probes
[AIAA PAPER 72-418]

11 p1706 A72-26168

MPD thruster diagnostics and interpretation of electric current distribution, applying integral form of Maxwell equation for moving Hall probe
[AIAA PAPER 72-498] 11 p1711 A72-26221

Solar current flow penetration to 1 AU in interplanetary medium, discussing inhibition of field line reconnection across neutral sheet 11 p1714 A72-26528

Spreading currents in parabolic rotating coordinates, determining magnetic field components consistency with Laplace equation series expansion 11 p1607 A72-26752

Nonlinear sheath admittance, currents and charges associated with high peak voltage drive on VLF-ELF dipole antenna moving in ionosphere 11 p1599 A72-26769

Theory of magnetotail elongation based on magnetosphere neutral layer drift notion due to electric current from trapped charge carriers inside surrounding plasma sheath 12 p1802 A72-27770

Plasma heating by HF electrostatic instabilities excitation with current across external magnetic field, estimating turbulence, ion collision frequencies and ion heating rates 13 p2009 A72-28426

Pulse plasma injector accelerating circuit resistance dependence on time and current amplitude calculated from current oscillograms 13 p2010 A72-28733

Hall currents effect on unsteady MHD flow of electrically conducting fluid past flat plate imbedded in uniform external transverse magnetic field 13 p2012 A72-29225

Electrothermal instability analysis for MHD generator, considering electron thermal conduction and wall boundaries effects for cases with current parallel or perpendicular to walls 13 p2014 A72-29366

Fluctuating electric current induced magnetic field effects on long wave nonequilibrium plasma instability associated with large scale closed cycle MHD generators 13 p2014 A72-29370

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length 13 p2016 A72-29603

Plasma current layer formation due to electric field directed along magnetic field neutral line 13 p2017 A72-29699

Thin wire parallel to interface between two homogeneous half spaces, deriving transmission current wave propagation constant from boundary value problem solution 15 p2200 A72-32108

Electromagnetic gain mechanisms with required energy supplied by static currents and magnetic fields in homogeneous plasmas 16 p2434 A72-32853

Voltage and current generalized immittance converter realization, using with current conveyor for simulation 16 p2367 A72-32856

Free electrons-laser interaction induced electron forward drift and dc current generation, deriving drift velocity by nonrelativistic classical and quantum mechanical theories 16 p2402 A72-33397

CW argon ion laser characteristics at high steady discharge currents, discussing output limitation by low inversion utilization efficiency due to cavity mirrors optical degradation 16 p2404 A72-34035

Conducting body radar scattering control by reactive loading, discussing field pattern synthesis for real current with least mean-square approximation 17 p2513 A72-34358

Undamped photocurrent fluctuations in CdSe single crystals 18 p2718 A72-36348

Equilibrium configurations of Vlasov plasmas carrying a current component along an external magnetic field. 19 p2839 A72-37332

Boundary conditions in the presence of Hall current or finite ion Larmor radius effects. 19 p2839 A72-37338

Short-circuit current in silicon solar cells - Dependence on cell parameters. 19 p2753 A72-37567

Photocathode relative sensitivity spatial distribution as function of wavelength, noting maximum shift from photoeffect contribution to photomultiplier current 19 p2800 A72-37821

The temperature dependence of the critical current of a double Josephson junction. 19 p2846 A72-38556

Effect of the filling of the capture levels with increasing current on the formation of negative resistance under double injection conditions 19 p2846 A72-38574

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering current

carrying heavy filaments equilibrium and boundary value problems 20 p2955 A72-40032

Electrodynamic analysis of superconducting vortices interaction with cylindrical cavities [pinning], calculating critical currents in type II superconductors in external magnetic field 21 p3096 A72-40416

Force free fields in type II superconductors. 21 p3096 A72-40573

Current and voltage waveform measurements with sampling oscilloscope and capacitive voltage-divide probe to verify TRAPATT diode oscillator theoretical model 21 p3032 A72-40635

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length 21 p3091 A72-40657

A theoretical investigation on the generation current in silicon p-n junctions under reverse bias. 21 p3097 A72-40703

A method to calculate electric currents in quiescent prominences. 21 p3108 A72-41282

Voltage generalized-impedance converter synthesis with RC circuits for obtaining current transfer function proportional to square of s with application to filter design 22 p3140 A72-42303

Self-consistent description of the magnetotail current system. 22 p3172 A72-42429

Current noise and conductance-temperature characteristics of thin discontinuous Pt films on glass substrate interpreted by quantum mechanical electron tunneling model 22 p3214 A72-42453

Generation threshold of anomalous resistance for longitudinal currents in the magnetosphere 23 p3284 A72-43379

Transport phenomena theory for semiconductors in strong electric fields, examining negative differential conductivity and nonmonotonic current behavior 24 p3427 A72-44569

Axial-radar cross section of finite cones by the equivalent-current concept with higher-order diffraction. 24 p3381 A72-45640

ELECTRIC DIPOLES

Conducting half space electric dipole model of radio propagation through earth at 1-10 MHz 01 p0033 A72-11254

Electromagnetic wave scattering and diffraction on lattice of dipole vibrators 04 p0491 A72-15415

Reciprocity theorems in electromagnetic theory concerned with radio transmitting and receiving point interchange for electric dipole sources 05 p0625 A72-16008

Elf/vlf radiation resistance of finite electric dipole oriented at arbitrary angle in cold uniform magnetoplasma, deriving general integral expression 07 p1039 A72-18823

Electron temperature effects on radiation fields and resistance of short electric dipole antenna embedded in hot uniaxial plasma 08 p1215 A72-21991

Power integral method for electric and magnetic dipole antennas vlf/elf radiation patterns in cold magnetoplasma, emphasizing focusing effects of refractive index surface 09 p1279 A72-23009

Compressible anisotropic magnetoplasma filled cylindrical waveguide excitation by electric dipole, plotting electric field patterns as function of electron temperature and density 12 p1782 A72-27489

Human torso surface mathematical model to determine equivalent heart dipole and quadrupole locations for ECG measurements 13 p1908 A72-28571

Electrophysiologic data acquisition by multiple dipole type of inverse electrocardiographic procedure based on model data, noting favorable and unfavorable dipole array configuration 13 p1909 A72-28997

Green function solution for electric field intensity in space due to electric dipole at another point under boundary conditions on surface of revolution 13 p1921 A72-29341

The electromagnetic field generated by an electric dipole in a spherical cavity immersed in a nonlinear plasma 17 p2588 A72-34746

Electric dipole radiation at VLF in a uniform warm magneto-plasma. 19 p2840 A72-37833

Computer-graphics studies of dipole-dipole collisions - Evidence for neutral collision complexes. 21 p3087 A72-40559

Radiation from an electric dipole in anisotropic media. 24 p3424 A72-44706

Electric dipole moment of diatomic molecules by configuration interaction. IV. 24 p3426 A72-44870

The transient electromagnetic response of a spherical shell of arbitrary thickness. 24 p3381 A72-45638

ELECTRIC DISCHARGES

NT ARC DISCHARGES

NT ELECTRIC ARCS

NT ELECTRIC CORONA

NT ELECTRIC SPARKS

NT ELECTRODELESS DISCHARGES

NT GAS DISCHARGES

NT GLOW DISCHARGES

NT LIGHTNING

NT MERCURY ARCS

NT PENNING DISCHARGE

NT RADIO FREQUENCY DISCHARGE

NT RING DISCHARGE

NT TOROIDAL DISCHARGE

Momentum jet and electric discharge from same hole in plane wall bounding viscous incompressible conducting fluid, investigating flow field with similarity solutions 01 p0107 A72-10139

VLF noise spectra in earth-ionosphere cavity due to thunderstorm discharges, noting resonance level splitting by geomagnetic field 01 p0028 A72-10598

Electrodischarge and electrochemical machining applications in continuous repetitive production of aircraft jet engine components 01 p0078 A72-11150

Electrostatic charging mechanisms leading to streaming current generation in moving fluids, considering initial discharge, electrode change and mobility charging current 02 p0261 A72-12553

Dc excited argon laser anode oscillation noise, discussing relation to ballast resistance, suppression conditions and current fluctuation frequency response to laser fluctuation 02 p0239 A72-12826

Plasma jet formation within high pressure discharges in air at atmospheric pressure, discussing electrode configuration, current density and accelerating magnetic field strength 03 p0396 A72-13662

Stepped-leader theory in cloud-to-ground electrical discharges, estimating step-length for different electrical fields by equivalence to electron avalanche transition 04 p0543 A72-14880

Electrostatic field changes in vertical intracloud discharges, discussing positive streamers and return strokes 04 p0543 A72-14881

Pulsed chemical laser started by transverse electrical discharge, observing output energy dependence on fluorine compound used 04 p0530 A72-14974

Electronic system for electrodischarge machining, considering thyristor spark control and circuitry design for automatic feed down and short circuit clearance 04 p0502 A72-15530

Explosive erosion in Al, Cu, W and Pb electrodes during high current spark discharges, using time resolved photography 05 p0692 A72-16032

Carbon dioxide laser pumping at atmospheric pressure by electron beam controlled electrical discharge, discussing measured electrical and laser properties 07 p0999 A72-18875

Laser action in pulsed transverse discharge initiated chemical reactions forming hydrogen and deuterium halides, noting production of previously unobserved transitions 07 p0999 A72-18879

Laser action in carbon monoxide vibrational-rotational bands produced by electrical excitation of carbon monoxide-nitrogen-oxygen-helium mixtures following expansion in supersonic nozzle 07 p1001 A72-19047

Geomagnetic phenomena associated with auroras and magnetic storms, investigating analog modeling experiment by stationary electrical discharges under laboratory conditions 07 p0980 A72-20457

Transients determined for Cs vapor discharge phases, observing current fluctuations between steady states in negative resistance zone above 0.2 torr 07 p1046 A72-20517

Thermomathematical model for calculating craters formed by short pulses in electro discharge machining 08 p1173 A72-21028

Electrical erosion efficiency of metal working under increased pressure in discharge gap in air and water 08 p1174 A72-21029

Technological characterization of electric discharge machines by metal removal rate, volumetric electrode wastage and machined surface roughness 08 p1174 A72-21031

Electroerosion machining with optimal control of electrical parameters, number of passes and electrode

wear, using nonlinear programming and critical path method
08 p1174 A72-21032

Electric discharge carbon dioxide laser performance in terms of optical beam quality, electrical efficiency and gas utilization
10 p1489 A72-23943

Charged and neutral particles radial distribution across positive isothermal plasma column in high current discharges
10 p1521 A72-24355

Electric discharge plasma generator consisting of concentric or parallel electrodes mounted on titanium hydride coated heat resistant ceramic disk
10 p1521 A72-24365

Diaphragmless electrothermal shock tube for collision in preheated Ar, using RF plasma heater
10 p1459 A72-24410

Electrical discharge machining of zirconium diboride, considering operations and tooling requirements
[AIAA PAPER 72-329] 11 p1637 A72-25365

Normal ionizing shock waves characteristics in He under varying conditions of magnetic field strength, discharge current and gas pressure
11 p1694 A72-25789

Hollow cathode discharge effects on throttled electron bombardment ion thruster performance, considering discharge region diameter and length and baffle aperture area
[AIAA PAPER 72-421] 11 p1706 A72-26169

Electrostatic ion thruster theoretical model, deriving ionization rate density as function of discharge current
[AIAA PAPER 72-432] 11 p1707 A72-26175

Solid teflon pulsed plasma thruster quasi-steady and short pulse discharge operations, discussing propulsion system performance and erosion behavior
[AIAA PAPER 72-459] 11 p1709 A72-26195

Plasma diagnostics of inductively coupled RF Hg discharge in RIT-10 ion thruster
[AIAA PAPER 72-472] 11 p1709 A72-26203

Kinetics and cavity intensity models for output characteristics of pulsed electric discharge carbon dioxide lasers
12 p1820 A72-27287

Point discharge current and precipitation effect on atmospheric potential gradient vertical profile
12 p1839 A72-27501

Nonlinear model of ionization instability of MHD generators, assuming discharge structure with alternating layers of high and low electrical conductivity
13 p2014 A72-29371

Vacuum gap discharge conditions as function of electron beam parameters and metal vapor pressure
13 p2017 A72-29611

Current breaks due to capacitor discharges in W and Mo wires, noting duration proportional to wire mass
13 p2007 A72-29980

Electroexplosive devices firing energy parameters determination by capacitor discharge system providing exponential pulses terminated at adjustable width
14 p2143 A72-30200

Detonation wave generation in gas discharge plasma by pulsed electrical discharge
14 p2137 A72-30313

Pulsed Ar plasma temperature and charged particle concentration obtained as functions of elapsed discharge time by spectroscopic observation
14 p2139 A72-30780

Laser emission from pulsed transverse electric discharge in supersonic nozzle downstream region gas dynamic cooled mixture
15 p2245 A72-31385

Transversely excited pulsed carbon dioxide-nitrogen-helium laser with electrical discharge determined optimum partial pressure
15 p2249 A72-32236

Solar flare and neutral sheet simulation by investigating behavior of plasma current through magnetic neutral point created by capacitor discharges
15 p2301 A72-32342

Electrical pumping discharge confined by liquid wall of vortex channel in dye laser solution
15 p2251 A72-32528

Transverse electric discharge pulsed carbon dioxide laser, measuring refractivity time history by interferometry for comparison with prediction
15 p2251 A72-32537

Shock wave generation by high current pulsed discharges, determining shock front velocity as function of magnetic pressure on current sheath
16 p2434 A72-32909

Discharge stabilization in closed cycle carbon dioxide electric discharge convection lasers by aerodynamic, RF power and tandem techniques
[AIAA PAPER 72-723] 16 p2404 A72-34026

Flow conditioning in electric discharge convection lasers.
17 p2562 A72-34638

Charged and neutral particles radial distribution across positive isothermal plasma column in high current discharges
17 p2589 A72-34955

Electric discharge plasma generator consisting of concentric or parallel electrodes mounted on titanium hydride coated heat resistant ceramic disk
17 p2589 A72-34964

Electrical CO mixing gas dynamic laser.
[AIAA PAPER 72-725] 17 p2564 A72-35483

Initial-boundary-value problem of the formation of an electrical discharge in a flow.
17 p2592 A72-35627

RF augmentation in CO₂ closed-cycle dc electric-discharge convection lasers.
17 p2565 A72-35818

Excitation modes and operating characteristics of electric discharge convection lasers
[AIAA PAPER 72-722] 17 p2565 A72-35962

Arc mode thermionic converter at low cesium vapor pressures
18 p2647 A72-36216

Influence of an electrical discharge in a flame on the propagation of the flame
18 p2740 A72-36244

Electron density measurements in early stage of the high current pulsed discharge.
18 p2716 A72-36957

High power pulsed HCN laser.
19 p2811 A72-37583

Electric discharge concept to uncouple electron density from temperature for production of stable uniform electric laser discharges
19 p2812 A72-38596

Influence of plasma kinetic processes on electrically excited CO₂ laser performance.
19 p2812 A72-38598

Recent international development in non-traditional machining processes - EDM, ECM, LBM, EBM.
20 p2928 A72-39203

Energy characteristics of the laser action in rhodamine 6G pumped by a pinched discharge.
20 p2933 A72-39512

Free fall column theory allowing for 'neutral gas reduction' by ionization processes, and application of this theory to noble gas ion lasers
21 p3090 A72-40488

Investigation of the structure of a high-current discharge in a lithium plasma
22 p3209 A72-41878

Some characteristics of an electron-beam induced discharge in a vacuum
22 p3208 A72-43123

Detonation wave generation in gas discharge plasma by pulsed electrical discharge
23 p3318 A72-43215

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration
24 p3368 A72-44979

One dimensional theory of electric discharge detonation effects in flame propagation within square duct with combustible gas mixture, applying to electrochemical pulse jet engine
24 p3464 A72-45064

Electronic energy transfer phenomena in rare gases.
24 p3429 A72-45310

ELECTRIC ENERGY STORAGE

MNOS transistors charge storage properties at high electric field strengths and current densities near gate insulator breakdown, determining reliable operating limits
03 p0336 A72-14277

Quasi-steady MPD propulsion systems for astronomical applications, describing electric energy storage bank, mass supply system, accelerator and operation principle
09 p1374 A72-22934

Electrohydraulic and electromagnetic metal forming, using capacitor stored energy conversion into hydraulic shock waves or magnetic pressure to deform sheet metal components, pipes, etc
15 p2243 A72-31323

ELECTRIC EQUIPMENT

Soviet book on electrical equipment and instrumentation of An-24 aircraft covering power sources, control, safety systems, engine, flight and navigation instruments and autopilot
05 p0615 A72-16400

Shielding procedures to control electromagnetic interference /EMT/ in design and operating electric equipment
10 p1452 A72-24813

Space shuttle umbilical systems for mating, connection and checkout of carrier assemblies and couplings for cryogenic, electrical, pneumatic and hydraulic services
15 p2213 A72-31695

ELECTRIC EQUIPMENT TESTS

Trident aircraft air-system interrogator airborne first line test apparatus for electrical components malfunction diagnosis
06 p0796 A72-18154

Airport lights systems control with thyristors, discussing light intensity regulation, command board design and insulation test equipment
12 p1794 A72-27401

ELECTRIC FIELD STRENGTH

MHD channels magnetoacoustic and ionization instabilities effect on mean current density and electric field strength, determining effective electroconductivity and Hall parameter
01 p0110 A72-11208

Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences
02 p0217 A72-11939

Coastline effect on electric field strength of geomagnetic micropulsations
03 p0344 A72-12977

Transverse photoconductivity and dark I-V characteristics of n-GaAs compensated with Cr in high electric field at room temperature
03 p0401 A72-13586

Soviet book on ground wave radio propagation at medium and long wavelengths covering field strength calculations over plane and spherical earth, soil conductivity, etc
03 p0323 A72-13950

Electric field intensity and pulsation spectra variation along rectangular channel in transverse magnetic field, noting current density changes
03 p0398 A72-14006

MNOS transistors charge storage properties at high electric field strengths and current densities near gate insulator breakdown, determining reliable operating limits
03 p0336 A72-14277

Dielectrophoresis force measurements and wedge shaped capacitor separation properties in satellite zero gravity conditions
04 p0549 A72-14988

Plasma ion collision transport analogy with turbulent velocity space momentum transfer, explaining confined plasma runaway electron absence in strong electric fields
04 p0560 A72-15469

Electric field strength, radiated power and radial temperature distribution measurements in high pressure Ar cascade arc
05 p0695 A72-16156

Electric field distribution in waveguide-slot radiator, describing measurement technique
05 p0635 A72-16333

Monochromatic light beam propagation in optically nonhomogeneous medium containing matter in near critical state, determining exciting wave electric field strength
05 p0691 A72-16683

Plane magnetized plasma layer interaction with hf electromagnetic field, showing electric field strength and direction dependence on ion acoustic-Alfven velocity ratio
05 p0697 A72-16982

Extensive air showers radio emission polarization, spatial distribution and electric field strength, noting geomagnetic mechanism effect
06 p0870 A72-17278

Magnetic and electric field intensities measurement with charged particle beams in coaxial high temperature plasma sources
06 p0863 A72-18415

Geoelectric field strengths deduction from mid-frequency slopes on diurnal incidence plot of pc 1 hydromagnetic whistlers
07 p0974 A72-18904

Large drops coalescence, investigating approach rate dependence on electric field strength and distance
08 p1201 A72-21998

Electric field voltage effect on dispersion of electrostatically atomized liquids and hydrocarbon fuels with and without gamma irradiation
09 p1350 A72-22546

Momentum transfer theory for ion drift velocity in multicomponent gas mixture at arbitrary electric field strengths
10 p1519 A72-24096

Average electric field and power density of electromagnetic wave scattered from rough layer with plane interface, calculating scattering cross sections
10 p1512 A72-24744

Linear electron acceleration mechanism in plasma, showing polarization fluctuations in diode under strong electric field
11 p1699 A72-26761

Plane magnetized plasma layer interaction with HF electromagnetic field, showing electric field strength and direction dependence on ion acoustic-Alfven velocity ratio
12 p1850 A72-27126

Magnetosonic perturbations caused by ideally conducting sphere expansion in cold plasma, determining electric field and magnetic induction time dependences
13 p1949 A72-29251

Green function solution for electric field intensity in space due to electric dipole at another point under boundary conditions on surface of revolution
13 p1921 A72-29341

- Electroacoustomagnetic and Hall effects in semiconductors within strong electric field involving phonon production by supersonic electron drift
13 p2022 A72-29437
- Resonant irradiation effect on cesium discharge plasma, charge density, electron temperature and electric field strength
13 p2017 A72-29610
- Beta-conductive method improvement for semiconductor electric field intensity measurement by pulsed electron beam
15 p2238 A72-32240
- Optical measurements of electric fields turbulence level in gun plasma, noting compatibility with spatial Landau damping
15 p2287 A72-32409
- Hydrogen atom ground state ionization probability derivation as function of electric field strength and distance to metal surface
15 p2279 A72-32699
- Monochromatic light beam propagation and scattering in optically nonhomogeneous medium containing matter in near critical state, determining exciting wave electric field strength
16 p2426 A72-33694
- Magnetic and electric field intensities measurement with charged particle beams in coaxial high temperature plasma sources
17 p2588 A72-34864
- A nomogram for determining the phase difference of an elliptically polarized wave
18 p2663 A72-37219
- Pulsar properties correlation with radially oscillating coherent plasma of electron-positron pair production by strong electric field around central object
19 p2859 A72-37892
- High level E-field susceptibility measurement problems and techniques.
20 p2906 A72-38981
- Ionospheric and magnetospheric electric field strength measurements in auroral and polar cap regions by Ba ion cloud and double floating probe techniques
20 p2918 A72-39543
- Resonant irradiation effect on Cs discharge plasma charge density, electron temperature and electric field strength
21 p3091 A72-40664
- The field strength conditions for measuring the carrier lifetime in semiconductor crystals by the light flash method
21 p3098 A72-41487
- Electric field intensity distribution function for thermoelectronic emission from hot cathodes in low temperature plasma, using Richardson Formula
21 p3094 A72-41656
- A measurement of ionospheric electric fields at high latitude.
22 p3169 A72-42015
- Effect of radiation polarization on hologram quality
22 p3176 A72-42107
- Theory of Poole-Frenkel conduction in low-mobility semiconductors.
22 p3214 A72-42317
- Induction effect of slowly decaying ring current, estimating electric field strength by model consisting of earth dipole and symmetric ring
22 p3172 A72-42430
- Disequilibria created by an electric field in a nitrogen plasma
23 p3321 A72-43695
- Electric field distribution and strength and electron trajectories computations in designing electron optical display systems, using rectangular networks
23 p3291 A72-44312
- Geomagnetic tail magnetic and electric fields U1.F, V1.F and E1.F fluctuations, considering relationship to substorm processes
24 p3397 A72-44857
- ELECTRIC FIELDS**
- Internal electrostatic field effect on ion separation in expanding pulsed laser produced plasmas
01 p0105 A72-10021
- Plasma hydrodynamic Buneman current instability under strong electric field, considering nonlinear stage in one dimensional case
01 p0105 A72-10024
- Oblique electromagnetic wave propagation modes in anisotropic ionized stratified medium, investigating electric field and polarization components
01 p0106 A72-10133
- Strong ionizing shock waves production in hydrogen and deuterium gases, measuring plasma electron temperature, axial electric field and density and magnetic field compression
01 p0108 A72-10237
- Isolated magnetospheric substorms model, explaining electric field origin, cold plasma flow, magnetic field lines and particle phenomena
01 p0060 A72-10889
- Parallel electric field evidence near auroral ionosphere deduced from low energy particles, energy spectra and angular distribution
01 p0061 A72-10895
- Magnetoionospheric wave and particle phenomena correlation to convection electric fields in nightside magnetosphere during isolated substorms
01 p0062 A72-10904
- Electric field induced splitting of drift shells composed of trapped particles, taking into account non-dipole field components to lowest order
01 p0062 A72-10905
- Meridional currents intensity in equatorial electrojet region, computing electric and magnetic fields
01 p0063 A72-10924
- Tropospheric layer structures effect on long range vhf radio communication, calculating wave modes at attenuation rate and electric field patterns
01 p0032 A72-11238
- Thermal conductivity, electrical conductivity, viscosity and diffusivity of ionized gas-solid suspension in electric field, using transport equations and particle interaction potentials
01 p0111 A72-11332
- Electron beam interaction with electromagnetic waves in longitudinal interaction devices during focusing by homogeneous magnetic and periodic electrostatic fields
02 p0189 A72-11564
- Spectrum analysis of synchronous recordings of Pi 1 irregular pulsations and auroral brightness at Sogra for ionospheric electric fields
02 p0216 A72-11923
- Vertical distribution of ionospheric and magnetospheric electric fields, estimating Joule heating
02 p0220 A72-12324
- Electrohydrodynamic ideal incompressible fluid flow in flat and circular channels, determining electric potential and field distribution
02 p0266 A72-12431
- Hall effect and conductivity dependence on applied electric field in multivalley semiconductor for power dependent intervalley scattering time
02 p0269 A72-12887
- Radiation pattern from open ended parallel plate waveguide with arbitrary electric or magnetic aperture field distribution, using Wiener Hopf technique
03 p0331 A72-13409
- Adiabatic charged particle orbits in magnetic null sheet with transverse electric and added normal magnetic fields
03 p0348 A72-13512
- Electric field aligned sheet currents of low energy electrons and protons near auroral arc, obtaining magnetic signatures
03 p0349 A72-13516
- Vertical motions of midlatitude F 2 layer during magnetospheric substorms, investigating electric field distribution
03 p0349 A72-13519
- Linear electron acceleration mechanism in plasma, showing polarization fluctuations in diode under strong electric field
03 p0395 A72-13573
- Electric field effects on electromagnetic wave packet motion in anisotropic nonlinear medium with electro-optical effect
03 p0322 A72-13737
- Dielectric siphons, using weak polarization force density exerted on insulating dielectric liquids by nonuniform electric field
04 p0520 A72-14416
- Three terminal voltage-tunable Gunn effect microwave oscillator, discussing depletion depth and electric field control modes for frequency
04 p0496 A72-14479
- Current density nonlinear transient response and energy absorption of weakly ionized plasma under pulsed electric field
04 p0555 A72-14532
- H beta satellites observation in presence of oscillating electric field associated with plasma turbulence [A72-741085]
04 p0555 A72-14576
- Hf electric field influence on electron drift instability and slow ion-acoustic waves for inhomogeneous magnetized plasma stabilization
04 p0555 A72-14617
- Light wave electric field Franz-Keldysh effect on GaAs absorption edge, using electroabsorbance, electroreflectance and photoconductivity spectrum and internal photoeffect analysis
04 p0561 A72-14621
- Nonuniform sinusoidal electric field anomalous influence on ion motion in gas with allowance for ion-atom collisions
04 p0547 A72-14622
- Stepped-leader theory in cloud-to-ground electrical discharges, estimating step-length for different electric fields by equivalence to electron avalanche transition
04 p0543 A72-14880
- Electrostatic field changes in vertical intracloud discharges, discussing positive streamers and return strokes
04 p0543 A72-14881
- Ar gas dc discharge plasma characteristics in crossed electric and magnetic fields, examining equivalent pressure concept
04 p0556 A72-14945
- Electron heating by oscillating electric field in presence of steady magnetic field, solving Boltzmann transport equation for electron velocity distribution in plasma
04 p0556 A72-14947
- Ionospheric plasma drift instability, showing electric and magnetic fields, electron density and temperature effects
04 p0517 A72-14956
- Nonuniform radial electric field effects on low beta magnetized plasma column stability from numerical analysis for weakly collisional regime
04 p0557 A72-15023
- Electric or magnetic field tangential components at ground-air interface, discussing secondary electromagnetic sources
04 p0492 A72-15438
- Closed solution to Gunn effect field domain formation and propagation, using approximate I-V curve and method of characteristics
04 p0563 A72-15503
- Electron drift speed and multiplication rate in pulsed Ar positive column in axial electric field
04 p0553 A72-15669
- Two dimensional axisymmetric surface waves motion in inviscid incompressible homogeneous electrically conducting fluid under uniform magnetic and electric fields, considering surface tension effects
04 p0560 A72-15744
- Monograph on design and characteristics of rotating plasma device under crossed electric and magnetic fields, covering dynamic behavior of hydrogen puff
05 p0642 A72-15798
- Transverse electric field in ionosphere and magnetosphere during inhomogeneities consisting of fast electrons
05 p0656 A72-16246
- Charged particle acceleration by nonstationary sinusoidal electric fields in earth magnetosphere based on mathematical model
05 p0709 A72-16256
- Lower ionospheric currents fields, determining Hall conductivity and geomagnetic lines of force slope effects
05 p0657 A72-16266
- High frequency electric field backscattering by plane electromagnetic wave incident on perfectly conducting sphere with radially inhomogeneous dielectric coating
05 p0630 A72-16621
- Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration
05 p0697 A72-16987
- Electron heating model in perpendicular collisionless plasma shock waves based on electron trapping by turbulent electric field
05 p0697 A72-17014
- Physical processes of fluids atomization in electric field, discussing droplet surface instability and boundary values of surface tension coefficient
05 p0667 A72-17185
- Parametric plasma instability in hf electric field and constant magnetic field, noting longitudinal plasma oscillations growth
05 p0700 A72-17234
- Polarization electric field and depolarization current measurements in plasma flows along toroidal solenoid with diverter
06 p0853 A72-17387
- Interplanetary magnetic field fluctuations correlation with trapped particles redistribution, deriving magnetospheric electric field properties
06 p0875 A72-17468
- Quiescent large volume collisionless He and Ar plasma generation via hf electric fields, noting low cost
06 p0854 A72-17504
- Dynamic stabilization of transverse Kelvin-Helmholtz instability driven by nonuniform plasma motion, using ac electric field near ion cyclotron frequency
06 p0857 A72-17531
- Injection laser threshold current density, radiation pattern and electric field distribution relation to layer thickness and dielectric constants, using waveguide theory
06 p0825 A72-17772
- Electric field rise times of first and subsequent lightning return strokes, discussing waveform oscillograms
06 p0841 A72-17822
- Pulsed and hf electric field effects on ionizing particle recording in nuclear and photographic emulsions
06 p0816 A72-17833
- Piezoresonance modulation of IR amplitude in GaAs crystal by electric field at single, doubled and quadrupled frequencies
06 p0866 A72-17843
- Boltzmann equation solution analysis for Maxwell-Lorentz gas in electric field, discussing conditions for electron velocity distribution isotropic part evolution towards Maxwellian distribution
06 p0861 A72-18162
- Electrostatic field calculation for magnetron/injection electron gun with wedge shaped cathode
06 p0826 A72-18404

Interelectrode gas-filled gap electron avalanche formation effects in weak electric field, calculating ionization coefficient

06 p0863 A72-18411

Electric field induced ionizing potential waves in dense gas, describing avalanching electron gas breakdown into filaments by fluid dynamic and Maxwell field equations

06 p0864 A72-18534

Electrostatic focusing field inhomogeneity/gradients/ effects on high frequency electron-wave interaction processes in linear beam backward wave oscillator tube

07 p0952 A72-18845

Ion-electron collisions effect on ion cloud motion in magnetoactive plasma immersed in uniform external electric field

07 p1055 A72-18894

Electroconductivities and electrostatic field structure within equatorial electrojet, observing vertical distribution

07 p1056 A72-18896

Small scale phase space density granulations/clumps/ in turbulent plasma due to fluctuating electric field

07 p1041 A72-19510

Weak LF electric field influence on circadian rhythms of human rectal temperature and activity

07 p0918 A72-19531

Transport phenomena theory for semiconductors in strong electric fields, examining negative differential conductivity and nonmonotonic current behavior

07 p1048 A72-19637

Strong electric field recombinational domains in semiconductors with mobile holes and electrons during band-band illumination or double injection

07 p1048 A72-19638

Coordinate transformation for decoupling equations for tangential electric and magnetic field propagation through series of uniform cylindrical layers with arbitrary properties

07 p0946 A72-19799

Magnetosphere LF electric fields influence on trapped radiation region particle behavior, considering magnetic drift rates

07 p1062 A72-20036

Electric field measurements in ionosphere and magnetosphere by double probe and electron and ion drift techniques

07 p0978 A72-20042

Ionosphere electric field sources, magnitudes, relation to currents and effects on ionization distributions and electron density irregularities

07 p0978 A72-20043

Structural interactions between magnetosphere and ionosphere in terms of electrostatic field associated with plasma temperature difference

07 p0979 A72-20046

Electric field in flow of medium with tensor conductivity due to Hall effect, studying eddy currents structure in magnetic field variation region

07 p1044 A72-20316

Interplanetary origin of magnetospheric electric fields responsible for polar magnetic disturbances

07 p0979 A72-20382

Bulk conductors dc field distribution applications to electrical resistivity measurements and nondestructive testing

07 p0998 A72-20461

Radio wave alternating electric field heating of ionospheric plasma electrons with density increase below 200 km and decrease at F layer maximum

08 p1152 A72-20703

Charged conductors in homogeneous collisionless magnetoactive plasma at hybrid frequencies, investigating antenna array quasi-electrostatic field one dimensional structure

08 p1138 A72-20746

Transverse and longitudinal current fluctuations in degenerate nonparabolic semiconductors in strong electric field

08 p1216 A72-21074

Electron plasma fluctuations in semiconductor with nonparabolic conduction band under external electric and magnetic fields

08 p1218 A72-21877

Quasi-elastic scattering differential cross section for nonpolarized IR radiation in electron plasma of semiconductors in strong elastic fields

09 p1366 A72-22210

Light modulation by exciton electric absorption in thin high impedance recrystallized CdTe films within strong electric fields, showing spectral distribution curves

09 p1366 A72-22419

Plasma emitter shape determination in accelerating electric field for charged particle flux production

09 p1358 A72-22490

Two fluid MHD model to study cylindrical plasma condenser resonance properties in axial magnetic and alternating electric fields

09 p1360 A72-22952

Ball lightning theory based on thin conducting ladder networks and three dimensional fine particle structures formation in electric fields

09 p1346 A72-22963

Turbulent LF electric field fluctuations relationship with disturbed F region, spread F and scintillations of radio stars and satellites

09 p1300 A72-23025

Noise of high electric field biased gallium arsenide diodes, calculating LF power spectrum

09 p1288 A72-23123

German monograph on radiation characteristics of planar systems in aperture plane of parallel plate waveguide, obtaining relationship between electric and magnetic fields

10 p1434 A72-23775

Hydrogen atom emission spectrum calculation in uniform rotating electric field, applying to charged particles collisions and Stark broadening of plasma H lines

10 p1514 A72-24039

Relativistic electron beam injection into dense plasma, analyzing perturbed electric and magnetic fields and charge and current densities

10 p1521 A72-24353

Ionospheric and magnetospheric electric field measurements by rocket, satellite or balloon-borne electrostatic probes or by plasma drift methods

10 p1473 A72-24529

Electric field profile in n-type GaAs layer biased above transferred electron threshold for small signal amplifier operation

10 p1450 A72-24554

Dipole antenna near electric field, basing calculation method on integral equation for antenna surface charge distribution function

10 p1451 A72-24579

Sporadic E layer altitude and density variations caused by lunar influences, using model for electrostatic field and wind shear effects

10 p1478 A72-25163

Electron density maxima position relationship to wind profiles in sporadic E layer with electric fields and vertical ion motion

10 p1530 A72-25165

Semiconductor film impedance vs resistivity in free space electric field

11 p1700 A72-25778

Sunspots contact region charged particles acceleration by plasma flow induced electric field, noting Fermi type mechanism

11 p1695 A72-26107

Anomalous plasma heating by laser irradiation with superimposed electric field oscillating near plasma frequency

11 p1696 A72-26326

Radial profiles of ionized He flux and protons in magnetosphere, taking into account charge exchange processes and fluctuating electrostatic fields

11 p1624 A72-26397

Geomagnetic Sq current electric field mapping into lower atmosphere, calculating equipotential surfaces

11 p1626 A72-26416

Third harmonic current density excitation by HF electric field in Lorentz plasma, calculating electron distribution function with unnormalized spherical harmonics and Fourier series

11 p1697 A72-26553

Geomagnetic activity index response time to fluctuations in interplanetary electric field azimuthal component, relating to magnetosphere average energy content

11 p1627 A72-26670

Constitutive equations for nonlocal theory of polar elastic dielectrics interaction with quasi-static electric field, using variational principle

11 p1738 A72-26723

Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration

12 p1850 A72-27131

Transient current density in plasma subjected to pulsed electric field derived from Boltzmann transfer equation

12 p1850 A72-27278

Turbulent plasma electric field energy density spectrum from statistical mechanics investigation based on canonical formalism for electron plasma

12 p1851 A72-27387

Cascade ionization of air by RF electric fields and intense laser pulses, solving Boltzmann equation for electron distribution

12 p1848 A72-27390

Tropical thunderstorm precipitation current variations due to lightning produced atmospheric electric field changes, considering charged raindrops turbulent diffusion

12 p1839 A72-27502

Inertial sensing principles interrelationship, stressing electric and magnetic procedures

12 p1809 A72-27788

Analytic models of large scale electric fields in atmosphere, considering geomagnetic Sq current in lower atmosphere and inner magnetosphere

12 p1804 A72-27790

Upper atmosphere electric fields derived from ionosphere-earth electric potential measurements following solar flare activity

12 p1804 A72-27805

Room temperature time of flight electron and hole mobility and trapping time measurements in zinc selenides as function of electric field

12 p1855 A72-27835

Electric field nature required for DP current system development in disturbed high latitude ionosphere, discussing F 2 region ionization drift

13 p1946 A72-28596

Qualitative microscopic model for biologic postsynaptic membrane with tunneling chemical bonds, noting selective ionic conductivity as function of electric field

13 p1909 A72-28769

West German-United States Barium Ion Cloud Project meteorological support at Wallops Station, discussing magnetospheric magnetic and electric fields

13 p1947 A72-28802

Contact potential difference effects on lubricant film thickness in electronic equipment joints, noting molecules orientation in electric field

13 p1930 A72-29052

Electrostatic field and electron trajectories calculation for focusing optoelectronic systems formed by interacting electrodes positioned on conducting surface

13 p2004 A72-29070

Spectrum analysis of synchronous recordings of Pi 1 irregular pulsations and auroral brightness at Sogra for ionospheric electric fields

13 p1948 A72-29235

Electrode boundary layer electrical breakdown mechanism with allowance for steep temperature gradients at surface, considering Joule heating or electrostatic field effect as causes

13 p2013 A72-29361

Plasma wave measurements duringOGO-5 dayside magnetosphere polar cusp encounters, discussing ULF magnetic field wave levels and VLF electric field amplitude ranges

13 p1950 A72-29380

Polar thermospheric wind calculation from convection electric field measurements in polar cap ionosphere, using simple ionospheric model

13 p1950 A72-29385

He ions motion normal to magnetic field under induced electric field, analyzing resonance mechanism

13 p2016 A72-29606

Plasma current layer formation due to electric field directed along magnetic field neutral line

13 p2017 A72-29699

Time varying magnetospheric electric field spatial distribution effect on plasmasphere temporal evolution, considering fine structure due to periodic gusts in convection electric field

13 p1953 A72-29804

Positively and negatively charged plasma components thermodynamic density fluctuations effect on ionospheric and magnetospheric slowly varying electric fields measurement

13 p1953 A72-29810

Electric field excited stable auroral red arc time dependent behavior, noting inconsistency with satellite and ground observation of 6300 A emission for electron energy

13 p1953 A72-29812

Density and electric field oscillations of plasma in stellarator, considering magnetic field strength effect, stabilization by ionic collisions and energy pumping mechanism

13 p2019 A72-29985

Ion-acoustic oscillations effect on turbulent plasma electric conductivity within weak external electric field

13 p2019 A72-29990

Airplane-borne cylindrical field mill type instrument to record atmospheric electric field

13 p1961 A72-30085

Microscopic processes within high energy ion acceleration in laser-produced plasmas, discussing transient electric field role

14 p2136 A72-30178

Charge carrier cooling in nonhomogeneous semiconductors by static electric field, plotting average electron temperature as function of current

14 p2142 A72-30362

Near field effects on pulsar particle acceleration, relating electric and magnetic field magnitudes

14 p2156 A72-30568

Ionosphere heating effects produced by transverse electric field, discussing strong nighttime source

14 p2100 A72-30631

Magnetospheric and ionospheric potential electric fields, using variational process based on transverse/longitudinal conductivity ratios in plasma

14 p2100 A72-30633

Magnetospheric electric fields estimation from electron fluxes intensity on early daylight side

14 p2102 A72-30660

Magnetic and electric field effects on steady state laminar MHD Couette flow of non-Newtonian fluids governed by Prandtl rheological law or Ostwald-de Waele power law

14 p2139 A72-30717

Gravitational radiation generation and detection, discussing Weber detector, interaction with electric and magnetic fields and gravitational astronomy

15 p2273 A72-31287

Temperature and electric field profiles in two TRAPATT diode structures in nonoscillatory state under dc bias, comparing geometrical limitations on diamond heat sinks

15 p2205 A72-31316

Joint photon-count probability distribution measurement of electric field amplitude correlation function for random-Gaussian light fields produced by laser beam scattering

15 p2280 A72-31378

Electric field and volume charge density distribution in bipolar conductivity semiconductor with recombination instability

15 p2291 A72-31392

Solar event-related ionospheric horizontal electric fields derived from balloon measurement of mid-European and equatorial ionosphere potentials

15 p2223 A72-31556

High electric field effects on I-V characteristics of Te-As-Ge-Si type chalcogenide thin film, noting Poole-Frenkel emission and electron tunneling roles

15 p2291 A72-31641

Electric field projections in contrast to voltage as working quantity for frontal plane ECG leads

15 p2188 A72-31766

Electric and magnetic fields fluctuations in region between shock wave front and magnetosphere boundary, noting resulting energy dissipation

15 p2225 A72-31902

Electron pressure effect on lunar wake shape and size, calculating electric field created by charge separation

15 p2308 A72-31925

Thermodynamic plasma density fluctuation induced electric noise field measurement as means to determine plasma density and electron and ion temperatures

15 p2284 A72-31943

Whistlers noise frequency and minimum group time delay determined from model magnetosphere and from measurement, noting precision effect on electric field calculation accuracy

15 p2198 A72-31947

Back surface electric field Si cell characteristics and fabrication using alloyed-through contact process

15 p2182 A72-32130

Electron swarms in uniform electric fields, discussing anode current amplification/radial distribution and drift-diffusion equation

15 p2285 A72-32239

Skewed wire antennas electric and magnetic near fields prediction from computer programs based on matrix inversion method

15 p2209 A72-32567

Electron beam amplifier based on fast cyclotron wave interaction with slow synchronous wave in axisymmetrical electrostatic field, discussing power efficiency increase

15 p2210 A72-32377

HF electric field effect on ultrasound wave propagation in semiconductor, noting amplification factor dependence on electron heating

15 p2279 A72-32739

Azimuthal electric fields role in toroidal plasma transport properties based on kinetic theory for collision dominated regime

16 p2432 A72-32806

Nightside magnetosphere convection electric field from motions of whistler ducts within plasmasphere, considering interplanetary magnetic field theta component

16 p2382 A72-32960

Electric and magnetic field effects on auroras formation, noting similarity with thermonuclear reactor plasma

16 p2456 A72-33518

Particle and energy fluxes across magnetic field in axisymmetric toroidal magnetic traps and plasmas with weak collisions, calculating radial electric field

16 p2440 A72-34153

Report on photo-sheath calculations for the satellite GEOS.

17 p2553 A72-34629

Plasma emitter shape determination in accelerating electric field for charged particle flux production

17 p2588 A72-34653

Real height variations of the ionospheric F2-layer above some pairs of geomagnetically conjugate stations.

17 p2545 A72-34689

Relativistic electron beam injection into dense plasma, analyzing perturbed electric and magnetic fields and charge and current densities

17 p2589 A72-34954

Solution of the Boltzmann equation for a fully ionized plasma in an oscillatory electric field and a steady magnetic field. V - Explicit solution for a homogeneous plasma in a high-frequency electric field.

17 p2589 A72-35057

Auroral electron acceleration by longitudinal electric field due to protons defreezing above ionosphere

17 p2550 A72-35852

A theoretical analysis of the acceleration of ions in axially symmetric crossed fields with an external source and sectioned electrodes

17 p2593 A72-35902

Calculation of the dependence of the charge density on the distribution of the potential in crossed symmetric electric and magnetic fields

17 p2593 A72-35903

A new source for the large-scale electric fields in the magnetosphere.

18 p2686 A72-36623

Quasi-linear theory of plasmas situated in a weak UHF electric field and a constant magnetic field

18 p2715 A72-36654

Electric fields in MHD channels in the case of anisotropic and nonuniform conductivity

18 p2716 A72-36817

Phase-plane solution for the electrostatic field of an ionospheric satellite.

18 p2728 A72-36950

Detection of defects in semiconductor structures by means of recording the temperature and electric fields.

18 p2693 A72-37106

Flute modes in a plasma in the presence of nonuniform electric fields.

18 p2717 A72-37162

Production of intense ion beams by high-frequency electric fields.

19 p2839 A72-37331

Variation of the longitudinal electric field by the internally modulated beam in a He-Ne laser.

19 p2810 A72-37408

Instabilities in semiconductors with negative differential mobility.

19 p2844 A72-37465

The effect of contacts on microwave emission from InSb.

19 p2844 A72-37728

Infrared dispersion of second-order electric susceptibilities in semiconducting compounds.

19 p2844 A72-37944

Radio wave alternating electric field heating of ionospheric plasma electrons with density increase below 200 km and decrease at F layer maximum

19 p2790 A72-38331

Role of an electric field in the diffusion mechanism of the graphite-to-diamond phase transformation

19 p2823 A72-38405

Properties of the electrostatic field of a system of annular electrets and possibilities of its application for focusing in molecular generators

19 p2804 A72-38538

A satellite survey of vector electric fields in the ionosphere at frequencies of 10 to 500 hertz. I - Isotropic, high-latitude electrostatic emissions.

19 p2768 A72-38742

A satellite survey of vector electric fields in the ionosphere at frequencies of 10 to 500 hertz. II - The electric component of ELF hiss.

19 p2768 A72-38743

A satellite survey of vector electric fields in the ionosphere at frequencies of 10 to 500 hertz. III - Low-frequency equatorial emissions and their relationship to ionospheric turbulence.

19 p2768 A72-38744

Kinetic theory of density fluctuations in a magnetized collision-dominated plasma in an electric field.

19 p2792 A72-38745

A small ELF electric field probe.

20 p2921 A72-38994

On the theory of electrical conductivity in semiconducting thin films under a high electric field.

20 p2959 A72-39216

Radial penetration of a hot plasma associated with a large-scale electric field in the magnetosphere, and some related problems.

20 p2916 A72-39228

Electrostatic, reticular vorticity, turbulence effects and equivalences with tensional and spectral elastic fields.

20 p2953 A72-39419

Radiation from a particle in static electric and magnetic fields.

20 p2956 A72-39459

Control of high-field domain in GaAs by the field effect and its application to functional devices.

20 p2960 A72-39706

Single-cycle electron acceleration in focused laser fields.

20 p2934 A72-39720

Investigation of the coagulation and breaking of droplets of comparable dimensions in an electric field

20 p2956 A72-40038

Characteristics of the low temperature effect of an electric field on the sensitivity of photographic emulsions

21 p3053 A72-40391

He ions motion normal to magnetic field under induced electric field, analyzing resonance mechanism

21 p3091 A72-40660

Determination of conduction anisotropies in semiconductors.

21 p3097 A72-40697

Formation of intense charged particle beams in a current-carrying plasma.

21 p3092 A72-40834

Diffusion in the system K2O-SrO-SiO2. IV - Mobility model, electrostatic effects, and multicomponent diffusion.

21 p3097 A72-40935

Interaction of a steady plasma flow with a dipole magnetic field in the presence of a radial electric field.

21 p3093 A72-41388

Balloon optical experiments in IR, visible, UV and X ray regions, considering in situ measurements of atmospheric composition, electric field and cosmic dust

21 p3049 A72-41613

Plasma heating by large-amplitude, low-frequency electric fields.

21 p3094 A72-41630

Group properties and invariant solutions of electric-field equations in the case of nonlinear Ohm's laws

21 p3086 A72-41654

Computer-aided numerical solution for electric field structure of rod and plate, calculating field distortion by rod antennas and near lightning rod

21 p3086 A72-41671

Influence of a variable electric field on the diffusion of ions in a gas

21 p3086 A72-41676

Scattering by a cylindrical semiconductor rod of anisotropic permittivity perpendicular to the electric field in a rectangular waveguide.

21 p3023 A72-41836

Experimental investigation of the effect of an electric field on a laminar flame

22 p3243 A72-41889

Longitudinal magnetospheric currents contribution to auroral electrojet from satellite observation data, noting magnetosphere electric field excitation of meridional Pedersen and Hall currents

22 p3169 A72-42225

Equations of plane potential electrohydrodynamic flow, noting jet and quasi-one dimensional flows of charged particles in curvilinear electrostatic field

22 p3210 A72-42269

Polar-cap electric field distributions related to the interplanetary magnetic field direction.

22 p3172 A72-42432

Fundamental transverse electric field /TE-sub 0/ mode selection for thin-film asymmetric light guides.

22 p3186 A72-42622

Injun 5 satellite measurements of magnetospheric convection electric fields via double probe technique, discussing substantiation withOGO 6 results

22 p3174 A72-42901

Measurement of nonthermal oscillations at the plasma frequency and its harmonics in a magnetized arc plasma, using the high-frequency Stark effect.

22 p3212 A72-42916

Determination of characteristic magnitudes of toroidal electrostatic analyzers - Application to the optimization of analyzers used in space physics

22 p3180 A72-42935

On the drift velocity of electrons in a gas.

22 p3212 A72-42996

Wave propagation in plasma modulated by external electric field, noting dispersion equation for coupled waves and instability conditions

22 p3212 A72-43101

Motion of plasmoids in a multipole magnetic field of toroidal configuration

22 p3214 A72-43120

Influence of nonuniformities of the built-in field on the collection efficiency of a semiconductor photocell

22 p3140 A72-43190

Numerical simulation of the relaxation of a beam of charged particles in a strong electric field

23 p3315 A72-43530

Calculation of the parameters of a plasma accelerated in a high-frequency electric field and a static magnetic field

23 p3320 A72-43660

Analysis of the electric field distribution in a rectangular waveguide with a flat transverse inhomogeneity

23 p3272 A72-44141

Quasi-linear theory for the low-frequency instability of a plasma placed in a weak SHF electric field

23 p3321 A72-44172

Method for solving the problem of radiation in an anisotropic plasma

23 p3321 A72-44220

On mechanical response of a non-uniform piezoelectric transducer under the influence of a body-force.

23 p3291 A72-44316

Electric field orientation, magnetic field strength and high voltage pulse delay effects on spark chamber track displacement from true particle trajectory

23 p3291 A72-44441

Parametric instabilities and anomalous heating of plasmas near the lower hybrid frequency.

23 p3323 A72-44545

Transport phenomena theory for semiconductors in strong electric fields, examining negative differential conductivity and nonmonotonic current behavior
24 p3427 A72-44569

Strong electric field recombinational domains in semiconductors with mobile holes and electrons during band-band illumination or double injection
24 p3431 A72-44570

Electric field variations during substorms - OGO-6 measurements.
24 p3396 A72-44854

Electric field nature for DP current system development in disturbed high latitude ionosphere, discussing F 2 region ionization drift
24 p3398 A72-45096

Transformation of trapped charged particles to transit particles under the influence of a high-frequency electric field
24 p3429 A72-45494

Current induced drift rate of plasma electrons in electric and magnetic fields, noting electron velocities in turbulent heating of plasma
24 p3429 A72-45507

ELECTRIC FILTERS
NT BANDPASS FILTERS
NT CRYSTAL FILTERS
NT DIGITAL FILTERS
NT ELECTROMAGNETIC WAVE FILTERS
NT INFRARED FILTERS
NT LINEAR FILTERS
NT LOW PASS FILTERS
NT MICROWAVE FILTERS
NT OPTICAL FILTERS
NT RADAR FILTERS
NT RADIO FILTERS
NT TRACKING FILTERS
NT ULTRAVIOLET FILTERS
NT WAVEGUIDE FILTERS

Dc-dc converter input filter requirements and design for spacecraft power processing equipment
01 p0007 A72-11058

Frequency domain representation of Doppler invariant FM signal defining matched pulse compression filter
04 p0507 A72-15693

Filter configuration for detecting pulse excitation smaller than kT, noting SNR and resolving time
05 p0631 A72-17075

Meteorological measurements representativeness and analog discrete filters synthesis with optimal data processing and weighting function averaging procedures
08 p1203 A72-22123

Telecommunications ultrasonic resonators, electromechanical and piezoelectric filters and microacoustic surface elastic wave devices
09 p1281 A72-23468

Monte Carlo and convolution methods for statistical analysis of ladder filters, describing programs for determining attenuation probabilistic distribution as function of components dispersions
09 p1289 A72-23679

Active notch filter circuits for extending accelerometers frequency response to near resonance, presenting error analysis of mismatching components
12 p1808 A72-27639

Transistorized electronic equipment with delay line for optimal filtration of PSK signals
13 p1930 A72-29047

Multidimensional non-Gaussian signals filtration in presence of time correlated noise with discrete values of argument
13 p1937 A72-29638

Nonstationary fluctuation signal analysis into predetermined frequency band by passing digitized information through resonant LCR filter mathematical analog
16 p2362 A72-32855

Laguerre filters parameters choice for correlator input networks application, noting output SNR improvement
16 p2368 A72-33089

Computerized design of electric filters with given frequency response, discussing attenuation characteristic approximation by Chebyshev method
19 p2776 A72-37307

Frequency response optimization of electric filters, modulators and impedance matching circuits using minimax criterion, noting nonlinear programming sequence
19 p2771 A72-37310

Transmission of two partially time coincident linearly frequency modulated signals through limiter-filter system, noting distortion and satellite signals generation
19 p2766 A72-38419

RC gyrator filters frequency characteristics stability analysis, noting elements sensitivity as function of frequency and Q value
19 p2774 A72-38421

A method of calculating the lag of the phase photoelectric installation of a time service
21 p3058 A72-41769

Electromechanical filter with attenuation poles consisting of multi-mode vibrators.
21 p3036 A72-41828

Network analysis and frequency response of LF filter with distributed RC structure and voltage converter
22 p3158 A72-42120

Correlator with orthogonal filters for acoustic diagnostics, noting Laguerre functions variations in signal pairs autocorrelation
22 p3176 A72-42133

ELECTRIC FUSES
Fast acting nonmechanical self healing mercury fuse for high current circuit protection
03 p0335 A72-14203

ELECTRIC GENERATORS
NT AC GENERATORS
NT ALKALINE BATTERIES
NT DIRECT POWER GENERATORS
NT DYNAMOMETERS
NT FUEL CELLS
NT HYDROGEN OXYGEN FUEL CELLS
NT MAGNETOHYDRODYNAMIC GENERATORS
NT METAL AIR BATTERIES
NT PHOTOELECTRIC GENERATORS
NT RADIOISOTOPE BATTERIES
NT ROTATING GENERATORS
NT SOLAR CELLS
NT SOLAR GENERATORS
NT THERMIONIC CONVERTERS
NT THERMOELECTRIC GENERATORS
NT TURBOGENERATORS
NT ZINC-OXYGEN BATTERIES

Power conditioning requirements and tradeoff considerations for space shuttle, warning against central power conversion use on orbiter and booster vehicles
01 p0007 A72-11052

Aircraft hybrid electrical power systems, describing variable frequency generation and high voltage dc distribution
01 p0009 A72-11068

Lunar Roving Vehicle navigation subsystem power converter design, discussing circuits, performance and voltage regulators and preregulators
01 p0009 A72-11069

German Research and Test Institute for Aero- and Astronautics 1970 report covering flow mechanics, power conversion, aerospace medicine, atmospheric physics, etc
01 p0048 A72-11151

Nuclear energy value to society, stressing usefulness for electric power generation and marine propulsion
03 p0387 A72-14376

Powder concentration effects on corona particle charging efficiency of aerosols for electrogasdynamic generators
06 p0760 A72-18335

Aircraft electric power generation history, noting aircraft performance effect on electrical system design
07 p0914 A72-20201

Radiation efficiency of electric power-energy conversion during pulsed discharge in Xe tube
11 p1651 A72-26364

Radiovoltaic generator energy conversion by thin film solar cells, noting performance dependence on semiconductor band gap and radioisotope characteristics
12 p1757 A72-28021

Microwave power generation via semiconductor devices, discussing circuit problems due to negative resistance
14 p2088 A72-30832

Total weight estimates of electric power supply system for transport vehicles involving power generators and primary electrical network with distribution system
16 p2350 A72-32997

Five channel recording instrument for energy dissipation evaluation in electric machines from thermal emf measurements
16 p2392 A72-33284

Radiation efficiency of electric power-energy conversion during pulsed discharge in Xe tube
16 p2403 A72-33716

Si p-n junction solar cell fill factor for electric power available to load, noting discrepancy between calculated and measured values due to recombination
17 p2494 A72-34264

Internal engine generator application to commercial transport aircraft.
17 p2498 A72-35566

Electrogasdynamic generator nonlinear internal resistance determination as function of flow parameters and model geometry via boundary conditions formulation
18 p2643 A72-35998

Liquid or solid propellant hot gas turbines as power source for hydraulic and electrical energy
18 p2648 A72-36558

Generalised method of harmonic reduction in a.c.-d.c. converters by harmonic current injection.
18 p2648 A72-37209

Effect of electrical generator parameters on transient suppressors.
19 p2753 A72-37291

ELECTRIC IGNITION
Turboprop electric igniter climatic test problems and equipment for assessing quality control
07 p0954 A72-19112

Loading current density effect on normal lead stynthane ignition in primary explosive hot wire initiation, using capacitor discharge and constant current activation signals
08 p1218 A72-20752

Computerized numerical nodal analysis of heat transfer away from bridgewire of electroexplosive device to meet all- and no-fire requirements
08 p1219 A72-20753

Fast rise high current constant trigger circuit for electroexplosive devices, using flat two-conductor transmission line to minimize inductance
08 p1219 A72-20761

Aerospace type electroexplosive devices gross sensitivity to short damped rf energy burst
08 p1220 A72-20765

Pulsed metallic-plasma generators.
20 p2958 A72-39781

ELECTRIC IMPULSES
U ELECTRIC PULSES

ELECTRIC LEADS
U ELECTRIC WIRE

ELECTRIC MOMENTS
Electromagnetic wave scattering characteristics at arbitrarily configured body with dimensions smaller than primary field wavelength, determining electric and magnetic moments
02 p0181 A72-12595

Electric multipole moments calculation by quasi-static method for homogeneous quasi-neutral oblate plasmoid during resonance
13 p2020 A72-30014

Electric multipole moments calculation by quasi-static method for homogeneous quasi-neutral oblate plasma spheroid during electromagnetic interaction under resonance conditions
22 p3212 A72-42729

ELECTRIC MOTORS
NT SYNCHRONOUS MOTORS
NT TORQUE MOTORS

Numerical analysis method for performance prediction of linear induction machines including liquid metal MHD pumps and generators and linear motors
13 p1900 A72-29365

Solid state stepping motor drive controller to provide constant angular shaft velocity for scanner applications
13 p1933 A72-29767

Structural design and electrical drive mechanism of helicopter hoist for rescue operations
13 p1912 A72-30097

German monograph on small variable-speed motors with high impulse performance, considering asynchronous cage type, dc shunt type and pneumatic motors
15 p2182 A72-31325

Solid and composite rotor induction motors, comparing predicted characteristics based on analytical and numerical analyses
15 p2182 A72-31779

Five channel recording instrument for energy dissipation evaluation in electric machines from thermal emf measurements
16 p2392 A72-33284

Gyroscope drive systems, discussing various ac and dc electric motor types and switching and control circuits
16 p2396 A72-34135

Book - Electromechanical system components.
20 p2890 A72-39811

Electrical components in gas turbine control systems.
22 p3216 A72-42521

ELECTRIC NETWORKS
Active RC circuit with grounded capacitors capable of functioning as differentiator, bridge, inductance simulator, bandpass filter and oscillator
03 p0337 A72-14354

Computer analysis of linear electric circuits without restrictions on network topology and component composition, using system matrix
04 p0495 A72-14464

Low sensitivity distributed-active bandpass network with effective use of capacitance to save space and weight
04 p0506 A72-15307

Network formulations of electromagnetic fields in moving dispersive plasma media by equivalent parameter representation
04 p0490 A72-15400

Orthogonal 2-port network impedance transforming properties and applications to harmonic oscillators and filters
04 p0502 A72-15521

Tellegen theorem as energy conservation principle statement for energy exchange between elements in electric network
04 p0507 A72-15527

Electric network scattering matrix and associated incident and reflected wave variables concepts applications in linear optimal control problem

04 p0507 A72-15528

Computer aided linear circuit design for network synthesis, analysis, optimization and data storage noting MARTHA program

05 p0639 A72-15785

Two dimensional network class port behavior equivalence to three layer structures of linear passive isotropic materials based on depth and surface properties analysis

06 p0793 A72-17595

Harmonic oscillations sum conversion by two terminal pair network with complex nonlinearity

07 p0956 A72-19565

Digital computer calculation of complex electric networks described by mathematical models, calculating flow distribution

11 p1577 A72-25282

Computer program for symbolic network functions, using numerical algorithms for branches not represented by symbolic parameters

15 p2211 A72-31845

Passive and active electric circuit analysis by structural numbers method with computer time and space advantages, noting application to transistor circuits

16 p2370 A72-32851

Total weight estimates of electric power supply system for transport vehicles involving power generators and primary electrical network with distribution system

16 p2350 A72-32997

Determination of linear circuit sensitivity to circuit parameter changes in the equations of state variables

19 p2777 A72-37312

Electronic circuit for linearizing the transfer function of a photographic plate used in mass-spectrometry.

20 p2925 A72-39428

Airport power supply system to meet increased load terminal demands, describing main and emergency standby network layout and equipment

24 p3388 A72-45272

ELECTRIC POTENTIAL

NT BIOELECTRIC POTENTIAL.

NT CONTACT POTENTIALS

NT COULOMB POTENTIAL

NT LOW VOLTAGE

NT PHOTOVOLTAGES

NT SPIKE POTENTIALS

Dember-Hall voltage ratio for low magnetoconcentration in intrinsic semiconductor

01 p0113 A72-10044

Electrostatic potential fluctuations spectrum in turbulent hot ion plasma confined between magnetic mirrors, investigating mode coupling, energy cascading and electron concentration

01 p0108 A72-10242

Potential and ion charge distribution in proximity to conducting sphere moving in low density collisionless ion-electron plasma

01 p0109 A72-10371

Affined RC or RL networks, investigating real and equal or imaginary, conjugate and inverse voltage and current transmittances

02 p0197 A72-12240

Electrohydrodynamic ideal incompressible fluid flow in flat and circular channels, determining electric potential and field distribution

02 p0266 A72-12431

Room temperature nonaqueous organic solvent electrochemical cell, producing open-circuit potential of 4.5 V

03 p0311 A72-12924

Automatized graphic information input into computer, using electric potential distribution introduced into conducting underlay sheet by current carrying drawing pen

03 p0326 A72-13093

Transient response of negatively biased Langmuir probes for planar and cylindrical plasma sheaths under large amplitude pulsed potentials [AD-739787]

03 p0361 A72-13924

Optimum manned spacecraft electrical power distribution voltage and frequency selection, discussing corona, radiation and safety

03 p0313 A72-14187

Field modification for integrodifferential equation solution for voltage on exponentially narrow waveguide slit, discussing further changes in method

04 p0501 A72-15409

Potential change under pitting corrosion and repassivation on Cr-Ni steels alloyed with V, Si, Mo and Re

04 p0535 A72-15730

Transport processes in electrolytic solutions, considering current and potential distributions in localized corrosion

04 p0536 A72-15737

Electrical analog to determine potential field distribution for crack growth monitoring of edge notched and compact tension specimens for current input and probe positions optimization

05 p0666 A72-16303

Switching contacts performance principles, noting inductive energy role in electrical breakdown voltage determination

06 p0791 A72-18579

Electrode potential gradients during dimensional electrochemical treatment of Ni and Ni based alloys

08 p1175 A72-21041

Low level current operation in insulated gate FET, obtaining analytical expression for voltage

08 p1142 A72-21744

Alkali antimonide photocathodes photoelectric yield / quantum efficiency / relation to reversible variation of surface potential, noting critical current density temperature dependence

08 p1171 A72-21968

Electrochemical tests, noting electric potential, current and electrode impedance measurements for corrosion rate and oxidizing power evaluation

08 p1189 A72-22105

Corrosion effects evaluation from electrode potentials, noting copper pitting and weathering

08 p1189 A72-22108

Microwave induced dc voltages across unbiased Josephson tunnel junctions, showing power spectra dependence on magnetic field

09 p1367 A72-22458

Ionospheric potential and thunderstorm activity annual variations during 1959-70 solar cycle from radiosonde measurements in free atmosphere

09 p1301 A72-23265

Metal probe potentials during mechanical displacement along surface of n-region of forward biased Si diode

09 p1288 A72-23362

Statistical analysis of piezoelectric transducer voltage-displacement characteristic, determining linearity deviations magnitude

09 p1317 A72-23676

Automatized graphic information input into computer, using electric potential distribution introduced into conducting underlay sheet by current carrying drawing pen

11 p1601 A72-25705

Retarding potential analyzer errors and performance degradation due to grid plane potential depressions

11 p1634 A72-26411

Charge carrier density, neutral gas density, electric potential and electron temperature profiles in cylindrical diffusion column, considering electron pressure

11 p1698 A72-26646

Calorimeter calibration for laser energy and power measurements in terms of electrical energy based on voltage, resistance and frequency standards

11 p1652 A72-26781

Upper atmosphere electric fields derived from ionosphere-earth electric potential measurements following solar flare activity

12 p1804 A72-27805

High frequency potential effect on fast transverse magnetic waves along plasma layer bounded by two conducting plates

12 p1785 A72-27855

Varactor broken voltage-capacitance curve due to uncompensated impurities concentration change at p-n junction

13 p1926 A72-28379

Laplace transformation for mechanical response of piezoelectric composite transducer under action of thermal field and electric potential, noting time dependent modulus of elasticity

13 p1955 A72-28621

Experimental investigation of toroidal discharge electrostatic potential fluctuations in turbulently heated plasma, discussing correlation with effective conductivity

13 p2012 A72-29122

Weak ion-acoustic quasi-shock wave propagation in collisionless plasma, determining long time behavior of precursor ion stream reflected by electrostatic potential

13 p2012 A72-29125

Linear nonequilibrium Faraday type MHD generator, predicting electrode configuration effects on voltage drops, axial leakages and current distribution

13 p1900 A72-29353

Characteristic functions of potential distribution on sphere with longitude dependent conductivity for application to ionosphere electrodynamics

14 p2101 A72-30644

Narrow strongly radiating slot voltage distribution, investigating cavity coupling with integral equation

15 p2209 A72-32659

Plasma accumulation in electrostatic potential well produced by electron space charges, determining diocotron instability as function of electron plasma and gyrofrequency ratio

16 p2434 A72-32819

Voltage and current generalized immittance converter realization, using with current conveyor for simulation

16 p2367 A72-32856

Voltages induced in superconductors in the absence of transport currents.

18 p2719 A72-36744

Calculation of electrostatic potential distribution in semiconductor's contact region during passage of injecting into blocking contact due to illumination.

19 p2846 A72-38626

Electrochemical protection potential of metals and alloys in pitting, intergranular corrosion and stress corrosion cracking in presence of chlorides

21 p3065 A72-40087

Effects of Landau damping on nonlinear wave modulation in plasma.

21 p3089 A72-40189

Current and voltage waveform measurements with sampling oscilloscope and capacitive voltage-divide probe to verify TRAPATT diode oscillator theoretical model

21 p3032 A72-40635

Potential measurement and stabilization of an isolated target using electron beams.

21 p3087 A72-40700

Influence of prior electrochemical history on the propagation of localized corrosion.

22 p3195 A72-43129

Comparison of microwave-induced constant-voltage steps in Pb and Sn Josephson junctions.

23 p3323 A72-43272

Capacitance voltage characteristics instability of metal-aluminum oxide-silicon dioxide-silicon (MAOS) structures, suggesting polarization effect in layer formed during deposition and annealing

23 p3324 A72-44070

The negative space-charge density distribution and the potential distribution in a Penning discharge cell

23 p3324 A72-44211

ELECTRIC POWER

L-band Gunn oscillator using nonsinusoidal device voltage /switching mode/, comparing efficiency and output power with sinusoidal mode

01 p0036 A72-10635

Variable speed constant frequency power generation equipment influence weapon system effectiveness, considering weight and cost

01 p0008 A72-11067

Concorde aircraft electrical power systems design, noting dc and emergency supplies and installation

03 p0311 A72-12910

Ac and dc electric power transient test equipment satisfying MIL-STD-704A requirements

03 p0312 A72-14038

Aircraft electric power equipment transient voltage and EMC limits specifications

03 p0312 A72-14043

ALSEP central station data subsystem, discussing power conditioning unit and electric power subsystem

04 p0508 A72-15094

High efficiency solar electricity converters utilizing wave-like properties of radiation interacting with absorber-converter elements, discussing cost and fabrication advantages

[ASME PAPER 71-WA/SOL-1] 05 p0614 A72-15891

Pollution free electrical power generation from solar energy, discussing microwave transmission to earth, power shortages, thermal pollution and solar cell manufacture cost

[ASME PAPER 71-WA/SOL-2] 05 p0614 A72-15892

Kilowatt rotary dc-dc power transformer in modular sections for spacecraft applications, discussing electrical and mechanical designs and characteristics

08 p1112 A72-21414

High power series voltage regulators, discussing power hybrid microelectronic design techniques

08 p1112 A72-21415

Calorimeter calibration for laser energy and power measurements in terms of electrical energy based on voltage, resistance and frequency standards

11 p1652 A72-26781

Stacked TRAPATT diodes oscillator with microstripline circuit to obtain 1 kw peak power at 1 GHz

12 p1788 A72-27163

High electric power output Si solar cell development, discussing increased energy conversion efficiency

12 p1757 A72-28026

One-wavelength MHD induction generator operated on NaK flow system with various excitation conditions, calculating magnetic flux density and power by Fourier series

13 p1900 A72-29364

Silicon solar energy conversion for electrical power generation on spacecraft.

17 p2494 A72-34186

Cylindrical Cs thermionic converter with unique emitter and five collectors, measuring I-V characteristics to determine emitter work function, ignition voltage and electric power

18 p2646 A72-36191

Airborne equipment electric power supply standards to provide characteristics limits for compatibility with ground support systems

[SAE AS 1212] 18 p2648 A72-36535

Electric power generation by thermionic converters, discussing physical principles of operation and technology utilization in communications, meteorology, geophysics, oceanography and space exploration

20 p2890 A72-39940

Low temperature characteristics of the Gunn diode.

22 p3159 A72-42307

ELECTRIC POWER CONVERSION

- U ELECTRIC GENERATORS
- ELECTRIC POWER PLANTS**
- NT NUCLEAR POWER PLANTS
 - NASA closed cycle MHD facility for power generation, discussing system components, design and operation [AIAA PAPER 72-103] 05 p0616 A72-16936
 - Large-scale concentration and conversion of solar energy. 18 p2643 A72-36075
 - Airport power supply system to meet increased load terminal demands, describing main and emergency standby network layout and equipment 24 p3388 A72-45272

ELECTRIC POWER SUPPLIES

- NT SPACECRAFT POWER SUPPLIES
- Aircraft electrical power systems design dependence on latitude, minimum weight requirement, reliability degree, environmental conditions and acceleration 13 p1899 A72-28693
- Permanent manned lunar stations electrical power systems, discussing nuclear energy, solar cells and electrochemical power cells 15 p2214 A72-31814
- Total weight estimates of electric power supply system for transport vehicles involving power generators and primary electrical network with distribution system 16 p2350 A72-32997
- Push-pull transistor amplifier fed from two different voltage power supplies, noting power efficiency improvement 22 p3158 A72-42115

ELECTRIC POWER TRANSMISSION

- Optimum manned spacecraft electrical power distribution voltage and frequency selection, discussing corona, radiation and safety 03 p0313 A72-14187
- Remote power control for aircraft generating and distribution systems. 18 p2648 A72-37034
- Progress in the efficiency of free-space microwave power transmission. 22 p3140 A72-42481

ELECTRIC PROPULSION

- NT ARC JET ENGINES
- NT ELECTROMAGNETIC PROPULSION
- NT ELECTROSTATIC PROPULSION

- Solar electric propulsion upper stage for multiple space exploration missions, discussing spacecraft performance, configurations and program plans [AIAA PAPER 72-464] 11 p1709 A72-26199
- Electric propulsion spacecraft design for ion thruster systems testing with circular solar cells array as gyroscopic stable platform [AIAA PAPER 72-466] 11 p1578 A72-26200
- Solar electric propulsion application to comet and asteroid rendezvous and docking CARD missions with sample return [AIAA PAPER 72-470] 11 p1722 A72-26201
- ESRO electric propulsion systems R and D, discussing various concepts in terms of weight, cost, thrust level, efficiency, simplicity, exhaust velocity and development potential [AIAA PAPER 72-478] 11 p1710 A72-26207
- Electric propulsion systems assessment for military spacecraft, discussing ion, colloid, pulsed and quasi-steady plasma thrusters [AIAA PAPER 72-493] 11 p1711 A72-26217
- Solar electric propulsion subsystem performance tested on breadboard model, noting electrical power conversion, command, thrust vector control and propellant supply [AIAA PAPER 72-507] 11 p1711 A72-26227
- Solar electric propulsion for satellite transport into geostationary orbit, discussing launchers, energy supply, electrostatic ion thruster and mass/power ratio [AIAA PAPER 72-505] 12 p1860 A72-27422

- Ion thruster module design for primary electric propulsion systems, discussing optical configurations, discharge chamber, control and performance tests [AIAA PAPER 72-508] 12 p1860 A72-27423
- Model for mercury vapor electron bombardment ion thruster hollow cathodes operation and effects on thrust subsystem performance predictability [AIAA PAPER 72-420] 13 p2026 A72-28936
- Encounter trajectory design for solar electric propulsion rendezvous with low mass celestial bodies, noting target characteristics [AIAA PAPER 72-424] 13 p2036 A72-28939
- Encounter sequences determination techniques for multitarget flyby and rendezvous missions to asteroids and comets by spacecraft using solar electric propulsion [AIAA PAPER 72-429] 13 p2037 A72-28940
- Structural evaluations and dynamic testing of solar electric propulsion components, surveying power conditioning panel modal frequencies by holographic interferometry technique [AIAA PAPER 72-442] 13 p1899 A72-28941
- Solar array degradation effect on electric propulsion spacecraft performance, presenting power allocation strategy during mission [AIAA PAPER 72-444] 13 p2037 A72-28943
- Solar electric multimission spacecraft /SEMMS/ concept, investigating Mariner, Viking and TOPS technologies applicability to postulated mission/science objectives [AIAA PAPER 72-469] 13 p2026 A72-28946
- Nonchemical space propulsion systems for lunar and planetary flights, discussing fission, fusion and electric rockets 15 p2297 A72-31810
- Electrostatic ion thruster and hydrazine monopropellant systems for communication satellites, noting weight savings 17 p2596 A72-34265
- Thermionic reactor electric propulsion system requirements. 18 p2720 A72-36167
- Propulsive performance of a 30 kW arc-jet thruster stabilized by vortex and magnetic forces. 19 p2848 A72-37925

ELECTRIC PULSES

- Hertzian dipole radiation with impulsive currents in nondispersive dielectric half space 01 p0030 A72-10841
- Reactive two terminal pair network synthesis for shaping sawtooth current pulses in inductive load for given input function 02 p0193 A72-12222
- Photoelectric transducer with electric pulses as measure of rotating disk angle of turn, discussing design and measurement accuracy 05 p0662 A72-16124
- Peak parametric envelope calculation for hf pulse transients 06 p0773 A72-17571
- IC microcircuit for time-pulse voltage converter for conversion of dc voltage into electric pulses of length proportional to input signal 06 p0784 A72-17836
- Noise contaminated pulse signal transit time measurement by receiver using digital filters 07 p0939 A72-19051
- Unipolar pulsed plasma accelerator, describing trigatron circuit design for generation of 100 kA unipolar current pulses of 35 microsec duration 07 p1040 A72-19316
- Nanosecond solid dielectric discharger fired by Q switched ruby laser for commutation of coaxial line forming high amplitude voltage pulses 07 p1008 A72-20509
- Pulse energy and heat distribution in dielectric and metal during electroerosive machining 08 p1174 A72-21035
- Mass and energy balance for electrode wire fusion in pulsed current MIG /metal inert gas/ welding, discussing pulse duration and amplitude requirements and shielding gas composition effect 09 p1321 A72-23644
- IMPATT diode junction temperature measurement with accuracy from breakdown voltage by pulse techniques 10 p1449 A72-24304
- Electrically excited carbon dioxide-nitrogen laser using high repetition rate discharge pulses from pin electrode array transverse to supersonic flow 11 p1647 A72-26147
- Transient current density in plasma subjected to pulsed electric field derived from Boltzmann transfer equation 12 p1850 A72-27278
- High resolution angular velocity measurement by high speed digital transducer feeding photosensor pick-up pulses into pulse shaping circuit 14 p2103 A72-30199
- Electric current pulses effect on Zn monocrystals plastic deformation before brittle rupture, noting critical normal stresses increase 14 p2115 A72-30411

Short signal pulse shaping based on phase and amplitude selective properties of distributed parametric amplifiers operating under nonlinear conditions 14 p2090 A72-31112

Electrical breakdown of hexane investigated by high voltage nanosecond pulses, noting electron avalanche and streamer processes in time lag 15 p2278 A72-32244

Mathematical model for fast transverse glow discharges for pumping high pressure gas lasers, noting short rise time of applied voltage pulse 16 p2399 A72-33012

Gas flow direction measurement using flow to electric pulse converter 16 p2395 A72-33957

Toroidal plasma spectroscopic investigation from current pulse start to afterglow, noting electron temperature and density radial distributions and energy balance 17 p2591 A72-35373

Electron density measurements in early stage of the high current pulsed discharge. 18 p2716 A72-36957

USSR electric impulse de-icing system design. 18 p2648 A72-37033

Temperature-time characteristics of pulse-loaded temperature-measuring resistors 20 p2926 A72-39571

Response of the average pressure acting on the surface of an emitting circular transducer due to different reflecting objects. 21 p3055 A72-40948

Low cost design of linear pulse stretcher circuit for short duration pulse time measurement in nuclear instrumentation and computing counters 21 p3033 A72-40997

Computation of the shape and velocity of a nerve pulse 22 p3149 A72-42156

Holograms of spark discharges excited by nanosecond electric pulses 22 p3181 A72-43112

Experiment for studying the pulse shape of Cerenkov emission at large distances from an extensive air shower 23 p3330 A72-44420

ELECTRIC REACTORS

NT SATURABLE REACTORS

ELECTRIC RELAYS

- Self excited oscillations and transient responses of spacecraft stabilization relay system with delayed feedback, analyzing time delay effects in actuator circuit 08 p1241 A72-21170
- German book on control technology development covering historic periods, symbols and representations, stability, integral transformations, computers, servos, relays and multivariable systems, optimization, etc 08 p1145 A72-21478
- Variable structure automatic control relay system design with reduced insensitivity zone and given transient process requirements 13 p1935 A72-28612
- Relays - Conference, Oklahoma State University, Stillwater, April 1972 15 p2204 A72-31214
- Reduced voltage relay operation in aircraft high voltage ac power systems, describing RLC circuit theory, laboratory test arrangement and performance measurements 15 p2204 A72-31215
- Relay circuits malfunction due to interactions between coil induced currents and diode coil shunts, discussing circuit design and operating conditions 15 p2204 A72-31217
- Contactless relay circuits employing a branched-core magnetic modulator with second-harmonic output 19 p2771 A72-37302
- Electric relay spring design for miniaturization, deriving relation between length and thickness to minimize fiber stress under constant contacting force 19 p2775 A72-38617
- Book - Electromechanical system components. 20 p2890 A72-39811
- Switches for high-frequency channels 21 p3026 A72-40317
- Modelled time optimal control process investigation for system with relay components, noting Hausdorff maximum principle application for optimal linear control 24 p3386 A72-45389
- A near-time-optimal control circuit with a large number of relay elements 24 p3387 A72-45699

ELECTRIC ROCKET ENGINES

- NT ARC JET ENGINES
- NT ELECTROSTATIC ENGINES
- NT ELECTROTHERMAL ENGINES
- NT ION ENGINES
- NT PLASMA ENGINES
- NT RESISTOJET ENGINES

- Pulsed electric microthruster with solid fuel feed system, noting electrode geometry effects on performance and ablation patterns [AIAA PAPER 72-210] 05 p0705 A72-16799
- Electrodynamic thrusters for flight vehicle propulsion, reviewing design, efficiency and performance 08 p1224 A72-21669
- Test facility for electric microthrusters, describing microbalance for thrust and propellant mass flow rate measurement 09 p1292 A72-23404
- Magnetic field and polar region geometry effects on hollow cathode thruster performance of Kaufman electric engine [AIAA PAPER 72-417] 11 p1706 A72-26167
- Electric thruster for orbit and attitude control of nonspinning geostationary communications satellite [AIAA PAPER 72-436] 11 p1727 A72-26178
- Multimission and engine performance requirements for solar electric spacecraft propulsion stage configurations, considering launch vehicle compatibility integration payload and environmental extreme effects [AIAA PAPER 72-465] 11 p1712 A72-26325
- ELECTRIC SPARKS**
- High temperature U plasma generation at near gas core reactor conditions by sliding spark discharge into capillary channel lined with sintered uranium dioxide 01 p0112 A72-11338
- Specific quantitative trace analysis technique for solids using spark source mass spectrometry 03 p0361 A72-13849
- Explosive erosion in Al, Cu, W and Pb electrodes during high current spark discharges, using time resolved photography 05 p0692 A72-16032
- Sonic boom simulation devices and techniques, including wind tunnels, ballistic ranges, spark discharges and shock tubes 08 p1147 A72-21906
- Absorption spectra and plasma of laser spark in hydrogen, studying electron and atoms temperature and concentrations time variations 10 p1491 A72-24359
- Ignition energy measurement by nanosecond electric sparks produced by transmission line method, recording voltage pulses onto spark gap 10 p1563 A72-25138
- Nonprotein amino acids from spark discharges, comparing with Murchison meteorite amino acids 12 p1778 A72-27749
- Spark discharge light source for shock wave multiple exposure schlieren photography, describing pulse separator and spark trigger circuits 15 p2240 A72-32437
- Electric spark activated hot pressing application for sintered composite structures, noting process parameters optimization for superalloy powders 16 p2411 A72-34093
- Absorption spectra and plasma of laser spark in hydrogen, studying electron and atoms temperature and concentrations time variations 17 p2562 A72-34958
- Investigation of electrical processes in high frequency condensed-spark generators 22 p3139 A72-42169
- Holograms of spark discharges excited by nanosecond electric pulses 22 p3181 A72-43112
- ELECTRIC STIMULI**
- Visual cortex neuron responses to light flashes under hypothalamic and reticular electric stimulation in rats 02 p0158 A72-11758
- Neurosecretory cell functional activity of supraoptic and paraventricular hypothalamic nuclei in rats after electrical stimulation of midbrain reticular formation 02 p0158 A72-11759
- Vestibular nuclei bulbar complex evoked potentials under visceral and somatic nerves electric stimulation in anesthetized cats 02 p0164 A72-12512
- Hippocampus electric activity and cardiac rhythms variations responses to various intensity electric stimulation of central gray matter 02 p0165 A72-12881
- Blink reflexes in man during sleep and wakefulness, discussing electromyographically recorded orbicularis oculi mono- and polysynaptic responses to electrical stimuli 04 p0474 A72-15250
- Analgesic electrical stimulation in rat brainstem with other sensory modes unaffected 04 p0475 A72-15361
- Cerebral neurons population electric stimulation effect on deep sleep duration in Parkinsonism patients 04 p0476 A72-15585
- Thermal stability variations in blood serum protein after electrical stimulation of rabbit hypothalamic structures 07 p0920 A72-19649

- Cat and rabbit middle ear muscles contraction by electric stimulation of motor nerves, noting sound transmission reduction 08 p1115 A72-21136
- Cat middle ear muscles motor units twitch tension and contraction time in response to motor neuron threshold stimulation 08 p1116 A72-21137
- Functional organization of monkey cortical efferent zones in distal forelimb muscle control from intracortical microstimulation studies, showing stimulation thresholds distribution 09 p1267 A72-23582
- Vasomotor efferent effects on rabbit lung posterior lobe blood content in response to electrical stimulation of vagus nerve peripheral ends 09 p1268 A72-23693
- Lenticular conditioning-shock stimulation effect on cat visual cortex response to light stimuli, noting lateral gyrus photically evoked potential amplitude increase 11 p1578 A72-25801
- Electrode system for ventricular defibrillation, noting current density role and rounded edge effectiveness 11 p1588 A72-26628
- Cat and rat cardiac and cardiovascular reflexes response to electric pulse stimulation of sensorimotor cerebral cortex 12 p1761 A72-27647
- Cat auditory cortex neurons response to auditory and medial geniculate body electrical stimulation 12 p1761 A72-27651
- Neuronal spike activity changes in rabbit visual and sensorimotor neocortex and hippocampus during EEG activation 13 p1902 A72-28643
- Contractile responses of guinea pig, rat and human isolated ventricular myocardium to increased stimulation frequency 13 p1907 A72-30044
- Electric stimulation of rabbit brain limbic formations /claustrum, amygdala, hippocampus/, showing effect on emotional response motor and vegetative components 14 p2076 A72-30668
- Cat cerebellum cortex evoked response impulses interaction during stimulation of hypothalamus and peripheral nerves 14 p2076 A72-30669
- Cerebral cortex electric shock stimulation effects on phrenic nerve discharges in bivatogomized and curarized cats 14 p2077 A72-30842
- Cat bulbar respiratory neuron discharge modification by single electric shock stimulation of cerebral cortex 14 p2077 A72-30843
- Succinic dehydrogenase activity in rabbit eye ciliary epithelium during electric stimulation of hypothalamus, using histochemical techniques 14 p2078 A72-31099
- Long term weightlessness-induced physiological response normalization by muscle bioelectrostimulation, muscular tissue energy load increase and mineral metabolism stabilization 16 p2354 A72-33543
- Response-dependent electric shock punishment schedule preference during response sequence in food-deprived pigeons 16 p2357 A72-33773
- Neuroinhibition in the regulation of emesis 18 p2650 A72-36449
- Vicarious influence effect on eliciting pain in individuals subjected to previously reported nonpainful electric shocks 18 p2654 A72-36916
- Electrical stimulation of vestibular nuclei - Effects on light-evoked activity of lateral geniculate nucleus neurones 19 p2758 A72-38220
- Proteinase activity in different regions of the brain during development and inhibition of a conditioned passive-avoidance reflex 20 p2890 A72-38927
- Device for eliminating the artifact of electrical stimulation when recording evoked pulse activity of neurons 20 p2893 A72-38938
- Role of pyramidal and extrapyramidal components of cortically-induced efferent stimuli in the mechanism of cortical motor activity coordination 21 p2999 A72-40591
- Effect of electrical excitation of various auditory analyzer levels on a conditioned motor reflex 21 p3001 A72-40805
- Analysis of the activity evoked in the cerebellar cortex by stimulation of the visual pathways 21 p3003 A72-41460
- Unresponsiveness of pial precapillary vessels to catecholamines and sympathetic nerve stimulation 22 p3140 A72-41934
- Modulating effect of limbic brain formations on the blood system 22 p3142 A72-42282

- Reactions of auditory cortex neurons to geniculocortical fiber stimulation 22 p3145 A72-42723
- Effect of a polarizing current on the activity of neurons of the respiratory center 22 p3145 A72-42725
- Biological system transfer-function extraction using swept-frequency and correlation techniques 22 p3151 A72-42773
- The effect of electrical stimulation of the olfactory bulbs on the behaviour of cats and on the electrical activity of the neo- and archepaleocortex 22 p3147 A72-42960
- Lung volume changes of people in antithoracic position in hospital beds for control, exercising and muscle electric-stimulated groups 23 p3256 A72-43918
- Metabolic changes in healthy humans caused by prolonged bed rest in horizontal position, noting prevention by physical exercises and electric muscle stimulation 23 p3260 A72-43921
- Changes in the impulse activity of cortical neurons during selective reinforcement of a chosen range of their interspike intervals 23 p3257 A72-44087
- Neuronal and focal reactions of the parietal associative cortex to various peripheral stimuli 23 p3257 A72-44089
- Responses of anterior suprasylvian gyrus neurons to peripheral stimuli of different modalities 23 p3257 A72-44090
- Post-synaptic potentials of motor neurons of the facial nerve nucleus evoked by afferent and corticofugal pulse stimulation 23 p3257 A72-44091
- Elaboration of steady changes in the firing rate of cortical neuron populations 24 p3370 A72-44587
- Eye movements evoked by collicular stimulation in the alert monkey 24 p3371 A72-44906
- ELECTRIC STRAIN GAGES**
- U STRAIN GAGES**
- ELECTRIC SWITCHES**
- NT CRYOTRONS**
- NT THERMOSTATS**
- P-I-N diodes power handling characteristics in high power solid state TR switches 01 p0042 A72-10708
- Single and double channel laser triggered 1-3 MV switches design in high pressure gas, noting low jitter and built-in voltage isolation 04 p0532 A72-15532
- Six channel integrated MOS switch, discussing MOS transistor operation and circuits structure 09 p1288 A72-23663
- Four-terminal Si controlled switches, discussing negative resistance and linear amplification I-V characteristics and applications in oscillators and modulators 20 p2907 A72-39274
- Book - Electromechanical system components 20 p2890 A72-39811
- Switches for high-frequency channels 21 p3026 A72-40317
- ELECTRIC TERMINALS**
- Laminate materials, sockets and connectors for cost-effective high temperature accelerated life testing of IC 03 p0336 A72-14283
- Algebraic scheme describing electric element and subnetwork interconnection into networks by wiring operators having conversation capability with computer 06 p0778 A72-17475
- DESMAG computer program extension with graphic terminal to functional network conception and implantation 09 p1283 A72-23469
- ELECTRIC WELDING**
- NT ARC WELDING**
- NT ELECTRON BEAM WELDING**
- NT GAS TUNGSTEN ARC WELDING**
- NT PLASMA ARC WELDING**
- Beryllium joining by resistance welding, electron beam welding, dip brazing and braze welding 06 p0820 A72-17701
- Spot and seam welding of Cr ferritic stainless steel thin sheets, discussing electric current loading in relation to sheet thickness and contact pressure 07 p0995 A72-19575
- Ti structures controlled path resistance welding, discussing welded joints metallographic and mechanical properties 07 p0996 A72-19996
- Mass and energy balance for electrode wire fusion in pulsed current MIG /metal inert gas/ welding, discussing pulse duration and amplitude requirements and shielding gas composition effect 09 p1321 A72-23644
- FSRO findings on optimal resistance welding of solar cell interconnections for silver coated metals and pure silver 12 p1814 A72-28030

Flexible solar cell array module design technique, discussing electric welding procedure and equipment parameters effects on breaking strength and reliability 12 p1758 A72-28036

Automatic electrostatic contour welding of IC microcircuit metallic casings, using contact and electrode voltage feedback signals 13 p1963 A72-28921

Gas shielded strip electrode welding and cladding, discussing electric arc behavior, weld bead penetration depth, drop transfer speed, weld microstructure, etc 15 p2243 A72-31324

Joining plastic foils with the aid of high-frequency welding 20 p2930 A72-39942

The versatility of resistance welding machines for joining boron/aluminum composites. 21 p3060 A72-40847

ELECTRIC WIRE
NT EXPLODING WIRES
 Equivalent circuits and characteristics of multiwire and small active transistorized antennas including unipoles, loops, Franklin arrays and mast antennas 02 p0191 A72-11685

Au-Al wire bond, discussing intermetallic phase formation under elevated temperature treatments and reliability design limitations 03 p0364 A72-14284

Time domain analysis of wire antennas including straight, vee and zigzag dipoles 04 p0502 A72-15448

Strength analysis of hyperboloidal electric wire joint designs, expressing stress as function of contact loads 05 p0616 A72-17059

Radar cross section computation and contours map for thin straight wire, noting resonant peak and interference null variations with frequency and aspect ratio 06 p0771 A72-17351

Frequency-independent multimode equiaxial/conical spiral antenna with thick wires, calculating current distribution and radiation pattern by numerical program 07 p0939 A72-19187

German monograph on Frenkel defect structures in thin gold wire at high electron irradiation dose, using electrical resistance measurements 09 p1354 A72-22325

Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot 09 p1339 A72-23270

Avionics systems electrical interface connection design information document creation and dissemination, using EMPRENT computer program 10 p1453 A72-24864

Temperature control and measurement in electric wire annealing for standard Pt/Pt-10 Rh thermocouples 13 p1960 A72-29766

Current breaks due to capacitor discharges in W and Mo wires, noting duration proportional to wire mass 13 p2007 A72-29980

Thin wire parallel to interface between two homogeneous half spaces, deriving transmission current wave propagation constant from boundary value problem solution 15 p2200 A72-32108

Multifilamentary superconducting Nb-Sn composite wires in ductile metal matrix, determining transition temperature and critical current density 15 p2294 A72-32534

Sizing new generation aircraft wire and circuit breakers utilizing computer techniques. 17 p2498 A72-35568

On the relationship between classical and matrix design methods for arrays of wire antennas. 21 p3027 A72-40373

Constrained optimization of the gain of an array of thin wire antennas. 21 p3027 A72-40374

Electromagnetic-wave propagation along a horizontal wire above ground. 21 p3015 A72-40633

Propagation constants of electromagnetic waves along an infinitely long conducting wire in a general magnetoplasma. 21 p3092 A72-41266

ELECTRIC WIRING
U ELECTRIC WIRE
U WIRING
ELECTRICAL BREAKDOWN
U ELECTRICAL FAULTS
ELECTRICAL CONDUCTIVITY
U ELECTRICAL RESISTIVITY
ELECTRICAL CONDUCTIVITY METERS
 Electrical conductivity of shock wave produced Xe plasma measured by probe, noting dependence on Mach number 15 p2284 A72-31583

A new circuit for the contactless thickness measurement with the aid of pulse-excited I.C. measuring circuits 20 p2927 A72-39696

ELECTRICAL ENERGY
U ELECTRIC POWER
ELECTRICAL ENGINEERING
 Electronics and electrical engineering - IEEE Conference, Houston, April 1971 03 p0335 A72-14176

Mechanical and electrical techniques unification, discussing systems and balances 15 p2211 A72-31873

Scanning the spectrum; Proceedings of the Tenth Annual Region 3 Convention, University of Tennessee, Knoxville, Tenn., April 10-12, 1972 18 p2665 A72-36301

ELECTRICAL FAULTS
NT SHORT CIRCUITS
 Ultrasonic excitation induced vibration measurement for detecting incipient electrical breakdown in transducers, using laser-Michelson interferometer 01 p0081 A72-11018

High peak power LSA epitaxial GaAs diode relaxation oscillator breakdown under neutron irradiation 01 p0044 A72-11309

Irredundant multiple output combinational logic network fault detection and diagnosis theorems derivation from structural models in labeled direct graph form 02 p0184 A72-11478

Alkali halide crystals optical dc dielectric strength determination, using carbon dioxide laser induced breakdown threshold data [AD-737913] 03 p0368 A72-13607

Sequential faults examination on three-phase distribution transformer, suggesting protection scheme modifications 03 p0313 A72-14186

Avalanche injected current relationship to emitter-base junction breakdown damage in planar n-p-n gated transistors 03 p0336 A72-14279

Microcircuit failures due to electrical overstress, covering current density, thermally induced burn-out, junction shorts and second breakdown with nonuniform heat flow 03 p0336 A72-14290

Microwave breakdown prediction models for antenna system in ionized reentry environment 04 p0486 A72-14531

Avalanche breakdown voltage of Gaussian Si planar p-n junctions for design and impurity diffusion evaluation 04 p0561 A72-15126

Hysteresis loops during breakdown in reverse bias segment of p-PbS point contact diodes I-V curves 05 p0638 A72-17177

Voltage breakdown of microwave antennas, discussing ionization rates in hot air and breakdown suppression by electron flow 06 p0783 A72-17739

Trident aircraft air-system interrogator airborne first line test apparatus for electrical components malfunction diagnosis 06 p0796 A72-18154

Neutron irradiation induced material degradation and circuit failure in high power GaAs Gunn diode oscillator operating in LSA relaxation mode 06 p0788 A72-18472

Switching contacts performance principles, noting inductive energy role in electrical breakdown voltage determination 06 p0791 A72-18579

Electrical breakdown in reverse biased semiconductor p-n junctions involving Zener effect and avalanche mechanisms 07 p1048 A72-19821

Transistor damage by electrostatic discharges, noting charge stored by humans and protection techniques 08 p1140 A72-21064

Secondary breakdown effects on hf power transistor amplifier electrical characteristics, describing operation limits 09 p1288 A72-23364

N fail-safe logics for circuit fault restoration, comparing with failure probability of majority voting scheme and quadded logic 09 p1283 A72-23420

IMPATT diode junction temperature measurement with accuracy from breakdown voltage by pulse techniques 10 p1449 A72-24304

Dielectrics breakdown under ultrashort neodymium laser pulses at fundamental and second harmonic frequencies 11 p1647 A72-25719

Onboard localization of aircraft electrical equipment failures, using list checkout, automatic indication and dynamic programming method 11 p1578 A72-26895

P-n junction diodes fabricated by ion implantation doping, calculating I-V characteristics for comparison with measured breakdown voltages 12 p1789 A72-27312

Boron doped n-type Si planar diode and n-p-n epitaxial planar Si transistor junctions investigating

hydrostatic pressure effects on static characteristics and breakdown voltage 12 p1789 A72-27314

Fault detecting sequences construction based on input-output sequences observation in sequential circuits with shift registers as memory elements 12 p1794 A72-27496

Microwave breakdown calculation on symmetrically excited conical reentry vehicle based on variational technique, comparing with experimental data 13 p1916 A72-28536

Electrode boundary layer electrical breakdown mechanism with allowance for steep temperature gradients at surface, considering Joule heating or electrostatic field effect as causes 13 p2013 A72-29361

Solar cells insulating dielectrics breakdown tests in dilute Ar plasma at positive bias voltages to 20 kV 14 p2140 A72-30926

Electrical breakdown of hexane investigated by high voltage nanosecond pulses, noting electron avalanche and streamer processes in time lag 15 p2278 A72-32244

High intensity sound effects on electronic equipment and components in aircraft noise environment, noting whisker diode and printed circuit board damage 15 p2209 A72-32621

Electric measurement and defect localization in monolithic IC elements by incorporating test structures 15 p2212 A72-32759

Physical phenomena limitations on MOS IC miniaturization, considering gate oxide breakdown, drain source punch through, doping fluctuations, power dissipation and metal migration 16 p2370 A72-34102

Breakdown in argon and nitrogen under the influence of a 0.35-micron picosecond laser pulse. 17 p2564 A72-35508

Atmospheric organic vapor effects on electric contact erosion, deriving showering arc duration, gap breakdown, arc number and energy 18 p2665 A72-36118

Charge injection into the gate dielectric of MOS transistors during junction avalanche. 18 p2668 A72-37104

Application of statistical methods to the study of the rigidity of a dielectric 18 p2720 A72-37116

Miniaturized IC semiconductor device fabrication and failure under electrical load, using scanning electron microscope 21 p3035 A72-41492

ELECTRICAL IMPEDANCE
NT CONTACT RESISTANCE
NT ELECTRICAL RESISTANCE
NT LC CIRCUITS
NT REACTANCE
NT SKIN RESISTANCE
 Microwave Gunn oscillator frequency modulation in quenched domain mode, calculating signal admittance as function of bias voltage and amplitude 01 p0035 A72-10224

Gunn diode microwave oscillator postcoupling to waveguide, deriving theory based on equivalent circuit for load impedance assessment 01 p0037 A72-10640

Self admittance and radiation conductance characteristics of stripline feed slots in waveguide walls 01 p0029 A72-10683

Punch-through transit time negative resistance semiconductor device utilizing injection from Schottky barrier, deriving small signal theory for microwave impedance 01 p0042 A72-10787

First order admittance of coaxially driven infinite monopole antenna, obtaining Green function expansion 01 p0043 A72-11247

Metal-semiconductor-metal Schottky barrier microwave diode impedance and shot noise calculation 02 p0191 A72-11894

Ion transit time effects on plasma sheath RF admittance, using equivalent circuits for representation in low and high frequency ranges 03 p0394 A72-13150

Rectangular slot antennas radiation through inhomogeneous plasma layer with dielectric window, obtaining input admittances by fields modal expansion 04 p0554 A72-14412

Gunn diode large signal admittance dependence on bias and frequency, discussing computer simulation and broadband oscillator and amplifier design 04 p0497 A72-14712

Space charge layer /ion sheath/ effects on impedance of lf transmitting electric dipole in ionospheric plasma 04 p0490 A72-15399

Reflection from aperture of long F-plane sectoral horn antenna, determining electrical impedance by asymptotic diffraction theory 04 p0501 A72-15424

Admittance calculation for vertical monopole antenna driven by coaxial line, approximating current distribution by polynomial with complex coefficients

04 p0501 A72-15429

Linear antenna input admittance calculation, computing excitation integral by field expansion in Legendre functions

04 p0501 A72-15431

Two center-fed feed-point displaced dipole antennas, calculating mutual impedance for various combinations of displacements and heights

04 p0501 A72-15433

Full wave solution for vertically polarized wave propagation over rough variable impedance surface by Fourier transform

04 p0492 A72-15437

Active loop-dipole antennas with shielded reduction properties at resonance, deriving input impedance power gain and radiation patterns

04 p0502 A72-15519

Orthogonal 2-port network impedance transforming properties and applications to harmonic oscillators and filters

04 p0502 A72-15521

Impedance determination for symmetrical spherical probes and spacecraft housing with flat screen separation, using partial capacitance formula

05 p0662 A72-16268

TEM modes characteristics in shielded stripline with four internal strips, tabulating characteristic impedances at different line parameters

05 p0636 A72-16339

Wideband tunnel diode amplifier design, discussing circulator off-band impedance characteristics improvement through voltage standing wave ratio suppression network

05 p0638 A72-16594

Ray-optical calculation of modes scattered by obstacle in two dimensional waveguide or duct with weakly inhomogeneous medium and nonvanishing surface impedance walls

05 p0630 A72-16622

Electromagnetic plane wave diffraction by infinite slit in screen with surface impedance, deriving field and transmission coefficient by asymptotic numerical solution

06 p0771 A72-17352

Conducting ground half space effects on dipole antenna input impedance computed by current distribution Fourier transform

06 p0781 A72-17353

Monopole antenna with lumped mutual coupling between driven and folded sections, noting staggered resonant frequencies and bandwidth broadening from input impedance analysis

06 p0782 A72-17355

Longitudinal and transverse nonresonant slots on waveguide, calculating susceptance, conductance, reflectance and transmittance as function of wavenumber

07 p0952 A72-18843

Corrugated surface wave antenna design with low sidelobe level radiation pattern, finding relief modulated impedance parameters

07 p0955 A72-19514

Rf excitation of external terminated longitudinal conductor axially parallel to rocket skin by transverse electromagnetic field, deriving currents in cable-connecting impedances

07 p0956 A72-19555

Cylindrical antenna radiation resistance and total radiated power in weakly ionized plasma, considering electron collisional effects

07 p0944 A72-19592

Ground plane absorption coefficient effects on admittance of slot antenna radiating into warm lossy plasma

07 p0957 A72-19797

IMPATT diode thermal resistance measurement from heat diffusion effect on small signal impedance of p-n junction

07 p0958 A72-20684

Schwartz method application to stripline fields and impedance calculations for different cross sections and internal conductor dimensions

08 p1133 A72-21370

Linear IC amplifier analysis by admittance parameters of equivalent two terminal pair network as function of frequency, temperature and supply voltage

09 p1285 A72-22342

Excess, shot and channel thermal noises performance-limiting effects on junction FETs in high input impedance applications, considering minimization method

09 p1287 A72-23111

Input impedance of plane antenna immersed in plasma within magnetic field and propagating sheath waves

10 p1520 A72-24132

Quadrupole probe theory for hot collisionless isotropic plasma, noting impedance dependence on electron temperature at resonance and optimum dimension relationship to Debye length

10 p1523 A72-24798

Bipolar insulated gate FET IC buffer driver, discussing input and output interface capacitance and impedance characteristics and application to transistor-transistor logic

11 p1603 A72-25269

Broadband cylindrical monopole antenna with adjustable quasi-distributed capacitive loading, comparing theoretical and experimental admittances

11 p1604 A72-25744

Lumped-distributed active network function sensitivity formulas in terms of immittance parameters

11 p1610 A72-25747

Semiconductor film impedance vs resistivity in free space electric field

11 p1700 A72-25778

Linear antenna in anisotropic plasma with ion depletion, calculating reactance change due to surrounding dielectric layer thickness

11 p1593 A72-25949

Finite and infinite number element phased array antennas, deriving active impedance, element pattern and power gain

11 p1593 A72-26096

Transistorized amplifier input elements design for biopotentials recording, providing minimum noise at high input impedance

11 p1585 A72-26468

Conversion losses as function of signal power and circuit impedance in narrow band triode frequency converter under large amplitude operating conditions

11 p1598 A72-26733

Spherical probe impedance characteristics in isotropic plasma predicted by hydrodynamic theory compared to experimental results

11 p1699 A72-26768

Nonlinear sheath admittance, currents and charges associated with high peak voltage drive on VLF-ELF dipole antenna moving in ionosphere

11 p1599 A72-26769

Static and impedance characteristics and equivalent circuit of p-n-p-n inductance diode, using ambipolar diffusion length

12 p1790 A72-27499

Electrical components of cardiac and skeletal muscle impedance, calculating rectangular stimulating current mean value

13 p1908 A72-28461

Input impedances and current distributions of cylindrical monopole antennas of various lengths in hot lossy plasma as function of plasma density

13 p2009 A72-28538

N region capture centers effects on small signal impedance in p-n-n diode structure during passage of strong dc current

13 p1933 A72-29977

Wall-impedance waveguide propagation constant determination from Rayleigh-Schrodinger power expansion of perturbed eigenvalues

15 p2194 A72-31549

Open circuit voltage transfer function synthesis to realize arbitrary real rational function in complex variable, using generalized positive impedance converter

15 p2211 A72-31847

Waveguide model for calculating microstrip discontinuities and T-junctions wave impedances, using orthogonal series procedure

15 p2201 A72-32470

Contaminated Langmuir probes LF admittance measurements in mercury vapor plasma, considering dielectric relaxation in insulating layers

15 p2241 A72-32516

Constrained-impedance eigenfunctions, using projection method for field expansion in diffraction problems

15 p2202 A72-32661

Thin circular loop antenna input admittance and current distribution calculation comparison

15 p2209 A72-32673

Voltage and current generalized immittance converter realization, using with current conveyor for simulation

16 p2367 A72-32856

Longitudinal and transverse electromagnetic wave penetration into semifinite collisional plasma with fractionally accommodating boundary, obtaining reflection coefficient and surface impedance

16 p2435 A72-33449

Determining electrical ground constants from the mutual impedance of small coplanar loops

17 p2514 A72-34371

Theoretical analyses on Apollo lunar surface electrical properties experiment transmitter antenna

17 p2515 A72-34423

Application of the impedance treatment to diffraction problems for a rectangular waveguide

17 p2529 A72-34848

New measurement method of Gunn-diode impedance

17 p2529 A72-35000

Two sided error estimates for electrodynamic impedance, admittance and scattering matrices in diffraction theory

18 p2657 A72-36104

German monograph - Measurement of 'oscillation impedances' and optimization of frequency noise effects of microwave-semiconductor oscillators tunable over a wide frequency range

19 p2772 A72-37477

Electron bunching and output gap interaction in broad-band klystrons

19 p2772 A72-37566

Experimentally observed admittance properties of the semiconductor-insulator-semiconductor /SiS/ diode

19 p2772 A72-37568

Electric dipole radiation at VLF in a uniform warm magneto-plasma

19 p2840 A72-37833

Inductive post influence in perfectly conducting waveguides, calculating shunt impedance with allowance for spatial harmonics effect

19 p2766 A72-38413

A large-signal theory for current-driven frequency multipliers

19 p2775 A72-38609

Fourier series analysis of multielement circular loop antenna with arbitrary circumference for current distribution and self and mutual admittances

19 p2775 A72-38615

Electromagnetic compatibility problem of RF oscillators and switching operations in power network as interference source, discussing transmission line shielding and coupling impedance

20 p2901 A72-38988

Small-signal admittance of the insulator-n type-gallium-arsenide interface region

20 p2909 A72-39775

The determination of active array impedance with multielement waveguide simulators

21 p3026 A72-40357

Microwave filter of interdigital or comb construction, calculating attenuation coefficient relationship to impedance of slabline with cylindrical inner conductor

21 p3032 A72-40628

An expression for the distribution of current in asymmetrically driven antenna immersed in a dissipating medium

21 p3022 A72-41322

Admittance measurements of a 36-m dipole antenna in the topside ionosphere

22 p3153 A72-42007

Voltage generalized-impedance converter synthesis with RC circuits for obtaining current transfer function proportional to square of s with application to filter design

22 p3140 A72-42303

Frequency dependent deep level trap admittance and field effect transcapacitance of p-n junctions calculated by truncated space charge approximation

22 p3161 A72-43086

Junction circulator shunt conductance and susceptance-slope parameter calculation by constituent resonator input admittance formation, describing quarter wave mode operation

23 p3270 A72-43604

Impedance of a unipolar semiconductor diode under conditions of space-charge limited current with allowance for recombination

23 p3270 A72-43630

Frequency-variable semiconductor-oscillator in the microwave region

23 p3272 A72-43948

Theory of magnetically tunable band-pass filters

23 p3273 A72-44360

ELECTRICAL INSULATION

MNOS transistors charge storage properties at high electric field strengths and current densities near gate insulator breakdown, determining reliable operating limits

03 p0336 A72-14277

Arrhenius model and graphical methods for temperature accelerated life tests in electrical insulation systems

04 p0500 A72-15364

Nonconducting samples preparation for scanning electron microscope, using carbon as coating material

07 p0992 A72-20578

Thin wall airframe wire insulation relative thermal life and temperature rating evaluation procedure using Arrhenius plot

09 p1339 A72-23270

Differential thermal analysis for electrical insulation thermal degradation and thermogram shape, combining equations for required life line

09 p1339 A72-23271

Gamma ray radiation effects on epoxy resin electric properties, studying electric insulation and arc resistances and dielectric breakdown strength

10 p1502 A72-25149

Electrical measurement of moisture effects on adhesive bond strength, insulation resistance and hydrophilicity of cast epoxy and organosilicon adhesives

12 p1833 A72-27449

Solar cells insulating dielectrics breakdown tests in dilute Ar plasma at positive bias voltages to 20 kV

14 p2140 A72-30926

Metal-insulator-metal tunnel junctions, investigating effect of nonparabolic band structure energy-momentum relation on I-V characteristics
16 p2370 A72-34101

Implications of ceramic-insulator irradiation results for thermionic reactor design.
17 p2496 A72-34592

Dielectric breakdown in electrical insulators used in thermionic converters.
17 p2496 A72-34593

Effect of neutron spectra on the swelling of ceramic insulators and implications for thermionic reactor design.
18 p2703 A72-36146

Use of a loaded silicon elastomer for insulation of channel multipliers of onboard electronics
18 p2670 A72-37140

Mercury Hall ion engine principles and design, discussing plasma ion acceleration, mercury evaporation and ionization and acceleration channel electrical and thermal insulation
20 p2963 A72-39937

ELECTRICAL LEADS

U ELECTRIC CONDUCTORS

ELECTRICAL MEASUREMENT

NT POLAROGRAPHY

Electrical and electronic measurement and test instrument - Conference, Ottawa, June 1971
02 p0200 A72-12476

Czech FET properties in low temperature region, measuring static characteristics, electrical parameters and noise levels at 4.2-296 K
02 p0195 A72-12670

Portable electronic wattmeter for nonsinusoidal waveform low power factor circuit measurement, discussing design, calibration and applications [IEEE PAPER 8,2]
03 p0332 A72-13757

Ac and dc electric power transient test equipment satisfying MIL-STD-704A requirements
03 p0312 A72-14038

Electrical measurements on capillary-fed colloid thruster with Zener diode-like I-V characteristic and constant propellant mass flow rate
04 p0565 A72-15204

Semiconductor slab electroconductivity measurement based on circularly polarized microwave propagation in circular waveguide
04 p0502 A72-15533

Computer controlled automatic system for measuring electroconductivity and Hall effect in semiconductors, noting data acquisition instrumentation
04 p0496 A72-15534

Dispersion characteristics of laminated cylindrical dielectric waveguide in millimeter band, noting application to permittivity measurement
05 p0627 A72-16341

Turbulent heating arc plasma voltage and current digital measurement recording, computing time dependent resistivity
07 p1045 A72-20400

Ionospheric and magnetospheric electric field measurements by rocket, satellite or balloon-borne electrostatic probes or by plasma drift methods
10 p1473 A72-24529

Semiconductor measurement technology at extremely low currents, discussing dc characteristics and ac amplification
10 p1452 A72-24815

High tension exciter output voltage measurement based on cathode ray oscilloscope and high voltage probe, stressing calibration procedure [SAE AIR 1092]
11 p1604 A72-26028

Russian papers on automatic monitoring and electrical measurement methods covering optical systems, control devices, diagnostic test optimization, bionic applications, etc
11 p1611 A72-26435

Monotypic signal rejection by connecting line insertion to sensor and central electrical measuring device input galvanic decoupling
11 p1611 A72-26440

Mechanical and electrical methods of measuring vibration rates, displacements, accelerations and time derivatives, examining magnetolectric and piezoelectric sensors characteristics
11 p1635 A72-26462

Oscillating membrane pressure gage for direct electrical measurements of fast and large pressure variations, noting insensitivity to interference
11 p1636 A72-26700

Atmospheric electricity measurements at Waldorf observatory during 7 March 1970 solar eclipse
12 p1799 A72-27139

Low noise power level measurement at microwave frequencies, noting Nyquist equation applicability and cooled-to-uncooled element connections effects in receivers
12 p1779 A72-27175

Niobium diffusion into copper as function of time and temperature, obtaining rates by electrical resistance measurements
12 p1828 A72-27448

Electrical measurement of moisture effects on adhesive bond strength, insulation resistance and hydrophilicity of cast epoxy and organosilicon adhesives
12 p1833 A72-27449

Measurement circuit for temperature dependence of thermal emf and electrical conductivity in thermoelectric materials
12 p1807 A72-27452

Thermostat for electrical measurements of high resistance materials in air up to 1200 C
13 p1957 A72-29274

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field
13 p2007 A72-30013

Low power TTL IC in plastic and hermetic packages tested for reliability via critical dc parameters measurement in initial and post-stress states
14 p2091 A72-31168

RF receiver predetection SNR measurement from average postdetection signal-plus-noise and noise-only voltages, tabulating computed results
15 p2196 A72-31782

Excess white noise source in photomultiplier as function of temperature from voltage, intensity and ion pulse measurements, noting effect on photon counting statistics
15 p2207 A72-32238

Beta-conductive method improvement for semiconductor electric field intensity measurement by pulsed electron beam
15 p2238 A72-32240

Transient high voltage and electric field measurement with electro-optical fringe pattern method employing pulsed laser Kerr system polarimeter
15 p2240 A72-32434

Langmuir probe susceptibility- and conductance-voltage measurements via in-phase and quadrature component plots as function of applied dc potential
15 p2241 A72-32515

Electric measurement and defect localization in monolithic IC elements by incorporating test structures
15 p2212 A72-32759

Equipment for nondestructive measurements of the resistivity of semiconductor epitaxial layers by the three-point probe technique
17 p2557 A72-35755

Dynamic characteristics of electrical measuring instruments and transducers, discussing static calibration curve, dynamic tests and parameters determination
17 p2557 A72-35757

A new instrument for the measurement of low dynamic torque.
18 p2692 A72-36820

Study of reliability of Al-Au thermocompressions by measurement of resistance
18 p2668 A72-37105

Hall and resistance measurements on single crystal HgTe-InTe alloy systems for high pressure phases in terms of conduction state, band structure and impurity effects
19 p2844 A72-37464

A measuring method for MOST transconductance and its variation.
19 p2773 A72-37901

An elegant method for measuring MOST drain-source conductance in the saturated current region.
19 p2773 A72-37902

Crack depth measurement with surface waves.
19 p2809 A72-38569

The use of an electrical induction method for determining the physical condition of a ground steel surface.
19 p2805 A72-38762

Measurements of the field-effect and effective mobilities in MOS transistors.
20 p2907 A72-39272

A new circuit for the contactless thickness measurement with the aid of pulse-excited I.C measuring circuits
20 p2927 A72-39696

Potential measurement and stabilization of an isolated target using electron beams.
21 p3087 A72-40700

Thermally-stimulated current from the gold acceptor trapping level in silicon.
21 p3097 A72-40996

Measurement of substrate impurity profile of MIS field-effect transistors.
21 p3035 A72-41488

Facility for measuring and recording the electrical resistance of metallic samples during mechanical tests
21 p3043 A72-41718

Application of digital techniques to the measurement of PCM signal power.
22 p3155 A72-42705

Critical superconductivity currents measurement in niobium based U shaped and coiled wires within steady magnetic field
22 p3190 A72-42735

Injun 5 satellite measurements of magnetospheric convection electric fields via double probe technique, discussing substantiation with OGO 6 results
22 p3174 A72-42901

Measurement of surface leakage currents in a semiconductor photoelectric converter
22 p3140 A72-43188

Standardization of resistance and capacitance elements nonlinearity measurement procedure, proposing constant amplitude supply voltage
24 p3386 A72-45392

Permittivity measurement of nonmagnetic materials samples in waveguide systems with an unknown movable reflecting load
24 p3404 A72-45504

Carbon dioxide laser electrical plasma properties from probe and techniques, discussing effects of electron energy distributions, dissociation and N, He and Xe additions
01 p0079 A72-10514

CW and pulsed InP transferred electron microwave oscillators, discussing fabrication techniques and electrical properties
01 p0036 A72-10633

Electrical properties of subsonic argon plasma stream seeded with uranium hexafluoride, using electrostatic probe
01 p0111 A72-11334

Preparation and electrical properties of thin cadmium antimonide and arsenide layers, comparing to single crystal films
02 p0268 A72-12281

Center fed full wave dipole antenna with feed points displaced transverse to dipole axis, considering radiation patterns, electrical properties and power gain
02 p0177 A72-12325

Dual-gate MOS transistor structure, operational principles and electrical characteristics, noting suitable properties for use in low noise microwave amplifier
03 p0330 A72-12969

Continuous solid medium electroelastic equations of state, obtaining solution by variational principles application
03 p0390 A72-13916

MIS semiconductors radiation-hardening mechanisms and radiation effects on electrical properties and degradation
03 p0405 A72-14281

Electric and photoelectric properties of CdTe films, describing solar cells preparation
04 p0465 A72-14593

Bulk type variable resistors with properties controlled by composition during fabrication, evaluating inorganic binders with optimal properties
05 p0701 A72-15754

Heating effect on potassium bichromate-saturated anodic aluminum oxide electrical characteristics, discussing surface conductivity and capacity and solution pH
05 p0667 A72-17052

Holographic Ice Survey System for down looking radar probing and measurement of sea ice and glaciers, discussing ice electrical properties and system design
06 p0814 A72-17590

Radar instrument for measuring snow density, water content, layer depth and inhomogeneity based on snow cover electrical properties effects on echo characteristics
06 p0805 A72-17591

Electrical contacts conduction principles, considering circuit voltage, current, variable resistance and resistive, mechanical, heating and adhesive properties
06 p0791 A72-18578

Carbon dioxide laser pumping at atmospheric pressure by electron beam controlled electrical discharge, discussing measured electrical and laser properties

07 p0999 A72-18875

Thermal and electrical characteristics of plasmatrons with interelectrode partition and distributed air supply, determining efficiency dependence on current

07 p1040 A72-18996

Low and high pass, bandpass and bandstop active filters, tabulating cut-off frequencies, thermal stability, impedance, power dissipation and voltage specifications

07 p0955 A72-19248

Nonequilibrium chemistry effects on electrical properties of solid propellant rocket motors turbulent afterburning exhaust plumes, describing free electron sources

07 p0935 A72-19359

Thermodynamic and electrical properties of tantalum nitride powders and thin films for semiconductor IC technology

07 p1049 A72-19935

Electronic characteristics of real CDS surfaces in room atmosphere and ultrahigh vacuum

07 p1050 A72-20458

Optical and electrical characteristics of gas discharge plasma in pulsed radiation sources as function of power dissipation

07 p1047 A72-20611

Hf and shf power transistor gain, efficiency and electrical characteristics for wideband linear amplifiers

08 p1139 A72-21051

Operational and equivalent circuit characteristics of low noise hf and shf transistors in wideband amplifiers

08 p1139 A72-21052

Lunar and terrestrial soil thermal and electrical properties measurement in vacuum and He atmospheres

08 p1232 A72-21150

Fast neutron radiation damage to glass ceramics and amorphous semiconductors electrical properties

09 p1336 A72-22405

Recrystallization effects on thin ZnTe film structure, electrical and optical properties

09 p1367 A72-22421

Anisotropic electrical properties and void structure of amorphous Ge, discussing low- and high-field resistivity measurement in planar and transverse directions

09 p1371 A72-22873

Reactivity evaporated titanium nitride resistors for thin film microcircuits, discussing nitrogen gas pressure and substrate temperature effects on electrical properties during evaporation

09 p1286 A72-22902

Secondary breakdown effects on hf power transistor amplifier electrical characteristics, describing operation limits

09 p1288 A72-23364

Temperature dependence of Ge solubility in CdSb single crystals from microstructural observations and measurements of microhardness and electrical properties

09 p1372 A72-23480

Ferrites electrical conductivity variations with time caused by cations distribution modification after cooling

10 p1525 A72-24121

Chemisorbed oxygen effect on electrical properties of monocrystalline cadmium sulfide thin plates with high resistivity

10 p1525 A72-24211

Tempering effects on weakly doped n-InSb electrical properties at 77 K, discussing diffusion and activation energies in reversible/irreversible defect change processes

10 p1526 A72-24242

Hybrid neuristor transmission lines with planar p-n-p-n semiconductor structures, discussing development, testing and electrical parameters

10 p1448 A72-24281

Zinc oxide as refractory material, discussing optical, elastic and electro- and photoconductivity properties

10 p1501 A72-24732

Earth electrical parameters measurement by radio wave methods involving electromagnetic propagation along or reflection from surface, considering penetration depth, earth stratification and surface inhomogeneities

10 p1474 A72-24737

Book on semiconductors covering electrical properties, energy band structure, impurities, epitaxial growth, silicon dioxide, surface properties, p-n junctions and measurement techniques

10 p1528 A72-25123

Gamma ray radiation effects on epoxy resin electric properties, studying electric insulation and arc resistances and dielectric breakdown strength

10 p1502 A72-25149

Heterojunction p-GaAs-n-ZnSe diodes electrical and photovoltaic properties, showing space charge limited current effects

11 p1606 A72-26624

Electron bombardment deposited polymer thin films electrical properties as function of formation current, noting increase in crosslinking and dangling bonds

12 p1788 A72-27277

Proton and electron radiation effects on silicon solar cells electric and photovoltaic properties, determining damage coefficients via minority carriers diffusion length measurement

12 p1759 A72-28045

Monoenergetic electrons and low energy protons radiation damage effect on Si solar cell electrical and optical properties

12 p1759 A72-28046

Irradiation produced defects and electrical properties of n and p-type Si, discussing radiation damage due to neutron and ion implantation

12 p1857 A72-28058

Annealing behavior of electrical properties and photoluminescence spectra in electron irradiated n-type GaAs semiconductors

12 p1859 A72-28068

Carrier concentration Hall mobility and photoconductivity in n- and p-type CdTe after neutron and electron bombardment

12 p1859 A72-28072

Double doping effect on electrical properties of Te and Hg doped and Te and In doped CdSb single crystals

13 p2020 A72-28565

Instrument to measure thermodynamic, electrical and optical properties of gases and liquids, describing thermostat for 83-923 K range

13 p1956 A72-28633

Electrical characterization of GaAs by Hall and magnetoresistance measurements, analyzing temperature dependence of carrier concentration

13 p2024 A72-30034

Lunar surface profile, subsurface features and electrical properties measurement for Apollo 17 coherent radar and optical recording system

14 p2085 A72-30512

Chalcogenide semiconductor compounds of b-subgroup transition elements, discussing binary system diagrams, stoichiometric composition and electrical properties

15 p2290 A72-31193

Pulsed IMPATT diode oscillators RF oscillations growth rate and frequency shift behavior during build-up period, comparing equivalent circuit derived electrical properties with measurements

15 p2208 A72-32472

Mars integrated radio temperature relation to blanket electrical properties for 1971 opposition, assuming Martian soil properties independence from depth and temperature

15 p2315 A72-32730

Manufacturing process for glass fiber chopped strand mats, discussing physical and electrical properties and applications to filament winding

16 p2414 A72-33303

Flame retardant glass reinforced thermoplastic polyester Celanex processing and performance, considering flammability, and electrical/mechanical properties

16 p2415 A72-33420

Piezosemiconductor crystals acoustoelectric surface domain waveguide effect for classical and transverse surface waves

16 p2441 A72-33596

Application of the moving-slit X-ray atomochromatization method in structural studies of planar diodes and an attempt to correlate electrical properties with lattice defects.

17 p2595 A72-34749

Determination of the excess air coefficient with the aid of electrical properties in the case of laminar flames of gaseous fuels

17 p2636 A72-34931

Investigation of the dependence of the electrical characteristics of a 'Fotovolta'-type high-voltage matrix photoconverter on the radiation intensity and temperature

17 p2498 A72-35511

French monograph - Experimental characterization and analysis of the effect of ionizing radiation on the electrical properties of MOS transistors

17 p2531 A72-35650

Studies of physical-mechanical properties of monocrystalline molybdenum and tungsten and electrical characteristics of TIC/thermionic converter

18 p2698 A72-36154

Laboratory studies on seismic and electrical properties of the moon.

18 p2724 A72-36282

Interdependence of the commutation and memorization effects and the thermal behavior in a series of chalcogenide glasses

18 p2718 A72-36344

Changes of electrical and structural properties of Au thin films obtained by sputtering during the annealing process.

18 p2720 A72-36955

Electrical changes in the surface region of chalcogenide glasses.

19 p2822 A72-37454

Thickness dependence of the electrical transport properties of germanium films.

19 p2844 A72-37685

Electrical and thermoelectrical effects in GaAs-InAs solid solutions

19 p2844 A72-37752

Yagi-Uda helical antenna array with moderate gain and compact mechanical design, determining electrical characteristics

19 p2773 A72-37941

Influence of heat treatment on the properties of Cr-SiO cermet thin films

19 p2844 A72-37948

Electronic control systems for industrial applications, discussing electrical and mechanical properties, circuit reliability and mechanical design features

19 p2782 A72-38314

Electrical properties and fabrication details of integral diode matrices with controllable avalanche breakdown produced from zone melted silicon under temperature gradient

19 p2774 A72-38416

Electrical properties of thick-film barium titanate dielectrics produced by flame spraying.

19 p2846 A72-38616

RF shielding and electrical properties of boron and carbon fiber reinforced composites.

20 p2944 A72-38987

Lunar and terrestrial soil thermal and electrical properties measurement in vacuum and He atmospheres

20 p2968 A72-39255

Anisotropic electrical properties of amorphous germanium.

20 p2960 A72-39457

Installation for the simultaneous measurement of the functional properties of sliding contacts

20 p2928 A72-39936

Apparatus for measurement and automatic graphical recording of variations of electrical characteristics of a metal-insulator-semiconducting structure

21 p3051 A72-40209

Output power saturation with increasing discharge current in powerful argon CW lasers

21 p3062 A72-40404

Space applications of Fabry-Perot modulator as alternative to mechanical devices, presenting optical and electrical performance data for different temperatures

21 p3055 A72-40824

Pressure dependence of electrical characteristics of semiconductor sensors using deformation potential for mechanical stress detection and measurement

21 p3056 A72-41109

The effect of membrane parameters on the properties of the nerve impulse.

22 p3140 A72-41936

Antifurcation and electrical properties of WSe₂-NbSe₂ quasi-binary alloys

23 p3299 A72-43292

Changes in the physical properties of metals subjected to elastoplastic deformation

23 p3303 A72-44199

Preswitching electrical properties, 'forming,' and switching in amorphous chalcogenide alloy threshold and memory devices.

24 p3385 A72-45270

Electrical characteristics of a CO laser discharge plasma

24 p3411 A72-45500

ELECTRICAL RESISTANCE

NT CONTACT RESISTANCE

NT LC CIRCUITS

NT SKIN RESISTANCE

Positive and negative deviations of linear electrical resistance of d-transition metals at high temperatures as function of Debye temperature and Fermi level

02 p0242 A72-12006

Gradient-recombination current instability in high resistance compensated semiconductors

04 p0561 A72-15084

N-port resistive network synthesis involving use of vectors, cones, bilinear inequalities and matrices

05 p0639 A72-15801

Electrical resistance, Hall coefficient and magnetic susceptibility of transition metal nitrides at low and room temperatures

06 p0827 A72-17386

Organism blood volume and losses determination by measuring human body electrical resistance, noting unsatisfactory results

06 p0768 A72-17994

Square wave source gated detector bridge for precise resistance measurement, discussing design and performance, and application in Pt resistance thermometry

06 p0785 A72-18244

Vacancy effects on residual electrical resistance of binary ordering fcc lattice alloys as function of composition and annealing temperature

06 p0832 A72-18422

Electrical contacts conduction principles, considering circuit voltage, current, variable resistance and resistive, mechanical, heating and adhesive properties 06 p0791 A72-18578

Input resistance derivation for finite horizontal loops with uniform current distribution located above lossy half-space ground 06 p0777 A72-18737

Structural changes, mechanical properties, electrical resistance and lattice constant during aging of Al alloys containing Mg, Li and Mn 06 p0834 A72-18743

Cu electrical resistance and heat content oscillographic measurement, using high voltage pulse method 07 p0981 A72-18804

Minimum charging resistance in relaxation generators for spark machining as function of supply voltage, using thyristor and voltage source circuit model 07 p0956 A72-19594

Structure, hardness, density, and electrical resistance of binary alloys V-Ti, V-Cr, V-Al and V-Sn 07 p1013 A72-19741

Temperature dependence of electrical resistance and thermal conductivity in duralumin quenched at 77 K 07 p1022 A72-20663

Electrical resistance and thermal conductivity dependence on temperatures in duralumin quenched at 77 K 07 p1022 A72-20666

Deposition of Ni-B coatings with specified electrical resistance onto fiberglass cloth reinforced plastics 09 p1318 A72-22528

Piezoresistance magnitude and temperature dependence changes of electron irradiated n-type silicon due to oxygen vacancy complex /A center/ 09 p1372 A72-23239

Niobium carbide resistors properties, investigating temperature dependence of electrical resistance and thermal stability 09 p1331 A72-23483

Schottky barrier crystal microwave video diodes design and fabrication to maximize burnout resistance and dynamic range for given detection sensitivity 10 p1450 A72-24553

Test assembly design for microstructural studies of metal and alloy fatigue in vacuum during heating, describing electrical resistance measurement and stroboscopic illumination 11 p1612 A72-25492

Be foil electrical resistance change during and after pulsed laser irradiation and annealing 12 p1853 A72-27067

Local heating effect of electrical resistance gages measuring strain across thickness of plane photoelastic Araldite models 12 p1807 A72-27316

Pulse plasma injector accelerating circuit resistance dependence on time and current amplitude calculated from current oscillograms 13 p2010 A72-28733

Distributed base resistance effect on stripline geometry transistor input characteristic, using equivalent circuit with pseudo-junction having high saturation current 13 p1930 A72-29059

Thermostat for electrical measurements of high resistance materials in air up to 1200 C 13 p1957 A72-29274

Nonlinear harmonic analysis of reflex klystrons with high electron conduction, using average method in second approximation 13 p1931 A72-29290

CW Gunn oscillator cavity loading and bias voltage effects on external negative differential conductance 13 p1933 A72-29825

Ta thermal conductivity and electric resistance at various temperatures 13 p1981 A72-29897

Impurities effect on platinum resistance thermometers temperature reading accuracy, presenting empirical formula for approximate error estimate as function of operational conditions 13 p1960 A72-29906

Phase transitions effect on dc electrical resistance of barium titanate investigated for yttrium-doped polycrystals and for reduced single crystals 15 p2294 A72-32483

Sensor design and principles for atomic oxygen concentration measurement in dissociated gases, using Ag thin film electrical resistance change during oxidation 16 p2390 A72-33162

Conduction electron phonon scattering effect on electrical resistance of metallic contacts during pressure welding 16 p2370 A72-33952

Electrogasdynamics generator nonlinear internal resistance determination as function of flow parameters and model geometry via boundary conditions formulation 18 p2643 A72-35998

Physical-mechanical properties of beryllium oxide and investigation of its electrical resistance under irradiation in a reactor 18 p2703 A72-36147

Si MOSFET elementary channel resistances before saturation onset from one dimensional theory, investigating current noise 18 p2668 A72-37037

Effect of temperature on the base resistance and the noise factor of a bipolar junction transistor. 19 p2773 A72-37848

A measuring method for MOST transconductance and its variation. 19 p2773 A72-37901

An elegant method for measuring MOST drain-source conductance in the saturated current region. 19 p2773 A72-37902

Effect of plasma resistance on electron temperature measurement by means of an electrostatic probe. 19 p2804 A72-38593

A precise method for measuring low-frequency small-signal conductance parameters of an MOS transistor. 20 p2907 A72-39273

High speed logic circuit interconnecting transmission line matching by nonlinear resistance, recommending use of Schottky diodes 20 p2909 A72-39737

Conductance associated with interface states in MOS tunnel structures. 21 p3032 A72-40701

Electric model of bridging losses and optimal insulation layer thickness for small size resistance strain gages 21 p3056 A72-41367

Facility for measuring and recording the electrical resistance of metallic samples during mechanical tests 21 p3043 A72-41718

Current noise and conductance-temperature characteristics of thin discontinuous Pt films on glass substrate interpreted by quantum mechanical electron tunneling model 22 p3214 A72-42453

Generation threshold of the anomalous resistance for longitudinal currents in the magnetosphere 23 p3284 A72-43379

Junction circulator shunt conductance and susceptance-slope parameter calculation by constituent resonator input admittance formation, describing quarter wave mode operation 23 p3270 A72-43604

Electric resistance and enthalpy of molybdenum and tungsten 23 p3272 A72-44167

Physical limits of semiconductor devices miniaturization for electronic computers, considering thermal energy dissipation, electrical resistance and high current density induced electromigration effects 23 p3273 A72-44332

Optical properties of thin cesium films over the wavelength range from 0.3 to 0.9 microns and their electrical resistance 24 p3426 A72-44801

Standardization of resistance and capacitance elements nonlinearity measurement procedure, proposing constant amplitude supply voltage 24 p3386 A72-45392

Be foil electrical resistance change during and after pulsed laser irradiation and annealing 24 p3432 A72-45720

ELECTRICAL RESISTIVITY

NT IONOSPHERIC CONDUCTIVITY

NT MAGNETORESISTIVITY

NT PHOTOCONDUCTIVITY

NT PLASMA CONDUCTIVITY

NT SUPERCONDUCTIVITY

Thermal conductivity, electrical resistivity, Lorentz ratio and thermopower of Ti, Al and Ni alloys for aerospace structures over 4-300 K range 01 p0113 A72-10173

Tungsten heat capacity, electrical resistivity and thermal radiation measurement over 2000-3600 K range by pulse heating technique 01 p0082 A72-10174

Lunar soil dielectric constant and loss-tangent and electrical resistivity measurement by Q meter method, noting resemblance to dense terrestrial rock powders 02 p0281 A72-12287

Chapman uniform electrical conductivity core model for geomagnetic disturbance daily variations due to solar wind, noting error in analysis 02 p0222 A72-12794

Stainless steel electrodes resistive and capacitive properties in contact with saline solutions of various concentrations and over extensive frequency range and current densities 03 p0318 A72-12953

Niobium-oxygen-nitrogen system solid solution, noting gas composition effects on hardness and electrical resistivity 03 p0369 A72-12958

Lunar electrical conductivity model, determining vacuum transient response to time varying spatially uniform magnetic field 03 p0434 A72-13508

Thermocouple efficiency with respect to Thomson effect and electric resistivity temperature dependence 03 p0360 A72-13651

Short range order and nucleation of long range order in Ni-rich Ni-Nb alloys, observing electrical resistivity changes dependence on solute concentration 03 p0379 A72-14338

Mathematical model for two-stream instability induced anomalous resistivity and heating in plasma with equal initial electron and ion temperatures in static electric field 04 p0554 A72-14402

Small pressure difference measurement in gas flow, using transducer based on liquid electrical conductivity measurement 04 p0523 A72-15483

Aging effect on duraluminum electrical resistivity alteration at low temperature plastic deformation 05 p0679 A72-17181

Higher harmonics in lunar transfer functions for surface magnetic field tangential components, discussing lunar electrical conductivity models 06 p0875 A72-17448

Si MOSFET substrate resistivity effect on surface state noise spectra 06 p0783 A72-17609

Thermal conductivity, electrical resistivity, emissivity and specific heat of polycrystalline vanadium under electron bombardment heating at 1200 to 1800 K 06 p0828 A72-17613

Bulk semiconductor material complex microwave conductivity and dielectric constant measurements by cavity perturbation techniques 06 p0786 A72-18371

Exponential conduction increase of semiconductors in strong magnetic fields, determining three dimensional random network resistance with percolation theory 07 p1047 A72-18918

Third harmonic generation in Ge induced by conduction nonlinearity during bulk heating of charge carriers by microwave fields 07 p1047 A72-19023

Alloying additives effects on Ti and Zr resistivity, thermal expansion, crystal lattice parameters and polymorphous transformations temperatures 07 p1017 A72-19990

Quantum mechanical electron motion problem in binary alloy crystal lattice, discussing Bloch approximation, energy spectra, and third element admixture conductivity effects 07 p1049 A72-20150

Turbulent heating arc plasma voltage and current digital measurement recording, computing time dependent resistivity 07 p1045 A72-20400

Bulk conductors dc field distribution applications to electrical resistivity measurements and nondestructive testing 07 p0998 A72-20461

Resistivity, thermoelectric power and magnetoresistance of carbon fibers derived from heat treated polyacrylonitrile 07 p1024 A72-20550

Integral relations derivation for stationary and nonstationary potential motions in cases of zero and infinite conductivity, applying to wave expansion in cylindrical waveguide 08 p1212 A72-20966

Matsevityi nonlinear resistances method for contact heat exchange boundary value problems of fourth kind 08 p1252 A72-21319

Carbon fibers elastic modulus inference from electrical conductivity inverse correlation with sound propagation rates 08 p1191 A72-21498

Temperature effects on electrical conductivity and transport mechanisms in sapphire from measurements under protection against surface and gas phase conduction 09 p1335 A72-22400

Solid state sinusoidal signal generator based on current density oscillation effect in high resistivity p-type InSb with transmutation doping 09 p1288 A72-23191

Lunar soil dielectric constant and loss-tangent and electrical resistivity measurement by Q meter method, noting resemblance to dense terrestrial rock powders 10 p1532 A72-23756

Electrical resistivity restoration in Van Arke type Zr deformed by lamination at 78 K attributed to point defects elimination 10 p1495 A72-24085

Temperature dependence of emf coefficient Hall constant and conductivity in solid and liquid phases of InSe semiconductor during melting 10 p1526 A72-24267

MHD generator duct external loop electric current maximization by working material resistivity tensor optimal distribution 10 p1521 A72-24434

Magnetic properties, electrical resistivity and hardness of vacuum melted Ni-Fe-Ta alloys 11 p1655 A72-25512

Transition from metallic to activation conductivity in doped semiconductors, noting activation energy dependence on compensation degree 11 p1700 A72-25720

Semiconductor film impedance vs resistivity in free space electric field

11 p1700 A72-25778

Carbon solubility in Nb at 1500-2150 C, determining saturation concentrations from electrical resistivity vs reaction time curves

11 p1662 A72-26740

Technological parameters effects on resistance values dispersion of thick film resistors, reviewing stability test performance

12 p1788 A72-27274

CdS thin film conductivity reactions to grain boundary and stacking faults, correlating grain size to mobility

12 p1856 A72-28012

Te single crystal electrical resistivity and Hall coefficient effects of electron irradiation, suggesting point defects and dislocations interaction

12 p1859 A72-28073

Burgers binary and Shkarofsky multiple collision theory numerical application to electrical conductivity in partially ionized solar magnetoplasma

13 p2018 A72-29714

Ti-Mo-Ni system polythermal section microstructure, hardness, resistivity and thermal expansion characteristics

14 p2112 A72-30153

Apollo 11 and 12 lunar surface rocks electrical conductivity at 300-1200 K in vacuum, Ar, He and He-hydrogen atmospheres, noting large hysteresis above 500 C

14 p2155 A72-30518

Nickel-trinickel alumide-trinickel niobiumide system polythermal cross sections from X ray and microstructural analysis, noting electrical resistivity increase with Al content

14 p2123 A72-30988

Yttrium alloys isoperiodic lines, solidus isotherms, equal hardness lines and resistivity presented diagrammatically

15 p2289 A72-31185

MOS transistor injection level dependent theory, calculating drain region saturation conductance by iterative procedure

15 p2205 A72-31318

High resistance n-type InP crystals electrical conductivity and photoconductivity characteristics at 80 K, discussing photosensitivity spectral distribution and temperature dependence

15 p2290 A72-31371

Dynamic spin disorder effect on electrical and thermal conductivity, noting low resonant frequency in metal atom magnon spectrum

15 p2290 A72-31388

Electrical conductivity, reluctance and Hall effect of n-type semiconductors determined at extremely low temperatures

15 p2291 A72-31389

High microwave voltage effects on p-n junction conductance under inverse dc bias, noting role of hole generation and accumulation by impact ionization

15 p2206 A72-31643

Electrical conductivity in mesosphere and upper stratosphere from rocket sounding by blunt probe technique, suggesting electron density profiles dependence on dissociative recombination variations

15 p2228 A72-31972

CdTe single crystals photoplastic characteristics, detailing illumination effect on yield stress and resistivity

15 p2294 A72-32501

Langmuir probe susceptibility- and conductance-voltage measurements via in-phase and quadrature component plots as function of applied dc potential

15 p2241 A72-32515

Thin film superconductors conductivity evaluation above transition temperature through renormalization of impurity-scattering vertex by pair fluctuation effect inclusion

15 p2295 A72-32540

Lattice dynamical model for Cs vibration frequency distribution, specific heat and electrical and thermal resistivity calculations

16 p2441 A72-33584

Equipment for nondestructive measurements of the resistivity of semiconductor epitaxial layers by the three-point probe technique

17 p2557 A72-35755

The effect of dislocation tangles on superconducting properties.

18 p2719 A72-36746

The Rayleigh-Taylor problem with a vertical magnetic field, including the effects of Hall current and resistivity.

19 p2839 A72-37339

Emissivity and electrical resistivity of tungsten-yttrium oxide cermet as function of composition at 1200-3200 K

19 p2819 A72-38286

Influence of impurities on the high-temperature electrical conductivity of CdTe crystals

19 p2847 A72-38677

Relation between diffusion and defect formation rates in silicon detectors exposed to gamma radiation

20 p2959 A72-38956

Exponential conduction increase of semiconductors in strong magnetic fields, determining three dimensional random network resistance with percolation theory

20 p2960 A72-39384

Measurement of melting point and electrical resistivity /above 3600 K/ of tungsten by a pulse heating method.

20 p2941 A72-39722

Calculation of electronic Green functions using nonorthogonal basis functions - Application to crystals.

20 p2961 A72-39810

Determination of conduction anisotropies in semiconductors.

21 p3097 A72-40697

Metal fiber composites electrical resistivity as function of fiber volume proportion, evaluating vacuum cast Cu/W

21 p3073 A72-41373

Matthiessen rule on binary alloy electrical resistivity temperature derivative, discussing data deviations in substitutional alloys after quenching, radiation damage and plastic deformation

22 p3189 A72-42298

Physical and electrical properties of thin-film barium titanate prepared by RF sputtering on silicon substrates.

22 p3215 A72-42999

Bi-Sb alloys for magneto-thermoelectric and thermomagnetic cooling.

22 p3215 A72-43089

Electrical resistivity changes in nichrome films sintering of various thickness with different heat treatment conditions, noting heat stability and thermal shock tests

23 p3292 A72-43280

Effect of substrate temperature on electrical properties of amorphous germanium films.

23 p3324 A72-44069

Magnetohydrodynamic flow between parallel rotating disks. I - Influence of finite wall-conductance.

23 p3322 A72-44400

The lunar conductivity profile and the nonuniqueness of electromagnetic data inversion.

24 p3436 A72-44693

Thin ice crust, chondritic composition and ionosphere considerations for Io electrical conductivity and decametric radio emission modulation in unipolar inductor model

24 p3437 A72-44704

Relationship between the electrical resistivity and solute concentration in the solid solution of tantalum-hydrogen system.

24 p3412 A72-44718

An apparatus for measuring the Hall effect of high-resistivity materials in alternating electric and magnetic fields

24 p3405 A72-45698

ELECTRICALLY SUSPENDED GYROSCOPES

NT TELLURIC CURRENTS

Book on electricity and electronics for aerospace vehicles covering theoretical foundations, measuring instruments, batteries, generators, motors, radio receivers and transmitters, navigation equipment, autopilots, etc

15 p2182 A72-31511

ELECTRIFICATION

Static electrification - Conference, London, May 1971

02 p0260 A72-12551

Solids static electrification models based on solid state physics, considering contact, deformation and cleavage charging processes

02 p0269 A72-12552

Frictional electrification from supersonic particle impact, determining particle charge and concentration, body intercepting area and velocity variations with speed

02 p0261 A72-12555

ELECTRO-OPTICAL EFFECT

Second order electro-optic effect in diamond, discussing birefringence due to dispersion and residual strains

[AD-736674]

02 p0260 A72-12545

Electric field effects on electromagnetic wave packet motion in anisotropic nonlinear medium with electro-optical effect

03 p0322 A72-13737

Book on lasers and applications covering theories of light, polarization, coherence, resonators, mirrors, modes, electro-optical effect, communication, holography, etc

06 p0827 A72-18524

Electro-optical multiple transit laser beam deflection system using KDP crystals and quadrupolar electrode arrangements

07 p1000 A72-19011

Rhodamine 6G dye laser tuning by variable birefringence filter using lead lanthanum zirconate titanate electrooptic ceramics for wavelength selection

07 p1002 A72-19203

In-line eight stage digital light deflector with prisms and polarization switch, using Pockels effect with transverse field

07 p1003 A72-19222

Electro-optical Q switching of solid state laser sources without linear energy polarization in optical resonator

09 p1326 A72-23422

Current-optical effects of anisotropic absorption of polarized and unpolarized light in rarefied cosmic media

10 p1525 A72-23763

Intracavity modulation of ruby laser with frequency near neighboring axial oscillations frequency difference, describing Q switch based on transverse electro-optical effect in KDP crystal

10 p1490 A72-24047

Electro-optical Fabry-Perot modulator with KDP and ADP crystals as optical resonators, determining modulation and frequency response characteristics

10 p1492 A72-24583

Photoelastic analysis of piezooptical and rheological properties of anisotropic composite glass plastics

10 p1557 A72-24626

Nonlinear interaction between circular coherent light and modulating electromagnetic waves in presence of quadratic electrooptical effect, noting frequency shift

10 p1493 A72-24912

Holographic memory devices for bulk information recording, discussing use of image converter for brightness amplification and lithium niobate electro-optical deflector for beam switching

12 p1807 A72-27588

Discrete ten stage system for laser beam deflection based on electro-optical effect in lithium niobate crystals

12 p1808 A72-27595

Longitudinal electro-optical effect in oblique cut lithium niobate crystal with minimum half wave voltage between incident beam and optical axis angle

12 p1855 A72-27603

Carbon dioxide-helium-nitrogen mixture laser, comparing GaAs, CdSe, CdS and CdTe electro-optical crystals suitability for radiation modulation at 20.6 microns

12 p1822 A72-27610

Ruby laser electro-optical modulator with low modulation voltage, discussing layout, operating principle and laser energy characteristics

12 p1822 A72-27611

Electro-optical processing of phased array signal reception, using electron beam addressing system with potassium deuterium phosphate target crystal

12 p1785 A72-27954

Liquid crystals synthesis, physical chemistry and material parameters effects on mesomorphic and electro-optical behavior

15 p2240 A72-32363

Electro-optical torque sensor based on slit aperture produced diffraction patterns

[SESA PAPER 1925-II]

17 p2553 A72-34813

Active Q switching technique for producing high laser power in a single longitudinal mode.

19 p2811 A72-37845

Superposition method for potential distribution in plane tetraode field with unipotential and bipotential grids, noting electro-optical effect in cylindrical lenses

19 p2776 A72-38667

Pulse generator for modulation of a low-voltage Pockels cell.

20 p2933 A72-39525

Electro-, magneto- and acousto-optical methods for laser Q-switching, discussing physical and operational principles

22 p3186 A72-42942

Book - Introduction to optical electronics.

23 p3295 A72-43650

Stimulated entropy /temperature/ scattering and its influence on stimulated Mandelstam-Brillouin scattering

23 p3297 A72-44478

Periodic control of the emission from a ruby laser achieved by a Q switch utilizing the transverse electro-optical effect.

24 p3412 A72-45618

ELECTRO-OPTICAL PHOTOGRAPHY

Operator interactive computer controlled electro-optical system for photographic image enhancement prior to target or pattern identification

01 p0070 A72-10869

Generalized quantum yield for sensitivity of photoelectric devices, considering multistage image converter and photomultiplier

02 p0223 A72-11411

- Ultrahigh speed electro-optical cameras with exposure times of several picoseconds, using bipplanar image converter, electron multiplier and Kerr cell
06 p0812 A72-17415
- Satellite-borne multispectral photographic line-scan system with direct optoelectrical signal conversion for photogrammetric and cartographic applications
06 p0815 A72-17757
- Spectroscope model design using ruby laser highly monochromatic light pulses, electro-optical scanning and high speed photography to study atmospheric gases absorption spectra
09 p1322 A72-22205
- Electron-optical system with electro- and magneto-static lenses, ensuring large image reduction for producing printed microcircuits
10 p1482 A72-24589
- Zeiss /Jena/ stereoplanigraph design and operation to obtain purely optical projection for object reconstruction, discussing human operator replacement by objective electro-optical system
16 p2394 A72-33870
- Computerized photographic imagery analysis system with interactive operator controls for processing option selection in image enhancement prior to pattern identification
17 p2520 A72-34407
- Electro-optical TV technique with laser source illumination to provide engineering metrology and NDT procedure resembling real time holographic interferometry
20 p2930 A72-39038
- Optical system parameters for electrophotographic print quality, discussing aberration effect on image optical density
21 p3059 A72-41818
- Image intensifier systems and their applications to astronomy.
22 p3181 A72-42989
- Future giant-aperture orbital space telescope design based on active optics and electro-optical techniques, discussing laser interferometry and precise servomechanisms roles
24 p3405 A72-45544
- ELECTRO-OPTICS**
Double 45 degree z cut KD P electro-optic Q switch simulation with programmable desk top computer, deriving extinction ratio dependence plot graphs
02 p0224 A72-11746
- Soviet book on electro-optical devices for space vehicles orientation and navigation covering vertical plotters and sun, planet and star trackers
02 p0256 A72-12125
- Scattering media visibility improvement analysis, using theoretical evaluations and experimental electro-optical measurement techniques in fog and underwater
02 p0253 A72-12644
- Ultrahigh speed holographic camera for three-dimensional photographs and interferograms, using ruby laser output
04 p0522 A72-15139
- Wideband electro-optic FM of laser light for optical communication, discussing modulator design, construction and testing
[AIAA PAPER 72-177]
05 p0631 A72-16961
- Quantum optics analysis of light propagation and photon flux fluctuations in medium with random dielectric constant inhomogeneities
07 p0938 A72-18912
- Performance characteristics of electro-optical material cadmium telluride for intracavity modulator of carbon dioxide lasers
07 p1003 A72-19223
- Electro-optic materials and fixing techniques for holographic recording and storage performance improvements
[CLEA PAPER 18,2]
07 p0950 A72-19400
- Strain biased transparent ferroelectric electro-optic ceramics for coherent transducers /page composers/ for holographic memories and optical data processing
[CLEA PAPER 18,6]
07 p0950 A72-19401
- Carbon dioxide lasers and GaAs electro-optical crystals 110-MHz bandwidth with coupling modulation technique
07 p1005 A72-19413
- Energy level and V-I characteristics of solid state heterojunction devices, discussing diodes, transistors, thyristors and optoelectronic structures
08 p1139 A72-21054
- Optoelectronic elements for information system applications, discussing photomultipliers, photodiodes, photoresistors, avalanche and photoparametric diodes response and bandwidth characteristics
08 p1169 A72-21844
- Regulating amplifier with optoelectronic coupler for sonar sea bed layer measurements
09 p1284 A72-22239
- Geodetic optical distance measuring instruments with electro-optical polarization modulators, comparing characteristics of four possible configurations
09 p1314 A72-23336
- Thin organosilicon films for integrated optical circuits and devices, discussing transparency and loss characteristics and refractive index control
09 p1314 A72-23339
- Holographic technique development review, discussing current and future applications and unsolved problems
09 p1315 A72-23375
- Muller matrix derivation for microwave light modulation studies in quasi-homogeneous magneto-optical and electro-optical media, taking into account finite light speed
10 p1493 A72-24914
- Programmed electro-optical systems of multichannel solar spectrometer for ground observations of X ray and EUV emission regions
11 p1630 A72-25680
- Russian book on satellite-borne electro-optical IR radiometers design for celestial bodies spectral radiance and energy distribution measurement
11 p1634 A72-26376
- Optimal parameters of electro-optical signal processor for phased array antennas, noting optical subsystem correspondence to optoacoustical spectrum analyzer
13 p1926 A72-28374
- Electro-optical regenerative assembly with p-n-p structure, emphasizing positive feedback and I-V characteristics
13 p1933 A72-29976
- Design data of guided wave structures for electro-optical modulation, evaluating propagation wave numbers, attenuation rate, phase modulation rate and dispersion characteristic
15 p2246 A72-31667
- Electro-optical media for initial light radiation frequency shift maximum, analyzing circular light/modulating wave interactions
15 p2197 A72-31880
- Electro-optical systems design - Conference, New York, September 1971
15 p2247 A72-32026
- Unmodulated solar radiation effect on electro-optical photoreceptors voltage sensitivity, noting photomultipliers and silicon photodiodes
15 p2237 A72-32121
- Transient high voltage and electric field measurement with electro-optical fringe pattern method employing pulsed laser Kerr system polarimeter
15 p2240 A72-32434
- Q switched laser operation with electro-optic switch mechanism, measuring initial photon number per mode of Nd-glass and Nd-YAG lasers
16 p2399 A72-33014
- Electro-optical Q switch synchronized by laser radiation for nanosecond light pulse shaping with energy dependent triggering
16 p2400 A72-33082
- Book - Semiconductor diode lasers
17 p2563 A72-35300
- A horizon sensor with a bolometer and electro-optical modulators
17 p2556 A72-35385
- Digital simulation for sampled electro-optical imaging system performance prediction and optimization
17 p2557 A72-35552
- Flight tests correlation with mathematical models to predict electro-optical viewing systems capability for military missions
17 p2557 A72-35553
- Single-crystal, electro-optic shutter for Q-switching lasers emitting unpolarized radiation.
18 p2698 A72-36698
- Electronic and optical phenomena in semiconductor.
19 p2844 A72-37445
- Multiplexing behavior of electrooptically Q-switched lasers.
19 p2813 A72-38692
- Electro-optics '72: Proceedings of the Second International Conference, Brighton, England, February 29-March 2, 1972.
20 p2921 A72-39026
- Electro-optic KTN /potassium tantalate niobate/ crystals for modulators, deflectors, phase shifters and polarization rotator devices
20 p2922 A72-39047
- An application of atmospheric light scattering for contrast analysis in electro-optical detection systems.
20 p2923 A72-39056
- FOSS - A dynamic six degree-of-freedom environmental simulator for evaluation of electro-optical guidance systems.
20 p2911 A72-39135
- Quantum optics analysis of light propagation and photon flux fluctuations in medium with random dielectric constant inhomogeneities
20 p2932 A72-39378
- Radio astronomical event visible image generation by electro-optical processing comparing SNR performance and electronic complexity with conventional technique
20 p2904 A72-39787
- Interferometric method for measuring electro-optic coefficients in crystals.
21 p3095 A72-40138
- Improvements in electro-optic circular-scan deflectors.
21 p3050 A72-40146
- Electro-optical noncontracting torque sensor, using slit diffraction pattern technique
21 p3051 A72-40231
- Optoelectronic speed control for replacing mechanical gear drives for precisely variable shaft speed ratios
21 p2997 A72-40259
- Optical communication with distant spacecraft, discussing electro-optical transducers, light sources and receivers
21 p3014 A72-40321
- Microelectronics developments and limitations, considering bipolar IC, metal-dielectric-semiconductor structures and optoelectronic communication links
21 p3033 A72-40940
- IR night vision instruments range calculation, taking into account atmospheric optics and electro-optical image converter characteristics
21 p3059 A72-41816
- Electro-optical design and performance parameters of polluted air liquid droplet size distribution measurement by pulsed junction diode laser light external scattering
22 p3179 A72-42680
- Real time analog computation at light speed and rapid access data storage in optical data processing systems, considering coherent electro-optical instrumentation
22 p3180 A72-42713
- A fast opto-electronic transducer
22 p3180 A72-42944
- Nimbus limb radiometer, Apollo fine sun sensor, and Skylab multispectral scanner.
23 p3288 A72-43882
- Noise characteristics of a digital system of light-beam deflection
24 p3410 A72-45323
- Time dependence of laser characteristics on external HF modulation of parameters by mirror oscillation and electrooptical and acoustooptical effects, noting laser mode locking
24 p3410 A72-45416
- Use of oblique-cut lithium niobate in optical-beam control systems.
24 p3411 A72-45606
- ELECTROACOUSTIC TRANSDUCERS**
NT MICROPHONES
Equivalent circuit model for electroacoustic surface microwave transducer, discussing radiation properties determination from excitation fields distribution
01 p0041 A72-10704
- Zinc oxide longitudinal acoustic microwave transducer, measuring untuned insertion loss and electroacoustic coupling constant
01 p0042 A72-10705
- Pulse compression of radar signals by ultrasonic liquid delay line, stressing wideband damped electroacoustic transducers construction
01 p0044 A72-11321
- Power generation and low noise amplification devices development during past decade, considering avalanche diodes, transferred electron and acoustoelectric devices and microwave transistors
07 p0952 A72-18825
- Micrometeorite flux observed by rocket-borne electroacoustic transducers
15 p2308 A72-31931
- One path ultrasonic flowmeter using electroacoustic feedback.
17 p2556 A72-35427
- IAD-3 amplitude-phase impedance deftoscopes.
19 p2805 A72-38765
- ELECTROACOUSTIC WAVES**
Electroacoustic magnetic and Hall effects in semiconductors in strong electric field involving phonon production by supersonic electron drift
03 p0401 A72-13088
- Current source generated electromagnetic and electroacoustic wave propagation through homogeneous, isotropic compressible electron-ion plasma, using two fluid continuum theory
04 p0554 A72-14510
- Electromagnetic and electroacoustic near zone fields of linear antenna in plasma measured by diagnostic probe
05 p0700 A72-17232
- Electroacoustomagnetic and Hall effects in semiconductors within strong electric field involving phonon production by supersonic electron drift
13 p2022 A72-29437
- Cylindrical antenna immersed in weakly ionized magnetoplasma, calculating steady magnetic field effect on the radiative and electroacoustic radiation resistances
16 p2434 A72-32860
- Sound propagation in ionized gases and electroacoustic effect.
21 p3085 A72-40993
- Coupled fields in inhomogeneous warm plasmas with static pressure gradients. I.
22 p3210 A72-42313
- Effects of pseudosonic and electroacoustic waves on the radiation of a plasma-coated spherical antenna.
24 p3386 A72-45645

ELECTROCARDIOGRAPHY

Human patients with chest pain and normal ECG, examining diagnostic value of graded exercise test, history and lipid levels with coronary arteriography data

01 p0010 A72-10146

Clinical electrocardiography diagnostic capability, discussing phase plane cardiogram sensitivity to aberrations in QRS contours

01 p0017 A72-10148

HIS bundle electrocardiography for arrhythmia studies, discussing conducting tissue potential recording, ventricular delay and block site determination and electrophysiological effects of drugs

02 p0157 A72-11473

Canine and human ventricular myocardium microelectrophysiologic studies of postextrasystolic T wave change relation to cellular repolarization and contractile potentiation magnitude

02 p0157 A72-11474

Arrhythmias relation to coronary artery disease, discussing conduction defects, sudden death prodromata and prevention and digitalis as antiarrhythmic agent

02 p0157 A72-11476

ECG telemetry systems parameters, discussing manufacturers specifications and standardized laboratory performance test data

02 p0169 A72-12139

Human pulse wave propagation velocity measurement, using biotelemetry system of photoresistance sensors and endoscopic bulbs connected to electrocardiograph

02 p0169 A72-12519

Physical exercise effect on ECG atrial recovery wave duration and magnitude in humans with A-V blocks

02 p0166 A72-12891

Age related diminutions in ballistocardiographic and electrocardiographic amplitudes, observing relation to heart position lateralization and size reduction

03 p0314 A72-13144

Exercise ECG correlation to morphological patterns of selective cinecoronary arteriography and ventriculography, revealing significant information on occlusion and stenosis

03 p0314 A72-13178

QRS amplitude relation to frontal QRS axis and heart-electrode distance, using 12-lead ECG

03 p0320 A72-13881

Familial cardiomyopathy detection by electrocardiography noting arrhythmias, ventricular hypertrophy, abnormal Q waves and intraventricular conduction defects

04 p0466 A72-14443

Exercise ECG multichannel radio telemetry equipment, discussing sources of malfunction and unreliability and remedial procedures

05 p0621 A72-16610

Electrocardiography telemetry system for intense radiation environment, describing electrode and transmitter implantation in monkey and heart signal transmission and reception

05 p0623 A72-16678

Electrocardiographic age trends in adult healthy populations, discussing diagnostic implications and overweight, exercise and latent coronary artery disease influence

06 p0761 A72-17425

Airline pilot postexercise electrocardiograms, showing S-T segment depression correlation to subsequent coronary heart disease

06 p0768 A72-17881

On-line digital computer system for real time interpretation and report generation of electrocardiograms from remote locations over switched telephone network

07 p0928 A72-19311

Electrical cardiac activity computer simulation model including biophysically faithful conduction system and electrocardiograms for high fidelity production

07 p0929 A72-19313

Biomedical transducers for NASA space program, discussing spray-on electrodes and telemetering for ECG respiration and body temperature

07 p0931 A72-19917

Coronary artery disease and vessel involvement severity predictions from electrocardiographic and vectorcardiographic patterns of anterior wall myocardial infarction

07 p0931 A72-19994

ECG evidence of myocardial ischemia in patients without arteriographic evidence of coronary artery disease, studying myocardial oxygen supply

07 p0920 A72-19995

ECG and VCG in diagnosis of myocardial infarction and QRS changes

07 p0920 A72-20174

Bioelectric ECG and EEG signal analysis using hybrid computer techniques and parameter optimization for autocorrelation function modeling

07 p0933 A72-20333

Abnormal ECG in healthy man due to former disease, subclinical disease, congenital anomalies, hereditary disease or functional aberrations

07 p0924 A72-20574

Atypical ECG of sportsmen, considering repolarization disorders due to ischemia, lesion, excitability and conduction signs

07 p0924 A72-20575

Pulsatile blood pressure and ECG in squirrel monkeys, considering catheter electromanometer system and implanted arterial cannulas long stability

08 p1124 A72-20900

Vectorcardiographic and ECG diagnosis of left anterior hemiblock combined with complete right bundle branch block, discussing coexisting myocardial infarction influence

08 p1127 A72-21850

Cardiac cycle intervals measurement with multibeam cathode oscilloscope synchronized with multichannel polycardiographic automatic recording machine

09 p1272 A72-23192

Clinical reliability and normal variations of Frank ECG computer analysis by Smith-Hyde program for healthy and cardiac patients

09 p1272 A72-23274

Mathematical, physical and engineering aspects of electro- and magnetocardiography, noting heart field nondipolar properties and heart vector determination difficulties

09 p1273 A72-23414

ECG, physical exercise and drug use in diagnosis and aeromedical evaluation of supraventricular arrhythmias, presenting case histories of pilots with wandering cardiac pacemakers

10 p1428 A72-23741

QRS wave detectors for arrhythmia and hemodynamic data analysis, using standardized FM magnetic tape containing various artifacts for evaluation

11 p1582 A72-25499

Positive acceleration effects on human cardiovascular system during centrifuge tests, studying ECG changes in terms of cardiac rhythm, heart rate and wave parameters

11 p1584 A72-26015

Computer assisted monitoring of ECG waveforms and heart sounds frequency spectra to detect bubble laden blood during decompression sickness

11 p1587 A72-26626

Gabor-Nelson myocardium electrical activity model for mathematical construction of vectorcardiogram from ECG for comparison of various lead systems

11 p1588 A72-26629

Random sample comparison of computer program for ECG diagnoses and physicians readings

11 p1590 A72-26975

Triglyceridemia relation to age, relative weight and ischemic cardiopathy probability from ECG, anthropometry and lipid and glucid metabolism studies

12 p1759 A72-27238

Heart and circulatory system functional diagnostics, discussing ECG, blood pressure, X ray, phonocardiographic and pulmonary examinations

12 p1760 A72-27271

Clinical diagnosis of ST/T depression in resting ECG, noting coronary heart disease and left ventricular hypertrophy

12 p1772 A72-27733

Automatic ECG recording and analysis by electronic data processing equipment, discussing methods of data acquisition and transmission for routine diagnosis and prophylactic mass examinations

12 p1772 A72-27821

Dynamic electrocardiography with analog computer program to detect, count and classify atypical ventricular depolarization complexes

12 p1775 A72-28281

Stress vectorcardiography quantitative analysis of ECG response to treadmill exercise test to establish diagnosis criteria for coronary heart disease

12 p1775 A72-28282

ECG diagnostics for arrhythmia assessment in flying personnel flight fitness examination

12 p1775 A72-28294

ECG P-wave-like deflections caused by strong diaphragmatic action potentials in obese woman with fever and erysipelas

13 p1908 A72-28569

Human torso surface mathematical model to determine equivalent heart dipole and quadrupole locations for ECG measurements

13 p1908 A72-28571

Electrophysiologic data acquisition by multiple dipole type of inverse electrocardiographic procedure based on model data, noting favorable and unfavorable dipole array configuration

13 p1909 A72-28997

Electrocardiography and magnetocardiography to determine flux and vortex sources respectively of heart electrical activity impressed current density

13 p1909 A72-28998

Piloting aptitude evaluation from ECG during hypoxia, considering right intraventricular conduction and ventricular repolarization anomalies

13 p1906 A72-29857

Cardiovascular and respiratory changes in dogs exposed to acute overheating, relating ECG changes to adrenergic and hypoxia effects

14 p2074 A72-30382

Lower body decompression effects on ECG, showing heart rate increase, R and T amplitude changes and heart electric axis displacement

14 p2074 A72-30383

ECG amplifier and cardiotelemetry for exercise studies, using digital algorithm for heart rate computation and ECG signal preprocessing for R wave detection

14 p2080 A72-30707

Computerized measurement and analysis of day-to-day variations of corrected orthogonal ECG and vectorcardiogram in normal subjects, using results as assessment standards

14 p2077 A72-30967

Electric field projections in contrast to voltage as working quantity for frontal plane ECG leads

15 p2188 A72-31766

Cardiac cycle length /RR interval/ and QT interval mathematical relationship from ECG obtained during exercise and recovery periods

15 p2187 A72-32747

Serial ECG change detection and description in myocardial infarction survivors, using computer analysis to find best diagnostic discriminants from multiple criteria

16 p2357 A72-34008

Digital data processing equipment for continuous ECG analysis, noting analog to digital converter and amplitude distribution analysis

17 p2522 A72-34914

Some preliminary observations on the correlation of the high frequency /acceleration/ direct-body ballistocardiogram with the apex cardiogram, carotid pulse and their derivatives

18 p2649 A72-36036

'VI-like' and 'aVF-like' leads for continuous electrocardiographic monitoring

19 p2759 A72-37244

A system for the mass examination of electrocardiograms

19 p2760 A72-37853

Prognostic value of an electrocardiographic sign in acute myocardial infarction

19 p2756 A72-37871

Relation of the electrocardiogram to hemodynamic alterations in pulmonary embolism

19 p2759 A72-38816

Vectorcardiographic and electrocardiographic differentiation between cor pulmonale and anterior wall myocardial infarction

21 p3001 A72-40769

The Macruz index and its clinical evaluation in electrocardiography with regard to the selection and control of air crews

21 p3009 A72-41193

Potassium chloride test for electrocardiogram evaluation in flight personnel medical appraisal

21 p3012 A72-41747

Yield of ischaemic exercise electrocardiograms in relation to exercise intensity in a normal population

22 p3151 A72-42900

A rapid assay of dipolar and extradiapolar content in the human electrocardiogram

23 p3259 A72-43811

The standard 12-lead scalar electrocardiogram - An assessment of left ventricular performance

23 p3255 A72-43812

Continuous recording of His bundle electrogram during selective coronary cineangiography in man

23 p3255 A72-43813

Continuous ECG monitoring method /scattergram/ for arrhythmia pattern recognition in intensive care units

23 p3260 A72-43938

Use of implantable telemetry systems for study of cardiovascular phenomena

23 p3260 A72-43996

Analysis of intracavitary electrocardiograms through a saline bridge in the diagnosis of cardiac arrhythmias

24 p3370 A72-44559

H-V intervals in left bundle-branch block - Clinical and electrocardiographic correlations

24 p3374 A72-45690

Clinical and anatomic implications of intraventricular conduction blocks in acute myocardial infarction

24 p3374 A72-45691

ELECTROCATALYSTS

Monograph on fuel cells covering thermodynamics, electrode polarization principles, electrocatalysis, system requirements, operational principles and applications

10 p1423 A72-24700

Electrocatalysis and fuel cells - Conference, Seattle, December 1970

16 p2351 A72-33876

Electrochemical oxidation and classification of fuel cells according to electrolyte, electrode, fuel, catalyst and temperature

16 p2351 A72-33877

- Hydrocarbon oxidation and catalysis on Pt fuel cell electrodes, using electrochemical methods with isotopic exchange and gas chromatography 16 p2361 A72-33878
- Metal catalyst theory for electrocatalysis in alkaline hydrogen oxygen fuel cells, using Tafel equation 16 p2351 A72-33880
- Cubic sodium tungsten bronze electrocatalytic activity increase for oxygen reduction by traces of Pt 16 p2361 A72-33883
- Organic catalysts for oxygen reduction, discussing phthalocyanines, Pfeiffer complexes and porphyrins 16 p2361 A72-33884
- Teflon-bonded hydrophobic gas diffusion electrode performance prediction by mathematical treatment of flooded catalyst agglomerate model 16 p2352 A72-33892

ELECTROCHEMICAL CELLS

- NT ALKALINE BATTERIES
- NT ELECTRIC BATTERIES
- NT FUEL CELLS
- NT HYDROGEN OXYGEN FUEL CELLS
- NT METAL AIR BATTERIES
- NT NICKEL CADMIUM BATTERIES
- NT SILVER CADMIUM BATTERIES
- NT STORAGE BATTERIES
- NT ZINC-OXYGEN BATTERIES
- Room temperature nonaqueous organic solvent electrochemical cell, producing open-circuit potential of 4.5 V 03 p0311 A72-12924
- Electrochemical energy cells for biological telemetry equipment, noting mercury cell use in implanted heart pacemakers 07 p0914 A72-19914
- Permanent manned lunar stations electrical power systems, discussing nuclear energy, solar cells and electrochemical power cells 15 p2214 A72-31814
- Electrochemical development of high energy batteries using organic solvents, organic cathode depolarizers and fused salts 16 p2351 A72-33888
- Mass and energy balance in air cooled matrix type phosphoric acid cell, noting operational reliability and construction 16 p2351 A72-33889
- Current-voltage and specific power-energy relationships for high temperature electrochemical cells with alkali metal anodes and chalcogen or halogen cathodes 16 p2352 A72-33900

ELECTROCHEMICAL CORROSION

- Electrochemical potential microstructure and stress intensity factor effect on aqueous stress corrosion crack propagation rate in high strength Ti alloy 01 p0085 A72-10776
- Electrochemical crevice corrosion process of Ti in hot concentrated chloride solution, discussing temperature, set potential and surface treatment 03 p0374 A72-13714
- Elastomeric protective coating requirements from existing electrochemical metallic corrosion theories 03 p0364 A72-14238
- Corrosion resistance of stainless steels in acid solutions, describing electrochemical cell for recording potential/current density and polarization curves 04 p0533 A72-15236
- Transport processes in electrolytic solutions, considering current and potential distributions in localized corrosion 04 p0536 A72-15737
- Crack corrosion in metals and metal alloys, considering electrochemical reaction kinetics as function of oxygen concentration and pH 04 p0536 A72-15738
- Stress corrosion crack tip electrochemical reactions simulation on Ti and alloy surfaces, using modified rotating disk apparatus with pH measurement 04 p0536 A72-15739
- Pitting and film deposits with organic fluid by electrolysis and fluid flow, discussing electrokinetically produced corrosion [ECS PAPER 88] 07 p1010 A72-18802
- Electrochemical tests, noting electric potential, current and electrode impedance measurements for corrosion rate and oxidizing power evaluation 08 p1189 A72-22105
- Electrochemical and stress corrosion tests of Ti-Ni alloys in acidic chloride solutions at ambient and elevated temperatures [NACE PAPER 30] 10 p1497 A72-24321
- German monograph - Influence of programmed welding cycle temperatures on the microstructure formation and corrosion behavior of austenitic corrosion-resistant steels. 22 p3195 A72-43075
- Influence of prior electrochemical history on the propagation of localized corrosion. 22 p3195 A72-43129
- Corrosion and electrochemical properties of Kh15N5i2T and Kh15N4AM3 oxidized steels 23 p3303 A72-44099

ELECTROCHEMICAL MACHINING

- Electrodischarge and electrochemical machining applications in continuous repetitive production of aircraft jet engine components 01 p0078 A72-11150
- Electrochemical machining electrode processes thermodynamic and kinetic characteristics, discussing temperature, electrolyte viscosity and flow rate and current density effects on metal removal rate 04 p0526 A72-14475
- Electrochemical thinning of metal disks for electron microscopic thin foils preparation 04 p0527 A72-15492
- Book on electrochemical machining covering metallurgical effects, electrolytes, tool design, rotating surfaces and operating costs 06 p0821 A72-17819
- Metal structure effect on anodic dissolution and surface microgeometry formation during electrochemical machining 08 p1175 A72-21040
- Electrolyte flow rate, electric current intensity and tool electrode shape influence on surface finish quality in precision electrochemical machining 08 p1175 A72-21044
- Anodic dissolution of metals during electrochemical precision processing, studying electrolyte composition and flow and mixing rates 11 p1640 A72-26255
- Electrochemical metal precision processing, discussing steels carbon content, surface purity, electrolyte anion composition and anode potential 11 p1640 A72-26256
- Electrolyte temperature, pH and mixing rate effects on anodic dissolution of steels and brass in electrochemical precision processing, using thermokinetic data processing 11 p1640 A72-26257
- Electrode gap current and temperature distributions during electrochemical precision processing of metals, studying gas and electrolyte flow 11 p1613 A72-26258
- Metal surface layer and microetching process along grain boundaries during electrochemical precision processing, verifying steel microcrack depths with mathematical model 11 p1640 A72-26260
- Ti alloys processability by electrochemical method, showing output rate and surface quality improvement from increased current density and electrolyte temperature 11 p1640 A72-26261
- Electrochemical precision metal processing accuracy, analyzing electrode gap size and surface nonuniformities effects on prescribed configuration 11 p1640 A72-26262
- Axial, circumferential and radial residual stresses calculation in polycrystalline coatings and cylindrical elements during surface layer removal by electrochemical processing 11 p1737 A72-26263
- Residual stresses and stress relaxation determination in electrochemical galvanic coating with automatic strain curve plotter 11 p1613 A72-26264
- Recent international development in non-traditional machining processes - EDM, ECM, LBM, EBM. 20 p2928 A72-39203

ELECTROCHEMICAL OXIDATION

- Soviet papers on anodic oxidation of metals covering aluminum and zirconium oxides, oxide films, anion sorption capacity, chemical composition, structure and physicochemical properties 05 p0667 A72-17050
- Electrochemical oxidation and classification of fuel cells according to electrolyte, electrode, fuel, catalyst and temperature 16 p2351 A72-33877
- Hydrocarbon oxidation and catalysis on Pt fuel cell electrodes, using electrochemical methods with isotopic exchange and gas chromatography 16 p2361 A72-33878
- Raney Pd-Ag catalysts for methanol oxidation in alkaline electrolyte in fuel cells 16 p2361 A72-33879
- Alloying component effect on Pt catalytic activity in anodic oxidation of methanol for fuel cells 16 p2361 A72-33881
- Sintered WC effects on fuel cell electrochemical oxidation in acid electrolytes, analyzing hydrogen, hydrazine, formaldehyde, acetaldehyde, formic acid and carbon monoxide fuels 16 p2351 A72-33882
- Hydrazine fuel cell development, electrochemical problems and applications, noting batteries with air oxidant 16 p2351 A72-33886
- Hydrocarbon electrochemical oxidation kinetics for fuel cells at low temperature, considering adsorption and bond cleavage 16 p2361 A72-33891
- Effect of chloride on the anodic dissolution of titanium in methanolic solutions. 21 p3013 A72-40842

On some aspects of low-temperature and anodic oxidation of metals and semiconductors. 21 p3067 A72-40914

ELECTROCHEMISTRY

- NT ELECTROLYSIS
- Electrochemical carbon dioxide concentrator materials compatibility to space shuttle life support environment, comparing with LiOH method 01 p0018 A72-10768
- Electrode potential gradients during dimensional electrochemical treatment of Ni and Ni based alloys 08 p1175 A72-21041
- Electrochemical techniques for time averaged turbulent velocity gradient and components of fluctuating velocity gradient at solid surface 09 p1306 A72-22305
- Russian papers on electrochemical treatment of metals covering anode and cathode processes, electromechanical precision processing of machine parts and wear resistant electrolytic alloys 11 p1640 A72-26254
- Metal-air fuel cell systems characteristics, noting electrochemical processes in zinc-air systems 16 p2352 A72-33897
- The reduction of chlorine on carbon in AlCl3-KCl-NaCl melts. 21 p3013 A72-40843
- Chemistry of grain boundaries and its relation to intergranular corrosion of austenitic stainless steel. 22 p3195 A72-43126

ELECTROCONDUCTIVITY

- Impurity, surrounding gas and pressure effects on organic semiconducting material electrical conductivity, discussing carrier origin and number, and measurement techniques 01 p0113 A72-10125
- Planar Gunn effect devices for microwave oscillators, discussing impedance matching and diode conductivity profile effect on output power 01 p0028 A72-10628
- Electrical conductivities dependence on assumed values of elastic collision cross sections of electrons with neutral and charged particles in low temperature plasma 01 p0110 A72-11205
- MHD channels magnetoacoustic and ionization instabilities effect on mean current density and electric field strength, determining effective electroconductivity and Hall parameter 01 p0110 A72-11208
- Thermal conductivity, electrical conductivity, viscosity and diffusivity of ionized gas-solid suspension in electric field, using transport equations and particle interaction potentials 01 p0111 A72-11332
- Graphite-epoxy conductive polymers as fatigue damage indicators of structures under cyclic strain [SESA PAPER 1915] 02 p0287 A72-11509
- Kubo bulk electrical conductivity of two dimensional guiding center plasma in strong dc magnetic field 02 p0263 A72-11966
- Electrical conductivity of pyrographite at high temperatures along and across deposition plane, using optical pyrometer measurements 02 p0251 A72-12860
- Hall effect and conductivity dependence on applied electric field in multivalley semiconductor for power dependent intervalley scattering time 02 p0269 A72-12887
- Immersion-type electroconductivity probe for anisotropic plasmas, calculating Hall coefficient 03 p0397 A72-13922
- Potentials, currents and velocity variation of rotating conducting disk system in liquid metal medium under uniform longitudinal magnetic field 03 p0397 A72-13996
- Dynamic and electromagnetic characteristics of MHD flow in square tube with walls differing in electroconductivity within oblique transverse magnetic field 03 p0398 A72-14007
- Ambipolar diffusion influence on MHD generator electrical conductivity, discussing plasma radiation, electron escape generator geometry and efficiency and ignition temperature range 04 p0554 A72-14404
- Temperature dependence of quantizing thin films electroconductivity in case of scattering at neutral impurities 04 p0561 A72-15078
- Constitutive equations derivation for electrical conduction due to small deformation superposition, applying to deformed spherical shell current density determination 04 p0549 A72-15254
- Semiconductor slab electroconductivity measurement based on circularly polarized microwave propagation in circular waveguide 04 p0502 A72-15533
- Computer controlled automatic system for measuring electroconductivity and Hall effect in semiconductors, noting data acquisition instrumentation 04 p0496 A72-15534

Ti surface oxide films ionic and electronic conductivity properties and correlation with crevice corrosion susceptibility in contact with polytetrafluoroethylene gaskets

04 p0535 A72-15732

Electrical conduction in orthogonal coordinates from nondipole geomagnetic field effect on conductivity tensor of ionospheric dynamo region

05 p0657 A72-16260

Plasma perturbations and destabilization in curved magnetic field due to electronic electrical conductivity finiteness

06 p0860 A72-17684

Hopping electroconductivity of n-type GaS single crystals, observing frequency dependence

06 p0866 A72-18181

Electroconductivities and electrostatic field structure within equatorial electrojet, observing vertical distribution

07 p1056 A72-18896

Electroconductivity, thermal conductivity and diffusivity, specific heat and emissivities of Ti at 1000-1700 K

07 p1010 A72-18935

Closed system equilibrium correlation functions relationships based on total momentum conservation, discussing application to solids or liquids electrical conductivity via nuclei dynamics

07 p1035 A72-19669

Electrical conductivity of nonideal low temperature plasma as function of metallization densities, applying to semiconductors and mercury vapor systems

07 p1043 A72-19880

Electroconductivity distribution and vertical gradients in photospheric layers of solar active region, using approximate model

07 p1082 A72-20293

Magnetoelastic vibrations of thin conducting plate in magnetic field, solving electrodynamic equations

07 p1095 A72-20315

Unsteady flow of viscous incompressible electrically conducting fluid past infinite nonconducting plate within uniform transverse magnetic field

08 p1212 A72-21079

Temperature controller with linear time variation for semiconductors thermally stimulated conductivity and thermoluminescence measurements at 90-300 K operating range

08 p1166 A72-21438

Turbulized combustion product plasma electrical conductivity, noting temperature dependent variation

08 p1214 A72-21649

Electrical conductivity relationship to phase composition in thin CdTe films deposited on mica bases and annealed in Cd vapor

09 p1367 A72-22420

Cathodic processes in Al electrodeposition from ethyl pyridine bromide electrolyte, discussing phase equilibrium and electrical conductivity dependence on solution composition

09 p1318 A72-22529

Electromagnetic field forces on finite conducting bodies, discussing heating rates and temperatures with ambient air convection and machine design recommendations

09 p1359 A72-22679

Microscopic perturbations of metals electron density complex dynamic matrix, deriving electroconductivity and kinetic coefficients

09 p1329 A72-23039

Dielectric tensor for electromagnetic waves in weakly inhomogeneous anisotropic media, taking into account permittivity and conductivity fluctuations

09 p1280 A72-23230

Flat electrically conducting screen with periodic filamentary structure as possible analog converter of electromagnetic field information

09 p1291 A72-23433

Electrical conductivity and thermal emf as function of temperature in CdSb, discussing energy spectrum and crystallization

09 p1372 A72-23479

Electrically conducting viscous incompressible fluid rotating with oscillating disk in magnetic field

09 p1366 A72-23575

Nonstabilized Ni-P thin films electrical conductivity at 50-280 C, using mass spectrographic, thermal differential, X ray diffraction and electron microdiffraction analyses

10 p1495 A72-24076

Linear anisotropic composites with periodic spatial structure, determining elastic moduli and electrical conductivity variational bounds

10 p1556 A72-24346

Earth precession as origin of geomagnetic field, discussing dynamo theory and core electroconductivity

10 p1472 A72-24524

Book on binary metal oxides covering non-stoichiometry, electrical conductivity, diffusion theory, point defects, high temperature creep and electrochemical transport properties

10 p1527 A72-25075

Oxygen chemisorption surface states effects on electrical conductivity of CdS single crystals and evaporated films

11 p1701 A72-25855

Nonideal dense plasma properties, discussing electrostatic shielding, many particle clusters, phase transitions, metallization and electrical conductivity [AIAA PAPER 72-414]

11 p1695 A72-26164

Electrical and thermal conductivity, elastic properties and resistance to bending of porous tungsten in porosities region

11 p1665 A72-26868

Aircraft windscreen design, discussing high impact strength glass, electroconductive film, transparency service life and weight reduction

12 p1753 A72-27006

Electrical conductivity measurement of dense nonideal Cs plasma at high pressure and temperatures

12 p1849 A72-27057

Vapor annealing effect on vacuum evaporator CdSe thin films electroconductivity as function of pressure and temperature

12 p1854 A72-27249

Vacuum deposition process relation to thin metal film properties, discussing current conducting mechanism

12 p1854 A72-27275

Electromagnetic plane field cumulation by heavy conducting shells implosion with quasi-relativistic velocity, solving Maxwell equations by characteristics method

12 p1851 A72-27396

Measurement circuit for temperature dependence of thermal emf and electrical conductivity in thermoelectric materials

12 p1807 A72-27452

CdS thin film conductivity reactions to grain boundary and stacking faults, correlating grain size to mobility

12 p1856 A72-28012

Uniaxial elastic deformation pressure effects on electronic conduction in tetrahedrally bonded amorphous semiconducting thin films as function of temperature

13 p2021 A72-28574

Experimental investigation of toroidal discharge electrostatic potential fluctuations in turbulently heated plasma, discussing correlation with effective conductivity

13 p2012 A72-29122

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length

13 p2016 A72-29603

Lunar core-crust conductivity models compatibility with lunar surface field/interplanetary magnetic field transfer function from Apollo 12 magnetometer data

14 p2153 A72-30502

Lunar interior temperature profile estimation from electrical conductivity distribution based on forsteritic olivine composition

14 p2153 A72-30505

Lunar interior electrical conductivity from surface magnetic field measurements by Apollo magnetometers, calculating temperature profile for olivine moon model

14 p2154 A72-30508

Apollo 11 and 12 lunar surface rocks electrical conductivity at 300-1200 K in vacuum, Ar, He and He-hydrogen atmospheres, noting large hysteresis above 500 C

14 p2155 A72-30518

Earth electrical conductivity radial distribution effect on solar quiet day geomagnetic field variations

14 p2103 A72-30666

Linear theory based analysis of compressible electroconductive fluid flow satisfying perfect gas equation in presence of thin profiles within quasi-aligned magnetic field

14 p2095 A72-30824

Phase diagrams of Hf-Ce and Hf-Er alloys, plotting hardness and electroconductivity curves

15 p2289 A72-31188

Clean Ge crystal surface oxidation process investigation by I.E.D and conductivity measurements

15 p2292 A72-31868

Relativistic electron ring oscillations in circular waveguide with allowance for walls finite conductivity, noting radiative instability at subcritical frequencies

15 p2210 A72-32738

Superplasticity in two phase compositions based on refractory metal alloys, noting creep rate dependence on concentration and electroconductivity

16 p2405 A72-33094

Fillers effect on polytetrafluoroethylene friction properties, electroconductivity and thermal conductivity, noting friction coefficient reduction by laminar filler structures

16 p2413 A72-33269

Equilibrium equation for elastic deformation effect on free electricity redistribution in thin electroconductive shells

16 p2469 A72-33271

Conductance measurements for metal oxide-amorphous silicon junctions, showing temperature dependent tunneling

16 p2442 A72-33620

Normal, highly conducting and ion-exchanging solid electrolytes structure and conductivity, with particular attention to rechargeable silver halide batteries

16 p2352 A72-33899

Plasma motion relation to magnetic field line motion for imperfect electroconductivity, noting comparison with total particle drift distance

16 p2439 A72-33931

The perturbation of alternating geomagnetic fields by three-dimensional conductivity inhomogeneities

17 p2354 A72-34350

Determining electrical ground constants from the mutual impedance of small coplanar loops

17 p2514 A72-34371

Magnetohydrodynamic flow in the region of a conductivity discontinuity at the wall

17 p2587 A72-34460

Electrical conductivity of nonideal low temperature plasma as function of metallization densities, applying to semiconductors and mercury vapor systems

17 p2590 A72-35129

Temperature dependence of electrical and thermal conductivity for transition metals at 20 to 1200 C, noting periodic variations associated with atomic structures periodicity

17 p2568 A72-35519

Structure, electrical conductivity and electron transport mechanisms in chalcogenide glasses

17 p2596 A72-35750

Satellite measurements of the moon's magnetic field - A preliminary report

18 p2724 A72-36287

Combined Rayleigh and Kelvin instability of a Hall plasma with a vertical magnetic field

18 p2715 A72-36502

Fast magnetoacoustic wave interaction with shock wave propagating in ideal electrically conducting gas, showing magnetic field stabilizing effect

18 p2711 A72-36812

Lunar electrical conductivity

18 p2729 A72-37000

New efficient method for calculating hot electron effects applied to n-Ge

19 p2844 A72-37686

Effect of evaporation of the volatile component on the electrical properties of CdSb

19 p2845 A72-38402

Plasma velocity, ion density and electrical conductivity from electron density and temperature and electromagnetic field profile measurements in Ar plasma inverse pinch

19 p2841 A72-38437

Electrically conducting plane screen with periodic filamentary structure as possible analog converter of electromagnetic field information

19 p2782 A72-38516

Photoconductivity and electroconductivity spectral distributions in glassy cadmium silicon germanium arsenide semiconductors at 300 K related to quantum mechanism

19 p2847 A72-38682

Electroconductivity, thermal emf and Hall coefficient for single crystals of Bi-Sb alloys with Cd, In and Sn additions

19 p2847 A72-38683

motion

20 p2891 A72-38935

Lunar temperature profiles from electrical conductivity profile of olivine single crystal as lunar interior material representative sample

20 p2967 A72-39179

On the theory of electrical conductivity in semiconducting thin films under a high electric field

20 p2959 A72-39216

Electrical conductivity of pressed cadmium antimonide

20 p2959 A72-39218

Temperature dependence of electroconductivity and photosensitivity in CdS films

20 p2959 A72-39223

Electrical conductivity of tungsten trioxide /W(O₃)/

21 p3096 A72-40198

Study of the conductivity of the motor neuron membrane during supraspinal stimulation

21 p2999 A72-40585

Weakly ionized plasma decay within cylinder with electrically conducting walls in presence of longitudinal magnetic field, determining electric current dependence on cylinder length

21 p3091 A72-40657

Cooling associated with minority carriers excitation effect in semiconductors, discussing influence of electroconductivity and forbidden bandwidth

21 p3097 A72-40788

Electroconductivity anisotropy effect on transverse Demer effect angular dependence and spectral distribution in p-type CdSb lattice

21 p3098 A72-41693

Electrodynamical mathematical model for electroconductivity of nonuniform plasma with Hall effect, cal-

culating current distribution from Riemann problem solution 22 p3210 A72-41888

The moon's thermal state and an interpretation of the lunar electrical conductivity distribution. 22 p3226 A72-42531

Heat-resistant copper-base alloys containing rare-earth and high-melting metals, characterized by high electrical conductivity 22 p3192 A72-42819

Landau dispersion equations for oscillations damping of bounded electron plasma, noting application to plasma cylinder in conducting tube 23 p3319 A72-43410

Thermal and electrical conductivities, thermal expansion and specific heat of commercial graphite obtained by precipitation of methane pyrolysis products on hot surface 23 p3306 A72-43689

Disequilibria created by an electric field in a nitrogen plasma 23 p3321 A72-43695

Application of a strongly doped semiconductor model to the study of thermodynamic and conductivity properties 24 p3432 A72-45068

Electrical conductivity measurement of dense nonideal Cs plasma at high pressure and temperatures 24 p3431 A72-45710

ELECTROCUTANEOUS COMMUNICATION

Compensatory tracking task performance with continuous error information feedback via visual, auditory or electrocutaneous displays 14 p2083 A72-31152

ELECTRODE FILM BARRIERS

Deposition of dielectric films on the electrodes of an electrostatic gyroscope 21 p3059 A72-41814

ELECTRODELESS DISCHARGES

High stability electrodeless discharge lamps with less than 0.1 percent intensity variation, discussing construction and quality control procedures 04 p0509 A72-15485

Zeeman patterns and energy level Lande g factors from spectrograms of As ion electrodeless discharge tubes in presence of 24,025 G magnetic field 07 p0987 A72-19832

Population inversion in plasma via colliding waves generated by symmetric electrodeless electromagnetic shock tube 08 p1147 A72-21304

Rare gas ion laser excited by electrodeless microwave discharges, noting external magnetic field effects on output 11 p1651 A72-26571

Titanium nitride powder obtained by hydrogen reduction of titanium tetrachloride in nitrogen flow heated in microwave electrodeless discharge 13 p1967 A72-30111

Millimeter wave scattering at turbulent density discontinuities in plasma from electrodeless inductive discharge 14 p2136 A72-30174

Attachment length as stability criterion for bluff-body stabilized electrodeless arc, showing linear dependence on flow velocity ratio to power density 15 p2336 A72-32406

ELECTRODEPOSITION

NT ELECTROPLATING

Destructive readout computer memory of wire substrate electrodeposited with two thin Permalloy layers separated by Cu [IEEE PAPER 11,5] 03 p0332 A72-13765

Thin film formation techniques including evaporation, sputtering, anodization, chemical vapor deposition, electrodeposition and sintering, discussing surface scattering, tunneling, Schottky emission and conduction mechanisms 06 p0790 A72-18571

Adherent solid lubricant films electrochemical deposition, noting method application to metal forming techniques 06 p0824 A72-18606

Dispersion strengthening of electrolytically deposited nickel-aluminum oxide alloys, comparing tensile tests to theoretical values 08 p1186 A72-21442

Metal deposition - Conference, Vinyus, Lithuanian SSR, April 1971 09 p1318 A72-22526

Cathodic processes in Al electrodeposition from ethyl pyridine bromide electrolyte, discussing phase equilibrium and electrical conductivity dependence on solution composition 09 p1318 A72-22529

Evaluation of gold electrodeposits for use in dry circuit applications. 18 p2664 A72-35983

Study of tungsten and molybdenum coatings obtained by arc discharge in a vacuum 19 p2808 A72-38186

Electron work function and electrode physicochemical properties and surface temperature on boundary layer formation and thickness at electrodes in MHD channel 01 p0009 A72-11206

Cascade connected electrode scheme for MHD applications, noting potential and current distributions and Hall voltage buildup 02 p0265 A72-12276

Stainless steel electrodes resistive and capacitive properties in contact with saline solutions of various concentrations and over extensive frequency range and current densities 03 p0318 A72-12953

Plasma jet formation within high pressure discharges in air at atmospheric pressure, discussing electrode configuration, current density and accelerating magnetic field strength 03 p0396 A72-13662

Rechargeable oxygen electrode research program for hydrogen oxygen fuel cells and metal-oxygen batteries, discussing KOH solutions effects 04 p0466 A72-14675

Explosive erosion in Al, Cu, W and Pb electrodes during high current spark discharges, using time resolved photography 05 p0692 A72-16032

Ten-stage electrostatic depressed collector designed with analog computer for improving klystron power conversion efficiency 05 p0637 A72-16365

Pulsed electric microthruster with solid fuel feed system, noting electrode geometry effects on performance and ablation patterns [AIAA PAPER 72-210] 05 p0705 A72-16799

Positive electrode materials for high energy density batteries with Li negative electrode, calculating discharge emf for various salts 06 p0760 A72-17575

Ionic winds with restricted entrainment and gauze electrode, considering diffusion flame aeration in combustion systems 07 p1037 A72-19372

Biomedical transducers for NASA space program, discussing spray-on electrodes and telemetering for ECG respiration and body temperature 07 p0931 A72-19917

Multiple-wire spark counter characteristics for alpha particle detection, discussing electrodes surface finish and gas filling 08 p1164 A72-20941

Technological characterization of electric discharge machines by metal removal rate, volumetric electrode wastage and machined surface roughness 08 p1174 A72-21031

Optimization for maximum productivity of electric spark machining with vibrating electrode, noting erosion product removal difficulties 08 p1174 A72-21033

Electrode potential gradients during dimensional electrochemical treatment of Ni and Ni based alloys 08 p1175 A72-21041

Electrolyte flow rate, electric current intensity and tool electrode shape influence on surface finish quality in precision electrochemical machining 08 p1175 A72-21044

Reference electrode area and floating potential influence in Langmuir probe measurements of plasma density and temperature 09 p1311 A72-23229

Electrode vertex angle effect on fused weld bead geometry related to plate thickness in tungsten inert gas /TIG/ welding 09 p1320 A72-23634

Direct single electrode measurement of carbon dioxide partial pressure in liquids and gases, using pH changes due to gas diffusion 09 p1317 A72-23671

Computer storage array of isolated electrodes imbedded between capacitor parallel plates, discussing read-write cycle time, expected performance and experimental techniques 10 p1443 A72-23933

Monograph on fuel cells covering thermodynamics, electrode polarization principles, electrocatalysis, system requirements, operational principles and applications 10 p1423 A72-24700

Electrochemical precision metal processing accuracy, analyzing electrode gap size and surface nonuniformities effects on prescribed configuration 11 p1640 A72-26262

Electrode system for ventricular defibrillation, noting current density role and rounded edge effectiveness 11 p1588 A72-26628

Lifetime limitations of ion extraction systems for electron bombardment ion thrusters due to sputter erosion of electrode by ion beam [AIAA PAPER 72-477] 12 p1860 A72-27421

Silicon solar cells IR reflectance improvement by reflecting back electrode, obtaining 10 percent efficiency increase 12 p1758 A72-28032

Three dimensional heat propagation problem of copper electrode destruction under concentrated heat flux with allowance for metal evaporation 12 p1890 A72-28175

Thermal-to-electric power conversion efficiency of nonequilibrium MHD generator with Cs seeded noble gases, considering electrode configuration and gas dynamic effects 13 p1900 A72-29356

Electrode boundary layer electrical breakdown mechanism with allowance for steep temperature gradients at surface, considering Joule heating or electrostatic field effect as causes 13 p2013 A72-29361

Electrode design and implantation method for chronic experiments, discussing information loss factor elimination 14 p2078 A72-30393

Surface electrode position effect on electromyogram recording of electrical activity during repeated biceps and triceps brachii contractions 15 p2190 A72-32489

Surface electrode distance, area and pressure effects on electromyogram recording of large skeletal muscle electrical activity during defined muscular tensions 15 p2190 A72-32490

Metal-air batteries with alternately polarizable oxygen electrodes, discussing current state of technology 16 p2350 A72-33670

Electrodes converting hydrogen, methanol or oxygen for use in fuel cells with alkaline electrolyte, using Ag-Pd, Ni, Si and C catalysts 16 p2351 A72-33885

Rechargeable high energy density battery with Al and Cl electrodes and molten aluminum chloride-alkali chloride eutectic electrolyte 16 p2352 A72-33896

Impurities and additives effects on electrode properties in Cs vapor thermionic converter, noting coadsorption model for Cs-W-O surface 17 p2496 A72-34598

Investigation of the properties of electrode materials made on the basis of high-melting-point compounds and alloys 18 p2698 A72-36136

Local thermionic emission from bare and covered surfaces of cermetelectrodes. 18 p2646 A72-36193

Effect of electrode thickness on the frequency response of a piezoelectric transducer 18 p2693 A72-37218

'VI-like' and 'aVF-like' leads for continuous electrocardiographic monitoring. 19 p2759 A72-37244

Investigation of the transport of electrode metal during welding in a carbon dioxide atmosphere 19 p2810 A72-38588

The aluminum electrode in AlCl3-alkali-halide melts. 21 p3013 A72-40844

Use of rotated electrodes for amplitude weighting in interdigital surface-wave transducers. 22 p3178 A72-42619

ELECTRODISSOLUTION

Effect of chloride on the anodic dissolution of titanium in methanolic solutions. 21 p3013 A72-40842

ELECTRODYNAMICS

NT ELECTROHYDRODYNAMICS

NT ELECTROMECHANICS

NT QUANTUM ELECTRODYNAMICS

Nonhomogeneous media electrodynamics with varying permittivity and permeability, solving nonstationary equations by differential operators 03 p0389 A72-13654

Ultrasonic flaw detector pulse transducers operation using electrodynamic and capacitance receivers 03 p0361 A72-13987

R-function theory application for solution of boundary value problems in electrodynamics, considering field behavior at infinity 04 p0488 A72-15377

Electrodynamical theory of artificial dielectrics based on rigorous solution for diffraction on system scattering elements consisting of periodical gratings formed by thin metallic strips 04 p0490 A72-15412

Electrodynamic vibration exciters with interchangeable heads for environmental vibration testing

05 p0644 A72-16596

Electrodynamics of ionosphere and magnetosphere, discussing irregularities, red arc and auroral thermosphere density and temperature changes

06 p0809 A72-18279

Complex transmission coefficient of waveguide with two arbitrarily spaced infinitely thin plane parallel inhomogeneities, using Galerkin method for single-parameter approximation of electrodynamic problem

07 p0938 A72-19002

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering heavy current carrying filaments equilibrium and boundary value problems

07 p1035 A72-19975

Magnetosphere theory of pulsar electrodynamics, discussing unipolar inductor with iron sphere having uniform magnetization parallel to rotation axis

07 p1080 A72-20058

Book on models of particles and moving conducting media covering generator electrodynamics, electron tubes, particle accelerators, plasma and electron beam simulation, ion propulsion, etc

07 p1036 A72-20203

Magnetoelastic vibrations of thin conducting plate in magnetic field, solving electrodynamic equations

07 p1095 A72-20315

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamic equations

08 p1240 A72-21140

Stationary functionals for introducing eigenfunctions in diffraction theory of electrodynamic systems

08 p1133 A72-21372

R function and variational methods solution for mixed boundary value problem of Laplace equation applied to stationary heat conduction and electrodynamic problems

08 p1209 A72-21704

Comb type slow wave structures properties outside passband, obtaining dispersion and field distribution expressions by electrodynamic analysis

08 p1135 A72-21738

Nocturnal F region electrodynamic drift at conjugate point sunrise time, discussing dynamic electrostatic field normal component change as cause of ionosphere vertical movement

09 p1297 A72-22576

Pulsar electrodynamic properties, radiation mechanism, galactic distribution and pulse shape, period distribution and propagation characteristics, reviewing Crab Nebula pulsar features

10 p1533 A72-23888

Upper atmospheric dynamics and electrodynamic processes for evaluation of meteor trail radar observations in synoptic meteorology

10 p1473 A72-24702

Ohmic law generalization in electrodynamics for electrically conductive fluid medium in turbulent motion, taking into account Hall effect

10 p1524 A72-24931

Russian book on electrodynamic plasma acceleration covering charged particles motion in electromagnetic field and pulsed, MHD, steady and Hall accelerators

12 p1853 A72-28341

Characteristic functions of potential distribution on sphere with longitude dependent conductivity for application to ionosphere electrodynamics

14 p2101 A72-30644

Ionosphere radio wave propagation from fluid plasma wave and magnetically nonpermeable medium electrodynamics studies

15 p2193 A72-31281

Information propagation time direction of cosmological models in terms of conventional electrodynamic theory, contrasting with Wheeler-Feynman theory

16 p2424 A72-33286

Soviet book on continuum mechanics covering dynamic, thermodynamic and electrodynamic equations mechanic problems, three dimensional space, internal degrees of freedom, etc

16 p2425 A72-33578

Generalization of basic equations of aerodynamics and electrodynamics.

17 p2539 A72-35043

Variational and probabilistic methods for multiphase media, noting applications in electrodynamics, nonlinear plasticity and mechanics

17 p2632 A72-35110

Stochastic electrodynamics based on zero electromagnetic field motion, deriving Schroedinger equation and electromagnetic model of gravitation

17 p2584 A72-35912

Two sided error estimates for electrodynamic impedance, admittance and scattering matrices in diffraction theory

18 p2657 A72-36104

Book on classical relativity theory covering relativistic kinematics and mechanics, tensor calculus, electrodynamics, gravitational fields and effects,

elastic continua mechanics, thermomechanics and cosmology

18 p2712 A72-36850

Moment of forces on spacecraft with low angular velocities in variable magnetic field, using electrodynamic equations

20 p2976 A72-39245

Cosmological electrodynamics and gravitation theory, considering singularity, constraint, Mach, Olbers, arrow-of-time and tail problems

20 p2974 A72-40004

Electrodynamics and magnetoelasticity nonlinear Emden-Fowler equation solutions, considering current carrying heavy filaments equilibrium and boundary value problems

20 p2955 A72-40032

Electrodynamic analysis of superconducting vortices interaction with cylindrical cavities (pinning), calculating critical currents in type II superconductors in external magnetic field

21 p3096 A72-40416

Electrodynamic effects of Jupiter's satellite Io.

21 p3104 A72-40483

Russian book - Introduction to nonlinear electrodynamics.

22 p3204 A72-42076

Chaplygin gas flow equation for thin conducting plate hydrodynamic and electrodynamic equations, noting special theory of relativity

23 p3312 A72-43404

Problem of error estimation during solution of internal boundary value problems in microwave electrodynamics

23 p3265 A72-44201

ELECTRODYNAMOMETERS

U DYNAMOMETERS

ELECTROENCEPHALOGRAPH

U ELECTROENCEPHALOGRAPHY

ELECTROENCEPHALOGRAPHY

Multichannel topography of human scalp alpha EEG potential fields

01 p0016 A72-10072

EEG parameters estimation and statistical uncertainty calculation by computer program

01 p0016 A72-10073

EEG and electrooculogram recording of chimpanzee sleep, noting rapid eye movement stages

01 p0009 A72-10074

EEG phase asymmetry fluctuations relation to respiration rhythm in subjects from pneumograms during rest, mental activity, hypnosis and sleep

05 p0620 A72-17214

Short-term memory and electrographic effective and trace processes relationship from visual and Rolandian cortical regions activity and Tarkhanov galvanocutaneous reaction

06 p0764 A72-17993

Factor analysis of frontal and occipital brain regions EEG indices interzonal variability, relating autocorrelation function parameters to neuron ensembles force level

06 p0764 A72-18057

EEG discharges virtual dipolar sources computation, using mathematical model with homogeneous spherical conductive medium to simulate human head

06 p0769 A72-18201

EEG study of cortical aftereffects to peripheral stimulation in cats

07 p0915 A72-18866

Uniform visual field influence on electroencephalographic alpha rhythm in man, discussing ocular fixation, visual attention and vigilance change effects

07 p0916 A72-19040

Occipital electroencephalographic response to slowly repeated aperiodic light flashes, discussing alpha wave and rhythmic afteractivity amplitude changes

07 p0916 A72-19041

Phase relations between alpha waves in EEG and automated rhythmic motoric activity as function of subject behavioral activity and thalamic pacemaker zones

07 p0916 A72-19109

Computerized EEG data acquisition and transmission system for large hospitals with multiple critical care patient monitoring units, noting telephone access from outside

07 p0928 A72-19307

Circadian rhythms variations for sleep, EEG, temperature and activity in monkeys, indicating acrophase, amplitude and level regulation

07 p0918 A72-19528

Isolation stress effect on circadian rhythmic patterns of EEG activity during sleep-wake and sleep cycles in unrestrained chimpanzee

07 p0921 A72-20181

Bioelectric ECG and EEG signal analysis using hybrid computer techniques and parameter optimization for autocorrelation function modeling

07 p0933 A72-20333

Human cortical auditory evoked response to speech and sound effects, relating EEG interhemispheric wave amplitude asymmetry to stimulus meaningfulness

08 p1115 A72-20984

Reliability of electroencephalography as diagnostic method from specialists interpretation of curve morphological features, discussing normal and pathological record evaluation

08 p1124 A72-21000

Comparative EEG characteristics of frontal and occipital human brain cortex, relating psychophysiological and neurophysiological factors

08 p1116 A72-21196

Isolated specific color dependent waveforms of visual evoked response to strong colored lights relating luminance and wave amplitude changes

09 p1267 A72-23500

Orienting response indication by EEG alpha rhythm desynchronization in relation to visual stimulation intensity

11 p1585 A72-26238

EEG measurement of sleep behavior patterns, discussing sleep stages, temporal patterns, circadian rhythm, intrasleep process stability and age factor

11 p1580 A72-26679

Jet aircraft noise effect on sleeping EEG and subsequent waking performance, showing presence of carry-over effects

12 p1770 A72-27474

Biotelemetry system for EEG monitoring of free swimming diver at 15 meter depth, discussing power requirements, antenna design and signal attenuation

12 p1770 A72-27478

Human electrophysiological changes during perceptual isolation from EEG, EMG, vertical eye movements and electrodermal measurements

12 p1771 A72-27484

Electrocorticograph monitoring of central nervous system state in dogs reanimated by artificial blood circulation after prolonged clinical death by drowning

12 p1764 A72-28215

EEG recording and analysis by analog technique as means of studying human responses to hyperventilation

12 p1767 A72-28312

Deep brain structure biopotential correlations during man sleep development, using electrosubcorticalograms

13 p1901 A72-28634

Neuronal spike activity changes in rabbit visual and sensorimotor neocortex and hippocampus during EEG activation

13 p1902 A72-28643

Adaptation period to inverted work-rest cycle observed with encephalograph, noting effect of brain bioelectric activity circadian rhythms stability

13 p1904 A72-29315

EEG diurnal rhythms during 72 hour insomnia, considering adaptation to altered work-rest cycle in subjects with stable and unstable brain activity rhythms

13 p1904 A72-29319

ECG heart rate recording of helicopter instructor pilots during flight training tasks, administrative work, automobile driving and eating

14 p2082 A72-31097

Human brain sensorimotor region EEG dependence on proprioceptive influence, instruction for active movement and preparation passive movement of hand

16 p2353 A72-32992

Occipital EEG activity during fluctuations of perception under stabilized image and simplified stimulus conditions.

17 p2506 A72-34247

Stimulus complexity and the EEG - Differential effects of the number and the variety of display elements.

17 p2507 A72-34248

Cortico-visceral studies of spinal cord reticular formation stimulation and destruction effects on electroencephalogram, cardiac activity and interoceptive glycemic reflexes

21 p3000 A72-40757

Electrophysiological analysis of limbic-reticular interaction during the orientating reflex

23 p3257 A72-44081

Ensemble characteristics of the human visual evoked response - Periodic and random stimulation.

24 p3374 A72-44575

ELECTROEROSION

U SPARK MACHINING

ELECTROEXPLOSIVE DEVICES

U INITIATORS [EXPLOSIVES]

ELECTROGENERATORS

U ELECTRIC GENERATORS

ELECTROHYDRAULIC CONTROL

U ELECTRIC CONTROL

U HYDRAULIC CONTROL

ELECTROHYDRAULIC FORMING

Electrohydraulic and electromagnetic metal forming, using capacitor stored energy conversion into hydraulic shock waves or magnetic pressure to deform sheet metal components, pipes, etc

15 p2243 A72-31323

ELECTROHYDRODYNAMICS

Ion oscillation theory for electrostatic dynamic channel Poiseuille and Hagen-Poiseuille type flows, using transport and dispersion equations in various ionized media

01 p0111 A72-11214

Electrohydrodynamic ideal incompressible fluid flow in flat and circular channels, determining electric potential and field distribution
02 p0266 A72-12431

Discontinuities in electrohydrodynamics, discussing surface charge generation at shock front and shock wave structure determination
05 p0690 A72-16580

Electrofluid-dynamic wind tunnel velocity augmentation by enthalpy addition during expansion at constant static pressure and temperature for aerospace vehicles flight conditions simulation
[AIAA PAPER 72-166] 05 p0645 A72-16831

Powder concentration effects on corona particle charging efficiency of aerosols for electrogasdynamic generators
06 p0760 A72-18335

Multiplex electrohydraulic system for aircraft fly by wire actuators with majority voting and pressure logic, discussing frequency response and environmental tests
08 p1113 A72-22152

Incompressible fluid jet propagation beyond charged particle source exit section, investigating electrohydrodynamic interaction parameter
10 p1522 A72-24549

Electrogasdynamic generator nonlinear internal resistance determination as function of flow parameters and model geometry via boundary conditions formulation
18 p2643 A72-35998

Weak waves, characteristics, and the problem of flows past slender profiles in electrohydrodynamics
18 p2716 A72-36896

Discontinuities in electrohydrodynamics, discussing surface charge generation at shock front and shock wave structure determination
19 p2834 A72-37551

Dynamics of stratified liquids in the presence of space charge.
19 p2788 A72-38432

Equations of plane potential electrohydrodynamic flow, noting jet and quasi-one dimensional flows of charged particles in curvilinear electrostatic field
22 p3210 A72-42269

ELECTROJETS

NT AURORAL ELECTROJETS
NT EQUATORIAL ELECTROJET

Geomagnetic field and AU/AL index variations with UT during international quiet days at high latitudes interpreted as electrojet diurnal redistribution
02 p0217 A72-11930

Eastern and western polar electrojets intensity diurnal variations with respect to universal time
08 p1154 A72-20740

Polar magnetic substorm generation through ionospheric current intensification in westward electrojet localized region, noting interplanetary magnetic field role
08 p1159 A72-21494

AU and AL indices variations effect on geomagnetic field during international quiet days at high latitudes interpreted as electrojet diurnal redistribution
13 p1948 A72-29242

Potential waves generation by transverse current in ionospheric electrojet region, discussing lower hybrid resonance domain
15 p2232 A72-32732

ELECTROKINETICS

Pitting and film deposits with organic fluid by electrolysis and fluid flow, discussing electrokinetically produced corrosion
[ECS PAPER 84] 07 p1010 A72-18802

Turbulent flow velocity and pressure fluctuations mean square values measurement by electrokinetic probe based on electrical properties of double metal-fluid interface layer
10 p1480 A72-24204

Kinetics of impact-radiative ionization and recombination
23 p3318 A72-43296

ELECTROLUMINESCENCE

Electroluminescent image converter with positive optical feedback, investigating steady state bistable operation mode stability
02 p0193 A72-12341

Light emitting diodes for efficient conversion of electrical energy into electromagnetic radiation, discussing photometry, electrical injection, electroluminescence, design and applications
08 p1141 A72-21430

Electroluminescent image converter with positive optical feedback, investigating steady state bistable operation mode stability
08 p1143 A72-21947

Noise in optical output of small area electroluminescent GaAs diffused junction diodes, comparing with theoretical shot noise limit
09 p1286 A72-23087

Temperature effects on blood electroluminescence, relating luminescence peaks to protein and lipid molecular structure changes
09 p1268 A72-23694

Electroluminescent matrix display system with amorphous semiconductor threshold switches for isolation and memory, discussing performance and address waveforms
12 p1788 A72-27239

Near junction doping characteristics of p-n GaP red emitting diodes by scanning electron microscope correlated with electrical and electroluminescent measurements
15 p2208 A72-32521

Coherent orange emission and bright electroluminescence from indium gallium phosphides vapor grown p-n junction laser diodes
15 p2251 A72-32532

Semiconductor quadrupole optical links consisting of electroluminescent diode and photoreceptor, discussing operation and design principles
17 p2594 A72-34333

Minority-carrier trapping and the luminescence time response of semiconductors.
19 p2844 A72-37946

ELECTROLUMINESCENT LAMPS
U ELECTROLUMINESCENCE
U LUMINAIRES

ELECTROLYSIS

Pitting and film deposits with organic fluid by electrolysis and fluid flow, discussing electrokinetically produced corrosion
[ECS PAPER 84] 07 p1010 A72-18802

Dislocation bands in electrolytically hydrogen charged fcc Ni-Co alloy, describing band structure in terms of band axis and planes and Burgers vector
11 p1669 A72-26947

Electrochemical conditions for separation of gamma prime phase from heat resistant Ni alloys by electrolysis
12 p1828 A72-27446

Electron microscope study of hard alloy surface layer formation characteristics during diamond grinding with electrolysis
12 p1814 A72-27766

Integrated water vapor electrolysis oxygen generator and hydrogen depolarized carbon dioxide concentrator development.
[ASME PAPER 72-ENAV-7] 20 p2896 A72-39170

Six-month test program of two water electrolysis systems for spacecraft cabin oxygen generation.
[ASME PAPER 72-ENAV-5] 20 p2896 A72-39172

Electrolytic and nonelectrolytic diffusion methods for protective coatings production from gas, liquid or solid phase, discussing wear resistance enhancement in boridized steels
20 p2929 A72-39449

Regeneration of oxygen from carbon dioxide and water.
24 p3375 A72-45183

ELECTROLYTE METABOLISM

Antinatriuretic effect of acute thoracic and abdominal inferior vena cava constriction on arterial pressure, renal hemodynamics and electrolyte excretion
02 p0157 A72-11660

Active Na-K transport and passive permeability temperature adaptation in ground squirrel erythrocytes
04 p0475 A72-15546

Body thermal stress, local heating and arterial occlusion effects on sweat electrolyte content
07 p0929 A72-19437

Cardiovascular and respiratory responses to intraarterial injection of K and Na ions in dogs for peripheral receptor site determination
07 p0921 A72-20177

Aortic constriction and release effects on kidney glomerulotubular balance in saline- and water-loaded dogs, studying sodium reabsorption changes
08 p1115 A72-21084

Multihour immersion effects on blood plasma protein and electrolyte concentration in trained and untrained subjects
12 p1770 A72-27480

Sleep deprivation effects on diurnal urine potassium excretion, showing individual circadian rhythm variations
13 p1904 A72-29320

Hypokinesia effect on fluid and electrolyte metabolism change patterns in rabbits from blood plasma studies
14 p2075 A72-30389

Potassium, sodium and calcium ion distribution in skeletal muscle subcellular organelles, discussing lipid, protein and nucleic acid binding
14 p2076 A72-30670

Electroretinographic illumination potentials dependence on extracellular chloride ion concentration in isolated frog retina
15 p2186 A72-32491

Weightlessness effects on calcium and electrolyte metabolism from measurements during Gemini 7 flight, using dietary control and excreta collection techniques
16 p2355 A72-33552

Effect of Acetazolamide /Diamox/ at different dose levels on survival time of rats under acute hypoxia and

on Na/+/K/+/ATP-ase activity of rat tissue microsomes.
17 p2499 A72-34546

Changes of intracellular myocardial electrolytes in experimental hypertension.
17 p2501 A72-34984

Ion alterations during myocardial ischemia.
17 p2502 A72-34994

Interrelationship of hemodynamic alterations of valvular heart disease and renal function - Influences on renal sodium reabsorption.
19 p2756 A72-37872

Sweat depression during controlled hyperthermia in man - Effects on the sweat rate and sweat electrolytes
20 p2892 A72-39591

Respiratory effects of hypochloremic alkalosis and potassium depletion in the dog.
21 p2997 A72-40418

Effects of simulated high altitude on renin-aldosterone and Na homeostasis in normal man.
21 p3005 A72-40422

Excitation contraction correlates in true ischemia.
23 p3255 A72-43814

Capillary circulation as a regulator of sodium reabsorption and excretion.
23 p3257 A72-43995

Increased fluid turnover and the activity of the renin-angiotensin system under various experimental conditions.
23 p3257 A72-43997

Metabolism of angiotensin II in sodium depletion and hypertension in humans.
23 p3257 A72-43998

Intracellular potassium in cells of the distal tubule.
24 p3373 A72-45231

Relationship of sodium deprivation to +Gz acceleration tolerance.
24 p3377 A72-45653

Response to daily lower body negative pressure /I.B.NP/ exposure -/70mm Hg/, with emphasis on plasma renin activity, sodium and potassium excretion.
24 p3377 A72-45658

ELECTROLYTES

NT ION EXCHANGE MEMBRANE ELECTROLYTES
NT MOLTEN SALT ELECTROLYTES

Electrochemical machining electrode processes thermodynamic and kinetic characteristics, discussing temperature, electrolyte viscosity and flow rate and current density effects on metal removal rate
04 p0526 A72-14475

Transport processes in electrolytic solutions, considering current and potential distributions in localized corrosion
04 p0536 A72-15737

Current reversal effect on anodic aluminum oxide film prepared in phosphate electrolyte, using electron microscope and isotopic labeling
05 p0667 A72-17056

Book on electrochemical machining covering metallurgical effects, electrolytes, tool design, rotating surfaces and operating costs
06 p0821 A72-17819

High temperature and ZrO2 ceramic electrolyte effects on ionic partial conductivity and fuel cells longevity
06 p0760 A72-18337

Electrolyte flow rate, electric current intensity and tool electrode shape influence on surface finish quality in precision electrochemical machining
08 p1175 A72-21044

Anodic dissolution of metals during electrochemical precision processing, studying electrolyte composition and flow and mixing rates
11 p1640 A72-26255

Electrochemical metal precision processing, discussing steels carbon content, surface purity, electrolyte anion composition and anode potential
11 p1640 A72-26256

Electrolyte temperature, pH and mixing rate effects on anodic dissolution of steels and brass in electrochemical precision processing, using thermokinetic data processing
11 p1640 A72-26257

Floodrode gap current and temperature distributions during electrochemical precision processing of metals, studying gas and electrolyte flow
11 p1613 A72-26258

Metal surface smoothing during electrochemical dissolution prior to polishing, involving electrolyte diffusion processes or semiconductor oxide film formation
11 p1640 A72-26259

Ti alloys processability by electrochemical method, showing output rate and surface quality improvement from increased current density and electrolyte temperature
11 p1640 A72-26261

Electrolyte hydrostatic pressure measurement in limited volume biological compartments by fluid filled glass micropipette used in microtransducer capacity
11 p1587 A72-26623

Sintered WC effects on fuel cell electrochemical oxidation in acid electrolytes, analyzing hydrogen,

hydrazine, formaldehyde, acetaldehyde, formic acid and carbon monoxide fuels

16 p2351 A72-33882

Cubic stabilized zirconia utilization as solid electrolyte in high temperature fuel cell system for efficient and economical energy conversion

16 p2352 A72-33894

Destabilization and aging mechanisms for ionic conductivity decrease in stabilized zirconia type electrolytes, discussing yttria stabilization

16 p2361 A72-33895

Normal, highly conducting and ion-exchanging solid electrolytes structure and conductivity, with particular attention to rechargeable silver halide batteries

16 p2352 A72-33899

Thermal conductivity measurements of nickel-cadmium aerospace cells. II - Component conductivities.

21 p2997 A72-40841

The effect of some electrolytes on the stress corrosion cracking of AISI 4340 steel.

22 p3195 A72-43128

Thermal diffusion annealing improved Ni-B composite electrolytic coatings with uniform B distribution over bulk matrix

23 p3303 A72-44012

The problem of decontaminating and preserving drinking water in spacecraft water supply systems

24 p3375 A72-45121

ELECTROLYTIC CELLS

Electrochemical oxidation and classification of fuel cells according to electrolyte, electrode, fuel, catalyst and temperature

16 p2351 A72-33877

Quinones as reversible redox couples for rechargeable cathodes, noting air regeneration capacity in organic electrolytes

16 p2352 A72-33898

Isobar-isothermal potentials, entropy and formation heat of chromium silicides from thermoelectromotive force measurements of high temperature galvanic elements

23 p3298 A72-43286

Regeneration of oxygen from carbon dioxide and water.

24 p3375 A72-45183

ELECTROLYTIC GRINDING

U ELECTROCHEMICAL MACHINING

ELECTROLYTIC POLARIZATION

Monograph on fuel cells covering thermodynamics, electrode polarization principles, electrocatalysis, system requirements, operational principles and applications

10 p1423 A72-24700

The aluminum electrode in AlCl₃-alkali-halide melts.

21 p3013 A72-40844

ELECTROLYTIC POLISHING

U ELECTROPOLISHING

ELECTROMAGNETIC ABSORPTION

NT AURORAL ABSORPTION

NT PHOTOABSORPTION

NT POLAR CAP ABSORPTION

NT ULTRAVIOLET ABSORPTION

NT X RAY ABSORPTION

Transparent fused silica wall irradiation induced optical absorption and heat deposition in nuclear light bulb engine

01 p0103 A72-11356

Lower ionospheric nighttime absorption as ionization processes indicator, discussing relationship to geomagnetic activity

02 p0216 A72-11921

Nighttime ionospheric radio wave propagation, determining geomagnetic latitude variations effects on absorption and reflection

02 p0218 A72-11944

Midlatitude ionospheric radio wave absorption measurements, using radio astronomical polarization method

02 p0172 A72-11945

Cosmic noise ionospheric absorption measurements with riometers, showing mid and low latitudinal variation

02 p0221 A72-12464

Nighttime hf radio wave field intensity measurement and absorption observation by narrow band receiver

02 p0184 A72-12874

Ray path and absorption calculation for mf and hf radio wave oblique propagation through model ionosphere in nighttime, noting E region ionization role

02 p0184 A72-12875

Sunspot cycle 1958/70 effects on D region ionospheric absorption and stratospheric temperature measured by radiosonde

03 p0345 A72-12978

Sudden cosmic noise absorption from D region N-h profile during solar X ray flares on 13 April 1966

04 p0566 A72-14512

Light wave electric field Franz-Keldysh effect on GaAs absorption edge, using electroabsorption, electroreflectance and photoconductivity spectrum and internal photoeffect analysis

04 p0561 A72-14621

Planetary magnetic activity effects on hf cosmic noise absorption measurements at low and temperate latitudes

04 p0516 A72-14941

Ionospheric absorption measurements at 2.2 MHz by vertical incidence pulse sounding method, observing diurnal and seasonal variations

04 p0518 A72-14965

Ionospheric radio absorption, observing diurnal and seasonal variations and sunspot numbers and solar flares effects

04 p0518 A72-14966

Anomalous changes in ionospheric radio absorption during winter at midlatitudes, investigating diurnal and seasonal variations and stratospheric warming

04 p0518 A72-14967

Laser light beam attenuation, considering turbulent pulsation effects in closed channel fluid flow axial region

04 p0530 A72-14989

Electromagnetic absorption heating in cold randomly inhomogeneous plasma, discussing consequences of thermal particle motion neglect

04 p0489 A72-15393

Vibration-rotation double resonance transitions in symmetrical top molecules in millimeter range under chopped laser radiation

04 p0532 A72-15615

D region ionization by electron fluxes as explanation for latitudinal radio wave absorption

05 p0656 A72-16249

Radio wave absorption during oblique propagation through ionosphere from vertical measurements, using rhombic antenna at 25 MHz

05 p0657 A72-16267

Slant incident electromagnetic wave absorption in linear plasma layers due to field swelling in resonance region

05 p0627 A72-16403

Diurnal variation of lower ionosphere, analyzing nature and behavior of absorption long range variations over solar activity cycle

05 p0660 A72-17182

Data transmitting dielectric light waveguide production problems, noting light scattering and absorption losses due to glass material impurities

06 p0825 A72-17774

Narrow light beam attenuation and scattering characteristics in turbid medium as function of distance from source from transport equation solution

06 p0774 A72-17938

Ionospheric absorption and atmospheric planetary scale waves fluctuations correlation

06 p0808 A72-18090

Neutral interstellar hydrogen atoms mean volume density from Lyman alpha absorption and radio measurements in solar region

06 p0886 A72-18098

Light beam time stationary multifocal structure in medium with Kerr type nonlinearity, relating maximum energy density and absorption coefficients

07 p0944 A72-19635

Coupled coherent and incoherent excitons motion effect on optical absorption line shape, deriving diffusion equation from density matrix equation of motion

07 p1035 A72-19672

Ground plane absorption coefficient effects on admittance of slot antenna radiating into warm lossy plasma

07 p0957 A72-19797

Optically pumped semiconductor lasers, discussing two photon absorption, emission from compounds and mixed crystals and smooth frequency variation

07 p1006 A72-20118

Plasma diagnostics using carbon dioxide laser absorption and interferometry, comparing electron densities with shock data

07 p1008 A72-20565

Plane electromagnetic wave reflection from conducting convex cylinder in radially inhomogeneous absorbing medium, deriving equations for beam trajectories calculation

08 p1131 A72-20742

Electromagnetic wave diffraction on arbitrary spheres, calculating scattering cross sections and attenuation by four water droplets

08 p1131 A72-20789

Steady phase direction at time of electromagnetic wave transmission from one isotropic absorbing medium to another

08 p1132 A72-21221

Optical absorption in UV and IR of proton bombarded potassium chloride at liquid nitrogen temperature attributed to trapped protons

08 p1211 A72-21249

Wind and density measurements by small sounding rockets, comparing results with ground observed radio wave absorption diurnal variations

08 p1160 A72-21531

D region neutral gas winds, density changes and short wave radio absorption correlation, determining air mass flow rates from chaff fall rate measurements

08 p1160 A72-21532

Temperature dependence of intrinsic light absorption band edge characteristics in p-type InSb

09 p1366 A72-22213

D region neutral gas winds, density variations and short wave absorption, determining correlation from ultralight chaff and absorption measurements at 2.83 MHz

09 p1277 A72-22374

Diurnal, seasonal and solar cycle variations in cosmic noise absorption during 1957-1966, showing various ionospheric layers contribution

09 p1385 A72-22586

Light absorptivity measurement in low loss liquid with interferometer based on refractivity dependence on temperature change due to absorption

09 p1309 A72-22602

Atmospheric refraction effects on IR far field irradiance distribution based on model of nonlinear interaction including absorption, transverse flow and vibrational relaxation effects

09 p1350 A72-22607

Electronic transition between energy bands as explanation for two optical absorption maxima in rare earth metals

09 p1369 A72-22609

Random gravitational plane wave metric effect on electromagnetic wave mean value, noting light dispersion and attenuation

09 p1351 A72-22682

Neutral density glass collimating absorption lens for ideally uniform laser beams production

09 p1315 A72-23347

Current-optical effects of anisotropic absorption of polarized and unpolarized light in rarefied cosmic media

10 p1525 A72-23763

French monograph on riometer measurement of abnormal ionospheric absorption, noting nighttime events association with F region lacunae

10 p1472 A72-23848

Internal Q switching and long time delay emission in electron beam excited p-type and n-type GaAs lasers, indicating optical absorption traps

10 p1489 A72-23947

High intensity laser radiation absorption in plasma produced from thick metal targets and thin Au foil

10 p1490 A72-23967

Ionization kinetics influence on light absorption zone behind plane stationary shock wave in hydrogen

10 p1467 A72-24358

Daytime electron density profile in E and D regions from rocket lower ionosphere sounding, noting winter electromagnetic absorption anomaly

11 p1622 A72-26101

Ionospheric radio wave absorption and intensity calculation, using vertical sounding data and riometric measurements

11 p1594 A72-26278

Light absorption and scattering factors in whole blood related to hemoglobin concentration, discussing oxygen saturation, cardiac output and pathological conditions

11 p1588 A72-26630

Evanescent photons absorption and emission in light excited molecules fluorescence

11 p1691 A72-26745

Electromagnetic wave transformation and absorption in Ar plasma with nonmonotonic longitudinal density distribution

11 p1699 A72-26758

Light absorption by molecular crystals with dual zone of exciton states

12 p1847 A72-27226

Dual resonant cavity absorption cell composed of Fabry-Perot interferometers excited by microwave sources, observing spectroscopic double resonance effects

12 p1806 A72-27264

Power resonance and frequency stabilization of gas laser with nonlinear absorption cell, considering He-Ne laser with Fabry-Perot resonator

12 p1820 A72-27584

Gas laser with strong absorption saturation to obtain high peak power and frequency self stabilization by generation of quasi-traveling wave in resonator

12 p1820 A72-27585

Radio attenuation by rain at 37 GHz using sun as source compared with sky emission observations, noting apparent absorber temperature effect

12 p1783 A72-27665

Intergalactic extinction relationship to large galactic clusters from statistical analysis of fourth and fifth Zwicky catalogs

12 p1872 A72-27759

Ionospheric absorption measurements during sunspot cycle at fixed frequencies, noting monthly and seasonal variations

12 p1804 A72-27782

Light propagation patterns in absorbing and scattering medium with radiation density dependent optical properties

13 p2002 A72-28510

Upper atmosphere particle flux density determined from nocturnal electromagnetic absorption caused by

geomagnetic storms, noting ionization process time lag in lower ionosphere
13 p1945 A72-28580

Ionospheric radio adsorption measuring device with readout data convenient for visual and computer processing, discussing block and circuit diagrams
13 p1955 A72-28602

Wave equations and photon absorption cross section of relativistic electron in magnetic field, taking into account relativistic energies
13 p2002 A72-28647

Electromagnetic wave absorption in warm homogeneous plasma under static magnetic field parallel to surface, taking into account plasma-vacuum boundary conditions
13 p2012 A72-29123

Lower ionospheric nighttime absorption as ionization processes indicator, discussing relationship to geomagnetic activity
13 p1948 A72-29233

Nighttime ionospheric radio wave propagation, determining geomagnetic latitude variations effects on absorption and reflection
13 p1949 A72-29256

Midlatitude ionospheric radio wave absorption measurements, using radio astronomical polarization method
13 p1920 A72-29257

Diurnal and seasonal variations of ionospheric absorption in D and E regions, discussing blanketing sporadic E presence effect
13 p1922 A72-29392

Enhanced indirect optical absorption measurement in AlAs and GaP with energy denominator variation for direct band gap evaluation
13 p2022 A72-29627

Optical weak absorption measurements in amorphous semiconductors AsS, GeAs and GeSbSe, showing dependence on band gap localized states
13 p2022 A72-29629

Ionospheric absorption measurement by 1F mode field strength recording with A3 circuit at 6 MHz, noting diurnal and seasonal variations
13 p1952 A72-29660

Ionospheric multifrequency absorption measurement description by empirical expressions in terms of E layer critical frequency, solar activity and seasonal effects
13 p1952 A72-29667

IR absorption coefficients in air at 6000-8500 K and 40-95 atm, interpreting absorption due to free-free electron transitions in neutral particle fields
13 p2006 A72-29676

Steady state laser mode locking with saturable absorber, describing pulse shape and amplitude as function of quantity of absorbing medium
14 p2111 A72-30793

Ionospheric radio waves absorption and stratosphere temperature variations with respect to season and sunspot cycles, examining 1963-5 winter anomaly
15 p2195 A72-31555

IR absorbent effects on evaporographic image contrast performance based on photometric study, presenting color photographs
15 p2188 A72-31615

Physical interpretation of electromagnetic waves attenuation function HF singularity during diffraction over spherical surface, applying to short wave diffraction in tropospheric model
15 p2195 A72-31651

Photon loss coefficients and gain measurement in CdS electron beam pumped lasers, noting absorption mechanism and efficiency
15 p2246 A72-31668

Long term A3 absorption associated with nuclear explosion caused artificial radiation belts, discussing electron precipitation role in D region ionization
15 p2299 A72-31933

Attenuation rate of electromagnetic waves for dominant E1,F and V1,F modes of earth crust waveguide
15 p2200 A72-32110

Air pressure effects on absorption dependence at IR wavelengths, using water vapor transmittance windows
15 p2202 A72-32657

Born approximation for resonance bremsstrahlung emission and photon absorption cross sections at electron-ion scattering, solving multiparticle problem
15 p2279 A72-32697

Earth crust waveguide three layer model for electromagnetic wave propagation, showing mode relation to absorption conditions
16 p2362 A72-33074

Mathematical models for radio attenuation in ice by electromagnetic absorption and reflection from interfaces, noting radar tracking
16 p2363 A72-33290

Field distribution and absorption coefficient calculations for normal incidence of extraordinary electromagnetic wave on linear plasma layer in hybrid resonance region
16 p2363 A72-33480

Narrow light beam attenuation and scattering characteristics in turbid medium as function of distance from source from transport equation solution
16 p2426 A72-33779

On the winter anomaly of ionospheric absorption.
17 p2546 A72-34695

The magnetic control of the lower ionospheric absorption at lower latitudes.
17 p2546 A72-34697

Ionization kinetics influence on light absorption zone behind plane stationary shock wave in hydrogen
17 p2539 A72-34957

Linear transformation and absorption of electromagnetic waves in plasma
17 p2591 A72-35165

Saturated absorption in optically pumped semiconductor lasers
17 p2563 A72-35303

Determination of electron concentration profiles in the lower ionosphere from the absorption at several frequencies
17 p2551 A72-35863

Height of the region of principal auroral radio-wave absorption in the presence of a sporadic E layer
17 p2519 A72-35869

Laser IR radiation attenuation in natural and artificial fogs, noting dependence on particle size distribution
18 p2697 A72-36102

Sunspot control of ionospheric absorption.
18 p2686 A72-36231

Vibrational relaxation of the bending mode of shock-heated CO2 by laser-absorption measurements.
18 p2697 A72-36562

Signal reflection height seasonal variations effect on radio waves absorption estimation from vertical ionospheric sounding
18 p2662 A72-36881

Amplitude limits to the theory of resonant absorption in cold plasmas.
18 p2716 A72-36960

Absorption of the 4- to 6-millimeter wavelength band in the atmosphere.
18 p2689 A72-36961

Attenuation of X rays in interstellar space.
19 p2852 A72-38600

D-region electron densities and collision frequencies from Faraday rotation and differential absorption measurements.
19 p2793 A72-38858

Atmospheric pressure, density and scale height calculated from H Lyman-alpha absorption allowing for the variation in cross-section with wavelength.
19 p2793 A72-38859

An ultra-broadband probe for RF radiation measurements.
20 p2921 A72-38993

On the physical nature of cosmic electromagnetic absorption. V - The Einstein-de Sitter cosmology with plasma coupled to radiation at non-relativistic temperature.
20 p2967 A72-39185

On the physical nature of cosmic electromagnetic absorption. VI - The Einstein-de Sitter cosmology with plasma coupled to radiation at relativistic temperature.
20 p2967 A72-39186

Light attenuation coefficient measurement in water of various turbidity with AR and Kr lasers, interpreting results by Mie scattering theory
20 p2931 A72-39270

Antiferromagnetic dispersion, absorption and light scattering in NiO and other face centred cubic crystals.
20 p2960 A72-39458

Spectral characteristics of a single-frequency argon laser with an absorbing film.
20 p2932 A72-39509

On the diurnal and seasonal variations of the D- and E-regions above Kjeller.
20 p2917 A72-39529

HF absorption of electromagnetic field in ionized oxygen plasma as function of dc discharge current
20 p2958 A72-39969

Energy absorption mechanisms of thin film optical waveguide surface in contact with low index dyes
21 p3050 A72-40147

Numerical analysis of microwave heat generation in disc-shaped Luneberg lenses.
21 p3032 A72-40627

Populating excited states of incoherent atoms using coherent light.
21 p3088 A72-40778

Measurements of enhanced absorption of electromagnetic waves and effective collision frequency due to parametric decay instability.
21 p3092 A72-40829

Resonance absorption of laser emission by methane behind the shock front
21 p3063 A72-40986

Magneto-microwave free-carrier absorption in germanium in the Faraday configuration.
21 p3097 A72-41379

Absorption of an obliquely incident extraordinary wave in a weakly inhomogeneous plasma in the hybrid resonance region
21 p3095 A72-41694

Solar radiant energy reflection and absorption by cloud layers
21 p3049 A72-41795

The effect of cloud scattering on the absorption of solar radiation by atmospheric dust.
22 p3201 A72-42512

Noncoherent scattering probabilistic formulation in terms of mean intensity averaged over absorption profile and mean scatterings number required for photon escape
22 p3206 A72-42559

Respiratory chain components correlation to tension production at various oxygen pressures in guinea pig ductus arteriosus, investigating light absorption changes
22 p3144 A72-42670

Influence of nonuniformities of the built-in field on the collection efficiency of a semiconductor photocell
22 p3140 A72-43190

Gas absorption lines detection based on multiple light passage through absorbing medium during generation process, noting radiation spectra of neodymium glass laser
23 p3295 A72-43305

Wave attenuation during plasma propagation, discussing particle collisions, absorption effect on geometric optics and linear mode coupling in cold magnetized plasma
23 p3320 A72-43519

Absorption profile of a planetary atmosphere - A proposal for a scattering independent determination.
23 p3289 A72-43889

Ultrasensitive response of a CW dye laser to selective extinction.
23 p3297 A72-44186

Stimulated entropy /temperature/ scattering and its influence on stimulated Mandelstam-Brillouin scattering
23 p3297 A72-44478

Photoionization and photoabsorption cross sections of CO2 at 584 Å.
23 p3317 A72-44519

Quadruple conjugate pair observations of the sudden commencement absorption event on June 17, 1965.
23 p3286 A72-44526

Light beam time stationary multifocal structure in medium with Kerr type nonlinearity, relating maximum energy density and absorption coefficients
24 p3408 A72-44567

Upper atmosphere particle flux density determined from nocturnal electromagnetic absorption caused by geomagnetic storms, noting ionization process time lag in lower ionosphere
24 p3397 A72-45080

Ionospheric radio absorption measuring device with readout data convenient for visual and computer processing, discussing block and circuit diagrams
24 p3402 A72-45102

Wave and polarization equations for short coherent light pulses transmission in linear amplifying and absorbing media, noting single pulse formation in lasers
24 p3410 A72-45420

Attenuation of ruby laser radiation in the boundary layer of the atmosphere during the temperature-dependent variations of the wavelength
24 p3411 A72-45424

Investigation wave transformation and absorption by a plasma in the upper hybrid frequency range
24 p3429 A72-45491

Nonlinear instability of Bernstein modes pumped by an electromagnetic wave.
24 p3430 A72-45571

Control of laser pulse duration by nonlinear absorption in semiconductors.
24 p3411 A72-45605

ELECTROMAGNETIC COMPATIBILITY
Electromagnetic compatibility - IEEE Conference, Philadelphia, July 1971
03 p0323 A72-14027

Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC radar beacon system transponders
03 p0324 A72-14033

Mathematical modeling methodology for communication receiver life cycle EMC decisions, considering analysis and prediction problems with emphasis on nonlinear circuits and systems
03 p0324 A72-14034

Computer aided intrasystem electromagnetic compatibility prediction programs, discussing mathematical models and program philosophies
03 p0328 A72-14039

Aircraft electric power equipment transient voltage and EMC limits specifications
03 p0312 A72-14043

EMC criteria for sharing frequency bands between communication satellite and terrestrial microwave radio relay systems
03 p0324 A72-14045

Time discrimination utilization in EMC, considering automatic position telemetering system using time division technique

03 p0325 A72-14047

Pioneer F and G space probe EMC specification limits, comparing computer analysis prediction and system test data

03 p0329 A72-14048

EMC improvement with least sacrifice of power efficiency in designing dc/dc converters and switching voltage regulators

03 p0312 A72-14049

Electromagnetic compatibility system design checklist, noting usefulness to project personnel [SAE AIR 1221]

11 p1604 A72-26026

EMC at the crossroads; International Electromagnetic Compatibility Symposium, Arlington Heights, Ill., July 18-20, 1972, Record.

20 p2901 A72-38976

Electromagnetic compatibility and interference problems of radar altimeters, collision avoidance systems and air and marine mobile satellite communication equipment in 1600 MHz region

20 p2901 A72-38977

Sensor selection for electromagnetic instrumentation system with sufficient sensitivity and bandwidth to demonstrate electroexplosive device compliance with MIL-E-6051D specified safety margin

20 p2962 A72-38979

Probability density - A new approach to system electromagnetic compatibility testing of digital circuits.

20 p2906 A72-38980

Electromagnetic compatibility enhancement during functional integration and operation of transmitters and receivers in digital communication systems

20 p2901 A72-38983

Electromagnetic compatibility problem of RF oscillators and switching operations in power network as interference source, discussing transmission line shielding and coupling impedance

20 p2901 A72-38988

Some new methods of performing low frequency EMC measurements.

20 p2921 A72-38995

Collision avoidance system electromagnetic compatibility with radar altimeters designed for 1600 MHz aeronavigation band

21 p3018 A72-40881

Book - EMI prediction and analysis techniques.

22 p3156 A72-43198

ELECTROMAGNETIC CONTROL

U ELECTROMAGNETS

U REMOTE CONTROL

ELECTROMAGNETIC DEDUCTION

U MAGNETIC INDUCTION

ELECTROMAGNETIC FIELDS

NT FAR FIELDS

Radio signals information capability estimation during propagation through electromagnetic fields, using pulse amplitude modulation

01 p0065 A72-10446

Earth surface roughness effects on vertical Hertz dipole electromagnetic field reflection

01 p0027 A72-10447

Reflector antennas with very high front-to-back ratio - Theory and experiments on models.

01 p0029 A72-10673

Subsurface electromagnetic fields of current carrying cable line source on flat earth conducting half space, considering mine rescue operations

01 p0060 A72-10840

Soviet book on electromagnetic fields and waves covering propagation in anisotropic media, waveguides and cavity resonators, diffraction interactions, etc

01 p0031 A72-11200

Microwave measurements of plasma parameters in medium pressure gas discharges in absence of constant magnetic field and in weak electromagnetic field

01 p0072 A72-11215

Monochromatic electromagnetic field diffraction problems in homogeneous medium, presenting computer aided numerical analysis

02 p0171 A72-11690

Null electromagnetic field propagation in general relativity, applying to Stokes parameters definitions for monochromatic light

02 p0259 A72-12178

Closed rectangular cavity resonator with conducting walls, calculating differences of electromagnetic zero point fluctuation radiation pressure

02 p0260 A72-12434

He-Ne laser active medium excitation and resonator geometry effects on TEM wave field

02 p0239 A72-12520

Electromagnetic fields calculation in one dimensional resonator with moving boundaries, considering orthogonal dynamic modes

02 p0195 A72-12591

Charged particle motion in pulsar electromagnetic fields, discussing coherent synchrotron radiation and charge bunching

03 p0438 A72-13874

Antenna arrays near-field radiation pattern prediction, using Harrington matrix methods

03 p0323 A72-14030

Spatial dispersion effects in crystal optics, obtaining dispersion law for normal waves in crystals via electromagnetic field tensor equations

04 p0548 A72-14739

Electromagnetic fields produced by quasi-stationary gravitational collapse of uniformly rotating current carrying relativistic thin disk

04 p0579 A72-15321

R-function theory application for solution of boundary value problems in electrodynamics, considering field behavior at infinity

04 p0488 A72-15377

Light transmission in medium with random inhomogeneities in Markov random process approximation, obtaining short wave field statistical characteristics

04 p0488 A72-15380

Nonlinear phenomena in transition region through resonance of dense inhomogeneous plasma in alternating electromagnetic field

04 p0489 A72-15390

Electromagnetic fields and energy flow lines in waveguide bifurcations with arbitrary passive terminations

04 p0489 A72-15392

Network formulations of electromagnetic fields in moving dispersive plasma media by equivalent parameter representation

04 p0490 A72-15400

Electromagnetic surface field propagation on dielectric wedge excited by line source, using steepest descent method

04 p0491 A72-15419

Self consistent theory of waves in fluctuating plasma, discussing Klimontovich-Maxwell electromagnetic field equations uniqueness solution and kinetic equation

04 p0493 A72-15449

Semiconductor-dielectric system for controlling space charge and valley population redistribution by external field

05 p0702 A72-16201

Monograph on semiclassical gas laser theory covering electromagnetic fields, atomic polarization, multimode theory, traveling- and standing-wave laser principles, collision effects, etc

05 p0668 A72-16398

Inverse electromagnetic field problem for one dimensional resonator, determining size change from intrinsic mode

05 p0627 A72-16408

HF electromagnetic field spectrum in one dimensional plasma cavity in pressure balance for arbitrary density

05 p0696 A72-16604

Transport coefficients of electron gas in electromagnetic field, using Grad thirteen moment method

05 p0697 A72-17005

Electromagnetic and electroacoustic near zone fields of linear antenna in plasma measured by diagnostic probe

05 p0700 A72-17232

Stability of weakly ionized homogeneous plasma placed in weak microwave field and in constant magnetic field, expressing growth increments of longitudinal waves

06 p0861 A72-17902

Cosmic rays generation by charged particles acceleration in electromagnetic constant crossed fields during magnetic stars contraction to neutron star dimensions

07 p1056 A72-19042

Scattering properties of conducting cylindrical obstacle in rectangular waveguide, deriving scattered field integral representation via Green function

07 p0944 A72-19593

Tensor analysis of electromagnetic energy localization in space, generating gravitational field and space curvature via equation to Einstein tensor

07 p1035 A72-19685

Taylor type antenna radiation distribution for aperture edge behavior realization in E or H planes

07 p0945 A72-19785

Kinetic equations for laser active medium disturbances and electromagnetic field modes in cavities with losses

07 p1006 A72-20117

Spectral distributions of laser emission as dynamic variables of electromagnetic field modes and active medium excitations, using perturbation theory

07 p1007 A72-20120

High performance shock tube using electromagnetically compressed and heated driver gas

07 p0965 A72-20559

Altitude dependence of vlf field of vertical electrical dipole in spherical waveguide of radially inhomogeneous ionosphere and earth, using Sommerfeld integral representations

08 p1130 A72-20736

Kirchhoff method application to asymptotic solution of plane wave diffraction on dielectric conical shells, calculating electromagnetic field vector

08 p1131 A72-20931

Electromagnetic field around thin linear receiving antenna by superposition of incident wave with antenna scattered field, deriving differential equations solution for field lines

08 p1132 A72-21327

Schwartz method application to stripline fields and impedance calculations for different cross sections and internal conductor dimensions

08 p1133 A72-21370

Asymptotic expressions for electromagnetic field and currents induced in unbounded dense plasma by relativistic electron beam passage

08 p1215 A72-21721

Electromagnetic potentials excited by dipole oscillator moving in homogeneous uniformly drifting medium, analyzing frequency spectrum and finite dimensions effect on higher harmonics

08 p1135 A72-21736

Group and symmetry theory application to degenerate mode splitting in magnetron cavity systems with electromagnetic fields disturbances

08 p1142 A72-21740

Transverse electromagnetic field and electron velocity vectors during rectangular pulse incidence on ionization front moving at light speed, describing steady state encounter region

08 p1136 A72-21741

Impulse-energy tensor for heat flow-crossed continuum subjected to electromagnetic field, using energy balance and quantity of movement equations

09 p1351 A72-22673

Electromagnetic field forces on finite conducting bodies, discussing heating rates and temperatures with ambient air convection and machine design recommendations

09 p1359 A72-22679

Gas discharge plasma detection characteristics, examining electron and ion densities and collision rates dependence on electromagnetic field frequency and amplitude

09 p1361 A72-22956

Fixed frequency or wideband real time measurements of microwave reflection and transmission coefficients and fields in open or closed structures

09 p1289 A72-23425

Flat electrically conducting screen with periodic filamentary structure as possible analog converter of electromagnetic field information

09 p1291 A72-23433

Near field characteristics of solid state laser frequency converters emission, determining medium transluence during single pulse excitation of organic phosphors

10 p1490 A72-24052

Electromagnetic field interaction with nonconducting polarizable and magnetizable continuum from theory based on total impulse energy tensor, deriving force density from relativistic balance approximation

10 p1510 A72-24124

Adiabatic transition experimental implementation by molecular beam irradiating field frequency variation

10 p1491 A72-24210

Classical laser theory, investigating anharmonic oscillators interaction with electromagnetic field in resonant cavity

[AD-740404]

10 p1492 A72-24603

1.TE solutions of relativistic Boltzmann equation in presence of external electromagnetic field

10 p1513 A72-24856

Radiative displacement of molecular beam sidebands by spatiotemporal modulation of irradiating RF field

10 p1492 A72-24858

Travel time effects on electron motion in HF electromagnetic fields, reviewing phase focusing and achromatic electron lens development

10 p1513 A72-24976

Plasma column stabilization by constant longitudinal inhomogeneous magnetic and rotating HF electromagnetic fields, noting application to plasma convective instabilities

11 p1694 A72-25786

Electromagnetic wave field effects on cold magnetoactive plasma potential oscillations, solving dispersion equation for sub-ion gyroscopic frequencies

12 p1849 A72-27066

Electromagnetic plane field cumulation by heavy conducting shells implosion with quasi-relativistic velocity, solving Maxwell equations by characteristics method

12 p1851 A72-27396

Linearly and circularly polarized electromagnetic field effective scattering areas relationships, considering radar reflection in reverse direction

12 p1783 A72-27629

Numerical accuracy of electromagnetic field spherical wave expansions, considering horn antenna radiation pattern

12 p1791 A72-27670

Magnetic storm strength ELF electromagnetic field effects on rabbits, dogs and bacteria, discussing changes in EEG, ECG and blood characteristics 12 p1763 A72-28214

Russian book on electrodynamic plasma acceleration covering charged particles motion in electromagnetic field and pulsed, MHD, steady and Hall accelerators 12 p1853 A72-28341

Nonequilibrium carrier distribution in drift junction transistor, considering base region hindering field effect on transit time, current gain cut-off and frequency response 13 p1926 A72-28371

Strong field electromagnetic wave interactions with anisotropic plasmas, considering electron velocity distribution function 13 p2009 A72-28449

Plasma ionization traveling disturbances velocity and spatial structure in strong electromagnetic waves field 13 p1915 A72-28469

Fourier transform solution for fields from current dipole element radiating in free space 13 p1916 A72-28540

Numerical analysis of surface current density distribution and electromagnetic fields of conducting body, noting radiation patterns of radial dipole and quarter wavelength monopole 13 p1916 A72-28541

Beamed radio waves interaction in E and F 1 regions propagation, noting beam width and field amplitude changes caused by defocusing 13 p1945 A72-28579

ELF and VLF waves propagation, deriving ionospheric field stable solutions by modified matrix multiplication technique for vertical geomagnetic field and large local refractivity 13 p1921 A72-29337

Kinetic equations derived for electromagnetic field inside cavity with resonance medium and external source, determining sensitivity thresholds, gain factors and spectral compositions 13 p1969 A72-29677

Variational form to determine equations and boundary conditions for elastic isotropic homogeneous nonferromagnetic body subjected to external load, temperature and electromagnetic field actions 13 p2061 A72-29797

Plasma inhomogeneity in crossed electromagnetic field, comparing motion velocity to ion component transverse drift rate in polarized electric field 13 p2019 A72-29893

Randomized electromagnetic field propagation through uniform medium, deriving autocorrelation and intensity fluctuation spectrum expressions 13 p2007 A72-30124

Kinetic model for electromagnetic field fluctuations in bounded isotropic plasma half space with specular reflection of electrons at boundary 14 p2135 A72-30170

Three layer atmospheric model for neutral gas motion-produced ionosphere and magnetosphere currents, electromagnetic field and charged particle concentration perturbations 14 p2100 A72-30632

Single point thunderstorm ranging method based on two radio frequencies field intensity spectral components ratio 14 p2129 A72-30639

Relativistic plasma particle correlation function based on transverse electromagnetic field energy density treatment by enlarged Bogoliubov hypothesis 14 p2140 A72-30881

High microwave voltage effects on p-i-n junction conductance under inverse dc bias, noting role of hole generation and accumulation by impact ionization 15 p2206 A72-31643

Magnetic dipole or small current loop over homogeneous flat earth, calculating transient electromagnetic field for airborne remote sensing 15 p2224 A72-31672

Optical pulse wave field longitudinal and transverse statistical correlations during propagation in turbulent atmosphere 15 p2198 A72-32061

Optically pumped magnetometer error, predicting atomic g-factor modification by nonresonant RF field 15 p2239 A72-32335

Algorithms for incorporating electromagnetic field into plasma numerical simulation to explain unwanted noise generation rates 15 p2288 A72-32421

Wave packet theory application to multimode laser cavity electromagnetic/optical/field analysis 15 p2251 A72-32649

Magnetron crossed field amplifier multistage frequency multiplier HF field properties, obtaining numerical solutions for nonlinear governing equations 15 p2209 A72-32669

Plasma column formation by interaction with rotating HF electromagnetic field and longitudinal constant magnetic field 16 p2433 A72-32815

Pulsar rotating electromagnetic field vectors classification for magnetosphere models 16 p2450 A72-32866

Electromagnetic field in MHD generator active zone approximated by cruciform plate, calculating secondary fields from Helmholtz equation 16 p2435 A72-33283

Maxwell equations solution for electromagnetic field in circular cylindrical tubes, deriving recursion formulas for computer processing 16 p2364 A72-33668

The perturbation of alternating geomagnetic fields by three-dimensional conductivity inhomogeneities. 17 p2545 A72-34350

The behavior of electromagnetic fields at edges. 17 p2513 A72-34357

Analysis of an optical beam waveguide consisting of a tapered lens-like medium and its applications. 17 p2580 A72-34382

Laplace equation to generate stationary electromagnetic vacuum fields, generalizing from Papapetrou-Majumdar class of static fields 17 p2580 A72-34425

Electromagnetic characteristics of MHD channels with nonconducting walls at finite magnetic Reynolds numbers 17 p2587 A72-34456

Time evolution of a rotating black hole immersed in a static scalar field. 17 p2605 A72-34536

The electromagnetic field generated by an electric dipole in a spherical cavity immersed in a nonlinear plasma 17 p2588 A72-34746

Possible field expansions in open waveguides and resonators 17 p2515 A72-34829

Averaged boundary conditions for a grid consisting of nonparallel and nonrectilinear conductors positioned on a nonplanar surface 17 p2529 A72-34830

Weak electromagnetic fields around a rotating black hole. 17 p2612 A72-35391

Multiphoton ionization of atomic hydrogen in the presence of an intense electromagnetic field. 17 p2586 A72-35827

Magnetized deformable media in general relativity. 17 p2584 A72-35911

Stochastic electrodynamics based on zero electromagnetic field motion, deriving Schroedinger equation and electromagnetic model of gravitation 17 p2584 A72-35912

On the behavior of the electromagnetic field with crests 17 p2584 A72-35913

Anomalous motion of radiating particles in strong fields. 18 p2713 A72-36712

Voltagess induced in superconductors in the absence of transport currents. 18 p2719 A72-36744

Wave propagation and dispersion in space-time periodic media. 18 p2663 A72-37208

Muller entropy principle-imposed restrictions on thermodynamic and thermodynamic constitutive relations for fluids in electromagnetic fields 19 p2834 A72-37843

Altitude dependence of VLF field of vertical electric dipole in spherical waveguide of radially inhomogeneous ionosphere and earth, using Sommerfeld integral representations 19 p2766 A72-38364

Plasma velocity, ion density and electrical conductivity from electron density and temperature and electromagnetic field profile measurements in Ar plasma inverse pinch 19 p2841 A72-38437

Electrically conducting plane screen with periodic filamentary structure as possible analog converter of electromagnetic field information 19 p2782 A72-38516

A general method for integrating the Schroedinger equation with a singular right-hand side in a homogeneous and constant electromagnetic field 19 p2843 A72-38855

Maxwell electromagnetic field theory review, emphasizing relationship between integral forms of Faraday and Ampere laws in conventional space and time concepts 20 p2904 A72-39778

Integral equation for electromagnetic field in diffuse boundary plasma, noting anomalous skin effect 21 p3090 A72-40409

A contribution to the numerical treatment of the electromagnetic field /H-polarization/ in horizontally non-homogeneous models of the earth. 21 p3048 A72-40498

Determination of the form of the capture area of a receiving antenna on the basis of energy streamlines 21 p3030 A72-40525

Transit time heating in stochastic electromagnetic fields. 21 p3092 A72-41222

On the energy and momentum conservation laws for linearized electromagnetic fields in a dispersive medium. 21 p3085 A72-41496

Russian book - Introduction to nonlinear electrodynamics. 22 p3204 A72-42076

Electromagnetic field, polarization and population inversion equations for spiked emission operation analysis in single mode laser 22 p3184 A72-42153

Differential equations for energy flow between electron beam and electromagnetic field, avoiding electron trajectory explicit calculation in nonlinear treatment of cyclotron resonance interaction 22 p3159 A72-42304

Bessel series solution to electromagnetic field and pulse function of cylindrical conducting screen located in monochromatic plane wave 22 p3155 A72-42667

A simple coupling between the electromagnetic and gravitational fields. 22 p3207 A72-42855

Expansion of diffracted electromagnetic fields in eigenfunctions of the d'Alembert operator 23 p3312 A72-43335

Electromagnetic induction in a half-space with a cylindrical inhomogeneity. 23 p3284 A72-43423

Diffraction of a plane wave by a ribbon grating in the case of short wavelengths 23 p3264 A72-43527

Influence of the phase-amplitude distribution of the field in the aperture of an antenna on its directional properties 23 p3270 A72-43773

Cylindrical waveguide with density modulated electron beam pumped by external electromagnetic field, considering Doppler effect conditions in beam radiation spectrum 23 p3265 A72-44157

Microwave generation with high energy electrons in magnetic undulator with transverse electromagnetic field, calculating frequency distribution of undulator radiation 23 p3265 A72-44158

The active field in an irregular slow-wave structure in the presence of a dynamic relative slip between the wave and the particle clusters 23 p3316 A72-44161

Polarization of the central field of a wave reflected from the ionosphere 23 p3265 A72-44173

Spectral characteristics of the scattering field of a uniformly traveling and rotating impedance cylinder 23 p3265 A72-44202

Field components of coupled electromagnetic and electron acoustic waves in warm stratified plasmas, using first order wave equations and Heading embedded form 23 p3322 A72-44319

Temperature of a free plasma filament in a high-frequency field at high pressures 23 p3322 A72-44464

Field expressions for a circular loop antenna in terms of a new set of functions. 24 p3379 A72-44707

Some features of the behavior of an intense light beam in a nonideal gas. 24 p3411 A72-45609

Electromagnetic wave field effects on cold magnetoactive plasma potential oscillations, solving dispersion equation for sub-ion gyroscopic frequencies 24 p3431 A72-45719

Coupled active parallel doublets network within external electromagnetic field at receiving station, investigating decoupling function between radiating elements 24 p3382 A72-45771

ELECTROMAGNETIC INTERACTIONS
NT PLASMA-ELECTROMAGNETIC INTERACTION

Soviet book on electromagnetic fields and waves covering propagation in anisotropic media, waveguides and cavity resonators, diffraction interactions, etc 01 p0031 A72-11200

Electron beam interaction with electromagnetic waves in longitudinal interaction devices during focusing by homogeneous magnetic and periodic electrostatic fields 02 p0189 A72-11564

Crab Nebula pulsar NP 0532 model for interaction and polarization of radio radiation with surrounding media 02 p0277 A72-11772

Elliptic equations solutions for electromagnetic effect in MHD rectangular channels using relationship to Laplace equations 03 p0397 A72-13995

Digital computer solution for near field coupling between high and low gain antennas above conductive surface 03 p0323 A72-14029

Radiative coupling of fed and unfed adjacent antennas in navigation systems rotating beam circular arrays, deriving equivalent circuit via quadrupole theory 05 p0635 A72-16300

Atom interactions with rf field, using quantum mechanical interpretation in terms of photons 07 p1038 A72-20433

Electromagnetic coupling between one dimensional laminar flows of viscous conducting fluid in presence of magnetic field, noting static and dynamic efficiencies dependence on Hartmann number 10 p1519 A72-24065

Electromagnetic field interaction with nonconducting polarizable and magnetizable continuum from force based on total impulse energy tensor, deriving force density from relativistic balance approximation 10 p1510 A72-24124

Dynamic processes of electric drive system with electromagnetic clutch modeled by analog computer element with logical input-output relation 10 p1423 A72-24755

Nonlinear interaction between circular coherent light and modulating electromagnetic waves in presence of quadratic electrooptical effect, noting frequency shift 10 p1493 A72-24912

Nonrelativistic quantum concept of electromagnetic field interaction with charged microparticles 11 p1692 A72-26093

Four-photon parametric frequency selection within broad stimulated emission lines during coherent light interaction, considering dye solution laser pumping 11 p1648 A72-26335

Electromagnetic wave interaction with irrotational moving fluid based on Maxwell equations and Minowski constitutive relation, noting flow velocity effects on scattering 11 p1689 A72-26471

Mode coupling effects on radio wave partial reflection from lower ionosphere at vertical incidence, using matrix perturbation analysis 11 p1599 A72-26764

Beamed radio waves interaction in E and F I regions propagation, noting beam width and field amplitude changes caused by defocusing 13 p1945 A72-28579

Periodic motions of weakly interacting modes in solid state lasers, using active matter pellet-resonator model 13 p1969 A72-29517

Electromagnetic field-two level atoms coherent interactions, using semiclassical approximation 15 p2250 A72-32305

Therapeutic electromedical equipment hazards due to electromagnetic interaction, considering implantation and simulation of human body 15 p2191 A72-32572

Theoretical study of electromagnetic coupling in the forced oscillatory regime of two one-dimensional laminar flows of a viscous and electroconducting liquid in the presence of a transverse uniform magnetic field 17 p2587 A72-34281

Electrons and photons interaction with relic radiation, establishing high energy gamma rays energy and intensity attenuation length 17 p2600 A72-35145

Structure of the power-law spectra of relativistic electrons in a turbulent plasma 17 p2593 A72-35907

Analysis and prediction of coupling between collocated antennas 20 p2902 A72-38999

Stellar energy-loss rates in a convergent theory of weak and electromagnetic interactions 20 p2972 A72-39868

Dielectric slab surrounding medium gain effects on bound modes amplification via estimation of evanescent surface wave interactions in optical waveguide by perturbation theory 21 p3062 A72-40605

Resonant interaction of an electrostatic wave with electrons in a current sheet 22 p3169 A72-42008

Electromagnetic waves interaction with transverse waves of thin piezoelectric plate in waveguide, noting transformation into acoustic waves 23 p3312 A72-43407

Book - Introduction to optical electronics 23 p3295 A72-43650

Experimental investigation of electromagnetic cascades at an energy greater than 20 GeV 23 p3291 A72-44444

Beamed radio waves interaction in E and F I regions propagation, noting beam width and field amplitude changes caused by defocusing 24 p3397 A72-45079

ELECTROMAGNETIC INTERFERENCE

NT IONOSPHERIC NOISE
NT IONOSPHERICS
NT JAMMING
NT RADIO FREQUENCY INTERFERENCE
NT SHOT NOISE
NT SUDDEN ENHANCEMENT OF ATMOSPHERICS
NT THERMAL NOISE
NT WHISTLERS
NT WHITE NOISE

Statistical model for communication probability estimate based on signal-to-interference and SNR criteria

01 p0031 A72-10997
Interference control in microwave circuit design, discussing coupling element, antenna terminals, radiated interference susceptibility and electromagnetic environments

02 p0189 A72-11558
Double reference beam holograms, evaluating interference effects of misalignment on image reconstruction

02 p0225 A72-11749
Receiver performance characteristics and failure mechanism in presence of interference, discussing measurement methods for interference susceptibility

02 p0192 A72-12150
Random errors in arrival time measurements of sinusoidal radio signal under noise and pulse interference

03 p0323 A72-13893
Pulse coded processing system EMC performance measurement, considering CW and pulsed interference effects and application to ATC radar beacon system transponders

03 p0324 A72-14033
Book on EMI test instrumentation and automatic measuring systems covering shielded enclosures, emission and susceptibility antennas and spectrum analyzers

04 p0486 A72-14611
Optical interference technique for experimental stress analysis of cracked structures, obtaining crack shape relationship to stress intensity factor

05 p0666 A72-16322
Two-channel direction finding with point source emission and spaced antennas reception, investigating cross correlation and background noise interference effects on accuracy

07 p0938 A72-19007
Biological radar clutter control by adaptive systems techniques, developing computer simulation for angel tolerance from bird electromagnetic characteristics

07 p0942 A72-19305
Frequency allocation effectiveness and mutual interference calculation for adjacent geostationary communication satellites

07 p0943 A72-19563
Adjacent channel interference effects in multicarrier telephony FM communications system

07 p0948 A72-20493
Minimum frequency separation between avionics receivers and transmitters for acceptable interference level

08 p1131 A72-20929
Potential noise stability of wideband communications systems during discrete signal reception on combined background of quasi-white noise and spectrally lumped interference

09 p1277 A72-22569
Data transmission interference protection under extreme noise, using tolerance detectors with redundancy coding

09 p1278 A72-22851
Constant false alarm rate signal processors for several electromagnetic interference types, using distribution-free methods and maximum likelihood estimation in radar target detection

10 p1437 A72-24683
Shielding procedures to control electromagnetic interference /EMT/ in design and operating electric equipment

10 p1452 A72-24813
Electromagnetic interference measurement by wide dispersion type spectrum analyzer electronically tuned over octave frequency range

11 p1632 A72-26027
[SAE AIR 1255]
Circuits for electromagnetic interference reduction in broadband solid state radio transmitters, discussing balanced transistor amplifier

15 p2209 A72-32564
Mathematical models for electromagnetic interference in electronic equipment, discussing nonlinear circuit analysis

15 p2201 A72-32568
Interfering beams amplitude modulation, applying optical heterodyne techniques

15 p2202 A72-32676
Random errors in arrival time measurements of sinusoidal radio signal under noise and pulse interference

15 p2202 A72-32704

Electron interferometer based on second order interference effects from laser modulated electron beam, applying quantum mechanical analysis

16 p2402 A72-33398
Error rate of phase-shift keying in the presence of discrete multipath interference.

17 p2516 A72-35334
Optimal predistortion efficiency for multiplicative disturbances in radio signal transmitting channel, noting Rayleigh distribution of signal fluctuations

17 p2518 A72-35778
Design of band-limited signal with no intersymbol interference - An extension of sampling function

19 p2767 A72-38606
Frequency sharing between broadcast satellites and tropospheric scatter systems.

20 p2901 A72-38978
Interference suppression design of switching circuits utilizing slewing rates.

20 p2906 A72-38982
Interference performance degradation to digital systems.

20 p2901 A72-38984
Minimisation of the solar array generated electrical interference on the GEOS satellite.

20 p2889 A72-38990
Radar EMI to voice communication receivers.

20 p2902 A72-38991
Gain averages as criteria for antenna EMC performance.

20 p2902 A72-39001
The Mueller matrix for scattering - Including the effects of interference.

20 p2970 A72-39754
Influence of polarization of laser fields on nonlinear interference effects

21 p3062 A72-40405
Satellite adjacent-channel interference due to multicarrier transponder operation.

21 p3020 A72-40892
Convolution noise and distortion in FDM/FM systems.

21 p3020 A72-40893
Impulse noise in FM receivers in the presence of adjacent channel interference and thermal noise.

21 p3020 A72-40894
Frequency allocation effectiveness and mutual interference calculation for adjacent geostationary communication satellites

22 p3153 A72-42081
August solar activity and its geophysical effects.

22 p3174 A72-42982
Book - EMI prediction and analysis techniques.

22 p3156 A72-43198
Determination of the optical thickness of polymer fracture surface layers from interference phenomena.

23 p3307 A72-44317
Potential noise stability of wideband communications systems during discrete signal reception on combined background of quasi-white noise and spectrally lumped interference

24 p3379 A72-44748
Rotating black holes - Separable wave equations for gravitational and electromagnetic perturbations.

24 p3439 A72-45014

ELECTROMAGNETIC MEASUREMENT
NT ELECTROMAGNETIC NOISE MEASUREMENT

Electromagnetic wave propagation anomalies over sea, comparing calculated and measured field strengths based on simultaneous refractivity vertical distribution measurement

01 p0026 A72-10405
Resonance rail line scattering range using flat parallel conductor transmission line for radar cross section measurement

01 p0032 A72-11251
Automated electromagnetic pollution data acquisition systems for environmental ecology, discussing computer technique and data retrieval, analysis and storage

03 p0328 A72-14040
Economics in electromagnetic field measurement surveys for siting of earth stations operating in shared frequency bands at 4 and 6 GHz, considering interference detection

03 p0324 A72-14044
Five component electromagnetic field station to record geomagnetic field magnetic and electric components variations

05 p0643 A72-16253
Impedance determination for symmetrical spherical probes and spacecraft housing with flat screen separation, using partial capacitance formula

05 p0662 A72-16268
Microwave antenna efficiency measurement by integrated isotropic levels comparison, featuring elimination of error due to specular ground reflections

05 p0637 A72-16421
Automatic measurements of wideband antenna radiation characteristics, using microwave generators linked with analyzers

06 p0775 A72-18194

- Magnetic and electric field intensities measurement with charged particle beams in coaxial high temperature plasma sources
06 p0863 A72-18415
- Interferometric measurement at 1415 MHz of radio telescope paraboloidal antenna radiation pattern, using cosmic radio sources with known flux density as signal source
07 p0945 A72-19789
- High resolution measurement of microwave refraction including arrival and fire angles on short line-of-sight tropospheric paths
07 p0946 A72-19790
- Electromagnetic velocity and flow measurements techniques application to cardiovascular patients, discussing utilization problems
09 p1272 A72-23275
- Radio receiver-transmitter system for synchronous heterodyne signal detection of 6 GHz band electromagnetic channel pulsed response, discussing operational principles and accuracy
09 p1280 A72-23353
- Fixed frequency or wideband real time measurements of microwave reflection and transmission coefficients and fields in open or closed structures
09 p1289 A72-23425
- Papers on electromagnetic probing in geophysics covering ground wave propagation, rough surface effects, geocrustal electric properties, HF radio backscatter from sea, etc
10 p1438 A72-24736
- Earth electrical parameters measurement by radio wave methods involving electromagnetic propagation along or reflection from surface, considering penetration depth, earth stratification and surface inhomogeneities
10 p1474 A72-24737
- Rough surface effects on EM reflection for electromagnetic probing in geophysics, using Rayleigh and Kirchhoff methods
10 p1512 A72-24738
- Electrical loss measurements in superconducting magnets at 60 Hz for Nb-Sn ribbon and Nb-Ti cable and multifilament coils
10 p1460 A72-24760
- Electromagnetic position sensor for magnetically supported model in wind tunnel, discussing design, operation principles and performance
10 p1462 A72-24773
- Electromagnetic interference measurement by wide dispersion type spectrum analyzer electronically tuned over octave frequency range
11 p1632 A72-26027
- Radio waves field strength measurement and recording for D region behavior during partial solar eclipse of 25 February 1971
13 p1961 A72-30050
- Microwave measurements on high permittivity materials with slotted waveguides excited in E mode
15 p2207 A72-31894
- Antarctic ice sheet complex permittivity in VLF band from reduction of measurement data with buried dipole antenna under snow surface
15 p2200 A72-32104
- Microwave antenna near field apparent image and phase-amplitude distribution measurement with photocontrolled semiconductor panel
15 p2209 A72-32672
- Electromagnetic transient coupling between ungrounded loops for two layer conducting half space approximation of earth
16 p2388 A72-34007
- The interpretation of ionospheric radio drift measurements. IV - The effects of signal coupling among spaced sensor channels.
17 p2515 A72-34699
- Magnetic and electric field intensities measurement with charged particle beams in coaxial high temperature plasma sources
17 p2588 A72-34864
- Measurement of Hall mobility of current carriers in inhomogeneous semiconductor samples
18 p2720 A72-36964
- Some problems of electromagnetic induction in the equatorial electrojet region. II - The analysis of magnetic and telluric variations at Zaria, Nigeria.
19 p2789 A72-37772
- Slotted-line measurement of insertion loss in three-port ferrite junction circulator.
19 p2775 A72-38636
- Complex analysis of satellite data for electromagnetic emission measurements in the radio, infrared and optical wavelength ranges
19 p2829 A72-38770
- Sensor selection for electromagnetic instrumentation system with sufficient sensitivity and bandwidth to demonstrate electroexplosive device compliance with MIL-E-6051D specified safety margin
20 p2962 A72-38979
- High level E-field susceptibility measurement problems and techniques.
20 p2906 A72-38981
- Some new methods of performing low frequency EMC measurements.
20 p2921 A72-38995
- Prediction of near-field antenna coupling in the presence of obstacles.
20 p2902 A72-38998
- Application of an agar-agar chamber for the study of electromagnetic waves in an inhomogeneous medium.
21 p3015 A72-40359
- Determination of the radiation characteristics of aircraft antennas in flight
21 p3030 A72-40534
- A measurement of ionospheric electric fields at high latitude.
22 p3169 A72-42015
- Electromagnetic thickness measurement on the AWACS radome.
24 p3384 A72-44901
- Wideband antenna test facility.
24 p3389 A72-45554
- An apparatus for measuring the Hall effect of high-resistivity materials in alternating electric and magnetic fields
24 p3405 A72-45698
- ELECTROMAGNETIC NOISE**

- RF intrinsic and up or down-converted modulation noise mutual relationship with application to IMPATT diode oscillators
01 p0035 A72-10114
- Synchrotron radiation from incoming auroral electrons based on Schwinger equation, accounting for hf backscatter sounder noise
01 p0060 A72-10839
- Unlocked multimode He-Ne lasers If noise, discussing different modes intensity fluctuations mutual correlations
01 p0080 A72-10850
- Notch noise loading tests on predetection tape recording of FM carriers, showing noise power ratio dependence on record level and bias levels and output equalization
02 p0175 A72-12146
- Dc excited argon laser anode oscillation noise, discussing relation to ballast resistance, suppression conditions and current fluctuation frequency response to laser fluctuation
02 p0239 A72-12826
- Read avalanche diode noise theory, showing carrier current modulation and lf and hf noise coupling in nonlinear regime
03 p0333 A72-13848
- Electromagnetic noise and effects on communication systems, considering statistical parameters definition and measurements
03 p0324 A72-14036
- Composite incidental man-made radio noise data correlation to envelope statistic transformation hypothesis based on vlf airborne measurements of metropolitan area noise
03 p0324 A72-14041
- Impulse noise reproduction for temporary threshold shift and impulse noise measurements, considering rise time, frequency response and limitations of tape recorders
04 p0521 A72-14847
- Stark contours of hydrogen spectral lines in turbulent plasma with high noise level due to hf Langmuir oscillations
04 p0557 A72-14986
- Burst noise in bulk materials and transistors attributed to crystallographic defects, investigating gold addition effects
04 p0498 A72-15131
- Avalanche transit time diodes noise mechanisms and performance in microwave amplifier, oscillator and mixer applications
04 p0500 A72-15302
- Rocket cosmic radio noise measurements at 1.16-2.40 MHz and 1600 km, confirming spectrum flatness
05 p0711 A72-15763
- Optimal nonlinear logical filters for noise protection of space vehicle servosystems
05 p0726 A72-16460
- Noise parameters of space communication systems ground receiving antennas, considering noise effects on gain and radiation patterns
06 p0783 A72-17499
- Pulsed and CW solid state microwave oscillator EM noise as function of power level and locking parameters
06 p0788 A72-18465
- Noise contaminated pulse signal transit time measurement by receiver using digital filters
07 p0939 A72-19051
- Schottky barrier and n-n heterojunction diodes hf noise, considering ideality factor effect
07 p0955 A72-19358
- Waveguide cavity Gunn microwave power amplifiers, predicting maximum small signal gain and FM and AM noise performance
07 p0958 A72-19921
- Analog/hybrid simulation of noise effect on adaptive delta modulation system consisting of transmitter, receiver and error simulator
07 p0951 A72-20339
- Meteorological radar measurements, noting missile tracking radio interferometer noise due to stochastic refractive ray bending and associated multipath conditions
08 p1136 A72-21978
- Cavity resonator frequency detuning effects on FM and AM noise in cavity stabilized Gunn microwave oscillator
09 p1285 A72-22651
- Data transmission interference protection under extreme noise, using tolerance detectors with redundancy coding
09 p1278 A72-22851
- Noise in optical output of small area electroluminescent GaAs diffused junction diodes, comparing with theoretical shot noise limit
09 p1286 A72-23087
- Microbarrier mechanisms of 1/f noise for resistive materials and semiconductor devices
09 p1280 A72-23102
- Two dimensional dynamic model for background noise generation in bipolar transistors, using equivalent circuit
09 p1286 A72-23105
- Burst noise relationship to Si crystal dislocations and defects near bipolar emitter-base junction and surface zone in bipolar transistors
09 p1286 A72-23106
- Au-Si n and Al-Si p diodes noise operating in avalanche with charges injected by radiation
09 p1287 A72-23113
- Avalanche diode background noise in linear and nonlinear regimes, emphasizing source dependence on oscillation level
09 p1287 A72-23117
- Background noise in amplification and oscillation in Si and GaAs avalanche diodes
09 p1287 A72-23119
- Optimal correlating detector of fluctuating two frequency radar signals in unknown random noise
10 p1436 A72-24515
- Fixed point smoothing of sequentially correlated processes by extending filtering technique to simultaneous estimation of state and process noise contribution
11 p1610 A72-25871
- Ogo-5 observation of lower hybrid resonance noise, bursts, VLF hiss and whistlers near plasmopause during large magnetic storm
11 p1624 A72-26399
- Noise immunity and code sequence rejection probability in real multifrequency communications systems with multipositional frequency shift keying
11 p1598 A72-26729
- Multiplicative noise envelope distribution for ionospheric scatter channel from single and diversity radio reception, noting meteor trails effects on electromagnetic wave propagation
12 p1782 A72-27627
- Linear product demodulator for quadrature double sideband signal, evaluating channel noise and phase jitter effect on carrier
13 p1920 A72-29105
- Subtraction circuit design for impulse noise elimination at front end of aircraft oriented OMEGA navigation system receiver
13 p1999 A72-29204
- Avalanche photodiode optical detector noise amplitude distribution as function of operating conditions
13 p1971 A72-29924
- Dielectric waveguide X band telemetry system for remote power and multiplexing applications in noisy electromagnetic pulse environment
14 p2087 A72-31047
- Aeronautical communication satellite technical and economic survey, considering wave propagation, noise, aircraft antennas and VHF and UHF links
15 p2193 A72-31180
- Sense coil geometry and drive waveform effects on low level flux gate magnetometers sensor noise
15 p2233 A72-31507
- Multimode fiber optics data transmission through high electrical noise environments for send-receive communication links
15 p2198 A72-32059
- Algorithms for incorporating electromagnetic field into plasma numerical simulation to explain unwanted noise generation rates
15 p2288 A72-32421
- Generator for data transmission lines stochastic noise bursts simulation with statistically independent burst durations and intervals
15 p2201 A72-32475
- Incoherent receiver noise stability in multichannel system with channel frequency separation, deriving formula for receiver error probability
15 p2209 A72-32668

Electron beam modulation by SHF noise signal in plasma-beam system

15 p2289 A72-32698

Interference measurement techniques for small phase difference changes, noting diffraction and noise effects as limiting factors

15 p2243 A72-32769

Error probabilities in digital communication systems subject to mixture of man made or natural impulsive and Gaussian noise

16 p2365 A72-34106

Correlation of noise-like emission reflected from a statistically uneven surface

17 p2583 A72-35543

Intraocular noise - Origin and characteristics.

18 p2651 A72-36605

German monograph - Measurement of 'oscillation impedances' and optimization of frequency noise effects of microwave-semiconductor oscillators tunable over a wide frequency range

19 p2772 A72-37477

Man-made electromagnetic noise in southern California and southern Nevada.

19 p2764 A72-37869

Measurements of the laser linewidth due to quantum phase and quantum amplitude noise above and below threshold. I.

19 p2811 A72-38084

I-V characteristics of electric noise generated by flame between double probe electrodes during coke particle burning in air flow

19 p2882 A72-38458

Exponentially weighted noncoherent integration of pulsed signals in the presence of Gaussian noise and random impulse noise.

19 p2767 A72-38623

Error probability for multilevel PAM transmission with intersymbol interference, Gaussian and impulsive noise.

21 p3019 A72-40888

Impulse noise in FM receivers in the presence of adjacent channel interference and thermal noise.

21 p3020 A72-40894

Type 3 solar burst distinction from auroral type high pass noise via spectrum analysis

22 p3222 A72-42043

Influence of modulating /multiplicative/ noise on signal processing in a phased-array-antenna/receiver system

23 p3265 A72-44205

Effectiveness of certain easily realized rank detection algorithms for noise-masked signals

23 p3266 A72-44216

Geomagnetic tail magnetic and electric fields ULF, VLF and ELF fluctuations, considering relationship to substorm processes

24 p3397 A72-44857

ELECTROMAGNETIC NOISE MEASUREMENT

Atmospheric radio noise measurement by two methods for quasi-peak value, noting good correlation between techniques

01 p0031 A72-10923

Fast cyclotron and synchrotron transverse waves noise measurement in electron flux, using resonator with homogeneous electric field

02 p0190 A72-11573

Quadratic logarithmic converter used with linear microammeter for decibel scale noise measurements

09 p1306 A72-22344

Noise measurements of AM and FM microwave generators and amplifiers in nonlinear regime

10 p1452 A72-24643

The detection of unreliable contacts by noise measurements.

18 p2720 A72-37111

FM receiver noise figure measurement - A simplified method.

22 p3155 A72-42704

Accuracy of measuring the noise figure of microwave two-ports

23 p3273 A72-44313

Electromagnetic cylindrical wave group aging properties, describing extragalactic red shift production mechanism

01 p0135 A72-11325

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators

02 p0223 A72-11418

Electromagnetic plane stress wave generation by capacitor bank for transient loading of photoelastic models along straight and curved boundaries [SESA PAPER 1907A]

02 p0199 A72-11503

Quasi-static surface waves at Maxwellian plasma boundary with diffuse electron scattering, considering plasma electromagnetic oscillations

02 p0266 A72-12577

Second harmonic emission from plasma hybrid resonance region during electromagnetic wave normal incidence on nonhomogeneous magnetoactive plasma layer

02 p0180 A72-12578

Plane electromagnetic wave diffraction on magnetoactive plasma cylinder, using energy method and particle scattering model

02 p0183 A72-12754

Cascaded annular lens systems for focusing electromagnetic waves, noting advantages of axicon

03 p0388 A72-12967

Electron emission in strong electromagnetic waves within quantum electrodynamics, discussing energy losses and electron pair production

03 p0415 A72-13003

Solar magnetic field measurements using electromagnetic radiation, atmospheric structure [MHD effects] and energy equipartition

03 p0427 A72-13277

Electric field effects on electromagnetic wave packet motion in anisotropic nonlinear medium with electro-optical effect

03 p0322 A72-13737

Soviet monograph on electron flux nonlinear interaction with slow electromagnetic waves in TWT, discussing output power and efficiency increase

03 p0333 A72-13949

Computer modeling technique for electromagnetic scattering and radiation problems in resonance region employing thin wire electric field integral equation

03 p0328 A72-14028

Electromagnetic radiation in universe, discussing relic radio emission, energy density, hot model isotropic extragalactic component isolation, intergalactic gas, radio sources and quasars

03 p0414 A72-14317

Electromagnetic solitary waves /solitons/, noting medium macroscopic motion absence and parametric pulse generation

04 p0489 A72-15387

Self focusing of electromagnetic waves in isotropic plasma, investigating nonlinear relaxation processes

04 p0489 A72-15391

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field

05 p0625 A72-15826

Energetic solar flare particles release from sun, describing satellite observations of solar electromagnetic radiation 05 p0710 A72-16522

Energy spectrum of muon formed electromagnetic cascades in vertical cosmic radiation flux 06 p0871 A72-17287

Phase and group velocity of electromagnetic waves in drifting uniaxial magnetoplasma, obtaining dispersion relation from Maxwell and plasma equations 06 p0853 A72-17349

Dual integral equations solutions to electromagnetic wave diffraction at plane conducting slotted screen 06 p0773 A72-17689

Conversion effectiveness of oscillations induced by electron beam in bound anisotropic plasma into electromagnetic emission 06 p0860 A72-17700

Electromagnetic radiation in uniformly moving homogeneous medium obtained by transformation and four dimensional Green function method 06 p0847 A72-17712

Transient effects due to electromagnetic cascades in Pb during Cu wall passage in ionization calorimeter 07 p0988 A72-19871

Multiplication and mixing of electromagnetic waves in optically nonlinear anisotropic crystal media 07 p1007 A72-20119

Spectral distribution of electromagnetic radiation emitted by charge moving in gravitational field of spherically symmetric black holes 07 p1081 A72-20226

Geomagnetic variations propagation theory for LF electromagnetic and Alfvén waves diffraction at stratified earth in thin gyrotopical ionosphere 08 p1130 A72-20711

Plane electromagnetic wave reflection from conducting convex cylinder in radially inhomogeneous absorbing medium, deriving equations for beam trajectories calculation 08 p1131 A72-20742

Minuteman HERO /hazards of electromagnetic radiation to ordnance/ preflight testing, describing ordnance monitoring system based on fiber optic data links 08 p1220 A72-20767

Quasi-periodic ionospheric electron density fluctuations effects on electromagnetic waves propagation, noting effect on surface recordings as geomagnetic variations 08 p1156 A72-20824

Comb type slow wave structures properties outside passband, obtaining dispersion and field distribution expressions by electrodynamic analysis 08 p1135 A72-21738

Electromagnetic field radiation from linearly and sinusoidally variable thickness layered structures under plane wave and concentrated source excitations 08 p1137 A72-21986

Electrostatic plasma wave conversion into electromagnetic waves, calculating dispersion relation at all wavelengths for perpendicular propagation mode 08 p1137 A72-21989

Physical optics approximation study of gravitational waves effect on electromagnetic propagation, noting unobservability of local scintillation effect 09 p1351 A72-22683

Short laser pulses for plasma heating, considering turbulent heating mechanisms, neutron yield and electromagnetic radiation 09 p1364 A72-23444

Clinical effects on atrio-ventricular pacing system of electromagnetic weapon detector systems used for air passenger screening at airports in air hijacking prevention efforts 10 p1428 A72-23740

Plane electromagnetic wave diffraction on ideally conducting convex body of large electrical dimensions, obtaining Maxwell equations asymptotic solution 10 p1436 A72-24577

Electromagnetic wave diffraction by dielectric steps in waveguides, calculating microwave scattered field by modified residue calculus technique 10 p1451 A72-24593

Electromagnetic wave propagation in weakly nonstationary plasma, determining variations of wave amplitudes and polarization characteristics 10 p1523 A72-24782

Electromagnetic wave propagation and absorption in weakly inhomogeneous plasma layer, calculating conditions for transformation into plasma wave 10 p1523 A72-24799

Wave equation derivation for electromagnetic and gravitational radiations in Schwarzschild field, obtaining third order corrections for scalar waves 10 p1514 A72-25168

Perturbation theory for electromagnetic radiation in weakly anisotropic magnetoplasma, calculating Green function for delta function source oriented parallel to static magnetic field 12 p1783 A72-27668

Numerical description of electromagnetic radiation from open-ended flanged waveguides, giving truncation

corrected expressions for field behavior in aperture perimeter vicinity 13 p1915 A72-28520

Obliquely incident electromagnetic waves reflection and transmission by moving compressible plasma slab, applying field and wave-four vectors Lorentz transformations to wave equations 13 p2010 A72-28543

Parametric decay instability of Langmuir and acoustic plasma waves induced by incident electromagnetic wave near plasma frequency, noting application to ionospheric instabilities 13 p2012 A72-29126

Martian ionosphere electromagnetic wave propagation characteristics for E, F1 and F2 models, calculating refractive index for zero and nonzero collision frequencies 13 p1922 A72-29474

Electromagnetic wave propagation in weakly nonstationary plasma, determining variation with time and polarization plane rotation 14 p2136 A72-30219

Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves 14 p2136 A72-30308

Electromagnetic emission in universe, discussing background radiation spectrum, extragalactic source brightness, intergalactic gas and energy density 14 p2152 A72-30479

Electromagnetic and gravitational waves emission by superlight sources in vacuum, considering multiparticle and form factor cut-off effect 14 p2130 A72-30625

Standardization of microwave irradiation experiments on animals, discussing power density level evaluations and local vs whole-body irradiation effects 14 p2080 A72-30746

Epitaxial film system parameters determination based on variational technique of computing electromagnetic waves reflectance and transmissivity in semiconductor structures 14 p2142 A72-30811

Carrier wave propagation at semiconductor surface with electron drift, discussing solid state traveling wave amplifier design 15 p2290 A72-31288

Quasar electromagnetic radiation emission in terms of general relativistic coupling between gravitational field and charged particle radiation field 15 p2306 A72-31592

Collisions role in nonlinear mode coupling and harmonic generation associated with electromagnetic wave in plasma, describing plasma electron distribution function by kinetic equation 15 p2195 A72-31679

Electromagnetic hazards, pollution and environmental quality - Conference, Purdue University, Indiana, May 1972 15 p2209 A72-32563

Ultrabroadband probe design for microwave radiation intensity measurement in harmful exposure study 15 p2191 A72-32574

Narrow strongly radiating slot voltage distribution, investigating cavity coupling with integral equation 15 p2209 A72-32659

Cylindrical antenna immersed in weakly ionized magnetoplasma, calculating steady magnetic field effect on electromagnetic and electroacoustic radiation resistances 16 p2434 A72-32860

Variable amplitude and phase velocity electromagnetic traveling wave field distribution in diverging MHD induction machine channel with liquid metal flow 16 p2435 A72-33282

Electromagnetic radiation frequency spectrum and mean power from accelerated magnetic dipoles in circular and Keplerian orbits, noting implications for pulsars 16 p2453 A72-33285

Induced electron emission dependence on polarization, frequency and intensity of second wave incident on electron with anomalous magnetic moment 16 p2424 A72-33365

Interplanetary radiation types in terms of possible space flight hazards, discussing electromagnetic and corpuscular radiation, cosmic rays and radiation belts 16 p2446 A72-33553

Nonionizing electromagnetic radiation effects in biological systems, discussing microwave penetration, therapeutic warming, light scattering in tissues and medical instrument applications 16 p2359 A72-33754

Microwave radiation - Biophysical considerations and standards criteria. 17 p2507 A72-34299

Diffraction of a plane electromagnetic wave on an anisotropic half-plane in free space and in a plane waveguide 17 p2515 A72-34828

Investigation of two types of collisionless linear dampings of electromagnetic waves in a nonhomogeneous magnetized plasma. 17 p2588 A72-34870

Some comments on the generation of electromagnetic traveling and standing waves for inductive acceleration of plasmas [DFVLR-SONDDR-209] 17 p2589 A72-34895

Cerenkov instability and VLF emissions generated outside the plasmopause. 17 p2547 A72-35063

VLF emissions during post breakup phase of polar substorm. 17 p2547 A72-35064

Linear transformation and absorption of electromagnetic waves in plasma 17 p2591 A72-35165

Calculation of sum-frequency electromagnetic waves emitted by a multilayer nonlinear plate 17 p2516 A72-35168

Electromagnetic waves on a conducting infinite cylinder in a magnetoionic medium. 17 p2517 A72-35399

Solution to a boundary value problem in the theory of diffraction of electromagnetic waves at a circular hole in a plane screen between two media 17 p2518 A72-35724

The electromagnetic radiation near the ion plasma frequency emitted by a turbulently heated plasma. 18 p2715 A72-36598

Electromagnetic radiation and scattering from loaded bodies of revolution of arbitrary shape, calculating plane wave scattering from apertures in cylinders and hemispheres 18 p2662 A72-36927

Green function for temporal electromagnetic plasma wave echoes oblique to external magnetic field, calculating current density and damping term 19 p2839 A72-37333

Electromagnetic and space charge disturbance transmission and reflection at plasma boundary and oblique incidence, discussing isotropic Vlasov plasma 19 p2839 A72-37336

Geomagnetic variations propagation theory for LF electromagnetic and Alfvén waves diffraction at stratified earth in thin gyrotopical ionosphere 19 p2765 A72-38339

Electromagnetic self induced vibrations in homogeneous unbounded electron beam moving with time dependent velocity, noting longitudinal and transverse wave generation 19 p2842 A72-38527

Cytologic aspect of RF radiation in the monkey. 19 p2758 A72-38709

Complex analysis of satellite data for electromagnetic emission measurements in the radio, infrared and optical wavelength ranges 19 p2829 A72-38770

German Book - Introduction into nonlinear optics, Volume I 19 p2813 A72-38775

Electromagnetic background radiation in universe, discussing relic radio emission, energy density, hot model isotropic extragalactic component isolation, intergalactic gas, radio sources and quasars 19 p2854 A72-38815

Computer program to simulate electromagnetic signal densities, data rates and power from land based radar transmitters as functions of time and location 20 p2902 A72-38992

Plane electromagnetic wave diffraction on magnetoactive plasma cylinder, using energy method and particle scattering model 20 p2902 A72-39060

The detection of gravitational waves by electromagnetic oscillators. 20 p2974 A72-40024

LF circularly polarized electromagnetic waves /helicons/ resonance crystal plates, deriving magnetoresistivity and Hall coefficient 21 p3066 A72-40624

A charged particle in the field of a transverse electromagnetic plane wave - A group-theoretical analysis. 21 p3084 A72-40722

Excitation of electromagnetic waves in a plasma by a relativistic electron beam 21 p3092 A72-40787

Slow electromagnetic waves in antiferromagnetics near the point of transition to the ferromagnetic phase 21 p3098 A72-41685

Radiation of an oscillator moving parallel with the interface of two media 21 p3036 A72-41843

Radiation of an oscillating charge in a three-dimensional periodically inhomogeneous medium 21 p3023 A72-41844

Study of the thermal self-focusing of electromagnetic waves in a plasma 22 p3211 A72-42652

Numerical integration of integral equation for phased array radiation modeled by impedance filaments in conductive plane, noting excitation by magnetic flux 22 p3159 A72-42663

Electromagnetic emission during the development of a hydrodynamic beam instability in a bounded plasma 22 p3213 A72-43115

Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves

23 p3317 A72-43210

Electromagnetic waves interaction with transverse waves of thin piezoelectric plate in waveguide, noting transformation into acoustic waves

23 p3312 A72-43407

Low frequency oscillations of cesium and mercury vapor plasmas, noting intensity distribution, radiation pattern and polarization characteristics of microwave emission

23 p3319 A72-43411

Electromagnetic radiation modulators in millimeter and submillimeter wave range using gas-discharge plasma magneto-optical effects in alternating magnetic field

23 p3319 A72-43434

Energy measurement of primary particles from shower formation in solids, discussing ultrasonic waves generation in metal plates and electromagnetic waves excitation in ferrites

23 p3291 A72-44437

State of the art in the detection of intelligent extraterrestrial signals.

24 p3441 A72-45190

Extraterrestrial electromagnetic radiation and particle flux characteristics of low and medium energy, considering onboard spacecraft measuring instruments and data processing systems

24 p3404 A72-45398

Self-consistent electromagnetic waves in relativistic Vlasov plasmas.

24 p3430 A72-45569

Profile of a parametric luminescence line emitted by lithium niobate crystals.

24 p3432 A72-45614

Electron bremsstrahlung from hot plasma in the presence of strong magnetic field.

24 p3431 A72-45627

Effects of pseudosonic and electroacoustic waves on the radiation of a plasma-coated spherical antenna.

24 p3386 A72-45645

Redistribution function of line radiation during scattering without atom velocity restriction

01 p0104 A72-10093

Atomic models of velocity noncorrelated radiation line scattering with frequency redistribution at large distance from atmosphere

01 p0104 A72-10094

Plane electromagnetic wave scattering by imperfectly conducting cylinder with radially inhomogeneous dielectric coating, using phase shift method for evaluation

01 p0024 A72-10130

Analog FM multiplex signal intermodulation formula based on time-variable electromagnetic waves tropospheric scatter propagation

01 p0027 A72-10411

Multipole methods for electromagnetic scattering from conducting cylinder over dielectric half space, noting application to radar cross sections

01 p0030 A72-10842

Modified Born approximation for electromagnetic backscattering cross section from turbulent plasmas, noting attenuation leading to saturation and cross-polarization

01 p0031 A72-10846

Electromagnetic wave scattering from rough surfaces by Kirchhoff approach and small perturbation method, discussing validity near grazing angle

01 p0032 A72-11249

Bidirectional scattering of electromagnetic waves from rough surfaces in plane of incidence restricted only by tangent plane approximation, comparing with other models

02 p0170 A72-11467

Ionospheric spread-F mechanism as electromagnetic wave scattering on electron density inhomogeneities, calculating characteristic dependence of height interval on operational frequency

02 p0216 A72-11920

Spatial-temporal correlation functions of field due to electromagnetic waves backscattering from random inhomogeneities in extended layer

02 p0180 A72-12580

Electromagnetic wave scattering characteristics at arbitrarily configured body with dimensions smaller than primary field wavelength, determining electric and magnetic moments

02 p0181 A72-12595

Gaussian electromagnetic wave beam diffraction and scattering problems solutions by optics formula

application to beam transformation through optical systems

02 p0261 A72-12603

Scattering diagram for mutual cross coupling between antennas in Fresnel zone

02 p0196 A72-12757

Quasi-ergodicity condition of dynamic electromagnetic scattering diagram of flying object in terms of amplitude or phase elements

02 p0183 A72-12765

Electromagnetic wave scattering by electron charge density fluctuations in plane waveguide with magnetoactive plasma, showing cross section spectrum function of plasma properties

02 p0183 A72-12766

Nonstationary radiation transfer with one dimensional anisotropic scattering, deriving Bessel function expressions for quantum exit from semiinfinite medium

02 p0262 A72-12830

Spectral distribution of radiation arising from nonlinear Thomson scattering of strong electromagnetic wave by ultrarelativistic electrons

03 p0390 A72-13017

Strong circularly polarized electromagnetic wave scattering by plasma electron as function of amplitude and magnetic field with radiation reaction

03 p0321 A72-13077

Electric and magnetic field scattering on ellipsoidal inhomogeneities in circular waveguides from integrodifferential equation derived expressions

03 p0322 A72-13735

Computer modeling technique for electromagnetic scattering and radiation problems in resonance region employing thin wire electric field integral equation

03 p0328 A72-14028

Tropospheric forward electromagnetic scatter propagation path loss prediction by modified Yeh method with empirically derived correction function

03 p0323 A72-14031

Reciprocity relations for electromagnetic waves scattered by isolated, stratified and composite anisotropic obstacles

04 p0547 A72-14535

Pulsar radiation scattering in interstellar medium, using Gaussian spatial autocorrelation function

04 p0577 A72-15281

Short wave asymptotic formulas for shadow zone of plane diffraction, discussing asymptotic solutions for field from point source

04 p0489 A72-15386

Hf electromagnetic wave scattering and diffraction by smooth dielectric cylinder and sphere based on Lorentz excitation theory

04 p0490 A72-15397

Conformal transformations applications to plane electromagnetic wave diffraction by infinitely conducting network, discussing energy distribution

04 p0490 A72-15410

Plane electromagnetic wave diffraction on two cylinders with different radii, assuming infinite length and ideal conductivity

04 p0491 A72-15413

Electromagnetic wave scattering and diffraction on lattice of dipole vibrators

04 p0491 A72-15415

Numerical solution for diffraction on conducting finite and infinite lattice of cylinders with circumferential cross section

04 p0491 A72-15416

Electromagnetic wave diffraction on infinite lattice of perfectly conducting arbitrary flat elements from numerical method, determining secondary field and strips current distribution

04 p0491 A72-15417

Diffraction anomaly from infinitely extended strip grating solution by successive approximation technique combination with singular integral equation

04 p0491 A72-15418

Electromagnetic traveling plane wave diffraction from arbitrary angled dielectric wedge, investigating surface currents on walls

04 p0491 A72-15420

Reflection from aperture of long E-plane sectoral horn antenna, determining electrical impedance by asymptotic diffraction theory

04 p0501 A72-15424

Hf backscattering of plane electromagnetic wave at oblique incidence on conducting circular metallic disk, noting polarization dependence on angle

04 p0493 A72-15524

Ray statistics of electromagnetic wave scattering in homogeneous isotropic turbulent medium with ellipsoidal inhomogeneities of refractive index, using Fokker-Planck equation

05 p0626 A72-16243

Plane electromagnetic wave diffraction by infinite cylinder with unsteady impedance boundary conditions

05 p0627 A72-16409

Scattering of arbitrarily impinging monochromatic electromagnetic waves by thin infinitely long isotropic, dielectric and metal rods of elliptic cross section

05 p0628 A72-16412

High frequency electric field backscattering by plane electromagnetic wave incident on perfectly conducting sphere with radially inhomogeneous dielectric coating

05 p0630 A72-16621

Ray-optical calculation of modes scattered by obstacle in two dimensional waveguide or duct with weakly inhomogeneous medium and nonvanishing surface impedance walls

05 p0630 A72-16622

Nonlinear wave coupling, scattering and radiation in plasmas for diagnostics application

05 p0699 A72-17221

Spectral calculations of electromagnetic and nuclear showers of cosmic ray muons interacting with substance

06 p0871 A72-17288

Electromagnetic wave scattering from curved rough surfaces and transmission through turbulent medium, obtaining solution by spatial Fourier transform of three transfer functions product

06 p0771 A72-17340

Electromagnetic wave scattering by underdense plasma layer, considering perturbation calculation for Gaussian, sech squared and parabolic density distribution

06 p0853 A72-17350

Ground and atmospheric scattered radiation discrimination by ground modulation based on chopper signal frequency analysis, considering feasibility from airborne tests results

06 p0814 A72-17587

Interplanetary scintillation of two pulsars, discussing scattering and amplitude modulation of incident radiation propagated through interstellar medium

07 p1069 A72-19073

Scattering properties of conducting cylindrical obstacle in rectangular waveguide, deriving scattered field integral representation via Green function

07 p0944 A72-19593

Electromagnetic scattering of square pulse from lossy dielectric slab mounted on perfectly conducting planar ground surface

07 p0945 A72-19660

Electromagnetic field around thin linear receiving antenna by superposition of incident wave with antenna scattered field, deriving differential equations solution for field lines

08 p1132 A72-21327

Soviet book on Riemann-Hilbert problem method in electromagnetic waves theory, covering wave diffraction, scattering and propagation, waveguides and open resonators

08 p1137 A72-22021

Relation for detector-aperture size for spatially coherent detection with dependent scattering applied to realistic laser radar signal signatures

09 p1278 A72-22618

Electromagnetic scattering by ungrounded conducting sphere above ground plane, calculating If ground wave backscatter

09 p1279 A72-22905

Electromagnetic wave scattering by arbitrarily oriented circular ice cylinders, deriving far field intensities for linearly polarized incident waves

09 p1280 A72-23341

Background medium anisotropy effect on electromagnetic waves scattering from ionospheric irregularities, calculating scattered power by Green function

09 p1282 A72-23519

Electromagnetic waves scattering by uniformly moving objects in free space, considering two dimensional monopoles and dipoles

09 p1282 A72-23523

Electromagnetic wave scattering on inhomogeneities by Born approximation, estimating maximum error for small correlation radius

10 p1436 A72-24503

Average electric field and power density of electromagnetic wave scattered from rough layer with plane interface, calculating scattering cross sections

10 p1512 A72-24744

Secondary diffraction from close edges on perfectly conducting bodies, representing scattered field by iterative surface current density replacement technique

10 p1440 A72-24938

Electromagnetic wave interaction with irrotational moving fluid based on Maxwell equations and Minkowski constitutive relation, noting flow velocity effects on scattering

11 p1689 A72-26471

Ionospheric scattered wave propagation mode and weak echo delay explained by analysis-derived model

11 p1597 A72-26570

Position and minimum scattering algorithms for narrow band signal source received by spaced receivers forming antenna arrays with large separations

11 p1598 A72-26715

Circularly polarized ultrashort radio wave reflection from lunar and planetary surfaces, determining angular scattering spectrum

11 p1599 A72-26908

- Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation 12 p1865 A72-27052
- Stimulated monochromatic electromagnetic wave scattering derived from analysis of nonlinear interactions in magnetoactive plasma 12 p1849 A72-27063
- Multiplicative noise envelope distribution for ionospheric scattering channel from single and diversity radio reception, noting meteor trails effects on electromagnetic wave propagation 12 p1782 A72-27627
- Linearly and circularly polarized electromagnetic field effective scattering areas relationships, considering radar reflection in reverse direction 12 p1783 A72-27629
- Plane monochromatic electromagnetic wave scattering by rotating metallic cylinder, noting frequency shift dependence on cylinder translational motion velocity 13 p1914 A72-28370
- Particle size distribution functions reconstruction from scattered radiation data, discussing accuracy and applicability of small angle, spectral transparency and complete indicatrix methods 13 p1955 A72-28514
- Numerical calculation of electromagnetic scattering properties of two dimensional bodies with arbitrary cross section, considering TM polarization of excitation and fields mode matching 13 p1916 A72-28534
- Ionospheric spread-F mechanism as electromagnetic wave scattering on electron density inhomogeneities, calculating characteristic dependence of height interval on operational frequency 13 p1948 A72-29232
- Strong circularly polarized electromagnetic wave scattering by plasma electron with radiation reaction, determining cross section as function of amplitude and magnetic field strength 13 p2015 A72-29427
- Electromagnetic waves scattering by underdense plasmas, examining intermittency phenomenon due to mixing between turbulent inner and outer inviscid wake 13 p1922 A72-29473
- Millimeter wave scattering at turbulent density discontinuities in plasma from electrodeless inductive discharge 14 p2136 A72-30174
- Electromagnetic waves backscattering in magnetoactive plasma containing random inhomogeneities of electron density, calculating field spatial-time and cross correlation functions 14 p2086 A72-30789
- Electromagnetic wave propagation in nondispersing media with spatial-time fluctuations of dielectric permittivity, calculating scattered field by perturbation method 14 p2086 A72-30796
- Noncoherent isotropic scattering in plane parallel finite layer, considering Doppler line broadening 15 p2273 A72-31331
- Electromagnetic single scattering near critical point in inhomogeneous optical medium with variable refractivity, discussing reflected light effect and Poynting vector reduction to Bragg conditions 15 p2279 A72-32693
- Solar radiation anisotropic nonconservative scattering in semiinfinite atmosphere, calculating plane and spherical albedo by exponential kernel approximation 16 p2446 A72-33463
- Pulsar pulse broadening due to multiple scattering by interstellar medium, finding exponential decay time constant relation to rms broadening of angular size 16 p2457 A72-33686
- Solar radiation absorption and scattering by particles in atmosphere, emphasizing absorption/backscatter ratio explanation 16 p2388 A72-34023
- Scattering of electromagnetic waves from an inhomogeneous magnetoplasma column moving in the axial direction. 17 p2587 A72-34359
- On the behavior of thin-wire antennas and scatterers arbitrarily located within a parallel-plate region. 17 p2513 A72-34365
- Integral equation for electromagnetic wave scattering by thin dielectric ring 17 p2526 A72-34379
- Book - Angular scattering functions for spheroids 17 p2582 A72-35457
- Scattering characteristics of a cross-junction of oversized waveguides. 18 p2660 A72-36486
- Influence of interstellar discontinuities on the shape of radio pulses from pulsars 18 p2726 A72-36652
- Influence of an interface on the spectrum of incoherently reflected waves 18 p2661 A72-36657
- Universe expansion induced electromagnetic wave backscattering absence in Robertson-Walker spacetime as consequence of motion equations conformal invariance 18 p2711 A72-36711
- Electromagnetic radiation and scattering from loaded bodies of revolution of arbitrary shape, calculating plane wave scattering from apertures in cylinders and hemispheres 18 p2662 A72-36927
- High level atmospheric refraction of electromagnetic waves as function of elevation and meteorological element vertical stratification 19 p2764 A72-37349
- Black hole rotational energy extraction by super-radiant scattering with impinging wave amplification and by floating particle orbits with zero net radiation reaction 19 p2857 A72-37720
- Scattering resonances of electromagnetic wave by an infinite plane grating with reflector. 19 p2767 A72-38612
- Scattering diagram for mutual cross coupling between antennas in Fresnel zone 20 p2907 A72-39063
- Dynamic electromagnetic scattering pattern of flying object, constructing quasi-ergodicity condition to compute standard statistical descriptions for recognition 20 p2903 A72-39071
- Electromagnetic wave scattering by electron charge density fluctuations in plane waveguide with magnetoactive plasma, showing cross section spectrum function of plasma properties 20 p2903 A72-39072
- Scattering of electromagnetic pulse waves by conducting wedge in an uniaxially anisotropic medium. 20 p2903 A72-39269
- Linear and circular polarization of synchro-Compton radiation scattered by optically thin power law distribution of gyrating ultrarelativistic electrons 20 p2965 A72-39893
- Scattering from inhomogeneous cylindrically symmetric lenses with a line infinity in the index of refraction. 21 p3050 A72-40148
- Scattering by a cylindrical semiconductor rod of anisotropic permittivity perpendicular to the electric field in a rectangular waveguide. 21 p3023 A72-41836
- On the comparison of phase and multi-layer techniques for numerical solution of the scattering problems. 22 p3154 A72-42305
- Infrared observations of the moon and their interpretation. 22 p3225 A72-42527
- Application of multiple-scattering theory to the derivation of kinetic equations for waves in a weakly turbulent plasma 22 p3212 A72-42665
- Gamma ray scattering asymmetries of Fe 57 nucleus, discussing hyperfine structure and conjugate spin transition 22 p3209 A72-42924
- Radiation from a free electron interacting with a circularly polarized laser pulse. 23 p3296 A72-43875
- Calculation of stellar and diffuse radiation for a plane-parallel semiinfinite model of the Galaxy. 23 p3338 A72-44027
- Spectral characteristics of the scattering field of a uniformly traveling and rotating impedance cylinder 23 p3265 A72-44202
- Scattering of obliquely incident waves by inhomogeneous fibers. 24 p3379 A72-44710
- The effect of the subsurface on the depolarization of rough-surface backscatter. 24 p3380 A72-45635
- The transient electromagnetic response of a spherical shell of arbitrary thickness. 24 p3381 A72-45638
- Velocity-dependent multiple scattering by two thin cylinders. 24 p3381 A72-45641
- Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation 24 p3425 A72-45705
- Stimulated monochromatic electromagnetic wave scattering derived from analysis of nonlinear interactions in magnetoactive plasma 24 p3431 A72-45716
- ELECTROMAGNETIC SHIELDING**
NT RADIO FREQUENCY SHIELDING
 Active shielding against radiation in space using charged particle deflection by electric and magnetic fields [CFRN-71-16] 02 p0258 A72-12076
 Shielding and semitransparent sporadic F layer fine structure characteristics from sporadic observations data analysis 02 p0222 A72-12523
- Semiconductor devices potential interference and biological exposure hazards in microwave leakage field, considering shielding and filtering methods for reducing susceptibility 03 p0320 A72-14032
- TEM modes characteristics in shielded stripline with four internal strips, tabulating characteristic impedances at different line parameters 05 p0636 A72-16339
- Bandwidth properties and design of shielded asymmetrical striplines filled by dielectric 05 p0636 A72-16340
- Pulsed voltage oscillator for nanosecond range operation under pressure in nitrogen-filled tank as conducting shield 07 p0946 A72-19957
- Shielding procedures to control electromagnetic interference /EMT/ in design and operating electric equipment 10 p1452 A72-24813
- Electronic equipment shielding against electromagnetic radiation and circuit protection against unwanted electrical signals 15 p2209 A72-32570
- The shielding effect of metallic spherical envelopes with respect to very short EM waves and pulses 17 p2530 A72-35223
- RF shielding and electrical properties of boron and carbon fiber reinforced composites. 20 p2944 A72-38987
- Reduction of temperature difference in shielding pipes for light-beam transmission. 20 p2903 A72-39267

Higher order cyclotron harmonic resonance of electrons with electromagnetic wave propagation through collisionless magnetoplasma, deriving energy oscillation time period

01 p0105 A72-10023

Scattering cross section of electromagnetic wave by collisionless plasma perpendicular to applied magnetic field

01 p0105 A72-10025

Oblique electromagnetic wave propagation modes in anisotropic ionized stratified medium, investigating electric field and polarization components

01 p0106 A72-10133

Ordinary electromagnetic waves propagating in plasma, calculating thermal and particle collisional corrections with moment approach

01 p0107 A72-10140

Electromagnetic wave line-of-sight propagation based on geometrical optics for different refractivity profiles above sea, noting earth surface reflection role

01 p0026 A72-10404

Electromagnetic wave propagation anomalies over sea, comparing calculated and measured field strengths based on simultaneous refractivity vertical distribution measurement

01 p0026 A72-10405

VLF electromagnetic wave perturbations in transpolar propagation, noting time dependent behavior of polar cap absorption effects

01 p0056 A72-10441

Spacecraft-ground communications system, discussing electromagnetic wave propagation and frequency bands

01 p0027 A72-10445

Energy and momentum transfer between fields and particles in plasma crossed by transverse electromagnetic wave, investigating MHD stability

01 p0109 A72-10884

Nonlinear skin effects in gas discharge and semiconductor plasmas during electromagnetic wave propagation and dissipation, obtaining wave amplitude and carrier temperature dependence on reflection parameters

01 p0102 A72-10974

Electromagnetic waves diffusion by space-time fluctuations in plasma electron density [ONFERA, TP NO. 1043]

01 p0110 A72-11180

Soviet book on electromagnetic fields and waves covering propagation in anisotropic media, waveguides and cavity resonators, diffraction interactions, etc

01 p0031 A72-11200

Strong linearly polarized electromagnetic wave propagation in overdense plasmas, considering relativistic electron velocities and nonlinear penetration effect [AD-736322]

01 p0111 A72-11226

Nonreciprocal guiding devices for electromagnetic surface waves, noting large bandwidth and nonrectilinear polarization of alternating magnetic field

01 p0044 A72-11323

Electromagnetic wave propagation perpendicular to applied uniform magnetic field in relativistic plasma, deriving dispersion relation for stability criterion

02 p0264 A72-12024

Null electromagnetic field propagation in general relativity, applying to Stokes parameters definitions for monochromatic light

02 p0259 A72-12178

Normal electromagnetic wave propagation in randomly inhomogeneous medium in presence of superrefraction, deriving phase fluctuation spectra by perturbation method

02 p0180 A72-12587

Markov chain successive approximation method for electromagnetic wave propagation in medium with random large discontinuities, using scalar parabolic equation

02 p0181 A72-12588

Electromagnetic wave reflection and transmission by stratified multilayered parallelly moving plasma media, using propagation matrices

02 p0182 A72-12652

Circularly polarized electromagnetic wave propagation through afterglow helium slab plasma near electron cyclotron frequency

02 p0266 A72-12653

Diffraction of plane electromagnetic waves of arbitrary orientation and incidence on triangular grid of cylindrical conductors

02 p0183 A72-12753

Nonducted vlf wave propagation near plasmapause during whistlers based on diffusive equilibrium and collisionless models for magnetospheric electron density distribution

02 p0222 A72-12873

Right handed circularly polarized electromagnetic wave propagation in hot inhomogeneous plasma, deriving local dispersion equation by WKB methods

03 p0393 A72-12949

Penetration depth of hf electromagnetic waves in weakly ionized plasma, considering nonlinearity effect on ionization balance

03 p0394 A72-13085

Plane electromagnetic wave reflection and transmission at moving boundary between two dielectric media

03 p0321 A72-13091

Time harmonic electromagnetic wave diffraction by thin conducting circular disk at different media plane interface, calculating induced surface current density and scattering cross section

03 p0322 A72-13237

Plasma conductivity frequencies, including electromagnetic wave propagation in alternating field and scattered light intensities

03 p0396 A72-13653

Dielectric materials for antenna system radomes, discussing electromagnetic wave propagation and climatic factors effects

03 p0381 A72-14362

Relativistic equations of motion of charged particle interacting with plane electromagnetic wave propagating at arbitrary angle to uniform magnetic field for magnetosphere model

04 p0554 A72-14406

Parallel polarized electromagnetic waves scattering by radially inhomogeneous isotropic dielectric cylinders, computing scattered field coefficients by Fourier least squares fit technique

04 p0485 A72-14413

Current source generated electromagnetic and electroacoustic wave propagation through homogeneous, isotropic compressible electron-ion plasma, using two fluid continuum theory

04 p0554 A72-14510

Electromagnetic wave propagation across external magnetic field in contraststreaming thermally anisotropic plasmas, investigating plasma stability

04 p0556 A72-14942

Inhomogeneous nonstationary medium caused electromagnetic wavefront phase disturbance reduction in holography by averaging

04 p0522 A72-15381

Average ray direction and mean square deviation formula for electromagnetic wave propagation in random inhomogeneous medium suited for calculation by ray tracing program

04 p0488 A72-15382

WKB type solution for electromagnetic wave propagation in circularly cylindrical coordinate system with rho-dependent refractivity, using Bessel function

04 p0488 A72-15384

Electromagnetic wave transformation at moving boundary discontinuity with reactive parameters in dispersive medium by Lagrangian field equations

04 p0489 A72-15388

Electromagnetic wave propagation and stability in inhomogeneous collisionless plasma under static magnetic field

04 p0490 A72-15401

Plane electromagnetic wave diffraction by periodic lattice of long finite conductivity cylinders with arbitrary electric radius

04 p0491 A72-15414

Electromagnetic wave reflection from region with variable drift velocity and polarization of waves propagating in nonuniformly moving medium, applying to isotropic plasma

04 p0491 A72-15421

Electromagnetic wave propagation in plane and spherical waveguide channels with conducting lower wall, investigating transverse wave spectrum dependence on curvature and boundary conditions

04 p0492 A72-15441

Magnetoionic mode reciprocity for oblique incident electromagnetic wave propagation through birefringent stratified media

04 p0492 A72-15445

Plane harmonic electromagnetic wave diffraction by conducting parallel half planes in uniaxially anisotropic media

04 p0492 A72-15447

Weakly divergent beam propagation of electromagnetic waves in statistically inhomogeneous nonlinear medium with dielectric constant dependence, using small perturbation method

05 p0625 A72-15818

Maxwell equation spinor formulation for Schwarzschild gravitational field effects on spherical electromagnetic waves propagation

05 p0689 A72-16165

Electromagnetic wave propagation in rectangular waveguide with periodic ferrite structure, presenting computer graphics for stop bandwidth vs magnetic field strength

05 p0627 A72-16342

Book on electromagnetic waves in moving magnetoplasmas covering propagation in infinite and bounded plasmas subject to magnetic fields for nonrelativistic and relativistic velocities

05 p0695 A72-16396

Equivalent dielectric properties of infinite two dimensional periodic metal tape structures in presence of electromagnetic waves propagating in various directions

05 p0628 A72-16410

Electromagnetic wave transmission and reflection by semiinfinite moving anisotropic plasma with parallel static magnetic field, considering incident H wave

05 p0696 A72-16623

Geomagnetic pulsations correlation with h type ionospheric sporadic echoes, considering effects on electromagnetic disturbances transmission

05 p0659 A72-16725

Multifrequency plane, spherical and beam waves propagation, calculating temporal frequency spectra in turbulent atmosphere

06 p0771 A72-17339

Electromagnetic wave scattering from curved ground surfaces and transmission through turbulent medium, obtaining solution by spatial Fourier transform of three transfer functions product

06 p0771 A72-17340

Electromagnetic plane wave diffraction by infinite slit in screen with surface impedance, deriving field and transmission coefficient by asymptotic numerical solution

06 p0771 A72-17352

Nonlinear amplitude distribution of electromagnetic wave propagating in plasma near hybrid resonance frequencies

06 p0771 A72-17390

Electromagnetic wave propagation and thermal spread in uniform magnetoplasma at electron-cyclotron resonance frequencies, discussing kinetic and multifield theory

06 p0854 A72-17489

Waveform distortion of strong field amplitude modulated plane electromagnetic wave propagating in anisotropic plasma

06 p0862 A72-18338

Refraction of electromagnetic wave with electric field perpendicular to applied magnetic field in anisotropic plasma cylinder cross section

07 p1046 A72-20507

Correlation functions describing fluctuation of slow electromagnetic waves in plasma layer

08 p1212 A72-21065

Steady phase direction at time of electromagnetic wave transmission from one isotropic absorbing medium to another

08 p1132 A72-21221

Polarization corrections for normal electromagnetic waves passing from homogeneous to nonhomogeneous anisotropic medium

08 p1135 A72-21735

Electromagnetic wave propagation along open rectangular dielectric waveguide, deriving dispersion equations for surface waves propagation constants

08 p1136 A72-21739

Quantizing magnetic field effect on electromagnetic wave propagation in multivalley n-type Si and Ge and PbTe semiconductors

08 p1218 A72-21878

Soviet book on Riemann-Hilbert problem method in electromagnetic waves theory, covering wave diffraction, scattering and propagation, waveguides and open resonators

08 p1137 A72-22021

Transmission and passband properties of polyethylene echelette gratings and combined filters for long wave IR spectrum

08 p1210 A72-22038

Effective transmission coefficient increase for Langmuir and electromagnetic waves passing through density barrier via perturbation transport by resonant electrons

08 p1216 A72-22090

Cylindrically guided hybrid TE and TM electromagnetic wave reflection and transmission from Maxwell equations and boundary value problems solution

09 p1278 A72-22605

Random gravitational plane wave metric effect on electromagnetic wave mean value, noting light dispersion and attenuation

09 p1351 A72-22682

Layer-like atmosphere discontinuities effects on earth-space communications, noting electromagnetic waves alteration and reflection by grazing incidence

09 p1279 A72-22898

Dielectric tensor for electromagnetic waves in weakly inhomogeneous anisotropic media, taking into account permittivity and conductivity fluctuations

09 p1280 A72-23230

Time dependent parallel and cross polarized electromagnetic pulse propagation in magnetoionic medium for normal incidence

09 p1280 A72-23231

Electromagnetic and plasma wave reflection at interface between moving dielectric medium and compressible plasma

09 p1364 A72-23243

Modulated electromagnetic wave transmission in dispersive medium with cubic nonlinearity, discussing solitary wave and instabilities in two-wave interaction

09 p1352 A72-23475

Electromagnetic wave propagation obliquely incident on thermal inhomogeneous plasma at frequencies near second electron cyclotron harmonic

09 p1365 A72-23521

Energy transfer optimization in electromagnetic wave transmission through dispersive dielectric media

09 p1365 A72-23522

Nonlinear conductivity of plasma with FM electromagnetic wave propagation, proposing electronic current density calculation method

10 p1519 A72-24130

FM electromagnetic wave propagation in Lorentzian plasma, taking into account harmonic generations effect

10 p1520 A72-24209

Electromagnetic wave propagation perpendicular to magnetic field in two-component warm plasma, obtaining dispersion relations for transverse waves

10 p1520 A72-24350

Electromagnetic waves penetration through magnetized plasma into lower hybrid resonance region examined in geometrical optics approximation

10 p1521 A72-24352

Optimal control computation for nonlinear hyperbolic partial differential system by gradient and quasi-linearization techniques, noting MHD, fluid flow and electromagnetic wave propagation

10 p1456 A72-24453

Induced Compton scattering and nonlinear electromagnetic wave propagation in laser beam focused plasma

10 p1522 A72-24605

Intensity dependent propagation characteristics of circularly polarized high power laser radiation in dense electron plasma, calculating energy losses

10 p1522 A72-24607

Laboratory electromagnetic scale modelling for studying geophysical and propagation boundary value problems

10 p1512 A72-24741

Inhomogeneous rarefied plasma, investigating non-local, linear and nonlinear effects on electromagnetic wave reflection and transmission

11 p1694 A72-25717

Plane and uniform heterogeneous electromagnetic waves reflection, observing Goos-Hanchen and Imbert effects

11 p1597 A72-26482

Electromagnetic wave transformation and absorption in Ar plasma with nonmonotonic longitudinal density distribution

11 p1699 A72-26758

Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation

12 p1865 A72-27052

Gage for solids and liquids moisture content measurement based on phase shift of UHF electromagnetic wave propagating through tested material, noting specimen thickness optimization

12 p1807 A72-27466

Radiation patterns of circular loop antenna in isotropic compressible plasma, discussing far fields for electromagnetic and electron plasma waves

12 p1790 A72-27491

VLF and LF electromagnetic ground wave propagation between points on smooth curved lunar surface surrounded by free space or cold isotropic plasma

12 p1783 A72-27635

Equivalent atmospheric turbulence models concept for structure function behavior of electromagnetic wave propagation, noting dependence on model characteristics

12 p1841 A72-27946

Russian papers on light scattering covering electromagnetic propagation in turbid media, transport equation solution methods, unsteady scattering, spectral line radiation and nonlinear phenomena

13 p2001 A72-28501

Obliquely incident electromagnetic waves reflection and transmission by moving compressible plasma slab, applying field and wave-four vectors Lorentz transformations to wave equations

13 p2010 A72-28543

Electromagnetic wave propagation in cylindrical plasma column of electrons and ions with and without applied uniform magnetic field in absence of collisions

13 p2010 A72-28681

Electromagnetic cylindrical wave diffraction by linear emitter in parabolic cylinder with slots

13 p1917 A72-28709

Growth rates of unstable electromagnetic waves propagating perpendicularly to symmetric counterstreaming finite temperature plasmas

13 p2012 A72-29129

Electromagnetic wave diffraction on ideally conducting homogeneous bodies of revolution with arbitrary complex permittivity and permeability, using variables separation method

13 p1920 A72-29279

Penetration depth of HF electromagnetic waves in weakly ionized plasma, considering nonlinearity effect on ionization balance

13 p2015 A72-29435

Randomized electromagnetic field propagation through uniform medium, deriving autocorrelation and intensity fluctuation spectrum expressions

13 p2007 A72-30124

Strong LF electromagnetic wave propagation in semiconductors with inelastic scattering of current carriers by optical phonons, calculating harmonics reflection coefficients

14 p2142 A72-30361

Electromagnetic waves propagation in inhomogeneous moving cold electron plasma without external magnetic field and collisions, investigating dynamical effects

14 p2086 A72-30790

Electromagnetic wave propagation in nondispersing media with spatial-time fluctuations of dielectric permittivity, calculating scattered field by perturbation method

14 p2086 A72-30796

Two counter streaming plasmas with anisotropic temperatures, deriving instability condition for ordinary mode electromagnetic propagation perpendicular to external magnetic field

14 p2140 A72-30935

Design data of guided wave structures for electrooptical modulation, evaluating propagation wave numbers, attenuation rate, phase modulation rate and dispersion characteristic

15 p2246 A72-31667

Precision frequency standards practical utility under field operating conditions, discussing propagation effects due to atmospheric and frequency parameters

15 p2199 A72-32066

Thin wire parallel to interface between two homogeneous half spaces, deriving transmission current wave propagation constant from boundary value problem solution

15 p2200 A72-32108

Mathematical model for modified ordinary electromagnetic wave propagation in presence of two cold counterstreaming plasma electron beams, noting instability regions and growth rate

15 p2286 A72-32274

Electromagnetic waves penetration through conducting gasket used to protect sensitive devices in aircraft, investigating field strength variation with distance from gasket

15 p2202 A72-32571

Plane electromagnetic wave diffraction on periodic arbitrary profile array, presenting near and far field asymptotic characteristics

15 p2202 A72-32660

Earth crust waveguide three layer model for electromagnetic wave propagation, showing mode relation to absorption conditions

16 p2362 A72-33074

Longitudinal and transverse electromagnetic wave penetration into semifinite collisional plasma with fractionally accommodating boundary, obtaining reflection coefficient and surface impedance

16 p2435 A72-33449

Field distribution and absorption coefficient calculations for normal incidence of extraordinary electromagnetic wave on linear plasma layer in hybrid resonance region

16 p2363 A72-33480

Monochromatic electromagnetic wave reflection and transmission at oblique incidence on sharp plasma boundary of moving ionization source

16 p2363 A72-33481

Electromagnetic wave propagation in uniform and nonuniform plasmas with enough strength to cause relativistic electron velocities, considering linear polarization and nonlinear penetration effects

16 p2438 A72-33926

Electromagnetic waves attenuation and phase velocity correction in polycrystals with anisotropic crystal distribution

16 p2365 A72-34013

Gaussian electromagnetic radiation beam propagation in turbulent medium, calculating broadening dependence on outer scale by modified Karman spectrum characterization

17 p2580 A72-34291

An electromagnetic analysis of a cylindrical homogeneous lens

17 p2525 A72-34362

Invariant imbedding in time-varying homogeneous nondispersive media

17 p2513 A72-34366

Electromagnetic wave propagation and wave-vector diagram in space-time periodic media

17 p2514 A72-34381

Diffraction of electromagnetic waves by a two-dimensional aperture with arbitrary cross-sectional shape

17 p2514 A72-34385

Wave propagation in a stratified turbulent magnetized plasma. I

17 p2587 A72-34516

Effective transmission coefficient increase for Langmuir and electromagnetic waves passing through density barrier via perturbation transport by resonant electrons

17 p2588 A72-34661

Application of a limit theorem to solutions of a stochastic differential equation

17 p2575 A72-34866

Electromagnetic waves penetration through magnetized plasma into lower hybrid resonance region examined in geometrical optics approximation

17 p2589 A72-34953

VLF wave propagation and its interaction with the magnetoplasma

17 p2516 A72-35357

Circular waveguides lined with artificial anisotropic dielectrics

17 p2530 A72-35468

Instability of electromagnetic cyclotron harmonic waves in plasmas

17 p2592 A72-35775

Local characteristics of ray propagation in an inhomogeneous anisotropic ionosphere

18 p2686 A72-36229

Focusing of intense electromagnetic waves in ducts with saturating nonlinearity

18 p2659 A72-36293

Propagation of an electromagnetic shock discontinuity in a non-linear isotropic material

18 p2712 A72-36992

Series solution for electromagnetic wave propagation in radially and axially nonuniform media - Geometrical-optics approximation

18 p2712 A72-37024

Propagation of electromagnetic waves in a rarefied plasma situated in an alternating magnetic field

18 p2717 A72-37177

Dispersion curves of mixing mode between electrostatic and electromagnetic waves propagating perpendicularly to ambient magnetic field for hydrogen plasma with Maxwellian velocity profile

19 p2839 A72-37335

Drude theory of electromagnetic waves in an inclined magnetic field. I - One-band model of charge carriers

19 p2840 A72-37510

Parametric excitation of electromagnetic waves

19 p2834 A72-37718

Transmission and reflection of an electromagnetic wave incident normally on a plasma half-space

19 p2840 A72-37726

Waveguides of arbitrary cross section by solution of a nonlinear integral eigenvalue equation

19 p2773 A72-38292

Application of dual integral equations to the problem of electromagnetic wave diffraction by a thin conducting ribbon

19 p2766 A72-38526

Model random medium with two kinds of dielectric layers stacked in arbitrary proportions, calculating electromagnetic wave propagation characteristics by transmission line analogy

19 p2767 A72-38613

Numerical solution to the problem of propagation of ELF electromagnetic waves in the lower ionosphere

19 p2767 A72-38651

Paraxial electromagnetic wave packets diffraction on thin conducting periodic structures and dielectric plate, noting packet width and phase front curvature changes

19 p2767 A72-38653

Plane and cylindrical electromagnetic waves diffraction on infinitely long cylindrical bodies, calculating induced currents, diffraction patterns and near fields

19 p2767 A72-38654

Plane TE polarized electromagnetic wave diffraction on infinite conducting cylinder in nonhomogeneous medium, calculating far field diffraction patterns

19 p2768 A72-38656

Pulse propagation in a magnetoplasma. I - Longitudinal propagation

19 p2843 A72-38751

Plane electromagnetic wave diffraction on thin ribbons grating, discussing scattered field singularities for E polarized waves

19 p2769 A72-38850

Plane electromagnetic waves diffraction at arbitrary orientation and incidence on triangular grid of cylindrical conductors

20 p2902 A72-39059

Electromagnetic wave dispersion in ionized cosmic medium for spatially flat Brans-Dicke cosmology

20 p2969 A72-39265

On diffraction and focusing in anisotropic crystals

20 p2961 A72-39779

Electromagnetic-wave propagation along a horizontal wire above ground. 21 p3015 A72-40633

Dispersion equations solved for electron and ion cyclotron waves propagating perpendicularly to magnetic field in plasma 21 p3091 A72-40656

Radiation of EM waves with Walsh-function time variation - Preliminary results. 21 p3020 A72-40902

Partial differential equation solution for plane electromagnetic wave diffraction by infinite dielectric cylinder of arbitrary cross section 21 p3085 A72-41199

Propagation constants of electromagnetic waves along an infinitely long conducting wire in a general magnetoplasma. 21 p3092 A72-41266

Diffraction of electromagnetic plane waves by infinite slit perforated in a conducting screen with finite thickness. 21 p3022 A72-41267

Electromagnetic wave propagation in a moving sinusoidal stratified turbulent plasma medium. 21 p3093 A72-41323

Book - Terrestrial propagation of long electromagnetic waves. 21 p3023 A72-41532

Radiative transport analysis of electromagnetic propagation in isotropic plasma turbulence. 21 p3094 A72-41634

Propagation of electromagnetic disturbances and the stability of stationary states in media with a nonlinear Ohm's law 21 p3086 A72-41651

Diffraction of an electromagnetic wave by a noninfinitely conductive cylindrical object of arbitrary cross section 22 p3153 A72-41991

A problem of electromagnetic wave propagation in a moving plane stratified medium 22 p3155 A72-42653

Diffraction of plane electromagnetic wave at a corrugated dielectric surface 22 p3155 A72-42662

Variation of tropospheric slant-path attenuation in the UK at 11.75 and 17 GHz. 22 p3155 A72-42751

Propagation of electromagnetic waves in a weakly ionized warm magnetoplasma. 22 p3155 A72-42991

German monograph - Electromagnetic wave propagation inside a paraboloid of revolution subjected to different types of excitation. 22 p3156 A72-43070

Weakly divergent beam propagation of electromagnetic waves in statistically inhomogeneous nonlinear medium with dielectric constant dependence, using small perturbation method 23 p3263 A72-43426

Exact solution of the equations of molecular optics for refraction and reflection of an electromagnetic wave on a semi-infinite dielectric. 23 p3313 A72-43803

Circular waveguide in an anisotropic medium 23 p3264 A72-44156

Method for solving the problem of radiation in an anisotropic plasma 23 p3321 A72-44220

Ray optics applications to electromagnetics and other disciplines, discussing matrix representation for wavefront curvature and field computation simplification via transformations 23 p3314 A72-44331

Circularly polarized waves in magnetoplasmas containing negative ions. 23 p3323 A72-44533

Book - The effects of the turbulent atmosphere on wave propagation. 24 p3379 A72-44650

Electromagnetic-wave propagation in a random nonlinear dispersive medium. 24 p3379 A72-44784

Determination of refraction in the propagation of electromagnetic waves at the earth's surface 24 p3379 A72-44865

Measurement of best time-delay resolution obtainable along east-west and north-south ionospheric paths. 24 p3381 A72-45637

Electromagnetic propagation from flanged waveguide, studying diffraction, radiation patterns and reflection/modal coefficients 24 p3381 A72-45642

Radiation from an open-ended waveguide with extended dielectric loading. 24 p3381 A72-45643

Reflection and transmission of electromagnetic waves by a moving inhomogeneous medium. 24 p3381 A72-45644

Radiation propagation in optically thin anisotropic noncrystalline media, obtaining explicit formulas for Stokes parameters of transmitted and scattered radiation 24 p3425 A72-45705

ELECTROMAGNETIC WAVES U ELECTROMAGNETIC RADIATION

ELECTROMAGNETISM

NT MAGNETOSTATICS

Electromagnetic wave theory - Conference, Tiflis, U.S.S.R., September 1971 04 p0488 A72-15376

Spatio-temporal tensorial structure of fluid magnetodynamic equations in terms of electromagnetism and continuum mechanics 06 p0861 A72-18103

ELECTROMAGNETS

NT HIGH FIELD MAGNETS

NT SUPERCONDUCTING MAGNETS

Electromagnetic suspension - Conference, Southampton, England, July 1971 10 p1460 A72-24756

Automatic electromagnetic suspensions using tuned RLC saturable reactor control 10 p1460 A72-24761

Electromagnetic remote model positioning sensing system for wind tunnels with magnetic suspension, using differential transformer action 10 p1461 A72-24762

ELECTROMECHANICAL DEVICES

Electromechanical nose wheel steering system for general aviation aircraft ground maneuverability improvement, describing design 01 p0006 A72-10963

Synchros as electromechanical function generators and receivers for analog computers, examining errors in standard resolvers operation 03 p0328 A72-13841

Man machine systems in navigation, discussing problems of integrating man with high speed and high capacity electromechanical systems with allowance for human weaknesses and abilities 09 p1269 A72-22777

Electromechanical system for wire drive along stellar right ascension of meridian circle of Odessa Astronomical Observatory 09 p1311 A72-23061

Robots /electromechanical systems with local computers and sensor controlling motors and effectors/ space application categories and operating and decision making requirements 10 p1458 A72-23777

Transient calculation method for electric drive units described by first and second order differential equations, using special transformation for integral curve curvature determination 10 p1423 A72-24754

Dynamic processes of electric drive system with electromagnetic clutch modeled by analog computer element with logical input-output relation 10 p1423 A72-24755

Electromechanical coupling and acoustic impedance response in piezoelectric transducer with diffusion under fixed charge 11 p1636 A72-26590

Electromechanical redundant activating mechanism for F-4 aircraft dual tandem hydraulic power servo, noting application to fly by wire control 14 p2072 A72-30422

FRAM /failure rate appraisal machine/ concept and application for modular electronic and electromechanical assemblies environmental cycling tests, noting technical and economical effectiveness 14 p2093 A72-31169

Method and equipment for checking chronometers by one-second timing radio signals under field conditions 19 p2795 A72-37346

Electromechanical measurement systems using analog transducers with ohmic resistance, electric and magnetic fields and digital/frequency and stochastic outputs 19 p2800 A72-37755

Pulsed operation mode of acoustic system of damper-piezovibrator-layer load connected into electrical circuit of thyatron generator 19 p2805 A72-38764

Book - Electromechanical system components. 20 p2890 A72-39811

Electro-osmotic energy conversion in the glass/n-propanol system. 21 p2997 A72-41384

Electromechanical filter with attenuation poles consisting of multi-mode vibrators. 21 p3036 A72-41828

An inertially balanced servo. 23 p3311 A72-43866

ELECTROMECHANICS

Metal wear mechanism during electromechanical processing explained by configurational localization model 05 p0665 A72-16094

Electromechanical machining metal removal mechanism based on configurational localization model, relating wear processes to electron exchange and free energy margin decrease 07 p0996 A72-19989

Optimal parameters selection for natural vibrations maximum damping rate, applying method to two mass electromechanical system 11 p1686 A72-25533

Electromechanical, photomechanical and concentration effects of impurities in semiconductors 21 p3098 A72-41677

ELECTROMIGRATION

Grain boundary migration measurements in bicrystalline Al under intense electric field, using optical microscope 01 p0089 A72-11182

Anodized aluminum metallization for reducing electromigration induced failure modes in silicon wafers 03 p0365 A72-14286

Evaporation, superficial diffusion and oxidation role in grain junctions electromigration phenomenon in binary Al crystals traversed by high density continuous current 10 p1498 A72-24860

Physical limits of semiconductor devices miniaturization for electronic computers, considering thermal energy dissipation, electrical resistance and high current density induced electromigration effects 23 p3273 A72-44332

ELECTROMOTIVE FORCES

NT PONDEROMOTIVE FORCES

Positive electrode materials for high energy density batteries with Li negative electrode, calculating discharge emf for various salts 06 p0760 A72-17575

Frequency discriminator like two-channel device with greater sensitivity by crossed feedback, calculating variable frequency emf effect on operation 07 p0938 A72-18853

Anomalous Hall effect of polarized electrons spin-orbit interactions in semiconductors, involving emf appearance in electric field and polarized light 07 p1048 A72-19642

Thomson autooscillatory systems synchronization and small external sinusoidal emf effect with hard and soft bounding of amplitude deviations 08 p1142 A72-21769

Alternating Josephson effect and junctions applications to radiation generators and detectors, electromotive force regulators, oscillators, mixers and noise thermometers 09 p1370 A72-22799

Electrical conductivity and thermal emf as function of temperature in CdSb, discussing energy spectrum and crystallization 09 p1372 A72-23479

Temperature dependence of emf coefficient Hall constant and conductivity in solid and liquid phases of InSe semiconductor during melting 10 p1526 A72-24267

Digital precision measurement of thermocouple thermal emf at 200-1000 C, examining block diagram 11 p1634 A72-26457

Measurement circuit for temperature dependence of thermal emf and electrical conductivity in thermoelectric materials 12 p1807 A72-27452

Steel components contact fatigue kinetics measurement by emf increase of inductive sensor 12 p1887 A72-28245

Dispersion equation determining periodic structures natural modes propagation constants, using induced electromotive and magnetomotive forces method 15 p2195 A72-31655

Five channel recording instrument for energy dissipation evaluation in electric machines from thermal emf measurements 16 p2392 A72-33284

Temperature dependence of the thermal electromotive force and of the Nerst-Ettingshausen effect in nickel-cobalt alloys 22 p3187 A72-41855

Theoretical interpretation of emf generation between noncompressed parts of bimetallic junction traversed by shock wave, taking into account radiation pressure of phonon gas 22 p3207 A72-43050

Isobar-isothermal potentials, entropy and formation heat of chromium silicides from thermoelectromotive force measurements of high temperature galvanic elements 23 p3298 A72-43286

Changes in the physical properties of metals subjected to elastoplastic deformation 23 p3303 A72-44199

Anomalous Hall effect of polarized electrons spin-orbit interactions in semiconductors, involving emf appearance in electric field and polarized light 24 p3431 A72-44573

ELECTROMYOGRAMS

U ELECTROMYOGRAPHY

ELECTROMYOGRAPHS

U ELECTROMYOGRAPHY

ELECTROMYOGRAPHY

Optimum cylindrical handle size determination by muscle electromyography, considering gripping task, routine performance and fatigue test 01 p0017 A72-10119

Human and monkey muscle tonic vibration reflex response to vibratory stimulation dependent on frequency range, electromyograph discharge interval length, etc 02 p0163 A72-12250

Electromyographic determination of muscular compliance during arm movements, using on-line analog computer
04 p0478 A72-14708

Frog and rabbit sciatic nerve afferent impulse recordings during prolonged sinusoidal vibration of foot
04 p0474 A72-15235

Electromyogram study of antagonist muscles reactions to Achilles tendon percussion or whole body sudden motion via test stand jerking
07 p0915 A72-18864

Electromyogram and myogram responses in phasic stretch reflex under prestrain conditions as index of fusimotor activity level in normal humans
11 p1588 A72-26632

Dynamic bioelectric impedance level of tissue area between active electromyograph electrodes related to human skeletal muscle fatigue
13 p1905 A72-29332

Surface electrode position effect on electromyogram recording of electrical activity during repeated biceps and triceps brachii contractions
15 p2190 A72-32489

Surface electrode distance, area and pressure effects on electromyogram recording of large skeletal muscle electrical activity during defined muscular tensions
15 p2190 A72-32490

Description of an easy and simplified test for electromyographic diagnosis of latent spasmodia in flight personnel
19 p2760 A72-37878

The silent period in man during muscle lengthening produced by loading
20 p2892 A72-39590

Synchronization in the work of motor neurons during arbitrary motor activity of various types
21 p2999 A72-40595

Electromyographic investigation of diaphragm cross contraction following spinal cord section in cats, noting diaphragm motoneurons excitation by breathing center pulses
22 p3142 A72-42281

ELECTRON ACCELERATORS

NT BETATRONS

Linear electron acceleration mechanism in plasma, showing polarization fluctuations in diode under strong electric field
03 p0395 A72-13573

Nonlinear nonlaminar 3D electron motion calculation through output cavity of klystron amplifier by Green function
04 p0497 A72-14697

Steady state problem of energy spectrum of variable magnetic field accelerated electrons, considering synchrotron X ray emission of Crab pulsar and nebula
08 p1231 A72-21119

Linear electron acceleration mechanism in plasma, showing polarization fluctuations in diode under strong electric field
11 p1699 A72-26761

Beam-defocusing effect due to filament magnetic fields in electron guns of electron linear accelerators.
19 p2772 A72-37404

The heating of the solar plasma due to microwave phenomena correlated with type II meter bursts.
22 p3222 A72-42041

Electron and plasma particle acceleration by moving pulsed laser, noting appearance of fast particles, hard radiation and neutrons
23 p3295 A72-43312

ELECTRON ATTACHMENT

Electron attachment rate determination by combined photographic and radar observation of meteors
01 p0128 A72-10601

Meteors radio echo duration dependence on electron attachment, photodetachment and turbulent and ambipolar diffusion deionization processes
09 p1383 A72-22502

Meteor method for determining errors in rate measurement of electron attachment to neutral air particles based on nonexistent recombination, turbulent diffusion and photodetachment
09 p1383 A72-22503

Nighttime radar method of meteor radio echo observation to determine electron attachment rate to neutral air particles
09 p1383 A72-22504

Radio echo determination of meteor body distribution by mass with allowance for electron attachment and overestimated nighttime values
09 p1383 A72-22505

Photometric parameters of Leonid meteor ionized trail and turbulent diffusion in M zone, determining electron attachment rate
09 p1384 A72-22510

Electron attachment, photodetachment and turbulent diffusion deionization effects on duration distribution of Geminid meteor radio echoes
09 p1384 A72-22512

Electron attachment rate relation to altitude in radar observation of meteor trails
09 p1384 A72-22513

Oxygen molecule electron affinity role in ion chemistry of lower ionosphere, noting binding energy of ground state
17 p2585 A72-34260

Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors
17 p2595 A72-34952

The capacitances of aniso-type heterojunctions with continuously varying energy band gap and electron affinity in the transition region.
18 p2719 A72-36944

Low-temperature measurements of the three-body electron-attachment coefficient in O₂.
19 p2837 A72-37545

Electron attachment and compound formation in flames. V - Negative ion formation in flames containing chromium and potassium.
22 p3244 A72-42717

Determination of the coefficient of electron attachment to particles of meteor material
23 p3339 A72-44169

ELECTRON AVALANCHE

Transient radiation effects on silicon diodes in avalanche breakdown, considering voltage regulating diode response and temperature compensating junction effects
03 p0334 A72-14090

Avalanche injected current relationship to emitter-base junction breakdown damage in planar n-p-n gated transistors
03 p0336 A72-14279

Stepped-leader theory in cloud-to-ground electrical discharges, estimating step-length for different electric fields by equivalence to electron avalanche transition
04 p0543 A72-14880

Avalanche breakdown voltage of Gaussian Si planar p-n junctions for design and impurity diffusion evaluation
04 p0561 A72-15126

IMPATT diode avalanche region microwave self oscillation mechanism explanation by cavity resonator and feedback theories
06 p0787 A72-18383

Interelectrode gas-filled gap electron avalanche formation effects in weak electric field, calculating ionization coefficient
06 p0863 A72-18411

Electric field induced ionizing potential waves in dense gas, describing avalanching electron gas breakdown into filaments by fluid dynamic and Maxwell field equations
06 p0864 A72-18534

Electrical breakdown in reverse biased semiconductor p-n junctions involving Zener effect and avalanche mechanisms
07 p1048 A72-19821

Laser induced surface damage probability as function of power density, suggesting electron avalanche breakdown as cause
09 p1324 A72-23083

Avalanche carrier multiplication influence on semiconductor device p-n junction quality, discussing current distribution and I-V characteristics during avalanche breakdown
10 p1446 A72-23849

Radioisotope camera based on electron avalanche in liquid Xe, noting spatial and energy resolution advantages over existing gamma ray cameras
15 p2234 A72-31537

Low white noise voltage theory of avalanche diode extended to small multiplication M values and unequal hole and electron avalanche ionization coefficients
15 p2206 A72-31642

Electrical breakdown of hexane investigated by high voltage nanosecond pulses, noting electron avalanche and streamer processes in time lag
15 p2278 A72-32244

Avalanche generation process interpretation for nontransit frequency oscillations association with current runaway in bulk InP microwave diode oscillators
16 p2369 A72-33755

Influence of carrier diffusion on the intrinsic response time of semiconductor avalanches.
18 p2717 A72-36083

Charge injection into the gate dielectric of MOS transistors during junction avalanche.
18 p2668 A72-37104

A fast, high repetition rate avalanche transistors pulser for capacitive loads.
20 p2907 A72-39435

ELECTRON BEAM WELDING

Monograph on electron beam welding covering space charge effect, equipment, metallurgical and mechanical aspects, production engineering, economics and applications
01 p0073 A72-10167

Refractory alloy weldability and brazing, discussing manual and automatic tungsten arc and electron beam processes and fillers
01 p0075 A72-10752

Electron beam welding with filler metal, describing spot and butt welding applications
06 p0819 A72-17498

Beryllium joining by resistance welding, electron beam welding, dip brazing and braze welding
06 p0820 A72-17701

Electron beam welding of W-base alloy to Ta-base alloy, avoiding Re induced embrittlement by pure Mo transition piece
06 p0821 A72-17710

Electron beam welding induced secondary X rays observation with pinhole X ray movie camera to determine beam-metal interactions during penetration
07 p0997 A72-20003

Vacuum welding by electron beam bombardment, discussing electron gun arrangements with plane-radial, plane-linear and linear electron beams
08 p1176 A72-21049

Automatic electron beam welding machine for small components, discussing design, performance and inspection methods
09 p1321 A72-23637

Nucleation mechanism for weld solidification in electron beam and tungsten-inert gas welding processes
09 p1332 A72-23641

Electron beam welding focus effect on fusion zone penetration in thick austenitic stainless steel
09 p1321 A72-23643

Electron beam welding, discussing problem areas, equipment trends and industrial needs
10 p1485 A72-23966

Electron beam machine for thin metal plates welding and cutting under space conditions, noting design features and performance
11 p1639 A72-25809

Soft and out-of-vacuum electron beam welding system for high productivity, describing characteristics
16 p2397 A72-33224

Electron beam welding, machining and drilling, discussing technical and economic factors
16 p2399 A72-33540

Aluminum alloys electron beam weldability, considering precleaning, welding speed, voltage, pre- and post-weld heat treatments effects
17 p2561 A72-35799

German monograph - Investigation of electron beam welding with particular consideration of the mean power density and the radial power density distribution in the beam cross section
19 p2807 A72-37658

Influence of boron on the structure and certain properties of electron-beam melted molybdenum
20 p2939 A72-39313

A radiographic technique using an electron beam welder.
20 p2929 A72-39340

Automatic hermetic-sealing systems for semiconductor devices prepared by electron-beam welding
22 p3158 A72-42124

Electron beam diameter measurement technique and welding technology review, describing experimental apparatus
22 p3183 A72-42448

New space processing experiments for the Skylab missions.
24 p3407 A72-45125

ELECTRON BEAMS

Two dimensional scanning electron beam pumped laser, describing production of coherent emission
01 p0079 A72-10522

Relativistic electron beams in plasma, considering electrostatic instability conditions and critical currents
01 p0109 A72-10975

Thermonuclear microbomb ignition with intense relativistic electron beams for rocket propulsion, discussing achievable exhaust velocities and system optimization
01 p0117 A72-11222

Nonaxisymmetric tubular spiral electron beam interaction with fast waves in cylindrical waveguide within longitudinal magnetic field
02 p0170 A72-11563

Electron beam interaction with electromagnetic waves in longitudinal interaction devices during focusing by homogeneous magnetic and periodic electrostatic fields
02 p0189 A72-11564

Complete suppression of one signal in dual frequency mode of TWT operation, showing electron beam current and accelerating potential dependence on signal amplitude
02 p0189 A72-11565

Two stage M-type amplifier with two electron beams and stepwise variation of cathode, calculating gain in linear approximation
02 p0189 A72-11569

M-type amplifier operation with two electron beams and staggered dual section cathode
02 p0190 A72-11570

Periodic magnetic field effects at gun cathode on electron beam focusing stability under nonoptimal conditions
02 p0190 A72-11572

Absorbed doses at various depths in water target exposed to charged pions, muons and electron beams, using Monte Carlo program [CERN-71-16]
02 p0162 A72-12063

Ionic focusing of electron beam in transverse gas flow, using air, argon and helium

02 p0261 A72-12764

Relativistic beam equilibria above 10,000 amps, considering axial, diffuse, sharp boundary and azimuthal current models

02 p0267 A72-12840

Frequency spectrum analysis of electromagnetic self radiation from plasma interacting with high energy electron beam

03 p0393 A72-13082

Papers on microwave advances covering precision coaxial connectors, O-type linear beam devices, electron dynamics and energy conversion and junction circulators

03 p0424 A72-13229

Transverse fields effects on electron dynamics and energy conversion in O-type linear beam devices of traveling wave amplifiers

03 p0330 A72-13231

Book on microwave electronics covering electron beam microwave devices and solid state microwave oscillators and amplifiers

03 p0331 A72-13233

Intense pulsed electron beam production by current flow through narrow gap filled with plasma

03 p0396 A72-13656

Rolling workability of pure W single crystals grown by electron beam zone melting technique, discussing crack occurrence

03 p0374 A72-13718

Bulk data storage and retrieval with scanning laser and electron beams, discussing spot formation focal sensitivity, noise, beam deflection, speed and media environment

03 p0368 A72-13775

Low energy electron beam irradiation of aluminum-silicon nitride-silicon structures for elimination of bias polarization effects on I-V characteristics

03 p0402 A72-13865

Thin electrostatically self focusing electron streams in mercury vapor, analyzing energy distributions of ions and electrons ejected radially from beam

04 p0554 A72-14407

Wavelength tuning effect on lasing threshold in electron beam pumped GaAs lasers as function of current density and voltage

04 p0528 A72-14545

Electron beam interaction with bunched solid state plasma, deriving slow wave dispersion relations

04 p0561 A72-15080

One dimensional collisionless plasma instability driven by cold electron beam, determining limits from beam trapping

04 p0559 A72-15353

CW millimeter wave power generation with spiraling electron beams, investigating energy spread effects on performance limitation

05 p0636 A72-16363

Ion charge composition in plasma-electron beam system in strong longitudinal magnetic field, noting multiply charged ions production under high temperature conditions

05 p0701 A72-17235

Longitudinal instability of electron beams interacting with passive resonator, considering Landau damping influence by linear differential equations of motion solution

05 p0701 A72-17243

Self induced electron beam collapse prevention by external magnetic field, determining required field strength by scaling law based on simple orbit model

06 p0854 A72-17418

Ion acoustic wave excitation in plasma by modulated energetic electron beam, compared with grid excitation

06 p0856 A72-17519

Plasma wave growth from large diameter electron beam interaction with quiet collisionless unmagnetized discharge plasma, measuring linear dispersion properties

06 p0858 A72-17539

Electron beam interaction with collisionless plasma, obtaining beam spatial distribution function from velocity diffusion coefficient measurement

06 p0858 A72-17540

Conversion effectiveness of oscillations induced by electron beam in bounded anisotropic plasma into electromagnetic emission

06 p0860 A72-17700

Electron paths and spread velocities in helical beams of adiabatic M-type electron gun used in masers at cyclotron resonance

06 p0826 A72-18403

Contraststreaming electron beams instability in finite length one dimensional system with stationary neutralizing ion background, analyzing electrostatic waves space/time development by numerical simulation

06 p0865 A72-18540

Plasma density inhomogeneity effects on beam-plasma instability and Landau damping from digital simulation using charge sheet model

06 p0865 A72-18541

Carbon dioxide laser pumping at atmospheric pressure by electron beam controlled electrical discharge, discussing measured electrical and laser properties

07 p0999 A72-18875

Electron beam induced dissociative excitation of vacuum UV emission from atomic nitrogen multiplets, using normal incidence monochromator and pulse counting techniques

07 p1036 A72-18925

Colliding plasmas transverse instabilities, investigating ion dynamic and electron beam induced return currents effects

07 p1041 A72-19508

Stability of electron beam injected into magnetospheric plasma at small and high altitudes

07 p0979 A72-20377

Electrostatic oscillations of multivelocity electron streams in hot inhomogeneous plasma

07 p1046 A72-20502

Spark source generated electron beam interaction with plasma in uniform magnetic field, estimating HF longitudinal oscillation power

07 p1046 A72-20504

Ultrarelativistic cosmic plasma analysis of high density electron beams transport across strong magnetic fields with application to pulsar NP 0532 spectrum

07 p1064 A72-20634

High energy electron beam interaction with dense plasma, investigating unstable waves growth by numerical methods

08 p1213 A72-21259

Design and operation of scanning laser based on exciting electron beam directional variation, discussing laser characteristics for various operating modes

08 p1182 A72-21268

Temperature distribution and zone melting in carbon thin films heated by electron beam, using Sn crystal indicators

08 p1253 A72-21446

Electron beam interaction with bounded homogeneous plasma layer natural oscillations, using collisionless kinetic equation

08 p1215 A72-21720

Asymptotic expressions for electromagnetic field and currents induced in unbounded dense plasma by relativistic electron beam passage

08 p1215 A72-21721

Fine structure of energy distribution function for electron beam interacting with plasma

08 p1215 A72-21722

Steady nonlinear waves propagation along ring electron beam axis analogous to ionospheric E layer

08 p1215 A72-21723

Microwave signals detection with virtual cathode in klystron repeller by electrons screening at velocity modulated electron beam

08 p1136 A72-21766

Betatron electron beam evaluation for flaw detection in laminated materials by radiographic and radiometric methods

08 p1177 A72-21774

Resonator dielectric waveguide structure in electron beam pumped semiconductor laser, noting reduction of diffraction losses and of laser action threshold

08 p1184 A72-22089

German monograph on electron beam focusing in partial pressure analyzer with two compartment ion source, eliminating residual gas-filament interaction

09 p1306 A72-22318

High power electron beam pumped nitrogen super-radiant laser with 60 kW output

09 p1323 A72-22624

Dielectric permeability tensor operator for surface wave-electron beam interaction in relativistic nonuniform plasma stream with cylindrical geometry

09 p1359 A72-22769

Optimum pressure and field conditions for intense relativistic electron beam transport in longitudinal magnetic field

09 p1360 A72-22870

Steady state charged cylindrical electron-ion beam with high current in kinetics model framework, discussing densities proportionality and relativistic factor

09 p1360 A72-22951

Star stellarator model for hot electron plasma production by steady electron beam injection in closed magnetic traps

09 p1363 A72-23219

Electron beam and plasma nonlinear interactions, noting scattering zone, amplitude oscillation maximum, longitudinal velocity and relaxation patterns

10 p1517 A72-23760

Electron, ion and laser beam technology - IEEE Conference, Boulder, Colorado, May 1971

10 p1517 A72-23926

Burn in technique in nonvolatile metal oxide semiconductor /MOS/ memory using ionizing radiation of reprogrammable electron beam

10 p1443 A72-23927

Imagewise electrostatic charge buildup in electron beam recording, determining trajectories by Runge-Kutta method

10 p1479 A72-23929

Vesicular films in electron and laser beam recording suitable for computer output microfilm duplication and graphic arts

10 p1488 A72-23930

Wide bandwidth electron beam analog recorder and reproducer, using signal processing electronics and silver halide film

10 p1479 A72-23931

High dose rate electron beam irradiation using telescoping drift tube for flash X ray machine

10 p1509 A72-23935

Spectroscopic techniques for high temperature materials research program, studying light emission from plasmas generated by intense electron beam

10 p1518 A72-23937

Electron microbeam testing for large microcircuit arrays, using analog voltage signal injection into isolated contact and digital voltmeter readout

10 p1446 A72-23938

Frequency characteristics of traveling wave deflection system for wideband CRT deflector, improving sensitivity by low beam accelerating voltage

10 p1446 A72-23939

Gas laser excitation by relativistic electron beam pulse axial propagation through optical cavity, studying mechanism through timing and pressure dependence measurements

10 p1489 A72-23946

Computer controlled electron beam machine for microcircuit fabrication, using digital technique capable of working on complex patterns

10 p1459 A72-23956

Relativistic electron beam and ring phenomena calculation using plasma simulation program CYLRAD

10 p1518 A72-23958

Low transverse energy, high nugamma electron beam propagation characteristics, reviewing transport, compression and combination beam-handling concepts

10 p1518 A72-23959

Intense relativistic electron beam-plasma interactions in finite cavities, calculating neutral gas charge production and gas breakdown times

10 p1518 A72-23960

Ion acceleration by relativistic electron-beam-formed plasma, explaining ion energy dependence on neutral gas pressure by potential well model

10 p1518 A72-23961

Quiescent steady state plasma production by beam-plasma discharges in uniform magnetic fields, showing plasma density fluctuation relation to Penning effect

10 p1519 A72-24022

Gas rotation temperature measurement by means of high energy electron beam probe with allowance for secondary electrons

10 p1480 A72-24222

Relativistic electron beam injection into dense plasma, analyzing perturbed electric and magnetic fields and charge and current densities

10 p1521 A72-24353

Semiconductor lasers with high energy electron pencil beam excitation for high capacity computer storage application

10 p1492 A72-24513

Temperature dependence of internal quantum efficiency of spontaneous emission as function of beam voltage in electron beam excited p-type GaAs

10 p1526 A72-24559

Collective self fields generated from intense electron beams for high energy positive particle acceleration and Astron hot plasma confinement for fusion control

10 p1523 A72-24788

Heavy ion acceleration from strong electron beam in metallic plasma obtained with ruby laser and positive voltage pulses

10 p1524 A72-25034

Magnetic mirrors for highly stripped heavy ions production in hot electron plasmas by low voltage high current electron beam

10 p1524 A72-25035

Hydrogen, deuterium, helium, nitrogen and argon ion production and acceleration by intense pulsed relativistic electron beam

10 p1517 A72-25037

Electron beam fluorescence method for normal shock wave velocity distribution in Ar-He mixtures

11 p1615 A72-25556

Spatial distribution of electron beam excited plasma wave spectrum, determining wavenumber, amplitude and frequency by incoherent microwave scattering

11 p1693 A72-25564

Longitudinal electromagnetic wave excitation in restricted plasma by relativistic electron beam injection, determining increments, frequency distribution and width of spectra

12 p1849 A72-27064

High current relativistic electron beam properties, noting application in thermonuclear synthesis and accelerators

12 p1788 A72-27250

Electron beam velocity distribution function fine structure for plasma-beam discharge in hydrogen within longitudinal magnetic field

12 p1850 A72-27261

- Maximum transmission delay in microwave TWT delay lines as function of electron beam size, current, shape and velocity distribution 12 p1782 A72-27436
- Voltage variable TWT delay line design, discussing electron beam velocity dispersion causes 12 p1782 A72-27437
- Stimulated laser emission in vacuum UV by liquid Xe excitation with electron beam, determining threshold current density, radiation divergence and line half width 12 p1820 A72-27582
- Ruby laser coherent light scattering by cylindrical electron beam under longitudinal magnetic field 12 p1820 A72-27586
- Many element GaAs and CdS semiconductor laser achieving high power output by electron beam pumping 12 p1822 A72-27616
- Multielement electron beam pumped semiconductor laser using emitting GaAs disks with vapor deposited dielectric mirror coatings 12 p1824 A72-27876
- Electro-optical processing of phased array signal reception, using electron beam addressing system with potassium dideuterium phosphate target crystal 12 p1785 A72-27954
- Adhesives polymerization and rapid ambient temperature curing, using Co 60 gamma rays and electron beams 12 p1833 A72-28079
- Signal propagation along homogeneous drifting electron beam focused by strong magnetic field, obtaining phase velocity and space charge density 13 p1914 A72-28373
- Surface charge density in thermoplastic recording, showing potential-relief modulation dependence on frequency, scanning rate and electron beam properties 13 p1954 A72-28402
- Kinetic approximation for bounded electron beam stability in plasma situated in magnetic field, deriving instability increments and dispersion relations 13 p2010 A72-28578
- O-type synchronous electron beam waves interaction with electro-dynamically structured traveling wave, noting linear gain dependence on beam current and magnetic field 13 p1931 A72-29291
- Frequency spectrum analysis of electromagnetic self radiation from plasma interacting with high energy electron beam 13 p2015 A72-29432
- Vacuum gap discharge conditions as function of electron beam parameters and metal vapor pressure 13 p2017 A72-29611
- Three grid I.EED-Auger display system for electron emission from solids at low primary beam energies 13 p1932 A72-29751
- Electron beam excited P-15 phosphor 3900 A spectral component fast decay time measurement by delayed coincidence technique 13 p2000 A72-29762
- High purity aluminum-aluminum oxide reversible oxidation, discussing mechanism based on electron charging due to beam 13 p1980 A72-29827
- Electron beam-helicons interaction in semiconductor plasma, determining instabilities onset conditions for unbounded system 14 p2141 A72-30172
- Pulse distortion and amplitude smear calculation for electron beam measurements of distance from space vehicles to deployable structure measurements on space vehicles 14 p2103 A72-30198
- Steady motion of dense electron beam in rarefied phonon plasma along magnetic field, analyzing polarization effects 14 p2136 A72-30305
- I.F. and HF oscillations in plasma-electron beam system, investigating instability control 14 p2137 A72-30310
- CdS crystals lasing in air at atmospheric pressure and room temperature by low voltage electron beam pumping through Ni film 15 p2245 A72-31319
- Dispersion relationship for electrostatic instability associated with electron beam trapped in magnetic mirror of magnetosphere, taking into account nonuniformity of magnetic field 15 p2283 A72-31434
- Photon loss coefficients and gain measurement in CdS electron beam pumped lasers, noting absorption mechanism and efficiency 15 p2246 A72-31668
- Kinematic intensity recovery from I.EED data of specular and nonspecular beams from Ni(111) surface, noting multiple scattering interference elimination 15 p2276 A72-31855
- Beta-conductive method improvement for semiconductor electric field intensity measurement by pulsed electron beam 15 p2238 A72-32240
- Monochromatic plasma wave excitation by cold electron beam, obtaining instability maximum amplitude and oscillation period 15 p2285 A72-32270
- Mathematical model for modified ordinary electromagnetic wave propagation in presence of two cold counterstreaming plasma electron beams, noting instability regions and growth rate 15 p2286 A72-32274
- Mach 26 shock wave in nitrogen investigated by electron beam fluorescence technique, determining population distribution among rotational states 15 p2281 A72-32404
- Electron beam-plasma system oscillation spectrum control through modulation by external HF signal, discussing theory and experimental verification 15 p2289 A72-32671
- Electron beam modulation by SHF noise signal in plasma-beam system 15 p2289 A72-32698
- Electron beam amplifier based on fast cyclotron wave interaction with slow synchronous wave in axisymmetrical electrostatic field, discussing power efficiency increase 15 p2210 A72-32737
- HF radiation in type 3 burst sources, discussing amplification by proton and electron streams 15 p2316 A72-32753
- Quasi-linear approximation of absorption of oscillations excited by electron beam in nonuniform plasma, noting electron distribution change with heating under magnetic field 16 p2432 A72-32807
- Quantum mechanics framework for electron movement perpendicular to intense magnetic field, predicting energy broadening with time for initially monoenergetic electron beam 16 p2422 A72-32881
- Plasma wave excitation by monoenergetic relativistic electron beam, investigating beam-plasma wave synchronism during instability development 16 p2434 A72-32912
- Electron interferometer based on second order interference effects from laser modulated electron beam, applying quantum mechanical analysis 16 p2402 A72-33398
- Infinite cross section electron beam interaction with infinite turbulent plasma slab with finite thickness 16 p2438 A72-33837
- Ultrarelativistic electrons beam steady injection into plasma filled half space, using weak turbulence theory for assumed beam excited oscillations interaction 16 p2440 A72-34156
- Electron-optical methods of investigating inhomogeneities in rarefied gases. 17 p2552 A72-34515
- Resonator dielectric waveguide structure in electron beam pumped semiconductor laser, noting reduction of diffraction losses and of laser action threshold 17 p2562 A72-34660
- Electron trajectories and spread velocities in helical beams of adiabatic M-type electron gun used in masers at cyclotron resonance 17 p2562 A72-34854
- Emission of coherent microwave radiation from a relativistic electron beam propagating in a spatially modulated field. 17 p2589 A72-34874
- Relativistic electron beam injection into dense plasma, analyzing perturbed electric and magnetic fields and charge and current densities 17 p2589 A72-34954
- HF electrostatic wave instability induced in plasma by electron beam, noting resonant frequency Doppler shift 17 p2591 A72-35369
- Electron transmission spectroscopy - Core-excited resonances in diatomic molecules. 17 p2586 A72-35771
- Excitation of a long-pulse CO2 laser with a short-pulse longitudinal electron beam. 17 p2565 A72-35815
- Steady state charged cylindrical electron-ion beam with high current in kinetic model framework, discussing densities proportionality and relativistic factor 17 p2593 A72-35880
- Model improvements for thermionic diode plasmas. 18 p2715 A72-36218
- Pulsed power - A new technology for controlled thermonuclear fusion. 18 p2715 A72-36332
- Observation of satellite modes in a beam-plasma instability. 18 p2715 A72-36600
- Beam-defocusing effect due to filament magnetic fields in electron guns of electron linear accelerators. 19 p2772 A72-37404
- Photon count circuit conjugation with photomultiplier for spectrometric measurement of lines emitted by atomic barium jet excited by slow electron beam 19 p2799 A72-37671
- Plasma heating by fast electrons, and nonthermal X rays during solar flares 19 p2851 A72-38063
- Quantum yield variations of Nd ion activated glass as function of electron beam energy and intensity, noting nuclear particles effect on laser radiation 19 p2823 A72-38205
- Evaluation of rotational temperature at high vibrational temperature in electron beam fluorescence technique. 19 p2803 A72-38434
- Nonlinear interaction of a small cold beam and a plasma. II. 19 p2841 A72-38444
- Electromagnetic self induced vibrations in homogeneous unbounded electron beam moving with time dependent velocity, noting longitudinal and transverse wave generation 19 p2842 A72-38527
- Theoretical study and demonstration of the coupling of modes of a resonant cavity by an electron beam 19 p2774 A72-38543
- A design method for the electron beams of TWT's. 19 p2775 A72-38610
- Triode electron gun design for narrow electron beam under highly convergent lens action, using field emission source 19 p2775 A72-38611
- Possibility for buildup of laser radiation scattered by an electron beam 19 p2812 A72-38662
- Discontinuous generation of ultrahigh frequency oscillations during a plasma-beam interaction 19 p2768 A72-38664
- Influence of different types of oscillations on ion heating in plasma-beam discharges. 19 p2843 A72-38820
- Electron beam focusing by ions in transverse gas flows, considering air, argon and helium residuals 20 p2952 A72-39070
- Recent international development in non-traditional machining processes - EDM, ECM, LBM, EBM. 20 p2928 A72-39203
- Generation of controllable light pulses in an electron-beam-pumped laser. 20 p2933 A72-39514
- Application of the Monte-Carlo method to the calculations of the configuration of a heat source whose material is subjected to the action of electron beams. 21 p3127 A72-40135
- Suppression of instabilities in a beam-plasma system by a modulation of the electron beam. 21 p3089 A72-40199
- Electron beam evaporator with multiple source suitable for use in ultrahigh vacuum, noting control of evaporation rate 21 p3051 A72-40205
- The beam-plasma discharge laser 21 p3062 A72-40406
- Contribution to nonlinear theory of electron-beam kinetic instability in a plasma 21 p3090 A72-40408
- Potential measurement and stabilization of an isolated target using electron beams. 21 p3087 A72-40700
- Excitation of electromagnetic waves in a plasma by a relativistic electron beam 21 p3092 A72-40787
- Three-dimensional pattern of instability development during the interaction between a modulated electron beam and a plasma 21 p3092 A72-40800
- The possibility of producing plasma regions at thermonuclear fusion conditions in a supersonic flow by means of high power electron beam. 21 p3092 A72-41224
- High energy electrons monokinetic beam propagation in Cu and Al crystals, investigating critical voltage effect on contrast 21 p3069 A72-41342
- Experimental determination of ion density trapped by electron beam. 21 p3034 A72-41463
- Electron beam visualization in hypersonic air flows. [AIAA PAPER 72-1017] 21 p3042 A72-41596
- External high-frequency modulation of an electron beam and heating of plasma ions in the case of beam-plasma instability in the magnetic trap 21 p3095 A72-41678
- Suppression of oscillations in a plasma-beam system by modulation of low frequency signals 21 p3095 A72-41681
- Differential equations for energy flow between electron beam and electromagnetic field, avoiding electron trajectory explicit calculation in nonlinear treatment of cyclotron resonance interaction 22 p3159 A72-42304
- Effect of increasing beam voltage on the internal quantum efficiency of spontaneous emission in electron-beam-excited p-type GaAs. 22 p3185 A72-42308
- Measurement of the stacking-fault energy of gold using the weak-beam technique of electron microscopy. 22 p3177 A72-42320

Electron beam diameter measurement technique and welding technology review, describing experimental apparatus

22 p3183 A72-42448

Superradiant laser excitation at 3371 Å in molecular nitrogen second positive band system by high energy electron beam, noting 6 nsec pulse outputs to 24 MW

22 p3186 A72-42623

Development of nonlinear oscillations in the interaction between a modulated electron beam and a plasma

22 p3211 A72-42651

Initial electron velocity and emitter surface roughness effects on oscillatory velocities dispersion in helical electron beams used in cyclotron resonance masers

22 p3208 A72-42664

Injection of an electron beam into a plasma bounded by a conducting casing

22 p3213 A72-43105

Noncoherent excitation of plasma vibrations by an almost monoenergetic relativistic beam

22 p3213 A72-43114

Electromagnetic emission during the development of a hydrodynamic beam instability in a bounded plasma

22 p3213 A72-43115

Some characteristics of an electron-beam induced discharge in a vacuum

22 p3208 A72-43123

Steady motion of dense electron beam in rarefied phonon plasma along magnetic field, analyzing polarization effects

23 p3317 A72-43207

LF and HF oscillations in plasma-electron beam system, investigating instability control

23 p3317 A72-43212

Interaction between a plasma and an electron-beam modulated by low-frequency oscillations

23 p3318 A72-43309

Stimulated emission with pumping by a pulsed electron beam formed in a direct discharge

23 p3295 A72-43319

Excitation of potential oscillations in a plasma by a flow of phased oscillators

23 p3319 A72-43401

The velocity distribution of electrons in beams formed by high-perveance three-electrode guns

23 p3319 A72-43402

Compression of high current relativistic electron beams using converging magnetic fields

23 p3315 A72-43525

Plasma-beam interaction in limited geometry: Temperature effects

23 p3321 A72-43700

Diffusion of a filament of gas injected into a supersonic free jet

23 p3280 A72-43947

Cylindrical waveguide with density modulated electron beam pumped by external electromagnetic field, considering Doppler effect conditions in beam radiation spectrum

23 p3265 A72-44157

Electron impact ionization of ions trapped in a hollow electron beam

23 p3316 A72-44343

Utilization of a composite resonator for improving the monochromaticity of a semiconductor laser with electron-beam excitation

23 p3297 A72-44468

Time variations in the far-field diffraction patterns of spatial modes from electron-beam-pumped semiconductor lasers

24 p3409 A72-44712

Buildup of oscillations in crossed-field backward-wave oscillators

24 p3385 A72-44973

Kinetic approximation for confined electron beam stability in plasma situated in magnetic field, deriving instability increments and dispersion relations

24 p3428 A72-45078

Electron-beam flow visualization - Applications in the definition of configuration aerothermal characteristics

[AIAA PAPER 72-1016]

24 p3404 A72-45405

Generation of plasma oscillation by beam-plasma interaction

24 p3430 A72-45574

Cadmium sulfide single crystals suitable for electron-beam-pumped lasers

24 p3432 A72-45607

Longitudinal electromagnetic wave excitation in restricted plasma by relativistic electron beam injection, determining increments frequency distribution and width of spectra

24 p3431 A72-45717

ELECTRON BOMBARDMENT

Non-Boltzmann molecular nitrogen vibrational distribution in aurora during electron bombardment as function of altitude

02 p0221 A72-12456

Apparatus for emission spectroscopic studies on high density molecular jets excited by slow electron bombardment

03 p0392 A72-14054

Maximum propellant utilization in electron bombardment ion thruster for space applications

04 p0564 A72-14432

Mercury electron bombardment ion thrusters research program, discussing mission requirements, size, propulsion type and beam current range

04 p0565 A72-14434

Rocket-borne mass spectrometer with helium cooled electron bombardment ion source to reduce gas-wall interactions effects

04 p0524 A72-15538

Ni-Cr thick films triode sputtering technique with temperature control by low-energy electron bombardment heating, presenting phase diagram

05 p0675 A72-16393

Optical radiation from plasma discharge of electron bombardment mercury ion thruster, discussing electron temperature and primary electron fraction

[AIAA PAPER 72-205]

05 p0706 A72-16851

Hollow cathode neutralizer for electron bombardment ion thruster, discussing performance from SERT II flight

[AIAA PAPER 72-207]

05 p0706 A72-16853

Electron bombardment ion engines scaling laws, considering electron energy, current density, propellant properties and magnetic flux density

07 p1054 A72-19602

Critical magnetic flux indications of microanomalous plasma diffusion in electron bombardment ion engines

07 p1054 A72-19614

Ar plasma in ion engine discharge chamber with primary and Maxwell electron bombardment, discussing ion production probabilities in perturbed and unperturbed cases

08 p1223 A72-21209

Electron bombardment SERT II ion thruster operation using Xe, Kr, Ar, Ne, He, nitrogen and carbon dioxide

10 p1528 A72-23964

Electron bombardment type simplified ion source with magnetic field induction by filament heating current, discussing design and characteristics

10 p1518 A72-23965

Electron bombardment disordering of ordered Ni-Mn alloy along different crystallographic directions

10 p1514 A72-24075

Ion sources for high temperature operation based on electron bombardment and beam-plasma interactions

10 p1516 A72-25031

Hollow cathode discharge effects on throttled electron bombardment ion thruster performance, considering discharge region diameter and length and baffle aperture area

[AIAA PAPER 72-421]

11 p1706 A72-26169

Electron bombardment ion thruster ESKA 18-P thrust measurements by critically loaded columns suspension instrument and simultaneous beam diagnostics by electrostatic probes

[AIAA PAPER 72-433]

11 p1707 A72-26176

Dished accelerator grids design, fabrication and operation in electron bombardment ion thruster, studying ion extraction capability and discharge chamber performance

[AIAA PAPER 72-486]

11 p1710 A72-26212

Electron bombardment ion thruster performance characteristics with variable magnetic baffle and hollow cathode

[AIAA PAPER 72-489]

11 p1710 A72-26214

Chemical ionizing mass spectrometry with electron bombardment of reactant gas, discussing plasma chromatography

11 p1590 A72-26389

Work hardening and recrystallization grain structure of sintered and electron bombardment melted Ta after annealing

11 p1644 A72-26839

Electron bombardment deposited polymer thin films electrical properties as function of formation current, noting increase in crosslinking and dangling bonds

12 p1788 A72-27277

Lifetime limitations of ion extraction systems for electron bombardment ion thrusters due to sputter erosion of electrode by ion beam

[AIAA PAPER 72-477]

12 p1860 A72-27421

Intensified electron bombarded Si camera tube performance in low light level TV systems, predicting sensor resolution vs irradiance characteristics

12 p1810 A72-27934

Electron bombardment effects on transport properties and carrier lifetime degradation of Li doped Si solar cells

12 p1856 A72-28024

Carrier concentration Hall mobility and photoconductivity in n- and p-type CdTe after neutron and electron bombardment

12 p1859 A72-28072

Model for mercury vapor electron bombardment ion thruster hollow cathodes operation and effects on thrust subsystem performance predictability

[AIAA PAPER 72-420]

13 p2026 A72-28936

Variable magnetic baffle as control device for Kaufman electron bombardment ion thrusters with hollow cathode

[AIAA PAPER 72-488]

13 p2027 A72-28949

Characteristics of nonredundant auxiliary and prime propulsion power processors for electron bombardment ion thruster in communication satellites, discussing modular transistorized and SCR systems

[AIAA PAPER 72-518]

Refractory metals vacuum melting for ingot production and purification in arc and electron bombardment furnaces

14 p2107 A72-30531

Thermonuclear microexplosion ignition by bombarding dense target with intense relativistic electron beam, noting energy requirement reduction by self magnetic beam field

16 p2433 A72-32814

Metal fracture by electron pulse generated stress waves, noting intergranular fracture mechanism

16 p2472 A72-33845

Multielement electron beam pumped semiconductor laser using emitting GaAs disks with vapor deposited dielectric mirror coatings

16 p2404 A72-33985

Parametric optimization of a cylindrical converter with a molybdenum emitter and niobium collector

17 p2497 A72-34610

Single crystal disk substrate design with electron bombardment heating for LEED and Auger electron spectroscopy studies in ultrahigh vacuum

17 p2553 A72-34642

Certain characteristics of an electron-pumped pulsed laser of small dimensions

17 p2562 A72-34839

Electrostatic surface ionization and electron bombardment ion thrusters current densities for propulsive and working fluid utilization efficiency

17 p2597 A72-35275

On the contribution of transition radiation from dust grains to the diffuse X-ray background

17 p2600 A72-35314

Ion-thruster propellant utilization

17 p2597 A72-35490

Luminescence behavior of single-crystal semiconductor compounds under electron bombardment

17 p2596 A72-35721

The effects of electron bombardment on the noise properties of field effect transistors

18 p2666 A72-36322

Some results of studies of cathode luminescence in cerium-activated glass

19 p2845 A72-38190

Nickel single crystal target ionization by high voltage electron beam bombardment, using flight time mass spectroscopic analysis

19 p2835 A72-38666

Thick target processes during hard X ray emission, noting electron bombardment during solar flare impulsive phase and white light flare optical continuum production

21 p3100 A72-41292

ELECTRON BUNCHING

Line splitting in emission near plasma frequency in drift pair solar radio bursts, considering causes by model involving electrons bunching through solar corona

02 p0276 A72-11646

Hypotheses for excess background radiation at 200-500 km, suggesting single high energy electrons or electron clusters

07 p1064 A72-20638

Nonlinear plasma oscillations effect on electron bunching in microwave devices, noting space charge waves of finite amplitude

14 p2089 A72-31106

One dimensional Maxwellian electron plasma simulation by electron bunches, describing Landau damping of wave initially excited in medium and nonlinear effects of trapping

15 p2284 A72-31678

Solar stationary type 4 radio bursts caused by gyromagnetic radiation of bunched electrons

16 p2449 A72-33920

Electron bunching and output gap interaction in broad-band klystrons

19 p2772 A72-37566

Radiation of electron bunches passing through a dielectric plate in a waveguide

21 p3036 A72-41842

ELECTRON CAPTURE

Average energy electron capture coefficient dependence on air density, temperature and altitude under gamma radiation

01 p0059 A72-10599

Plasma electron density depletion by electron attaching gas introduction, deriving electrostatic probe technique

02 p0264 A72-12261

Cyclohexylamine determination in aqueous solutions of sodium cyclamate by electron capture gas chromatography

07 p0935 A72-19488

Silicon-silicon dioxide system, investigating effect of heating in dry and moist He on capture-center and recombination parameters by thermal and pyrolytic techniques

08 p1216 A72-21068

Plasmoids interaction in diverter magnetic field, investigating integral electron capture intensity
09 p1362 A72-23205

Fast iodine ions charge exchange in dense carbon dioxide supersonic jet, determining electron capture cross sections by least squares method
10 p1516 A72-25036

Photoemission from tetracene organic semiconductors due to electron capture defect ionization by excitons
11 p1700 A72-25785

Thermonuclear detonation and reimplosion of dense stellar cores, studying beta-processes effect on post-detonation evolution
13 p2044 A72-29625

Atomic hydrogen 3s state destruction by impact on nitrogen, argon and hydrogen molecules, considering collisional ionization and electron capture mechanisms
14 p2134 A72-30883

Thermally stimulated current measurement application to Ag doped Si semiconductor for energy level and electron capture cross section determination
16 p2441 A72-32859

Be 7 destruction via nuclear decay instigated by atomic electron capture in interstellar medium, considering Ar 37, Ca 41, Ti 44, V 49, Cr 51, Mn 53 and Fe 54
16 p2447 A72-33736

Production of intense ion beams by high-frequency electric fields
19 p2839 A72-37331

Evidence for radiative electron capture by fast, highly stripped heavy ions
23 p3316 A72-44073

Determination of electron and hole capture rates in nickel-doped germanium using photomagnetolectric and photoconductive methods
24 p3432 A72-45388

ELECTRON CLOUDS

HF radio waves scattering by spherical electron cloud with Gaussian density distribution
09 p1282 A72-23515

Variable radio structure model using relativistic electron cloud outbursts in stationary magnetic field tubes for faster than light velocities
10 p1536 A72-24139

The equilibrium and the pulsation frequency spectrum of an electron cloud of spherical and cylindrical symmetry
19 p2867 A72-38571

ELECTRON COLLISIONS

U ELECTRON SCATTERING

ELECTRON COUNTERS

Oxygen ionization and ion mobility measurements in air by open proportional counting chamber with electron counter and exoelectron emitter
09 p1305 A72-22203

Multichannel area stellar photometer using photosensitive cell array for individual photoelectron counting, applying to autoguidance
11 p1631 A72-25690

Intensity and energy spectrum calculation of albedo electrons recorded in cosmic particle showers by gas discharge counters
14 p2105 A72-30629

ELECTRON DECAY RATE

Electron lifetime in earth radiation belt due to resonant scattering with hiss vlf radiation
05 p0711 A72-17045

Effective electron loss rates in lower D region from ionization changes during solar X ray flares, noting water cluster ions destruction
09 p1376 A72-22369

Low-temperature measurements of the three-body electron-attachment coefficient in O2
19 p2837 A72-37545

ELECTRON DENSITY [CONCENTRATION]

NT ELECTRON DENSITY PROFILES

NT IONOSPHERIC ELECTRON DENSITY

NT MAGNETOSPHERIC ELECTRON DENSITY

Line radiation from theta pinch with oscillatory ion and electron density applied to solar spectral studies
01 p0106 A72-10098

Collisionless plasma shock wave measurements in magnetic field, determining plasma temperature and free electron densities
01 p0108 A72-10236

Electromagnetic waves diffusion by space-time fluctuations in plasma electron density
[ONERA, TP NO. 1043] 01 p0110 A72-11180

Electron density microwave measurements in helium-neon laser plasma, discussing population inversion during glow discharge
01 p0081 A72-11216

Excited state and electron densities in noble and atmospheric gas plasmas created by alpha particle induced ion irradiation, discussing plasma kinetic processes and superimposed electric field effects
01 p0112 A72-11335

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source
02 p0223 A72-11403

Fabry-Perot interferometer employing gas laser for plasma bursts electron concentrations measurements at 3.39 micron wavelength
02 p0223 A72-11404

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, presenting block diagrams of meter, detector and oscillator
02 p0223 A72-11414

Free electron density, electron temperature and gas ionization during shock wave propagation in Ar-filled shock tube from microwave radiation measurements
02 p0263 A72-12020

Pulsar distances and energy from assumed interstellar electron density, considering nonplausibility of associations with supernovae
02 p0278 A72-12047

Interferometric photoelectric scans of interstellar Ca I 4226 line for stars with interstellar Ca II K-lines, discussing deduced electron densities
02 p0280 A72-12197

Low temperature plasma electron density measurements using ruby laser light scattering method
02 p0264 A72-12210

Plasma electron density depletion by electron attaching gas introduction, deriving electrostatic probe technique
02 p0264 A72-12261

Linear electron density distribution along faint meteor trail, discussing radio echo time-amplitude characteristics and ionization curve
02 p0282 A72-12335

Electron and population densities in inhomogeneous nonequilibrium plasmas with photoabsorption, using radiative transport equation
02 p0266 A72-12441

Electromagnetic wave scattering by electron charge density fluctuations in plane waveguide with magnetoactive plasma, showing cross section spectrum function of plasma properties
02 p0183 A72-12766

Emission nebulae in Magellanic Clouds observed at 408 MHz, calculating electron density and total mass
02 p0285 A72-12796

Solar coronal monochromatic optical emission, inferring electron density and ionization or temperature distributions and variations with time
03 p0422 A72-13208

Excited Hg atom and electron concentration measurement behind shock front in nonstationary plasma by continuous displacement recording of interference bands
03 p0357 A72-13374

Theta pinch plasma electron density with high time resolution by side-on interferometry at 10.6 microns
03 p0396 A72-13670

Electron-ion recombination and ambipolar diffusion disruption of electron density in cryogenic helium plasma, using cavity resonator measurements
03 p0399 A72-14067

Pulsed current changes in positive column of He and Ne discharges, observing gradient and electron concentration transient behavior
03 p0399 A72-14348

Collisional radiative recombination applicability to time dependent electron density decay in helium afterglow before reaching quasi-steady state
04 p0555 A72-14579

Plasma diagnostic technique using three-mirror He-Ne laser interferometer for electron concentration measurement
04 p0555 A72-14654

Solar K corona intensity and electron density determination from photographs without eclipse
04 p0574 A72-14924

Ground state energy of interacting electrons for entire density range from two-point Padé approximation
04 p0549 A72-15229

German monograph on spectroscopic investigation of Cs plasma electron density and temperature and excited atom density in various operational states of thermionic converter
04 p0560 A72-15699

Electron density and diffusion measurements in ionized air in front of strong shock wave with resonant microwave probe and electromagnetic induction technique
05 p0648 A72-16211

Continuously burning optical discharge in Ar and Xe at atmospheric pressures, evaluating laser beam energy absorption, electron density and plasma temperature
05 p0669 A72-16679

Electron density and temperature fluctuations coupled through Ohm law for ionizable medium, applying to MHD generators and MPD arc thrusters
[AIAA PAPER 72-101] 05 p0706 A72-16813

Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration
05 p0697 A72-16987

Shock wave deceleration and boundary layer mass loss effects on electron density and ionization levels of air in shock tube
05 p0700 A72-17225

Electron and muon density fluctuations, trajectory distribution and azimuthal symmetry in cosmic ray air showers
06 p0870 A72-17279

Electrons spatial and temporal response in collisionless plasma to externally applied voltage pulse
06 p0856 A72-17522

Interplanetary plasma electron and proton density fluctuation measurements by space probes and from radio sources scintillation spectra, noting agreement with power-law irregularity spectrum
06 p0881 A72-17901

Electron content measurement for low latitude station obtained at sunspot maximum by Syncom 3, observing seasonal variation and winter anomaly effect
06 p0874 A72-18089

Plasma ambipolar diffusion coefficient and electron density determination from thermal density fluctuations cross spectrum based on Langmuir probe measurements
06 p0864 A72-18536

Radio emission of galactic clusters at 1.4 and 2.7 GHz, computing mean electron density and hydrogen gas mass
07 p1075 A72-19577

Interstellar cloud properties based on electron concentration integral along line of sight from pulsar radiation measurements
07 p1080 A72-20053

Transient plasma diagnostics using carbon dioxide laser interferometry and absorption for electron density and temperature determination
07 p1008 A72-20557

Plasma diagnostics using carbon dioxide laser absorption and interferometry, comparing electron densities with shock data
07 p1008 A72-20565

Multimode cavity for simultaneous oxygen/argon plasma excitation and electron density measurements, noting gas pressure effect
08 p1213 A72-21323

Fluctuating signal propagation in plane laminar medium acting as spatial frequency filter, determining electron density distribution curvature radius in plasma layers
08 p1135 A72-21732

Pulsars CP 0328 and NP 0531 twinkling explained by interstellar electron density fluctuations due to Alfvén wave passage and coupling of cosmic rays to interstellar gas
09 p1377 A72-22753

Microscopic perturbations of metals electron density complex dynamic matrix, deriving electroconductivity and kinetic coefficients
09 p1329 A72-23039

Interferometric measurements of time dependent electron density in Xe pinched plasma laser, showing laser lines due to transitions in triply ionized species
09 p1366 A72-23700

Supersonic Ar, He and molecular nitrogen jets, determining electron temperature and concentration and atomic state population in shock waves region by spectroscopic measurement
10 p1517 A72-23837

Electron densities and drift velocities dependence on macroscopic discharge parameters in positive column of He-Cd laser
10 p1493 A72-25048

Impurities effect on level density of electron gas within strong magnetic field, discussing included self energy
11 p1693 A72-25526

Low temperature plasma electron density measurements using ruby laser light scattering method
11 p1693 A72-25706

Pulsed plasma thruster arc electron density measurement by Mach-Zehnder interferometer and He-Ne laser, determining exhaust ion temperature and total charge
[AIAA PAPER 72-463] 11 p1709 A72-26198

SID coincident with solar photon burst, showing vertical variations of electron concentration
11 p1713 A72-26269

Noontime N/h profiles forecasts and annual variation in F region, relating solar activity levels to vertical distribution of electron concentration
11 p1594 A72-26277

Explorer 35 observations of solar wind electron density and temperature, noting anisotropy direction correlation with magnetic field vector alignment
11 p1713 A72-26392

Pulsed flat electrode erosion plasma accelerator, determining electric and magnetic fields distribution, current density and electron concentration
12 p1850 A72-27131

CO-He laser vibrational population distribution and small signal gain measurements, comparing with prediction based on V-V anharmonic exchange relaxation
12 p1827 A72-28222

Electron density effect on microwave scattering from turbulent plasma, observing change from volume to surface scattering at critical density value
13 p2012 A72-29130

Linear electron density distribution along faint meteor trail, discussing radio echo time-amplitude characteristics and ionization curve

13 p2039 A72-29219

Mars atmospheric temperature, pressure and electron density from radio occultation measurement with Mariner 6 and 7, noting frozen carbon dioxide in middle atmosphere

13 p2039 A72-29335

Ionization stabilization in MHD generators by sensing electron density perturbation with linear feedback into nonequilibrium plasma

13 p2014 A72-29369

Two point correlation description of MHD plasma properties subject to electrothermal instability, calculating electron number density and temperature fluctuations

13 p2015 A72-29373

Electron density and temperature measurement from scattering of laser radiation in plasma within axisymmetric toroidal magnetic mirror machine

13 p2017 A72-29609

Temperature dependent electron density of state and dc resistivity of disordered binary alloys, using single band thermal disorder model

13 p2022 A72-29626

Predicting electron density for type 3 solar burst excitation by LF satellite radio observations

13 p2032 A72-29723

Discharge tube geometry effects on sensitivity of plasma electron density measurement by cylindrical cavity resonators

13 p2018 A72-29822

Enhanced damping of electrostatic wave primary mode due to combination scattering from plasma electron density oscillations

13 p2018 A72-29854

Impurity concentration relationship to electrons and holes density and potential fluctuations in completely compensated crystalline semiconductors with randomly distributed donors and acceptors

13 p2024 A72-29993

Equiatomic ordered, bcc TiFe and TiNi electron density in outer energy band from X ray K emission spectra

13 p1981 A72-30006

Gunn diode active region thickness, free electron mobility/concentration, structure and contacts, including treatment of GaAs

13 p1934 A72-30036

Microwave interferometry as plasma diagnostic technique to measure electron densities in partially ionized dense gases

14 p2103 A72-30177

Hypersonic missile trail conductivity measurement on ballistic test stand, calculating electron concentration decrease

14 p2069 A72-30312

Electric arc plasma, predicting elements addition and electron density alteration effects on radial temperature distribution

14 p2139 A72-30778

Comparative electron density measurements in positive low pressure He discharge column with Langmuir probes and microwave interferometer and cavity

14 p2105 A72-30808

Electronic density measurement in ionized Cs vapor by observation of fundamental series lines mixture, comparing to Stark widening theory based profiles

14 p2134 A72-30852

Free electrons in condensed matter under high pressure, calculating number with Thomas-Fermi statistical model

15 p2305 A72-31338

Cs plasma electron density radial distributions from resonance absorption in discharge tube

15 p2286 A72-32302

Rocket released artificial Cs plasma clouds in upper atmosphere, measuring electron density by HF radar observation

15 p2231 A72-32330

Glow mode electron plasma source for space chamber, measuring electron density and temperature for comparison with back diffusion sources

15 p2286 A72-32339

Precursor photoionization production of ionization onset point equivalent electron number densities, calculating phenomenon occurrence Mach number

15 p2281 A72-32407

Electron density fluctuation measurements in hypervelocity projectile hypersonic turbulent wakes, showing power spectra

15 p2242 A72-32584

Solar Fe XIII IR lines intensity ratio at 10747 and 10798 Å, deriving electron density as function of dilution factor with allowance for proton impact effect

15 p2318 A72-32784

Inner solar corona electron density distribution as function of heliographic latitude, longitude and radial distance from K-coronameter polarization-brightness data

15 p2318 A72-32786

Weak H beta emission at 26 deg galactic latitude, noting derived electron density agreement with pulsar data

16 p2455 A72-33460

Low pressure He and Ne discharge generated positive plasma column potential, determining electron concentration from electron energy distribution functions

16 p2437 A72-33746

Low density and pressure air plasma electron density simultaneous measurements by Langmuir and RF capacitance probes

16 p2438 A72-33836

Electron density measurements in bow shock stagnation and conical afterbody regions during blunt body atmospheric reentry, using flush mounted electrostatic probes

[AIAA PAPER 72-694]

16 p2345 A72-34047

Viscous shock layer analysis application to blunt nosed reentry vehicle plasma layer nonequilibrium flow species distribution, considering electron density

[AIAA PAPER 72-689]

16 p2346 A72-34053

Three dimensional electron density fluctuations scattering spectra in Mach 16 spherical projectile turbulent wakes from fine wire electron collection probe measurements

[AIAA PAPER 72-673]

16 p2432 A72-34066

Plasma electron density measurements using flat plate and semifocal millimeter wave Fabry-Perot interferometers

[AIAA PAPER 72-672]

16 p2440 A72-34067

The influence of the electron temperature and other parameters on the electron density of a cesium plasma in a thermionic converter.

17 p2497 A72-34611

The possibility of single-valued determination of electron concentration from results of phase measurements

17 p2585 A72-35031

A model for drift pair and hook burst emission from the solar corona.

17 p2617 A72-35712

Galactic nebulae electron temperature and density from forbidden line emissions interpreted in terms of transition probabilities and collision strengths

18 p2723 A72-36090

Work function theory for Cs-W and Cs-O-W.

18 p2656 A72-36133

Prediction of electron concentration reductions in re-entry flow fields due to electrophilic liquid and water injection.

[AIAA PAPER 72-670]

18 p2730 A72-36537

Transition from sheath-convection to saturation-current behaviour of a Langmuir probe in a flowing plasma.

18 p2715 A72-36688

Electron density measurements in early stage of the high current pulsed discharge.

18 p2716 A72-36957

Density of the solar corona from occultations of NP 0532.

19 p2855 A72-37242

An appraisal of the single Langmuir probe technique in the study of afterglow plasmas.

19 p2840 A72-37456

Forbidden line intensities in cesium plasmas.

19 p2840 A72-37776

Nonlinear theory of density fluctuations in turbulent plasmas.

19 p2841 A72-38443

Measurement of electron concentration in the plasma of a pulsed erosion-type accelerator

19 p2843 A72-38535

Kinetic theory of density fluctuations in a magnetized collision-dominated plasma in an electric field.

19 p2792 A72-38745

Electromagnetic wave scattering by electron charge density fluctuations in plane waveguide with magnetoactive plasma, showing cross section spectrum function of plasma properties

20 p2903 A72-39072

Calculation of electronic Green functions using nonorthogonal basis functions - Application to crystals.

20 p2961 A72-39810

Electron density and temperature measurement from laser radiation scattering in plasma within axisymmetric toroidal magnetic mirror machine

21 p3091 A72-40663

The measurement of the local electron density by means of direct reading microwave interferometer.

21 p3056 A72-41220

Coronagraphic observations of an enhanced coronal region. II - Temperature and density structure through the enhanced region.

21 p3108 A72-41288

H 157 alpha recombination line from H I region before NGC 2024 radio source, considering average electron concentration and line origin

21 p3102 A72-41776

The derivation of temperature gradient and electron density maps from EUV spectroheliograms.

22 p3222 A72-42036

Electron density and temperature in microwave plasmas at higher pressures.

22 p3211 A72-42479

Equiatomic ordered bcc TiFe and TiNi electron density in outer energy band from X ray K emission spectra

22 p3190 A72-42733

Electronic density and temperature deduced from the observation of the cone of resonance of an antenna in a magnetoplasma

22 p3212 A72-43049

Measurement of the electronic density in a hollow cathode discharge working with argon

22 p3181 A72-43098

A study of the electronic and gasdynamic parameters of a hypersonic wake behind models moving in argon

22 p3168 A72-43111

Hypersonic missile trail conductivity measurement on ballistic test stand, calculating electron concentration decrease

23 p3247 A72-43214

Diffusive spreading of weak plasma discontinuities in the presence of two kinds of positive ion

23 p3283 A72-43363

Free electrons and holes concentration calculated for quadratic dispersion law in doped semiconductors without degeneration, noting additive atoms effect

23 p3324 A72-43849

Energy spectrum and composition of primary cosmic radiation at energies from 50 to 5000 TeV

23 p3330 A72-44422

A Lecher wire microwave interferometer for measurements of electron density and electron temperature in a flowing transient plasma.

23 p3292 A72-44543

Excitation mechanisms in the argon-ion spectrum at near laser conditions and temperatures and densities in a hollow cathode argon-arc discharge.

24 p3428 A72-44807

Electrical characteristics of a CO laser discharge plasma

24 p3411 A72-45500

ELECTRON DENSITY PROFILES

Lindauer electron density profile for maximum F layer over sunspot cycle using frequency dependent radio ground echo in satellite ionograms

01 p0054 A72-10421

Electron density profile determination in D region based on frequency dependence of radio waves absorption, discussing lower ionosphere anomalous ionization

01 p0059 A72-10595

Phase difference measurement between magnetoionic components returned from lower ionosphere due to pulsed radio signal, obtaining electron density profiles

01 p0063 A72-10914

Electron density measurements for traveling ionospheric disturbances by Thomson scatter technique using Faraday rotation

01 p0031 A72-10922

Solar wind electron density variations, discussing radio source interplanetary scintillation and angular distribution measurements at various distances from sun

02 p0277 A72-11902

Night sky upper ionospheric electron concentration perturbations during magnetic storm, noting latitudinal distribution

02 p0217 A72-11940

Loran C system time tick transmission delay during solar eclipse of 7 March 1970, discussing atmospheric electron density effects

03 p0322 A72-13533

Sudden cosmic noise absorption from D region N-h profile during solar X ray flares on 13 April 1966

04 p0566 A72-14512

Plasma electron density profiles from Tonks-Dattner resonance frequencies for plane parallel and cylindrical columns

04 p0554 A72-14530

Interstellar electron density and magnetic field fluctuations effects on Faraday rotation and signal dispersion measure in radio band

04 p0487 A72-14901

Thumba night time equatorial E region electron density profiles from rocket-borne Langmuir probe experiments

04 p0517 A72-14957

Electron concentration and collisions number fluctuations effect on D region profiles based on radio waves partial reflection data

05 p0656 A72-16244

Numerical method for cylindrical microwave cavities calibration for plasma diagnostics, noting computer programs applicability for arbitrary electron density radial distributions

05 p0662 A72-16418

Electron density profiles as function of position in enhanced coronal region from Ni XV and Fe XIII emission lines observation

05 p0719 A72-16517

Electron density and temperature temporal and radial profiles in megawatt MPD-arc thruster exhaust, using Thomson scattering technique
[AIAA PAPER 72-209] 05 p0707 A72-16887

Temperature inhomogeneity effect on plasma column microwave resonant behavior in presence of axial magnetic field, ascribing spectral shifts to electron density and temperature profiles changes
06 p0854 A72-17417

Electron density distribution inhomogeneities from vhf Faraday rotation measurements, noting diurnal, seasonal, sunspot cycle and geomagnetic activity effects
06 p0806 A72-17642

Ionospheric effects of solar flares, considering flare spectrum below 10 A, flare X-rays relationship to sudden ionospheric disturbances and electron density profiles
06 p0874 A72-18087

Ionospheric electron density profiles and time variation of electron production rate for X-ray flare of 30 January 1968, observing decrease in effective recombination coefficient
06 p0874 A72-18088

Quantum efficiency at 6300 and 6364 A of recombination mechanism in nighttime F layer, obtaining ionospheric electron density profiles
07 p0974 A72-18893

Comparative IR schlieren and interferometry techniques for measuring electron density profiles from refractive index effects of rotationally symmetric plasmas
07 p0986 A72-19613

Lower ionospheric electron density profile determination at high latitudes from riometric observations, discussing cosmic radio emission absorption representation
08 p1225 A72-20730

Multicomponent meteoritic composition effects on meteor trails radio wave reflections, obtaining ionospheric electron concentration distribution
08 p1131 A72-20805

Radio absorption in lower ionosphere obtained from vertical distribution of electron density and production rates from solar protons energy spectrum
08 p1226 A72-20816

Ionogram electron density-height distributions for analysis of multiple cusp structure near E region critical frequency
08 p1156 A72-21101

Nighttime and sunrise period ionospheric electron density profiles with respect to time after sunset and solar zenith angle
08 p1226 A72-21102

Neutral wind influence on lower ionosphere nighttime electron and NO ion density profiles
08 p1157 A72-21112

Ionospheric electron density nighttime changes as function of local time, height and latitude during geomagnetic storms
08 p1157 A72-21113

Local and integral ionospheric electron concentrations and horizontal gradients effects on reduced Doppler frequency shift difference along satellite orbit
08 p1132 A72-21144

Geometric optics approximation for rf wave forward and backscatter characteristics by spherical overdense clouds for several electron density distributions
[AD-739797] 08 p1136 A72-21980

Xenon plasma produced in cascaded arcs, investigating spectral line widths, temperature and electron density profiles, transition probabilities and I-V characteristics
09 p1364 A72-23392

HF radio waves scattering by spherical electron cloud with Gaussian density distribution
09 p1282 A72-23515

VI.F waves propagation dependence on ionospheric horizontal electron density gradients associated with midlatitude depression from FR-1 satellite observation
10 p1472 A72-24060

Microwave equipment for electron density profiles determination used in ionization relaxation start study of shock induced Ar plasma
10 p1519 A72-24067

Simultaneous rocket observation of wind shear and electron density profile in lower ionosphere, noting sporadic E layer formation
10 p1477 A72-25154

Temporal variations of sporadic E layer blanketing frequency, virtual height and occurrence rate, calculating electron density profiles and tidal wind influence
10 p1441 A72-25162

Nonequilibrium partially ionized viscous shock layer on blunt body, determining electron temperature and electron-ion density profiles
11 p1744 A72-25560

Daytime electron density profile in E and D regions from rocket lower ionosphere sounding, noting winter electromagnetic absorption anomaly
11 p1622 A72-26101

Magnetospheric equator plane electron density profiles determination from plasmopause whistlers observed in UK
11 p1626 A72-26421

Vertical electron concentration and temperature profiles at 80-170 km measured by rocket launched on 10 July 1969 at Volgograd
11 p1628 A72-26917

Electron recombination loss coefficients and concentration profiles for D region during solar eclipses from rocket measurements
12 p1800 A72-27149

Electron density profiles calculation from ionograms, obtaining equivalent delay caused by ionization below minimum plasma frequency
12 p1802 A72-27307

W addition effect on Co-Nb alloys, noting phase structure transformation from cubic to hexagonal due to mean electron density increase
12 p1829 A72-27642

F region mean electron density profile seasonal and solar cycle dependence, using Chapman function for nighttime F layer description
12 p1803 A72-27775

Disturbed D layer electron density profiles at high energy particle incidence, using partial reflection method
12 p1864 A72-27783

Exponential functions model for D region vertical distribution of electron density profiles, taking into account solar X- and cosmic rays
13 p1945 A72-28581

D region electron density profiles calculated as function of solar zenith angles, noting LF radio wave propagation
13 p1945 A72-28582

Latitudinal and diurnal development of seasonal anomaly in upper ionosphere from Alouette 1 data, discussing vertical electron density profiles
13 p1946 A72-28594

Night sky upper ionospheric electron concentration perturbations during magnetic storm, noting latitudinal distribution
13 p1949 A72-29252

OSO-6 Mg X spectroheliogram data for corona electron density map construction during 7 March 1970 solar eclipse period
13 p2031 A72-29529

Partial reflection method to obtain D region electron density profiles and collision number
14 p2086 A72-30791

Average interstellar electron and early star density in Galactic disk, examining hot stars ionizing photons and H II regions photoionization
14 p2161 A72-31044

Interferometric investigation of impurities effects on electron density distribution in ionization-relaxation zone behind shock waves in monatomic gas
15 p2215 A72-31213

Ionospheric electron density measurement by radio propagation method, recording traveling ionospheric disturbance effect and sporadic E strata thicknesses
15 p2223 A72-31438

Model Martian atmosphere, investigating effects of departures from electron density profile spherical symmetry on radio wave phase shift in bistatic radar occultation experiment
15 p2194 A72-31440

Equatorial ionospheric vertical electron density profiles measurement by rocket-borne phase measuring swept RF probe with dc biased sensor, comparing data with ionograms
15 p2226 A72-31940

Electrical conductivity in mesosphere and upper stratosphere from rocket sounding by blunt probe technique, suggesting electron density profiles dependence on dissociative recombination variations
15 p2228 A72-31972

Nighttime F region vertical velocity estimation, using electron density profiles vs true height
15 p2231 A72-32267

Plasma electron density profile reflection coefficient frequency-dependent amplitude and phase determination by measuring time response to fast-rising voltage pulse
16 p2437 A72-33767

Ring current effect on magnetospheric electron density profiles derived from plasmopause whistlers.
17 p2600 A72-35368

Electron profiles during negative magnetic bays in the auroral zone
17 p2551 A72-35860

Calculations of electron-profile disturbances in the F region during the passage of a neutral wave
17 p2551 A72-35861

Determination of electron concentration profiles in the lower ionosphere from the absorption at several frequencies
17 p2551 A72-35863

Influence of horizontal electron-concentration gradients on the magnitude of the maximum usable frequency and the trajectory of radio wave propagation in the ionosphere
17 p2519 A72-35878

ELECTRON DIFFRACTION

UHF radio signals refraction angles and group delay times for biexponential model of ionospheric electron density profile
18 p2657 A72-36101

Possibility of estimating an energetic particle stream in the ionospheric D region at sunrise and under daytime conditions
18 p2688 A72-36858

D region electron density profile determination based on LF link operating on one-hop ionospheric propagation of ordinary and quasi-transverse wave
18 p2689 A72-37163

Lower ionospheric electron density profile determination at high latitudes from riometric observations, proposing cosmic radio emission absorption representation
19 p2791 A72-38358

Plasma velocity, ion density and electrical conductivity from electron density and temperature and electromagnetic field profile measurements in Ar plasma inverse pinch
19 p2841 A72-38437

Comparison between observed and numerically calculated atmospheric gravity waves in the F-region.
19 p2794 A72-38864

Local and integral ionospheric electron concentrations and horizontal gradients effects on reduced Doppler frequency shift difference along satellite orbit
20 p2903 A72-39249

Isotropically and anisotropically polarized He-Ne lasers output dependence on longitudinal magnetic fields, noting electron density radial redistribution in gas discharge plasma
20 p2932 A72-39411

Characteristics of interplanetary electron inhomogeneities according to observations in the period from 1967 to 1969
21 p3114 A72-41765

Electron and positive ion density altitude distributions in the equatorial D-region.
22 p3170 A72-42366

Magnetically symmetric detection of the mid-latitude electron density trough by Ariel 3 satellite.
22 p3170 A72-42372

Measurement of the electron density distribution in plasmas from the bending of a gas laser beam.
22 p3211 A72-42396

A method for determining the electron density distribution about the F2 peak of the ionosphere.
22 p3174 A72-42992

Theoretical study and wind tunnel simulation of the electrical phenomena of reentry
22 p3231 A72-43092

Group delay times of magnetoeionic components for horizontal electron density profiles in magnetic meridian plane, noting comparison with ionospheric sounding data
23 p3283 A72-43361

High power radio transmitter for structural investigation of ionospheric D and E regions by signal reflection and electron concentration profiles
23 p3263 A72-43378

Exponential functions model for D region vertical distribution of electron density profiles, taking into account solar X- and cosmic rays
24 p3397 A72-45081

D region electron density profiles calculated as function of solar zenith angles, noting LF radio wave propagation
24 p3397 A72-45082

Latitudinal and diurnal development of seasonal anomaly in upper ionosphere from Alouette 1 data, discussing vertical electron density profiles
24 p3398 A72-45094

Continuity equation for dynamic auroral ionospheric model relating electron density profiles to auroral arc brightness
24 p3400 A72-45589

ELECTRON DETECTORS

U ELECTRON COUNTERS

ELECTRON DIFFRACTION

Ti alloys omega phase transformations by cryogenic cooling of bcc beta phase, interpreting electron diffraction pattern change in terms of displacement type reactions
01 p0082 A72-10204

Nonstoichiometric vacancy order in vanadium monoxide from electron microscopy and diffraction patterns, proposing partial phase diagram
03 p0401 A72-13584

Selected microarea electron diffraction technique in high voltage electron microscopy, discussing applications in crystallography and metallurgy
04 p0523 A72-15490

Reflection electron diffraction and ellipsometric studies of oxidation of niobium crystal surface, showing oxygen absorption in lattice and oxide film formation stages
07 p1017 A72-19944

Reflection mode high energy electron diffraction study of titanium carbide single crystal surfaces in ultrahigh vacuum environment
07 p1019 A72-20408

Carbon dioxide absorption kinetics on monocrystalline Mo from Auger spectrometry and slow electrons diffraction

10 p1525 A72-24137

Metal adhesive forces to clean Fe surface measured with LEED and Auger emission spectroscopy, noting binding energy correlation to oxygen

10 p1497 A72-24821

Emission of density modulated electron flux passing over diffraction structures formed by half planes and combs with oblique teeth, discussing optimum emitted power conditions

12 p1793 A72-27858

Low energy electron diffraction structures due to CO and oxygen adsorption on clean Re surfaces produced by Ar ion bombardment at 20 to 920 C

13 p2020 A72-28522

Electron diffraction study of transformation twin rotations in Fe-Ni martensites, showing foil plane uncertainty effect with respect to image plane

13 p1975 A72-28666

Re single crystal LEED diffraction pattern, showing surface carbon structure

13 p2021 A72-28800

Si phase identification in super alpha Ti alloys, using electron transmission microscopy and diffraction analyses

14 p2120 A72-30616

Absolute intensity LEED spectra for clean Ni surfaces, discussing measurement uncertainties

15 p2276 A72-31854

Debye-Waller factors measurement for Mo and Cr surfaces near normal incidence based on LEED

15 p2292 A72-31857

Single crystal disk substrate design with electron bombardment heating for LEED and Auger electron spectroscopy studies in ultrahigh vacuum

17 p2553 A72-34642

Electron diffraction patterns of previously deformed Ti-Nb alloy containing unequal populations of omega phase variants, noting anisotropy

17 p2566 A72-34673

Hydrogen and nitrogen desorption phenomena associated with a stainless steel 304 low energy electron diffraction/LEED and molecular beam assembly

19 p2762 A72-38023

Solid surface geometry, atomic composition and electronic structure observations, discussing Auger spectroscopy, field ion microscopy and electron diffraction and scattering techniques

19 p2803 A72-38389

Crystalline solids surfaces with catalysis, electronics and corrosive reactions, discussing slow electron diffraction, ionic field microscopy and Auger spectroscopy techniques for surface cleanliness measurement

23 p3324 A72-44461

Oxidation of W/110/1 - LEED study of the oxide formation at 1000 K

24 p3378 A72-44952

ELECTRON DIFFUSION

Ambipolar diffusion influence on MHD generator electrical conductivity, discussing plasma radiation, electron escape generator geometry and efficiency and ignition temperature range

04 p0554 A72-14404

High energy cosmic ray electrons anisotropy, considering diffusion from discrete source model

04 p0568 A72-15510

Photoelectrically excited electrons diffusion and dc effect in ZnO single crystals, calculating drift mobility and lifetime product

05 p0667 A72-16158

Electron density and diffusion measurements in ionized air in front of strong shock wave with resonant microwave probe and electromagnetic induction technique

05 p0648 A72-16211

Relativistic electron pitch-angle diffusion driven by oblique lf whistler-mode turbulence in collisionless plasma immersed in static magnetic field

05 p0699 A72-17024

Vlf wave excitation during sudden storm commencement, causing magnetosphere trapped energetic electrons to diffuse and precipitate into lower ionosphere

06 p0803 A72-17451

Diffused electron and ion currents through grid anode of cesium thermionic diode, determining electron temperature and potential distribution in electrode gap

08 p1113 A72-21747

Electromagnetic plasma accelerator with electron drift and diffusion towards anodes, neutral gas ionization and extended ion acceleration zone

09 p1361 A72-22955

Magnetic field effect on threshold pressure reduction for He and Ar gas breakdown by carbon dioxide laser radiation, taking into account inhibition of radial electron diffusion

[AD-741539]

09 p1365 A72-23493

Minority carrier diffusion length in liquid epitaxial GaP, noting dependence on dominant impurity and

substrate growth orientation from Schottky diode photocurrent technique

10 p1526 A72-24551

Alloy p-n-p junction transistor diffusion capacity variation with emitter current as function of temperature at 80-320 K

10 p1451 A72-24558

Critical analysis of Mouthaan-Susskind diffusion theory for magnetron diode electron transport, noting theoretical results discrepancy with experimental data

13 p1931 A72-29289

Energetic electron intrusion into inner radiation zone during and after 2 September 1966 geomagnetic storm, noting radial diffusion role

17 p2601 A72-35596

Pitch-angle diffusion of radiation belt electrons within the plasmasphere

17 p2602 A72-35597

Spectral dependence of diffusion in a magnetized plasma

17 p2592 A72-35623

Initial-boundary-value problem of the formation of an electrical discharge in a flow

17 p2592 A72-35627

Electromagnetic plasma accelerator with electron drift and diffusion towards anodes, neutral gas ionization and extended ion acceleration zone

17 p2593 A72-35884

Diffusion cooling in neon, argon, and krypton afterglow plasmas

19 p2841 A72-38378

Radiation belt electron lifetimes and removal through pitch angle diffusion by plasmaspheric whistler waves in cyclotron harmonics

20 p2918 A72-39532

Electron diffusion across a shock wavefront in metals

22 p3208 A72-43184

Equilibrium energy spectrum for the galactic cosmic electrons

23 p3328 A72-43831

Velocity distribution function and balance parameters of electrons in a nonisothermal argon plasma at degrees of ionization from 0.000000001 to 0.01

24 p3428 A72-44968

ELECTRON DISTRIBUTION

NT ELECTRON DENSITY PROFILES

Electrostatic waves in longitudinally magnetized plasmas with random electron charge distribution and applied magnetic field, finding phase characteristics

01 p0106 A72-10128

Electron correlation effects on low temperature thermodynamics of amorphous semiconductors, predicting Curie law magnetic susceptibility and equilibrium electronic specific heat dependence on temperature

04 p0562 A72-15153

Langmuir wave-caused electron plasma distribution function deformation, discussing particle trapping effects

06 p0858 A72-17542

Longitudinal electron plasma waves interaction with electron distribution, investigating energy transfer

06 p0858 A72-17543

Magnetic effects on Lorentz plasma collision processes, calculating electron distribution function in presence of strong arbitrarily oriented magnetic and weak electric fields

06 p0864 A72-18535

Pulsar distance determination from electron density distribution in line of sight estimated from frequency dispersion measures

07 p1080 A72-20054

Energy operator diagonalization of interacting valence electrons in semiconductor and metal models

09 p1352 A72-23356

Flat plate Langmuir probe measurement of electron temperature in plasma with elliptically anisotropic velocity distribution, discussing probe orientation effects

09 p1366 A72-23578

Inelasticity fluctuations effect on cosmic ray showers development, proposing criteria for lateral electron distribution and relative abundance of hadrons and muons

10 p1529 A72-24213

Ionized plasma electron velocity distribution function relaxation numerical calculation to validate local Maxwellian form during transport process

11 p1693 A72-25523

Angular distribution of electrons at output of specimen observed by electron microscope, examining resolution problem for thin objects

11 p1635 A72-26483

Third harmonic current density excitation by HF electric field in Lorentz plasma, calculating electron distribution function with unnormalized spherical harmonics and Fourier series

11 p1697 A72-26553

F region parameters relationship to night sky optical emission, considering electron distribution produced by dissociative recombination

12 p1802 A72-27308

Electron distribution near semiconductor-metal contact, discussing current carriers quantum properties effects

13 p2021 A72-28679

Global electron concentration disturbances in low and middle latitude F 2 during magnetic storm

14 p2100 A72-30635

Magnetospheric quasi-stationary pinch effect and filamentary structure due to electron streams parallel to geomagnetic field lines

14 p2103 A72-30664

Collisions role in nonlinear mode coupling and harmonic generation associated with electromagnetic wave in plasma, describing plasma electron distribution function by kinetic equation

15 p2195 A72-31679

Anisotropic electron pitch angle distributions at synchronous altitude due to wave-particle scattering and ionospheric acceleration along field lines

15 p2299 A72-31961

Electron swarms in uniform electric fields, discussing anode current amplification/radial distribution and drift-diffusion equation

15 p2285 A72-32239

Quasi-linear approximation of absorption of oscillations excited by electron beam in nonuniform plasma, noting electron distribution change with heating under magnetic field

16 p2432 A72-32807

Interstellar OH maser size determination, discussing scattering by inhomogeneities in electron distribution

16 p2456 A72-33473

Experimental evidence of an electron temperature enhancement in the wake of an ionospheric satellite

17 p2545 A72-34633

Separatrix shape, presence and position and electron lifetime and space charge in helical Tornado trap magnetic field

17 p2588 A72-34857

High latitude observation of precipitating electron spikes by polar orbiter OGO 4 satellite, noting population dependence on local trapping limit

17 p2601 A72-35591

Distribution function for free electrons in a molecular-nitrogen plasma

17 p2593 A72-35891

The Maxwellization of electrons in Cs-plasma of a low-voltage arc discharge

18 p2715 A72-36215

The influence of a nonequilibrium electron distribution function near the cathode and fractional coverage on the characteristics of a thermionic emission converter in the arc mode

18 p2647 A72-36220

Angular distribution measurements of photoemitted electrons for InAs by means of magnetic field

19 p2843 A72-37406

The equilibrium and the pulsation frequency spectrum of an electron cloud of spherical and cylindrical symmetry

19 p2867 A72-38571

Influence of solar flux and the equatorial electrojet on the diurnal development of the latitude distribution of total electron content in the 'equatorial anomaly'

19 p2794 A72-38868

Russian book on electron configuration model of condensed matter based on Hubbard model covering physicochemical properties of transition metals, alloys and compounds

21 p3066 A72-40348

Angular distribution of electrons elastically scattered from N₂

21 p3088 A72-40777

On the drift velocity of electrons in a gas

22 p3212 A72-42996

Kinetic equation for electron distribution in high temperature laser plasma, calculating nonequilibrium conditions for strong field and plasma parameters

23 p3318 A72-43323

Electron distribution fluctuation in two level system of unstable electron gas, noting periodic time dependence of population

23 p3319 A72-43406

Ion acoustic instability in collisionless shocks

23 p3320 A72-43522

Certain characteristics of the muon and electron components of extensive air showers at mountain level

23 p3331 A72-44425

Behavior of the spatial distribution function of shower particles near the axis of a cascade shower

23 p3331 A72-44432

Velocity distribution function and balance parameters of electrons in a nonisothermal argon plasma at degrees of ionization from 0.000000001 to 0.01

24 p3428 A72-44968

Mathematical model for secondary electron production fall-off, calculating ionization cross section from electron distribution

24 p3400 A72-45592

ELECTRON EMISSION

NT FIELD EMISSION

NT PHOTOELECTRIC EMISSION

NT SECONDARY EMISSION

Electron cyclotron harmonics emission as function of electron plasma frequency in He reflex discharge, measuring electron densities 01 p0105 A72-10026

Periodic solar flare modulation by pulsating structure, attributing radiation to synchrotron radiation emitted by electrons in magnetic flux tube embedded in solar corona 02 p0274 A72-12412

Solid state colloidal plasma physics, discussing statistical ionization mechanics, electron emission and recombination, rocket exhausts, MHD generation, metal vapors electrostatic precipitation, etc 02 p0267 A72-12842

Electron emission in strong electromagnetic waves within quantum electrodynamics, discussing energy losses and electron pair production 03 p0415 A72-13003

Exoelectronic emission method for examining deformation induced structural changes and interactions with ambient medium of metals and alloys surfaces 07 p0989 A72-20157

Thermally stimulated autophotocurrent emission from Cr-alloyed p-type GaAs electrode, determining spectral distribution and light and electric field effects on current 08 p1216 A72-21071

Oxygen adsorption effects on Mo orientation contrasts and emission image under electron microscope 10 p1513 A72-24875

Cesium contact ion thruster, investigating carburized thoriated tungsten filaments electron emission under ion bombardment [ALAA PAPER 72-440] 11 p1707 A72-26181

Three grid LEED-Auger display system for electron emission from solids at low primary beam energies 13 p1932 A72-29751

Work functions of dilute W alloys from vacuum emission vehicle and thermionic microscope measurements, noting additives effect 14 p2120 A72-30613

Electron work function for metallic sphere and thin film on dielectric substrate as function of radius, thickness and dielectric constant 15 p2290 A72-31222

Photomultiplier negative electron affinity emitter materials photosensitivity performance, considering Cs-activated GaP and applications for low light level detection 15 p2291 A72-31531

Ion density and electron acceleration region location from satellite-borne solar flare X-ray measurements 15 p2302 A72-32790

Galaxy M87 X ray source origin, suggesting hot plasma thermal emission or ejected relativistic electrons interacting with intergalactic magnetic or radiation fields 16 p2452 A72-33135

Induced electron emission dependence on polarization, frequency and intensity of second wave incident on electron with anomalous magnetic moment 16 p2424 A72-33365

Electron spectroscopy for chemical analysis /ESCA/ technique for nondestructive elemental analysis of lunar and terrestrial minerals 16 p2454 A72-33447

N2 positive and N2+/ band systems and the energy spectra of auroral electrons. 17 p2545 A72-34634

Electron currents injected through dielectrics 17 p2529 A72-34753

Parametric emission of relativistic electron clusters in a waveguide with a layered dielectric filling 17 p2529 A72-34850

Solar thermal radio burst temperature and emission measure determination from flux spectrum, noting consistency with radio observation 17 p2608 A72-35090

Thermodynamic analysis of metal surfaces covered by electropositive adsorbates. 18 p2656 A72-36126

Plasma immersion probe measurements of electron work function. 18 p2690 A72-36127

Electron work function change of interstitial compounds of the 4a and 5a metals in dependence on the nonmetal content. 18 p2656 A72-36129

Crystal orientation effect on electron work function in chemical vapor deposited W layers on thermionic converter cylindrical emitters 18 p2717 A72-36142

On the radiation of discontinuous gold films by electric current transmission. 18 p2718 A72-36349

Dependence of emission on work function variation in metals under tension 18 p2699 A72-36350

Vapor deposition in vacuum under conditions of constant vapor flow with the aid of electron emission current control 20 p2954 A72-39694

Electron spectroscopic investigation of solid surfaces chemical composition and atomic binding states

and structure, discussing methods of inducing electron emission 20 p2927 A72-39695

Fabrication and accelerated life tests of self sustained electron emission cathode with Cr film vapor deposition on Cu disk base 21 p2997 A72-40790

Temperature dependence of thermionic emission current density of Pt additive powdered zirconium carbide deposit on diode cathode working surface 21 p2997 A72-40801

Field emission from carbon fibres - A new electron source. 22 p3208 A72-41966

Physicochemical investigation of the thermionic emission properties of metals and alloys 22 p3191 A72-42811

Field-emission microscopy of tungsten coated with a silicon oxide film 24 p3432 A72-44892

ELECTRON ENERGY

NT ELECTRON STATES

Higher order cyclotron harmonic resonance of electrons with electromagnetic wave propagation through collisionless magnetoplasma, deriving energy oscillation time period 01 p0105 A72-10023

Quiet solar corona thermal emission flux at 169 MHz, showing constant brightness and electron temperatures during cycle 01 p0123 A72-10045

Topside electron density profile from empirical relation between ionospheric slab thickness and mean gradient temperature in F region, using Saint Santin scatter data 01 p0052 A72-10085

Electron energy equation and recombination radiation loss for atomic radiating optically thin plasmas, using Kramers-Unsold approximation 01 p0106 A72-10097

Strong ionizing shock waves production in hydrogen and deuterium gases, measuring plasma electron temperature, axial electric field and density and magnetic field compression [AD-734469] 01 p0108 A72-10237

Narrow-band type 4 bursts behavior comparison with synchrotron radiation in media with refractive index less/equal unity, determining magnetic field and electron energy 01 p0118 A72-10415

Ion and electron temperature increases by friction heating between neutral gas winds and plasma in ionosphere 01 p0054 A72-10424

Average energy electron capture coefficient dependence on air density, temperature and altitude under gamma radiation 01 p0059 A72-10599

Solar wind two component model with protons collisionless beyond ten solar radii, discussing effects of variable electron temperature 01 p0119 A72-10879

Stable red arc 6300 A emission calculation from satellite electron temperature and density data during geomagnetic storms 01 p0061 A72-10893

Auroral electron flux and energy spectrum observations by synchronous ATS 5 and polar OV-1-17 satellites 01 p0061 A72-10894

Precipitated electron energy latitude and time variations from auroral-height measurement during IQSY, using meridian scanning photometers 01 p0120 A72-10896

Rocket-borne measurement of particle fluxes and currents in auroral arc, determining pitch-angle distribution of electron and proton energies 01 p0120 A72-10897

Ionospheric F region heating by hf transmitter, obtaining electron temperature maps and heating/cooling time constants 01 p0062 A72-10910

Substorm electron drift relationship to cosmic noise absorption on auroral zone morning side, calculating electron energy loss 01 p0063 A72-10918

Electron thermal boundary layer effects on Langmuir probe measurements in subsonic cold plasma flow 01 p0071 A72-11191

Free electron density, electron temperature and gas ionization during shock wave propagation in Ar-filled shock tube from microwave radiation measurements 02 p0263 A72-12020

Electron temperature profile across nonequilibrium stagnation point boundary layer in partially ionized gas, investigating charged particles interaction with body in ionosphere 02 p0262 A72-12268

Nonlinear discrete radio source spectra deviations from power law at 10-5000 MHz, considering low energy relativistic electron excess 02 p0281 A72-12305

Auroral electron precipitation modulation dependence on energy explained by resonance at rebound frequency 02 p0222 A72-12598

Ion and electron temperatures difference relaxation rate in uniform plasma, noting relationship to Debye length 02 p0267 A72-12769

Wall double layer temperature and plasma oscillations effect on electron energy distribution in low discharge plasma column 03 p0394 A72-13192

Electric field aligned sheet currents of low energy electrons and protons near auroral arc, obtaining magnetic signatures 03 p0349 A72-13516

Electron temperature measurements in ionospheric isotropic nonequilibrium plasma by electrostatic probes and radar backscatter 03 p0349 A72-13520

Plasma beam production with Penning type discharge, demonstrating anisotropic electron temperature 03 p0395 A72-13566

Magnetoplasma with skin current characterized by current and electron temperature nonuniformity, analyzing instabilities for perturbations above ion gyrofrequency 03 p0396 A72-13713

Upper atmosphere He, Ne, Na and K atoms collisions with molecular oxygen, determining ejected electron energy during fast Na, K, Rb and Cs ionization for meteor phenomena modeling 03 p0438 A72-13980

Low energy electrons anisotropic flux impulsive precipitations in structured aurora explained by potential difference along geomagnetic field lines of force 03 p0350 A72-14272

Low pressure glow cathode triodes gas discharges, determining electron energy distribution function in double layer by probe measurements 03 p0400 A72-14349

Thin electrostatically self focusing electron streams in mercury vapor, analyzing energy distributions of ions and electrons ejected radially from beam 04 p0554 A72-14407

Electron energy distribution in carbon dioxide laser mixtures under lasing and nonlasing conditions 04 p0528 A72-14540

Relaxation time estimation for electron velocity relative to dilute vortex core array in rotating neutron superfluid, applying to pulsar slowdown rate 04 p0571 A72-14590

Magnetospheric heat flux effect on height variation of electron and ion temperatures and ion composition in topside ionosphere 04 p0515 A72-14929

Electron heating by oscillating electric field in presence of steady magnetic field, solving Boltzmann transport equation for electron velocity distribution in plasma 04 p0556 A72-14947

Ground state energy of interacting electrons for entire density range from two-point Padé approximation 04 p0549 A72-15229

Windowless ultrahigh vacuum photoelectron spectrometer for high resolution studies of gas-metal surface reactions, measuring electron energy levels 04 p0523 A72-15489

Velocity dependence of ionization cross section of Ar, Kr and Xe during thermal energy metastable neon atoms impact, obtaining secondary electron ejection efficiency 04 p0553 A72-15640

German monograph on spectroscopic investigation of Cs plasma electron density and temperature and excited atom density in various operational states of thermionic converter 04 p0560 A72-15699

Collisional radiative model of population densities of metastable electron levels of orthohelium in low pressure rf helium plasma 05 p0694 A72-15998

Electron energy derivation from contaminated Langmuir probe, explaining E region high temperature 05 p0654 A72-16007

Electron temperature measurement error elimination with radio frequency Langmuir probe in low density plasma, measuring floating potential 05 p0694 A72-16049

Nighttime polar atmospheric structure and temperature variations due to gas kinetic and electron energy changes 05 p0656 A72-16240

Latitudinal distribution of electron temperature in F 2 layer during summer daytime period of low solar activity from electron density profile geometrical parameters 05 p0656 A72-16248

OGO-5 measurement of 10-200 MeV cosmic ray electron energy spectra, discussing quiet time flux intensity 05 p0720 A72-16719

Integral and differential electron energy spectra in inner radiation belt from Cosmos 219 satellite observation 05 p0711 A72-16768

Electron density and temperature fluctuations coupled through Ohm law for ionizable medium, applying to MHD generators and MPD arc thrusters [AIAA PAPER 72-101] 05 p0706 A72-16813

Optical radiation from plasma discharge of electron bombardment mercury ion thruster, discussing electron temperature and primary electron fraction [AIAA PAPER 72-205] 05 p0706 A72-16851

Electron density and temperature temporal and radial profiles in megawatt MPD-arc thruster exhaust, using Thomson scattering technique [AIAA PAPER 72-209] 05 p0707 A72-16887

Electron heating in weakly ionized collisionless beam plasma discharge as function of neutral gas pressure and plasma column length 05 p0697 A72-16986

Electron heating model in perpendicular collisionless plasma shock waves based on electron trapping by turbulent electric field 05 p0697 A72-17014

Electron temperature gradient instability in collisionless shocks propagating across magnetic field 05 p0700 A72-17228

Temperature inhomogeneity effect on plasma column microwave resonant behavior in presence of axial magnetic field, ascribing spectral shifts to electron density and temperature profiles changes 06 p0854 A72-17417

Lf instability mode in partly ionized plasma due to electron temperature gradient aligned perpendicular to magnetic field, applying to E and F regions [AD-737931] 06 p0804 A72-17460

Parametric excitation of ion-acoustic waves in Q machine plasma, controlling electron temperature by amplitude modulated rf heating 06 p0855 A72-17513

Ion acoustic waves instability from electron-ion temperature difference in homogeneous collisional ionized plasma, using fluid equations perturbation analysis 06 p0856 A72-17524

Electron temperature fluctuations associated with drift-type instability in Q device, discussing plasma diagnostic techniques 06 p0857 A72-17530

Single ended Q machine Ba plasma probe measurements of ion temperatures perpendicular to magnetic field, electron temperatures and plasma densities and potentials 06 p0859 A72-17550

Plasma conductivity dependence on electron velocity distribution function in distorted Maxwellian form 06 p0860 A72-17690

Solar wind model of electrons, protons and alpha particles velocity and temperature differences dependence on distance from sun 06 p0873 A72-18025

Boltzmann equation solution analysis for Maxwell-Lorentz gas in electric field, discussing conditions for electron velocity distribution isotropic part evolution towards Maxwellian distribution 06 p0861 A72-18162

Spectrographic measurement of electron temperature and ion density profiles in cesium plasma thermionic converter 06 p0862 A72-18309

Electron energy distribution in carbon monoxide lasers, considering excitation effects on exchange processes, power transfer to vibration levels and vibrationally excited molecules influence 07 p0999 A72-18883

Systematic increase in auroral electrons mean energy with total precipitated energy 07 p1058 A72-19151

Cylindrical mirror electron energy analyzer, discussing theory, operation and design parameters [AD-745599] 07 p0984 A72-19322

Energy spectrum of primary cosmic ray electrons at 2-200 GeV, using balloon-borne counter telescope with gas Cerenkov counter 07 p1059 A72-19578

Dispersion relation for uhf drift waves in nonuniform plasma with cold electrons drift through stationary ions, deriving plasma stability conditions 07 p1042 A72-19612

Multichannel modular spectrometer with electrostatic analyzers for low energy electron and proton flux measurement 07 p0988 A72-19954

Spectrometers with electrostatic analyzers alternating with shielding and suppressing gratings for low energy electron flux measurement 07 p0988 A72-19955

Transient plasma diagnostics using carbon dioxide laser interferometry and absorption for electron density and temperature determination 07 p1008 A72-20557

Ionospheric electron concentration and temperature as function of solar zenith angle from rocket sounding 08 p1154 A72-20734

Energy and angular distributions of electrons released during ion atom collisions from energy spectra studies, discussing autoionization transitions 08 p1210 A72-20836

Steady state problem of energy spectrum of variable magnetic field accelerated electrons, considering synchrotron X ray emission of Crab pulsar and nebula 08 p1231 A72-21119

Transverse electromagnetic field and electron velocity vectors during rectangular pulse incidence on ionization front moving at light speed, describing steady state encounter region 08 p1136 A72-21741

Diffused electron and ion currents through grid anode of cesium thermionic diode, determining electron temperature and potential distribution in electrode gap 08 p1113 A72-21747

Electron temperature effects on radiation fields and resistance of short electric dipole antenna embedded in hot uniaxial plasma 08 p1215 A72-21991

Single and double probe measurements of electron temperatures in flames, discussing difficulties in obtaining reliable I-V characteristics 08 p1129 A72-22043

Second derivative measurement of Langmuir probe characteristics for electron energy distribution functions in nonstationary plasmas by sample and hold technique 09 p1359 A72-22654

H Balmer lines H alpha/H beta ratios as electron temperature indicators in nonequilibrium plasmas 09 p1359 A72-22666

Solar wind properties and discontinuity characteristics, describing particle densities, wind speed, magnetic field level and near earth electron and ion temperatures 09 p1377 A72-22756

Inhomogeneous superconductors and proximity effects, calculating conditions for vortex lattice pinning energy as increasing function of magnetic field and temperature 09 p1370 A72-22798

Electron reflection mechanism and gas adsorption effect at W /001/ surface in energy range 1-10 eV 09 p1370 A72-22804

Electron energy distribution and losses existence limit at Langmuir paradox pressures in gas discharge, hypothesizing wall mechanism of electron collisions 09 p1361 A72-22958

Cosmic electrons energy spectrum between 1 and 25 GeV from balloon observations, noting Compton/synchrotron loss effects [AD-745871] 09 p1377 A72-23001

Ionospheric electron concentrations and temperatures determined by time dependent continuity equations model during 11 September 1969 solar eclipse 09 p1390 A72-23518

Supersonic Ar, He and molecular nitrogen jets, determining electron temperature and concentration and atomic state population in shock waves region by spectroscopic measurement 10 p1517 A72-23837

Bounded plasma ionization instability inhomogeneity scale evaluation, assuming negligible electron energy losses due to heat conduction 10 p1517 A72-23844

Low transverse energy, high nu/gamma electron beam propagation characteristics, reviewing transport, compression and combination beam-handling concepts 10 p1518 A72-23959

High pressure CO and N plasmas production by uncoupling electron temperature from number density, measuring electron-ion recombination rates 10 p1518 A72-23962

Interaction forces between monovalent metal crystals determined from electrons quantified energy variations 10 p1525 A72-24136

Ar/He plasma acoustic wave properties, expressing phase velocity and damping as function of ion-electron temperature ratio and relative species densities 10 p1520 A72-24300

Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors 10 p1526 A72-24351

Absorption spectra and plasma of laser spark in hydrogen, studying electron and atoms temperature and concentrations time variations 10 p1491 A72-24359

Equatorial sporadic E sudden disappearance associated with magnetic field depressions, noting irregularities and electron velocities role 10 p1475 A72-24956

Electron cyclotron resonance in Penning ion source, measuring electron temperature from X ray emission spectra 10 p1516 A72-25029

Nonequilibrium partially ionized viscous shock layer on blunt body, determining electron temperature and electron-ion density profiles 11 p1744 A72-25560

Thomson scattering of electromagnetic wave in plasma and ionosphere for studying electron and ion temperatures 11 p1621 A72-25838

Penetrating particles effect on low energy scintillation spectrometers sensitivity in various regions of magnetosphere 11 p1632 A72-25934

Solar wind model of electrons, protons and alpha particles velocity and temperature differences dependence on distance from sun 11 p1713 A72-25961

Russian book on transition metals and alloys electron structure and electronic properties covering paramagnetism, positron annihilation, magnetic transformations and electron heat capacity 11 p1659 A72-26069

Electrostatic and electron temperature probes compared during ionospheric rocket soundings, noting lower ionosphere discrepancies due to surface contamination 11 p1633 A72-26102

Explorer 35 observations of solar wind electron density and temperature, noting anisotropy direction correlation with magnetic field vector alignment 11 p1713 A72-26392

Daytime and nighttime electron temperatures from topside resonances, using oblique echo theory 11 p1625 A72-26409

Artificial heating of lower ionosphere in controlled experiment, measuring electron temperature increase by radar backscatter system 11 p1625 A72-26412

Electron temperature determination from rate of ionization due to collisions between electrons and neutral particles in plasma 11 p1697 A72-26586

Charge carrier density, neutral gas density, electric potential and electron temperature profiles in cylindrical diffusion column, considering electron pressure 11 p1698 A72-26646

Electron energy, mobility and bremsstrahlung in weakly ionized nonisothermal plasmas, using Kogan approximation 11 p1698 A72-26647

Plasma beam production with Penning type discharge, demonstrating anisotropic electron temperature 11 p1699 A72-26753

Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations and atom-atom collision cross sections 11 p1699 A72-26760

Ionospheric and neutral atmospheric temperature profile, composition and electron density and energy measurements by MR-12 rocket 11 p1628 A72-26905

Vertical electron concentration and temperature profiles at 80-170 km measured by rocket launched on 10 July 1969 at Volgograd 11 p1628 A72-26917

Electron heating in weakly ionized collisionless beam plasma discharge as function of neutral gas pressure and plasma column length 12 p1850 A72-27130

Averaged equations for laser heating of two temperature plasma with allowance for nuclear fusion energy, noting inequality of ion and electron temperature 12 p1851 A72-27395

Quiescent plasma production with axially homogeneous density distribution in skipping magnetic fields by electron cyclotron resonance discharge, noting high electron temperatures 12 p1851 A72-27400

Spatial and time dependence of electron velocity in short channel microwave FET, using Monte Carlo method 12 p1790 A72-27434

Peak electron energy spectra during auroral substorm from high energy resolution balloon X ray measurements 12 p1804 A72-27787

Electron energy threshold measurements in irradiated II-VI compounds interpreted in terms of damage on metal and chalcogenide sublattices 12 p1859 A72-28070

Strong field electromagnetic wave interactions with anisotropic plasmas, considering electron velocity distribution function 13 p2009 A72-28449

Wave equations and photon absorption cross section of relativistic electron in magnetic field, taking into account relativistic energies 13 p2002 A72-28647

Friction force electron component for superconductor dynamic dislocation at various temperatures and propagation rates 13 p2021 A72-28901

Heating mechanisms in laser pulse produced plasma from electron temperature and reflectivity measurements 13 p2011 A72-28999

- Two point correlation description of MHD plasma properties subject to electrothermal instability, calculating electron number density and temperature fluctuations
13 p2015 A72-29373
- Low energy relativistic cosmic ray electrons temporal intensity variations from IMP satellite measurements, considering correlation with solar activity
13 p2030 A72-29376
- Homogeneous plasma column generation by HF generator, probing for electron temperature and charged particle concentration
13 p2015 A72-29507
- Electron density and temperature measurement from scattering of laser radiation in plasma within axisymmetric toroidal magnetic mirror machine
13 p2017 A72-29609
- Resonant irradiation effect on cesium discharge plasma, charge density, electron temperature and electric field strength
13 p2017 A72-29610
- MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations
13 p2017 A72-29618
- Transverse magnetic field effect on electron temperature and energy distribution and spectral lines of gas discharge plasma
13 p2017 A72-29635
- Electron temperature and emission measures during solar X-ray flares, studying effects of gradual and rapid radiation flux increases
13 p2032 A72-29722
- Three grid LEED-Auger display system for electron emission from solids at low primary beam energies
13 p1932 A72-29751
- Electric field excited stable auroral red arc time dependent behavior, noting inconsistency with satellite and ground observation of 6300 Å emission for electron energy
13 p1953 A72-29812
- Satellite-borne low energy electron and proton spectrometer for measuring auroral electron and proton spectra
13 p1960 A72-29841
- Electron temperature radial dependence in two fluid models of solar wind, noting unrealistic assumption of heat conduction dominated electron gas energy equation
13 p2034 A72-29961
- Daytime F region inverse relationship between electron density and temperature, determining energy input profile and thermal flux
14 p2097 A72-30127
- Auroral spectroscopic and excitation processes, discussing atomic oxygen production, emission ratios and electron energy spectrum, UV and IR emissions, composition and temperature measurements
14 p2098 A72-30138
- Electron energy distribution, ions mass spectral composition and spatial charge concentration of currentless photoresonant Ce plasma obtained by associative ionization
14 p2136 A72-30175
- Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect
14 p2137 A72-30309
- Charge carrier cooling in nonhomogeneous semiconductors by static electric field, plotting average electron temperature as function of current
14 p2142 A72-30362
- Flux densities, electron energies and brightness temperature determination from radio telescope observations of galactic sources and nonthermal radiation
14 p2155 A72-30553
- Intensity and energy spectrum calculation of albedo electrons recorded in cosmic particle showers by gas discharge counters
14 p2105 A72-30629
- Ionospheric electrons and neutral particles temperature and concentration profiles explained by electron gas cooling due to atomic hydrogen excitation, calculating heat flow
14 p2101 A72-30641
- Magnetized nonuniform plasmas, discussing description to all orders in electron and ion temperatures of waves by operator method
14 p2139 A72-30879
- Solar proton flare induced X ray bursts maximum flux, total radiated energy, electron temperature and emission from satellite measurements
14 p2160 A72-30910
- Total energy distributions of field emitted electrons from tungsten as function of coverage by hydrogen and deuterium, observing elastic and inelastic spectrum
15 p2275 A72-31851
- Absolute intensity LEED spectra for clean Ni surfaces, discussing measurement uncertainties
15 p2276 A72-31854
- Debye-Waller factors measurement for Mo and Cr surfaces near normal incidence based on LEED
15 p2292 A72-31857
- Surface contamination effect on electron temperature measurement using rocket-borne Langmuir probe in lower ionosphere
15 p2236 A72-31926
- Geomagnetic field aligned electron anisotropies at high latitudes for energies 1 and 6 keV observed by ESRO satellite, noting two regions of maximum occurrence frequency
15 p2226 A72-31928
- Correlated particle flux, magnetic field, electron intensity and riometer absorption measurements during recovery phase of polar magnetic substorm on 6 March 1970
15 p2226 A72-31946
- Rocket-observed energetic electron flux association with ground recorded plasmasphere whistler in terms of gyroresonant wave-particle interaction
15 p2198 A72-31948
- Steady state electron mean energy variation between parallel plates in Ar and He calculated by Monte Carlo simulation for comparison
15 p2285 A72-32222
- Electronic energy band structures for alpha and gamma phase Ce, using exchange potential and plane wave method
15 p2293 A72-32227
- HF electric field effect on ultrasound wave propagation in semiconductor, noting amplification factor dependence on electron heating
15 p2279 A72-32739
- Interplanetary high energy electron flux association with solar flares from HEOS-A1 data
15 p2302 A72-32792
- Plasma corona electron temperature decoupling from core of solid deuterium pellet heated in vacuum by convergent laser beams
16 p2433 A72-32810
- Gas ionization buildup behind hypersonic shock waves, calculating onset point properties from plasma conservation and electron energy equations
16 p2434 A72-32902
- Low energy outer zone electrons high latitude boundary variation with interplanetary magnetic field direction and with geomagnetic activity from Alouette and Explorer data
16 p2382 A72-32957
- Charge carrier motion in semiconductor with electron interactions, considering heating in presence of negligible electric field
16 p2441 A72-33278
- Weakly ionized nonequilibrium plasma flow from gas discharge tube positive column, obtaining electron temperature axial decay rate from energy equation
16 p2437 A72-33655
- Radio sources with straight spectra and spectral index of 0.3, noting relationship to self absorption, electron energy distribution and cosmological evolution
16 p2457 A72-33685
- Low pressure He and Ne discharge generated positive plasma column potential, determining electron concentration from electron energy distribution functions
16 p2437 A72-33746
- Probe temperature, shape and size effects on electron energy distribution measurements for positive plasma column of low pressure He and Ne discharges
16 p2437 A72-33750
- Conservation equations for wave and/or turbulence momentum and energy flux in interplanetary space shock vicinity, developing modifications for electron temperature calculations
16 p2459 A72-33913
- Electron-ion heating in high beta perpendicular collisionless shock waves by plasma cylinder magnetic compression using theta pinch
16 p2439 A72-33936
- Coupling of free electron and nitrogen vibrational temperature nonequilibrium in weakly ionized nozzle expansions of shock heated nitrogen
16 p2380 A72-34059
- [AIAA PAPER 72-683]
Measurement of the electron work function in binary and ternary transition metal-nonmetal systems.
17 p2595 A72-34602
- The influence of the electron temperature and other parameters on the electron density of a cesium plasma in a thermionic converter.
17 p2497 A72-34611
- Experimental evidence of an electron temperature enhancement in the wake of an ionospheric satellite.
17 p2545 A72-34633
- N2 positive and N2+/+ band systems and the energy spectra of auroral electrons.
17 p2545 A72-34634
- Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors
17 p2595 A72-34952
- Absorption spectra and plasma of laser spark in hydrogen, studying electron and atoms temperature and concentrations time variations
17 p2562 A72-34958
- Integral and differential electron energy spectra in inner radiation belt from Cosmos 219 satellite observation
17 p2600 A72-35271
- Runaway electrons in toroidal plasma investigation by thick target bremsstrahlung measurement, noting energy distribution and runaway rate estimates
17 p2591 A72-35370
- Toroidal plasma spectroscopic investigation from current pulse start to afterglow, noting electron temperature and density radial distributions and energy balance
17 p2591 A72-35373
- Electron temperature in the Martian ionosphere.
17 p2613 A72-35499
- Cosmic ray electron spectrum and its modulation near solar maximum.
17 p2601 A72-35583
- On the stability of obliquely propagating whistlers.
17 p2517 A72-35600
- Whistler side-band growth due to nonlinear wave-particle interaction.
17 p2517 A72-35601
- Nonequilibrium energy constants associated with large-amplitude electron whistlers.
17 p2517 A72-35620
- On the temperature of the helium emission regions in the solar atmosphere.
17 p2616 A72-35699
- Auroral electron energy spectra at high latitudes from polar auroral arcs luminosity profile examination
17 p2550 A72-35853
- Electron energy distribution and losses existence limit at Langmuir paradox pressures in gas discharge, hypothesizing wall mechanism of electron collisions randomization
17 p2593 A72-35887
- Distribution function for free electrons in a molecular-nitrogen plasma.
17 p2593 A72-35891
- Galactic nebulae electron temperature and density from forbidden line emissions interpreted in terms of transition probabilities and collision strengths
18 p2723 A72-36090
- Analytical description of thermionic converter phenomena, assuming position linearity of interelectrode electron energy distribution and local thermodynamic equilibrium in cesium plasma near collector
18 p2646 A72-36200
- Arc discharge transition from diffusion to arc mode, presenting theory on I-V characteristics negative resistance section and on hysteresis causes
18 p2714 A72-36207
- Nonequilibrium relaxation phenomena in the near-emitter region of the thermionic converter.
18 p2647 A72-36209
- Atmospheric model synthesis of observed electron temperatures and concentrations in tropical ionosphere during 8 March 1970 magnetic storm, noting F2 region features
18 p2686 A72-36296
- Numerical and shock tube experiments for variation of bound electron temperature and nonequilibrium chemical and radiative relaxation behind normal shock waves in air, using atom-molecule collision model
18 p2681 A72-36564
- Turbulent heating of electrons and ions in a collisionless shock wave.
18 p2715 A72-36599
- Time-resolved diagnostic method for hydrogen plasmas.
18 p2716 A72-36949
- Temperature dependence of the electron thermal conductivity in rare gas plasmas.
18 p2716 A72-36958
- Measurements of MeV-electrons during the recovery-phase of a polar magnetic substorm on March 6, 1970.
19 p2789 A72-37409
- Energy loss of fast electrons and positrons in a plasma.
19 p2840 A72-37727
- Design considerations in the measurement of electron temperature in the ionosphere.
19 p2801 A72-37926
- Quantum yield variations of Nd ion activated glass as function of electron beam energy and intensity, noting nuclear particles effect on laser radiation
19 p2823 A72-38205
- Ionospheric electron concentration and temperature as function of solar zenith angle from rocket sounding
19 p2791 A72-38362
- Plasma velocity, ion density and electrical conductivity from electron density and temperature and electromagnetic field profile measurements in Ar plasma inverse pinch
19 p2841 A72-38437
- Effect of plasma resistance on electron temperature measurement by means of an electrostatic probe.
19 p2804 A72-38593
- Explorer 35 observation of geomagnetic tail low energy electrons, noting plasma sheet extension to lunar distance and correlation with solar wind
19 p2853 A72-38737

An evaluation of the intensity of Cerenkov radiation from auroral electrons with energies down to 100 eV.
19 p2792 A72-38741

Cosmic-ray diffusion coefficient in interplanetary space.
19 p2853 A72-38756

A new method for in situ electron temperature determinations from plasma wave phenomena.
19 p2793 A72-38758

A helium-neon laser active element with a metallic inner wall surface.
19 p2814 A72-38785

Electron temperature and density determination from RF impedance probe measurements in the lower ionosphere.
20 p2916 A72-39229

Measurements of electron detection efficiencies in solid state detectors.
20 p2925 A72-39401

High latitude variations of F-region electron temperature.
20 p2918 A72-39535

Interstellar gas electron temperature determination from recombination line spectra observations along galactic ridge
20 p2971 A72-39858

Non-thermal bremsstrahlung of fast electrons and flare of stars.
20 p2974 A72-39894

Temperature and emission measure deduced by coronal visible lines.
20 p2974 A72-39896

Electron density and temperature measurement from laser radiation scattering in plasma within axisymmetric toroidal magnetic mirror machine
21 p3091 A72-40663

Resonant irradiation effect on Cs discharge plasma charge density, electron temperature and electric field strength
21 p3091 A72-40664

MHD stability in Hg vapor discharge plasma excited by standing microwave near electron cyclotron resonance, discussing electron energy anisotropy effect on LF oscillations
21 p3091 A72-40671

Measurement of the electron temperature of small 3-cm radio bursts /Research note/.
21 p3100 A72-41291

Solar soft X-rays and solar activity. II - Observational assessment of the role of the type III acceleration mechanism in establishment of the soft X-ray source volume.
21 p3101 A72-41294

Influence of inelastic electron-energy losses on the development of ionization instability in a plasma
22 p3209 A72-41877

Anode heat transfer for a flowing argon plasma at elevated electron temperature.
22 p3210 A72-41952

Analytic expressions for electron energy transfer rates for nitrogen and oxygen vibrational excitation in ionosphere, applying to atmospheric and ionospheric computer modeling
22 p3168 A72-42001

Geomagnetic DP-2 variation base level from E region electron drift velocity measurements in equatorial electrojets
22 p3169 A72-42013

Nonadiabatic condition effects on ultrarelativistic electron energy losses in geomagnetic trap in remote magnetosphere regions
22 p3218 A72-42224

Effect of increasing beam voltage on the internal quantum efficiency of spontaneous emission in electron-beam-excited p-type GaAs.
22 p3185 A72-42308

Energy degradation calculation for electron interaction with carbon dioxide molecules, discussing relationship with Mariner UV data
22 p3171 A72-42421

Electron impact excitation cross sections and energy degradation in CO.
22 p3172 A72-42422

Electron density and temperature in microwave plasmas at higher pressures.
22 p3211 A72-42479

Direct measurement of diffusion cooling in an afterglow plasma.
22 p3212 A72-42918

Electronic density and temperature deduced from the observation of the cone of resonance of an antenna in a magnetoplasma
22 p3212 A72-43049

Pulse discharge plasma in Ar with gas ionization level near unity, noting plasma cylinder parameters, electron temperature and I-V characteristics
22 p3212 A72-43103

Molecular gas presence effect on electron energy balance in atomic gases, noting inelastic collisions loss factor in heated Ar plasma containing nitrogen molecules
22 p3213 A72-43110

Electron-energy distribution in a low-temperature plasma
22 p3213 A72-43118

Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect
23 p3317 A72-43211

Calculation of the parameters of a plasma accelerated in a high-frequency electric field and a static magnetic field
23 p3320 A72-43660

Equilibrium energy spectrum for the galactic cosmic electrons.
23 p3328 A72-43831

Variation with electron velocity powers of electron collision frequency and energy transport coefficients in weakly ionized plasmas - Earth's lower ionosphere.
23 p3285 A72-43994

Glow discharge in rare-gas and metal vapour mixture. I - Distribution functions and kinetic coefficients in He-Cd mixture discharge.
23 p3322 A72-44320

Isothermal atmosphere inhomogeneities effects on electromagnetic cascade electrons integral energy spatial distribution
23 p3331 A72-44433

A Lecher wire microwave interferometer for measurements of electron density and electron temperature in a flowing transient plasma.
23 p3292 A72-44543

Detection of interplanetary electrons from 18 keV to 1.8 MeV during solar quiet times.
23 p3333 A72-44546

Origin of 200-keV interplanetary electrons.
23 p3333 A72-44547

Excitation mechanisms in the argon-ion spectrum at near laser conditions and temperatures and densities in a hollow cathode argon-arc discharge.
24 p3428 A72-44807

Dissociative attachment in carbon dioxide.
24 p3427 A72-45303

Electronic energy transfer phenomena in rare gases.
24 p3429 A72-45310

Current induced drift rate of plasma electrons in electric and magnetic fields, noting electron velocities in turbulent heating of plasma
24 p3429 A72-45507

Sunrise effects on the latitudinal variations of topside ionospheric densities and scale heights.
24 p3399 A72-45552

ELECTRON FLUX

U ELECTRONS

U FLUX (RATE)

ELECTRON FLUX DENSITY

Auroral electron flux and energy spectrum observations by synchronous ATS 5 and polar OV-1-17 satellites
01 p0061 A72-10894

Farley-Buneman instability nonlinear development mechanism in equatorial electrojet, noting turbulent vertical electron flux role
01 p0062 A72-10901

Fast cyclotron and synchrotron transverse waves noise measurement in electron flux, using resonator with homogeneous electric field
02 p0190 A72-11573

Solar wind 10-9900 eV electron flux, evaluating energy transport in plasma rest frame
03 p0412 A72-13507

Ionospheric photoelectron fluxes and motions simulated by Monte Carlo technique, including transport effects, elastic and inelastic collisions and energy losses
03 p0412 A72-13517

Soviet monograph on electron flux nonlinear interaction with slow electromagnetic waves in TWT, discussing output power and efficiency increase
03 p0333 A72-13949

Upper atmosphere supplementary electron flux data relationship to geomagnetic disturbance obtained from high altitude balloon experiments
05 p0709 A72-16236

D region ionization by electron fluxes as explanation for latitudinal radio wave absorption
05 p0656 A72-16249

Electron flux and energy spectra measurements at 200-600 km altitude by Cerenkov counters onboard Proton 1 and 2
05 p0709 A72-16254

Additional high energy electrons flux detection in upper atmosphere after magnetic perturbations
05 p0710 A72-16525

OGO-5 measurement of 10-200 MeV cosmic ray electron energy spectra, discussing quiet time flux intensity
05 p0720 A72-16719

Extensive air shower spectra based on electron and muon number
06 p0871 A72-17283

Photoelectron flux measurement of intensities of plasma lines in radar incoherent scatter spectrum by uhf radar
06 p0874 A72-18732

Charged particles observations on 21 December 1968 by Explorer 40 and from ground, noting auroral light primary energy influx by precipitation band of electron intensities
09 p1299 A72-23005

Differential photoelectron flux in lower ionosphere during 7 March 1970 solar eclipse observed by Nike-Apache rockets
09 p1378 A72-23012

Differential photoelectron fluxes at 560 km altitude observed by OVI-18 satellite on 22 March 1969, noting latitudinal variation
09 p1378 A72-23013

Model of dynodes system with random electron-hole pairs number, calculating equations for mean fluxes transport and correlated noise fluctuations
09 p1280 A72-23116

Emission of density modulated electron flux passing over diffraction structures formed by half planes and combs with oblique teeth, discussing optimum emitted power conditions
12 p1793 A72-27858

Low energy relativistic cosmic ray electrons temporal intensity variations from IMP satellite measurements, considering correlation with solar activity
13 p2030 A72-29376

Interplanetary electrons quiet-time intensity increases, considering trans-earth-orbital modulating region due to solar wind transport of photospheric field lines
13 p2030 A72-29377

Proton and electron fluxes limits in synchronous orbit, investigating local time dependence
13 p2031 A72-29393

Absorption coefficient of H-He plasma measured in temperature and electron density range of inverse bremsstrahlung and photoionization absorption
15 p2284 A72-31522

Low energy electron flux in magnetosphere, discussing relation to geophysical phenomena, solar wind, interplanetary magnetic field and charged particle longitudinal drift trajectories
15 p2225 A72-31903

Quasi-periodical intensity pulsations in trapped and precipitating electrons in earth outer radiation belt
15 p2299 A72-31914

Space charge electron flow between parallel conducting walls, developing relativistic method for potential and field distribution time variation
15 p2279 A72-32510

Stratospheric model for bremsstrahlung X ray relation emission to auroral electron flux, considering photon energy release in scintillation counters
17 p2551 A72-35872

Results of cosmic ray intensity measurements on the Venus-7 automatic station
22 p3218 A72-42213

Daily variation of electron and proton geomagnetic cutoffs calculated for Fort Churchill, Canada.
22 p3170 A72-42401

Solar-wind and interplanetary electron measurements on the Apollo 15 subsatellite.
22 p3218 A72-42403

Esro 1 /Aurora/ satellite electron intensity measurements, explaining disparities between different experiments by detectors low-energy thresholds difference
22 p3173 A72-42648

Rocket measurements of electron influx during a major magnetic storm with type A aurora.
23 p3332 A72-44515

Electron polar cap and the boundary of open geomagnetic field lines.
23 p3286 A72-44522

ELECTRON GAS

Cathode and anode temperatures effect on effective heat of condensation of electrons at anode for particular current density and different cesium vapor pressures
02 p0156 A72-12858

Hall effect mobility dependence on dispersion law in degenerate electron gas on semiconductor surface
02 p0270 A72-12890

Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations
03 p0395 A72-13572

Transport coefficients of electron gas in electromagnetic field, using Grad thirteen moment method
05 p0697 A72-17005

Neutron star and white dwarf strong magnetic field generation mechanism involving thermodynamic equilibrium states of electron gas
05 p0723 A72-17162

F region electron-ion gas dynamic model with stability dependence on periodic solutions convergence of continuity equations
08 p1153 A72-20725

Impurities effect on level density of electron gas within strong magnetic field, discussing included self energy
11 p1693 A72-25526

Electron gas in superstrong magnetic fields of gravitationally collapsed objects outer region, noting Wigner transition to ordered structure
11 p1699 A72-26704

Ionospheric electrons and neutral particles temperature and concentration profiles explained by electron

- gas cooling due to atomic hydrogen excitation, calculating heat flow
14 p2101 A72-30641
- Degenerate electron gas magnetic properties implications for metals, white dwarfs and neutron stars, discussing nonmagnetic state for thermal equilibrium
14 p2158 A72-30728
- Reversible thermodynamic cycle of chemical to electric energy conversion with electron gas as working body, discussing Gibbs-Helmholtz equations
16 p2350 A72-32994
- Charge carrier motion in semiconductor with electron interactions, considering heating in presence of negligible electric field
16 p2441 A72-33278
- Equations of state and equilibrium for electron gas in strong magnetic field, discussing effects in pulsar crusts and atmospheres
16 p2460 A72-33929
- Constants of the linearized motion of Vlasov-plasmas.
17 p2590 A72-35158
- Nonstationary electron-ion gas distribution in the ionosphere
18 p2689 A72-36878
- Landau orbital ferromagnetism appearance likelihood in white dwarf stars, noting temperature requirements of noninteracting electron gas
19 p2859 A72-37891
- Neutron-rich nuclei in a Fermi gas
19 p2837 A72-38060
- F region electron-ion gas dynamic model with stability dependence on continuity equations periodic solutions convergence
19 p2791 A72-38353
- Balescu-Guernsey-Lenard kinetic equation for homogeneous dilute electron gas extended to higher densities, specifying conditions for BBGKY hierarchy correlation functions solution
19 p2791 A72-38353
- The heating of the solar plasma due to microwave phenomena correlated with type II meter bursts.
22 p3222 A72-42041
- The threshold of disintegration of nuclei in a degenerate electron-neutron gas
22 p3209 A72-42963
- Electron distribution fluctuation in two level system of unstable electron gas, noting periodic time dependence of population
23 p3319 A72-43406
- Longitudinal dielectric tensor for an electron gas in a uniform magnetic field.
23 p3321 A72-43808
- Calculation of transport coefficients of a non-Lorentzian plasma
23 p3321 A72-43821
- Equilibrium energy spectrum for the galactic cosmic electrons.
23 p3328 A72-43831
- Degenerate electron gas self energy approximation by dielectric function, calculating quasi-particle and plasmon properties
24 p3428 A72-44797
- Superhigh-frequency heating of a plasma and longitudinal electron heat conductivity in a magnetic field
24 p3429 A72-45492
- ### ELECTRON GUNS
- High perveance electron guns with control grids and low voltage beam modulation, considering design, operation, structural and control characteristics
02 p0189 A72-11562
- Periodic magnetic field effects at gun cathode on electron beam focusing stability under nonoptimal conditions
02 p0190 A72-11572
- Electron paths and spread velocities in helical beams of adiabatic M-type electron gun used in masers at cyclotron resonance
06 p0826 A72-18403
- Electrostatic field calculation for magnetron/injection/ electron gun with wedge shaped cathode
06 p0826 A72-18404
- Vacuum welding by electron beam bombardment, discussing electron gun arrangements with plane-radial, plane-linear and linear electron beams
08 p1176 A72-21049
- Low energy scanning electron beam gun with retarding field mode for microelectronic device evaluation
10 p1446 A72-23936
- Rectifier tube cathode as colloid thruster electron gun type neutralizer, discussing efficiency and accelerated life tests
11 p1711 A72-26228
- Fast electron gun with subnanosecond switching times and 100 mA peak beam current for delayed coincidence studies of atomic decays
13 p1933 A72-29761
- Electron trajectories and spread velocities in helical beams of adiabatic M-type electron gun used in masers at cyclotron resonance
17 p2562 A72-34854
- Beam-defocusing effect due to filament magnetic fields in electron guns of electron linear accelerators.
19 p2772 A72-37404
- A design method for the electron beams of TWT's.
19 p2775 A72-38610
- Triode electron gun design for narrow electron beam under highly convergent lens action, using field emission source
19 p2775 A72-38611
- Drift of amplification factor and its effects in a tri-electrode electron gun.
21 p3033 A72-40995
- Digital-computer analysis of electron guns for cathode-ray tubes by taking into account initial thermal velocities.
21 p3088 A72-41834
- Trajectory equations of laminar electron flow in exponential magnetic field, calculating electrode shapes of magnetron injection electron gun
21 p3088 A72-41835
- Pulsed atmospheric-pressure carbon-dioxide laser initiated by a cold-cathode glow-discharge electron gun.
22 p3186 A72-42753
- The velocity distribution of electrons in beams formed by high-perveance three-electrode guns
23 p3319 A72-43402
- ### ELECTRON IMPACT
- High resolution RF linear mass spectrometer for separation of ions formed by electron impact on organic molecules
01 p0064 A72-10043
- Electron scattering off atoms, diatomic and polyatomic molecules in impact spectroscopy, applying simple group theory
02 p0262 A72-11913
- Atomic oxygen coupled electron excitation and ionization by electron-atom and atom-atom collisions in nonequilibrium relaxation zone behind shock wave
02 p0207 A72-12896
- Electron impact broadening of ionized Be and Ba lines in electric shock tube plasma, measuring electron density and temperatures
03 p0393 A72-13020
- Vibrational population of molecular nitrogen electronic states in normal auroras, examining electron impact and cascade contributions
03 p0349 A72-13524
- Quantum mechanical calculations of autoionization structure in ionization of Ba positive ions by electron impact
03 p0391 A72-13746
- Electron impact Stark broadening of ionized chlorine lines in pulsed arc plasma using laser interferometric and spectroscopic measurements
03 p0396 A72-13748
- Water vapor laser pumping by upper lasing level excitation through direct electron impact, explaining mechanism by model
04 p0529 A72-14587
- Dissociative excitation of CO and metastable fragments by electron impact on carbon dioxide, investigating cross sections
06 p0803 A72-17447
- Molecular nitrogen photoelectron impact excitation of Herman-Kaplan upper electronic state, considering cascade contribution to low lying states in electron auroras and dayglow
06 p0806 A72-17647
- Adiabatic-nuclei theory application to diatomic molecules excitation by electron impact, approximating fixed nuclei phase shifts dependence on internuclear separation
06 p0852 A72-17826
- Excitation and ionization cross sections and rate coefficients of hydrogen-like ions by electron and proton impact in Bethe-Born approximation
06 p0852 A72-18052
- Scattering cross section for excited oxygen atoms production by electron impact dissociation of molecular oxygen
07 p1037 A72-18964
- Electron impact induced fragmentations of o-, m- and p-hydroxyalkylphenones and trimethylsilyl/TMS/ ether derivatives, using high resolution mass spectrometry, metastable defocusing and deuterium labeling
07 p0936 A72-19499
- Electron impact induced fragmentation of alkyl-N-/1-phenylethyl/-carbamates of primary, secondary and tertiary alcohols, using deuterium labeling and high resolution mass spectrometry
07 p0936 A72-19500
- Electron impact cross section and energy deposition in molecular hydrogen, using generalized oscillator strength in Born-Bethe approximation
07 p1038 A72-20567
- Differential and integral scattering cross sections for helium excitation by electron impact from ground state to 2/super 1/S state
07 p1038 A72-20679
- Vacuum UV excitation cross sections measurement by electron impact on nitric oxide, tabulating threshold energies and transition probabilities
09 p1357 A72-22857
- Electron impact excitation of nitric oxide in vacuum UV, measuring absolute cross sections for emission features
10 p1515 A72-24341
- Differential and total ionization cross sections of multielectron atoms by electron and proton impact
10 p1515 A72-24602
- Merging beams study of positive ion ionization by electron impact for atomic He, N and O
11 p1692 A72-26658
- Boltzmann distribution of nitrogen ions according to rotational energy levels in nitrogen ionization by slow electrons impact
12 p1847 A72-27050
- Electron impact excitation spectrum of molecular oxygen, investigating angular behavior of differential scattering cross sections and energy dissipation
12 p1848 A72-27851
- Electron impact induced aurone epoxides fragmentation, discussing ion formation, intermediates, thermal rearrangement and mass spectra
13 p1913 A72-29775
- Absolute cross sections for Werner band system excitation of molecular hydrogen by electron impact, discussing relative spectral response calibration
13 p2009 A72-30065
- Predrawn airflow enhancement project, discussing magnetically conjugate photoelectron impact excitation observation and geophysical interpretation
14 p2098 A72-30147
- Incoherent scatter and filter photometer search for 6300 A predrawn enhancement by magnetically conjugate photoelectron impact excitation, comparing with ionospheric electron density
14 p2098 A72-30148
- Atomic hydrogen collisional and radiative transition rates, computing excitation and ionization cross sections
14 p2133 A72-30564
- Hydrogen negative ion electron detachment collision process cross section calculation using Coulomb trajectory impact-parameter method
14 p2135 A72-30884
- Metastable /2S/ atoms production by electron impact induced dissociative excitation of molecular deuterium, measuring total cross section via Lyman alpha flux
15 p2282 A72-32645
- Eikonal distorted wave analysis of inelastic electron-atom collisions at intermediate energies application to electron impact induced atomic hydrogen 2s and 2p states excitation
15 p2282 A72-32646
- Electron impact low energy cross sections for transitions between highly excited states, obtaining upper bound via quantal impact parameter theory
15 p2315 A72-32715
- High energy resolution spectrometric measurement of relative emission cross section for electron impact excited molecular nitrogen second positive system bands
16 p2428 A72-32922
- Dissociative excitation of vacuum ultraviolet emission features by electron impact on molecular gases. III- CO2.
17 p2585 A72-34734
- Vibrational excitation in N2 by electron impact in the 15-35-eV region.
19 p2837 A72-37546
- Linear momentum transfer effects in molecular dissociation produced by electron impact.
21 p3087 A72-40557
- Cross sections for the excitation of Ar II laser lines in electron-ion collisions.
21 p3063 A72-40725
- Electron impact effects on Ba I, Ba II and Sr I selected spectral line Doppler widths calculated for laser-generated plasmas for chemical release simulation
21 p3092 A72-40821
- Energy and angular distributions of secondary electrons resulting from ionizing collisions of electrons with helium and krypton.
21 p3088 A72-41493
- Interpolation formulae for the electron impact excitation of ions in the H-, He-, Li-, and Ne-sequences.
22 p3224 A72-42379
- Electron deposition in water vapor, with atmospheric applications.
22 p3171 A72-42420
- Electron impact excitation cross sections and energy degradation in CO.
22 p3172 A72-42422
- Kinetics of impact-radiative ionization and recombination
23 p3318 A72-43296
- Electron impact ionization of ions trapped in a hollow electron beam.
23 p3316 A72-44343
- Excitation of vacuum ultraviolet radiation by electron impact on carbon monoxide - Some unresolved questions near threshold.
24 p3379 A72-45313
- Cross section parameters for electron impact excitation, noting mathematical models for aeronautical users
24 p3400 A72-45591

Boltzmann distribution of nitrogen ions according to rotational energy levels in nitrogen ionization by slow electrons impact

24 p3427 A72-45703

ELECTRON INTENSITY U ELECTRON FLUX DENSITY **ELECTRON INTERACTIONS** U ELECTRON SCATTERING **ELECTRON IONIZATION** U IONIZATION **ELECTRON IRRADIATION**

Thermoluminescent phosphorus films irradiation by electrons with energies up to 15 keV in vacuum chamber

01 p0114 A72-10372

Fused silica optical transmittance at elevated temperatures during high energy electron bombardment, noting optical absorption at short wavelengths

01 p0103 A72-11357

Rocket measurement of highly collimated short duration bursts of auroral electrons, comparing with existing auroral models

03 p0349 A72-13515

Low energy electron beam irradiation of aluminum-silicon nitride-silicon structures for elimination of bias polarization effects on I-V characteristics

03 p0402 A72-13865

Li-containing solar cell damage and recovery characteristics measurement under 1-MeV electron irradiation, deriving diffusion-length damage coefficient

03 p0312 A72-14092

Isothermal annealing measurements of zero-phonon line luminescence at 0.97 eV in electron irradiated Si, obtaining activation energy

04 p0560 A72-14546

Electron irradiation effects on MOS structures at vlf, considering inversion layer cut-off frequency and surface state density

06 p0865 A72-17610

Vacancy supersaturation effect on enhanced precipitation by high flux electron irradiation in stainless steel

07 p1033 A72-20410

Artificial magnetosphere interaction with 8 keV electrons in hydrogen plasma beam simulating solar wind, noting penetration caused by boundary instability

08 p1156 A72-20823

German monograph on Frenkel defect structures in thin gold wire at high electron irradiation dose, using electrical resistance measurements

09 p1354 A72-22325

High dose rate electron beam irradiation using telescoping drift tube for flash X ray machine

10 p1509 A72-23935

Laboratory irradiation tests with van de Graaff generator for simulation of spacecraft components radiation damage due to high energy space protons and electrons

12 p1863 A72-27552

Heat treatment and electron irradiation tests for spatial reliability of CdS and CdTe thin film solar cells, noting photovoltaic properties

12 p1756 A72-28019

Electron irradiation effects on Li doped silicon solar cells, noting changes in donor concentration and defects formation

12 p1757 A72-28022

Li dopant radiation damage inhibiting effect on electron irradiated n-type silicon, discussing EPR and photoconductivity experimental results

12 p1856 A72-28023

Solar cells testing and array performance evaluation for communication satellites at Comsat laboratories, noting electron irradiation and proton damage studies

12 p1759 A72-28044

Monoenergetic electrons and low energy protons radiation damage effect on Si solar cell electrical and optical properties

12 p1759 A72-28046

Electron irradiation of Li doped Ge at low temperatures, measuring Hall effect and minority carriers diffusion length

12 p1857 A72-28055

Phonon scattering and induced energy levels in electron irradiated Sb doped Ge in n to p-type conversion region, measuring thermal conductivity and Hall effect

12 p1857 A72-28057

Li defect interactions in electron irradiated n-type single crystal Si from electron paramagnetic resonance measurements

12 p1858 A72-28063

Introduction rate and annealing of defects produced in Li-diffused float zone n-type Si by 30 MeV electrons and fission neutrons

12 p1858 A72-28064

Electron irradiation of n-type Si or Te doped GaAs, determining carrier removal rate, mobility changes and annealing characteristics

12 p1858 A72-28067

Annealing behavior of electrical properties and photoluminescence spectra in electron irradiated n-type GaAs semiconductors

12 p1859 A72-28068

IR absorption bands in mechanically and chemically polished GaAs single crystals irradiated with varying neutron and electron doses

12 p1859 A72-28069

Electron radiation damage and edge emission of cadmium telluride, presenting cathodoluminescence spectra

12 p1859 A72-28071

Te single crystal electrical resistivity and Hall coefficient effects of electron irradiation, suggesting point defects and dislocations interaction

12 p1859 A72-28073

Diamond powder lattice parameter changes during fast electron irradiation at various temperatures, discussing crystal defect stability and neutron irradiation comparison

13 p1983 A72-28760

Radiation effects measurement on neutron, proton and electron irradiated Li-drifted Si detectors by IR response technique, comparing characteristics with photovoltage effect

15 p2234 A72-31538

Radiation damage effects in Li compensated Si nuclear particle detectors induced by irradiation with electrons, protons and fast neutrons

15 p2291 A72-31539

Transient 10 MeV electron radiation effects on RF power and recovery time of GaAs Schottky barrier IMPATT diodes

16 p2370 A72-33766

Auroral electron acceleration by longitudinal electric field due to protons defreezing above ionosphere

17 p2550 A72-35852

Study of point defects produced in aluminum by tempering and irradiation with electrons

18 p2702 A72-36705

Properties of 1 MeV electron-irradiated defect centers in p-type silicon.

19 p2844 A72-37687

One MeV electron irradiation of new technology silicon solar cells.

19 p2754 A72-37777

Electron abundance equilibrium as factor in biological effectiveness of proton beam irradiation of animals

21 p2998 A72-40450

Influence of irradiation by 1.2-MeV electrons on the electrophysical properties of p-Si single crystals grown in a hydrogen atmosphere

21 p3098 A72-41686

Development of phosphorescence during ruby irradiation

23 p3323 A72-43412

ELECTRON MASS

Temperature and charge carrier density dependence of conduction electron optical effective mass in semiconductor compounds

13 p2021 A72-28788

Time constancy of physical constants in expanding universe, discussing light speed, Planck constant and electron and proton mass in context of Dirac hypothesis

16 p2425 A72-33517

Solid state physics experiment for conduction electrons effective mass determination in ultrapure n-type InSb by means of magnetophonon effect

21 p3096 A72-40203

ELECTRON MICROSCOPES

Tungsten carbide dislocation structures analysis by transmission electron microscopy, deriving Burger vectors from energy considerations and electron micrographs contrast

03 p0370 A72-12995

Defective IC device glass surface passivation effects on scanning electron microscope analysis

03 p0365 A72-14287

Voltage contrast mode scanning electron microscopy application to defect and failure analysis of semiconductor memories

03 p0336 A72-14288

Zener diode surface and bulk breakdown mechanisms by scanning electron microscopy, discussing microplasma noise

03 p0336 A72-14289

Selected microarea electron diffraction technique in high voltage electron microscopy, discussing applications in crystallography and metallurgy

04 p0523 A72-15490

Electrochemical thinning of metal disks for electron microscopic thin foils preparation

04 p0527 A72-15492

Electron microscope examination of freeze-etched air-filled lung alveoli extracellular lining layer, discussing sample preparation techniques

05 p0623 A72-16787

Electron microscopy for structure study of anodic aluminum oxides prepared by various methods, comparing electrograms of oxides after heating, boiling and filling with water

05 p0624 A72-17054

CdTe condensed films hexagonal modification and twinning boundaries birefringence reflection, using electron microscope and diffraction analysis

07 p1047 A72-18856

Scanning electron microscope for metal matrix composite materials structure examination, emphasizing matrix behavior, filament under load and interface

07 p1011 A72-19485

Nonconducting samples preparation for scanning electron microscope, using carbon as coating material

07 p0992 A72-20578

Facility for electron microscopy of specimens in controlled environments, observing lattice structure in wet catalase crystals

07 p0993 A72-20586

Limiting resolution of reconstructed image of focused hologram in electron microscopes as function of aberration and spatial coherence

08 p1166 A72-21380

Morphology and physicomechanical properties of carbonized polyacrylonitrile fibers by scanning electron microscopy, discussing macro and microdefects effects on strength characteristics

08 p1195 A72-21762

Electron microscopic investigation of niobium-oxygen alloys with Zr and Hf additions, measuring oxygen solubility

08 p1187 A72-21787

Electron microscopy application to dynamic wear studies of Ni on Ni surface and subsurface topography and microstructure in nitrogen atmosphere

08 p1179 A72-21943

Routine method for ultrathin carbon support film production for electron microscopy, noting mechanical stability and strength

08 p1172 A72-22020

Transmission electron microscope investigation of Al-Mg-Si alloy precipitation, showing Guinier-Preston zone visibility due to matrix elastic strain introduction

09 p1328 A72-22983

Photoemission electron microscopy application to refractory metals and nonmetallic materials, discussing image formation and contrast enhancement problems

10 p1493 A72-23823

Graphite morphology in metallic materials from scanning electron micrographs, discussing sulfur contents effect in tempered cast iron

10 p1500 A72-23825

Electron microscope interfaced computer for generating, registering and fabricating microelectronic device and circuit patterns

10 p1459 A72-23955

Profiling technique with scanning electron microscope to obtain depth information on single small specimen micrograph

10 p1481 A72-24240

Transmission electron microscope examination of deformation microstructures adjacent to fatigue cracks in Al alloys

10 p1497 A72-24823

Oxygen adsorption effects on Mo orientation contrasts and emission image under electron microscope

10 p1513 A72-24875

Dark field electron microscopy with small annular zone of objective lens to reduce chromatic aberration effects on resolution

11 p1633 A72-26322

Angular distribution of electrons at output of specimen observed by electron microscope, examining resolution problem for thin objects

11 p1635 A72-26483

Fractographic study of stress corrosion fractures of low carbon steels with electron microscope

11 p1666 A72-26924

Electron microscopy and structure of materials - Conference, University of California, Berkeley, September 1971

11 p1666 A72-26926

Transmission and scanning electron microscope observations of Nb-Hf alloys fracture morphology, noting precipitate free zone

11 p1667 A72-26934

Compression creep in ordered binary and ternary ordered bcc Ni alloys investigated by transmission electron microscopy

11 p1667 A72-26937

High voltage electron microscope applications to materials reactions in gaseous environments, exemplifying by stress corrosion morphology in stainless steel, Al-Zn-Mg and Ti-Al

11 p1668 A72-26945

Lunar and terrestrial pyroxenes phase structure electron microscopic investigation, using ion-thinned samples

11 p1725 A72-26952

Electron microscope study of commercial Ni superalloys, discussing intermetallic compound and carbide precipitation hardening

12 p1827 A72-27137

In situ measurement of objective lens data for high resolution electron microscope, using Bragg reflex images of crystallites with known orientation

12 p1807 A72-27528

Electron microscope study of hyperoxia-induced pathogenetic ultrastructural changes in rat lung

12 p1761 A72-27531

Primary recrystallization in TD-nickel bars on sublight optical level identified by transmission electron microscopy examination of deformation and annealing substructures 14 p2119 A72-30601

Work functions of dilute W alloys from vacuum emission vehicle and thermionic microscope measurements, noting additives effect 14 p2120 A72-30613

Si phase identification in super alpha Ti alloys, using electron transmission microscopy and diffraction analyses 14 p2120 A72-30616

Solid surface inspection by X ray diffraction, electron microscopy and chemical techniques 14 p2131 A72-30693

Electron microscope study of precipitated fines of austenitic steel containing V and N, noting heat treatment effect on fcc crystal structure 15 p2254 A72-31523

Ferroelectric nature of superficial layer on barium titanate crystals from scanning electron microscope and optical observations 15 p2291 A72-31681

As-quenched and aged form of omega phase in Ti-Nb alloys investigated by electron microscopy and X ray diffraction 16 p2410 A72-33818

Electron microscopy at 3 million volts 17 p2535 A72-34199

Experiments on the phase contrast transfer functions of a superconducting lens 17 p2594 A72-34284

Electron-microscopic investigation of the development of a cellular structure in molybdenum during hydroextrusion 17 p2569 A72-35524

Fractography of fiber reinforced metal composites. 17 p2560 A72-35654

A dynamical theory for the contrast of perfect and imperfect crystals in the scanning electron microscope using backscattered electrons. 18 p2692 A72-36749

Freeze etching techniques in electron microscopic investigations of biological cells molecular structure 18 p2653 A72-36829

Quantitative microstructural measurements by room temperature photoemission electron microscopy, discussing relief contrast, edge effect, resolution and information depth 18 p2719 A72-36831

Physical parameters and structure of microwave power transistors, noting scanning electron microscope analysis of fine structure 18 p2671 A72-37144

Electron microscope double contrast images to identify Burgers vectors of close packed metal crystal dislocations 19 p2846 A72-38590

A versatile ultrahigh vacuum scanning electron microscope. 21 p3051 A72-40217

A novel specimen stage permitting high-resolution electron microscopy at low temperatures. 21 p3051 A72-40218

Microscopic and electron-microscopic investigation of the catalysis of ammonium perchlorate combustion 22 p3216 A72-43186

Scanning electron microscope stereophotographic picture synthesis from sequential holographic recording of three dimensional objects 23 p3290 A72-43904

The direct study of crack formation in metals in a high-voltage electron microscope 24 p3401 A72-44717

Review and forecast of electron microscope studies of membrane systems in terms of fundamental problems of biomedical research and molecular biology 24 p3371 A72-44869

Application of a field-emission microscope to the investigation of the work function of tungsten coated with a thin layer of silicon oxide and with tantalum 24 p3432 A72-44891

Field-emission microscopy of tungsten coated with a silicon oxide film 24 p3432 A72-44892

ELECTRON MICROSCOPY

U ELECTRON MICROSCOPES

ELECTRON MOBILITY

Electron motion equations for threshold input signal of M type amplifiers with secondary emission cathode in interaction space 02 p0190 A72-11571

Electron and ion drift rate effect on floating double probe characteristics in Maxwellian plasmas 02 p0266 A72-12768

Hf electric field influence on electron drift instability and slow ion-acoustic waves for inhomogeneous magnetized plasma stabilization 04 p0555 A72-14617

Plasma shock wave oscillation profile dependence on ion and electron friction and viscosity 04 p0555 A72-14620

Nonlinear nonlaminar 3D electron motion calculation through output cavity of klystron amplifier by Green function 04 p0497 A72-14697

Electron drift speed and multiplication rate in pulsed Ar positive column in axial electric field 04 p0553 A72-15669

Quantum mechanical electron motion problem in binary alloy crystal lattice, discussing Bloch approximation, energy spectra, and third element admixture conductivity effects 07 p1049 A72-20150

Transport theory Boltzmann equation and Monte Carlo methods applied to semiconductor negative differential mobility calculation 10 p1526 A72-24398

Travel time effects on electron motion in HF electromagnetic fields, reviewing phase focusing and achromatic electron lens development 10 p1513 A72-24976

Electron energy, mobility and bremsstrahlung in weakly ionized nonisothermal plasmas, using Kogan approximation 11 p1698 A72-26647

Microwave time of flight method for measuring electron drift velocity in GaAs semiconductors 12 p1855 A72-27667

Room temperature time of flight electron and hole mobility and trapping time measurements in zinc selenides as function of electric field 12 p1855 A72-27835

LF oscillations and electron drift in frozen plasma under strong electromagnetic radiation, deriving formulas for coupled Alfvén and spiral waves 13 p2035 A72-28593

Gunn diode active region thickness, free electron mobility/concentration, structure and contacts, including treatment of GaAs 13 p1934 A72-30036

Spread F association with ionospheric tilts due to total electron content drift, using incoherent scatter radar 15 p2230 A72-32261

Radiative transfer equation application to ionospheric photoelectrons transport, predicting photoelectrons angular distribution and escape flux 16 p2444 A72-32963

Charge carrier motion in semiconductor with electron interactions, considering heating in presence of negligible electric field 16 p2441 A72-33278

Free electrons-laser interaction induced electron forward drift and dc current generation, deriving drift velocity by nonrelativistic classical and quantum mechanical theories 16 p2402 A72-33397

Normal and hypoxic myocardium mitochondrial metabolism process, studying electron transport system 17 p2501 A72-34978

Electron cyclotron drift instability linear theory application to controlled fusion and collisionless shocks, proving anomalous resistance to current flow normal to magnetic field 17 p2592 A72-35624

Acceleration stress tolerance dependence on electron or ion transport across cell surface activation energy barrier, studying rat survival times 18 p2650 A72-36448

Studies of the electron transport chain of extremely halophilic bacteria. VII - Solubilization properties of menadiene reductase. 19 p2755 A72-37649

On the drift velocity of electrons in a gas. 22 p3212 A72-42996

LF oscillations and electron drift in frozen plasma under strong electromagnetic radiation, deriving formulas for coupled Alfvén and spiral waves 24 p3440 A72-45093

ELECTRON MULTIPLIERS

U PHOTOMULTIPLIER TUBES

ELECTRON OPTICS

Frequency contrast characteristics derivation method with devices for determining transfer functions of objectives and film, using electron-optical bench 02 p0229 A72-12171

High resolution electrons image intensifier for particle spectrographs, using channel plate, scintillator and fiber optics 04 p0524 A72-15536

Charged particle motion equations for fifth order spherical aberration of quadrupole-octupole lens with arbitrary electrode and pole shapes 05 p0638 A72-16989

Hybrid computer aided design of thick electrostatic electron lenses by Laplace equation solution in terms of cylindrical harmonics, applying to CRT 06 p0779 A72-17481

Electron tube present and future applications as oscillators, high power and hf amplifiers and optoelectronic converters 06 p0784 A72-17775

Three element einzel and asymmetric voltage lenses for electron optics, calculating focal lengths and spherical aberrations based on potential distribution inside equidiameter coaxial cylinders 07 p0992 A72-20585

Hybrid computer aided synthesis of thick electrostatic electron lenses by Laplace equation solution in terms of cylindrical harmonics with gradient used in trajectory integration 10 p1509 A72-23940

Third order aberration coefficients of electron trajectories for two tube electrostatic lenses 10 p1510 A72-23941

Electron image projection system using converter tube technique for microcircuit lithography, discussing performance tests and design changes 10 p1447 A72-23957

Rotationally symmetrical electromagnetic lenses of electron mirror and cathode lens type 10 p1513 A72-24977

Submillimeter plane waves formation by quasi-optical line and diverging lens with phase front adjustment 11 p1598 A72-26719

Electrostatic field and electron trajectories calculation for focusing optoelectronic systems formed by interacting electrodes positioned on conducting surface 13 p2004 A72-29070

Electron-optical parameters effect on GaP/Cs/dynode photomultipliers time response characteristics, describing computer simulation and pulse response measurement techniques 15 p2234 A72-31532

Ceramic envelope electron multiplier design with hemispherically shaped dynodes, discussing electron optics, photosensitivity and applications 15 p2234 A72-31533

Electron-optical methods of investigating inhomogeneities in rarefied gases. 17 p2552 A72-34515

The effect of atmospheric turbulence on the error of an optoelectronic angle sensor. 17 p2554 A72-34941

Microwave and optoelectronic devices performance and component reliability, considering varactors, p-i-n, avalanche and Gunn diodes, ICs, FETs, light emitters and liquid crystals 18 p2720 A72-37137

Reliability of semiconductor optoelectronic components - Analysis of the long-term behavior 18 p2670 A72-37138

An arrangement for studying the time characteristics of injection lasers 21 p3064 A72-41738

Electric field distribution and strength and electron trajectories computations in designing electron optical display systems, using rectangular networks 23 p3291 A72-44312

ELECTRON ORBITALS

Integrals for atomic wave functions of Slater orbitals, obviating numerical snags by Euler transformation 02 p0262 A72-11980

Lyman alpha radiation emission cross sections due to H/2p and H/2s formation in protons and hydrogen atoms collisions with hydrogen molecules 07 p1038 A72-20678

Inner shell ionized atoms, discussing orbital electron rearrangement processes based on shakeoff events and radiative Auger transition 09 p1356 A72-22834

Multiconfigurational interactions in atoms with incomplete electron shells, identifying K-alpha satellite emission lines 09 p1357 A72-22837

Electronic configuration effect on wetting characteristics of hard material mixed crystals, investigating transition metals carbides, nitrides and oxides 11 p1665 A72-26873

Orbiting electron magnetic susceptibility derivation from many band Hamiltonian using Bloch representation to avoid decoupling transformation ambiguity 15 p2282 A72-32547

Oxygen atom electron affinity calculation by symmetry-adapted pair correlation approximation, using pseudonatural orbitals (PSNO) technique 15 p2282 A72-32644

A simple, radially correlated ground state wavefunction for two electron atoms. 17 p2586 A72-35828

ELECTRON OSCILLATIONS

Higher order cyclotron harmonic resonance of electrons with electromagnetic wave propagation through collisionless magnetoplasma, deriving energy oscillation time period 01 p0105 A72-10023

Electrostatic oscillations of multivelocity electron streams in hot inhomogeneous plasma 07 p1046 A72-20502

Langmuir electron oscillation excitation by ion beam at velocity exceeding average electron thermal velocity in plasma formed by residual gas ionization 07 p1046 A72-20505

Effective transmission coefficient increase for Langmuir and electromagnetic waves passing through

- density barrier via perturbation transport by resonant electrons 08 p1216 A72-22090
- Higher harmonics intensities dependence on fundamental of electron oscillation in beam generated plasma 10 p1524 A72-24920
- Spectral intensity distribution of vibrational electron interaction with strong coupling during polymerization of monomer cyanine dye and dimer molecules 15 p2280 A72-31410
- Relativistic electron ring oscillations in circular waveguide with allowance for walls finite conductivity, noting radiative instability at subcritical frequencies 15 p2210 A72-32738
- Effective transmission coefficient increase for Langmuir and electromagnetic waves passing through density barrier via perturbation transport by resonant electrons 17 p2588 A72-34661
- The equilibrium and the pulsation frequency spectrum of an electron cloud of spherical and cylindrical symmetry 19 p2867 A72-38571
- ELECTRON PARAMAGNETIC RESONANCE**
- Impurity-related color centers and electron-hole traps in quartz by electron spin resonance and thermoluminescence observations 02 p0207 A72-11598
- Radical concentrations in gamma irradiated poly(ethylene 2,6-naphthalene dicarboxylate) by ESR spectrum analysis 10 p1433 A72-23847
- Li dopant radiation damage inhibiting effect on electron irradiated n-type silicon, discussing EPR and photoconductivity experimental results 12 p1856 A72-28023
- EPR for point defects produced in Si by fast neutron irradiation, emphasizing damage cluster model 12 p1858 A72-28060
- Electron paramagnetic resonance investigation of III-V compound semiconductor crystals, observing large magnetic moments, heteropolar chemical bonding and impurities 13 p2021 A72-28572
- EPR transitions of quadrupole interaction of cubic imperfections with ground-vibronic-state degeneracy /Jahn-Teller effect/ 16 p2431 A72-33725
- Electron paramagnetic resonance of radiation damage in a lunar rock. 17 p2609 A72-35098
- Ferromagnetic and paramagnetic resonance spectra of lunar material - Apollo 12. 18 p2724 A72-36276
- Classical nonlinear electronic relaxation oscillators as EPR and NMR signal detectors, reconstructing resonance lines from absorption induced oscillator waveform changes 18 p2662 A72-36993
- Electronic and nuclear magnetic resonances of the oxygen and hydrogen labile negative molecular ions. 20 p2956 A72-39189
- Electron spin resonance of gamma-irradiated poly(ethylene 2,6-naphthalene dicarboxylate). 20 p2898 A72-39400
- Electron paramagnetic resonance spectrum of vanadyl acetylacetonate dissolved in liquid crystal or isotropic solvent 21 p3013 A72-41177
- Resonant interaction of an electrostatic wave with electrons in a current sheet. 22 p3169 A72-42008
- Electron spin resonance of divalent Mn ion doped in thallous azide single crystals, investigating temperature effects on spin Hamiltonian parameters 22 p3152 A72-42716
- Laser magnetic resonance of the O₂ molecule using the 337-micron HCN laser. 22 p3209 A72-42896
- Investigation of the formation of local concentrations near the critical liquid-gas point by the electron paramagnetic resonance 23 p3356 A72-43326
- Electron paramagnetic resonance hyperfine spectral observation of double quantum transitions of Ti positive ions in strontium chloride single cubic crystal host 24 p3378 A72-45311
- Investigation of radiation paramagnetic defects in alkaline-silicate glass subjected to the action of high quasi-hydrostatic pressures - Structure of hole defects 24 p3417 A72-45421
- Critical-point anomalies in the electron-paramagnetic-resonance linewidth and in the zero-field relaxation time of antiferromagnets. 24 p3432 A72-45674
- ELECTRON PATHS**
- U ELECTRON TRAJECTORIES**
- ELECTRON PHONON INTERACTIONS**
- Dynamic equations for nonequilibrium stationary state superconductors with electron-phonon and electron-electron inelastic collisions 03 p0401 A72-13089
- Quasi-static measurement and electron phonon interpretation of specific heat of metals at low temperature 03 p0456 A72-13843
- Jahn-Teller Hamiltonian for triplet electron state coupling to phonon vibrations in cubic symmetry 03 p0404 A72-14264
- Radio signal electron-phonon detector design and experimental realization, considering requirements for minimum transduction and surface wave propagation loss 05 p0626 A72-16281
- Semiconductors theory for multivalley energy spectrum and multivalued equilibrium distribution of carriers during electron phonon interactions 07 p1048 A72-19641
- Electron phonon coupling in tight-binding approximation for phonon frequency renormalization and transition metal superconductivity coupling constant computation 09 p1368 A72-22555
- BCS theory for transition metals and alloys superconductivity, discussing electron phonon coupling, transition temperatures and Cooper pair fluctuations 09 p1368 A72-22556
- Electron phonon coupling and IR optical constants relationship to superconductivity in transition metals 09 p1369 A72-22566
- Transistor LF flicker background noise generation mechanism in terms of bulk effect due to temperature fluctuation or phonon electron interactions 09 p1286 A72-23107
- Transition series oxides metal-insulator phase transition based on electron phonon interaction model 11 p1701 A72-26024
- Thermal conduction anomalies and electron phonon interaction in thin metallic sheet at low temperatures 12 p1888 A72-27182
- Dynamic equations for superconductors with electron-phonon and electron-electron inelastic collisions, investigating nonequilibrium stationary states 13 p2022 A72-29438
- Reflectivity of metals at high temperatures based on Drude theory and electron-phonon scattering, detailing temperature dependence and optical constants 14 p2129 A72-30183
- Phononless lines shift and broadening and electron phonon interaction in lanthanum trifluoride-Nd crystal, obtaining temperature dependence of non-radiative transition probability 14 p2142 A72-30359
- Oscillatory current characteristics of Stark ladder electron with weak LO phonon coupling in solids 15 p2293 A72-32218
- Emitted phonon spectrum effects on detected signal response in superconducting Sn diodes, noting deviation from linearity 15 p2209 A72-32541
- In-Ti alloys electron phonon interaction and superconductivity electron tunneling examined by sum rule and mass defect theory 15 p2295 A72-32543
- Conduction electron phonon scattering effect on electrical resistance of metallic contacts during pressure welding 16 p2370 A72-33952
- Anisotropy and strong-coupling effects on the critical-magnetic-field curve of elemental superconductors. 18 p2719 A72-36710
- Transport coefficient of multi-layer film of semiconductors. 19 p2843 A72-37401
- Transport phenomena in an electron-phonon system in strong magnetic fields at low temperatures 20 p2953 A72-39310
- Extension of Eliashberg's theory to type-II superconductors. 21 p3096 A72-40574
- Phenomenological models of the electron-phonon interaction and the superconductivity criterion of metals 21 p3098 A72-41688
- Influence of the properties of the materials on junction tunnelling characteristics. 22 p3214 A72-42454
- Dependence of changes in the electronic dislocation-braking force during superconducting transition on the stresses, temperature, and strain rate 23 p3312 A72-43315
- Semiconductors theory for multivalley energy spectrum and multivalued equilibrium distribution of carriers during electron phonon interactions 24 p3431 A72-44572
- ELECTRON PHOTON CASCADES**
- Energy transfer to electron-photon component during hadron interaction in lead, using ionization calorimeter 06 p0869 A72-17268
- Cosmic radiation high energy hadron component relation to extensive electron-photon showers, comparing sampling events based on multicore structure and total energy 06 p0870 A72-17282
- High energy muon energy and angular distributions from electron-photon cascades, using emulsion chamber with X ray films 06 p0871 A72-17286
- Muon generated cascade showers in iron, using ionization calorimeter and hodoscopic detectors 06 p0871 A72-17290
- Transient effect in electron-photon shower on readings of ionization chamber and scintillation counter 06 p0871 A72-17291
- Extensive atmospheric showers and high energy transfer from interacting nucleons to electron photon cascades 07 p1060 A72-19867
- Electron photon cascade energy measurement by photometering blackened spots on X ray films 07 p0988 A72-19870
- Study of high energy /25-10,000 GeV/ interactions with a multiplate cloud chamber using Monte Carlo simulations for energy calibration. 17 p2585 A72-34922
- Electron showers of high primary energy in lead. 17 p2585 A72-35472
- Inverse bremsstrahlung caused fast cascade of electrons with Boltzmann energy distribution to explain laser induced gas breakdown via plasma heating 20 p2934 A72-39645
- Energy spectrum and angular distribution of cascades with an energy greater than 0.3 TeV, formed by cosmic muons 23 p3331 A72-44427
- Fluctuations of the spatial distribution of the number of particles in showers generated by muons in heavy material 23 p3331 A72-44431
- Isothermal atmosphere inhomogeneities effects on electromagnetic cascade electrons integral energy spatial distribution 23 p3331 A72-44433
- ELECTRON PLASMA**
- Electron cyclotron harmonics emission as function of electron plasma frequency in He reflex discharge, measuring electron densities 01 p0105 A72-10026
- Plasma waves maximum radiation temperatures near fundamental and second harmonic electron frequency 02 p0265 A72-12308
- Strong circularly polarized electromagnetic wave scattering by plasma electron as function of amplitude and magnetic field with radiation reaction 03 p0321 A72-13077
- Bulk recombination effects on nonstationary pinching and collapse of electron-hole plasma by magnetic field in crystal 03 p0401 A72-13581
- Collision integral for classical electron plasma, concerning Born-Bogoliubov-Green-Kirkwood-Yvon equations for long range interaction potential and motions of multiple particles 03 p0399 A72-14069
- Density waves propagation and amplification in p-InSb electron-hole plasmas, investigating dependence on frequency and injection level 04 p0561 A72-14851
- Whistler instability of electron plasmas with non-Maxwellian velocity distribution function 05 p0698 A72-17015
- Perturbation theory, saturation and relaxation effects in electron and ion plasma wave echoes 05 p0699 A72-17220
- Electrostatic waves perturbed distribution function behavior in presence of forced oscillations, considering Maxwellian ion and electron plasma waves excited by dipole 06 p0855 A72-17508
- Electron plasma wave echoes experimental investigation, discussing amplitude decay under plasma and random noise influence 06 p0858 A72-17538
- Langmuir wave-caused electron plasma distribution function deformation, discussing particle trapping effects 06 p0858 A72-17542
- Longitudinal electron plasma waves interaction with electron distribution, investigating energy transfer 06 p0858 A72-17543
- Electrostatic hf wave propagation in one dimensional collisionless plasma, describing electron trapping and oscillations and resonance-produced sidebands 06 p0858 A72-17544
- Statistical hf electron heating at oscillating plasma boundary with acceleration of double Langmuir layer 06 p0860 A72-17691
- Fast electron-cyclotron wave excitation with infinite phase velocity along magnetic field in nonequilibrium electron plasma 06 p0862 A72-18402
- External circuit coupling effects on dc anomalous resistivity in electron plasma oscillation 07 p1043 A72-19666

Velocity space instability in hot electron plasma created by adiabatic compression in pulsed magnetic mirror, observing radiation bursts below electron cyclotron frequency during compression [AD-740408] 08 p1213 A72-21257

Electron plasma fluctuations in semiconductor with nonparabolic conduction band under external electric and magnetic fields 08 p1218 A72-21877

Numerical solution of theta pinch in electron-hole plasma of Ge semiconductor under surface recombination as contactless method of current carrier injection 08 p1218 A72-22178

Quasi-elastic scattering differential cross section for nonpolarized IR radiation in electron plasma of semiconductors in strong elastic fields 09 p1366 A72-22210

Electrostatic longitudinal waves propagation and detection in isotropic collisionless hot electron plasma, calculating Landau dispersion curve and damping 09 p1359 A72-22794

Q factor over temperature range of microwave resonator coupled with drifting indium antimonide plasma 09 p1285 A72-22895

Electron plasma oscillations distribution upstream from earth bow shock, evaluating OGO-E plasma wave detector data 09 p1300 A72-23019

Star stellarator model for hot electron plasma production by steady electron beam injection in closed magnetic traps 09 p1363 A72-23219

Intensity dependent propagation characteristics of circularly polarized high power laser radiation in dense electron plasma, calculating energy losses 10 p1522 A72-24607

Variational and statistical methods for adiabatic electron plasma with self consistent field interaction in terms of Lagrange, Hamilton and Liouville formalization 12 p1850 A72-27185

Turbulent plasma electric field energy density spectrum from statistical mechanics investigation based on canonical formalism for electron plasma 12 p1851 A72-27387

Thermal electron relativistic streaming effects on electromagnetic instability in magnetoplasmas 12 p1851 A72-27389

Electron wave sideband frequencies and wave-trapped electron oscillations as cause of plasma instability 12 p1851 A72-27430

Radiation patterns of circular loop antenna in isotropic compressible plasma, discussing far fields for electromagnetic and electron plasma waves 12 p1790 A72-27491

Pulsed Si p-n junction mesoplasma dynamic I-V characteristics explained by mechanism based on hot carrier annihilation 12 p1853 A72-28113

Nonlinearity effect on electron plasma wave dispersion relation, using numerical simulation and theoretical analysis by perturbation expansion and Hamilton variational principle 13 p2011 A72-29121

Computerized calculation of wave dispersion curves for hot Maxwellian electron magnetoplasma, applying to upper hybrid and cyclotron frequencies 13 p2013 A72-29340

Stimulated Compton scattering of laser radiation by electron plasma, determining electrons diffusion coefficient and velocity distribution function 13 p1972 A72-29987

Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves 14 p2136 A72-30308

Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect 14 p2137 A72-30309

Electrostatic cyclotron harmonic waves propagation in inhomogeneous electron plasma slab, deriving RF electric field 14 p2138 A72-30397

Electromagnetic waves propagation in inhomogeneous moving cold electron plasma without external magnetic field and collisions, investigating dynamo-optical effects 14 p2086 A72-30790

Nonlinear interaction of resonant plasma oscillations with nonresonant wave pulse, using water bag model of electron plasma 14 p2140 A72-30936

One dimensional Maxwellian electron plasma simulation by electron bunches, describing Landau damping of wave initially excited in medium and nonlinear effects of trapping 15 p2284 A72-31678

Sounding rocket experiment on nonlinear interaction between two electron plasma waves and ion

acoustic wave in ionosphere to investigate artificial realization feasibility 15 p2231 A72-32333

Glow mode electron plasma source for space chamber, measuring electron density and temperature for comparison with back diffusion sources 15 p2286 A72-32339

Ion acoustic and guided electron plasma waves excitation by grid antenna produced LF signals in cylindrical plasma column 15 p2289 A72-32650

Plasma accumulation in electrostatic potential well produced by electron space charges, determining diocotron instability as function of electron plasma and gyrofrequency ratio 16 p2434 A72-32819

Difference scheme for initial value problem of one dimensional Vlasov equation for collisionless electron plasma with homogeneous ion background 16 p2434 A72-33006

Fast electron cyclotron wave excitation with infinite phase velocity along magnetic field in nonequilibrium electron plasma 17 p2588 A72-34853

Solution of the Boltzmann equation for a fully ionized plasma in an oscillatory electric field and a steady magnetic field. V - Explicit solution for a homogeneous plasma in a high-frequency electric field. 17 p2589 A72-35057

Kinetic equations with radiation effects. 17 p2590 A72-35155

Nonlinear collisional excitation of plasma waves. 17 p2591 A72-35372

Detection of solar-wind electron plasma frequency fluctuations in an oblique nonlinear magnetohydrodynamic wave. 17 p2602 A72-35610

Water bag model application to one dimensional inhomogeneous two-stream collisionless electron plasma stability computation, noting electrostatic modes 17 p2592 A72-35619

Sideband growth in nonlinear Landau wave-particle interaction. 19 p2838 A72-37327

Electron-plasma-wave shocks in a bounded plasma. 19 p2840 A72-37719

Plasma electron velocity distributions determined from the polarization of free-free bremsstrahlung. 19 p2841 A72-38439

A general method for integrating the Schroedinger equation with a singular right-hand side in a homogeneous and constant electromagnetic field 19 p2843 A72-38855

The self-consistent test-particle approach to relativistic kinetic theory. 20 p2955 A72-40013

Pinch effect in a germanium electron-hole plasma 21 p3096 A72-40414

Coupled fields in inhomogeneous warm plasmas with static pressure gradients. I. 22 p3210 A72-42313

Nuclear reactions in a degenerate electron-nuclear plasma 22 p3209 A72-42964

Electromagnetic disturbances within a degenerate electron plasma in a quantizing magnetic field 22 p3212 A72-43010

Kinetic instability bursts during heating of electron plasma in cylindrical resonator with standing electromagnetic waves 23 p3317 A72-43210

Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect 23 p3317 A72-43211

Frequency dependent antenna impedance characteristics in ionospheric plasma, discussing anisotropic and isotropic electron plasmas, loop antennas, resonance rectification and ion effects 23 p3319 A72-43512

Damping of finite-amplitude electron plasma waves in a collisionless plasma. 23 p3321 A72-44075

Field components of coupled electromagnetic and electron acoustic waves in warm stratified plasmas, using first order wave equations and Heading embedded form 23 p3322 A72-44319

ELECTRON PRECIPITATION

Synchrotron radiation from incoming auroral electrons based on Schwinger equation, accounting for hf backscatter sounder noise 01 p0060 A72-10839

Outer zone energetic electron precipitation, elf whistler and plasmopause location measurements by polar satellite OV-3-3 instruments 01 p0120 A72-10890

Precipitated electron energy latitude and time variations from auroral-height measurement during IQSY, using meridian scanning photometers 01 p0120 A72-10896

Auroral electron precipitation modulation dependence on energy explained by resonance at rebound frequency 02 p0222 A72-12598

Middy oval, cusp region and polar cap auroral electron precipitation at low magnetic activity, presenting intensity vs altitude profiles for nitrogen ion line emissions 03 p0350 A72-13531

Bremsstrahlung X rays from electron precipitation associated with discrete vlf emissions, recording wave-particle experiment near plasmopause with balloon-borne counters in Antarctica 03 p0413 A72-13536

Low energy electrons anisotropic flux impulsive precipitations in structured aurora explained by potential difference along geomagnetic field lines of force 03 p0350 A72-14272

Magnetic latitude effect on wave dispersion in drifts and random movements of ionization irregularities in E region, suggesting charged particle precipitation role 04 p0518 A72-14964

Magnetospheric current effects on geomagnetic field structure, noting electron and proton precipitation into auroral zone 05 p0657 A72-16275

X ray detection on Jupiter with actively collimated balloonborne scintillation counter, noting decametric emission due to electron precipitation 06 p0872 A72-17445

Vlf wave excitation during sudden storm commencement, causing magnetosphere trapped energetic electrons to diffuse and precipitate into lower ionosphere 06 p0803 A72-17451

Auroral zone vlf hiss and associated low energy electron precipitation in polar magnetosphere [AD-736327] 06 p0804 A72-17456

Sounding rocket observations of magnetic field aligned electron pitch angle distributions coincident with auroral precipitation band northern boundary 06 p0804 A72-17457

Auroral zone electron precipitation events before and at negative magnetic bays onset, presenting balloon recordings of bremsstrahlung X-rays intensity 06 p0808 A72-18092

Vlf auroral hiss comparison with low energy electron precipitation, using Ogo 4 data 07 p1058 A72-19149

Systematic increase in auroral electrons mean energy with total precipitated energy 07 p1058 A72-19151

Polar orbiting satellite ESRO-1A 1-13 keV electron measurements compared to bottomside ionosonde measurements for auroral particle precipitation and F region electron density 08 p1226 A72-21099

High energy electron precipitation events in auroral zone X rays, showing exponential daytime and flat nighttime energy spectra 08 p1226 A72-21110

Model calculation for electron production rates due to photoionization and particle precipitation below 100 km at midlatitude during solar minimum and maximum years 09 p1375 A72-22357

Nightglow evidence of precipitating energetic electrons in midlatitude nighttime D region based on intensity determination from satellite and rocket data 09 p1375 A72-22358

Rocket sounding of auroral zone F region low energy electron precipitation and excitation and ionization processes 09 p1298 A72-22585

Charged particles observations on 21 December 1968 by Explorer 40 and from ground, noting auroral light primary energy influx by precipitation band of electron intensities 09 p1299 A72-23005

Magnetospheric electrons precipitation into ionosphere due to conjugate conductivity asymmetry caused by wind induced ions vertical redistribution, using atmospheric model 10 p1530 A72-24791

Magnetosphere fast electron precipitation investigated by simulation experiments with model created by plasma stream interaction with dipole magnetic field 11 p1714 A72-26531

Electron precipitation in upper atmosphere at midlatitudes from positive ionized nitrogen molecules electrophotometric observation and night airglow and geomagnetic field measurements 12 p1802 A72-27302

Ionospheric irregularities-magnetospheric parameters relationship from satellite scintillation measurement, noting use as indirect electron precipitation indicator 12 p1803 A72-27772

Auroral particle precipitation /keV electrons and protons/ morphology from ESRO 1A particle spectrometer measurement, discussing particle populations in day and night magnetospheres 12 p1864 A72-27786

Magnetosheath electron precipitation effect on dayside auroral oval plasma density and conductivity, relating precipitation heat flux to solar wind energy density

13 p1950 A72-29381

Photoelectron precipitation induced dissociation of atmospheric nitrogen molecules during moderate solar activity

14 p2102 A72-30659

Quasi-periodical intensity pulsations in trapped and precipitating electrons in earth outer radiation belt

15 p2299 A72-31914

Long term A3 absorption associated with nuclear explosion caused artificial radiation belts, discussing electron precipitation role in D region ionization

15 p2299 A72-31933

Auroral electrojet polarization model, considering ionospheric Hall and Pedersen conductance maximum due to precipitation from electron plasma sheet inner edge

[AD-745672] 16 p2444 A72-32961

Thermospheric composition variations in south polar regions during magnetically quiet periods fromOGO-6 observations, considering atmospheric heating by electron precipitation cyclic variations

16 p2383 A72-32964

High latitude observation of precipitating electron spikes by polar orbiterOGO 4 satellite, noting population dependence on local trapping limit

17 p2601 A72-35591

Low energy auroral electron precipitation associated ELF noise band observation by polar-orbiting satellite INJUN 5

17 p2517 A72-35593

Pitch-angle diffusion of radiation belt electrons within the plasmasphere.

17 p2602 A72-35597

Precipitation dynamics and energy spectrum of auroral electrons in the midnight sector during a magnetospheric substorm

17 p2550 A72-35854

Airborne optical measurement comparison with satellite observation for auroral emissions and particle precipitation at noon, suggesting electron precipitation role

19 p2868 A72-38738

Local-time survey of plasma at low altitudes over the auroral zones.

19 p2792 A72-38739

Polar upper ionosphere morphology above E layer, discussing effects of winds, field aligned currents and electron precipitation

20 p2918 A72-39534

Properties of low energy particle impacts in the polar domain in the dawn and dayside hours.

20 p2964 A72-39541

High latitude particle precipitation and source regions in the magnetosphere.

20 p2964 A72-39542

Auroral electron and proton distribution in magnetosphere and precipitation pattern from satellite, rocket and ground based observations

20 p2920 A72-39976

Auroral space-time regularities relationship to magnetospheric variations, precipitating electron fluxes, magnetic tail formation and substorms

20 p2920 A72-39977

On the classification of high-latitude auroras.

20 p2920 A72-39979

Conjugate features of magnetospheric electron dynamics observed at balloon altitudes.

21 p3049 A72-41614

Occurrence of Pc 4, 5 micropulsation activity at the polar cusp.

22 p3171 A72-42411

Rocket measurements of electron influx during a major magnetic storm with type A aurora.

23 p3332 A72-44515

Quadruple conjugate pair observations of the sudden commencement absorption event on June 17, 1965.

23 p3286 A72-44526

ELECTRON PRESSURE

Spectral analyses of Mira-type variable stars near light maximum, discussing empirical curve of growth, Doppler velocity, damping constant and electron pressures

01 p0129 A72-10792

Charge carrier density, neutral gas density, electric potential and electron temperature profiles in cylindrical diffusion column, considering electron pressure

11 p1698 A72-26646

Electron pressure effect on lunar wake shape and size, calculating electric field created by charge separation

15 p2308 A72-31925

Mechanical equilibrium equation of nongray stellar matter, approximating electron pressure vs temperature in early stellar atmospheres

21 p3109 A72-41435

Molecular abundances and gas-to-electron pressure ratios as function of temperatures and pressures in solar composition gaseous mixture of late type stellar atmospheres

21 p3110 A72-41446

ELECTRON PROBES

Electron microprobe analysis of plagioclase points and pyroxene grains of Apollo 15415 anorthositic genesis rock

02 p0282 A72-12411

Electron microprobe analysis of Lunik 16 basalt fragments, noting similarity to Apollo 11 and 12 igneous rocks

09 p1379 A72-22252

Microscopic and electron microprobe analyses of silicate melt inclusions and glasses in lunar soil fragments from Lunik 16 core sample

09 p1379 A72-22255

Optical petrographic, electron microprobe and single crystal X ray diffraction analysis of basaltic and monomineralic soil fragments of Lunik 16 core sample from Sea of Fertility

09 p1379 A72-22257

Electron microprobe analyses of Lunik 16 mare basalt fragment G37 with high Al and low Mg content, discussing fragments G46 and G51

09 p1380 A72-22260

Electron microprobe analysis of chromian spinels from Apollo 14 rocks indicating crystallization from high aluminum low iron magma

12 p1865 A72-27113

Electron microprobe analysis of solute segregation near grain boundaries in Al-Zn-Mg alloy after quenching and aging heat treatment

13 p1973 A72-28652

Electron probe microanalysis of Mo-Pd system diffusion at 1000-1600 C, measuring chemical diffusion coefficient as function of temperature, concentration and activation energy

13 p1978 A72-29221

Low energy electron spectroscopy measurement of thin oxide layer growth on Al surface, noting oxidation uniformity dependence on residual gas water content

15 p2276 A72-31859

Spin effects on satellite-borne cylindrical probe electron density measurements, considering satellite wake and geomagnetic field effects

16 p2389 A72-32962

Three dimensional electron density fluctuations scattering spectra in Mach 16 spherical projectile turbulent wakes from fine wire electron collection probe measurements

[AIAA PAPER 72-673]

16 p2432 A72-34066

Amplitude and phase space potential oscillations measurements with hot electron probe in collisional Cs plasma compared with linear drift wave theory

21 p3093 A72-41376

ELECTRON RADIATION

NT BETA PARTICLES

NT ELECTRON BEAMS

Solar electrons and protons measurements in interplanetary space and in magnetotail, noting access to north polar cap

[AD-744404]

07 p1058 A72-19156

Electron wave attenuation technique for current transit determination through semiconducting films with various crystal structures

09 p1284 A72-22209

Proton and electron radiation effects on silicon solar cells electric and photovoltaic properties, determining damage coefficients via minority carriers diffusion length measurement

12 p1759 A72-28045

Interplanetary electrons quiet-time intensity increases, considering trans-earth-orbital modulating region due to solar wind transport of photospheric field lines

13 p2030 A72-29377

Solar relativistic electrons and particle events spectra during 1967-1969 from IMP-4 observations

13 p1033 A72-29746

Spiral galaxies radio sources spectral components, noting relativistic electrons radiation and luminosity-surface brightness diagram

14 p2148 A72-30203

Auroral electron spectrum space-time dynamics during magnetospheric substorms, using X ray bremsstrahlung balloon data

14 p2101 A72-30637

Simulated Nimbus orbital electron, proton and UV radiation effects on wide bandpass glass and narrow bandpass thin film interference filters and fused silicas

15 p2277 A72-32157

Relativistic electron ring oscillations in circular waveguide with allowance for walls finite conductivity, noting radiative instability at subcritical frequencies

15 p2210 A72-32738

Cosmic ray electron search and study, comparing near earth to interstellar spectrum

16 p2448 A72-33869

Solar stationary type 4 radio bursts caused by gyromagnetic radiation of bunched electrons

16 p2449 A72-33920

Electron processes in nonrelativistic electron streams against stationary ion background as wave packet envelope deformation in space and time

21 p3094 A72-41652

Radiation of electron bunches passing through a dielectric plate in a waveguide

21 p3036 A72-41842

Spiral galaxies radio sources spectral components, noting relativistic electrons radiation and luminosity-surface brightness diagram

23 p3333 A72-43232

Summary of latent effects in long term survivors of whole body irradiations in primates.

23 p3254 A72-43393

Radiation from a free electron interacting with a circularly polarized laser pulse.

23 p3296 A72-43875

ELECTRON RECOMBINATION

NT RADIATIVE RECOMBINATION

Generation-recombination model of large signal silicon transistor operating in IC microwatt range

02 p0188 A72-11521

Bulk recombination effects on nonstationary pinching and collapse of electron-hole plasma by magnetic field in crystal

03 p0401 A72-13581

Solar coronal total dielectronic recombination coefficient simple relationships for isoelectronic sequences of H, He, Ne, K-Ni and Li-F, Na-A and Cu-Kr

05 p0718 A72-16510

Strong electric field recombinational domains in semiconductors with mobile holes and electrons during band-band illumination or double injection

07 p1048 A72-19638

He ionization and excitation in optically thick solar prominences, considering recombination excitation for observed triplet-level populations at 5000-10,000 K electron temperature

08 p1231 A72-21123

Electron and hole recombination at deep impurity centers during nonequilibrium current carriers excitation by Nd-glass laser light in p- and n-type germanium

09 p1322 A72-22214

Reversible threshold switching in amorphous semiconductor alloys by carrier transport and recombinative electron injection

12 p1854 A72-27431

Disturbed ionospheric electron and ion kinetics, detailing dissociative recombination as regulating process for temporal evolution

14 p2102 A72-30654

Correlation measurements of LF current noise and frequency fluctuations in Gunn oscillators, emphasizing generation-recombination noise component

14 p2088 A72-30916

Electrical conductivity in mesosphere and upper stratosphere from rocket sounding by blunt probe technique, suggesting electron density profiles dependence on dissociative recombination variations

15 p2228 A72-31972

Possibility of the occurrence of alternating current in a circuit with a semiconductor sample exhibiting a recombinational instability

19 p2846 A72-38449

Strong electric field recombinational domains in semiconductors with mobile holes and electrons during band-band illumination or double injection

24 p3431 A72-44570

ELECTRON SCATTERING

Electron layer precession under magnetic field in background plasma, noting density effect on instability

01 p0107 A72-10144

Nonconservative radiative transfer in spherically symmetric system, calculating linearly polarized electron scattering atmosphere

01 p0102 A72-11127

Electrical conductivities dependence on assumed values of elastic collision cross sections of electrons with neutral and charged particles in low temperature plasma

01 p0110 A72-11205

Electron scattering off atoms, diatomic and polyatomic molecules in impact spectroscopy, applying simple group theory

02 p0262 A72-11913

Viscous friction effects on phonon-electron interactions and dislocation velocity by deformation measurement of metallic crystals under pulsating magnetic fields

02 p0243 A72-12169

Quasi-static surface waves at Maxwellian plasma boundary with diffuse electron scattering, considering plasma electromagnetic oscillations

02 p0266 A72-12577

Global morphology of integrated product with respect to D and E regions electron concentration height and collision frequency

03 p0345 A72-12981

Spectral distribution of radiation arising from nonlinear Thomson scattering of strong electromagnetic wave by ultrarelativistic electrons

03 p0390 A72-13017

Dynamic equations for nonequilibrium stationary state superconductors with electron-phonon and electron-electron inelastic collisions

03 p0401 A72-13089

Resonance electron spectrometry experiments on electron collisions involving vibrational excitation, deactivation and attachment in molecular oxygen

03 p0347 A72-13391

- Late twilight airglow vacuum UV spectra from sounding rocket observation, noting conjugate-point electron excitation role in O I emissions
03 p0350 A72-13525
- Low energy phase shifts for elastic scattering of electrons by Li and Na
03 p0391 A72-13745
- Rotational excitation of polyatomic molecule by electron collision attributed to polarization and electrostatic forces
04 p0552 A72-14852
- Bremsstrahlung emission by auroral electrons in upper atmosphere and penetration in lower atmosphere, comparing calculation with balloon measurement
04 p0566 A72-14879
- Electronic collision frequency relationship with radio frequency in F region, investigating height, diurnal and seasonal variations
04 p0516 A72-14933
- Rectangular pulse propagation through inhomogeneous medium as plasma diagnostics, investigating electron collisions effect on signal distortion
04 p0556 A72-14946
- Nonideality effects on Coulomb gas conductivity by finding conductivity due to electron scattering at atoms, solving kinetic equation of three component plasma model
05 p0694 A72-15850
- Electron concentration and collisions number fluctuations effect on D region profiles based on radio waves partial reflection data
05 p0656 A72-16244
- Electron lifetime in earth radiation belt due to resonant scattering with hiss vlf radiation
05 p0711 A72-17045
- Half wavelength antenna radiation admittance into warm lossy two layer plasma half space, using effects of slot width and electron collision frequency
06 p0781 A72-17348
- Longitudinal hf oscillations in homogeneous magnetoactive plasma by fast monoenergetic electron excitation
06 p0853 A72-17389
- Boltzmann kinetic equation with electron-electron collision coefficients for isothermal weakly ionized cesium-argon plasma, using nodal point method
06 p0860 A72-17695
- Conformal electron interactions in biopolymer and hypermolecular biological systems, discussing calcium ions effects, enzyme activity, muscle contractions and information theory
07 p0915 A72-18803
- Ion-electron collisions effect on ion cloud motion in magnetoactive plasma immersed in uniform external electric field
07 p1055 A72-18894
- State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction current-voltage characteristic fluctuation
07 p1047 A72-18919
- Cylindrical antenna radiation resistance and total radiated power in weakly ionized plasma, considering electron collisional effects
07 p0944 A72-19592
- Semiconductors cyclotron echo signals from dipole interactions of electrons with alternating magnetic fields, discussing frequency doubling and excitation mechanism
07 p1048 A72-19639
- Electrons and ionized impurities interaction in thin quantizing layers, discussing donor activation energy and kinetic characteristics
07 p1048 A72-19640
- Anomalous Hall effect of polarized electrons spin-orbit interactions in semiconductors, involving emf appearance in electric field and polarized light
07 p1048 A72-19642
- Mg ion excitation by electron collision in solar chromosphere studies, calculating scattering cross sections
07 p1081 A72-20234
- Differential and integral scattering cross sections for helium excitation by electron impact from ground state to 2/super 1/S state
07 p1038 A72-20679
- Electron scattering effects on response of cosmic ray particle telescopes from pulse height and counting rate measurements
08 p1167 A72-21510
- Quasi-particle decay rates by electron-electron scattering in superconductors, noting effect on states tunneling density
08 p1217 A72-21595
- Maximum superconducting transition temperature estimation, discussing optimum resonant frequency for attractive interaction, umklapp electron scattering and lattice instabilities
09 p1367 A72-22553
- Elastic singlet p wave phase shift calculation for electron scattering by H atom and He cation, using time dependent Hartree-Fock perturbation theory
09 p1355 A72-22786
- Electron reflection mechanism and gas adsorption effect at W /001/ surface in energy range 1-10 eV
09 p1370 A72-22804
- Weak extragalactic X ray sources radio identification, suggesting production by inverse Compton losses of electrons from radio galaxies
09 p1377 A72-22988
- Carbonized and ion beam thinned polyacrylonitrile copolymer fibers examination by low angle electron scattering electromicroscopy technique
09 p1339 A72-23190
- Electron beam and plasma nonlinear interactions, noting scattering zone, amplitude oscillation maximum, longitudinal velocity and relaxation patterns
10 p1517 A72-23760
- Radio recombination lines broadening in hydrogen by electron collisions, using Baranger impact theory
10 p1435 A72-24142
- Relativistic heavy ion in plasma, calculating energy loss based on electron scattering and momentum transfers
10 p1515 A72-24344
- Stellar evolution from precarbon-burning contraction to presupernova stage with and without neutrino production by electron neutrino interaction
10 p1545 A72-24825
- Strong pitch angle scattering of energetic electrons in presence of electrostatic waves due to ion cyclotron instability above midlatitude ionospheric trough region
11 p1714 A72-26398
- Quasi-projection operators for calculating electron resonances in multitarget scattering tested on He ion autoionization system
12 p1847 A72-27385
- Many electron pseudopotential method for electron-atom scattering, calculating singlet s wave and p wave phase shifts
12 p1848 A72-27429
- Strong circularly polarized electromagnetic wave scattering by plasma electron with radiation reaction, determining cross section as function of amplitude and magnetic field strength
13 p2015 A72-29427
- Dynamic equations for superconductors with electron-phonon and electron-electron inelastic collisions, investigating nonequilibrium stationary states
13 p2022 A72-29438
- Oblique radio wave propagation through horizontally stratified ionosphere, considering electron collisions effects, reflection behavior and coupling levels
13 p1923 A72-29657
- Electron-ion collision frequency and conductivity of non-Debye plasma formed in high pressure discharge from Ar, Kr and Xe tubes
13 p2018 A72-29891
- Dense isothermal plasma heating due to electron and ion scattering on turbulent pulsations of electric field oscillations
13 p2019 A72-29916
- E region electron collision frequency vertical distribution by ground measurement of radio wave absorption, using electron concentration data obtained by rocket-borne interferometer
14 p2100 A72-30462
- Free electron waves interaction with coherent laser light in crystalline medium, discussing quantum mechanical treatment and path integral approach
14 p2110 A72-30725
- Cross section determination of proton production in collisions of electrons and hydrogen ions
14 p2134 A72-30801
- Cross sections for dissociative excitation of hydrogen ions by electrons determined by coincident detection of protons and H atoms
14 p2134 A72-30804
- Hydrogen negative ion electron detachment collision process cross section calculation using Coulomb trajectory impact-parameter method
14 p2135 A72-30884
- Nonideality effects on Coulomb gas conductivity by finding conductivity due to electron scattering at atoms, solving kinetic equation of three component plasma model
15 p2283 A72-31269
- Kinematic intensity recovery from LEFD data of specular and nonspecular beams from Ni/111/ surface, noting multiple scattering interference elimination
15 p2276 A72-31855
- Electron production cross section during He atom ionization by proton impact, noting peak existence for electrons near incident proton velocities
15 p2281 A72-32220
- Eikonal distorted wave analysis of inelastic electron-atom collisions at intermediate energies application to electron impact induced atomic hydrogen 2s and 2p states excitation
15 p2282 A72-32646
- Magnetoactive plasma transverse waves propagation near electron gyrofrequency harmonics, taking into account electron collisions and relativistic effects
15 p2289 A72-32734
- Gas phase photodetachment of electron from selenide ion, determining affinity and spin-orbit coupling constant for SeH negative ion
16 p2360 A72-33580
- Pion-electron conjugation and twist angles determination in biphenyls via Raman intensity, comparing with hypsochromic UV shift of Suzuki method
16 p2431 A72-33585
- Calculation procedure involving wave function for vibrational correction to electron scattering cross section of hydrogen molecule in Born approximation
17 p2585 A72-34261
- Electrons and photons interaction with relic radiation, establishing high energy gamma rays energy and intensity attenuation length
17 p2600 A72-35145
- Wave-wave interactions due to scattering by electrons.
17 p2591 A72-35162
- Ion-ion correlation effects on electron-nucleus neutrino bremsstrahlung.
18 p2723 A72-36089
- A dynamical theory for the contrast of perfect and imperfect crystals in the scanning electron microscope using backscattered electrons.
18 p2692 A72-36749
- Absolute differential cross sections of electrons elastically scattered on neon atom.
18 p2713 A72-36952
- Polarization effects during electron scattering in the gravitational field of a rotating source
18 p2712 A72-36967
- Vibrational excitation in N2 by electron impact in the 15-35-eV region.
19 p2837 A72-37546
- Yields of gamma rays emitted following capture of negative muons by Si28 and Mg24.
19 p2837 A72-38026
- The incoherent scattering of radiation from a high temperature plasma.
19 p2842 A72-38523
- Kinetic theory of density fluctuations in a magnetized collision-dominated plasma in an electric field.
19 p2792 A72-38745
- Electron-electron collision induced anomalous Hall effect in ferromagnetic d metals at low temperatures
20 p2959 A72-39309
- State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction I-V characteristic fluctuation
20 p2960 A72-39385
- Electron loss in atom-molecule collisions.
21 p3087 A72-40473
- Linear momentum transfer effects in molecular dissociation produced by electron impact.
21 p3087 A72-40557
- Extension of Eliashberg's theory to type-II superconductors.
21 p3096 A72-40574
- Solar coronal F component separation from K component by utilizing elongation dependence differences in scattering populations, computing F for wide range of parameters
21 p3106 A72-41041
- Chou-Tien nonplane-parallel solution to transfer equation for radiation scattering by free electrons in stellar spherical atmosphere by regional averaging procedure
21 p3109 A72-41434
- Effect of Thomson scattering on the emission spectrum of an optically semitransparent plasma
21 p3102 A72-41774
- Electron impact excitation cross sections and energy degradation in CO.
22 p3172 A72-42422
- Elastic electron-neutral interaction in argon in the vicinity of the Ramsauer minimum
22 p3211 A72-42642
- Compton scattering by thermal electrons in X-ray sources.
23 p3328 A72-43230
- Equatorial UV airglow azimuthal variations from spinning rocket measurements, attributing origin to electron collision excited atomic hydrogen 1,2man alpha emission
23 p3282 A72-43263
- Variation with electron velocity powers of electron collision frequency and energy transport coefficients in weakly ionized plasmas - Earth's lower ionosphere.
23 p3285 A72-43994
- Spectral composition and phase function of plane monochromatic light wave scattering by electrons in high temperature plasma
23 p3322 A72-44465
- Parasitic pitch angle diffusion of radiation belt particles by ion cyclotron waves.
23 p3333 A72-44527
- Semiconductors cyclotron echo signals from dipole interactions with alternating magnetic fields, discussing frequency doubling and excitation mechanism
24 p3431 A72-44571
- Anomalous Hall effect of polarized electrons spin-orbit interactions in semiconductors, involving emf appearance in electric field and polarized light
24 p3431 A72-44573
- Theoretical interpretation of the optical and electron scattering spectra of polyatomic molecules. III - N2O

and the discovery of resonant phenomena in the B region at 6.8 eV.

24 p3426 A72-45301

Dissociative attachment in carbon dioxide.

24 p3427 A72-45303

Electron scattering by molecules with and without vibrational excitation. IV - Elastic scattering and excitation of the first vibrational level for N₂ and CO at 20 eV.

24 p3427 A72-45304

Electron scattering by molecules with and without vibrational excitation. V - Elastic scattering and non-resonant vibrational excitation of N₂ at 30-83 eV.

24 p3427 A72-45305

Possible explanation of non-power-law radio spectra of cosmic radio sources.

24 p3446 A72-45477

ELECTRON SOURCES

Supernova Vela X and local remnants as origin of below 1000 GeV cosmic electrons, deducing existence at 10 to 15 GeV from muon poor showers

01 p0119 A72-10853

Near earth interplanetary electron source detection related to coronal site type 3 bursts, using 80 MHz radioheliograph observations

16 p2445 A72-33044

RF discharge gap in cascaded plasma limiters, using tritium igniter as reliable electron priming source

18 p2715 A72-36451

Triode electron gun design for narrow electron beam under highly convergent lens action, using field emission source

19 p2775 A72-38611

Field emission from carbon fibres - A new electron source.

22 p3208 A72-41966

ELECTRON SPIN

Surface effects on paramagnetic metals spin susceptibility models, including random-phase-approximation equation derivation and induced magnetic moment calculation

15 p2295 A72-32549

Dynamics of the optical-pumping cycle of F centers in alkali halides - Theory and application to detection of electron-spin and electron-nuclear-double-spin resonance in the relaxed-excited state.

18 p2719 A72-36709

Electron spin resonance of divalent Mn ion doped in thallous azide single crystals, investigating temperature effects on spin Hamiltonian parameters

22 p3152 A72-42716

ELECTRON SPIN RESONANCE

U ELECTRON PARAMAGNETIC RESONANCE ELECTRON STATES

Excited state and electron densities in noble and atmospheric gas plasmas created by alpha particle induced ion irradiation, discussing plasma kinetic processes and superimposed electric field effects

01 p0112 A72-11335

Amorphous semiconductors dielectric properties based on randomly distributed local electron states in disordered solids, crystalline impurities and polymer aggregates

02 p0269 A72-12450

Vibrational population of molecular nitrogen electronic states in normal auroras, examining electron impact and cascade contributions

03 p0349 A72-13524

Allowed states of electronic complexes and impurity molecules in crystals determination in molecular orbital scheme of molecular electronic calculations

03 p0392 A72-13864

Jahn-Teller Hamiltonian for triplet electron state coupling to phonon vibrations in cubic symmetry

03 p0404 A72-14264

Hydrogen 2p and 2s states formation during 1-25 keV atomic collisions with rare gases from Lyman alpha radiation cross section measurement

05 p0693 A72-17168

Molecular nitrogen photoelectron impact excitation of Herman-Kaplan upper electronic state, considering cascade contribution to low lying states in electron auroras and dayglow

06 p0806 A72-17647

Electron states in glassy amorphous semiconductors, constructing trial wave functions for valence band

06 p0866 A72-18180

State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction current-voltage characteristic fluctuation

07 p1047 A72-18919

Critical temperature dependence of Nb-Al-Ge superconducting alloys on composition and heat treatment, discussing phase boundaries and electron state densities

07 p1049 A72-20154

Resonance theory of three body ion-atom association reactions in rare gases, estimating quasi-bound electron state population and deactivation cross section

09 p1356 A72-22792

Ta and W X ray spectra fine structure measurement, providing electron states density in unoccupied regions of energy bands of solids

09 p1370 A72-22842

Rare earth elements outer electrons X ray and UV photoemission spectra interpretation by multiplet splitting of final state

09 p1371 A72-22844

Soft X ray emission spectra from Al-Nb and Al-Pd alloys, deducing electron state density near Al ions

09 p1371 A72-22848

Ti, Zr and Hf hcp-bcc phase transformation isochromat spectroscopic investigation, noting fine structures to confirm electron state density

09 p1371 A72-22849

Excitation and relaxation of upper laser state in carbon dioxide discharge from Q spoiled pulse-produced fluorescence measurements

09 p1326 A72-23577

Supersonic Ar, He and molecular nitrogen jets, determining electron temperature and concentration and atomic state population in shock waves region by spectroscopic measurement

10 p1517 A72-23837

Nd-glass amplifier gain saturation by 1.06 micron light pulses determined by two laser states lifetimes and degeneracies and thermalization rates

12 p1792 A72-27752

Combined photon and particle diffusion of two level system with ground and excited atomic states and photon emission-formed radiation field

13 p2001 A72-28509

Localized electronic states size near mobility edge in semiconductor, considering eigenfunction behavior in random lattice problem

14 p2143 A72-30878

Atomic hydrogen 3s state destruction by impact on nitrogen, argon and hydrogen molecules, considering collisional ionization and electron capture mechanisms

14 p2134 A72-30883

Binary systems phase diagrams qualitative and quantitative analysis based on free atoms electron state energy ratios, formulating solid solubility criterion

14 p2123 A72-30994

Superlattice structure and electron correlation of Co-Sn system, using X ray and metallographic analyses

15 p2257 A72-32115

Amorphous semiconductors theories, discussing electron states and transport properties in terms of Cohen, Mott and Gubanov models

15 p2293 A72-32234

Rutile titanium dioxide molecular orbital energy level diagram deduction from X ray emission and absorption band spectra, noting Ti and O states roles

15 p2295 A72-32539

Oxygen atom electron affinity calculation by symmetry-adapted pair correlation approximation, using pseudonatural orbitals (PSNO) technique

15 p2282 A72-32644

Sodium D lines broadening and shift parameters under atomic H and He collisions effect, calculating low lying states interatomic potentials

15 p2317 A72-32772

Carbon monoxide oxidation reactions temperature dependence, correlating high to low temperature results via transition state theory

16 p2360 A72-33511

Hydrogen and hydrocarbon diatomic molecules and cations rotational state upper limits determination, noting potential energy functions

16 p2432 A72-34098

Intramolecular interactions and vibronic spectra of polyatomic molecules. IV - Electronic relaxations: Configurational and relaxational spectra - The four-level arrangement

19 p2838 A72-38778

State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction I-V characteristic fluctuation

20 p2960 A72-39385

Calculation of electronic Green functions using nonorthogonal basis functions - Application to crystals.

20 p2961 A72-39810

Ground and low-lying excited electronic states of FeH.

21 p3096 A72-40563

Two band superconductor state density vs energy, noting energy spectrum extremal points

21 p3098 A72-41697

Photoelectron energy distributions from clean polycrystalline W, observing surface state

22 p3190 A72-42477

Photoemission from surface states on tungsten.

22 p3190 A72-42478

Theoretical interpretation of the optical and electron scattering spectra of polyatomic molecules. III - N₂O and the discovery of resonant phenomena in the B region at 6.8 eV.

24 p3426 A72-45301

ELECTRON SWEEPING

U SWEEP FREQUENCY

ELECTRON TELESCOPES

U PARTICLE TELESCOPES

ELECTRON TEMPERATURE

U ELECTRON ENERGY

ELECTRON TRAJECTORIES

I-V characteristics and bandwidth properties of distributed emission amplifier within magnetic field, analyzing averaged electron trajectories and hf potential distribution

02 p0189 A72-11568

Electron paths and spread velocities in helical beams of adiabatic M-type electron gun used in masers at cyclotron resonance

06 p0826 A72-18403

Third order aberration coefficients of electron trajectories for two tube electrostatic lens

10 p1510 A72-23941

Electrostatic field and electron trajectories calculation for focusing optoelectronic systems formed by interacting electrodes positioned on conducting surface

13 p2004 A72-29070

Electron trajectories and spread velocities in helical beams of adiabatic M-type electron gun used in masers at cyclotron resonance

17 p2562 A72-34854

Trajectory equations of laminar electron flow in exponential magnetic field, calculating electrode shapes of magnetron injection electron gun

21 p3088 A72-41835

Differential equations for energy flow between electron beam and electromagnetism field, avoiding electron trajectory explicit calculation in nonlinear treatment of cyclotron resonance interaction

22 p3159 A72-42304

Optimal gyroresonator control in electric oscillating field by HF magnetic Lorentz force in terms of relativistic electron trajectory drifts

23 p3290 A72-44200

Electric field distribution and strength and electron trajectories computations in designing electron optical display systems, using rectangular networks

23 p3291 A72-44312

Thermal conductivity of superconducting layer in intermediate stage with Andreev electron excitation trajectories in magnetic field, using Green function and impurity distribution technique

23 p3325 A72-44486

ELECTRON TRANSFER

Transferred electron microwave oscillators /three-level and LSA relaxation types/ and amplifiers /reflection and traveling wave types/ fabrication, technology and performance capabilities

01 p0035 A72-10627

Transferred electron microwave oscillator devices with n-n-n structure by liquid phase epitaxy, reducing high resistance layer in interfaces and crystal defects

01 p0036 A72-10629

Liquid phase epitaxial GaAs transferred electron microwave oscillators with high dc to rf conversion efficiencies dependent on frequencies

01 p0036 A72-10631

Bulk InP three level transferred electron microwave oscillators, observing current-controlled instabilities and operation modes

01 p0036 A72-10632

CW and pulsed InP transferred electron microwave oscillators, discussing fabrication techniques and electrical properties

01 p0036 A72-10633

High efficiency transferred electron microwave oscillators operated in short LSA mode, noting pulse-operated diode power appearance time delay behavior

01 p0036 A72-10634

Supercritically doped transferred electron microwave amplifiers stabilization mechanisms, considering cathode contact, anode diffusion current and active region temperature gradient roles

01 p0036 A72-10636

Hydrogen diffusion, electron transfer and density distribution in Ta as function of temperature and field strength

02 p0242 A72-12009

High efficiency GaAs transferred electron device operation and microwave oscillator design by simple static I-V characteristics description for time domain computer simulation

02 p0193 A72-12230

Photochemical electron transfer evolution models, noting titanium and zinc oxides as photosensitizers

04 p0484 A72-14777

Vapor-grown GaAs transfer electron microwave oscillator, discussing design, fabrication and CW power conversion efficiency

05 p0637 A72-16366

InP transferred electron microwave oscillators, observing higher efficiency than IMPATT and GaAs devices

06 p0784 A72-18063

Transferred electron effect in GaAs, presenting three level solid state microwave oscillator advantages

06 p0866 A72-18454

Transferred electron microwave oscillators design for various peak and average power levels, considering tradeoff between operating mode and device configuration

06 p0789 A72-18475

Medium power high gain, CW transferred electron microwave amplifiers at C band, describing bandwidth, saturation, intermodulation distortion and dynamic range characteristics

06 p0789 A72-18483

Large signal analysis of stabilized supercritically doped transferred electron microwave amplifiers, considering diffusion and lattice temperature effects

06 p0790 A72-18484

Power generation and low noise amplification devices development during past decade, considering avalanche diodes, transferred electron and acoustoelectric devices and microwave transistors

07 p0952 A72-18825

Electromechanical machining metal removal mechanism based on configurational localization model, relating wear processes to electron exchange and free energy margin decrease

07 p0996 A72-19989

Hydrogen protons and atoms interaction with hydrogen and nitrogen molecules, showing electron transfers agreement with Franck-Condon principle

08 p1210 A72-20835

Intraband multiphoton conduction-electron transfer probability in semiconductor under electromagnetic wave action in uniform magnetic field

08 p1216 A72-21066

Noise characteristics and mechanisms in avalanche diodes and transferred electron devices

09 p1287 A72-23115

Supercritical CW GaAs transferred electron broadband reflection amplifier power gain and noise figure at 34 GHz

10 p1449 A72-24301

Thermal energy reaction rates determination for partial charge transfer chemical reactions, comparing with electron transfer efficiencies

10 p1514 A72-24336

Electric field profile in n-type GaAs layer biased above transferred electron threshold for small signal amplifier operation

10 p1450 A72-24554

Lower ionospheric structure, discussing electron production, loss and transport effects and diurnal variations

10 p1473 A72-24703

Multiaxis radial circuits for transferred electron microwave oscillator performance optimization to obtain wideband CW amplification, discussing LSA tests

11 p1604 A72-25745

High efficiency CW performance of InP transferred electron microwave oscillator with anomalous I-V characteristics temperature dependence

11 p1604 A72-25750

IMPATT diode and transferred electron Gunn devices for systems applications, comparing thermal noise and physical properties

12 p1788 A72-27295

Electron transfer frequencies and triplet-triplet transition spectra of polyphenyl compound molecule scintillators for UV lasers, using chaotic phase method

13 p1968 A72-29509

IR absorption coefficients of oxygen atom and molecule fields due to free-free electron transfers at specific elastic scattering cross sections

15 p2274 A72-31409

High efficiency X band pulse operation of transferred electron oscillator in hybrid mode, noting high material quality and optimum impedance match

15 p2206 A72-31548

Frequency stabilized self-oscillating microwave up-converter with transferred electron diodes, noting maximum power output and bandwidth

16 p2369 A72-33764

Structure, electrical conductivity and electron transport mechanisms in chalcogenide glasses

17 p2596 A72-35750

Electron-relaxation effects in transferred-electron devices revealed by new simulation method.

18 p2667 A72-36689

Excitation of nanosecond waves on positive columns.

19 p2838 A72-37328

Equations for electron and high-energy photon transfers in magnetic fields

19 p2837 A72-38059

Effects of magnetic field on electron transport properties in gallium arsenide.

20 p2960 A72-39704

Convection and diffusion transport equation of galactic cosmic ray electrons with energy loss and absorption allowance for supernova compressed halo models

22 p3217 A72-42210

Theory of microwave amplification with electron transfer

23 p3269 A72-43550

Charge, direction and temperature dependence of semiconductor electrotransmission in dc field, considering metals diffused in Ge, Se, Te, Si, BiTe, GaAs and InAs

23 p3324 A72-43642

ELECTRON TRANSITIONS

Phosphorus absolute transition probabilities determination from P I and P II lines strength measurement, using gas-driven shock tube

01 p0104 A72-11111

High precision rotational constants and transition frequencies in ground state interstellar molecule cyanoacetylene

01 p0023 A72-11147

Solar corona atomic states radiative and collisional transitions, inferring radiative recombination cross section from bound-free absorption coefficient

03 p0422 A72-13203

Ruby laser radiation nonlinear absorption by azulene solutions derived by taking into account two-photon transitions for comparison with measurement

03 p0366 A72-13367

Solar coronal total dielectronic recombination coefficient simple relationships for isoelectronic sequences of H, He, Ne, K-Ni and Li-F, Na-A and Cu-Kr

05 p0718 A72-16510

High power tunable IR gas lasers based on anharmonic molecules vibrational-rotational transitions excitation at gas pressures of 10 atm

06 p0825 A72-17786

Neutral B I vacuum UV spectra from hollow cathode light source, remeasuring electron transitions to higher accuracy

06 p0852 A72-17896

OH ground state transition frequency measurement, using beam maser spectrometer

07 p1006 A72-19423

Metastable argon-carbon dioxide dissociation and electronic excitation of carbon monoxide or oxygen

07 p1037 A72-19496

Optically pumped gas lasers with electron transitions to molecular excited state and resonant absorption lines

07 p1006 A72-19634

Auroral emission rates for various transitions from cross section data and secondary electron spectra measurements

08 p1227 A72-21114

Atomic, ion and electron transition pulsed gas discharge lasers, considering power efficiency factors, vacuum UV region and gas density

08 p1182 A72-21644

Time dependent progress of vibrational-rotational transitions in hydrogen-fluorine chemical laser investigated by oscillography with IKM-1 monochromator

08 p1183 A72-21715

Electronic transition between energy bands as explanation for two optical absorption maxima in rare earth metals

09 p1369 A72-22609

Tabulation of calculated rotational line intensities relative to integrated vibration-rotation band intensity for various electron transitions of nitrous oxide

09 p1276 A72-22665

Simple and multiple electronic processes in X and XUV region - Conference, Paris, September 1970

09 p1356 A72-22826

Optical and inner shell X ray transitions in highly ionized Cu, Fe and Ti observed from point plasma source generated in linear vacuum discharge

09 p1360 A72-22833

Inner shell ionized atoms, discussing orbital electrons rearrangement processes based on shakeoff events and radiative Auger transition

09 p1356 A72-22834

Photoabsorption and simple and multiple excitations of rare gases internal atomic layers under X ray action, relating electron transition and relaxed core energies

09 p1357 A72-22836

Molecular X ray emission spectra interpretation based on singly ionized states observation by photoelectron spectroscopy and transition probability calculation

09 p1357 A72-22838

Nonlinear effects in optical pumping of Ne transition by laser line

10 p1491 A72-24109

Positive ions excitation cross sections calculated for proton impact induced transitions among fine structure states

10 p1543 A72-24619

Fine structure and IR transmission functions of carbon dioxide absorption bands at high pressure and temperature, calculating transition lines strength and position

11 p1620 A72-25275

Electronic model for low temperature transition in magnetite with nonintegral average electron number on site

11 p1701 A72-26023

Population inversion through metastable ion formation by atomic inner shell electrons photoionization, determining effectiveness relationship to emission source plasma composition

11 p1648 A72-26332

Electron gas in superstrong magnetic fields of gravitationally collapsed objects outer region, noting Wigner transition to ordered structure

11 p1699 A72-26704

Quantum beats in transitions from levels subject to optical cascades

12 p1847 A72-27184

Optical interband transition energies in Ni and Ni based alloys, measuring light conductivity at various spectral energies

13 p1976 A72-28904

IR absorption coefficients in air at 6000-8500 K and 40-95 atm, interpreting absorption due to free-free electron transitions in neutral particle fields

13 p2006 A72-29676

Stable single frequency operation of molecular laser using carbon dioxide-helium mixture, ensuring vibrational-rotational transition by special selection of active element parameters

13 p1970 A72-29682

Kinetic equation of repeatedly ionized plasma from hyperbolic diffusion method, calculating direct transitions between excited ion states

13 p2008 A72-29895

SiO transitions radiative lifetimes and absolute oscillator strengths from RKR Franck-Condon factors

13 p2008 A72-30054

Corrections to collision induced vibration transition probability calculated from three dimensional semiclassical model

13 p2009 A72-30062

Atomic hydrogen collisional and radiative transition rates, computing excitation and ionization cross sections

14 p2133 A72-30564

Spectral line profile of optical transition spontaneous radiation during resonance with strong field on adjacent transition

14 p2110 A72-30781

Hydrogen molecule highly excited electronic levels, developing transition probabilities estimation method

14 p2135 A72-30888

Graphite band structure investigated by secondary electron emission, observing electron transitions to higher excited states

15 p2260 A72-31856

High power carbon dioxide laser produced dense He plasma, comparing experimental and theoretical Stark profile of forbidden and allowed transitions

15 p2285 A72-32223

Electron impact low energy cross sections for transitions between highly excited states, obtaining upper bound via quantal impact parameter theory

15 p2315 A72-32715

Mercuric chloride, bromide and iodide gas phase UV absorption spectra, discussing correlation with intermolecular charge transfer transitions

16 p2360 A72-32926

Beam maser spectrometric measurements of normal, C-13 and O-18 formaldehyde transitions, determining coupling constants for all rotational transitions hyperfine structure

16 p2431 A72-33132

Russian papers on physical processes in lasers covering mode locking regime, pinch discharge, electronic transitions in diatomic molecules and laser control

16 p2400 A72-33295

Pulsed emission at pulse front in molecular hydrogen, deuterium and nitrogen at near IR electronic transitions, analyzing spectral, temporal and energy characteristics

16 p2401 A72-33298

Carbon monoxide oxidation reactions temperature dependence, correlating high to low temperature results via transition state theory

16 p2360 A72-33511

Forced oscillations in a circuit with a nonlinear p-n junction capacitance

17 p2533 A72-34756

Magnetic dipole matrix elements for atomic transitions between Zeeman levels at microwave frequencies

17 p2585 A72-35769

Emission spectra of comet tail carbon monoxide molecular ion indicating constant or slowly varying electron transition moment

17 p2618 A72-35826

The capacitances of aniso-type heterojunctions with continuously varying energy band gap and electron affinity in the transition region.

18 p2719 A72-36944

Electronic and optical phenomena in semiconductor.

19 p2844 A72-37445

Observability of hyperfine structure and Lamb, nuclear-volume shifts in $1s_{n1}-1s_{n1}$ transitions of helium-like ions.

19 p2837 A72-37544

Forbidden line intensities in cesium plasmas.

19 p2840 A72-37776

Effect of atomic polarizability on low-energy free-free radiative transitions.

19 p2837 A72-37839

Infrared dispersion of second-order electric susceptibilities in semiconducting compounds.

19 p2844 A72-37944

Evaluation of rotational temperature at high vibrational temperature in electron beam fluorescence technique.

19 p2803 A72-38434

L-S coupling interpretation of high-resolution LMM Auger spectra of Cu and Zn.

19 p2846 A72-38597

IR emission of nitrogen layer heated by reflected shock wave, noting absorption cross sections under free-free electron transitions in neutral particle fields.

19 p2835 A72-38776

Radiative lifetimes for some resonance transitions of Fe I and Fe II in the region between 2300 Å and 3050 Å, and the application to iron abundance determinations in the sun and in the QSO PHL 938.

20 p2966 A72-38915

Emission and absorption RF recombination lines of interstellar neutral atomic H and He, discussing electron transition processes in nebula.

20 p2975 A72-40070

Calculation of intensities of vibration-rotation of a diatomic molecule by the factorization method.

21 p3087 A72-40471

Cross sections calculations for electron-oxygen scattering using the polarized orbital close coupling theory.

21 p3087 A72-40472

Atomic, ion and electron transition pulsed gas discharge lasers, considering power efficiency factors, vacuum UV region and gas density.

21 p3064 A72-41301

Dependence of the properties of monocarbides of group IV-V transition metals on carbon content.

22 p3189 A72-42198

Dependence of changes in the electronic dislocation-braking force during superconducting transition on the stresses, temperature, and strain rate.

23 p3312 A72-43315

Indirect transitions and absorption in the mid-IR region of the spectrum in SbSBr crystals.

23 p3323 A72-43337

Negative resistance, transit time and limited space charge accumulation modes of semiconductor devices operation with electron transitions.

23 p3272 A72-44138

A shock tube determination of the electronic transition moment of the CN red band system.

23 p3316 A72-44329

Influence of weak disturbances on the operation of a gas laser with a homogeneous working-transition line.

23 p3297 A72-44467

Electronic excitation of N₂ and dissociative excitation of O₂ by proton impact.

23 p3317 A72-44520

Laser-source spectroscopy. II - Experimental study of line broadening for the 00 1-/10 0, 02 0/ transition of CO₂ disturbed by N₂: Application of the theory of Anderson, Tsao, and Cornette to the calculation of pure and N₂-disturbed CO₂ linewidths.

23 p3298 A72-44535

Optically pumped gas lasers with electron transitions to molecular excited state and resonant absorption lines.

24 p3408 A72-44566

Model potential calculations of lithium transitions.

24 p3426 A72-44808

Electron paramagnetic resonance hyperfine spectral observation of double quantum transitions of Ti positive ions in strontium chloride single cubic crystal host.

24 p3378 A72-45311

ELECTRON TUBES

NT RETURN BEAM VIDICONS

NT THERMIONIC DIODES

NT TRAVELING WAVE TUBES

NT VACUUM TUBE OSCILLATORS

NT VACUUM TUBES

NT VIDICONS

Submillimeter waves development, discussing materials research, lasers, semiconductor and electron tube sources, system components and applications in space communication, imagery, metrology and sensing.

04 p0550 A72-15591

Frequency characteristics theory for two-stage electron tube microwave amplifiers coupled by transmission line on order of wavelength.

05 p0634 A72-15827

Electron tube present and future applications as oscillators, high power and hf amplifiers and optoelectronic converters.

06 p0784 A72-17775

IR image tube with electronic scanning and pyroelectric target for uncooled operation at ambient temperature, noting wideband spectral sensitivity.

08 p1171 A72-21966

High dose rate electron beam irradiation using telescoping drift tube for flash X ray machine.

10 p1509 A72-23935

A sealed, sectionalized million-V X-ray tube.

19 p2776 A72-38767

ELECTRON TUNNELING

Equivalent circuit models in semiconductor transport for thermal, optical, Auger-impact and tunneling recombination-generation-trapping processes.

[AD-740495] 03 p0401 A72-13585

Tunneling current calculation for free electrons subject to arbitrary one-electron potential, using Keldysh perturbation theory.

03 p0404 A72-14266

Metal-insulator-metal tunneling junction, calculating effect of localized impurity states in barrier on tunneling current.

03 p0404 A72-14267

Electron tunneling probabilities through slowly varying potential energy barrier with potential holes evaluated by T scattering matrix interaction formalism.

04 p0563 A72-15471

State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction current-voltage characteristic fluctuation.

07 p1047 A72-18919

Quasi-particle decay rates by electron-electron scattering in superconductors, noting effect on states tunneling density.

08 p1217 A72-21595

Ta, Nb and La superconductivity, investigating surface contamination effects on electron tunneling characteristics.

09 p1367 A72-22554

Thin film tunnel triode using p-type amorphous semiconductors to achieve injected current amplification.

10 p1451 A72-24624

Electron tunneling into amorphous InSb and GaSb films, discussing effects of temperature, voltage, coevaporation doping and Cu and Au diffusion.

10 p1527 A72-24874

High electric field effects on I-V characteristics of Te-As-Ge-Si type chalcogenide thin film, noting Poole-Frenkel emission and electron tunneling roles.

15 p2291 A72-31641

Superconductivity, temperature and tunneling effects in low carrier density semiconductor systems /tin, germanium and indium tellurides, lanthanum triselenide and strontium titanium oxide/.

15 p2293 A72-32325

One electron and Josephson tunneling in superconductors in terms of energy level concepts.

15 p2293 A72-32326

In-Tl alloys electron phonon interaction and superconductivity electron tunneling examined by sum rule and mass defect theory.

15 p2295 A72-32543

Conductance measurements for metal oxide-amorphous silicon junctions, showing temperature dependent tunneling.

16 p2442 A72-33620

Metal-insulator-metal tunnel junctions, investigating effect of nonparabolic band structure energy-momentum relation on I-V characteristics.

16 p2370 A72-34101

Electric contact between metal and n-type semiconductor, investigating contact pressure effects on electron tunneling and phonon conductance to provide band structure.

18 p2718 A72-36488

State density singularities elimination in inhomogeneous superconductors by electron interactions nonuniformities, resulting in tunnel junction I-V characteristic fluctuation.

20 p2960 A72-39385

Nonequilibrium phenomena in electron tunneling in normal metal-insulator-metal junctions.

21 p3096 A72-40343

Tunneling generation, relaxation, and tunneling detection of hole-electron imbalance in superconductors.

21 p3097 A72-40774

Effects of tunneling on an IMPATT oscillator.

21 p3034 A72-41382

Current noise and conductance-temperature characteristics of thin discontinuous Pt films on glass substrate interpreted by quantum mechanical electron tunneling model.

22 p3214 A72-42453

Influence of the properties of the materials on junction tunneling characteristics.

22 p3214 A72-42454

ELECTRON-ION RECOMBINATION

NT RADIATIVE RECOMBINATION

Electron-ion recombination and ambipolar diffusion disruption of electron density in cryogenic helium plasma, using cavity resonator measurements.

03 p0399 A72-14067

Electron-ion recombination rate measurements in flowing afterglow, using sampling mass spectrometer and floating double probe.

06 p0851 A72-17318

Hollow cylindrical cathode discharge sustaining potential reduction and recombination probability increase from transverse magnetic field and rising pressure and plasma density.

09 p1361 A72-22957

High pressure CO and N plasmas production by uncoupling electron temperature from number density, measuring electron-ion recombination rates.

10 p1518 A72-23962

Electron recombination loss coefficients and concentration profiles for D region during solar eclipses from rocket measurements.

12 p1800 A72-27149

Low altitude electron-ion dissociative recombination and ion-ion neutralization coefficients during PCA event from ESRO rocket flights data.

13 p2032 A72-29653

Si p-n junction solar cell fill factor for electric power available to load, noting discrepancy between calculated and measured values due to recombination.

17 p2494 A72-34264

Transverse magnetic field effects on cylindrical hollow cathode discharge voltage-current characteristics, noting sustaining potential and recombination probability changes.

17 p2593 A72-35886

Theoretical estimate of the effective recombination coefficient in the D region.

23 p3284 A72-43818

Measurement of the rate coefficient for the recombination of He+ with electrons.

23 p3315 A72-43869

Dissociative recombination at elevated temperatures. I - Experimental measurements in krypton afterglows.

23 p3316 A72-44346

Electron-ion recombination in a helium plasma produced by laser.

24 p3428 A72-44799

ELECTRONIC AMPLIFIERS

U AMPLIFIERS

ELECTRONIC CONTROL

Narrow band electrically controlled interferential polarization filter with fine tuning capability for solar physical research, discussing design and operation.

03 p0357 A72-13369

Pulsed injection laser current pulse height, width and rise time controls, comparing use of tube, transistor and SCR discharge circuits.

04 p0528 A72-14420

Computer servocontrolled granite stage and measuring microscope, discussing mechanical and optical construction, control electronics and applications.

04 p0522 A72-15477

AEROS scientific satellite attitude control system, considering control and measuring electronics, axis and spin control coils and spin stabilization.

04 p0503 A72-15649

Spacecraft precision off-on attitude control by pure jet torquing, using electronics based on control system idealized model.

05 p0726 A72-16459

Analytical design of pulse width modulated systems with time constant and delay for electronic control, using Z transform.

10 p1457 A72-24458

Single engine aircraft-borne weather radar with electronically scanned steerable phased array antenna [SAE PAPER 720315].

11 p1591 A72-25579

Miniaturized electronic system for controlling methanol concentration in aqueous electrolyte during fuel cell operation.

12 p1755 A72-27723

High voltage solar array technology, studying power conditioning control system design and array-space plasma interactions.

[AIAA PAPER 72-443] 13 p1899 A72-28942

Solid state stepping motor drive controller to provide constant angular shaft velocity for scanner applications.

13 p1933 A72-29767

Ac voltage squaring with semiconductor power amplifier based on electronic servo principle and feedback circuit.

16 p2370 A72-33958

Electronic temperature-flattening of thermionic reactors.

18 p2644 A72-36172

Electronic control systems flexible programming techniques based on interconnection design or on utilization of easily exchangeable program carriers.

19 p2782 A72-38313

Electronic control systems for industrial applications, discussing electrical and mechanical properties, circuit reliability and mechanical design features.

19 p2782 A72-38314

Process control of the 100-meter telescope - Astronomical concept 19 p2803 A72-38485

Four-terminal Si controlled switches, discussing negative resistance and linear amplification I-V characteristics and applications in oscillators and modulators 20 p2907 A72-39274

Control circuit for a power supply of a laser pump lamp. 20 p2933 A72-39524

Electronic simulator for calculating effective temperatures in the establishment of climatological procedures 21 p3077 A72-40166

Optoelectronic speed control for replacing mechanical gear drives for precisely variable shaft speed ratios 21 p2997 A72-40259

Calculation of the electronic readjustment of a tunnel-diode oscillator by a varactor 22 p3159 A72-42246

German monograph - A search procedure for electronic radar. 22 p3156 A72-43054

A near-time-optimal control circuit with a large number of relay elements 24 p3387 A72-45699

ELECTRONIC COUNTERMEASURES

NT CHAFF

X band gallium arsenide field effect transistor, noting applications for radar receivers, microwave communication links and electronic countermeasures 02 p0193 A72-12184

Low noise Ku band klystron oscillators for Doppler radar, discussing FM noise induced frequency deviation, spurious modulation and countermeasures 07 p0954 A72-19049

Solid state phased arrays for ECM applications. 17 p2531 A72-35569

YIG filter banks for ECM and communications. 19 p2772 A72-37523

Ultrasonic bonding tip design for densely wired electronic circuit boards, analyzing standing wave phenomena and resonant frequency [SAE PAPER 710789] 01 p0074 A72-10279

Multichannel multispectral scanner system for NASA C-130 earth resources aircraft, describing electronic equipment and calibration sources 01 p0048 A72-10946

Telemetry standards for transmitting, receiving and signal processing equipment at missile test ranges 02 p0176 A72-12164

Electronic equipment and calibration procedures for 86 MHz radio interferometer providing synchronized astronomical observations 02 p0194 A72-12576

Book on microwave electronics covering electron beam microwave devices and solid state microwave oscillators and amplifiers 03 p0331 A72-13233

Portable electronic wattmeter for nonsinusoidal waveform low power factor circuit measurement, discussing design, calibration and applications [IEEE PAPER 8.2] 03 p0332 A72-13757

Miniature refrigerators design for electronic devices, noting application to IR detectors cooling 03 p0313 A72-14366

Electronic system for electrodischarge machining, considering thyristor spark control and circuitry

design for automatic feed down and short circuit clearance 04 p0502 A72-15530

Electronic chronometer design problems, describing quartz clock components and temperature and voltage variation effect on accuracy 04 p0525 A72-15572

Radiator fins for cooling electronic equipment elements, calculating design parameters effects on heat transfer efficiency 05 p0746 A72-16198

Electronic computing wind vane for meteorological support during atmospheric diffusion studies 06 p0843 A72-18449

Electronic imaging devices in astronomy, describing TV readout image tubes 07 p0985 A72-19580

Quartz crystal oscillator device for continuous monitoring and controlling thin film thickness in optical and electronic applications, noting temperature effects on crystal oscillating frequency 07 p0990 A72-20284

Electronic correlator for plasma wave induced coherent signals cross correlation measurement, producing 1 microsecond time delays by automatically switching lumped circuit delay line 07 p0958 A72-20582

Electronic cameras to record and measure weak stars 1000-11000 A, noting atmospheric turbulence suppression and night sky brightness reduction 08 p1170 A72-21962

European Special Space Tug electronic subsystem requirements, considering strapdown inertial measuring unit, remote sensors, computer and fail-safe backup system 09 p1396 A72-23258

Dormant aerospace electronic system sedentary or nonoperating failure rate analysis by prediction technique 10 p1447 A72-24008

Electronics and data processing technology effects on radar state of art, discussing automated air traffic control surveillance systems 10 p1435 A72-24490

Electronic production of shifting grid pattern displays featuring variable spatial frequency, temporal frequency and modulation depth 10 p1433 A72-25184

Experimental cold plates provided with heat pipes for thermal control of electronic equipment [AIAA PAPER 72-269] 11 p1740 A72-25210

Engine ignition electronic system for triggering detonators in Aeros aeronomy satellite blastoff and release devices, discussing prototypes acceptance tests 11 p1610 A72-25803

Criterion selection and minimum margin search for optimization of complex electronic circuit parameters described by mathematical models 11 p1612 A72-26736

Dynamic systems as models for electronic measuring instruments computerized development and design 12 p1791 A72-27579

Electronic fringe counter with CdS cell photosensors, dc bridge and strip recorder for interferometric applications 12 p1792 A72-27762

Petron high voltage hybrid junction field effect J-FET/ devices for direct replacement of vacuum tubes in unchanged circuits 13 p1928 A72-28431

Method to obtain optimal efficiency gyroamplifier circuits with short waveguide selector by prior grouping of electronic oscillators 13 p1928 A72-28799

Transistorized electronic equipment with delay line for optimal filtration of PSK signals 13 p1930 A72-29047

Contact potential difference effects on lubricant film thickness in electronic equipment joints, noting molecules orientation in electric field 13 p1930 A72-29052

French quality assurance of electronic components, discussing organizational links with international bodies 14 p2174 A72-30848

Mathematical model for computation of electronic circuit drift reliability and circuit production yields, discussing operational parameter allowance 14 p2091 A72-31165

Book on electricity and electronics for aerospace vehicles covering theoretical foundations, measuring instruments, batteries, generators, motors, radio receivers and transmitters, navigation equipment, autopilots, etc 15 p2182 A72-31511

Liquid crystal structure, physical properties, discussing electronics applications and technical development trends 15 p2291 A72-31594

Mathematical models for electromagnetic interference in electronic equipment, discussing nonlinear circuit analysis 15 p2201 A72-32568

Electronic equipment shielding against electromagnetic radiation and circuit protection against unwanted electrical signals 15 p2209 A72-32570

Therapeutic electromedical equipment hazards due to electromagnetic interaction, considering implantation and simulation of human body 15 p2191 A72-32572

High intensity sound effects on electronic equipment and components in aircraft noise environment, noting whisker diode and printed circuit board damage 15 p2209 A72-32621

Electronic displays - Conference, London, February 1972 15 p2181 A72-32631

Electronic circuit reliability prediction model with statistical dependence for detailed failure modes 16 p2371 A72-33345

Computerized calculation of electronic circuit and equipment reliability and quality control, presenting task examples and printout form 16 p2368 A72-33347

Synchronizing electronic equipment for digital computers input graphic data recording fidelity improvement ensuring proper timing of set and reset pulses 16 p2367 A72-34018

Electronic Components Conference, 22nd, Washington, D.C., May 15-17, 1972, Proceedings. 17 p2527 A72-34676

Dc power supply for military electronics applications, describing circuit design for well regulated and filtered output dc voltage from various ac or dc sources 17 p2497 A72-34708

Radiation-hardened components, circuits and systems. 18 p2665 A72-36308

High reliability electronic components; International Conference, Toulouse, France, March 6-10, 1972, Proceedings 18 p2668 A72-37101

Standardization and quality assurance of electronic devices on the national and European levels 18 p2743 A72-37129

European co-ordination activities with particular reference to the Space Components Co-ordination Committee. 18 p2743 A72-37130

Qualification procedure for high reliability electronic part requirements for noncontinuous production 18 p2744 A72-37134

A time-frequency high performance collision avoidance system. [ONERA, TP NO. 1091] 19 p2830 A72-37764

Book - Solid state electronic devices. 20 p2907 A72-39024

Space shuttle environmental temperature control-life support system program changes, discussing air cooled electronic equipment, cryogenic stores, crew size and mission duration [ASME PAPER 72-ENAV-18] 20 p2895 A72-39159

Digraphs application to electronic linear networks analysis, developing computer program 21 p3024 A72-40992

Drift of amplification factor and its effects in a tri-electrode electron gun. 21 p3033 A72-40995

Effect of feedback and protective circuits on the reliability of electronic equipment 22 p3158 A72-42118

Implementation status of the Omega Navigation System. 22 p3203 A72-42945

Technical and economic processes representation of radioelectronic equipment synthesis optimization using elementary random magnitudes involving output parameters deterioration rates and fabrication tolerances 23 p3269 A72-43442

Stochastic coder electronic circuit for random numbers conversion into electrical voltages and vice versa, noting compactness and low cost 23 p3273 A72-44460

Book - Electronic integrated systems design. 23 p3274 A72-44475

ELECTRONIC EQUIPMENT TESTS

Electrical and electronic measurement and test instrument - Conference, Ottawa, June 1971 02 p0200 A72-12476

Digital computer automated test equipment and procedures for remote sensors and electronics for scanning celestial sphere for X rays prior to spacecraft launch 02 p0200 A72-12479

Computer simulation techniques in aerospace ground equipment design for maintenance testing of avionic systems 03 p0329 A72-14196

Low temperature liquid bath tests for IC environmental reliability, monitoring wire bonding, metallization, surface contamination, sealing and die bonding 03 p0337 A72-14296

- Computerized modular automatic test equipment for commercial airliner avionics device performance, discussing data handling ability and cost effectiveness
06 p0796 A72-18250
- Autonomous threshold elements diagnostic tests and verification control, noting cascade, pyramidal and branching schemes
06 p0785 A72-18303
- Low energy scanning electron beam gun with retarding field mode for microelectronic device evaluation
10 p1446 A72-23936
- Electron microbeam testing for large microcircuit arrays, using analog voltage signal injection into isolated contact and digital voltmeter readout
10 p1446 A72-23938
- Power transistor thermal cycling ratings and fatigue testing under operating conditions
10 p1447 A72-24011
- Spacecraft electronic equipment design criteria for maintainability and installation, discussing mockup zero g demonstration tests of new packaging concepts [AIAA PAPER 72-235]
10 p1487 A72-24445
- Onboard localization of aircraft electrical equipment failures, using list checkout, automatic indication and dynamic programming method
11 p1578 A72-26895
- Integral diode cell for solar arrays compared with bypass configuration, discussing design, advantages and electrical performance test data
12 p1757 A72-28031
- OMEGA receiver with digital solid state circuits for remote unmanned platform positioning, discussing ship to shore tests and design features
13 p1925 A72-29184
- Autonomous threshold elements diagnostic tests and verification control, noting cascade, pyramidal and branching schemes
13 p1934 A72-30071
- Software models to test operating conditions of logic nets, discussing application to network faults diagnostics
15 p2203 A72-31749
- Multi-environment reliability test program for airborne electronic systems under simulated temperature, humidity, vibration and shock conditions
15 p2215 A72-32616
- Electric measurement and defect localization in monolithic IC elements by incorporating test structures
15 p2212 A72-32759
- Survey of current component reliability problems and methods for prevention.
18 p2668 A72-37102
- Zero overhead testing relationship to software requirements, testing dynamic accuracies, LSI product types and function and parametric speeds related to product lines
18 p2664 A72-37109
- Department of Defense Reliability Analysis Center.
18 p2676 A72-37131
- High burnout gallium arsenide Schottky barrier diodes.
19 p2770 A72-37259
- High level E-field susceptibility measurement problems and techniques.
20 p2906 A72-38981
- Design, operation and testing of integrated STOL flight control system, noting approach accuracy and passenger comfort improvement
21 p3080 A72-40292
- A survey of the costs of hermetic packaging and testing microcircuits.
22 p3161 A72-43175
- Optimal cost effective sequencing model for component reliability tests, applying to complex electronic equipment
24 p3467 A72-44654
- Ranking the reliability of two designs by Monte Carlo techniques.
24 p3383 A72-44655
- An interactive approach for the generation and verification of test sequences in a logic system
24 p3382 A72-44662
- The problems of reliability growth and demonstration with military electronics.
24 p3384 A72-44670
- ELECTRONIC FILTERS**
- FM communication system multifilter phase lock loop state equations derivation from phase model, predicting noise improvement characteristics by analog and digital simulation
01 p0044 A72-10328
- Noise reduction in pulse width modulated converters with rms voltage values digital readout, using active or passive filters methods
03 p0331 A72-13557
- Orthogonal 2-port network impedance transforming properties and applications to harmonic oscillators and filters
04 p0502 A72-15521
- Five layer resonant transparent semiconductor device structures for microwave amplifiers, reactive elements, low current rectifiers and filters
08 p1139 A72-21059
- Polynomial filter design with three layer RC distributed elements and operational amplifiers, investigating active elements effects on response
09 p1290 A72-23354
- Binary split phase FSK signal noncoherent detection by multiple predetection filtering, noting probability of error per bit
10 p1437 A72-24686
- Transfer function sensitivity characteristics comparison of doubly terminated LC filters with active cascade and inductance simulation schemes
10 p1452 A72-24801
- Computerized filter design, discussing frequency analysis and synthesis programs for quadrupole eigenmodes and transfer function
11 p1604 A72-26089
- Multifilter detection system with phase autocorrelator, discussing design based on correction detection probability vs mismatch between signal and filter central frequencies
11 p1597 A72-26315
- Electronic filters realization by error function minimization, discussing parameter space algorithmic search and complex plane optimization methods
11 p1606 A72-26550
- Signal filtration algorithms and parameter estimation in additive non-Gaussian noise background by conditional Markov process theory
12 p1783 A72-27633
- Nonlinear resonating correlator with orthogonal filters, considering cut-off frequency of ergodic random process with constant power spectral density
14 p2090 A72-31125
- Binomial electronic filter design for nonnegative impulse transient response to obtain fast rise times via in-line pole-zero configuration
18 p2672 A72-36053
- Near optimum digital phase locked loops.
21 p3038 A72-40871
- Voltage generalized-immittance converter synthesis with RC circuits for obtaining current transfer function proportional to square of s with application to filter design
22 p3140 A72-42303
- An approach for generation of second order RC-active filters.
23 p3276 A72-43863
- ELECTRONIC LEVELS**
- U ELECTRON ENERGY**
- U ENERGY LEVELS**
- ELECTRONIC MODULES**
- NT MICROMODULES**
- Analog matrix, input data and procedure for AI frame and CU-clad printed circuit board module thermal resistance analysis using ECAP program
01 p0035 A72-10380
- General purpose electronic modular units for human factors research bioinstrumentation, considering digital and analog computers, logic modules and interface and auxiliary equipment
01 p0048 A72-10569
- Microwave module circuit design for airborne phased array radar with distributed power generation, reception and phase shift functions, considering performance, reliability and cost
01 p0028 A72-10660
- Integrated receiver module for satellite transponders, including tunnel diode amplifier, Schottky barrier mixer, Gunn oscillator and low pass filter
01 p0041 A72-10701
- Floating point cellular logic multiplier with variable dynamic range suitable for scientific satellites, missiles, desk calculators and cellular computers
04 p0499 A72-15208
- Cellular electronic logic circuit planar array representing objects inertial motion, applying to traffic control, image processing and artificial intelligence
06 p0779 A72-17496
- Computerized modular automatic test equipment for commercial airliner avionics device performance, discussing data handling ability and cost effectiveness.
06 p0796 A72-18250
- S band module with Gunn diode oscillators in series connection used as phased array radar 250 W power sources with efficient heat sink
06 p0789 A72-18476
- Integrated systems approach to computer simulation with functional modules to achieve control processor independent expansion and optimization
07 p0951 A72-20331
- Single-channel-per-voice-carrier transmission system application to data communication and small earth station operation, discussing modular design and performance
07 p0948 A72-20494
- Medium scale integration (MSI) modules for arithmetic section in small, medium and process computers, emphasizing carry-lookahead procedure
13 p1926 A72-30053
- Electric power supply systems for satellites, discussing packaging standardization of electronic circuits modules
13 p1900 A72-30096
- FRAM /failure rate appraisal machine/ concept and application for modular electronic and elec-
- tromechanical assemblies environmental cycling tests, noting technical and economical effectiveness
14 p2093 A72-31169
- Heat flux nondestructive inspection methods for laminate and sandwich structures and electronic components
15 p2232 A72-31322
- Computer aided thermal design of LSI module packs for forced convection air cooling, using modal conductance matrix method
16 p2368 A72-33195
- Mathematical model for reliability analysis of modularly redundant electronic systems with unequal failure rates for operating and standby units
16 p2398 A72-33344
- Airborne flight test data acquisition system modular design to provide digital readings from monitoring transducers analog signal
16 p2364 A72-33645
- Computer thermal analysis of hybrid microcircuits.
17 p2521 A72-34679
- Hybrid LSI logic modules for aerospace.
17 p2527 A72-34683
- Modularized digital controller for closed loop systems using MOS, MSI and LSI components
17 p2521 A72-34703
- Microelectronic module application to LSI set for implementation of digital filters, division and square root operations, polynomials, matrix computations, etc
17 p2522 A72-34704
- Modular avionics computer design concept to permit tailoring for diverse applications via microprogramming
17 p2524 A72-35581
- Numerical control component insertion for missile IC electronic module, tabulating producer-user survey data for designs usage and machine tools
17 p2532 A72-35923
- Millimeter-wave solid-state exciter-modulator-amplifier module for gigabit data-rate.
19 p2771 A72-37267
- An all solid-state MIC transmit-receive module.
19 p2771 A72-37268
- Production of prototype hybrid micro-electronic modules using thin film substrates.
20 p2908 A72-39493
- Missile guidance electronic packaging and module design for circuit protection against X rays, gamma radiation and nuclear blast damages
20 p2909 A72-39766
- Disk and toroidal solid state computer storage cell arrays without boundary cells, comparing read- and write-time characteristics with conventional organizations
20 p2910 A72-39966
- TCE-71A area navigation system based on modular design with provision for 20 waypoints parameter storage, describing computer, control display and automatic data entry units
21 p3079 A72-40278
- Parallelized algorithms for computer solution of spanning tree, distance and path problems on cellular array of identical modules containing memory and combinational logic
22 p3157 A72-43023
- Bistable trigger stages composed of digital multiplexer with IC logic modulus replacing NAND or NOR circuits
23 p3267 A72-43990
- Reliability of modular computer systems with varying configuration and load requirements.
24 p3383 A72-45673
- ELECTRONIC PACKAGING**
- Thermal control methods for high density packaging, discussing cooling techniques for hybrid circuit consisting of semiconductor chips and/or thin film components
03 p0337 A72-14293
- Circuit application consideration in selecting design, materials, processes and packaging for IC component reliability
03 p0337 A72-14295
- Variable conductance heat pipe technology for overcoming thermal resistance barrier in electronic package design
04 p0596 A72-15227
- Planar coax micropackaging of minicomputers for aircraft navigation and military systems, noting environmental tests
05 p0632 A72-15772
- Subminiature TV camera using hybrid packaging techniques and digital circuitry for full EIA composite video output format and 450 TV/HR resolution capability
09 p1316 A72-23599
- Failure mode control in plastic packaged IC for screening and quality assurance
10 p1447 A72-24010
- Spacecraft electronic equipment design criteria for maintainability and installation, discussing mockup zero g demonstration tests of new packaging concepts [AIAA PAPER 72-235]
10 p1487 A72-24445

- Schottky barrier gate FET design, device packaging and low noise characteristics 12 p1788 A72-27294
- Automatic electrostatic contour welding of IC microcircuit metallic casings, using contact and electrode voltage feedback signals 13 p1963 A72-28921
- Electric power supply systems for satellites, discussing packaging standardization of electronic circuits modules 13 p1900 A72-30096
- Low power TTL IC in plastic and hermetic packages tested for reliability via critical dc parameters measurement in initial and post-stress states 14 p2091 A72-31168
- Screen printed large thick film multilayer interconnection board assemblies for electronic packaging, discussing fabrication and feasibility 16 p2368 A72-33194
- Advances in LSI technology. 17 p2527 A72-34569
- A study of the heat flow and thermal instabilities in high power hybrid integrated circuits. 17 p2527 A72-34678
- Computer-aided thermal design of LSI packages. 17 p2527 A72-34681
- Failure analysis of plastic and ceramic packaged IC, describing plastic encapsulants chemical removal and radiographic failure detection procedures 17 p2528 A72-34707
- Monoplastic solid encapsulant for p-n-p and p-n-p silicon planar passivated signal transistors 17 p2528 A72-34715
- Plastic packages for complex microcircuits. 17 p2528 A72-34717

Dielectrophoresis force measurements and wedge shaped capacitor separation properties in satellite zero gravity conditions 04 p0549 A72-14988
- Erythrocyte hemolysate cataphoresis studies of human hemoglobin changes during stepwise adaptation to high mountain conditions 09 p1266 A72-22880
- Macaca nemestrina monkey organ tissue concentrations of lactic dehydrogenase (LDH), creatine phosphokinase and aldolase, with electrophoretic determination of LDH isozymes 13 p1906 A72-29861
- Platelet electrophoretic mobility response to adenosine diphosphate (ADP) in patients with coronary artery disease 15 p2183 A72-31283
- ELECTROPHOTOMETERS**
Soviet monograph on variable stars observation covering photographic photometry, photoelectric ob-

servation, image processing devices and computer techniques

02 p0279 A72-12122

Upper atmosphere twilight optical inhomogeneities relation to noctilucent clouds, using electrophotometry methods

06 p0807 A72-17933

Combined photoelectric-photographic and plethysmographic technique for continuous measurement of rabbit ear vein diameter and tissue volume changes

09 p1273 A72-23443

Metal lines and dwarf stars study by photoelectric photometry based on narrow passbands

10 p1538 A72-24230

Photoelectric scans of M supergiant alpha Ori and carbon stars from 3400 to 11,000 Å, obtaining dominant spectral features

10 p1548 A72-24967

Photoelectric observation of beta Scorpii occultation by Jovian satellite Io, noting Fresnel diffraction effects

10 p1548 A72-24969

Multichannel area stellar photometer using photosensitive cell array for individual photoelectron counting, applying to autoguidance

11 p1631 A72-25690

Secondary scattered light component of tropospheric twilight from electrophotometric observations, comparing with upper atmospheric scattering

13 p1954 A72-30070

Narrow-band photoelectric photometry of the peculiar Wolf-Rayet eclipsing binary CV Serpentis.

17 p2617 A72-35732

Procedure for the calibration of photoelectronic components in the IR spectral range

18 p2693 A72-37005

Rocket-borne Cassegrain optic stellar electrophotometer for early star observations in 1300-2000 Å region

19 p2796 A72-37585

Photoelectric photometry of close visual binaries

19 p2866 A72-38499

Design and testing of a nine-channel photometer

19 p2804 A72-38500

The employment of a novel Quantacron photomultiplier for increasing the sensitivity of older flame photometers in the near IR

20 p2927 A72-39697

Signal-to-noise ratio of a photodetector with a virtual cathode

21 p3055 A72-40802

High precision stellar electrophotometer design, using two channel single photomultiplier photometer and digital computer for statistical atmospheric noise damping

21 p3056 A72-41447

Figl astrophysical observatory design and instrumentation, describing solar radiation insulation, computerized data reduction, area scanning photoelectric photometer and Cassegrain spectrograph

22 p3178 A72-42541

A photoelectric study of Messier 81.

22 p3229 A72-42975

The physical properties of the Jovian atmosphere inferred from eclipses of the Galilean satellites. II - 1971 apparition.

24 p3435 A72-44689

ELECTROPHOTOMETRY

Photoelectric UVB photometry for galactic cluster NGC 7039 region stars, discussing MK spectral classifications and peculiar A stars

10 p1545 A72-24827

Lunar eclipse of 25 September 1965, observing penumbra densities and isophotes in B and V spectral regions by photoelectric photometry

14 p2161 A72-30915

Mercury diameter measurement by photoelectric Hertzprung method during transit on 9 May 1970

15 p2312 A72-32091

Photoelectric photometry of binary VV Pup with 3-sec time resolution, suggesting qualitative model from eclipses identification

15 p2314 A72-32369

Photoelectric transit observations of Saturn and Mars, showing culmination in universal ephemerides time

19 p2862 A72-37987

Pressure-scanned echelle grating plus Fabry-Perot stellar spectrophotometer.

21 p3053 A72-40609

Triaxial mount for electrophotometric observations of satellites during their transit into the shadow of the earth

23 p3290 A72-44040

ELECTROPHYSICS

NT ELECTRO-OPTICS

NT MOLECULAR ELECTRONICS

Influence of irradiation by 1.2-MeV electrons on the electrophysical properties of p-Si single crystals grown in a hydrogen atmosphere

21 p3098 A72-41686

ELECTROPHYSIOLOGY

HIS bundle electrocardiography for arrhythmia studies, discussing conducting tissue potential recording, ventricular delay and block site determination and electrophysiological effects of drugs

02 p0157 A72-11473

Canine and human ventricular myocardium microelectrophysiological studies of postextrasystolic T wave change relation to cellular repolarization and contractile potentiation magnitude

02 p0157 A72-11474

Receptor activity control from clinical physiological and electrophysiological observation data analysis, noting central nervous system role and feedback and self adaptation capabilities

02 p0157 A72-11543

Fish electroreceptor system morphology, physiology and evolution, considering electric current action, peripheral coding activity and central subsystems

02 p0157 A72-11545

Spinal reflexes through electric stimulation of gastrocnemius and soleus human leg muscles, attributing increased tendon reflex amplitudes to gamma motoneurons hyperactivation

04 p0467 A72-14704

Neuroelectric signal recognition system with computerized compensation for variations due to small random changes, slow trends and interference potentials

04 p0481 A72-15253

Human male gonadotropin secretion relation to sleep stages, using electrophysiologic recordings and radioimmunoassay techniques

05 p0620 A72-17128

Electrophysiology for auditory temporal masking mechanism study of cat cochlear nucleus and inferior colliculus single neurons

05 p0620 A72-17175

Electrophysiological responses to maximum exercise in healthy humans from polarcardiographic display of heart vector changes

07 p0916 A72-18891

Electrophysiological, neurophysiological, metabolic, vegetative, psychological, chemical and pathological aspects of sleep, noting disturbance and wakefulness mechanisms for various clinical disorders

09 p1264 A72-22223

Multichannel oscillograph for real time biomedical studies of LF physiological processes

09 p1270 A72-22881

Mathematical, physical and engineering aspects of electro- and magnetocardiography, noting heart field nondipolar properties and heart vector determination difficulties

09 p1273 A72-23414

Peripheral afferent input to monkey cortical efferent zones of distal forelimb muscle control, using single microelectrode for intracranial stimulation and cellular discharge recording

09 p1267 A72-23583

Single lateral geniculate neuron recording during receptive field-centered flashing spot variations for intensity response function comparison with optic neurons in cats

10 p1427 A72-25177

Human electrophysiological changes during perceptual isolation from EEG, EMG, vertical eye movements and electrodermal measurements

12 p1771 A72-27484

Electrical components of cardiac and skeletal muscle impedance, calculating rectangular stimulating current mean value

13 p1908 A72-28461

Functional organization and neurophysiological mechanisms of return corticothalamic system in anesthetized cats, showing axon terminal presynaptic depolarization

13 p1902 A72-28762

Electrophysiologic data acquisition by multiple dipole type of inverse electrocardiographic procedure based on model data, noting favorable and unfavorable dipole array configuration

13 p1909 A72-28997

Electrocardiography and magnetocardiography to determine flux and vortex sources respectively of heart electrical activity impressed current density

13 p1909 A72-28998

Lower body decompression effects on ECG, showing heart rate increase, R and T amplitude changes and heart electric axis displacement

14 p2074 A72-30383

Electric field projections in contrast to voltage as working quantity for frontal plane ECG leads

15 p2188 A72-31766

Weightlessness effects on animal voluntary motor activity and wakefulness from brain and muscle area electrical activity recordings during ballistic flight

16 p2355 A72-33548

An automatic measuring and recording system for clinical electro-oculography.

19 p2759 A72-37400

Role of afferent and efferent connections in the formation and reproduction of trace processes in man

21 p3001 A72-40807

Patterns of spontaneous and reflexly-induced activity in phrenic and intercostal motoneurons.

21 p3003 A72-41462

Morphological and electrophysiological analysis of afferent receptor connections in cerebellar cortex, discussing fast conducting, diffuse reticular and inferior olive fiber paths

21 p3004 A72-41674

Electrophysiological analysis of defense reflex and unconditioned reaction and conditioned signal analyzers in nodal mechanisms of functional system /afferent synthesis, decision making, correction, etc/

21 p3004 A72-41675

Electrophysiological investigation of the excitation and inhibition processes in the auditory cortex

22 p3148 A72-43165

Electrophysiological analysis of limbic-reticular interaction during the orientating reflex

23 p3257 A72-44081

Preprocessing of nerve pulse sequences for analysis by digital computer

23 p3261 A72-44349

Comparison of the vectors of the ventricular depolarization and repolarization of man during immersion in a standing position

24 p3372 A72-44924

ELECTROPLATING

Electrical resistance and thermal joint conductance measurements at perfect contact interfaces from electroplating, soldering and explosive bonding [AIAA PAPER 72-19]

05 p0666 A72-16859

Cermet coating with enhanced microhardness by Ni electroplating with fine corundum particles, presenting optimum electrolytes

09 p1318 A72-22527

Push-pull magnetic amplifier circuit operation as variable polarity dc source for electroplating applications

11 p1603 A72-25279

Thin film Cu-Cd solar cell electrochemical plating potential and solution composition effects on copper sulfide surface layer formation and cell efficiency

12 p1855 A72-28008

ELECTROPOLISHING

Metal surface smoothing during electrochemical dissolution prior to polishing, involving electrolyte diffusion processes or semiconductor oxide film formation

11 p1640 A72-26259

ELECTRORETINOGRAPHY

Conduction velocity groups in cat optic nerve from antidromic responses recorded in peripheral retina and area centralis

03 p0315 A72-13621

Eye movement control device for electronystagmography, describing construction, line drawing and basic circuits

03 p0319 A72-13724

Retinal ganglion cell spikes timing in mammalian retina, using electroretinography and computer analysis

06 p0762 A72-17721

Human dark adaptometric visual threshold recovery and electroretinograms in response to double light flashes, using Fourier analysis of oscillatory potentials

07 p0916 A72-19024

Intraelectroretinographic analysis of light signal spatial summation at different retinal nerve levels in frogs

11 p1585 A72-26454

Landolt ring radioactive plaque night vision tester comparison with electroretinography and Goldmann-Weekers dark adaptometry apparatus from special tests of night blind patients

12 p1777 A72-28332

Electroretinographic illumination potentials dependence on extracellular chloride ion concentration in isolated frog retina

15 p2186 A72-32491

Electroretinographic evidence for a photopic system in the rat.

17 p2500 A72-34878

Intraocular noise - Origin and characteristics.

18 p2651 A72-36605

The electrical activity of the isolated frog retina in buffered chloride-deficient Ringer's solution

22 p3147 A72-42987

Component analysis of electroretinogram in dark and light adapted sheep eye, noting rod and cone receptor potentials and transient and dc responses

23 p3261 A72-44382

Sensitivity of the human ERG and VECG to sinusoidally modulated light.

23 p3258 A72-44383

ELECTROSEISMIC EFFECT

U ELECTRIC CURRENT

U SEISMIC WAVES

ELECTROSLAG REFINING

Electroslag and vacuum remelted maraging steel rolling contact, investigating fatigue life as function of lubricant film thickness/surface roughness ratio

12 p1816 A72-28109

Lower oxide mechanism in reduction-oxidation reactions during Ti steels electrosmelting with slag and gas phases

14 p2112 A72-30158

ELECTROSTATIC CHARGE

Solids static electrification models based on solid state physics, considering contact, deformation and cleavage charging processes

02 p0269 A72-12552

Electrostatic charging mechanisms leading to streaming current generation in moving fluids, considering initial discharge, electrode change and mobility charging current

02 p0261 A72-12553

Size determination for stationary space charge clouds in streaming media from theoretical model of tanks filled with electrostatically chargeable inflammable fluids

02 p0261 A72-12554

Electrically charged low mobility droplet production by water vapor condensation on to gaseous ions from aircraft static discharger

02 p0231 A72-12556

Fluidic devices electrostatic modulation, verifying jet deflection analytical model by experimental results

07 p0913 A72-18819

Imagewise electrostatic charge buildup in electron beam recording, determining trajectories by Runge-Kutta method

10 p1479 A72-23929

Controlled nuclear fusion plasma stabilization by electrostatic forces, reducing applied magnetic field

11 p1694 A72-25791

Thunderstorms physical mechanisms of charge generation and separation, considering correlation between lightning and precipitation

13 p1995 A72-29873

Electrostatic charge on an aircraft and lightning striking the aircraft

21 p2994 A72-40171

Static electricity in fueling of supajets.

21 p3040 A72-41375

Upper limits on vertical fluxes of 1/3 e and 2/3 e charged quarks in cosmic rays from observations with scintillation counter telescope

21 p3101 A72-41450

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration

24 p3368 A72-44979

ELECTROSTATIC ENGINES

Electrostatic surface and bulk ionization ion thrusters current densities for propulsive and working fluid utilization efficiency

05 p0705 A72-16772

Electrostatic ion thruster and hydrazine monopropellant systems for communication satellites, noting weight savings

17 p2596 A72-34265

Electrostatic surface ionization and electron bombardment ion thrusters current densities for propulsive and working fluid utilization efficiency

17 p2597 A72-35275

ELECTROSTATIC EROSION

U SPARK MACHINING

ELECTROSTATIC FIELDS

U ELECTRIC FIELDS

ELECTROSTATIC GYROSCOPES

Angular velocity vector active damping during spin-up of electrically supported gyro with mass-unbalance readout, using Euler equations of motion

07 p0986 A72-19691

Multidimensional function extremum for sectioned resonator type gyroamplifier efficiency optimization

08 p1172 A72-22050

Rotor displacement measurement of electrostatic gyroscope by capacitive sensor using spherical electrode

15 p2236 A72-31899

USAF development of electrostatic gyros for inertial air navigation, noting flight tests and associated airborne digital computer

17 p2578 A72-35558

Deposition of dielectric films on the electrodes of an electrostatic gyroscope

21 p3059 A72-41814

Development and testing of a precise marine electrostatic gyroscope.

24 p3401 A72-44638

ELECTROSTATIC PLASMA

U PLASMAS [PHYSICS]

ELECTROSTATIC PRECIPITATORS

Particle mass monitor system based on piezoelectric microbalance combined with electrostatic precipitator collector, considering applications to air quality monitoring, laboratory aerosol research, process control, etc

[AIAA PAPER 71-1100] 01 p0067 A72-10548

ELECTROSTATIC PROBES

Nonisothermal theory of electrostatic probe in weakly ionized plasma, giving I-V characteristics

01 p0108 A72-10238

Double Langmuir probe, microwave cavity and upper hybrid frequency measurements of plasma density in hydrogen, helium, neon and argon

01 p0110 A72-11190

Electron thermal boundary layer effects on Langmuir probe measurements in subsonic cold plasma flow

01 p0071 A72-11191

Plasma electron density depletion by electron attaching gas introduction, deriving electrostatic probe technique

02 p0264 A72-12261

Plasma ion temperature and neutral collision frequency determination by Langmuir probes

02 p0264 A72-12262

Transient response of negatively biased Langmuir probes for planar and cylindrical plasma sheaths under large amplitude pulsed potentials

[AD-739787] 03 p0361 A72-13924

Electron energy derivation from contaminated Langmuir probe, explaining E region high temperature

05 p0654 A72-16007

Electron temperature measurement error elimination with radio frequency Langmuir probe in low density plasma, measuring floating potential

05 p0694 A72-16049

Current collection characteristics of flush mounted electrostatic probes on sharp flat plate in ionized hypersonic flows

05 p0696 A72-16814

Plasma ambipolar diffusion coefficient and electron density determination from thermal density fluctuations cross spectrum based on Langmuir probe measurements

06 p0864 A72-18536

Multichannel modular spectrometer with electrostatic analyzers for low energy electron and proton flux measurement

07 p0988 A72-19954

Spectrometers with electrostatic analyzers alternating with shielding and suppressing gratings for low energy electron flux measurement

07 p0988 A72-19955

Collisionless ion beam plasma simulation of ionospheric plasma with Langmuir interpretation of density and frequency agreement

07 p1044 A72-20367

Potential distribution in positive ion sheath around plane Langmuir probe immersed in plasma

08 p1215 A72-22074

Second derivative measurement of Langmuir probe characteristics for electron energy distribution functions in nonstationary plasmas by sample and hold technique

09 p1359 A72-22654

Reference electrode area and floating potential influence in Langmuir probe measurements of plasma density and temperature

09 p1311 A72-23229

Flat plate Langmuir probe measurement of electron temperature in plasma with elliptically anisotropic velocity distribution, discussing probe orientation effects

09 p1366 A72-23578

Ionospheric and magnetospheric electric field measurements by rocket, satellite or balloon-borne electrostatic probes or by plasma drift methods

10 p1473 A72-24529

Electrostatic and electron temperature probes compared during ionospheric rocket soundings, noting lower ionosphere discrepancies due to surface contamination

11 p1633 A72-26102

Langmuir probe techniques for plasma measurement in ion thruster hollow cathode discharge configurations

[AIAA PAPER 72-416] 11 p1706 A72-26166

Electron bombardment ion thruster ESKA 18-P thrust measurements by critically loaded columns suspension instrument and simultaneous beam diagnostics by electrostatic probes

[AIAA PAPER 72-433] 11 p1707 A72-26176

Plasma ion temperature determination by measuring transient current to cylindrical Langmuir probe under collision free conditions

[AD-739815] 12 p1851 A72-27399

Cylindrical electrostatic analyzers in rocket and satellite instruments for space low energy charged particles measurements

13 p1960 A72-29842

Comparative electron density measurements in positive low pressure He discharge column with Langmuir probes and microwave interferometer and cavity

14 p2105 A72-30808

Surface contamination effect on electron temperature measurement using rocket-borne Langmuir probe in lower ionosphere

15 p2236 A72-31926

Direct display plasma density and temperature meter with Langmuir probe for ionospheric observation

15 p2231 A72-32338

End effect in current response of highly negative cylindrical Langmuir probe in collisionless plasma flow, discussing use for ion temperature determination

15 p2288 A72-32418

Symmetrical and asymmetrical electrostatic probes for RF plasma discharge data, describing feedback

network, stabilization, generation and electron temperature profiles

15 p2288 A72-32509

Langmuir probe susceptance- and conductance-voltage measurements via in-phase and quadrature component plots as function of applied dc potential

15 p2241 A72-32515

Contaminated Langmuir probes LF admittance measurements in mercury vapor plasma, considering dielectric relaxation in insulating layers

15 p2241 A72-32516

Airborne electrostatic probe for cloud droplet size measurement, calculating flow distribution and particle trajectories

16 p2390 A72-33150

Langmuir probe dc and second harmonic characteristics measuring system, describing switching circuitry

16 p2392 A72-33608

Low density and pressure air plasma electron density simultaneous measurements by Langmuir and RF capacitance probes

16 p2438 A72-33836

Electrostatic flush disk and cylindrical probe construction and electron density data during atmospheric reentry from beryllium sphere experiments

[AIAA PAPER 72-691] 16 p2346 A72-34051

The geometric factor of a cylindrical plate electrostatic analyzer.

17 p2553 A72-34639

Application of the floating-potential probe for studies of low-frequency oscillations in a plasma

17 p2588 A72-34755

Measurements of the plasma sheath capacitance using a simple tunnel diode oscillator.

17 p2558 A72-35847

Probe measurements of a cesium plasma in a simulated thermionic energy converter.

18 p2647 A72-36206

Transition from sheath-convection to saturation-current behaviour of a Langmuir probe in a flowing plasma.

18 p2715 A72-36688

Determination of the plasma density in a collisionless plasma.

18 p2717 A72-37041

An appraisal of the single Langmuir probe technique in the study of afterglow plasmas.

19 p2840 A72-37456

Mathematical model for perfectly absorbing spherical Langmuir probe in collisionless plasma, obtaining plasma density and ion temperature

19 p2842 A72-38524

Exact solution of the problem of measuring the parameters of a dense plasma with the aid of a spherical probe

19 p2842 A72-38534

Fixed-bias floating double-probe technique with simple Langmuir-probe characteristics.

19 p2804 A72-38592

Effect of plasma resistance on electron temperature measurement by means of an electrostatic probe.

19 p2804 A72-38593

Effect of angle of incidence on the response of cylindrical electrostatic probes at supersonic speeds.

20 p2926 A72-39602

A technique for recording Langmuir probe characteristics in afterglow plasmas.

21 p3051 A72-40212

Measurement of ionic parameters of a cesium plasma with the help of a grid probe with a cooled collector

22 p3211 A72-42645

Method of solving boundary-value problems for a Langmuir probe in a dense plasma

22 p3213 A72-43119

ELECTROSTATIC PROPULSION

NT ION PROPULSION

Current and future rocket and spacecraft propulsion systems based on chemical propellants, nuclear thermoelectric, electrostatic and electromagnetic power generators

05 p0705 A72-16743

Electrostatic rf ion thruster development, including power conditioning and control units

07 p1054 A72-19600

Electrostatic ion thruster theoretical model, deriving ionization rate density as function of discharge current

[AIAA PAPER 72-432] 11 p1707 A72-26175

Electrostatic rocket exhaust materials deposits effects on solar cells optical, thermal and electrical performance characteristics, using optical thin film theory

[AIAA PAPER 72-447] 11 p1578 A72-26184

Duration test and performance of annular colloid thruster, noting specific impulse increase and electrostatic vectoring

[AIAA PAPER 72-483] 11 p1710 A72-26209

ELECTROSTATIC SHIELDING

Active shielding against radiation in space using charged particle deflection by electric and magnetic fields [CERN-71-16] 02 p0258 A72-12076

Spectrometers with electrostatic analyzers alternating with shielding and suppressing gratings for low energy electron flux measurement 07 p0988 A72-19955

Transistor damage by electrostatic discharges, noting charge stored by humans and protection techniques 08 p1140 A72-21064

Nonideal dense plasma properties, discussing electrostatic shielding, many particle clusters, phase transitions, metallization and electrical conductivity [AIAA PAPER 72-414] 11 p1695 A72-26164

Shielded silicon gate complementary MOS integrated circuit. 24 p3385 A72-44972

ELECTROSTATIC WAVES

Similarity theory for electrostatic and magnetic collisionless shocks at zero ion temperature, using numerical simulation results 01 p0106 A72-10029

Electrostatic waves in longitudinally magnetized plasmas with random electron charge distribution and applied magnetic field, finding phase characteristics 01 p0106 A72-10128

Electrostatic wave-particle interactions in inhomogeneous collisionless plasma, calculating resonant distribution function, charge densities and trapping periods 01 p0107 A72-10136

Monochromatic waves propagating in uniform magnetoplasma, considering resonant interaction with electrostatic approximation 01 p0107 A72-10138

Periodic inhomogeneous plasma electrostatic waves, considering dispersion relation and longitudinal oscillations 01 p0107 A72-10141

Diffuse plasma resonances in space interpreted by wave-particle nonlinear interaction in weakly turbulent plasma, considering electrostatic electron cyclotron wave instability 02 p0265 A72-12366

Longitudinal electrostatic waves in perpendicular collisionless plasma shock, investigating stability 05 p0698 A72-17021

Plasma models of topside ionosphere, investigating electrostatic wave propagation 05 p0698 A72-17022

Dispersion relation for electrostatic plasma waves propagation at frequencies near electron cyclotron harmonics in warm magnetoplasma, determining refractive index curves 05 p0698 A72-17023

Electrostatic shift and broadening of Landau resonance by particle-wave interaction in turbulent plasmas 05 p0700 A72-17231

Electrostatic waves perturbed distribution function behavior in presence of forced oscillations, considering Maxwellian ion and electron plasma waves excited by dipole 06 p0855 A72-17508

Electrostatic wave propagation and damping in thermally ionized collisionless alkali plasma, determining electron and ion densities, electron temperature and ion distribution function 06 p0856 A72-17521

Langmuir wave-caused electron plasma distribution function deformation, discussing particle trapping effects 06 p0858 A72-17542

Electrostatic hf wave propagation in one dimensional collisionless plasma, describing electron trapping and oscillations and resonance-produced sidebands 06 p0858 A72-17544

Electrostatic field excitation in plasma layer by plane transverse electromagnetic wave as function of incident angle 06 p0862 A72-18339

Contrastreaming electron beams instability in finite length one dimensional system with stationary neutralizing ion background, analyzing electrostatic waves space/time development by numerical simulation 06 p0865 A72-18540

Electrostatic wave instabilities at harmonics of electron cyclotron frequency in hot and cold anisotropic plasma with Maxwellian temperature distribution 07 p1039 A72-18824

Electrostatic oscillations of multiveLOCITY electron streams in hot inhomogeneous plasma 07 p1046 A72-20502

Electrostatic oscillations enhancement in magnetized plasma by hf electromagnetic waves, noting detection by light scattering 07 p1046 A72-20539

Electrostatic ion wave Landau damping in magnetic field of Ar plasma QP machine 08 p1213 A72-21250

Stability of steady large amplitude whistler wave supported by weak electrostatic waves in collisionless magnetoplasma, constructing distribution function via Vlasov equation solution 08 p1213 A72-21258

Electrostatic ion wave stability in electrodynamic channel flow from approximate numerical solution of dispersion equations 08 p1211 A72-21305

Electrostatic plasma wave conversion into electromagnetic waves, calculating dispersion relation at all wavelengths for perpendicular propagation mode 08 p1137 A72-21989

Electrostatic longitudinal waves propagation and detection in isotropic collisionless hot electron plasma, calculating Landau dispersion curve and damping 09 p1359 A72-22794

Large amplitude electrostatic ion acoustic shock production by superposing pulsed photoionized plasma slab on dc background 09 p1360 A72-22871

Stable large amplitude high Mach number ion acoustic shocks in collisionless plasma, obtaining electron density as function of time 09 p1364 A72-23445

Electron-neutral collisions effects on wavelength and damping of electrostatic waves propagation in Ar and He plasmas 10 p1525 A72-25143

Grid produced LF electrostatic perturbations propagation and damping in near isothermal plasma, discussing ion ballistic contributions to ion acoustic waves 11 p1692 A72-25520

Trapped particle induced frequency shift in response of electrostatic wave to adiabatic and sudden excitations, obtaining distribution functions and nonlinear dispersion relation 11 p1693 A72-25566

Strong pitch angle scattering of energetic electrons in presence of electrostatic waves due to ion cyclotron instability above midlatitude ionospheric trough region 11 p1714 A72-26398

Plasma parametric instabilities excitation by radio waves in ionosphere, noting LF ionic and HF electrostatic wave growth 11 p1628 A72-26767

Parametric decay instability of Langmuir and acoustic plasma waves induced by incident electromagnetic wave near plasma frequency, noting application to ionospheric instabilities 13 p2012 A72-29126

Enhanced damping of electrostatic wave primary mode due to combination scattering from plasma electron density oscillations 13 p2018 A72-29854

Isolated finite amplitude electrostatic oscillations production in thin plasma layer between two parallel metallic surfaces in magnetic field 14 p2136 A72-30302

Electrostatic cyclotron harmonic waves propagation in inhomogeneous electron plasma slab, deriving RF electric field 14 p2138 A72-30397

Experimental investigation of electrostatic cyclotron harmonic waves excited in inhomogeneous plasma column with axial magnetic field by RF capacitor field 14 p2138 A72-30398

Lagrangian complex amplitude derivation for monochromatic electrostatic wave in unmagnetized collisionless plasma, investigating nonlinear Landau damping effects on instability 14 p2140 A72-30399

Nonlinear coupling of wave modes in cold magnetized plasma, applying to electrostatic wave transformation in connection with solar type 3 radiation 15 p2283 A72-31431

Dispersion relationship for electrostatic instability associated with electron beam trapped in magnetic mirror of magnetosphere, taking into account nonuniformity of magnetic field 15 p2283 A72-31434

HF electrostatic instabilities driven by electron-ion relative drift velocity across external magnetic field for inhomogeneous plasma, noting Landau damping role 16 p2433 A72-32809

Langmuir wave coupling in inhomogeneous plasma due to combined density gradient and external HF electric field 16 p2436 A72-33654

Kinetic theory of waves in hot, low density plasma. 17 p2591 A72-35161

HF electrostatic wave instability induced in plasma by electron beam, noting resonant frequency Doppler shift 17 p2591 A72-35369

Turbulence of electrostatic electron cyclotron harmonic waves observed by Ogo 5. 17 p2549 A72-35599

Dispersion curves of mixing mode between electrostatic and electromagnetic waves propagating perpen-

dicularly to ambient magnetic field for hydrogen plasma with Maxwellian velocity profile 19 p2839 A72-37335

A satellite survey of vector electric fields in the ionosphere at frequencies of 10 to 500 hertz. I - Isotropic, high-latitude electrostatic emissions. 19 p2768 A72-38742

Low frequency electrostatic waves in a turbulent plasma. 21 p3092 A72-41221

Resonant interaction of an electrostatic wave with electrons in a current sheet. 22 p3169 A72-42008

Isolated finite amplitude electrostatic oscillations production in thin plasma layer between two parallel metallic surfaces in magnetic field 23 p3317 A72-43204

Plasma frequency, hybrid frequency and harmonic gyrofrequency electron resonances due to electrostatic waves in ionosphere observed with topside sounders aboard rockets and satellites 23 p3263 A72-43513

Stationary solitary, snoidal and sinusoidal ion acoustic waves. 23 p3320 A72-43520

Wave growth in a strongly turbulent plasma. 24 p3430 A72-45568

ELECTROSTATICS

Electrostatic analyzer for very low energy particles, calculating trajectories 03 p0392 A72-14055

Electrostatic field calculation for magnetron/injection/electron gun with wedge shaped cathode 06 p0826 A72-18404

Electrostatic focusing field inhomogeneity/gradients/ effects on high frequency electron-wave interaction processes in linear beam backward wave oscillator tube 07 p0952 A72-18845

Electric field voltage effect on dispersion of electrostatically atomized liquids and hydrocarbon fuels with and without gamma irradiation 09 p1350 A72-22546

Computation procedure for crystal lattice electrostatic strain energy derivatives 09 p1372 A72-23228

Electrostatic adhesive devices for zero-g intra/extravehicular activities, noting applications to astronaut and cargo maneuvering, worksite restraint, tool and equipment tiedown, etc 10 p1431 A72-24650

Ion and electron temperature ratios in hot plasma, discussing energy relaxation, heating and cooling effects and electrostatic confinement by ambipolar diffusion 10 p1524 A72-25032

Electrostatic force for rotational torque production, applying to motor design 11 p1603 A72-25743

Ultrasonic wave generation in solids using transducer composed of high rigidity dielectric/polypropylene/ between two electrodes 18 p2691 A72-36402

Solution of mixed boundary value problems in heterogeneous media for multiply connected regions of complex shape by a structural method 20 p2946 A72-39469

Weak electrostatic turbulence observation in earth bow shock magnetic field gradient, suggesting cyclotron drift instability role 23 p3342 A72-44523

Radar observations of equatorial spread F in a region of electrostatic turbulence. 23 p3286 A72-44528

ELECTROSTRICTION

Electrostrictively induced stimulated Brillouin light scattering effect on atmospheric depolarization, obtaining solutions for steady state and transient conditions [AD-736316] 03 p0367 A72-13429

Coupled electroelastic vibrations of piezoelectric cylinders from polycrystalline electrostriction theory, taking into account mechanical and dielectric losses 14 p2132 A72-31117

ELECTROTHERMAL ENGINES

NT ARC JET ENGINES
NT PLASMA ENGINES
NT RESISTOJET ENGINES

Electrically heated thermal decomposition hydrazine thrusters, discussing propellant supply pressures compatibility and thrust levels [AIAA PAPER 72-451] 11 p1708 A72-26188

Electrothermal thruster supersonic convergent-divergent nozzle performance with lithium vapor propellant, predicting exhaust velocity by isentropic flow equations [AIAA PAPER 72-453] 11 p1708 A72-26189

ELEKTRON SATELLITES

Earth outer radiation belt and unstable radiation zone dynamics during IQSY magnetically quiet and disturbed period based on Elektron-series satellite data 22 p3218 A72-42211

ELEKTRON 4 SATELLITE

Positive H, HE and O ions in exosphere from mass spectrometers mounted on Elektron 4 satellite
01 p0053 A72-10368

ELEMENT ABUNDANCE

U ABUNDANCE

ELEMENTARY EXCITATIONS

NT EXCITONS
NT MAGNONS
NT PHONON BEAMS
NT PHONONS
NT PLASMONS

Quasi-particle decay rates by electron-electron scattering in superconductors, noting effect on states tunneling density
08 p1217 A72-21595

Ordering degree effect on elementary excitation spectrum gaps in nonideally ordered solid systems, obtaining Green functions for valence and conduction electrons calculations
10 p1527 A72-24982

ELEMENTARY PARTICLE INTERACTIONS

NT ELECTRON CAPTURE

NT MESON-NUCLEON INTERACTIONS

NT NUCLEON-NUCLEON INTERACTIONS

Free atoms and radicals elementary reactions, passing parent molecules through electrodeless rf or microwave discharge at various pressures and temperatures
03 p0320 A72-13392

CP-noninvariance model of baryon interaction and charge asymmetry of universe, postulating kappa particle /neutral massive fermion/
06 p0875 A72-17275

Book on theory of fully ionized plasmas covering Coulomb systems equilibrium and nonequilibrium states, charged particle radiation and interactions with EM fields
13 p2011 A72-29098

The self-consistent test-particle approach to relativistic kinetic theory.
20 p2955 A72-40013

ELEMENTARY PARTICLES

NT ALPHA PARTICLES
NT ANTINEUTRONS
NT ANTIPARTICLES
NT ANTIPROTONS
NT BARYONS
NT BETA PARTICLES
NT BOSONS
NT CONDUCTION ELECTRONS
NT DEUTERONS
NT ELECTRONS
NT FAST NEUTRONS
NT FERMIONS
NT FREE ELECTRONS
NT GRAVITONS
NT HADRONS
NT HIGH ENERGY ELECTRONS
NT HOT ELECTRONS
NT LEPTONS
NT LIGHT BEAMS
NT MESONS
NT NEUTRINOS
NT NEUTRON BEAMS
NT NEUTRONS
NT NUCLEONS
NT PHOTOELECTRONS
NT PHOTONS
NT PIONS
NT POSITRONS
NT PROTONS
NT QUARKS
NT RECOIL PROTONS
NT SOLAR PROTONS
NT TACHYONS
NT THERMAL NEUTRONS

Duality concept in elementary particle physics, discussing pion-nucleon scattering, amplitude exchange degeneracy, Regge poles and Veneziano models
05 p0692 A72-17077

Elementary particle theory and field equations in cosmological spaces, using four dimensional conformal imbeddings
06 p0891 A72-18421

Cosmic ray experiment jet shower event with possible new particle existence
11 p1712 A72-25867

ELEVATION ANGLE

Target azimuth and elevation estimation by four beam cluster, analyzing angle estimation accuracy as function of SNR by computerized Monte Carlo simulation
07 p0941 A72-19304

Multipath angle error reduction using multiple radar target signal processor with angle tracking of wave fronts
08 p1134 A72-21408

Elevation angle and range error correction equations for satellite tracking data processing with assumed spherical tropospheric refractivity
09 p1281 A72-23510

FM/CW interferometric ionosonde used for interferometric direction finding, computing incident azimuth and elevation from baseline array phase differences
09 p1281 A72-23514

GMD-1 tracking system for mesoscale wind data, minimizing elevation angle errors in jet stream CAT program by upwind release of rawinsonde
10 p1508 A72-25080

HF backscatter pulse signal incidence elevation angle measurements based on amplitude ratio of two antennas with different vertical patterns
12 p1783 A72-27779

SHF signal propagation through troposphere at low elevation angles, comparing fading measurements in winter and summer
15 p2194 A72-31550

Circumzenithal instrument for latitude and longitude determination and star transits observation through almucantar
15 p2238 A72-32122

A nomogram for look angles to geostationary satellites.
19 p2869 A72-37298

Directional far IR emission from sunlit lunar surface, determining brightness temperature as function of observer and sun elevation angles and surface parameters
22 p3226 A72-42537

Multimoded components wavefront arrival angle from measurements of signal induced in linear array, discussing numerical calculation from linear equation solution and polynomial roots
23 p3264 A72-43601

ELEVATIONS [DRAWINGS]

U DRAWINGS

ELEVATORS [CONTROL SURFACES]

Aircraft flight characteristics for landing approach by spoiler-elevator deflection coupling, considering pitch, flight path angle and speed
16 p2343 A72-33423

ELLIPSES

Free flexural vibrations of an elliptical plate with simply supported edge.
23 p3352 A72-44121

ELLIPSOIDS

Motion of asymmetric body of revolution in rotating liquid, calculating drag on ellipsoid
02 p0204 A72-12175

Convex figures in mathematical geodesy, applying function h for ellipse and ellipsoid of revolution
03 p0351 A72-14328

Scattering function of ellipsoidal gas molecules with translational and rotational degrees of freedom
04 p0552 A72-14629

Stress-strain state of thin ellipsoidal shell with central stiffened hole, using small elastoplastic deformation theory
04 p0588 A72-15050

Optimization problems in gravitational attraction, considering homogeneous ellipsoids interaction and free particle simple harmonic motion
06 p0851 A72-18740

Loxodrome and geodetic line azimuths relationship on ellipsoid of revolution
08 p1158 A72-21159

Axissymmetric deformation of hollow elongated elastic ellipsoid, using Lamé equilibrium equations
09 p1400 A72-22708

Ellipsoidal plasmoid equilibrium revolution frequency and potential energy and stability in external hf fields
09 p1362 A72-23204

Galaxy formation process in expanding universe from study of hydrodynamic equations for rotating gaseous ellipsoid with uniform density
11 p1717 A72-25865

Mixed variational formulation and finite element method for axisymmetric cylindrical, conical, spherical and ellipsoidal shells
12 p1879 A72-27195

Elastic wave diffraction by rigid ellipsoid, deriving scattering cross section for incident P wave from integral equation solution
16 p2426 A72-33659

Approximate calculation of the magnitude of the momentum during the passage of a material particle past an elongated homogeneous biaxial ellipsoid
17 p2618 A72-35812

Numerical analysis of three dimensional steady laminar free convection boundary layer due to heated ellipsoid, solving flow equations
19 p2881 A72-38394

Approximate calculation of the magnitude of the momentum during the passage of a material particle past an elongated homogeneous biaxial ellipsoid
17 p2618 A72-35812

Numerical analysis of three dimensional steady laminar free convection boundary layer due to heated ellipsoid, solving flow equations
19 p2881 A72-38394

ELLIPSOMETERS

Reflection electron diffraction and ellipsometric studies of oxidation of niobium crystal surface, showing oxygen absorption in lattice and oxide film formation stages
07 p1017 A72-19944

Corrosion tests by ellipsometer, discussing apparatus design and bare metal surface and thin film properties
08 p1172 A72-22110

ELLIPTIC DIFFERENTIAL EQUATIONS

Ellipsometric characterization of oxide films obtained by heat treatment of Al in air and vacuum, noting interface disruption due to gamma crystal penetration into coated metal
10 p1495 A72-24078

Cs adsorption on W and Ti observed by combination of ellipsometry, Auger spectroscopy and surface potential difference measurements, noting sticking coefficient and coverage
16 p2442 A72-33833

Ellipsometry for the study of equilibrium cesium adsorption.
17 p2552 A72-34599

ELLIPTIC DIFFERENTIAL EQUATIONS

Elliptic and parabolic partial differential difference equations solution using modified random walk Monte Carlo technique
01 p0093 A72-10858

Elliptic equations solutions for electromagnetic effect in MHD rectangular channels using relationship to Laplace equations
03 p0397 A72-13995

Rotationally symmetric force free magnetic field boundary value problem, using linear elliptic differential equation
03 p0400 A72-14352

Rotationally symmetric static incompressible infinite conducting plasma elliptic differential equation reduction to boundary value problem
03 p0400 A72-14353

Nonlinear elliptical equations first boundary value problem, presenting approximation capacity and convergence of straight line procedure
04 p0538 A72-14625

Asymptotically diagonal systems for variational expansions applied to elliptic partial differential equations, estimating convergence rate
04 p0540 A72-15374

Regularity of nonuniqueness solutions of degenerate elliptic-parabolic partial differential equations systems without compactness requirement for associated differential quadratic form
06 p0839 A72-17627

Elliptic restricted three body problem, using motion anomaly as independent variable
06 p0877 A72-17654

Triangular points linear stability in elliptic restricted three body problem, determining exponents by convergent iteration method
06 p0878 A72-17664

Numerical methods for parabolic, hyperbolic and elliptic flows in fluid mechanics and heat transfer, considering finite element method
07 p1097 A72-18795

Dynamic programming for optimal stochastic control problem with Gaussian shot noise involving parabolic or elliptic differential equation in unbounded domain, discussing iterative solution and quasi-linearization
07 p1027 A72-19292

Axissymmetric potential theory boundary value problems for iterative elliptic differential equation in rectangle and half strip
08 p1198 A72-20961

Boundary points regularity for second order elliptic equation with continuous coefficients
08 p1198 A72-21165

Dynamic programming application to computer algorithm construction for elasticity theory two dimensional problems, solving boundary value problem for elliptic differential equation
08 p1243 A72-21235

Coordinate sequences construction method for complex regions and various boundary conditions, deriving closed form solution to elliptical equation
08 p1200 A72-21702

Finite element method for approximate solution of elliptic partial differential equations on unbounded domains, proving error bounds
11 p1675 A72-25271

Russian book on approximate solutions of boundary value problems covering elliptic differential equations and Ritz, moment, straight lines and probability modeling methods
11 p1677 A72-26065

Error bounds for finite element methods and approximation with piecewise polynomials for elliptical differential equations solution
11 p1679 A72-26956

Asymptotic approximation methods for boundary layers in singular perturbation theory for linear elliptic partial differential equations in two independent variables
13 p1940 A72-28425

Generalized solution regularity of arbitrary order quasi-linear elliptic equations, indicating continuity conditions of variational problems
13 p1987 A72-30001

Uniqueness, existence and smoothness theorems for elliptic dynamic boundary problems in elasticity theory
15 p2329 A72-32286

First eigenvalue and first eigenfunction properties of linear elliptic partial differential equation in varia-

tional form with discontinuous coefficients, considering Dirichlet problem

16 p2416 A72-33502

Coefficients ratio modulus invariance of elliptic differential equation for conformal mapping of definition domain

16 p2417 A72-34011

Finite element method matrices in least squares approximation and elliptic partial differential equations, discussing numerical stability properties

17 p2573 A72-34219

Book - Approximation of elliptic boundary-value problems

17 p2574 A72-34622

On the numerical solution of elliptic partial differential equations by the method of lines.

17 p2575 A72-34647

Existence of multiple solutions for nonlinear elliptic boundary value problems.

17 p2575 A72-34936

Solvability of the first boundary value problem of higher-order elliptic quasi-linear equations with discontinuous and rapidly increasing Orlicz-class coefficients

17 p2577 A72-35842

Stability of difference schemes for elliptic equations in terms of the Dirichlet boundary conditions

18 p2705 A72-36801

Boundary value problem for degenerate equations with discrete coefficients

19 p2824 A72-37317

Modified Ritz method to find optimum boundaries to elliptic systems governed by Laplace or Poisson equation

19 p2826 A72-38246

A boundary value problem for a mixed-type equation with two perpendicular parabolic-degeneration lines

19 p2828 A72-38630

Fractional steps method of difference schemes for approximate numerical solution of parabolic and elliptic initial boundary value problems

20 p2945 A72-39327

Solution of a problem with a skew derivative in a half-space for certain elliptical equations

20 p2945 A72-39393

Book - Functional analysis and approximation theory in numerical analysis.

20 p2946 A72-39729

Solutions to certain elliptic equations, which are positive in the vicinity of an isolated singular point

20 p2947 A72-39867

Limiting equation for solving a boundary value problem in a multilayer domain

21 p3074 A72-40258

A regularity theorem for linear second order elliptic divergence equations.

22 p3198 A72-41947

Functional method investigations of imbedding theorems for random weight spaces of high order irregular elliptic equations with uniform boundary conditions

23 p3307 A72-43222

Existence and uniqueness theorems of elliptic equations with eigenfunction exponential decrease at infinity and 2m order self adjoint differential operator in n-dimensional Euclidean space

23 p3307 A72-43223

Estimates of derivative solutions of linear non-homogeneous elliptic-type equations of arbitrary order near the domain boundary in the L2 metric

23 p3309 A72-44041

Riemann boundary value problem with a shift in multiply connected regions for quasi-linear elliptic systems of equations

24 p3419 A72-45260

ELLIPTIC FUNCTIONS

Variational perturbation problem solution in power series form for elliptic functional description of elastic continuous medium state by Euler-Lagrange equations

02 p0259 A72-12233

Unified design charts for communication systems filter networks with inverse Chebyshev and elliptic function responses

06 p0787 A72-18400

Autonomous two body system described by nonlinear differential equations of motion, obtaining free relative vibration solution in terms of elliptic functions

06 p0849 A72-18694

Boundary value problem solution for first order elliptic system on plane

09 p1341 A72-22488

Spectral continuity conditions of linear operator, noting application to elliptical operators approximation in separable Hilbert spaces

10 p1505 A72-24070

Regularized first order algorithm for ideal resonance problem in solar system, considering solution in terms of elliptic functions

20 p2968 A72-39199

Exact expressions for the properties of the zero-pressure Friedmann models.

22 p3229 A72-42890

The superharmonic functions in the axiomatics of M. Brelot associated with a degenerate elliptical operator

24 p3418 A72-44825

A priori estimates at the boundary for solving second-order elliptic integrodifferential equations

24 p3420 A72-45648

ELLIPTIC INTEGRALS

U ELLIPTIC FUNCTIONS

ELLIPTICAL CYLINDERS

Gravity effects of infinite homogeneous elliptical cylinder segment

03 p0351 A72-14330

Zero moment theory application to cylindrical shells with elliptical geometries under constant transverse loads

07 p1087 A72-18992

Time varying external pressure effect on creep collapse of long thin walled quasielliptic cylindrical shell, taking into account elastic deformation

08 p1245 A72-21612

Microwave attenuation factor of TE and TM modes in hollow conducting elliptical waveguides, using first order perturbation formula for calculation

10 p1451 A72-24594

Torsional waves far-field structure in infinite elastic rod of elliptical cross section, using perturbation method

13 p2057 A72-29004

Harmonic waves propagation in infinite transversely isotropic cylinder with elliptic cross section, obtaining solution in terms of Mathieu functions

14 p2163 A72-30190

Unsteady torsional creep of multiply connected cylindrical rod with arbitrary cross section, calculating elliptic rod relaxation

15 p2327 A72-31744

Laplace equation for homogeneous magnetic field perturbation by superconducting elliptical cylinder and by two parallel circular cylinders

23 p3313 A72-43779

ELLIPTICAL ORBITS

NT APHELIONS

NT APOGEES

NT INTERPLANETARY TRANSFER ORBITS

NT PERIGEEES

NT PERIHELIONS

NT TRANSFER ORBITS

Transfer from high elliptical to circular orbit, using successive spacecraft braking maneuvers in planetary atmosphere with incomplete information

01 p0130 A72-10927

Precessing elliptical orbits stability in Schwarzschild field

04 p0571 A72-14559

Plane periodic oscillations of solid body on elliptic orbit, characterizing stability of motion equations periodic solutions

04 p0582 A72-14632

Extremum of satellite orbit perigee or apogee height in Hohmann transfer

05 p0713 A72-16006

Satellite attitude estimation on elliptic orbits by Kalman filters with periodic coefficients, demonstrating efficiency by earth pointing satellite using different instrumentation noise models

05 p0685 A72-16442

Earth satellite plane periodic oscillations damping with respect to center of mass in orbital plane during motion on elliptical Kepler orbit

05 p0730 A72-17030

Spin stabilized axisymmetric probe attitude deviation due to solar pressure in elliptic orbits

06 p0892 A72-17655

Nonspinning satellite earth-pointing attitude control for elliptic orbits using active regulation of pitch moment of inertia

08 p1204 A72-21605

Three body problem study of satellite capture by planets in elliptical orbits, deriving orbital elements in terms of mass ratio and planetary orbit eccentricity

12 p1865 A72-27096

Optimum elliptic orbit characteristics of planetary artificial satellite based on earth-planet-earth flight

14 p2151 A72-30472

Numerical integration method with recurrent power series for motion and variational equations of elliptic restricted three body problem

19 p2862 A72-38019

Improved criteria for hyperbolic-elliptic motion in the general three-body problem.

21 p3109 A72-41333

Analytic partial derivatives for estimating low-thrust parameters.

22 p3231 A72-42865

Jet stream formation from uniform distribution of grains in similar elliptical orbits, discussing models with numerical simulation

24 p3445 A72-45461

ELLIPTICAL POLARIZATION

Magnetoinic component with fluctuating elliptical polarization during wave reflection from F 2 layer, discussing suppression mechanism

01 p0028 A72-10593

Large amplitude linearly or elliptically polarized Alfvén wave propagation parallel to magnetic field, calculating nonlinear Landau damping rate

01 p0111 A72-11227

Elliptical polarization and depolarization coefficients for monochromatic radio waves reflected from F 2 ionosphere using Stokes parameters

05 p0656 A72-16241

Receiver arrangement for polarization selection based on multiplication of heterodyne-converted and amplified signals taken from dual-input antenna receiving elliptically polarized field

05 p0635 A72-16332

Polarization changes with distance from microwave antenna in near and intermediate zones for circularly and elliptically polarized fields in square and rectangular apertures

05 p0635 A72-16335

Elliptically polarized ionospheric source generation of short period geomagnetic disturbances at earth surface

08 p1153 A72-20719

Transfer of polarized radiation in a stellar atmosphere.

17 p2605 A72-34533

Polarization offset angle effect on isochromatic fringe visibility of holographic photoelasticity recordings, noting reference beam ellipticity adjustment

18 p2733 A72-36360

A nomogram for determining the phase difference of an elliptically polarized wave

18 p2663 A72-37219

Elliptically polarized ionospheric source generation of short period geomagnetic disturbances at earth surface

19 p2791 A72-38347

ELLIPTICITY

Rotating earth oblateness and equator ellipticity influence on near-equatorial synchronous satellite behavior, using nonlinear mechanics asymptotic method

03 p0436 A72-13835

ELONGATION

Saint Venant problem for orthotropic almost cylindrical beams, investigating elongation, bending due to couple and transversal loads and torsion due to torque

04 p0594 A72-15747

A simple method for determination of the elongation before reduction of area using a 100-deg cone indentation

18 p2676 A72-37098

EMBOLISMS

NT AEROEMBOLISM

Precordial monitoring for pulmonary gas embolism and decompression bubbles.

19 p2762 A72-38710

Relation of the electrocardiogram to hemodynamic alterations in pulmonary embolism.

19 p2759 A72-38816

EMBRITTEMENT

Electron beam welding of W-base alloy to Ta-base alloy, avoiding Re induced embrittlement by pure Mo transition piece

06 p0821 A72-17710

High pressure hydrogen effects on austenitic stainless steel embrittlement, determining yield, tensile and fracture strength

07 p1011 A72-19479

Maraging steel embrittlement by titanium carbonitrides lattices separation during cooling, suggesting rapid quenching and plastic deformation temperature reduction

07 p1012 A72-19677

Long-time isothermal temper embrittlement in Ni-Cr-Mo-V steels, noting tensile ductility decrease and intergranular fracture

07 p1015 A72-19932

Environmental hydrogen embrittlement of Ti-Al alloy as function of test displacement rate and microstructure variation

07 p1016 A72-19933

Corrosion resistance decrease and embrittlement in Ni-Mo cermet alloys after heat treatment from electrical resistance measurement

07 p1017 A72-19965

Transition metals and alloys electron structure and packing defect energy theory, discussing crystal atomic interactions and brittle breakdown

07 p1049 A72-20148

Hydrogen embrittlement of stable austenitic Ni-Cu steel, observing intergranular decohesion in fractured specimens by microfractography, electron microscopy and X ray crystallography

07 p1021 A72-20485

Adsorption, corrosion and hydrogen embrittlement effects on crack formation in quenched carbon steels in active media, using tensile stress-rupture tests

08 p1190 A72-22183

Fe-Ni-C alloy mixed austeno-martensitic microstructure embrittlement, investigating mechanical properties after thermomechanical treatment

10 p1495 A72-24087

- Aerospace vehicle high tensile strength fasteners stress corrosion cracking and hydrogen embrittlement [AIAA PAPER 72-385] 11 p1653 A72-25407
- Carbon and oxygen distribution and content effects on Mo mechanical properties and embrittlement 11 p1666 A72-26878
- Chromium stainless steel fatigue life reduction due to embrittlement in gaseous hydrogen atmosphere at room temperature, noting alleviating effect of atmosphere contaminants 13 p1979 A72-29484
- Dispersion hardening/aging/ effect on embrittlement of Ni base alloys in cold worked pipes during heat treatment 15 p2255 A72-31569
- Catalytic dissociation, hydrogen embrittlement, and stress corrosion cracking. 17 p2566 A72-34256
- Relation between hydrogen embrittlement and the formation of hydride in the group V transition metals. 18 p2700 A72-36578
- Strain rate, stress concentration and temperature effects on hydrogen environment embrittlement of metals 19 p2816 A72-37640
- Physical and metallurgical factors causing embrittlement and creep rupture life reduction determined by tests, discussing crystal and grain boundary deformation and notch effects 19 p2874 A72-37711
- Effect of residual elements on radiation strengthening in iron alloys, pressure vessel steels, and welds. 20 p2937 A72-39289
- Mercury embrittlement of age-hardened Cu-1.9 wt pct cobalt and Cu-3.6 wt pct titanium. 20 p2938 A72-39296
- Microcracks observed in hydrogenated niobium foil. 21 p3069 A72-41300
- Investigation of the kinetics of low-cycle fatigue of steels in a hydrogen atmosphere and in vacuum 22 p3195 A72-43161
- EMBRYOLOGY**
- Alpha-L-fucosidase, beta- and alpha-D-galactosidases and alpha-D-mannosidase activity changes in human placenta at various embryogenesis phases 02 p0163 A72-12294
- Histological examination of transverse acceleration stress effect on inner ear development of gestating rat embryos 07 p0923 A72-20446
- Energetic motor activity rule hypothesis for physiological mechanisms of certain ontogenesis patterns, suggesting motor activity as excess anabolism induction factor 09 p1264 A72-22225
- Embryogenesis of fertile chicken eggs in pure oxygen at reduced pressure 09 p1265 A72-22642
- Sperry neuronal specificity hypothesis for nerve cell connections formation between eye and brain during embryonic development, proposing systems matching theory 17 p2504 A72-35070
- Intravascular injection and histology studies of human embryonic and fetal choroidal vasculature development 19 p2755 A72-37398
- EMBRYOS**
- Inert gas effects on embryonic development. 22 p3145 A72-42744
- EMERGENCIES**
- Natural resources multispectral remote sensing for national emergencies, discussing various imaging techniques 02 p0212 A72-11828
- Emotional aspects of pilot performance under high stress in emergency situations, discussing psychophysiological training methods 05 p0623 A72-17098
- Psychophysiological potentials of pilots in simulated emergency situations, investigating motor reaction time, signal selection time, error number and type and processed information amount and rate 06 p0769 A72-18199
- Parameters affecting communication and rescue time constraints for emergency astronaut return from low earth orbits 09 p1395 A72-23155
- Lunar landing mission escape and rescue concepts, considering emergencies during earth orbit, translunar, lunar orbit, surface and rendezvous, transearth and earth reentry phases 09 p1396 A72-23157
- Terminal guidance systems and techniques application to manned space flight rescue operations, discussing emergency location and rescue spacecraft communication and guidance 09 p1396 A72-23158
- Emergency reentry manned spacecraft remedial concepts, mission constraints and system designs in terms of cost effectiveness 09 p1396 A72-23159
- Pilot survival probabilities under various conditions of high performance aircraft takeoff and landing accidents, suggesting emergency action guidelines for pilot training 10 p1428 A72-23732
- Magnetic compass use in instrument flight conditions, suggesting emergency procedures during aircraft system failures 15 p2238 A72-32212
- Flight mechanics aspects in space transportation system for international rescue, analyzing potential crises situations requiring emergency action 24 p3451 A72-45217
- EMERGENCY LIFE SUSTAINING SYSTEMS**
- Dynamic response index (DRI) minimization for personnel aircraft emergency catapult escape systems to reduce injury probability 08 p1112 A72-21576
- Lockheed ADP SR-1 ejection seat system for safe aircrew recovery under zero-zero, high Mach and altitude conditions, describing escape experiences with SR-71 aircraft 13 p1896 A72-28701
- Disposable emergency oxygen mask for air passengers based on continuous flow, phase dilution principle, describing altitude chamber tests with human subjects to study physiological responses 13 p1908 A72-28702
- Long range planning for the development of space flight emergency systems. 17 p2620 A72-34428
- EMISSION**
- NT BIOLUMINESCENCE
- NT CHEMILUMINESCENCE
- NT ELECTROLUMINESCENCE
- NT ELECTRON EMISSION
- NT FIELD EMISSION
- NT FLUORESCENCE
- NT HYDROXYL EMISSION
- NT INCANDESCENCE

- NT THERMIONIC EMISSION
- NT THERMOLUMINESCENCE
- NT X RAY FLUORESCENCE
- EMISSION SPECTRA**
- Spectral distribution of total continuous emission coefficient for LTE hydrogen plasma over 8000-16,000 K and 400-15,000 A ranges, observing Stark broadening 01 p0108 A72-10175
- Spiral galaxies radio continuum emission origin, discussing supernovae and relativistic electrons effects 01 p0131 A72-11006
- CH Cygni spectrum analysis in activity phase, discussing blue continuum, emission and UV absorption lines, radial velocity and stratification effects 01 p0131 A72-11008
- He emission line star G61-29, discussing spectral features and proper motion limits on maximum distance 01 p0133 A72-11095
- Cosmic soft X ray and UV radiation sources, discussing transition radiation emission in interstellar space 01 p0121 A72-11121
- Pulse widths formed by relativistic beaming pulsars effect on emission spectra 01 p0133 A72-11130
- Optical emission spectrum of Ba and CuO combustion products during nozzle expansion into vacuum 01 p0146 A72-11312
- Uranium arc plasma visible and near UV emission coefficients as function of U partial pressure and corresponding temperatures 01 p0112 A72-11337
- Uranium and tungsten plasmas emission and absorption properties at shock tube generated pressures of 3-48 atm and temperatures of 7,000-12,000 K 01 p0112 A72-11339
- High speed photographs of plasma emission spectra in UV and soft X radiation spectrum regions, discussing theory, design and operation of facilities 02 p0223 A72-11408
- Mountaintop high resolution spectral observations of diffuse isotropic submillimeter atmospheric and sky emission 02 p0274 A72-12194
- Active and quiet solar atmosphere models from OSO satellite data, presenting emission lines and continua from abundant elements 03 p0423 A72-13215
- Solar active regions and flares X ray spectroscopic data, observing ionized silicon emission lines 03 p0423 A72-13217
- Submillimeter wave stratospheric emission spectra measurement by aircraft- or balloon-borne phase modulated Fourier spectrometry, noting SNR and small errors 03 p0348 A72-13399
- Spectrum of low modulation frequencies of He-Ne laser radiation produced by motion of external reflector of matched and unmatched three-mirror resonators 03 p0368 A72-13666
- Fe XI to XV emission lines from transitions and isoelectronic spectra in manganese, chromium and vanadium 03 p0391 A72-13750
- Apparatus for emission spectroscopic studies on high density molecular jets excited by slow electron bombardment 03 p0392 A72-14054
- Wolf-Rayet type stars emission line variations from outer convective zone opening and matter ejection 03 p0439 A72-14243
- Emission spectrum and intensity variation of organic dye solutions excited by nitrogen laser pulsed radiation 04 p0529 A72-14655
- Molecular nitrogen dayglow emission in F region, noting volume emission rates, integrated overhead intensities and solar activity effects 04 p0518 A72-14959
- Markarian galaxies photometric observations, presenting emission line intensities and UV magnitudes 04 p0578 A72-15309
- Photoluminescence of Er cations in CdS, observing group I co-dopants sensitizing behavior and broad-band emission spectra 04 p0563 A72-15472
- Optical spectra of compact objects, reviewing emission line spectra of quasars 05 p0716 A72-16372
- Spectral energy distributions of peculiar galaxies and quasars by photoelectric spectrometry, observing emission lines strength 05 p0716 A72-16373
- Horizontally averaged nonthermal velocities determination in lower solar chromosphere, observing Doppler widths of weak rare earth emission lines in H and K wings 05 p0718 A72-16504
- Electron density profiles as function of position in enhanced coronal region from Ni XV and Fe XIII emission lines observation 05 p0719 A72-16517
- Quasar photoionization and emission line spectra, determining radiation/gas density 05 p0720 A72-16713
- Emission spectra of exploding copper wires in air and vacuum in IR, UV, visible and vacuum UV regions 05 p0691 A72-16991
- Terrestrial atmospheric effects on quasar red shift measurements, considering night sky emission lines and atmospheric window size limits 05 p0723 A72-17159
- Vertical extensive air showers at aircraft heights, constructing integral spectrum based on particle number 06 p0870 A72-17280
- Emission line of neutral carbon in solar spectrum at 1993.6 A from balloon-borne spectrography 06 p0876 A72-17566
- Atomic hydrogen 6300 A forbidden line emission altitude and intensity during predawn enhancement, using rotating photometer 06 p0806 A72-17644
- Be stars emission line profile broadening due to surrounding gaseous ring in circular motion according to Kepler law 06 p0880 A72-17892
- Spectral characteristics of Ar ion laser emission for determination of stability region, mode sequence and beat signal levels 06 p0826 A72-18009
- Temporal characteristics of emission line broadening in lasers with dispersive resonators for Nd ion activated phosphate glasses and disordered crystals 06 p0826 A72-18011
- Surface layer humidity correlation to height of atmosphere emitting in IR spectral region, determining water vapor content by recording earth radiation angular distribution 06 p0808 A72-18046
- Van der Waal broadening of shock excited emission lines at 5000 K for astrophysical applications 06 p0852 A72-18053

Ionospheric scintillations relationship to airglow emission spectrum at 6300 Å

07 p0974 A72-18895

Laser quantum theory for single mode steady state emission fluctuations and instability region with high density of excited atoms

07 p0999 A72-18910

Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field

07 p0999 A72-18911

Spectral composition of emitted radiation, emissivity and absorptivity of Venus atmosphere at high temperatures

07 p1068 A72-18933

Spontaneous emission from driven Doppler broadened gas of two level atoms radiating into free space, predicting power spectrum

07 p0940 A72-19194

Spectral characteristics and small signal gains of carbon monoxide laser, using optimum gas compositions

07 p1003 A72-19218

Neodymium-glass laser emission spectral and temporal correlations during Q switching by rotating prisms and passive shutter

07 p1006 A72-19633

Synchrotron emission source identification from spectral index dependence on frequency

07 p1059 A72-19807

Carbon like spectra and ground energy levels of Sc, Ti and V ions in 16-22 Å range, using vacuum spark source

07 p1037 A72-19833

Spectral distributions of laser emission as dynamic variables of electromagnetic field modes and active medium excitations, using perturbation theory

07 p1007 A72-20120

Galactic nucleus IR measurements in terms of forbidden NE II emission line at 12.8 microns

07 p1081 A72-20229

Coronal condensation of 10 September 1970, observing iron and calcium emission lines

07 p1082 A72-20297

Pulse rate and pumping power effects on emission spectra and I-V characteristics of multielement GaAs injection lasers

08 p1181 A72-20796

Emission dynamics of pulsed laser with optical delay line in resonator

08 p1181 A72-20797

Tago-Sato-Kosaka comet isophote picture of 5 February 1970, noting tail composition, photographic magnitude and emission spectrum

08 p1229 A72-20831

Shock wave properties in RR Lyra type star atmospheres, discussing high temperature region structure behind wave front and emission line profiles

08 p1229 A72-20841

Auroral emission rates for various transitions from cross section data and secondary electron spectra measurements

08 p1227 A72-21114

Spectroscopic observations and classification of luminous galactic nuclei with broad emission lines, discussing gas density, velocity and outflow and electron scattering

08 p1234 A72-21279

IR spectral emittance measurement with airborne spectrometer for geological mapping over Pisgah Crater/California

08 p1162 A72-22017

Nd smooth pulsed laser action with narrow spectral line and emission amplification from Nd doped phosphate and silicate glass rods

08 p1183 A72-22027

Nd glass absorption of flash pump emission energies with varying discharge parameters, Xe pressure and glass thickness

08 p1184 A72-22030

Wolf-Rayet stars identification in spiral galaxy M33/NGC 598/ from narrow band interference filter photographs, tabulating apparent magnitudes and emission indexes

09 p1382 A72-22281

Chemical bond effect on K emission spectrum of oxygen and fluorine

09 p1275 A72-22522

Pseudo-hemispherical properties applied to radiative transfer in absorbing-emitting medium involving specular directional surfaces

09 p1351 A72-22671

Multiconfigurational interactions in atoms with incomplete electron shells, identifying K-alpha satellite emission lines

09 p1357 A72-22837

Molecular X ray emission spectra interpretation based on singly ionized states observation by photoelectron spectroscopy and transition probability calculation

09 p1357 A72-22838

X ray emission bands related to K line intensity for iron group transition metals, using orthogonalized plane wave method

09 p1370 A72-22840

Rare earth elements outer electrons X ray and UV photoemission spectra interpretation by multiplet splitting of final state

09 p1371 A72-22844

Al alloys solid binary solution soft X ray emission spectra interpretation by rigid band and virtual bound state models

09 p1371 A72-22847

Soft X ray emission spectra from Al-Nb and Al-Pd alloys, deducing electron state density near Al ions

09 p1371 A72-22848

Pulsating polar auroral line emission spectra observation at 3914 and 5577 Å by rocket-borne photometers

09 p1301 A72-23262

Photoelectric Fabry-Perot measurements of M8 and M42 nebulae H alpha and forbidden N II emission lines profiles, determining temperatures and turbulent motions

09 p1390 A72-23528

Relative intensity of solar XUV emission lines of Li isoelectronic sequence ions, taking into account transitional collision strengths

09 p1391 A72-23532

Seyfert galaxies emission, absorption, IR and optical spectral characteristics, suggesting model with sharp forbidden and Balmer line outer region and broad wing core

10 p1532 A72-23885

Seyfert, N-type, compact and radio galaxies spectroscopic properties, noting two dwarf emission line galaxies as possible young galactic nuclei

10 p1534 A72-23896

Radio-emitting and radio-quiet quasar optical emission and absorption line spectra

10 p1534 A72-23897

Intense IR radiation from galaxies central regions, comparing power levels with galactic nuclei optical and radio emission

10 p1534 A72-23899

Hydrogen atom emission spectrum calculation in uniform rotating electric field, applying to charged particles collisions and Stark broadening of plasma H lines

10 p1514 A72-24039

CO Cameron system band intensity from measurements of equivalent widths of resolved rotational lines, using Doppler growth curve for line strength conversion

10 p1514 A72-24095

Electron impact excitation of nitric oxide in vacuum UV, measuring absolute cross sections for emission features

[AD-742536] 10 p1515 A72-24341

High resolution observation of stratospheric submillimeter thermal emission spectrum by helium-cooled InSb electron bolometer on board Comet 2E aircraft

10 p1476 A72-25023

WR hot stars CIII, NIV and OV emission spectra structure associated with excitation of 2pn and pd ion configurations

10 p1549 A72-25169

Iron emission spectrum in phase transformations and recrystallization study of austenitic and carbon steels under high temperature hardening

11 p1655 A72-25496

Paschen beta emission line equivalent width variation in IR spectra of omicron Ceti

11 p1716 A72-25679

Four-photon parametric frequency selection within broad stimulated emission lines during coherent light interaction, considering dye solution laser pumping

11 p1648 A72-26335

Laser emission spectrum broadening due to saturable dye filter bleaching, discussing amplitude and phase modulation contributions

11 p1649 A72-26341

Chemical laser with deuterium and nitrogen fluorides mixture, examining excited molecules emission spectra

11 p1649 A72-26351

Injection laser pulsed emission mode effect on spectral characteristics

11 p1650 A72-26359

Cometary spectra analysis, noting resonance fluorescence mechanism of emissions

11 p1722 A72-26433

Alpha particles effect on carbon dioxide laser output power and emission spectra, using uranium acetate as radioactive source

11 p1651 A72-26552

Emission spectra of exploding copper wires in air and vacuum in IR, UV, visible and vacuum UV regions

12 p1843 A72-27134

HD 4180 shell H lines width variations comparison with Be stars, noting thirty year period emission decrease followed by outer shell absorption

12 p1867 A72-27213

Instantaneous and averaged emission spectra of injection laser under spontaneous pulsation as function of operation mode and photon distribution

12 p1824 A72-27875

Multielement electron beam pumped semiconductor laser using emitting GaAs disks with vapor deposited dielectric mirror coatings

12 p1824 A72-27876

High temperature gaseous disperse flow radiation spectra photoelectric recording by DFS-8 spectrograph

12 p1812 A72-28116

Electron structure of Al atoms in alloys with transition metals obtained from emission spectra

13 p1973 A72-28492

Angular spectrum of second harmonic generation during two frequency interactions in KDP laser

13 p1969 A72-29524

Inner corona spectral data of 7 March 1970 solar eclipse, noting line half widths and emission line origin area relationship

13 p2042 A72-29535

Fourier transform spectrometer observation of IR coronal emission lines during 7 March 1970 solar eclipse from high altitude aircraft

13 p2042 A72-29538

Photographic polarimeter measurement of linear polarization of coronal emission lines during 7 March 1970 solar eclipse

13 p2043 A72-29547

Spectral radio observations of 7 March 1970 solar eclipse, noting McMath plages intense activity source flux characteristics and weaker source bremsstrahlung emission

13 p2044 A72-29551

Electron temperature and emission measures during solar X-ray flares, studying effects of gradual and rapid radiation flux increases

13 p2032 A72-29722

Vanadium emission spectra studies of energy band structure in vanadium silicides, showing p-subzone splitting

13 p1980 A72-29798

Upper atmosphere mm emission spectrum from aircraft observation, comparing with rocket and ground based data

13 p1923 A72-29963

Auroral emission spectrum intensity ratios for IBC 2 system observed via aircraft flown digital multichannel photometer

14 p2097 A72-30137

Auroral spectroscopic and excitation processes, discussing atomic oxygen production, emission ratios and electron energy spectrum, UV and IR emissions, composition and temperature measurements

14 p2098 A72-30138

Hydroxyl emission bands intensity, and vibrational and rotational temperatures sporadic and harmonic components in seasonal and diurnal variations

14 p2098 A72-30142

K beta emission spectrum of metallic Cr, discussing structural X ray analysis revealed cubic structure

14 p2116 A72-30414

Fe light emission for simulated meteor conditions, measuring ionization and spectral emission cross sections for Fe reactions with nitrogen and oxygen for 350-2000 eV

14 p2156 A72-30562

Small spectral width emission from dye laser with interference filter and quartz plate Fabry-Perot interferometer for spectroscopic investigations

14 p2110 A72-30674

Solar spectrum Mg I multiplet lines hyperfine structures, examining emission lines with Fabry-Perot and Fourier transform spectrometers

14 p2158 A72-30730

Interstellar medium physical conditions from 21 cm hydrogen emission line observations in direction of pulsars, using 25 meter Dwingeloo radiotelescope

14 p2159 A72-30744

Plasma emission spectrum of circulating and sealed carbon dioxide molecular laser, discussing concentration dependencies

14 p2110 A72-30786

First positive and first negative nitrogen emission excitation kinetic mechanisms, investigating shock tube measurements of nonequilibrium radiation

14 p2134 A72-30837

Calibrated thermal emission spectra under extreme temperature, surface reststrahlen and cloud conditions from Nimbus 4 IR spectroscopy

15 p2223 A72-31510

Submillimeter isotropic background limits of stratosphere emission spectrum, using aircraft-borne Michelson interferometer and Rollin far IR detector

15 p2265 A72-31626

Jovian synchrotron emission measurements by radioheliograph at 80 MHz, passing square law detector outputs through RC integrators

15 p2307 A72-31799

Graphite band structure investigated by secondary electron emission, observing electron transitions to higher excited states

15 p2260 A72-31856

Rocket-borne spectrometric measurement of small solar flare O VII and Ne IX resonance lines and 5 keV X-ray continuum emission, analyzing data via nonisothermal model

15 p2300 A72-31990

- Jupiter atmospheric greenhouse effect modeled by two layer emission, deriving temperatures from non-gray step function approximation of IR absorption 15 p2312 A72-32096
- K and L lines of X ray emission spectra of Ti in alloys with Nb, noting atomic structure change during alloy formation 15 p2259 A72-32701
- Hydroxyl emission sources classification from observed main line polarization and satellite lines 15 p2315 A72-32710
- High energy resolution spectrometric measurement of relative emission cross section for electron impact excited molecular nitrogen second positive system bands 16 p2428 A72-32922
- High resolution spectroscopic studies of high density molecular beam production and emission spectrum excitation, using Ebert-Fastie vacuum spectrometer 16 p2430 A72-33059
- K2 III star Arcturus far UV chromospheric emission line spectrum observation with rocket-borne spectrometer, identifying hydrogen L alpha and O I 16 p2453 A72-33136
- OSO 1 observation of 300 second oscillation in solar transition region and coronal extreme UV emission line intensity 16 p2453 A72-33137
- Coherent emission lines in visible spectrum from triply ionized Er in barium yttrium fluoride, discussing energy level transitions associated with various lines 16 p2401 A72-33387
- Planetary nebula M2-9 spectrum analysis, discussing IR excess, internal motions and Fe II emission lines 16 p2455 A72-33459
- Emission line star WRA 795 as optical counterpart of Cen X-3 occulting binary system 16 p2456 A72-33474
- Quasars and emission line objects red shift distribution using power spectrum analysis method 16 p2457 A72-33625
- High resolution radio observation of H II region W 51, noting compact components with emission measures agreement with recombination line data non-LTE analysis 16 p2457 A72-33684
- Energy level population and emission spectrum of C IV ion in planetary nebula with radiative excitation 16 p2458 A72-33688
- Chemical laser with deuterium and nitrogen fluorides mixture, examining excited molecules emission spectra 16 p2402 A72-33704
- Injection laser pulsed emission mode effect on spectral characteristics 16 p2403 A72-33712
- Instantaneous and averaged spiking emission spectra of injection laser under spontaneous pulsation as function of oscillation mode and photon distribution 16 p2404 A72-33984
- Flowing air glow discharge near IR emission spectrum as function of pressure, noting atomic lines 16 p2427 A72-34097
- Energy release mechanism during early universe expansion leading to distortion of relict black body spectrum, noting Comptonization effects 16 p2461 A72-34151
- Spectral characteristics of hot stars with emission lines, discussing Ba, Of, P Cygni, Wolf-Rayet and B type supergiant stars 16 p2462 A72-34183
- Photoionization models for the emission-line regions of quasi-stellar and related objects. 17 p2605 A72-34527
- ESRO 2 satellite observation of solar X-ray emission from active limb prominence, obtaining temperatures and emission measures as function of time 17 p2608 A72-35085
- Solar thermal radio burst temperature and emission measure determination from flux spectrum, noting consistency with radio observation 17 p2608 A72-35090
- Helium and H alpha emission relationship observation in 11 February 1970 solar flare from photometric reduction of filtergrams 17 p2599 A72-35117
- A comparison between the emission-line galaxies NGC 5253 and NGC 5408. 17 p2611 A72-35310
- Calibration of the flux density of Cassiopeia A and Cygnus A in the range 300-9375 MHz. 17 p2617 A72-35728
- Synchrotron emission source identification from spectral index dependence on frequency 17 p2602 A72-35731
- Narrow-band photoelectric photometry of the peculiar Wolf-Rayet eclipsing binary CV Serpentis. 17 p2617 A72-35732
- Ionization mechanisms for quiescent prominence He II 4686 line emission under coronal UV radiation and high temperature conditions 17 p2618 A72-35737
- Emission spectra of comet tail carbon monoxide molecular ion indicating constant or slowly varying electron transition moment 17 p2618 A72-35826
- The classification of transitions between levels of principal quantum numbers 3 and 4 in Fe IX to XVI and Mn VIII to XV. 17 p2586 A72-35834
- Galactic nebulae electron temperature and density from forbidden line emissions interpreted in terms of transition probabilities and collision strengths 18 p2723 A72-36090
- Bright nebulae near concentrations of high-velocity gas. 19 p2856 A72-37504
- Adhesion and transfer of PTFE to metals studied by Auger Emission Spectroscopy. 19 p2807 A72-37646
- Solar radio burst time profiles comparison with H alpha line emission curves for corresponding flares, noting neutral hydrogen emission relation to electrons acceleration 19 p2850 A72-37802
- Continuous emission localization in solar flare nuclei 19 p2850 A72-37814
- Certain results of a study of the emission-frequency stability of gas lasers at 0.63, 1.5, 3.39, and 9.6 micron wavelengths 19 p2814 A72-38786
- Emission lines and optical continuum of Seyfert radio galaxy 3C 120 from spectrophotometric scans 20 p2965 A72-38905
- Hot star with broad H lines with weak variable central emission, noting Ca II and He I 20 p2966 A72-38920
- Laser quantum theory for single mode emission fluctuations and instability region with high density of excited atoms, noting self consistent field effects 20 p2931 A72-39376
- Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field 20 p2931 A72-39377
- Stellar emission and absorption line spectra formation in presence of magnetic field interpreted by radiative transfer equation solution, considering dwarf stars observation 20 p2956 A72-39753
- Computer program for solar corona emission line polarization computation to interpret measurements in terms of coronal magnetic field direction 20 p2971 A72-39757
- Emission and absorption line spectra of type I supernovae after luminosity maximum interpreted by heating and ionization mechanisms in shell and intensity computation 20 p2973 A72-39886
- Temperature and emission measure deduced by coronal visible lines. 20 p2974 A72-39896
- Quartz and calcite spectral emission polarization calculation from Fresnel equation, comparing results with field measurements with broadband IR radiometer 21 p3097 A72-40603
- Coronagraphic observations of an enhanced coronal region. II - Temperature and density structure through the enhanced region. 21 p3108 A72-41288
- Observations of sources of maser radio emission with an angular resolution of 0.0002 sec 21 p3101 A72-41751
- Stratification of the emission in the envelope of a Wolf-Rayet type eclipsing binary V444 Cyg 21 p3113 A72-41759
- Effect of Thomson scattering on the emission spectrum of an optically semitransparent plasma 21 p3102 A72-41774
- Ar plasma diagnostics from stabilized arc emission spectra, noting thermodynamic equilibrium in central zone of arc channel 22 p3209 A72-41880
- Nonpeaked emission of a ruby laser with frequency tuning and selection 22 p3184 A72-42103
- Spectrum of stimulated emission in a resonator with plane mirrors 22 p3184 A72-42154
- Molecular vibration levels inversion ratios increase by vibrationally cold CO addition to CW CO chemical laser, observing R-branch emission lines 22 p3185 A72-42615
- The emission-line spectrum of Cygnus A. 23 p3334 A72-43251
- Dayglow nitrogen ion 3914 A emission profiles for average solar activity at 110-240 km heights from Cosmos 224 observations 23 p3282 A72-43357
- Tilting-filter measurements in dayglow rocket photometry. 23 p3289 A72-43893
- Spectrophotometry of the comet Tago-Sato-Kosaka 1969 IX 23 p3339 A72-44168
- A shock tube determination of the electronic transition moment of the CN red band system. 23 p3316 A72-44329
- Generation spectrum kinetics of a photodissociative iodine laser 23 p3297 A72-44480
- Neodymium-glass laser emission spectral and temporal correlations during Q switching by rotating prisms and passive shutter 24 p3408 A72-44565
- A further high-resolution search for Fe XXV line emission from Scorpius X-1. 24 p3438 A72-44838
- Interpretation of X-ray emission bands of AIII-BV compounds 24 p3432 A72-44914
- Rhodamine laser emission spectral band control by plane parallel plates and polarizing prisms, noting band widening by resonator loss modulation with Fabry-Perot interferometer 24 p3410 A72-45418
- Possible explanation of non-power-law radio spectra of cosmic radio sources. 24 p3446 A72-45477

EMISSION

- Human skin thermal radiation properties, presenting data on reflection, emission, transmission and complex refraction [ASME PAPER 71-WA/HT-37] 05 p0620 A72-15888
- Thermal conductivity, electrical resistivity, emissivity and specific heat of polycrystalline vanadium under electron bombardment heating at 1200 to 1800 K 06 p0828 A72-17613
- Spectral composition of emitted radiation, emissivity and absorptivity of Venus atmosphere at high temperatures 07 p1068 A72-18933
- Emissivity calculation for radiant heat flux from isothermal gas mixture of hydrocarbon fuel combustion products 10 p1561 A72-23839
- Sea foam emission and reflection characteristics at microwave frequencies from radiometric measurements, correlating data as functions of frequency and angle 10 p1475 A72-24749
- Overlap emissivity of atmospheric carbon dioxide and water vapor for computer simulated earth surface temperature calculations 11 p1628 A72-26986
- Thin plates and coatings in thermal contact with standard, determining total emissivity by inverse methods of heat conduction 12 p1889 A72-28115
- Reflectivity-emissivity relationship for isothermal atmosphere with coherent scattering and continuous absorption, generalizing for noncoherent case with line opacity 14 p2131 A72-30890
- Mean emissivity of a luminous flame - Spray combustion of liquid fuel. 18 p2740 A72-36148
- Emissivity and electrical resistivity of tungsten-yttrium oxide cermets as function of composition at 1200-3200 K 19 p2819 A72-38286
- Influence of the structure on the emissivity of aluminum-chromium-phosphate coatings at high temperatures 21 p3072 A72-40383
- Study of the dependence of the spectral and integral radiation properties of bodies on the surface roughness. 23 p3357 A72-44538

EMISSOGRAPHS

- U ACTINOMETERS
- U RECORDING INSTRUMENTS

EMITTANCE

- Graphite, Mo, Ta and W thermal radiation total emittance measurement in 1200-2400 K range, evaluating recorded data by computer program 02 p0243 A72-12101
- Fine scale surface oxide film roughness effects on metal substrate-oxide film system hemispherical emittance 02 p0303 A72-12319
- Thermal emittance measuring methods for solids at temperatures above 1500 K, discussing emittance dependence on surface characteristics 06 p0818 A72-18253
- Apollo lunar fine samples total emittance as function of temperature, using spectral emittance measurement technique 09 p1388 A72-23028
- Radial density profiles and emittance for nitrogen ion beams from Penning-type cyclotron ion source with hot filament 10 p1516 A72-25028
- Monte Carlo random walk methods for directional emittance of one dimensional absorbing-scattering slab with reflecting boundaries, considering refractive index, optical thickness and albedo [AIAA PAPER 72-309] 11 p1743 A72-25243

EMITTERS

- Contribution to the theoretical study of the distribution of the emittance along the walls of an antiradiating cell 18 p2742 A72-37199
- Effect of polarization on the apparent emittance of rectangular groove cavities. 20 p2954 A72-39629
- The universal high temperature emissometer. [ASME PAPER 72-HT-1] 20 p2926 A72-39675
- Mathematical model for moving radiometer system for reflected solar radiation measurement, discussing instrument time constant effect on surface emittance variations reproduction 20 p2927 A72-39795

EMITTERS

- NT THERMIONIC CATHODES
- NT THERMIONIC EMITTERS
- Pinch-in effect due to emitter current distribution stability in transistors with emitter-stripe geometry 04 p0499 A72-15209
- Thyristors junction area current rise time extension, discussing emitter field regional delay times as function of p-n-p-n structural properties 08 p1140 A72-21266
- Small signal microwave transistors design with arsenic and phosphorus diffused emitters, comparing performance in terms of power gain-bandwidth product, maximum frequency and noise figure 08 p1142 A72-21743
- Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors 10 p1526 A72-24351
- Photomultiplier negative electron affinity emitter materials photosensitivity performance, considering Cs-activated GaP and applications for low light level detection 15 p2291 A72-31531
- Radio phase interferometers for emitter position location, predicting polarization mismatch errors effects on accuracy 15 p2206 A72-31777
- Minimum elements number on discrete two dimensional hologram with constant distance between emitters, considering reduction of matrix elements 15 p2242 A72-32665
- Emitter conduction bands with negative electron affinity energy from surface barrier lowering of Cs p-type semiconductors 17 p2595 A72-34952
- Initial electron velocity and emitter surface roughness effects on oscillatory velocities dispersion in helical electron beams used in cyclotron resonance masers 22 p3208 A72-42664

EMOTIONAL FACTORS

- Fainting prevention in flying personnel, discussing constitutional susceptibility, health irregularities, alcohol, heavy smoking, lack of sleep, emotions and medical histories 03 p0316 A72-13722
- Human coagulating and anticoagulating blood system changes due to emotional stress during parachute jumps, noting plasma recalcification time increase 04 p0474 A72-15233
- Emotional aspects of pilot performance under high stress in emergency situations, discussing psychophysiological training methods 05 p0623 A72-17098
- Crew members handling of emotionally disturbed aircraft passengers 07 p0926 A72-18836
- Hyperventilation relationship with spasmodophilia, noting psychoemotional cause and neuromuscular excitability 07 p0922 A72-20384
- Improperly controlled learning processes relationship to hypertonic blood pressure irregularities pathogenesis in rats, investigating negative emotional reactions effects 07 p0925 A72-20659
- Evoked cortical potentials changes from emotional visual word stimuli stress under amyxil anticholinesterase drug influence 08 p1116 A72-21194
- Conditioned reflex mechanisms responsible for regulation of emotions in higher order animal and human neurophysiology 08 p1118 A72-21837
- Psychiatric preventive intervention in emotional crisis situations during patients aeromedical evacuation and transportation, discussing personnel shortage 10 p1429 A72-23743
- Electric stimulation of rabbit brain limbic formations /claustrum, amygdala, hippocampus/, showing effect on emotional response motor and vegetative components 14 p2076 A72-30668
- Social and emotional crises with respect to isolation, confinement and group dynamics of astronaut crews during long duration space flight 16 p2354 A72-33545

Increase in skeletal muscle performance during emotional stress in man. 17 p2500 A72-34942

Limbico-neocortical, cardiovascular and hormonal system vegetative shifts associated with emotional behavior response, presenting neurogenic stress model for animals 22 p3148 A72-43166

Nervous-emotional stress as a problem of modern work physiology 22 p3148 A72-43170

EMOTIONS

- Negative and positive emotional states influence on blood cholesterol and arterial pressure levels in dogs, suggesting common subcortical genesis of atherosclerosis and hypertension 09 p1264 A72-22498
- Psychological and physiological parameters correlation for astronaut functional state relation to emotional tension level during ground and flight tests 16 p2356 A72-33563
- Negative /painful/ stimulus cessation relation to emotionally positive zone activation in rat brain during self stimulation experiments 20 p2892 A72-39410

EMPLOYEE RELATIONS

Frankfurt Airport air traffic controller opinion survey of attitudes toward work and working environment 09 p1271 A72-23138

EMULSIONS

NT NUCLEAR EMULSIONS

12 p1760 A72-37304

ENDURANCE
Screening test for physical fitness on bicycle ergometer, comparing endurance indices derived from heart rate, oxygen consumption, oxygen debt and work rate measurements
01 p0010 A72-10212
Plastic deformation, creep rupture strength, endurance limit and service life of prestressed strain hardenable material
06 p0900 A72-18681
Endurance limit of construction materials under fast and thermal neutron irradiation in reactor channel
06 p0834 A72-18682
Fatigue properties of Ni-Al-W alloy with gamma-prime matrix, noting high endurance limit/yield strength ratio at room temperature
11 p1661 A72-26653

ENERGY ABSORPTION
NT AURORAL ABSORPTION
NT ELECTROMAGNETIC ABSORPTION
NT MOLECULAR ABSORPTION
NT PHOTOABSORPTION
NT POLAR CAP ABSORPTION
NT SOLAR ABSORPTION
NT THERMAL ABSORPTION
NT THERMALIZATION [ENERGY ABSORPTION]
NT ULTRAVIOLET ABSORPTION
NT X RAY ABSORPTION
Crack stability dependence on energy demand or release characteristics, discussing application to fracture tests analysis
01 p0141 A72-10996
Radiant heat attenuation of W seeded hydrogen aerosol at high pressure and temperature for gas core nuclear rocket propellant application
01 p0112 A72-11340
Current density nonlinear transient response and energy absorption of weakly ionized plasma under pulsed electric field
04 p0555 A72-14532
Cross section geometry and deformation effects on rods vibration damping, determining surface layer energy absorbing properties for longitudinal and torsional oscillations
05 p0735 A72-15988
Continuously burning optical discharge in Ar and Xe at atmospheric pressures, evaluating laser beam energy absorption, electron density and plasma temperature
05 p0669 A72-16679
Energy absorption measurements of ion heating by ion-acoustic waves in ion streaming plasma
06 p0856 A72-17518
GaAs, injection lasers with homojunctions and single and double heterostructures, observing energy dependence of internal optical losses due to band-to-band absorption
07 p1006 A72-19823
Thermal diffusivity and heat capacity measurement by temperature vs time curve shape by laser pulse absorption, using thermocouple
07 p1101 A72-19890
Nd glass absorption of flash pump emission energies with varying discharge parameters, Xe pressure and glass thickness
08 p1184 A72-22030
Light modulation by exciton electron absorption in thin high impedance recrystallized CdTe films within strong electric fields, showing spectral distribution curves
09 p1366 A72-22419
Absorbing sphere model for ion-ion recombination upper limit thermal energy reaction rate and total cross section energy dependence
10 p1515 A72-24342
Fracture energy and deformation of unidirectionally and randomly oriented lamellar Al-Cu eutectics from surface microstructure studies
10 p1499 A72-24893
Energy absorbing seat design for light aircraft, describing development and static and dynamic testing [SAE PAPER 720322]
11 p1583 A72-25585

Upper atmosphere /thermosphere/ physical variations, discussing diffusive equilibrium, energy absorption and heat transfer
11 p1621 A72-25842
General relativity equations solution for interaction of gravitational radiation and conducting fluids in magnetic field, noting energy absorption in specified depth surface layer
11 p1720 A72-26116
Heat conduction heating of plasma by high power ultrashort laser pulse incident on solid target, noting focusing and energy absorption role
12 p1852 A72-27622
Energy absorption inelastic surface mechanisms effect on I-V characteristics profile for bounded semiconductors with negative differential conductivity
13 p2023 A72-29991
Aircraft crash landing induced acceleration effects on seated occupants, discussing energy absorber system dynamic response characteristics for injury protective devices
15 p2191 A72-32603
Dilant suspensions impact energy absorbent properties, considering application to ejection seat cushions for occupant acceleration attenuation
15 p2191 A72-32604
Crash energy absorption for prevention of fatal injuries, considering human deceleration tolerance with respect to required energy absorber force-deflection relationship
15 p2192 A72-32630
Thermal conductivity and heat capacity measurement by temperature vs time curve shape by laser pulse absorption, using thermocouple
17 p2637 A72-35138
Effect of optical constants on the energy distribution in homogeneous particles illuminated by a parallel beam of light
19 p2812 A72-38216
Influence of different types of oscillations on ion heating in plasma-beam discharges
19 p2843 A72-38820
Energy absorbing characteristics of rigid urethane foams
20 p2943 A72-38885
One-to-one telescope with pressurized Ar gas for nanosecond and picosecond laser output pulse sensitive detection via gas breakdown and energy absorption
21 p3062 A72-40618
Elastic wave energy absorption in structures under dynamic loads, noting fatigue fracturing decrease with energy transfer into damping medium
21 p3126 A72-41540
Resonances in the collisionless heating of a plasma by transit time magnetic pumping
21 p3094 A72-41631
Electron density and temperature in microwave plasmas at higher pressures
22 p3211 A72-42479
An assessment of energy absorbing devices for prospective use in aircraft impact situations
22 p3237 A72-42764
Influence of the polarization of incident radiation on the distribution of the energy absorbed in a particle
24 p3424 A72-44621
Cross section geometry and deformation effects on rods vibration damping, determining surface layer energy absorbing properties for longitudinal and torsional oscillations
24 p3460 A72-45730

ENERGY BANDS
NT BLOCH BAND
NT CONDUCTION BANDS
NT FORBIDDEN BANDS
Mixed zincblende ternary and quaternary alloys, comparing empirical pseudopotential and dielectric model methods for energy gap calculation
03 p0404 A72-14262
N- and p-type semiconductors energy band structure bending near interface
05 p0702 A72-16197
Electronic transition between energy bands as explanation for two optical absorption maxima in rare earth metals
09 p1369 A72-22609
Franck-Condon phonon displacement effects on mobility edge and energy gap in disordered materials
09 p1357 A72-22986
Energy operator diagonalization of interacting valence electrons in semiconductor and metal models
09 p1352 A72-23356
Fermi level and scattering phase function nomograms for semiconductors with parabolic and isotropic energy bands, noting charge transfer effects
11 p1700 A72-25781
Dielectric and optical constants of p-type GaSb single crystals, interpreting singularities by energy bands diagram
11 p1689 A72-26485
Photovoltaic effect and energy band model of solar cell cadmium-sulfide-copper-disulfide heterojunctions
12 p1855 A72-28007

ENERGY BUDGETS
P-n thin film solar cell based on thermally and electrochemically stable II-IV semiconductors with graded energy gaps
12 p1756 A72-28013
Photoelectric properties of cadmium telluride thin film solar cells, discussing energy gap temperature dependence, work function and current variations anomalies
12 p1756 A72-28018
Enhanced indirect optical absorption measurement in AlAs and GaP with energy denominator variation for direct band gap evaluation
13 p2022 A72-29627
Vanadium emission spectra studies of energy band structure in vanadium silicides, showing p-subzone splitting
13 p1980 A72-29798
Nonequilibrium plasma wave scattering cross section dependence on energy bands shape and field orientation in semiconductors
13 p2023 A72-29992
Equiatomic ordered, bcc TiFe and TiNi electron density in outer energy band from X ray K emission spectra
13 p1981 A72-30006
Two band model explanation of Hall effect in dirty type-II transition metal superconductors near upper critical field, noting interband impurity scattering role
15 p2295 A72-32542
The capacitances of aniso-type heterojunctions with continuously varying energy band gap and electron affinity in the transition region
18 p2719 A72-36944
Superconducting energy gaps and transition temperatures of disordered cadmium and zinc films
19 p2844 A72-37690
Structure of the energy bands of titanium, hafnium, and tantalum monocarbides
20 p2939 A72-39311
Ultrasonic evidence against multiple energy gaps in superconducting niobium
22 p3190 A72-42476
Equiatomic ordered bcc TiFe and TiNi electron density in outer energy band from X ray K emission spectra
22 p3190 A72-42733

ENERGY BUDGETS
NT ATMOSPHERIC HEAT BUDGET
Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations
03 p0395 A72-13572
Heat transfer in thermal entrance region with turbulent flow between parallel plates, solving energy equation by difference methods
07 p1099 A72-19622
Exact and approximate expressions derived for energy content of vertical air column extending from earth surface to stratosphere
07 p0977 A72-19856
Clear air intermittent turbulence energy budget from aircraft data, obtaining turbulence parameters along aircraft path through application of electronic filters
09 p1344 A72-22437
Impulse-energy tensor for heat flow-crossed continuum subjected to electromagnetic field, using energy balance and quantity of movement equations
09 p1351 A72-22673
Energy balance criterion application to crack growth under cyclic fatigue loading, considering stress-strain behavior of plastic deformation energy
09 p1404 A72-22911
Mass and energy balance for electrode wire fusion in pulsed current MIG /metal inert gas/ welding, discussing pulse duration and amplitude requirements and shielding gas composition effect
09 p1321 A72-23644
Transverse shear flow stability analysis based on disturbance energy balance determination, applying to ducted and jet stream boundary layer flows
10 p1469 A72-24531
German papers on human body energy balance and temperature control covering energy conversion processes, chemical secretions, muscle activity, etc
11 p1584 A72-26071
Internal gravity waves effects on energy budgets and vertical angular momentum transport over mountainous terrain in southwestern U.S. from handheld camera pictures on Apollo 9
11 p1682 A72-26472
Mercury vapor physicochemical processes kinematics in shock tube, determining electron gas energy balance equations and atom-atom collision cross sections
11 p1699 A72-26760
Oscillations of spacecraft with on-off attitude control under constant perturbation moment, calculating energy expenditures for desired orientation maintenance
14 p2162 A72-30459
Mass and energy balance in air cooled matrix type phosphoric acid cell, noting operational reliability and construction
16 p2351 A72-33889

Solar chromosphere-corona transition region structure and energy balance calculation by static planar model compared with XUV resonance line observations

17 p2608 A72-35083

The response of a turbulent boundary layer to a step change in surface roughness. II - Rough-to-smooth.

17 p2540 A72-35191

Influence of the transverse distribution of pumping on the energetics and the profile of thermo-optical distortions in a rhodamine 6G laser

17 p2563 A72-35302

Toroidal plasma spectroscopic investigation from current pulse start to afterglow, noting electron temperature and density radial distributions and energy balance

17 p2591 A72-35373

Radiant interchange among suspended particles and its effect on thermal relaxation in gas-particle mixtures.

[DFVLR-SONDDR-210] 17 p2638 A72-35643

Chromospheric structure, magnetic field configuration, radiative transfer and energy balance relationship to solar prominences formation from corona

17 p2616 A72-35693

Calculation of the development of a turbulent boundary layer in the presence of an equally turbulent external field - Experimental verification

18 p2680 A72-36469

Hydrostatic oxygen burning in stars. II.

19 p2854 A72-37236

Diurnal variation in energy balance microclimate across coastal beach, noting surface moisture effect

21 p3078 A72-40468

Fluid flow across balance surface moving at constant velocity relative to coordinate system, calculating energy balance of turbojet engine

21 p3099 A72-40814

Reagent concentration and temperature fluctuation effects on turbulent burning rate, noting temperature pulsations influence on energy balance

21 p3128 A72-40976

Physical and chemical identification methods for biochemical reactions and energy balance of muscular contraction and shaking

21 p3003 A72-41469

Energy balance equation for machine unit with rotating element, noting energy distribution in periodic and nonperiodic operation modes

22 p3181 A72-41857

Energy flow diagrams.

24 p3369 A72-44686

ENERGY CONVERSION

Macroscopic metal crystal plastic deformation applications to aircraft and spacecraft materials production, considering internal friction and energy conversion into strain energy and heat

01 p0071 A72-11020

Vhf dc-dc conversion and regulation in low MHz range, discussing power loss reduction

01 p0007 A72-11057

Optimal conditions for energy conversion in MHD generator, observing ion seeding effect on plasma temperature

01 p0009 A72-11207

Papers on microwave advances covering precision coaxial connectors, O-type linear beam devices, electron dynamics and energy conversion and junction circulators

03 p0424 A72-13229

Transverse fields effects on electron dynamics and energy conversion in O-type linear beam devices of traveling wave amplifiers

03 p0330 A72-13231

Energy conversions and mean vertical motions in high latitude summer mesosphere and lower thermosphere, observing reaction kinetics

03 p0346 A72-13380

Power supply and converters for satellite and spacecraft, discussing fuel cells, radioisotopes, nuclear reactors, etc

05 p0615 A72-16745

AC-DC energy conversion - Conference, Milan, Italy, November 1970

06 p0785 A72-18307

Solar energy conversion as pollution-free power source, discussing silicon solar cells, power transmission techniques, satellite solar power stations and system control and guidance

06 p0893 A72-18625

TWT amplifier converter design with semiconductors and magnetics to achieve voltage regulation and high power efficiency for TOPS spacecraft

08 p1111 A72-21412

Kilowatt rotary dc-dc power transformer in modular sections for spacecraft applications, discussing electrical and mechanical designs and characteristics

08 p1112 A72-21414

Electrostatic plasma wave conversion into electromagnetic waves, calculating dispersion relation at all wavelengths for perpendicular propagation mode

08 p1137 A72-21989

Averaging process in thermodynamic systems energy transformation description

09 p1410 A72-22635

Sintered prepolarized perovskite type ferroelectric ceramics adiabatic depolarization and energy conversion under shock wave action

10 p1422 A72-24128

Selective surfaces and coatings for solar energy conversion systems, discussing semiconductor photoconverters, white-black surfaces, cooling systems and optimal optical properties

10 p1422 A72-24315

Cost efficiency and relative economic merits prediction for solar energy conversion systems

10 p1423 A72-24316

Pulse width modulated regulating dc-to-dc converter with small number of transistors to improve circuit reliability

10 p1452 A72-24680

Longitudinal plasma oscillations nonlinear instability due to energy transformation into harmonics and subharmonics

11 p1695 A72-25795

German papers on human body energy balance and temperature control covering energy conversion processes, chemical secretions, muscle activity, etc

11 p1584 A72-26071

Thermodynamics of human body metabolism, discussing energy conversion calorimetric measurements, body size, food intake, age, sex, endocrine and nervous effects

11 p1584 A72-26072

Human body biochemical energy conversion processes during muscular activity, discussing nutrition, circulation and respiration roles

11 p1585 A72-26075

Jet compression role in high temperature mechanical energy conversion heat exchanger based on ejector principle

12 p1755 A72-27724

Radiovoltaic generator energy conversion by thin film solar cells, noting performance dependence on semiconductor band gap and radioisotope characteristics

12 p1757 A72-28021

Schottky diode microwave down-converter conversion loss calculation as function of image terminal with consideration of barrier capacitance, series resistance and voltage drop

14 p2088 A72-30586

Mechanical oscillator model for experimental investigation of multistage electrical frequency multipliers subharmonic transient oscillations, considering energy flow under constant and/or phase modulated excitation

14 p2131 A72-30719

Reversible thermodynamic cycle of chemical to electric energy conversion with electron gas as working body, discussing Gibbs-Helmholtz equations

16 p2350 A72-32994

Russian book on magnetogasdynamic flow theory and calculations covering plasma flows and energy conversion in MHD channels of dc generator

16 p2438 A72-33873

Silicon solar energy conversion for electrical power generation on spacecraft.

17 p2494 A72-34186

Thermionic energy conversion with a Ba-Cs-diode.

17 p2496 A72-34603

Effect of chronic hypoxia on the kinetics of energy transformation in heart mitochondria.

17 p2502 A72-34993

Large-scale concentration and conversion of solar energy.

18 p2643 A72-36075

Vibrationally excited nitrogen in upper atmosphere

18 p2688 A72-36865

Sweet's mechanism for the destruction of magnetic flux.

20 p2955 A72-40017

Chemical energy transformation to mechanical energy and heat in muscles during exercise, considering energy sources for contraction, oxidations, glycolysis and alactic anaerobic mechanism

21 p3003 A72-41470

The impact of aerospace technology on energy conversion in the 70's.

[ASME PAPER 72-AERO-11] 22 p3140 A72-43147

Some contributions to energetics by the Lewis Research Center and a review of their potential non-aerospace applications.

[ASME PAPER 72-AERO-12] 22 p3245 A72-43148

Gravitational radiation from charged black holes.

23 p3336 A72-43499

Signal-to-energy conversion function in the photometry of solar soft X-radiation with broad-band detectors.

23 p3329 A72-44238

Mathematical model for life support system optimization in terms of reduced mass minimization as quality criteria for energy conversion and metabolic processes

24 p3375 A72-45133

ENERGY CONVERSION EFFICIENCY

Liquid phase epitaxial GaAs transferred electron microwave oscillators with high dc to rf conversion efficiencies dependent on frequencies

01 p0036 A72-10631

High efficiency transferred electron microwave oscillators operated in short LSA mode, noting pulse-operated diode power appearance time delay behavior

01 p0036 A72-10634

L-band Gunn oscillator using nonsinusoidal device voltage /switching mode/, comparing efficiency and output power with sinusoidal mode

01 p0036 A72-10635

Radiative noise effect on threshold current, output power and quantum yield of injection laser, evaluating noise loss factor

04 p0531 A72-15077

High efficiency solar electricity converters utilizing wave-like properties of radiation interacting with absorber-converter elements, discussing cost and fabrication advantages

[ASME PAPER 71-WA/SOL-1] 05 p0614 A72-15891

Charged aerosols for efficient power transduction in power conversion devices, deriving optimum particle radius to number of charges ratio for various operating conditions

06 p0760 A72-17422

Conversion effectiveness of oscillations induced by electron beam in bounded anisotropic plasma into electromagnetic emission

06 p0860 A72-17700

Solar cells with improved photoelectric efficiency, describing use of noncorroding Ti-Pd-Ag contacts, titanium oxide antireflection layer and welded cell joints

06 p0760 A72-17751

InP transferred electron microwave oscillators, observing higher efficiency than IMPATT and GaAs devices

06 p0784 A72-18063

Cesium plasma thermionic converters, discussing performance and efficiency improvement by governing electron transport in interelectrode space and cation generation

06 p0760 A72-18308

Optically pumped indium-gallium-arsenides laser coherent emission at room temperature, measuring total power conversion efficiency

[AD-737941] 07 p0999 A72-18882

Quantum efficiency at 6300 and 6364 Å of recombination mechanism in nighttime F layer, obtaining ionospheric electron density profiles

07 p0974 A72-18893

Lamp pumped IR solid state laser obtaining 20 W output and 4 percent efficiency from transition of Ho ion in sensitized YAG

07 p1004 A72-19234

Thermionic converter electrode performance of electron emission current density in terms of Cs arrival rate and surface temperature

07 p0915 A72-20568

Light emitting diodes for efficient conversion of electrical energy into electromagnetic radiation, discussing photometry, electrical injection, electroluminescence, design and applications

08 p1141 A72-21430

Quantum yield of ruby crystals luminescence for excitation in UV region, noting Cr concentration effect

10 p1490 A72-24043

Semiconductor air-air heat pumps with solar cell feed current, determining hot air flow temperature effects and energy conversion efficiency

10 p1423 A72-24319

Polarization characteristics and losses of anisotropic laser resonators composed of arbitrary number of mirrors

10 p1492 A72-24364

Temperature dependence of internal quantum efficiency of spontaneous emission as function of beam voltage in electron beam excited p-type GaAs

10 p1526 A72-24559

Huffman sequence synthesis by z transform zero pattern selection to obtain high energy for given peak amplitude, noting signal ambiguity functions

10 p1437 A72-24679

High conversion efficiency microwave second harmonic generator using negative resistance nonlinearity of n-type GaAs

11 p1591 A72-25741

IR radiation generation by Raman scattering and difference frequency mixing with Q switched Nd-YAG laser, noting peak power and photon conversion efficiency

11 p1647 A72-26149

Carbon monoxide quantum yield measurements of carbon dioxide photolysis by radiation at 1470 and 1500-1670 Å

11 p1590 A72-26423

Conversion losses as function of signal power and circuit impedance in narrow band triode frequency converter under large amplitude operating conditions

11 p1598 A72-26733

Effect of pumping radiation absorption by electron-excited molecules on organic compounds lasing efficiency

12 p1825 A72-27883

Thin film Cu-CdS solar cell electrochemical plating potential and solution composition effects on copper sulfide surface layer formation and cell efficiency

12 p1855 A72-28008

- Low photon IR photovoltaic response of CdS-metal junction, noting energy conversion efficiency 12 p1855 A72-28009
- Improved efficiency of cadmium sulfide-copper sulfide thin film solar cells, noting optimization of layer formation, gridding and encapsulation 12 p1756 A72-28016
- High electric power output Si solar cell development, discussing increased energy conversion efficiency 12 p1757 A72-28026
- Energy conversion efficiency of xanthene dye laser pumped by mode-locked Nd-glass laser second harmonic, discussing effect of excited molecules transition to triplet state 13 p1970 A72-29686
- Conversion efficiency and polarization behavior of Gunn diodes in resonant cavities, using I-V characteristics 13 p1937 A72-29866
- Plasma source efficiency with active element positioned between two plane parallel pumping elements 15 p2246 A72-31423
- Si solar cell efficiency in synchronous orbit radiation field increase via improvement in diffusion profile, low resistivity material and diode characteristics 15 p2183 A72-32131
- Radiation efficiency of electric power-energy conversion during pulsed discharge in Xe tube 16 p2403 A72-33716
- Cubic stabilized zirconia utilization as solid electrolyte in high temperature fuel cell system for efficient and economical energy conversion 16 p2352 A72-33894
- Effect of pumping radiation absorption by electron-excited molecules on organic compounds lasing efficiency 16 p2404 A72-33992
- Second harmonic conversion of CW YAG-Nd laser radiation on lithium metaniobate crystals, discussing conversion coefficient optimization 16 p2404 A72-33995
- Polarization characteristics and losses of anisotropic laser resonators composed of arbitrary number of mirrors 17 p2563 A72-34963
- Thermionic converters efficiency in commercial power generation applications, considering lifetime, reliability and cost 18 p2646 A72-36192
- Thermionic performance of fluoride CVD tungsten-niobium converter. 19 p2754 A72-37781
- Energy characteristics of the laser action in rhodamine 6G pumped by a pinched discharge. 20 p2933 A72-39512
- Electro-osmotic energy conversion in the glass/n-propanol system. 21 p2997 A72-41384
- High-intensity X-ray spectra and stimulated emission from laser plasmas. 22 p3210 A72-41990
- Effect of increasing beam voltage on the internal quantum efficiency of spontaneous emission in electron-beam-excited p-type GaAs. 22 p3185 A72-42308
- Progress in the efficiency of free-space microwave power transmission. 22 p3140 A72-42481
- Influence of nonuniformities of the built-in field on the collection efficiency of a semiconductor photocell 22 p3140 A72-43190
- Internal to total energy relation dependence on deformation time in impulsive loading of homogeneous free rod, noting energy conversion efficiency 23 p3344 A72-43338
- Influence of revolutions on efficiency and characteristics of the rotating axial cascade of blades. 24 p3363 A72-45361
- A method for estimation of axial turbomachinery stage characteristics on the basis of experimentally obtained data with a runner tested in a free blow-out aerodynamical scheme. 24 p3363 A72-45364
- Flow analysis in the axial-flow compressor impeller with meridional stream acceleration. 24 p3394 A72-45371
- front, considering distributed and lumped-parameter models 01 p0029 A72-10692
- Substorm electron drift relationship to cosmic noise absorption on auroral zone morning side, calculating electron energy loss 01 p0063 A72-10918
- Nonlinear effects due to crack front plastic yield and slow crack extension in energy release rate and fracture toughness calculations 01 p0140 A72-10993
- Crack stability dependence on energy demand or release characteristics, discussing application to fracture tests analysis 01 p0141 A72-10996
- Similarity models of interstellar loop structures, investigating magnetic field and energy losses effects and cosmic ray emission 01 p0131 A72-11011
- Split-film anemometer probe determination of convective heat transfer coefficient azimuthal dependence in low Reynolds number flow over cylinders, discussing axial heat losses 02 p0224 A72-11725
- Nonlinearity effects on two dimensional steady supersonic dissipative flow governed by Navier-Stokes equations, obtaining expressions for flows past thin airfoil and wedge 02 p0203 A72-11976
- Lunar soil dielectric constant and loss-tangent and electrical resistivity measurement by Q meter method, noting resemblance to dense terrestrial rock powders 02 p0281 A72-12287
- Concentric spherical heat exchanger, showing heat transfer coefficient decrease with coolant flow rate increase 02 p0303 A72-12320
- Anelastic solid energy dissipation linear memory models based on viscoelasticity theory, applied to earth and metals experimental data and dynamic loading problems 02 p0294 A72-12447
- Epoxy- and polyimide-graphite composites electrical dissipation factor and capacitance measurements as guide to molding quality, describing equipment 02 p0250 A72-12609
- Electron emission in strong electromagnetic waves within quantum electrodynamics, discussing energy losses and electron pair production 03 p0415 A72-13003
- Fatigue breakdown and energy dissipation dependence on stress during bending of cylindrical steel and iron specimens 03 p0372 A72-13589
- Cyclic deformation and energy dissipation during fatigue breakdown in steels under tension-compression and torsion 03 p0372 A72-13590
- High temperature properties of composite contact stack composed of alternating thermal flux sensors and heaters, determining heat conductivity and energy dissipation 03 p0458 A72-14160
- Kinetic energy losses due to liquid-to-solid phase transformation in heated two-component flow ascending in tube 03 p0342 A72-14161
- Ionization waves linear theory for low pressure noble gas strong current column, showing self excitation limit and temperature dependence of energy loss rate 03 p0400 A72-14351
- Elastic scattering without dissociation of nitrogen molecular ions by noble gas targets in 0.3-3 keV range, analyzing energy loss 03 p0393 A72-14357
- Azur satellite temperature control system for protection against internal heat dissipation and external thermal loads due to earth radiation and albedo 04 p0582 A72-15651
- Heat losses in oil wells hot liquid injections, modifying Oroveanu approximation method for exact solution 04 p0597 A72-15743
- Modeling techniques for fluid line transients, considering heat transfer and viscous dissipation [ASME PAPER 71-WA/FE-9] 05 p0646 A72-15933
- Energetic electrons absorption cross sections in weakly ionized atomic oxygen gas, showing energy losses through excitation 05 p0655 A72-16071
- Spin-axis attitude stability in torque-free environment of dual spin spacecraft with energy losses in both bodies [AIAA PAPER 72-16] 05 p0730 A72-16964
- Rotating dumbbell shaped satellites orientation optimization by system of jets, calculating energy losses 05 p0731 A72-17043
- Optimal hf triode oscillation tripler with allowance for power limitation by thermal losses on plate and grid electrodes 05 p0638 A72-17184
- Potential around moving test particle in quiescent plasma, discussing energy loss, transport properties and gravitational analog 06 p0859 A72-17549
- Dissipative effects in universe expansion, considering damping of anisotropy in homogeneous cosmological models [AD-745836] 06 p0880 A72-17885
- Turbulent energy dissipation rate statistical characteristics above 1000 m from radar measurements, discussing atmospheric boundary layer quantities 06 p0841 A72-17940
- Cumulus clouds vertical motion velocity spectra curves, turbulence dissipation rates and energy determination from aircraft measurements 06 p0842 A72-17941
- Incompressible fluid turbulent flow variational principles, discussing Malkus principle for maximum dissipation rate and minimum entropy production principle for convective and dissipative systems 06 p0800 A72-18116
- Flow in gas lubricated conical bearings, considering analytical and numerical solutions for axisymmetric flow model with temperature dependent viscosity and dissipation coefficients 06 p0801 A72-18124
- Extragalactic radio sources, discussing galactic radiation, quasars, nonthermal emissions, energy dissipation and spectrum analysis 06 p0886 A72-18172
- Thermal behavior of electron and ion gases in ionosphere, analyzing heat gain, transfer, loss and conductivity terms of energy equation 06 p0809 A72-18278
- Dissipative magnetic parameters measurement in ferrite and insertion loss measurement in waveguide Y-circulators below microwave resonance 06 p0786 A72-18367
- Thin film resistors and capacitors design, considering stability, power, size, film thickness, parasitic inductance capacitance and resistance and dielectric loss properties 06 p0790 A72-18573
- Two-mirror optical system to study energy dissipation in elastic systems subjected to cyclic straining and vibrations 06 p0819 A72-18649
- Flexural, longitudinal and torsional vibration damping of various size rods, taking into account surface layer energy loss 06 p0900 A72-18675
- Energy dissipation of vibrating structures in complex stress state, using generalized stresses and strains as coordinates 06 p0900 A72-18677
- Polymers mechanical losses temperature-frequency dependence, using nonlinear viscoelastic theory 06 p0838 A72-18678
- Small elastoplastic cyclic strain effects on internal friction and energy dissipation in metals during vibrations 06 p0834 A72-18679
- Sufficient conditions for asymptotic stability and instability for elastic systems with dissipation, using Liapunov direct method 07 p1026 A72-18809
- Mechanical energy consumption effects of thermal dissipation and cyclic straining methods during sample life tests 07 p1089 A72-19260
- Mathematical model for dissipative dual-spin satellite analysis, making use of high speed rotor symmetry to permit quasi-holonomic transformation 07 p1085 A72-19280
- Field approach to gravitation accounting for energy release and nonthermal radiation occurrence in pulsars and quasars 07 p1075 A72-19576
- Electromagnetic scattering of square pulse from lossy dielectric slab mounted on perfectly conducting planar ground surface 07 p0945 A72-19660
- GaAs, injection lasers with homojunctions and single and double heterostructures, observing energy dependence of internal optical losses due to band-to-band absorption 07 p1006 A72-19823
- Solar energy sources and dissipation and emission mechanisms, considering radiant flux of convection zone and photosphere and solar variabilities 07 p1078 A72-20005
- Ruby laser emission losses for free lasing modes and threshold and above threshold pumping 07 p1007 A72-20122
- Energy dissipation associated with transverse vibrations of sandwich metallic samples with damping coatings 07 p1094 A72-20135
- Storm available potential energy generation and boundary layer frictional dissipation estimation in heat transfer from ocean to atmosphere within east coast cyclone 07 p0980 A72-20451

ENERGY CONVERTERS

U DIRECT POWER GENERATORS

ENERGY DENSITY

U FLUX DENSITY

ENERGY DISSIPATION

X-type pseudoshock at high Mach number compared with lambda-type pseudoshock, discussing loss at duct center by leading shock wave 01 p0050 A72-10397

Cloud energy dissipation coefficient determination by ruby laser device, applying to water content and liquid particle concentration, vapor cloud and aerosol concentration 01 p0094 A72-10562

Microwave propagation on nonlinear transmission lines by examination of energy dissipation in shock

One dimensional nonlinear waves propagation in dissipative gas, obtaining exact solutions by method of separation of variables

07 p0973 A72-20500

Optical and electrical characteristics of gas discharge plasma in pulsed radiation sources as function of power dissipation

07 p1047 A72-20611

Ionization loss effects on cosmic ray lifetime in galactic interstellar medium, noting dependence on particle energy

07 p1064 A72-20637

Planetary bodies mass and energy losses as indications of eruptive evolution, discussing mean densities, geological processes scale and volcanic activities

08 p1228 A72-20829

Heat transfer in laminar and turbulent Newtonian fluid flow in narrow channels with allowance for temperature dependence of viscosity and energy dissipation

08 p1148 A72-20955

Soviet handbook on vibration absorbing properties of construction materials under cyclic straining, covering energy dissipation and dynamic strength

08 p1185 A72-20975

Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations

08 p1232 A72-21152

Continuous laser action in Nd-yttrium aluminum oxide rod, determining terminal state loss coefficient in stimulated emission

08 p1217 A72-21322

Transcendent Si power rectifier with high current and power dissipation capacity, discussing design, fabrication and performance tests

08 p1111 A72-21413

Black body X ray sources creation due to neutron stars rotational energy dissipation by strain hysteresis in crust

09 p1382 A72-22284

Secondary flow types and measurement in axial flow compressor cascades, discussing energy losses

09 p1260 A72-22633

Secondary losses reduction procedure in axial flow turbine stages, using boundary layer fences on blades profile suction side

09 p1374 A72-22634

Fast IC signal delay time reduction by high packing density, discussing yield, power dissipation and cost problems

09 p1290 A72-22820

Electron energy distribution and losses existence limit at Langmuir paradox pressures in gas discharge, hypothesizing wall mechanism of electron collisions

09 p1361 A72-22958

Cosmic electrons energy spectrum between 1 and 25 GeV from balloon observations, noting Compton/synchrotron loss effects

09 p1377 A72-23001

Modulated electromagnetic wave transmission in dispersive medium with cubic nonlinearity, discussing solitary wave and instabilities in two-wave interaction

09 p1352 A72-23475

Meteor trail photoobservations for atmospheric small scale turbulence vertical profile, determining eddy minima velocities and turbulent energy dissipation in M zone

09 p1393 A72-23650

Lunar soil dielectric constant and loss-tangent and electrical resistivity measurement by Q meter method, noting resemblance to dense terrestrial rock powders

10 p1532 A72-23756

German monograph on losses in gear pumps, discussing leakage, mechanical and hydraulic losses, measurement techniques and equipment, etc

10 p1422 A72-23774

Bounded plasma ionization instability inhomogeneity scale evaluation, assuming negligible electron energy losses due to heat conduction

10 p1517 A72-23844

Relativistic heavy ion in plasma, calculating energy loss based on electron scattering and momentum transfers

10 p1515 A72-24344

Human body calorimetry with water cooled garment for dynamic and continuous recording of heat dissipation from surface over extended time

10 p1431 A72-24485

Intensity dependent propagation characteristics of circularly polarized high power laser radiation in dense electron plasma, calculating energy losses

10 p1522 A72-24607

Electrical loss measurements in superconducting magnets at 60 Hz for Nb-Sn ribbon and Nb-Ti cable and multifilament coils

10 p1460 A72-24760

Darlington method in dissipative systems studies, representing R-functions as fractionally linear transforms with coefficients matrix function

10 p1512 A72-24780

Crack shape and plastic energy dissipation rate relation to plate thickness and applied stress for penny-shaped crack in elastic plate

10 p1559 A72-24896

Post-Newtonian approximation for calculation of energy and angular momentum radiated in form of gravitational waves by two point particles system, noting masses in hyperbolic Kepler orbit

10 p1547 A72-24933

Atmospheric isotropic turbulence kinetic energy dissipation and wind spectra estimation from Doppler spectra of precipitation particle velocities

10 p1507 A72-25001

Periodic motions stability of nonlinear control systems with energy consumption, using contact transformations

10 p1458 A72-25074

Frequency distribution of ionospheric horizontal winds vertical shear, noting altitude independence, turbulence and viscous energy dissipation

10 p1477 A72-25157

Multimode dielectric slab waveguide power coupling due to core-cladding interface irregularities, obtaining power distribution and radiation losses

11 p1603 A72-25270

Quasi-continuous charge carrier traps in molecular single crystals associated with polarization energy dissipation

11 p1700 A72-25782

Resistojet performance models for investigating energy losses in hydrogen, ammonia, methane and carbon dioxide nozzle flows

[AIAA PAPER 72-455]

11 p1708 A72-26191

Magnetic fields effect on anode heat losses in MPD accelerator arcs, noting minimal charge current density

11 p1711 A72-26225

Semiconductor injection laser with distributed radiative loss, calculating radiation line shape and width and quantum efficiency

11 p1648 A72-26329

Mode properties and energy losses for unstable laser resonator with curved and sharp edged mirrors

11 p1648 A72-26336

Complementary metal oxide semiconductor applications, noting device power dissipation, high noise immunity, good switching speeds and cost reduction

11 p1701 A72-26386

Midlatitude stable auroral red arcs observation from OVI-10, showing generation at plasmopause due to turbulent dissipation of ring current energy

11 p1624 A72-26401

Cantilever beam transverse vibrations induced by time varying linear displacements of clamped end under external loads, taking into account internal energy dissipation

11 p1738 A72-26797

Nonadiabatic and atmosphere induced energy losses as causes of proton capture in geomagnetic field

11 p1715 A72-26915

Predawn effect on hot and cold electrons at magnetoconjugate point in F 2 layer, discussing electron shock wave speed and thermal collisionless wave energy dissipation

11 p1628 A72-26916

Elastic wave propagation and energy scattering in materials reinforced by inextensible fibers

12 p1881 A72-27252

Ionization and associated energy loss effects on particles acceleration in solar atmosphere, emphasizing Fermi mechanisms

12 p1863 A72-27303

Structural energy loss mechanisms, considering hysteresis, edge damping of panels, acoustic losses, dry friction, multilayer sandwich damping, etc

12 p1882 A72-27342

Temperature distribution and dissipation effects on compressible isothermal atmosphere I. amb waves vertical structure

12 p1839 A72-27504

Laser with unstable telescopic resonator and large radiation loss, calculating energy characteristics and power efficiency

12 p1821 A72-27590

Time variable energy losses effects on cosmic ray nuclei composition, discussing fragmentation processes during heavy nuclei propagation through interstellar matter

12 p1864 A72-27692

Wave packet group velocity concept interpretation and application, considering propagation in dissipative media

12 p1783 A72-27719

Turbulence model based on transport equations for Reynolds stress tensor and energy dissipation rate, deriving simplified version for boundary layer flows

12 p1798 A72-27830

Electron impact excitation spectrum of molecular oxygen, investigating angular behavior of differential scattering cross sections and energy dissipation

12 p1848 A72-27851

Temperature distribution and heat dissipation calculations for CW and pulsed laser optical elements

12 p1824 A72-27873

Elastic rod system stationary vibrations under combinational parametric resonance due to internal energy dissipation, using matrix method

12 p1885 A72-27969

Flow velocity fluctuation intensity relationship to turbulent energy dissipation based on Kolmogoroff similarity hypothesis

12 p1799 A72-28133

Turbine nozzle vanes edge losses dependence on profile edge thickness, allowing flow velocity variation

12 p1861 A72-28135

Energy dissipation for turbulent flow in turbine blades guide vanes calculated with allowance for effects of Reynolds number and turbulence intensity

12 p1752 A72-28137

Statistical methods for friction and wear processes noting Rayleigh distribution of wear particles, surface dispersion velocity, energy dissipation and friction force

12 p1818 A72-28186

Material fatigue failure criterion during cyclic loading, noting energy dissipation and resonant frequency roles

12 p1888 A72-28250

ALSEP seismic records from Apollo 12 lunar module and Apollo 13 rocket stage impact, showing ringing phenomenon due to sphere curvature-caused energy dissipation

13 p2035 A72-28618

Thermodynamic limiting relations between physical measurement accuracy and measurement performance energy dissipation, considering equilibrium and nonequilibrium dynamic models

13 p2003 A72-28761

Profile losses at turbine rotor blade in unsteady gas flow from experimental data analysis, noting effect of turbulence caused by trailing edge wakes

13 p1893 A72-28783

Thermal storage type resistojets design for satellite attitude control, discussing heat loss minimization

13 p2026 A72-28927

Low energy Cs ion beam energy loss during traverse through near-thermal equilibrium Cs plasma as function of plasma density, comparing measurements with theoretical predictions

13 p2011 A72-29000

Nb superconducting resonant cavities application to linear accelerator and RF particle separator structures in GHz region for wall energy loss reduction

13 p1922 A72-29348

Random phase approximation for nonlinear theory of MHD nonequilibrium plasma steady turbulent regime, noting ionization level rise by energy dissipation

13 p2013 A72-29359

Frequency distribution changes of energy deposited in short pathlengths as function of energy degradation of primary proton beam

13 p2004 A72-29425

Thermal flux distribution in sectioned plasmatron channel with supersonic Ar plasma injection, discussing energy dissipation

13 p2017 A72-29634

Sunspot energy deficit relation to model depth, deriving facular model with two dimensional radiative transfer analysis

13 p2045 A72-29712

Alfven wave transmission in sunspot umbral magnetic flux tube, noting standing progressive waves and energy dissipation in facular regions

13 p2049 A72-29937

Velocity distribution downstream of nonuniform single and multiple smoothing screens, presenting theory based on energy losses and flow direction changes

13 p1940 A72-30100

HF transverse resonant vibrations of annular Al plates with polychlorovinyl and polyamide base coatings, noting damping and strain relationship to energy dissipation

14 p2164 A72-30427

Schottky diode microwave down-converter conversion loss calculation as function of image terminal with consideration of barrier capacitance, series resistance and voltage drop

14 p2088 A72-30586

Plane and circular dielectric waveguides with thermal losses, considering transverse wave numbers behavior behind cut-off value and dispersion equations solution

14 p2086 A72-30797

Heat losses due to spacecraft installation discontinuities on aluminized Mylar multilayer insulation, predicting blanket performance

[AIAA PAPER 72-285]

14 p171 A72-30829

Finite element method with compliance equations determining energy release rates and stress intensity factors for complex crack configurations and loadings

14 p2168 A72-30908

French monograph on flow near rotor blade tips, discussing three dimensional circulation and boundary layer effects, energy losses, velocity and pressure distributions, etc

14 p2069 A72-30950

- Mobile point defects interaction with moving dislocation in inelastic solid bodies, considering energy dissipation due to impurity relaxation 14 p2169 A72-30954
- Energy losses due to hysteresis friction during oscillations of dislocations in elastic field of point defect in solids, discussing temperature and amplitude effects 14 p2121 A72-30955
- Deflection and energy dissipation of thin cascade profiles in transonic flow for given pressure distribution, noting boundary layers and separated flow 15 p2178 A72-31501
- Transistorized microwave amplifiers with dissipative equalizing networks, describing transistor equivalent circuit 15 p2206 A72-31659
- Electric and magnetic fields fluctuations in region between shock wave front and magnetosphere boundary, noting resulting energy dissipation 15 p2225 A72-31902
- Exact solutions for plane thermoelastic and magnetothermoelastic wave frequency equations, determining specific loss extremum values 15 p2336 A72-32447
- Ionization energy loss of relativistic heavy nuclei for close collisions as function of charge, computing Born approximation corrections via Mott exact cross section 15 p2282 A72-32647
- Vela pulsar speedup explanation by corequake release of elastic energy stored within solid neutron lattice 16 p2450 A72-32869
- Single degree of freedom nonlinear mechanical system vibration characteristics calculation by averaging procedure, taking into account energy dissipation 16 p2424 A72-33279
- Five channel recording instrument for energy dissipation evaluation in electric machines from thermal emf measurements 16 p2392 A72-33284
- Energy and momentum losses of high temperature gas flow through externally cooled tube, solving laminar flow differential equations numerically on digital computer 16 p2378 A72-33430
- Charged particle energy dissipation in cold collisional plasma, discussing collisions effect on power spectrum 16 p2436 A72-33651
- Stellar magnetic oblique rotator internal motion field construction by perturbation technique estimating energy dissipation and turbulent viscosity 16 p2458 A72-33721
- Cosmic microwave background radiation origin by energy dissipation associated with primordial chaotic universe 16 p2459 A72-33770
- Turbulent energy dissipation rate statistical characteristics above 1000 m from radar measurements, discussing atmospheric boundary layer quantities 16 p2418 A72-33781
- Cumulus clouds vertical motion velocity spectra curves, turbulence dissipation rates and energy determination from aircraft measurements 16 p2418 A72-33782
- Temperature distribution and heat dissipation calculations for CW and pulsed laser optical elements 16 p2403 A72-33982
- Physical phenomena limitations on MOS IC miniaturization, considering gate oxide breakdown, drain source punch through, doping fluctuations, power dissipation and metal migration 16 p2370 A72-34102
- Energy release mechanism during early universe expansion leading to distortion of relic black body spectrum, noting Comptonization effects 16 p2461 A72-34151
- Plasma-ion beam nonlinear interaction for beam velocity exceeding electrons thermal velocity, noting plasma heating and beam energy dissipation 16 p2440 A72-34154
- Combustion instability oscillations damping in rocket motors by short nozzles, calculating acoustic losses 17 p2635 A72-34233
- Conservation laws related to energy release rates associated with cavity or crack rotation and expansion, discussing plastic stress distribution around cracks [ASME PAPER 72-APM-22] 17 p2580 A72-34795
- Dissipative periodic process theory for application to elasticity and distributed parameter and hereditary systems defined by partial and functional differential equations 17 p2575 A72-34867
- Viscous dissipation effects on unsteady free convective flow past an infinite, vertical porous plate with constant suction. 17 p2637 A72-35047
- Onset of convection near a suddenly heated horizontal wire. 17 p2637 A72-35048
- A physical mechanism for the production of solar flares. 17 p2608 A72-35088
- On neutral sheets in the solar wind. 17 p2599 A72-35096
- Mode stability in a gas laser with nonlinear selection losses 17 p2563 A72-35304
- Propagation mode and scattering loss of a two-dimensional dielectric waveguide with gradual distribution of refractive index. 17 p2530 A72-35469
- Soft collision plasma scattering function, conductivity and particle energy loss from simplified Fokker-Planck collision model 17 p2592 A72-35621
- Effects of vorticity, displacement speed and curvature on heat transfer with dissipation. 17 p2638 A72-35747
- Electron energy distribution and losses existence limit at Langmuir paradox pressures in gas discharge, hypothesizing wall mechanism of electron collisions randomization 17 p2593 A72-35887
- Possible refinement of the lognormal hypothesis concerning the distribution of energy dissipation in intermittent turbulence. 18 p2678 A72-36018
- The Apollo 15 lunar heat-flow measurement. 18 p2724 A72-36285
- Book - Annual review of fluid mechanics, Volume 4 18 p2679 A72-36382
- Independent moving vibrational /acoustic/ source-induced wave losses during friction of two elastic bodies 18 p2696 A72-36966
- Losses in high-voltage transformers encapsulated by epoxy resins. 18 p2669 A72-37113
- Measurement of the damping capacity and dynamic modulus of high-damping metals under direct cyclic stresses. 19 p2795 A72-37460
- Energy loss of fast electrons and positrons in a plasma. 19 p2840 A72-37727
- Approximate calculation of the maximum efficiency of an O-type oscillator with a resonance delay system in the presence of losses 19 p2774 A72-38412
- Unsteady weakly nonlinear waves in a multicomponent plasma with allowance for weak dissipation 19 p2842 A72-38528
- Atmospheric boundary layer turbulence modeling, considering terrain roughness effects, vertical mixing, high frequency spectra, energy dissipation rate and vertical component variance 19 p2828 A72-38557
- Aircraft measurements of dissipation of turbulent kinetic energy. 19 p2829 A72-38561
- Slowly rotating relativistic stars. VI - Stability of the quasi-radial modes. 20 p2966 A72-38909
- Analysis of effects of fluid energy dissipation on spinning satellite control dynamics. [AIAA PAPER 72-886] 20 p2976 A72-39115
- Photographic observations of W particle clusters high velocity impact against polystyrene, paraffin and W targets for energy dissipation in meteorite impact simulations 20 p2969 A72-39257
- Measurements of electron detection efficiencies in solid state detectors. 20 p2925 A72-39401
- Weight saving, vibration proofing and heat dissipating techniques in avionics packaging, considering B-1 bomber electronic multiplexing system example 20 p2909 A72-39768
- Stellar energy-loss rates in a convergent theory of weak and electromagnetic interactions. 20 p2972 A72-39868
- Metal fatigue crack propagation under cyclic loads, assuming specific energy dissipation as material constant 20 p2981 A72-39953
- Plasma low density regions caused by Langmuir turbulence, discussing energy dissipation of long wave oscillations and wave collapse 21 p3090 A72-40410
- Thermoelastic problems for multiply-connected plates with heat dissipation at both plane surfaces. 21 p3121 A72-41237
- An expression for the distribution of current in asymmetrically driven antenna immersed in a dissipating medium. 21 p3022 A72-41322
- Resonant frequency, fatigue and energy dissipation relations for endurance limit determination in Al alloy specimens under vibrational loads 21 p3070 A72-41368
- Influence of the test temperature on the fracture energy of graphite 21 p3074 A72-41714
- Influence of inelastic electron-energy losses on the development of ionization instability in a plasma 22 p3209 A72-41877
- Evanescent and internal gravity wave propagation effects on atmospheric dynamics, considering momentum transfer, energy dissipation and turbulence 22 p3168 A72-41964
- Convection and diffusion transport equation of galactic cosmic ray electrons with energy loss and absorption allowance for supernova compressed halo models 22 p3217 A72-42210
- Nonadiabatic condition effects on ultrarelativistic electron energy losses in geomagnetic trap in remote magnetosphere regions 22 p3218 A72-42224
- Energy degradation calculation for electron interaction with carbon dioxide molecules, discussing relationship with Mariner UV data 22 p3171 A72-42421
- Variation of the output of radioluminescence of organic scintillators with energy loss and the number of charges of ionizing particles 22 p3180 A72-42938
- Molecular gas presence effect on electron energy balance in atomic gases, noting inelastic collisions loss factor in heated Ar plasma containing nitrogen molecules 22 p3213 A72-43110
- Elastomers fracture strength and failure modes under tension, tearing, ozone cracking, fatigue and abrasive wear associated with viscous resistance energy losses 23 p3305 A72-43506
- Flow and energy loss distribution in annular stator nozzle cascades with cylindrical blade profiles of different twist, measuring flow exit angle along blade span 23 p3248 A72-43664
- Flow parameters and geometric factors effect on wake structure behind nozzle cascades with cooling air ejection through blade trailing edges, evaluating energy losses due to flow mixing process 23 p3248 A72-43665
- Filler quantity and type effects on mechanical energy losses in polymers, discussing molecular interaction and chemical bond influences 23 p3306 A72-43731
- Relationship between the dissipative properties of a vibrational system and its amplitude-phase-frequency characteristics 23 p3313 A72-43785
- Energy dissipation in metals during high-frequency fatigue tests. I 23 p3302 A72-43963
- Energy dissipation in metals during high-frequency fatigue tests. II 23 p3302 A72-43964
- Reduction of end losses in cascades of cambered blades 23 p3248 A72-44025
- Thermal energy dissipation in artificial antennas of large broadcasting transmitters studying cooling systems 23 p3278 A72-44311
- Plastic flow around an expanding crack. 24 p3456 A72-44812
- Energy releases in the upper atmosphere during geomagnetic disturbances. 24 p3396 A72-44847
- Mixed, nonequilibrium and coherent diffusion in stationary media with intense energy sources, noting finite speed of light effects 24 p3428 A72-45057
- A determination of thermal diffusivity under transient conditions 24 p3465 A72-45067
- Electron scattering by molecules with and without vibrational excitation. IV - Elastic scattering and excitation of the first vibrational level for N₂ and CO at 20 eV. 24 p3427 A72-45304
- Kinetics, spectrum, and specific loss properties of radiation emitted by rhodamine 6G in the case of pumping by a self-constricting discharge 24 p3410 A72-45417
- Alloying, thermal and mechanical treatment effects on Mg alloys damping properties under elastic vibrations, showing test results consistency with materials microdeformation theory 24 p3415 A72-45729
- Energy dissipation associated with transverse vibrations of sandwich metallic samples with damping coatings 24 p3461 A72-45760
- The influence of static stresses on the dissipation of energy due to forced oscillations. 24 p3461 A72-45767

ENERGY DISTRIBUTION

NT SPECTRAL ENERGY DISTRIBUTION

- High efficiency reflector antennas, discussing secondary subreflector for feed energy redistribution 01 p0039 A72-10671
- Wave propagation in nonlocal isotropic elastic medium of ordinary kinematic structure with energy density as functional of displacement gradient field 02 p0288 A72-11609

Linear energy transfer distribution for negative pions beams in human tissue, calculating relative biological efficiency and oxygen enhancement ratio [CERN-71-16] 02 p0162 A72-12064

Absolute UV calibration of rocket photometers used to update OAO calibration for determining energy distribution of reference stars 03 p0355 A72-13065

Wall double layer temperature and plasma oscillations effect on electron energy distribution in low discharge plasma column 03 p0394 A72-13192

Disturbance evolution on zonal flow background in baroclinic atmosphere with given wind profile, determining average-time energy distribution 03 p0383 A72-13479

Thin electrostatically self focusing electron streams in mercury vapor, analyzing energy distributions of ions and electrons ejected radially from beam 04 p0554 A72-14407

Electron energy distribution in carbon dioxide laser mixtures under lasing and nonlasing conditions 04 p0528 A72-14540

Energy equipartition among unequal masses in galactic nuclei and gravitating systems, discussing time scale for dynamical evolution 04 p0570 A72-14552

Trapped particles induced by fluctuating magnetospheric electric and magnetic fields, calculating radial diffusion and energy distribution and time variations 04 p0566 A72-14723

Conformal transformations applications to plane electromagnetic wave diffraction by infinitely conducting network, discussing energy distribution 04 p0490 A72-15410

Integral equations derived for single and composite radio signals with maximum energy concentration in given time interval or frequency band 05 p0625 A72-15824

Rarefied gases thermal energy diffusion model, using radiative transfer electrical network analog [ASME PAPER 71-WA/HT-4] 05 p0743 A72-15865

Vlasov equation stability properties of collisionless plasma and stellar gas, removing energy variation difficulties with multiple water bag model 05 p0694 A72-16060

CW millimeter wave power generation with spiraling electron beams, investigating energy spread effects on performance limitation 05 p0636 A72-16363

Damping of lateral oscillatory processes by end terminal displacement compensation, noting spring energy 05 p0691 A72-17132

Cosmic radiation high energy hadron component relation to extensive electron-photon showers, comparing sampling events based on multicore structure and total energy 06 p0870 A72-17282

High energy muon energy and angular distributions from electron-photon cascades, using emulsion chamber with X ray films 06 p0871 A72-17286

LF instability mode in partly ionized plasma due to electron temperature gradient aligned perpendicular to magnetic field, applying to E and F regions [AD-737931] 06 p0804 A72-17460

Electrostatic energy analyzer for local ion velocity distribution function measurement in double ended Q machine plasma column 06 p0814 A72-17551

Plasma conductivity dependence on electron velocity distribution function in distorted Maxwellian form 06 p0860 A72-17690

Ionization mechanism for low voltage neon plasma arcs, determining non-Maxwellian energy distribution effects and excited atoms collisions role 06 p0862 A72-18333

Energy complex in general relativity in form of tetrahedral gravitational theory, including solutions to Einstein equations 06 p0849 A72-18419

Electron energy distribution in carbon monoxide lasers, considering excitation effects on exchange processes, power transfer to vibration levels and vibrationally excited molecules influence 07 p0999 A72-18883

Plasma turbulent heating effectiveness by longitudinal ion current in mirror machine, determining hot ion lifetime and energy distribution function 07 p1039 A72-18913

Equations of free particle motion, gas energy, distribution evolution and cosmic indeterminacy for Friedmann universe filled with uniform density and pressure ideal gas 07 p1074 A72-19429

Magnetic bremsstrahlung energy straggling and radiation reaction, calculating particle and emitted photon distribution 07 p1037 A72-19668

Energy and angular distributions of electrons released during ion atom collisions from energy spectra studies, discussing autoionization transitions 08 p1210 A72-20836

Pulse energy and heat distribution in dielectric and metal during electroerosive machining 08 p1174 A72-21035

Fine structure of energy distribution function for electron beam interacting with plasma 08 p1215 A72-21722

UV absorption measurements across Saturn disk at 3300-4800 Å, considering rings and distribution in short wave region 08 p1238 A72-21829

Second derivative measurement of Langmuir probe characteristics for electron energy distribution functions in nonstationary plasmas by sample and hold technique 09 p1359 A72-22654

IR emission at 2.7 microns from carbon dioxide-molecular nitrogen mixture flow, noting energy redistribution 09 p1357 A72-22854

Electron energy distribution and losses existence limit at Langmuir paradox pressures in gas discharge, hypothesizing wall mechanism of electron collisions 09 p1361 A72-22958

Pulsed laser sensitizer using multiple imaging technique to retrieve average energy distribution from photographic plate optical density 09 p1325 A72-23346

Micrometeoroid simulation by accelerated microparticles bombardment of metal targets, discussing energy partition as function of impact velocity 09 p1409 A72-23667

Laser beams cross-sectional power distribution measurement by spinning disk scanner, using dual beam oscilloscope for laser beam profile display 10 p1489 A72-23949

Earth albedo neutrons energy and angular distributions, suggesting neutron source of inner radiation belt trapped protons 11 p1712 A72-25880

Mass, momentum and energy distribution measurement in quasi-steady MPD discharge, obtaining velocity vector profiles [AIAA PAPER 72-497] 11 p1696 A72-26220

Disturbance evolution on zonal flow background in baroclinic atmosphere with given wind profile, determining average-time energy distribution 11 p1682 A72-26249

Near and far field energy and power density distributions of multi-transverse mode double discharge TEA laser beam 11 p1651 A72-26671

Triple stellar system evolution and disintegration, discussing energy partitioning and initial velocity effects on stability 12 p1865 A72-27095

Energy distribution in plasma jet as function of capacitance and energy of storage elements and storage circuit inductance 13 p2015 A72-29452

Statistical method of Pearson moments applied to temperature regimes effects on ruby laser output energy distribution 13 p1968 A72-29506

Transverse magnetic field effect on electron temperature and energy distribution and spectral lines of gas discharge plasma 13 p2017 A72-29635

Energy flux intensity in selectively radiating gas nonisothermal layer from radiant transfer equation and mathematical model 13 p2066 A72-29898

Charged particle inertial-electrostatic containment in spherical diode gas discharge gap, measuring flux radial and energy distributions 13 p1933 A72-29915

Solar coronal magnetic field structure and energy content from synoptic data analysis, noting differential rotation effects 13 p2050 A72-29938

Daytime F region inverse relationship between electron density and temperature, determining energy input profile and thermal flux 14 p2097 A72-30127

Electron energy distribution, ions mass spectral composition and spatial charge concentration of currentless photoresonant Ce plasma obtained by associative ionization 14 p2136 A72-30175

Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect 14 p2137 A72-30309

Maximum ion energy dependence on radiation density in laser plasma 14 p2137 A72-30315

Electromagnetic emission in universe, discussing background radiation spectrum, extragalactic source brightness, intergalactic gas and energy density 14 p2152 A72-30479

Solar wind thermal properties from positive component energy distribution observation by ESRO Heos 1 satellite 15 p2298 A72-31518

Total energy distributions of field emitted electrons from tungsten as function of coverage by hydrogen and deuterium, observing elastic and inelastic spectrum 15 p2275 A72-31851

Energy and angular distribution of hydrogen and rare gas ions backscattered from polycrystalline metal surfaces 15 p2276 A72-31852

Energy equation for solution compressible laminar boundary layer generalized with orthogonal curvilinear coordinates 15 p2218 A72-32146

Steady state electron mean energy variation between parallel plates in Ar and He calculated by Monte Carlo simulation for comparison 15 p2285 A72-32222

Acceleration and recombination effects on ion energy spectra, discussing energy distributions of hydrogen, zirconium, lithium, and deuterium ions in laser plasmas 16 p2428 A72-32910

High and medium energy molecular beam detection for large dispersion angle collision cross sections determination, using photographic plates 16 p2389 A72-33060

Face centered solid crystal cell spatial distribution effect on body surface-reflected molecular beam intensity distribution 16 p2430 A72-33066

Elastic-plastic medium yield zone spread from penny shaped crack determined from continuous distribution of dislocations, noting system energy change 16 p2468 A72-33226

Probe temperature, shape and size effects on electron energy distribution measurements for positive plasma column of low pressure He and Ne discharges 16 p2437 A72-33750

Particle and energy fluxes across magnetic field in axisymmetric toroidal magnetic traps and plasmas with weak collisions, calculating radial electric field 16 p2440 A72-34153

Velocity-pressure correlations in a homogeneous turbulence associated with a plane pure deformation 17 p2537 A72-34280

Entropy and chemical change. I - Characterization of product /and reactant/ energy distributions in reactive molecular collisions: Information and entropy deficiency. 17 p2511 A72-34738

Field variations of perfect fluid in axisymmetric stationary universe within general relativity theory concept, noting energy extremal properties for rotating stars 17 p2607 A72-34921

Runaway electrons in toroidal plasma investigation by thick target bremsstrahlung measurement, noting energy distribution and runaway rate estimates 17 p2591 A72-35370

Electron temperature in the Martian ionosphere. 17 p2613 A72-35499

A universal power characteristic of a high-temperature solar heat source 17 p2498 A72-35516

Nonequilibrium energy constants associated with large-amplitude electron whistlers. 17 p2517 A72-35620

Electron energy distribution and losses existence limit at Langmuir paradox pressures in gas discharge, hypothesizing wall mechanism of electron collisions randomization 17 p2593 A72-35887

Analytical description of thermionic converter phenomena, assuming position linearity of interelectrode electron energy distribution and local thermodynamic equilibrium in cesium plasma near collector 18 p2646 A72-36200

Nonequilibrium relaxation phenomena in the near-emitter region of the thermionic converter. 18 p2647 A72-36209

Systematic approach to study energy and information flow through measuring system in experimental mechanics, using transducer model 18 p2690 A72-36356

Stress state and velocity fluctuations in a perturbed boundary layer 18 p2680 A72-36464

Energy variation curves for direct flare radiation and reflection from eruptive star atmosphere, discussing color variations 19 p2858 A72-37808

Effect of optical constants on the energy distribution in homogeneous particles illuminated by a parallel beam of light 19 p2812 A72-38216

Tungusk meteorite explosion energy values for various altitudes from investigation of shock wave propagation in variable density atmosphere 19 p2864 A72-38321

Plasma turbulent heating effectiveness by longitudinal ion current in mirror machine, determining hot ion lifetime and energy distribution function 20 p2957 A72-39379

- Energy balance equation for machine unit with rotating element, noting energy distribution in periodic and nonperiodic operation modes 22 p3181 A72-41857
- Objective-prism plates photometric computerized calibration method based on continuum energy distribution of standard stars within photographic plate field 22 p3177 A72-42376
- Photoelectron energy distributions from clean polycrystalline W, observing surface state 22 p3190 A72-42477
- Electron-energy distribution in a low-temperature plasma 22 p3213 A72-43118
- Kinetic instabilities during electron plasma heating in HF field of cylindrical resonator, discussing electron energy distribution function effect 23 p3317 A72-43211
- Maximum ion energy dependence on radiation density in laser plasma 23 p3318 A72-43218
- Integral equations derived for single and composite radio signals with maximum energy concentration band in given time interval or frequency 23 p3263 A72-43432
- Velocity, enthalpy and turbulent energy distributions calculation for plane wake behind flat body by asymptotic solution based on turbulence theory 23 p3249 A72-44083
- Glow discharge in rare-gas and metal vapour mixture. I - Distribution functions and kinetic coefficients in He-Cd mixture discharge. 23 p3322 A72-44320
- Ultrahigh energy gamma quanta families detection by airborne emulsion chamber at 500-2500 m altitude, calculating energy distribution distortion by Monte Carlo method 23 p3329 A72-44403
- Isothermal atmosphere inhomogeneities effects on electromagnetic cascade electrons integral energy spatial distribution 23 p3331 A72-44433
- Influence of the polarization of incident radiation on the distribution of the energy absorbed in a particle 24 p3424 A72-44621
- Focusing characteristics of CO₂ laser beam. 24 p3409 A72-44776
- Chemical explosion energy distribution between gases and propelled mass, discussing momentum and kinetic energy transfer 24 p3463 A72-45040
- Approximate equations of the flow behind a detonation with lateral confinement 24 p3463 A72-45041
- Investigation of the uniformity of neodymium-glass laser emission 24 p3410 A72-45419
- Linear corrector for laser beam intensity distribution transformation into random distribution with rectangular envelope, noting uniform energy distribution result of spatial fluctuations averaging 24 p3411 A72-45608
- Increase in the ratio of the energy of ultrashort laser pulses to the energy of the background radiation. 24 p3411 A72-45613

- Fundamental frequency calculation method for bars and plates with arbitrary fixity of rotations, discussing buckling and vibration with realistic boundary conditions 04 p0591 A72-15275
- Castigliano theorem in energy method, considering global static constraints and restriction for generalized force variables reduction through integration 05 p0732 A72-15803
- Distortional energy theory for predicting failure of orthotropic materials exposed to three dimensional stress state [ASME PAPER 71-WA/DE-13] 05 p0732 A72-15942
- Elastic boundary value problems static and geometric field parameters pointwise upper and lower bounds, determining solution coefficients by error energy minimization 05 p0735 A72-16062
- Finite element and finite difference formulations for solid continua by variational principles, including potential energy, complementary energy and Reissner principles 07 p1087 A72-18792
- Critical Reynolds numbers estimation for flows having velocity profile with point of inflection, discussing plane parallel flows stability energetic analysis 08 p1151 A72-21660
- Energy methods for nonlinear viscoelastic bodies based on constitutive relations affecting critical state in advanced creep 09 p1403 A72-22764
- Spiral flow stability between rotating and sliding cylinders, using modified energy theory based on assumption of disturbance invariance along preferred spiral direction 10 p1466 A72-24298
- Terminal control solution in terms of finite dimensional minimization of convex function, applying to time optimal control and minimum energy problems 10 p1457 A72-24459
- Energy method for boundary conditions of beam vibrations under linear viscoelastic stress-strain law, deriving uniqueness, boundedness and stability theorems 12 p1885 A72-27848
- Energy method based approximate calculation for natural frequencies of single layer compound shells of revolution 12 p1886 A72-28144
- Hydromagnetic channel flow stability computation via energy method, solving eigenvalue problem by direct forward numerical integration 15 p2283 A72-31212
- Spherical cap dynamic buckling under impulsive loading, comparing prediction by energy criterion with experiment using spray deposited explosive 15 p2323 A72-31405
- Static boundary value problem of axisymmetric elasticity for elastic isotropic media with small energy contribution to potential due to moment effects 16 p2464 A72-32934
- Limit displacement or solids parameters optimization for perfectly locking bodies, presenting mathematical models based on extremum energy theorems 16 p2423 A72-33104
- Energy theorems for creep constitutive relationships, discussing total deformation of body composed of elastic-creeping material with allowance for stress redistribution effects 16 p2473 A72-34118
- Creep deformation upper bounds for smooth pipe bends under constant external bending moments, using energy method analysis 16 p2473 A72-34123
- An energy technique for use in the vibration testing of complex structures. 17 p2626 A72-34720
- A comparison of numerical methods for determining stress intensity factors. 17 p2631 A72-34973
- Clamped flat skew plates stability under inplane stresses in terms of oblique components, calculating elastic buckling coefficients via energy method 18 p2736 A72-36931

Stellar evaporation in globular clusters passing through galactic plane, considering gravitational perturbation increase of total energy within system
21 p3107 A72-41269

On the sufficiency of the energy criterion for the stability of certain nonconservative systems of the follower-load type
[ASME PAPER 72-APM-E] 23 p3350 A72-44052

Supersonic aircraft energy turns
23 p3252 A72-44196

Vibration of simply supported cylindrical shells with longitudinal stiffeners
24 p3457 A72-44882

Optimal guidance for the space shuttle transition
24 p3422 A72-45186

Some extremal properties and energy theorems for inelastic materials and their relationship to the deformation theory of plasticity
24 p3460 A72-45692

On dual energy theorems for a class of elastic-plastic problems due to G. Maier
24 p3460 A72-45693

Omega-Dot law for time optimum approximation of rotating satellites wobble damping with control moment gyroscopes, calculating wobble rates by energy sink method
24 p3453 A72-45777

ENERGY OF FORMATION

Bond dissociation energy of aluminum monoxide, tabulating flame compositions and temperatures
07 p1051 A72-19363

Average energy to form electron-hole pairs in GaP diodes with alpha particles
20 p2908 A72-39564

ENERGY REQUIREMENTS

Extragalactic cosmic ray hypothesis plausibility from viewpoints of energy supply, acceleration process efficiency, galactic nucleus activity and intergalactic space
01 p0122 A72-11268

Energy dependence of solar proton-proton reaction, generating p-p wave function from Schroedinger equation
05 p0718 A72-16501

Optimum duration of human circadian cycle with respect to energy cost during work hours, relating normal cycle change to prolonged space mission stresses
05 p0619 A72-16639

Minimal energy stochastic controller design for electrically driven vehicles, using dynamic programming
06 p0795 A72-17304

Multivariable control systems, discussing effects of interaction vs noninteraction/decoupling/on system performance and energy requirements
07 p0962 A72-19715

Non-LTE effects on mechanical heating in gray atmosphere applied to nonradiative energy input estimates for solar chromosphere from negative hydrogen ion emission
08 p1235 A72-21391

Small impurity amounts effect on packing defect density and deformation energy in Ni
08 p1188 A72-21791

Galactic and universal theories of cosmic ray source mechanisms, energy requirements, particle composition, propagation through interstellar matter and acceleration in supernovae remnants
10 p1533 A72-23889

Speed and mechanical work measurements during knee bending and immediate or delayed leg extension exercise, showing muscle elastic potential energy utilization
11 p1587 A72-26615

Energy cost/oxygen consumption/prediction for treadmill and various levels terrain walking at two speeds under three different pack loads
14 p2080 A72-30706

Thermonuclear microexplosion ignition by bombarding dense target with intense relativistic electron beam, noting energy requirement reduction by self magnetic beam field
16 p2433 A72-32814

The fracture energy of a glass fibre composite
17 p2570 A72-34670

USSR electric impulse de-icing system design
18 p2648 A72-37033

An explicit automatic terminal energy management guidance technique for space shuttle
[AIAA PAPER 72-833] 20 p2950 A72-39094

Metabolic energy requirements for pushing loaded handcars, measuring expenditure during treadmill and outdoor asphalt circuit walking
21 p3005 A72-40419

Solar wind models of energy transport mechanisms and nonthermal heating requirements, comparing predictions with spacecraft observation
21 p3100 A72-40484

Energy management during the space shuttle transition
24 p3452 A72-45347

ENERGY SOURCES

Magnitude and distribution of stresses produced by external energy sources in thick plate
04 p0593 A72-15657

Elemental synthesis and energy sources in stellar evolution, hydrogen, helium and advanced burning stages, p-p cycle, e process and nuclear equilibrium
06 p0876 A72-17585

Power generation for electrical, thermal and transportation needs, considering technology use for air, noise, thermal, water and nuclear pollution reduction
06 p0761 A72-18627

Electrochemical energy cells for biological telemetry equipment, noting mercury cell use in implanted heart pacemakers
07 p0914 A72-19914

Structure and evolution of radio galaxies and quasars, considering luminosity-sustaining energy source, emission mechanism, variability and mean activity time
07 p1083 A72-20469

Synchro-Compton theory for variable compact components in extragalactic radio sources, suggesting stellar mass object collapse as energy source
08 p1233 A72-21181

Geomagnetic field inflation during magnetic storm main phase, considering energy sources and injected proton plasma radial velocity
10 p1472 A72-24274

Quasars energy source and structure in terms of kinetic energy conversion to radiation in shock fronts of colliding gas clouds
10 p1544 A72-24671

Fuor luminosity phenomena due to thermal corpuscular radiation emitting energy sources
15 p2304 A72-31330

Limited energy source operational time comparison for continuous and pulse mode operations
15 p2196 A72-31785

Liquid or solid propellant hot gas turbines as power source for hydraulic and electrical energy
18 p2648 A72-36558

Approximation of energy generation and nucleosynthesis during hydrostatic carbon burning in massive stars, noting neutrino-dominated evolution effects
22 p3228 A72-42562

Energy sources for extragalactic explosive phenomena in galactic nuclei and quasars, considering gravitation and double radio sources
24 p3439 A72-45018

Mixed, nonequilibrium and coherent diffusion in stationary media with intense energy sources, noting finite speed of light effects
24 p3428 A72-45057

Effect of a line energy source at the boundary of a supersonic flow
24 p3361 A72-45187

ENERGY SPECTRA

NT ELECTRONIC SPECTRA

NT NEUTRON SPECTRA

Balloon measurements for differential energy spectra of cosmic ray protons and He over half solar cycle 1965-1969, using Geiger tube hodoscope
[AD-745870] 01 p0119 A72-10876

Cosmic ray neutron leakage flux and energy spectrum measurements in 0.01-10 MeV range by OGO 6 satellite-borne neutron detector
01 p0119 A72-10877

Trapped protons low energy differential spectra from polar orbiting Injun 5 satellite measurements, suggesting radiation belts impulsive acceleration mechanism
01 p0120 A72-10891

Auroral electron flux and energy spectrum observations by synchronous ATS 5 and polar OV-17 satellites
01 p0061 A72-10894

Parallel electric field evidence near auroral ionosphere deduced from low energy particles, energy spectra and angular distribution
01 p0061 A72-10895

Extraterrestrial gamma ray flux contribution to total 0.7-4.5 MeV radiation at various latitudes by balloon sounding
01 p0120 A72-11007

Temporal behavior, intensity fluctuations and energy spectrum of pulsating X ray source Cygnus X-1 from Uhuru observations
01 p0121 A72-11092

Cygnus X-6 soft X ray source location, presenting polycarbonate pulse-height spectrum and counter response to different model source energy spectra
01 p0121 A72-11096

Pulsar NP 0532 pulsed hard X ray energy spectrum measurement, using balloon sounding data
01 p0134 A72-11160

Galaxy source of ultrahigh energy cosmic rays, interpreting energy spectrum kinks as galactic to metagalactic radiation transition
01 p0122 A72-11270

Energy spectrum equations for steady state turbulent convection model based on Heisenberg statistical theory, noting application to convection in planetary and stellar atmospheres
01 p0146 A72-11311

Sea waves energy spectra from optical Fourier analysis of ocean photographs under particular skylight irradiance
02 p0211 A72-11809

Ultrahigh energy cosmic ray models indication of galactic origin and composition, based on energy spectrum flattening data
02 p0272 A72-11901

Inner and outer belt electron differential energy spectra from Cosmos 228 satellite data, discussing fluxes of precipitating and quasi-captured particles
02 p0272 A72-11916

Epithermal neutrons energy spectra in atmospheric equilibrium layers at 57 geomagnetic N, noting agreement with experimental error limits
02 p0273 A72-11918

Anomalous magnetic and gravitational fields energy spectra model, examining autocorrelation functions changes
02 p0217 A72-11932

Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times
02 p0229 A72-11936

Solar proton flux and energy spectra from 1968-1969 ESRO 2 satellite measurements, detailing 18 November 1968 event
[CERN-71-16] 02 p0273 A72-12073

Electron temperature profile across nonequilibrium stagnation point boundary layer in partially ionized gas, investigating charged particles interaction with body in ionosphere
02 p0262 A72-12268

Rocket-borne apparatus for X ray measurement in 25 to 200 keV range, noting primary diffuse component and earth albedo spectral analyses
02 p0231 A72-12448

Cosmic ray neutrons angular distribution and energy spectrum at 3200 m altitude, using ionization calorimeter and proportional counters
02 p0275 A72-12828

Antiproton flux energy spectrum in Galactic interstellar space, discussing flux peak
03 p0408 A72-13005

Gamma ray astronomy, discussing energy spectrum, diffuse background flux, extragalactic origin and Crab Nebula emission
03 p0408 A72-13027

Celestial gamma rays arrival direction and energy spectra measurement and spectrum analysis using ESRO satellite COS-B data
03 p0408 A72-13029

Major sources of background counts for collimation gamma ray detector, measuring radiation direction and energy spectrum from balloon altitudes
03 p0352 A72-13032

Inner radiation belt proton source and loss processes, obtaining flux intensities, energy spectrums and radial distributions
03 p0412 A72-13513

Cosmic ray energy changes in interplanetary space by model for solar X-ray bursts
03 p0413 A72-13534

Soviet book on calms and storms in upper atmosphere covering energy variations, auroras, geomagnetic storms, weather forecasting, etc
03 p0350 A72-13967

Fast particle interaction with intergalactic matter, discussing relaxation of power law cosmic ray spectra
04 p0570 A72-14553

Nonthermal electron spectra hardness limit during flash phase of solar flares from OGO-5 observation
04 p0566 A72-14561

CAT inducing atmospheric conditions effects on SST flight, discussing turbulence in convective clouds and kinetic energy spectra of atmospheric motions
04 p0543 A72-14693

Galactic center region, Virgo and Crab Nebula gamma ray observations, measuring intensity and energy spectra
04 p0578 A72-15312

Interstellar propagation of 2-8 Z galactic cosmic ray nuclei at 10-1000 MeV/nucleon, analyzing differential kinetic energy spectra
04 p0567 A72-15323

Nuclear charge composition and energy spectra measurement for hydrogen, helium and medium nuclei in 12 April 1969 solar particle event
04 p0567 A72-15325

Heavy nuclei enrichment in solar accelerated particles, discussing differential energy spectra, photospheric and coronal abundances, satellite observation and agreement with galactic cosmic rays
04 p0568 A72-15366

Primary cosmic ray electrons energy spectrum measurements, using balloon-borne absorption spectrometer
04 p0568 A72-15509

Primary cosmic ray proton energy spectrum in 50 Ge V to 300 Te V range, using Proton 1, 2 and 3 satellite-borne counters
05 p0709 A72-16231

Galactic high energy electron differential spectrum, estimating spatial distribution and random magnetic field intensity
05 p0709 A72-16237

Cosmic ray spectrum at nonrelativistic energy region, noting ionization loss effects
05 p0709 A72-16238

- Electron flux and energy spectra measurements at 200-600 km altitude by Cerenkov counters onboard Proton 1 and 2 05 p0709 A72-16254
- Neutron energy spectrum of radiative pion captured by carbon 12, using gamma and neutron counters 05 p0692 A72-16688
- OGO-5 measurement of 10-200 MeV cosmic ray electron energy spectra, discussing quiet time flux intensity 05 p0720 A72-16719
- Long time variations of proton energy spectra in inner radiation belt during solar cycle 05 p0710 A72-16767
- Integral and differential electron energy spectra in inner radiation belt from Cosmos 219 satellite observation 05 p0711 A72-16768
- Particle multiplicity and momentum spectra for high energy inelastic nuclear interactions in Wilson chamber with polyethylene target 06 p0868 A72-17261
- Inelasticity factor dependence on particle energy spectra to explain nucleon flux calculations and Proton satellite data, considering scattering cross sections 06 p0869 A72-17264
- Multilayer X ray chamber for gamma quanta energy spectrum determination by primary photon impact and absorber calorimetric methods 06 p0869 A72-17266
- Energy spectrum, composition and anisotropy study of cosmic radiation from extensive air showers, using scintillation and Cerenkov detectors 06 p0870 A72-17277
- Primary cosmic radiation energy spectrum approximation from air showers, high-energy hadrons and Proton 4 data 06 p0870 A72-17281
- Extensive air shower characteristics and muon counts at different level observations relative to particle number and primary energy spectra 06 p0871 A72-17284
- Energy spectrum of muon formed electromagnetic cascades in vertical cosmic radiation flux 06 p0871 A72-17287
- Energy spectra of positive ion bursts on lunar night side from Apollo 12 and 14 Alsep suprathermal ion detectors data 06 p0872 A72-17462
- Scintillation crystal light yield dependence on emission energy in particle flux measurements with semiconductor spectrometer 06 p0816 A72-17835
- Pulsar produced cosmic rays energy spectrum, investigating light elements origin 06 p0874 A72-18161
- Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field 07 p0999 A72-18911
- Systematic increase in auroral electrons mean energy with total precipitated energy 07 p1058 A72-19151
- Low energy gamma radiation spectrum from galactic center region, using balloon altitude observation 07 p1059 A72-19420
- Energy spectrum of primary cosmic ray electrons at 2-200 GeV, using balloon-borne counter telescope with gas Cerenkov counter 07 p1059 A72-19578
- Cosmic ray nuclei intensity and energy spectrum measurement in nuclear emulsions stack, noting no charge dependence in solar modulation process 07 p1059 A72-19582
- Balloon measurement of low energy cosmic gamma ray flux, obtaining energy spectrum 07 p1059 A72-19585
- Semiconductors theory for multivalley energy spectrum and multivalued equilibrium distribution of carriers during electron phonon interactions 07 p1048 A72-19641
- Isotropic turbulence spectrum based on Heisenberg theory of viscosity limiting effect on fluid motion degrees of freedom, taking into account nonlinear inertial transfer term 07 p0968 A72-19671
- Energy spectrum of radiation defects in proton bombarded n-type Si crystals from Hall effect and electroconductivity measurements 07 p1049 A72-19901
- Quantum mechanical electron motion problem in binary alloy crystal lattice, discussing Bloch approximation, energy spectra, and third element admixture conductivity effects 07 p1049 A72-20150
- Atmospheric kinetic and temperature energy spectral balances in thermally stratified turbulent flow without shear 07 p0980 A72-20454
- Cosmic ray muons integral energy spectrum and angular distribution at sea level represented by power law, using primary interaction model 07 p1063 A72-20475
- Primary cosmic rays energy spectrum at .100-1000 TeV from Proton 4 satellite data 07 p1064 A72-20629
- Primary cosmic ray particles disappearance and proton spectrum slope rise in 1 TeV energy region from Proton satellites data 07 p1064 A72-20630
- Primary cosmic rays alpha particles and protons energy spectra similarity and intensity difference at .05 to 1.6 TeV, using Proton satellites data 07 p1064 A72-20631
- Three dimensional cosmic ray anisotropy and density distribution at earth orbit and in interplanetary space with allowance for primary particle and nucleon energy spectrum 07 p1065 A72-20645
- Solar cosmic ray energy spectrum from calculation of secondary emission neutron component generation multiplicities 08 p1225 A72-20723
- Energy and angular distributions of electrons released during ion atom collisions from energy spectra studies, discussing autoionization transitions 08 p1210 A72-20836
- High energy electron precipitation events in auroral zone X rays, showing exponential daytime and flat nighttime energy spectra 08 p1226 A72-21110
- Steady state problem of energy spectrum of variable magnetic field accelerated electrons, considering synchrotron X ray emission of Crab pulsar and nebula 08 p1231 A72-21119
- High resolution rocket-borne X ray spectrometer with cooled lithium drifted semiconductor detectors for measuring differential X ray energy spectrum of SCO XR-1 08 p1168 A72-21518
- Gamma radiation source energy and activity determination for radiometric flaw detection in steel 08 p1177 A72-21775
- Post-threshold translational energy dependence of endoergic cross sections for vibrational excitation and reactive scattering of diatomic molecules by atomic or molecular impact 09 p1357 A72-22858
- Energy spectrum and decay of random two dimensional vorticity distributions at large Reynolds number [AD-740486] 09 p1294 A72-22943
- Cosmic electrons energy spectrum between 1 and 25 GeV from balloon observations, noting Compton/synchrotron loss effects [AD-745871] 09 p1377 A72-23001
- Electrical conductivity and thermal emf as function of temperature in CdSb, discussing energy spectrum and crystallization 09 p1372 A72-23479
- Scaling of energy spectrum of particles emitted in high energy nucleon-nucleon collisions 10 p1529 A72-24527
- Fully developed turbulence spectrum of incompressible viscoelastic fluids 10 p1469 A72-24534
- Neutron flux and energy spectra from crossed field acceleration model of plasma focus and z-pinch discharges 11 p1693 A72-25565
- Space charge limited current theory of thin film organic semiconductor systems, investigating energy spectrum of traps and free carrier capture kinetics 11 p1700 A72-25783
- Cosmic ray proton and He nuclei differential energy spectra measurements by balloon-borne ionization spectrometer 11 p1712 A72-25881
- Switch detector output random process energy spectrum and autocorrelation function, noting distortion reduction by proper parameter choice 11 p1605 A72-26317
- Energy spectra of multiply charged ions formed in laser beam interaction with plasma, noting recombination process role 12 p1849 A72-27065
- Antiproton energy spectrum in cosmic rays from primary proton-interstellar hydrogen collision in two fireball model 12 p1863 A72-27186
- Peak electron energy spectra during auroral substorm from high energy resolution balloon X ray measurements 12 p1804 A72-27787
- Energy spectra of mixed discrete random processes in statistical multiplexing systems with pulse position, delta and pulse code modulation 13 p1919 A72-29054
- Mathematical random fluctuation models for noise and energy spectra of pulsed processes during current passage through semiconductors 13 p2021 A72-29064
- Inner and outer belt electron differential energy spectra from Cosmos 228 satellite data, discussing fluxes of precipitating and quasi-captured particles 13 p2030 A72-29228
- Epithermal neutrons energy spectra in atmospheric equilibrium layers at 57 geomagnetic N, noting agreement with experimental error limits 13 p2030 A72-29230
- Anomalous magnetic and gravitational fields energy spectra model, examining autocorrelation functions changes 13 p1949 A72-29244
- Neutron cosmic ray spectrograph method of separating recorded data by energies, using statistical analysis of data combinations with different dead times 13 p1957 A72-29248
- Inner Van Allen zone proton energy spectrum at 30-300 MeV from ESO 2 satellite measurements 13 p2031 A72-29383
- Energy and time characteristics of Raman scattering by benzene in laser cavity as function of medium thickness and cavity length 13 p1969 A72-29523
- Solar X ray burst analysis from individual Jantata/energy and time recordings by Lunokhod 1 spectrometer 13 p2032 A72-29700
- Multiplicative factors for energy scale corrections of OSO-3 ion chamber for solar X-ray monitoring 13 p1033 A72-29748
- Satellite-borne low energy electron and proton spectrometer for measuring auroral electron and proton spectra 13 p1960 A72-29841
- ESRO 1A satellite observations of trapped and precipitated proton energy spectrum as function of invariant latitude on 8 March 1970 14 p2146 A72-30141
- Absolute intensity LEED spectra for clean Ni surfaces, discussing measurement uncertainties 15 p2276 A72-31854
- Diffuse cosmic gamma ray flux density and energy spectrum observation at equatorial balloon altitude, discussing photon count, flux and spectra 15 p2299 A72-31924
- Lunik 14 spacecraft radio signal reflection from lunar surface, showing energy spectrum dependence on surface roughness 15 p2202 A72-32655
- Atmospheric energy spectra from two dimensional synoptic scales applicable to pressure or geopotential surface variables 15 p2266 A72-32721
- Acceleration and recombination effects on ion energy spectra, discussing energy distributions of hydrogen, zirconium, lithium, and deuterium ions in laser plasmas 16 p2428 A72-32910
- HEAO experiment proposal for Be to Sn flux and energy spectra and Be to Fe isotopic composition of galactic primary cosmic rays 16 p2447 A72-33733
- N2 positive and N2+/+ band systems and the energy spectra of auroral electrons. 17 p2545 A72-34634
- Long term variations of proton flux and energy spectra in inner radiation belt during solar cycle 17 p2600 A72-35270
- Integral and differential electron energy spectra in inner radiation belt from Cosmos 219 satellite observation 17 p2600 A72-35271
- Cosmic ray electron spectrum and its modulation near solar maximum. 17 p2601 A72-35583
- Further comparison of theory and experiment for decay of homogeneous turbulence. 17 p2542 A72-35629
- Auroral electron energy spectra at high latitudes from polar auroral arcs luminosity profile examination 17 p2550 A72-35853
- Precipitation dynamics and energy spectrum of auroral electrons in the midnight sector during a magnetospheric substorm 17 p2550 A72-35854
- Structure of the power-law spectra of relativistic electrons in a turbulent plasma 17 p2593 A72-35907
- Theoretical studies of the flux and energy spectrum of gamma radiation from the sun. 18 p2721 A72-35993
- Nonthermal solar X-ray bursts origin in non-Maxwellian electron fluxes interactions with surrounding plasma, reviewing energy spectra 18 p2721 A72-36093
- Energy spectrum of interplanetary-plasma discontinuities 18 p2715 A72-36653
- Negative temperatures in two dimensional vortex motion. 18 p2681 A72-36669
- Some aspects of cosmic ray differential spectrum measurements 18 p2722 A72-36852
- Latitudinal energy distribution of geomagnetic disturbances 18 p2688 A72-36868

Galactic gamma-radiation between 200 MeV and 10 GeV.

18 p2722 A72-37008

Solar flare composition and energy spectra of heavy nuclei from 1971 rocket observations comparing to cosmic ray abundances

19 p2850 A72-37509

Observations of the solar wind with the European satellite Heos-1

19 p2850 A72-37785

Solar cosmic ray energy spectrum from calculation of secondary emission neutron component production multiplicities

19 p2852 A72-38351

Azimuthal propagation of low-energy solar-flare protons as observed from spacecraft very widely separated in solar azimuth.

19 p2852 A72-38726

Several observations of low-energy solar-proton spectra and possible interpretations.

19 p2852 A72-38727

Studies of outer belt and slot region protons at low altitudes.

19 p2853 A72-38740

An evaluation of the intensity of Cerenkov radiation from auroral electrons with energies down to 100 eV.

19 p2792 A72-38741

Cosmic ray muon sea level momentum spectra and charge ratios geomagnetic latitude dependence measurements by spark chamber technique

19 p2853 A72-38754

Cosmic-ray diffusion coefficient in interplanetary space.

19 p2853 A72-38756

Energy spectrum and composition of pulsar-accelerated cosmic rays.

20 p2964 A72-39343

Gas laser emission fluctuations of total radiation energy, polarized field components and line widths in longitudinal magnetic field

20 p2931 A72-39377

Composition of cosmic-ray nuclei at high energies.

20 p2965 A72-39716

Energy spectrum of small scale solar magnetic fields.

20 p2971 A72-39765

A balloon search for extraterrestrial high energy gamma-rays in the northern hemisphere.

20 p2965 A72-39876

Estimation of the mass composition and energy spectrum of a plasma jet from a conical pulsed accelerator

21 p3089 A72-40134

Spectrum of P Cygni in 1968-1969.

21 p3110 A72-41445

Energy and angular distributions of secondary electrons resulting from ionizing collisions of electrons with helium and krypton.

21 p3088 A72-41493

Two band superconductor state density vs energy, noting energy spectrum extremal points

21 p3098 A72-41697

Quasi-two dimensional turbulence model of energy spectra and potential enstrophy transfer in synoptic large scale quasi-horizontal atmospheric motions

21 p3049 A72-41793

Machine elements vibration parameters from dynamic model of planetary gears, noting energy spectrum, correlation and amplitude distribution functions

22 p3182 A72-42132

Equilibrium energy spectrum for the galactic cosmic electrons.

23 p3328 A72-43831

Energy spectrum and composition of primary cosmic radiation at energies from 50 to 5000 TeV

23 p3330 A72-44422

Energy spectrum and angular distribution of cascades with an energy greater than 0.3 TeV, formed by cosmic muons

23 p3331 A72-44427

Energy spectra and angular distributions of cosmic ray muons with an energy of 2 to 10 TeV

23 p3331 A72-44428

Device for studying the photonuclear interaction of superhigh-energy muons

23 p3291 A72-44440

Primary cosmic ray nucleon spectrum from sea-level muon spectrum and scaling hypothesis parameters.

23 p3332 A72-44458

Rocket measurements of electron influx during a major magnetic storm with type A aurora.

23 p3332 A72-44515

Detection of interplanetary electrons from 18 keV to 1.8 MeV during solar quiet times.

23 p3333 A72-44546

Origin of 200-keV interplanetary electrons.

23 p3333 A72-44547

Semiconductors theory for multivalley energy spectrum and multivalued equilibrium distribution of carriers during electron phonon interactions

24 p3431 A72-44572

Behavior of outer radiation zone and a new model of magnetospheric substorm.

24 p3396 A72-44850

Determination of the energy spectrum of the initial process in an amplitude gate subjected to the action of a random signal

24 p3380 A72-44897

Double hierarchy in repeated cascade theory of turbulence.

24 p3390 A72-44997

Possible explanation of non-power-law radio spectra of cosmic radio sources.

24 p3446 A72-45477

On the power law for the kinetic energy spectrum of large scale atmospheric flow.

24 p3398 A72-45483

Energy spectra of Cs⁺ ions scattered by the surface of a tungsten single crystal

24 p3429 A72-45501

Energy spectra of multiply charged ions formed in laser beam interaction with plasma, noting recombination process role

24 p3431 A72-45718

ENERGY STORAGE

NT ELECTRIC ENERGY STORAGE

NT HEAT STORAGE

Acousto-optical extraction of energy stored in pulsed He-Ne laser cavity, using modulator with piezoelectric transducer at light-ultrasound interaction region

01 p0081 A72-11322

Magnetic storm effects on neutral atmospheric composition above 400 km, discussing energy deposition

03 p0349 A72-13518

Chemical box model of energy storage in covalent bonds and nonequilibrium distributions in prebiological synthesis leading to macromolecules

04 p0482 A72-14755

Structural lipids role in accumulating light energy during prebiological evolution, using conductance studies in lipid-chlorophyll-water system

04 p0468 A72-14779

Acceleration equations for plasma injectors with capacitive and inductive energy storage elements

05 p0697 A72-16985

Geomagnetic tail role in magnetospheric substorms, discussing solar wind energy storage, magnetic merging process and plasma sheet origin

07 p0977 A72-20032

Fiber toughening mechanisms in continuous filament unidirectionally reinforced composites with elastoplastic matrices, discussing tensile energy storage in debonded region

11 p1671 A72-25463

Flight mechanics of point with limited power propulsion system and energy storage unit, investigating variational maximum payload problem with singular control optimization

11 p1727 A72-25932

Changes in total magnetic energy stored outside earth core accompanying earth dipole field decrease over 60 years period from paleomagnetic measurement

11 p1623 A72-26108

Optimization criteria for electric feeding in quasi-steady MPD thruster, discussing energy storage bank characteristics determination

[AIAA PAPER 72-462]

11 p1709 A72-26197

Coaxial plasma source energetic characteristics, establishing plasmoid energy linear dependence on battery stored energy

11 p1699 A72-26754

Acceleration equations for plasma injectors with capacitive and inductive energy storage elements

12 p1850 A72-27129

Coaxial integrated pulse generator and gas laser with double transmission line for energy storage, noting design parameters selection

12 p1823 A72-27700

Energy distribution in plasma jet as function of capacitance and energy of storage elements and storage circuit inductance

13 p2015 A72-29452

Energy storage in chromospheric magnetic flux ropes in solar flares, discussing kink perturbation instability suppression

13 p2049 A72-29936

High energy storage laser material Nd-doped silicate oxyapatite refractivity temperature dependence characteristics measurement

15 p2249 A72-32167

Stored energy function for multiaxial stress state in rubberlike materials from tensile data based on Valanis-Landel theory

16 p2472 A72-33838

Electrochemical development of high energy batteries using organic solvents, organic cathode depolarizers and fused salts

16 p2351 A72-33888

Changes in energy stores in the hypoxic heart.

17 p2501 A72-34985

Numerical calculation of energy storage, wave dispersion and propagation in waveguides of periodic resonator chains at high frequencies

18 p2657 A72-36105

Temperature change direct measurement and annealing experiment via differential power analysis to

determine stored energy release in metal plastic flow during compression

24 p3405 A72-44613

ENERGY STORAGE DEVICES

U ENERGY STORAGE

ENERGY TRANSFER

NT COUPLING CIRCUITS

Energy and momentum transfer between fields and particles in plasma crossed by transverse electromagnetic wave, investigating MHD stability

01 p0109 A72-10884

Satellite solar power stations, considering energy conversion, microwave generators and beam transfer to earth

02 p0155 A72-11770

Carbon dioxide and hydrogen mixtures in shock tube, noting rotational- and translational-vibrational energy transfer role from relaxation time measurement

02 p0203 A72-12028

Mathematical model for radiation damage cross section linear energy transfer dependence, explaining experimental values of relative biological effectiveness [CERN-71-16]

02 p0160 A72-12052

Linear energy transfer distribution for negative pions beams in human tissue, calculating relative biological efficiency and oxygen enhancement ratio [CERN-71-16]

02 p0162 A72-12064

Linear energy transfer response of polyvinyltoluene plastic scintillator, presenting data on quality factor and radiation dose equivalent determinations in mixed radiation field [CERN-71-16]

02 p0168 A72-12071

Temperature dependent gas internal diatomic laminar heat transfer, investigating continuity, energy, momentum for two dimensional flow between heated parallel plates [ASME PAPER 71-HT-N]

02 p0302 A72-12317

Isotropic turbulence energy transport approximation by local differential equation analogous to Fokker-Planck equation, noting Kolmogoroff distribution for infinite Reynolds number

02 p0205 A72-12449

Boundary layers nonlinear resonant instability, investigating Tollmien-Schlichting wave triads interactions with energy transfer from primary shear flow to disturbance

03 p0340 A72-13160

Flutter problem wing-air flow energy exchange at instability limit, obtaining vibration mode shapes from homogeneous boundary value problem analog model

03 p0442 A72-13191

Coronal magnetic fields effects on energy and mass flux from lower solar atmosphere levels into corona, discussing plasma instabilities, solar flares, radio bursts, etc

03 p0422 A72-13206

Solar wind 10-9900 eV electron flux, evaluating energy transport in plasma rest frame

03 p0412 A72-13507

Energy transfer rate from photoelectrons to thermal electrons, presenting function of three independent variables

03 p0413 A72-13532

Aluminum intergranular entropy estimation, neglecting coupling between atomic vibrations

03 p0376 A72-13969

Northern Hemisphere mean zonal flow across arbitrary horizontal surfaces, evaluating vertical transports of kinetic energy

04 p0541 A72-14454

Magnetic and gravitational energy release by resistive MHD instabilities responsible for solar flares

04 p0571 A72-14578

Solar energy exchange by thermal radiation, investigating monochromatic emission factors at 0.3-15 micron

04 p0596 A72-14702

Energetical conditions of primeval biosynthesis and transdehydration feasibility on simplified present day templates

04 p0468 A72-14757

Energetic excitation of precursor compounds in gaseous phase for models of primordial atmospheres in thermodynamic equilibrium

04 p0552 A72-14759

Energy transfer conditions of transdehydration reactions on primeval earth leading to transphosphorylation, transacylation and peptide synthesis

04 p0468 A72-14768

Electron-ion-plasmon-photon interactions and energy exchange mechanism in plasma-field/laser pulse/systems

04 p0557 A72-15155

Nitrogen to carbon dioxide vibrational energy transfer time measurement in gas dynamic laser

04 p0531 A72-15352

Electromagnetic fields and energy flow lines in waveguide bifurcations with arbitrary passive terminations

04 p0489 A72-15392

Tellegen theorem as energy conservation principle statement for energy exchange between elements in electric network

04 p0507 A72-15527

Carbon dioxide-carbon monoxide vibrational energy transfer rate at 730-2325 K from measurements following heating in shock tube
04 p0553 A72-15641

Similar unsteady one dimensional motion of viscous heat conducting gas due to sudden energy release at surface
[ASME PAPER 71-WA/HT-3] 05 p0743 A72-15864

Longitudinal wave interaction and excitation by plasma instability in equatorial electrojet, considering energy transfer mechanism
05 p0656 A72-16242

Nuclear microfusion energy recovery threshold increase during laser pulse heating process of D-T plasma
05 p0695 A72-16280

High pressure gas lasers excitation, determining energy introduction and space charge stability
05 p0668 A72-16415

Ultrahigh enthalpy gas generation by steady multicomponent flow process with kinetic energy transfer from low molecular weight gas to higher weight working medium
[AIAA PAPER 72-167] 05 p0750 A72-16979

Energy transfer to electron-photon component during hadron interaction in lead, using ionization calorimeter
06 p0869 A72-17268

K-neutral pion inelasticity factor measurement for nucleon interactions in carbon corresponding to primary neutron energy transferred to pions
06 p0869 A72-17269

Longitudinal electron plasma waves interaction with electron distribution, investigating energy transfer
06 p0858 A72-17543

Quasi-biennial modulation of kinetic energy transfer in stratosphere, comparing with hemispheric energy, eddy transports and tropical zonal wind and temperature
06 p0841 A72-17632

SNR expressions for image transmission through turbid medium, showing quality dependence on energy transfer, contrast frequency and sensor phonon illumination level
06 p0774 A72-17936

Conductive and radiative energy transfer in absorbing, emitting and conducting medium bounded by two black plates, using Milne-Eddington type absorption coefficient
06 p0903 A72-18187

Closure approximation for energy transfer mechanism of stationary locally isotropic turbulence in inertial and dissipation ranges
06 p0802 A72-18545

Spacecraft incipient failure detection, stressing acoustic energy release techniques
07 p0964 A72-18829

Electron energy distribution in carbon monoxide lasers, considering excitation effects on exchange processes, power transfer to vibration levels and vibrationally excited molecules influence
07 p0999 A72-18883

Energy transfer rates and spectral line inhomogeneity of narrow band oscillation phosphate glass and inorganic liquid lasers with Nd
07 p1004 A72-19227

Isotropic turbulence spectrum based on Heisenberg theory of viscosity limiting effect on fluid motion degrees of freedom, taking into account nonlinear inertial transfer term
07 p0968 A72-19671

Extensive atmospheric showers and high energy transfer from interacting nucleons to electron photon cascades
07 p1060 A72-19867

Energy transport within stellar structure, discussing radiative transfer and opacity relationship to mean free path of radiation
07 p1078 A72-19924

Solar corona structure and dynamics in context of energy transfer processes of dissipation, radiation, heat conduction and hydrodynamic expansion
07 p1078 A72-20006

Basic thermodynamic efficiency relationships for irreversible processes under all system circumstances, introducing high grade energy concept
07 p1101 A72-20543

Secondary gas flow effect on energy transfer distributions from plasma torches, obtaining radial distributions of current and energy flux
07 p1046 A72-20546

Electron impact cross section and energy deposition in molecular hydrogen, using generalized oscillator strength in Born-Bethe approximation
07 p1038 A72-20567

Coupled motions of rotating free solid body and elastic rod torsional bending vibrations with precession and forced vibrations from energy exchange
08 p1205 A72-20959

Dimensional metal working by material erosion involving stereomechanical energy transmission to surface of nonrigid mechanical body
08 p1173 A72-21027

Atmosphere hydrodynamic simulation model for cascade energy transfer in turbulent flow, using Euler gyro equations
08 p1158 A72-21190

Molecular rotation stimulation and deactivation of diatomic molecule addition to monatomic gas, discussing energy exchange in rarefied gas flow
08 p1211 A72-21656

Energy and momentum removal from troposphere and lower atmosphere by mountain lee wave breaking, discussing effects on atmospheric circulation evolution and maintenance
08 p1203 A72-22167

Mass and energy exchange in tropical convective cloud systems from ATS cloud photographs
09 p1344 A72-22430

High energy UV solar radiation transfer by stratospheric aerosols to biosphere, considering radiation injury to human lung
09 p1298 A72-22662

Snow-plough model of plasma acceleration for determining time dependence, gas density distribution and energy transfer
09 p1359 A72-22819

Book on heat transfer by thermal radiation, covering black body radiation, electromagnetic theory, energy exchange, Monte Carlo solution, and absorbing and emitting media
09 p1411 A72-23046

General structure steady state response under harmonic forcing in internal resonance relation, noting inertial nonlinearity effects on autoparametric interactions and energy flow
09 p1408 A72-23462

Energy transfer optimization in electromagnetic wave transmission through dispersive dielectric media
09 p1365 A72-23522

Laser heating and fusion energy recovery of D-T plasma by mechanical-magnetic cumulation, considering cylindrical wave system
09 p1365 A72-23553

One dimensional conductive and radiative heat transfer through gray medium bounded by two diffuse surfaces, noting solutions existence and uniqueness
09 p1412 A72-23586

Bent lever equilibrium and relativistic mass for point body in motion, introducing von Laue energy flow inertia into d'Alembert principle
10 p1505 A72-24074

Gravitational field angular momentum transfer analogy with Einstein gravitational energy transfer in general relativity
10 p1511 A72-24246

Shock response of two constituent composites /Elkonites/, predicting Hugoniot states with allowance for thermal energy transfer
10 p1556 A72-24259

Kinematic impact theory for inertial motion of rigid bodies of revolution and energy flow through wire grid
10 p1512 A72-24520

Energy transfer in thermally developing laminar gas flows with radiative interaction, using total band absorptance model
[AD-745475] 10 p1563 A72-25043

Contact binary star systems model, considering superadiabatic energy transfer mechanism of convective envelope
10 p1550 A72-25199

Charged particle thermodynamics in ionosphere, considering energy exchange due to collisions or thermal conductivity
11 p1621 A72-25837

Abundance in cold stellar atmospheres, noting effect on atmospheric thermal stratification and energy transfer from molecular spectra
11 p1722 A72-26432

Spacecraft propulsion based on electric energy extraction from solar wind or energy transfer from ground via plasma arcs
11 p1712 A72-26779

Resultant material and spatial energy propagation vectors for waves of small amplitude superposed on large static deformation in elastic materials
12 p1879 A72-27123

Potential or gravitational energy in Newtonian physics based on Maxwell definition, noting energy transfer
12 p1843 A72-27187

Vorticity and energy transfer equations for subsonic jet impingement on flat plate, noting turbulent jet effect on friction factor
12 p1799 A72-28171

Explicit numerical modeling method for dynamics of dense high temperature laser-produced plasmas, discussing time scale for energy transfer from electrons to ions
13 p2009 A72-28424

Galactic formation initiation mechanism with thermal instability in expanding universe, noting Compton scattering energy exchange ensuring gravitational instability dominance
13 p2039 A72-29086

Rod antenna near field energy flow direction and intensity characterization by time independent and dependent components of Poynting vector
13 p1932 A72-29398

Statistical energy analysis of sound-structural interaction, considering sound transmission through complex walls and piping systems and fluid filled container vibrations
13 p2005 A72-29556

Nonradial oscillations and energy transport in non-magnetic stationary rotating stellar wind in local theory limit
13 p2033 A72-29725

Subauroral red arcs formation mechanism involving magnetosphere-ionosphere energy conduction and lower atmosphere neutral composition changes due to turbulent mixing
13 p1952 A72-29802

Radiative energy transfer through gray gas layer between black concentric spheres at different temperatures
13 p2066 A72-30055

Solar rotation effects on solar wind magnetic energy transport by magnetic shear stress near sun
14 p2147 A72-30557

Momentum and energy equations for pool film boiling heat transfer from horizontal cylinder to saturated liquids, using integral boundary layer analysis
14 p2173 A72-31067

Small parameter method for analysis of encounter waves nonlinear self oscillations in ring gas laser, noting periodic energy transfer
14 p2111 A72-31104

Energy supply calculation for two dimensional steady laminar compressible boundary layer flows with hypersonic hydrogen-air combustion
15 p2334 A72-31465

Dislocation motions as internal friction mechanism in solids due to medium frequency acoustic waves, considering motional energy transfer to thermal phonons and lattice vibrations
15 p2292 A72-31833

Microcalorimetric investigation of energy transfer from atomic and molecular hydrogen beams to various surfaces at liquid helium temperatures and ultrahigh vacuum conditions
15 p2281 A72-31863

Atmospheric sound absorption prediction based four-gases composition and energy transfer mechanisms, comparing results with experiments at different humidities
15 p2277 A72-32020

Spherical, cylindrical or plane piston motion in nonuniform medium with radiative energy transfer, obtaining approximate analytic solutions and temperature profile behind shock front
15 p2336 A72-32394

Electromagnetic gain mechanisms with required energy supplied by static currents and magnetic fields in homogeneous plasmas
16 p2434 A72-32853

F region crossed field instability nonlinear theory based on energy transfer by mode coupling and absorption by linear damping with application to equatorial electrojet
16 p2384 A72-32976

Numerically computed momentum and energy accommodation coefficients and angular distributions of gas molecules reflected from solid crystalline surfaces applied to satellite drag calculation
16 p2430 A72-33065

Aerodynamic coefficients determination from momentum and energy exchange between low velocity molecular jet and solid surfaces, describing time of flight measurement technique
16 p2390 A72-33069

Photographic-oscillographic study of discharges in atmospheric pressure helium-carbon dioxide mixtures, discussing discharge paths nonuniformity and energy input maximization
16 p2435 A72-33391

French book on thermodynamics of equilibrium and nonequilibrium composite systems covering entropy potentials for n degrees of freedom system
16 p2478 A72-33503

Vibrational energy transfer probabilities for inelastic collisions between diatomic molecules, considering system represented by harmonic oscillators coupled by time dependent interaction potential
16 p2431 A72-33582

SNR expressions for image transmission through turbid medium, showing quality dependence on energy transfer, contrast frequency and sensor phonon illumination level
16 p2426 A72-33777

Solar wind expansion analysis with allowance for interaction with neutral interstellar matter, discussing kinetic energy loss due to EUV ionization of interstellar gas
16 p2449 A72-33910

Digital equilibrium temperature model for diurnal surface thermal and energy transfer simulation based on Myrup analog solution
16 p2419 A72-33942

- Energy transfer of thermal coupled radiation with turbulent convection in electric arcs in atmospheric air plasma
[AIAA PAPER 72-685] 16 p2480 A72-34057
- Energy transfer between flexural and extensional modes of cylindrical shells. 17 p2625 A72-34323
- Rotational excitation of rigid rotor in argon-nitrogen system, measuring energy transfer moments by particle-body and perturbation technique 17 p2585 A72-34740
- One-dimensional wave pulses in steel-epoxy composites. [SESA PAPER 1945] 17 p2631 A72-34823
- Excitation of molecular vibration on collision - Simultaneous vibrational and rotational transitions in hydrogen + argon at high collision velocities. 17 p2585 A72-35467
- On the extension of particular solutions of the energy equation of compressible turbulent boundary layers. 17 p2544 A72-35954
- Q values from lunar seismic record measurements indicating separation of scattering and real loss parameters effects on energy propagation, discussing geophysical models 18 p2724 A72-36288
- Observation of satellite modes in a beam-plasma instability. 18 p2715 A72-36600
- Energetic and topological effects in surface chemical reactions, considering intermolecular dispersion and dipole forces and chemisorption 18 p2657 A72-36828
- Self-similar motions of a viscous heat conducting gas during an abrupt energy release 18 p2683 A72-36894
- Black hole rotational energy extraction by super-radiant scattering with impinging wave amplification and by floating particle orbits with zero net radiation reaction 19 p2857 A72-37720
- Energy exchange processes in solar flares, noting initial derivation of energy from changing magnetic fields within solar atmosphere 19 p2850 A72-37782
- Influence of plasma kinetic processes on electrically excited CO₂ laser performance. 19 p2812 A72-38598
- Energy propagation in a Cauchy elastic material. 19 p2878 A72-38718
- Book - Energy metabolism of human muscle. 20 p2893 A72-39700
- Acoustic emissions and energy transfer during crack propagation. 20 p2981 A72-39957
- Determination of the form of the capture area of a receiving antenna on the basis of energy streamlines 21 p3030 A72-40525
- Wave energy exchanger for hybrid propulsion system. [ICAS PAPER 72-47] 21 p3100 A72-41172
- Elastic wave energy absorption in structures under dynamic loads, noting fatigue fracturing decrease with energy transfer into damping medium 21 p3126 A72-41540
- Energy transfer in vibration damping of pendulum with elastic suspension, noting periodic regimes and transient oscillations 21 p3086 A72-41547
- Analytic expressions for electron energy transfer rates for nitrogen and oxygen vibrational excitation in ionosphere, applying to atmospheric and ionospheric computer modeling 22 p3168 A72-42001
- A simple quadrature method for computing laminar boundary layers. 22 p3165 A72-42110
- Bending waves propagation through flat plate forming rigid sound bridge between two parallel plates, calculating energy transfer at LF oscillations 22 p3234 A72-42128
- Differential equations for energy flow between electron beam and electromagnetic field, avoiding electron trajectory explicit calculation in nonlinear treatment of cyclotron resonance interaction 22 p3159 A72-42304
- Comparison of solar-flare energy estimates made by analytical and numerical techniques. 22 p3219 A72-42426
- Multiple scattering of bending waves by random inhomogeneities. 22 p3235 A72-42460
- The moon's thermal state and an interpretation of the lunar electrical conductivity distribution. 22 p3226 A72-42531
- Pulse energy and temporal/spatial distribution of carbon dioxide laser pumped by energy transfer from vibrationally excited DF produced by deuterium-fluorine chain reaction 22 p3185 A72-42617
- Influence of the intermodal exchange on the wall heat flow in a gas possessing internal energy 22 p3244 A72-42641

- Criteria of fracture initiation from the view of fracture mechanics 22 p3239 A72-42857
- Compression of high current relativistic electron beams using converging magnetic fields. 23 p3315 A72-43525
- Variation with electron velocity powers of electron collision frequency and energy transport coefficients in weakly ionized plasmas - Earth's lower ionosphere. 23 p3285 A72-43994
- Ionization calorimeter for neutral pion production investigation in high energy hadrons interaction, noting energy transfer identity for nucleon and pion interactions 23 p3330 A72-44409
- Temperature change direct measurement and annealing experiment via differential power analysis to determine stored energy release in metal plastic flow during compression 24 p3405 A72-44613
- Energy flow diagrams. 24 p3369 A72-44686
- Shock waves role in coronal heating, solar wind and energy and material transfer to earth and in solar system 24 p3439 A72-45019
- Chemical explosion energy distribution between gases and propelled mass, discussing momentum and kinetic energy transfer 24 p3463 A72-45040
- Response of convectively controlled burning to nonlinear disturbances. 24 p3464 A72-45055
- Electronic energy transfer phenomena in rare gases. 24 p3429 A72-45310

ENGINE CONTROL

- NT ROCKET ENGINE CONTROL
- NT TURBOJET ENGINE CONTROL
- Concorde engine performance, reviewing control, reheat and exhaust systems [SAE PAPER 710775] 01 p0116 A72-10267
- Soviet book on gas turbine engines control systems design based on similarity theory, determining optimal controller formula from engine parameters 02 p0271 A72-12543
- Aircraft power plant management, discussing integration of intake, engine and exhaust system from control standpoint 03 p0405 A72-13418
- Olympus engine flight testing for relighting and anti-icing, engine control and noise and vibration assessments in support of Concorde aircraft development 08 p1224 A72-21898
- Transient characteristics and steady state off-design operation of mixed and unmixed type turbofan engines, noting peculiarities in control characteristics 09 p1374 A72-22626
- Optimal control of two shaft gas turbine engine in helicopter, using cybernetic equipment 09 p1374 A72-22862
- Propulsion control systems design for military and commercial V/STOL aircraft, considering power management performance with minimum weight and maximum reliability and maintainability [ASME PAPER 72-GT-79] 11 p1705 A72-25659
- Fluidics - A potential technology for aircraft engine control. 19 p2849 A72-38047
- A fluidic sensor for closed loop engine acceleration control. 19 p2849 A72-38049
- Fluidics control technology applications to thrust reversal, turbine engine speed, pressure valves, nozzle and fuel flow, discussing life and reliability 19 p2849 A72-38050
- NERVA flight engine control system design. 21 p3083 A72-40764
- Synthesis problems of optimum quick-response engine control systems 22 p3216 A72-42190
- Electrical components in gas turbine control systems. 22 p3216 A72-42521
- Basic considerations concerning the design of control systems 23 p3326 A72-44279
- Thermodynamic cycle parameter effects on bypass turbofan jet engine fuel consumption and performance under various flight conditions and engine ratings 23 p3326 A72-44281
- Use of modeling and simulation methods in the design of gas turbine engine control systems 23 p3326 A72-44283
- Optimal synthesis of a two-parameter continuous controller for a jet engine with an afterburner 23 p3326 A72-44284
- Planning and management requirements for aircraft jet engine control system research and development 23 p3294 A72-44285
- Synthesis of the control systems of a two-shaft helicopter gas turbine engine 23 p3327 A72-44289
- Use of fluidic elements for jet engine controllers 23 p3327 A72-44290

- Analog model of gas turbine engine control systems, using statistical estimates and flow rate, heat conduction and dynamic equations 23 p3327 A72-44293
- Nonlinear digital modeling of gas turbine propulsion units 23 p3327 A72-44294
- ENGINE COOLANTS
- Differential nonstationary heat equations numerical solution for bladed gas turbine air cooled disk, taking into account cascade vertical temperature variation and coolant heating 02 p0301 A72-12251
- Aircraft engines high pressure turbine guide vanes air cooling by internal insert, analyzing thermal stresses [AIAA PAPER 72-7] 05 p0707 A72-16866
- Turbine blade row coolant flow velocity, injection location and temperature effects on kinetic energy output [AIAA PAPER 72-12] 05 p0707 A72-16866
- Low conductivity insulating coating /graded thermal barrier/ to cool gas turbine engine with high pressure ratio and inlet temperature [AIAA PAPER 72-361] 11 p1669 A72-25389
- Turbine aerodynamics research trends, covering engine cooling, high work factor turbines, pneumatic variable geometry and computer analysis 11 p1572 A72-26036
- Heat generation sources in high speed cylindrical roller bearings for gas turbine oil cooler design 12 p1816 A72-28111
- ENGINE DESIGN
- NT ROCKET ENGINE DESIGN
- Propulsion system optimization for commercial transport aircraft design under Advanced Transport Technology study, considering impact on aircraft gross weight [SAE PAPER 710760] 01 p0115 A72-10257
- Advanced technology air transports propulsion system requirements, considering design, engine performance and reliability, maintenance, airline problems, noise and pollution control [SAE PAPER 710761] 01 p0115 A72-10258
- Solid rocket on-off and acceleration control, discussing motor concepts, thrust modulation and potential technology applications [SAE PAPER 710767] 01 p0116 A72-10262
- Graphite fiber composite fan blade design for subsonic turbofan engines, discussing weight and fatigue sensitivity reductions and performance test results [SAE PAPER 710771] 01 p0116 A72-10265
- Small three spool, reverse and mixed flow turbofan engine for business jets, discussing fuel consumption reduction, thermodynamic performance, efficiency and maintainability [SAE PAPER 710776] 01 p0116 A72-10268
- Aircraft power plant design and installation influence on operational effectiveness, discussing manufacturers and operators cooperation for reliability and maintainability enhancement [SAE PAPER 710777] 01 p0116 A72-10269
- Airline Propulsion Team approach to DC-10 aircraft power plant design for maximum operational effectiveness [SAE PAPER 710778] 01 p0116 A72-10270
- CF6 high bypass ratio turbofan engine design improvements for fuel consumption, thrust/weight ratio, starting, noise level, smoke emission, maintenance, monitoring and accessory replacement [SAE PAPER 710779] 01 p0117 A72-10271
- PT6 and JT15D gas turbine aircraft engines development and service experience 02 p0271 A72-11699
- Q/STOL jet aircraft engines design for low noise levels, describing takeoff thrust, bypass ratio and turbine stages 02 p0271 A72-12501
- Disk shaped lift engine providing additional thrust during takeoff and transition phases of V/STOL aircraft, returning to ground by jet after task accomplishment 02 p0272 A72-12900
- Propulsion twin spool power plant design and dimensioning with selective high pressure cut-off for supersonic aircraft with part of flight in subsonic range [DFVLR-SONDDR-169] 03 p0406 A72-13608
- NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans 03 p0406 A72-13679
- GE CF6-50 high-bypass two-spool engine development, discussing configuration, installation, endurance tests and various failures 03 p0406 A72-13681
- Aircraft air breathing propulsion technology, discussing two-place aircraft, turbofan power plants, helicopter engines and V/STOL, CTOL, subsonic transports and supersonic aircraft 04 p0565 A72-14825
- Jet aircraft noise reduction, discussing engine design modifications 04 p0465 A72-15167

Soviet book on thermal and gas dynamic design of gas turbines in aircraft and liquid propellant rocket engines, covering three dimensional flows, temperature distribution, component cooling, etc
04 p0565 A72-15246

Aircraft noise measurement units and methods, discussing engine design for noise reduction
05 p0611 A72-16026

High intensity combustion chamber design for gas turbine of jet engine, considering primary, secondary and dilution zones
05 p0705 A72-16491

Aircraft gas turbine engine and components post-war development in Japan
05 p0705 A72-16499

Aircraft and reusable spacecraft propulsion systems current status and future development, discussing noise and exhaust emission problems, V/STOL bypass and fan engines, ramjets, etc
05 p0705 A72-16735

Turbine rotating disk hyperbolic thickness critical profile by radial displacement solution
06 p0894 A72-17794

Gas turbine engine inlet solid particle separator designed as integral engine part, discussing semirverse flow superiority
07 p1052 A72-18755

Inlet duct and turbofan engine compatibility without stalling and surge conditions obtained by design optimization and wind tunnel testing
07 p1052 A72-18761

Manufacturer viewpoint on aircraft engine safe introduction into airline service, discussing JT9D engine design for 747 aircraft
07 p1053 A72-18830

Influence coefficients method accuracy for design and adjustment of gas turbines, engines and parts
07 p1054 A72-18998

Hybrid rocket engine design, operation and performance, discussing optimum liquid and solid fuel combinations
07 p1055 A72-20303

Astafan turbofan engine with variable pitch fan rotor blades for thrust variation, discussing gearbox and core engine design
07 p1055 A72-20459

Commercially available aircraft turbofan engines specifications, describing design features and performance characteristics
07 p1055 A72-20625

Soviet civil gas turbine engines construction and performance, noting relatively high specific fuel consumption
08 p1223 A72-21275

Intercomponent complex annular ducts design for gas turbine engines
10 p1416 A72-23872

STOL and V/STOL transport aircraft design requirements consideration based on common propulsion and lift engine types use, noting fan lift solution superiority
10 p1421 A72-24865

T63/250 engine program current status, covering turboshaft helicopter engine and fixed wing aircraft powerplant models and applications
[SAE PAPER 720350] 11 p1703 A72-25601

Two spool geared fan jet engine design and development for general aviation, discussing performance, reliability and ecological aspects
[SAE PAPER 720351] 11 p1703 A72-25602

High bypass ratio JT15D-1 turbofan engine design and development testing
[SAE PAPER 720352] 11 p1703 A72-25603

Small radial inflow turbines for space applications, considering blade-shroud clearance, blade loading and exit diffuser design
[ASME PAPER 72-GT-42] 11 p1704 A72-25636

Variable pitch ultrahigh bypass ratio ducted fan engine design for STOL transport aircraft
[ASME PAPER 72-GT-61] 11 p1704 A72-25652

Supersonic turbine stator and rotor blading design corrected for boundary layer displacement thickness, discussing limitations due to normal shock wave at flow separation
[ASME PAPER 72-GT-63] 11 p1571 A72-25653

Integral and remote powered lift fan engines design for large civilian VTOL transports
[ASME PAPER 72-GT-65] 11 p1704 A72-25654

Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics
[ASME PAPER 72-GT-73] 11 p1704 A72-25655

Design considerations in selecting geometries for high pressure ratio single stage centrifugal compressors
[ASME PAPER 72-GT-91] 11 p1571 A72-25665

Mixing parameter design of high loading spray type combustor for lift jet engine, using primary zone
[ASME PAPER 72-GT-99] 11 p1705 A72-25668

Steady state radial inlet pressure distortion index for axial flow compressor, examining radial velocity, continuity equation and mathematical model
[ASME PAPER 72-GT-109] 11 p1571 A72-25673

Hydrogen resistojet design and testing with Re heat exchanges, noting appropriate power efficiency and exhaust velocity for synchronous communication satellites orbital transfer
[AIAA PAPER 72-449] 11 p1708 A72-26186

Design and performance characteristics of ion thruster feed system components including high voltage isolator, liquid Hg flowmeter and W vaporiser
[AIAA PAPER 72-487] 11 p1710 A72-26213

Computer aided thermomechanical design of mercury bombardment ion thrusters, involving heat transfer, vibration and stress analysis
[AIAA PAPER 72-431] 12 p1860 A72-27420

Ion thruster module design for primary electric propulsion systems, discussing optical configurations, discharge chamber, control and performance tests
[AIAA PAPER 72-508] 12 p1860 A72-27423

Turbomeca Astafan geared fan engine with axial centrifugal compressor design, specifications and performance
12 p1861 A72-27748

Gas turbine units with constant pressure cycle, discussing design and optimization method
12 p1862 A72-28149

Russian book on theory of ramjet and rocket ramjet engines covering supersonic diffuser operational principles and design, nozzle, combustion chamber and ejector
12 p1862 A72-28346

Design and tests of dual deflectable beam strip ion thruster, noting application to two axes satellite attitude control and stationkeeping
[AIAA PAPER 72-494] 13 p2027 A72-28951

Russian papers on cooled high temperature gas turbines covering engine theory and design, power plants development, heat transfer and air cooling systems
13 p2029 A72-29925

Stage removal and addition effect on multistage axial compressor for application in engine design
15 p2179 A72-31706

Integrated data acquisition and processing system for inlet-aircraft engine matching, considering all-digital, analog and hybrid approach
15 p2298 A72-32319

RB 211 three-shaft turbofan engine for L-1011 airliner, describing design for noise reduction
15 p2298 A72-32428

Concorde engines design for maintainability and reliability to reduce turnaround time, discussing diagnostic facilities and on-wing maintenance features
15 p2298 A72-32457

Commercial transport aircraft engine technology contribution to world air transportation, considering social and ecological compatibility with community
16 p2348 A72-33314

Jet aircraft gas turbine engine technology impact on safety, reliability, airline profitability and international trade
16 p2443 A72-33315

NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation
[AIAA PAPER 72-657] 16 p2443 A72-34077

F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc
17 p2597 A72-34390

Lynx helicopter RS 360 turboshaft engine, describing modular design for maintainability
17 p2597 A72-34927

NASA program for low cost turbojet and turbofan engine fabrication for missile and light aircraft propulsion
19 p2848 A72-37637

Low pressure gas ejector operation with cylindrical mixing chamber, discussing design procedure with compression rate and ejection coefficient calculation
19 p2746 A72-37667

Pulsed-jet engine of Messerschmitt-Boelkow-Blohm without valve flaps
19 p2849 A72-38031

Influence of the structural format on the range of critical rotational speeds of rotors in aircraft engines
20 p2963 A72-39801

Quiet engine design for V/STOL and reduced takeoff and landing /RTOL/ aircraft, discussing various engine noise sources, countermeasures and tolerance levels
20 p2963 A72-39819

Russian book - The ASH-62IR engine /4th enlarged edition/.
21 p3098 A72-40463

Iterative solution to aerodynamic design of axial flow compressors used in turbojet engines, calculating meridional velocity distribution
21 p3099 A72-40930

Dimensionless pressure method to account for air density variations in gas turbine cooling system design
21 p3099 A72-41059

Theoretical and experimental study of a dual-mode ramjet /flight range from Mach 3.5 to 7/
[ICAS PAPER 72-24] 21 p3099 A72-41149

The simulation of high pressure hydrogen/oxygen rocket engines.
[AIAA PAPER 72-1027] 21 p3042 A72-41606

Elements of the theory of gas-turbine-unit designs
21 p3100 A72-41700

Engine selection for specific aircraft design and mission, considering bypass and pressure ratios and turbine temperature effects on performance and weight
[SAWE PAPER 910] 23 p3250 A72-43457

IL-62 aircraft propulsion system design and installation details, operational surveillance system and maintenance operations
23 p3325 A72-43639

Determination of the efficiency and range of application of turbines with velocity stages with the aid of the complex power coefficient
23 p3325 A72-43666

Basic dimensionless geometrical relations for the combustion chambers of aircraft gas turbine engines
23 p3325 A72-43674

Contribution to the determination of the characteristics of a gas turbine engine for a helicopter and to the choice of the throttling law
23 p3326 A72-44277

Basic considerations concerning the design of control systems
23 p3326 A72-44279

Design features of Soyuz life support and launch escape systems and Vostok rocket booster stage
23 p3343 A72-44335

Gas turbine wheel design analysis, presenting procedures for estimating revolution rates, blade numbers and component configurations effects on wheel weight for prescribed stresses
24 p3460 A72-45737

ENGINE FAILURE

STOL aircraft roll moment control possibility for externally-blown jet flap due to engine failure
02 p0154 A72-11700

Lubrication system filtration effects on rolling element bearing life and extended mean time to failure of gas turbine engines
07 p1052 A72-18754

Aircraft gas turbine engine monitoring for failure prevention, evaluating condition through spectrum analysis and real time correlation techniques
07 p1053 A72-18766

Engine out flight training safety, recommending certification requirements or training procedures changes
07 p0911 A72-18834

Attack helicopters engine failure problems, discussing flight test results in transition from powered high speed flight to autorotational flight
08 p1108 A72-21011

Russian book on aircraft engine reliability covering defects, fractures and failure analysis, service life prediction, production deficiencies and operational conditions
11 p1706 A72-26068

Hydraulic transmission for driving helicopter tail rotor, noting compensatory system for engine failure
12 p1755 A72-27862

Russian book - The ASH-62IR engine /4th enlarged edition/.
21 p3098 A72-40463

Signal classification through quasi-singular detection with applications in mechanical fault diagnosis.
22 p3158 A72-41976

ENGINE INLETS

Dusty inlet air filtering in aircraft turbine engines, discussing engine operation, dust and filter characteristics
05 p0704 A72-16179

Turbine inlet temperature sensor for gas turbine engines, using noble metal thermoelements with high signal level
[SAE PAPER 720160] 06 p0812 A72-17322

Simulated testing of turbojet engine ingestion of missile exhaust, determining design criteria for aircraft engine inlets from altitude chamber test data
07 p1052 A72-18758

Turbine inlet gas temperature limiting systems design and operation in turboprop engines, describing blocking mechanism, delaying element and altitude compensation
12 p1861 A72-27863

Integrated data acquisition and processing system for inlet-aircraft engine matching, considering all-digital, analog and hybrid approach
15 p2298 A72-32319

Engine inlet total pressure distortion effects on multistage axial compressor and turbojet/turbofan engine performance and stability, considering inlet-engine compatibility
[ICAS PAPER 72-19] 21 p2991 A72-41144

Calculation of the recirculation flow of VTOL lift engines.
[ICAS PAPER 72-42] 21 p3099 A72-41167

Installation caused flow distortion and its effect on noise from a fan designed for turbofan engines.
[AIAA PAPER 72-1006] 21 p2993 A72-41590

Axissymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities
[AIAA PAPER 72-1024] 21 p2993 A72-41602

Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics [AIAA PAPER 72-1025] 21 p3042 A72-41603

Full-scale inlet/engine testing at high maneuvering angles at transonic velocities. 21 p3042 A72-41604 [AIAA PAPER 72-1026]

Analytical method for combining the interaction of inlet distortion and turbulence. 23 p3247 A72-43330

ENGINE MONITORING INSTRUMENTS

Flight display systems current state and future developments, discussing dual attitude indicators and automatic chart systems CRTs, engine displays and malfunction warning systems 03 p0357 A72-13423

Aircraft integrated data systems application to flight safety analysis, engine performance monitoring, crew proficiency, autoland evaluation, operations and logistics 04 p0495 A72-14726

Display device for engine rotational speed nonuniformity parameters indication on oscilloscope without supplementary computation 05 p0662 A72-16125

Aircraft gas turbine engine monitoring for failure prevention, evaluating condition through spectrum analysis and real time correlation techniques 07 p1053 A72-18766

Engine condition monitoring - The Pan Am approach: Phase II. 17 p2597 A72-35324

Automated airborne recording system to obtain data on aircraft engines, subsystems and operational performance, considering cost and economic benefits [AIAA PAPER 72-752] 19 p2802 A72-38126

In-flight and flight-line monitor system to detect foreign object damage in jet engines. 22 p3179 A72-42690

ENGINE NOISE

NT ROCKET ENGINE NOISE

Jet aircraft turbofan engine fan compressor noise reduction by acoustic linings, giving R and D results [BAS PAPER 71 SA6] 01 p0115 A72-10223

Aircraft engine noise effects in airport vicinities, discussing measurement scales, turbofan sources, noise reduction and future air traffic 02 p0154 A72-12022

Air breathing propulsion systems for reducing engine noise level, discussing stoichiometric gas turbine engines, V/STOL propfans and variable-geometry supersonic inlet and exhaust nozzles 03 p0406 A72-13486

Aircraft industry noise reduction efforts to meet FAA requirements for CTOL and STOL aircraft, emphasizing turbofan and compressor noise suppression and/or attenuation 04 p0565 A72-14820

Turbojet engine noise causes and reduction techniques, noting U.S. antinoise standards 04 p0465 A72-14925

Sound attenuation in lined rectangular ducts with uniform steady flow, considering aircraft engine noise reduction 04 p0565 A72-15267

Jet engine silencing plug nozzle suppressor configurations acoustic and thrust performance measurements [AIAA PAPER 72-160] 05 p0706 A72-16826

Army aircraft gas turbine engines pollution potential evaluation program, considering smoke emission, noise and invisible pollutants 07 p1053 A72-18772

Engine fan-compressor maximum noise reduction for given aircraft configuration by acoustic linings on nacelle inlet and exhaust walls 07 p1054 A72-19268

JT8D engine exhaust noise field, considering internal noise sources contribution from exhaust duct sound pressure measurements 07 p1054 A72-19331

Turbojet and turbofan engines noise signatures and sonic boom effects, discussing frequency spectra, atmospheric attenuation and noise suppression systems 07 p0912 A72-20163

Acoustical theory application to jet engine noise reduction, developing mathematical model for blade shock wave spacing in noise generation process 07 p1055 A72-20542

Turbofan engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution [ASME PAPER 72-GT-86] 11 p1705 A72-25661

NASA quiet engine program, discussing noise reduction technology for subsonic civil transport aircraft propulsion system [ASME PAPER 72-GT-96] 11 p1705 A72-25667

Open-air jet engine test stand for flame stabilization, jet and compressor noise studies, noting provisions for rapid installation changes 12 p1795 A72-27416

Bibliography on noise control covering surface transportation, machinery and aircraft noise, industrial criteria, biodynamics, legislation and measurement 13 p2006 A72-29588

Digital data processing techniques for aircraft engine noise data reduction, analyzing fan noise spectrum 13 p1925 A72-29840

Lift fan blade interaction discrete frequency noise, discussing potential and viscous interactions relation to rotor-stator spacing 15 p2297 A72-32019

Low noise aircraft-engine configuration feasibility, discussing turbofan engine noise reduction 15 p2181 A72-32322

NASA/General Electric joint development of low noise propulsion technology, describing demonstrator engine A design, components development and aerodynamic/acoustic performance evaluation [AIAA PAPER 72-657] 16 p2443 A72-34077

Effect on supersonic jet noise of nozzle plenum pressure fluctuations. 17 p2597 A72-35243

NASA R and D programs for quiet STOL aircraft and engines development 18 p2721 A72-36503

Combustion noise generation by burning fuel-air mixtures induced pressure fluctuations as result of time variable heat release rate due to turbulence 18 p2741 A72-36505

Aircraft noise problem in piston engine to turbofan jumbo jet transports, discussing need for noise reduction research [AIAA PAPER 72-815] 19 p2750 A72-38117

Turbulent combustion induced noise, discussing scaling rules for sound power and directional characteristics of radiated sound 20 p2984 A72-39557

Quiet engine design for V/STOL and reduced takeoff and landing (RTOL) aircraft, discussing various engine noise sources, countermeasures and tolerance levels 20 p2963 A72-39819

NASA Quiet Engine program R and D on conventional takeoff and landing subsonic cruise aircraft engine noise [ICAS PAPER 72-48] 21 p3100 A72-41173

Installation caused flow distortion and its effect on noise from a fan designed for turbofan engines. [AIAA PAPER 72-1006] 21 p2993 A72-41590

NASA's quiet engine programs. 22 p3217 A72-43152

Experiment of supersonic air intake buzz. 23 p3249 A72-44496

Tone noise from rotor/stator interactions in high speed fans. 24 p3433 A72-44917

ENGINE PARTS

High pressure gaseous hydrogen effect on space shuttle main engine components alloys under static loads, using surface flawed flat plate PTC samples 01 p0085 A72-10774

Electrodischarge and electrochemical machining applications in continuous repetitive production of aircraft jet engine components 01 p0078 A72-11150

Jet engine component overhaul procedures for fatigue damage repair, detailing distressed metal removal, replacement and welding techniques 02 p0271 A72-12499

Aircraft gas turbine engine and components postwar development in Japan 05 p0705 A72-16499

Influence coefficients method accuracy for design and adjustment of gas turbines, engines and parts 07 p1054 A72-18998

Statistical evaluation for forged jet engine parts tensile tests cost reduction, using regression analysis 07 p0995 A72-19484

Diffusion welding of cast and wrought Udimet 700 superalloy gas turbine engine components, discussing interfacial grain boundary migration and microstructural homogeneity effects on weld joint quality 07 p0997 A72-19998

Recrystallized silicon carbide and reaction bonded silicon nitride as construction materials for gas turbine engine components, describing thermal and mechanical properties [ASME PAPER 72-GT-20] 11 p1673 A72-25619

Countersink boring machines with programmed digital control systems for precision spacing multiple hole drilling in extended aircraft engine components 11 p1642 A72-26816

Boron and carbon fiber reinforced plastics applications in aircraft and engine structural components, discussing dynamic and impact damping properties compared to conventional materials 13 p1982 A72-28555

Air dust erosive damage to helicopter gas turbine engine parts, discussing inertial rotorless filtering systems 13 p2026 A72-28786

Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot 14 p2145 A72-30279

Radiographic measurement of gas turbine components during response to thrust changes, using linear accelerator for X ray generation 14 p2092 A72-30620

Aircraft gas turbine engine Ni base alloy disks and shafts thermomechanical treatment, considering yield strength and high and low cycle fatigue resistance 16 p2406 A72-33299

Russian book - Production of the principal elements and units of aircraft engines 17 p2560 A72-35456

Stress concentration coefficients calculation at sharp cracks and notches for engine parts in tension, compression and combined bending and torsion 24 p3458 A72-44932

ENGINE STARTERS

Airstart flight testing for single engine fighter/attack aircraft, including flight conditions, windmilling, fuel flows, gas temperature, ignition and acceleration 06 p0868 A72-18496

Onboard and ground based hydraulic starter systems design, construction and operation for aircraft turbine engines 08 p1224 A72-21484

Hydraulic starter systems for aircraft turbine engines, examining operation loads and fluid supply and pressure requirements 11 p1702 A72-25284

Low-explosive actuated mechanical devices to actuate switches and valves, sever cables or bolts, dispensing fluids, inflating bags or starting engines 16 p2442 A72-33359

The starting of turbine engines in helicopters. [AHS PREPRINT 662] 17 p2597 A72-34509

ENGINE TESTING LABORATORIES

Arnold Engineering Development Center turbine engine testing facilities and techniques for flight conditions and environment simulation, air/fuel flow and thrust measurement, etc [ASME PAPER 71-WA/GT-8] 05 p0642 A72-15901

Aircraft engine anti-icing tests and evaluation describing ground and airborne techniques [AIAA PAPER 72-162] 05 p0706 A72-16828

Open-air jet engine test stand for flame stabilization, jet and compressor noise studies, noting provisions for rapid installation changes 12 p1795 A72-27416

ENGINE TESTS

NT COLD FLOW TESTS

NT SPACE ELECTRIC ROCKET TESTS

Augmentor wing jet STOL research aircraft development progress report covering design, engine tests, performance prediction, control simulation and stability augmentation [SAE PAPER 710757] 01 p0003 A72-10254

Ten mlb concentric tubes biowaste resistojel thrust performance for hydrogen, water, methane, carbon dioxide and biopropellant mixtures, discussing vibration, shock and acceleration tests [SAE PAPER 710769] 01 p0116 A72-10263

Graphite fiber composite fan blade design for subsonic turbofan engines, discussing weight and fatigue sensitivity reductions and performance test results [SAE PAPER 710771] 01 p0116 A72-10265

Thermal shock fatigue tests on aircraft gas turbine engine inlet nozzles, showing cracks as function of material 01 p0143 A72-11373

NASA Quiet Engine experimental program for jet aircraft noise reduction, discussing aerodynamic and acoustic evaluation and tests of three fans 03 p0406 A72-13679

GE CF6-50 high-bypass two-spool engine development, discussing configuration, installation, endurance tests and various failures 03 p0406 A72-13681

Automated jet engine development facility, discussing assembly and test area and computer controlled operation [ASME PAPER 71-WA/GT-6] 05 p0642 A72-15899

USAF small gas turbine test complex, discussing machinery, equipment, simulated testing, altitude chambers and instrumentation [ASME PAPER 71-WA/GT-7] 05 p0642 A72-15900

Jet engine test facilities for JT9D experimental and production models [ASME PAPER 71-WA/GT-12] 05 p0642 A72-15904

F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment 06 p0758 A72-17582

Fighter/attack aircraft turbojet and turbofan engines testing with/without afterburners 06 p0868 A72-18495

Airstart flight testing for single engine fighter/attack aircraft, including flight conditions, windmilling, fuel flows, gas temperature, ignition and acceleration 06 p0868 A72-18496

Catapult steam ingestion test of turbofan engines in A-7 aircraft, correlating compressor stall occurrences with temperature increase rate in distorted region 07 p1052 A72-18760

Circumferential inlet pressure distortion index derivation for high hub-tip ratio multistage axial flow compressor from one dimensional isentropic flow expressions 07 p1053 A72-18762

Aircraft engine test data processing by polynomial relations, assuming normal measurement error distribution 07 p0994 A72-187978

Hybrid rocket engine design, operation and performance, discussing optimum liquid and solid fuel combinations 07 p1055 A72-20303

Temperature measurements of axial gas turbine rotor for start-up heating and cooling tests 08 p1223 A72-20953

Accelerated full scale aircraft turbine engine corrosion tests in controlled environment, simulating salt, high temperature and humidity conditions [NACE PAPER 76] 10 p1528 A72-24320

Dynamic model of high bypass ratio turbofan engines for L-1011 wind tunnel flutter test program [AIAA PAPER 72-376] 11 p1703 A72-25400

Cessna 210 aircraft electrically driven hydraulic power pack for landing gear system, noting engine and flight tests [SAE PAPER 720327] 11 p1577 A72-25589

High bypass ratio JT15D-1 turbofan engine design and development testing [SAE PAPER 720352] 11 p1703 A72-25603

Four stage gas turbine, measuring blade surface roughness and profile changes effects on flow characteristics and efficiency [ASME PAPER 72-GT-34] 11 p1704 A72-25630

Electric propulsion spacecraft design for ion thruster systems testing with circular solar cells array as gyroscopic stable platform [AIAA PAPER 72-466] 11 p1578 A72-26200

RF ion thruster for spacecraft propulsion, discussing tests and digital computer calculations to optimize design parameter [AIAA PAPER 72-474] 11 p1709 A72-26205

Ion thruster performance calibration investigating double ion content, back ingestion, beam spreading and propellant flow rate [AIAA PAPER 72-475] 11 p1709 A72-26206

Cs contact ion microthrusters, neutral fraction measurements, analytical methods and testing procedures [AIAA PAPER 72-495] 11 p1711 A72-26218

Prime 30 cm ion thruster power conditioning and control system development, integration and testing [AIAA PAPER 72-509] 12 p1860 A72-27424

Composite materials application to gas turbine fan guide vane fabrication, noting economic factors and prototypes performance in engine tests 12 p1815 A72-28100

Gas turbine engine hot part equivalent tests duration determination by analytical method based on Larson-Miller parametric description of stress rupture strength 12 p1887 A72-28243

Rocket engines simulated high altitude testing, using multiple stage ejector augmented supersonic diffuser system 13 p1938 A72-28692

Design and tests of dual deflectable beam strip ion thruster, noting application to two axes satellite attitude control and stationkeeping [AIAA PAPER 72-494] 13 p2027 A72-28951

Two stage solid propellant sounding rocket, discussing engine design, operation and tests 13 p2052 A72-29859

Procedure for the continuous sampling and measurement of gaseous emissions from aircraft turbine engines. [SAE ARP 1256] 18 p2721 A72-36532

The S4MA hypersonic wind tunnel - Its use for tests of ramjet engines with supersonic combustion of hydrogen 19 p2783 A72-37823

Blade passage measurement with the aid of a graphite pin probe in the case of fluid flow engines 19 p2804 A72-38724

Axisymmetric jet stretcher diffuser performance for ramjet engine inlet configurations, testing at angles of attack and supersonic flow velocities [AIAA PAPER 72-1024] 21 p2993 A72-41602

Wall porosity and angle of attack effects on jet stretcher flow field for supersonic engine inlet testing, using three dimensional method of characteristics [AIAA PAPER 72-1025] 21 p3042 A72-41603

Full-scale inlet/engine testing at high maneuvering angles at transonic velocities. [AIAA PAPER 72-1026] 21 p3042 A72-41604

Characteristics of an ejector-type engine simulator for STOJ. model testing. [AIAA PAPER 72-1028] 21 p3042 A72-41607

Digital computer technique and real time monitor software application to instrumentation data acquisition system, discussing design guidelines and gas turbine engine test example 22 p3156 A72-42681

Digital computer controlled testing equipment for separately driven coaxial gas turbine low and high

pressure compressors, emphasizing reliability and flexibility in system design 22 p3157 A72-42682

High response two-transducer pressure measurement for evaluating nonuniform and unsteady inlet flow distortion effects on supersonic jet engine stability and performance 22 p3216 A72-42683

Development of a rocket propulsion system with 500 kgf vacuum thrust for liquid hydrogen/liquid fluorine 23 p3325 A72-43620

Experience with the NRC 10 ft. x 20 ft. V/STOL propulsion tunnel - Some practical aspects of V/STOL engine model testing. 23 p3278 A72-44247

Aircraft gas turbine engine controllers and fuel pump testing under extreme fuel temperatures, noting cavitation characteristics 23 p3327 A72-44287

Mathematical model for dynamics simulation of aircraft turboprop engines, using digital, analog and hybrid computers 23 p3327 A72-44288

Development and testing of a radioisotope-fueled thruster for spacecraft propulsion. 24 p3434 A72-45178

Experimental performance of coaxial injectors in thrust-variable LO2/GH2-rocket engines. 24 p3434 A72-45181

The development of GH2/GO2-pulse mode rocket engines in the thrust range of 6,660-9,340 N /1,500-2,100 lbs/. 24 p3434 A72-45207

Test facilities for aeropropulsion systems, emphasizing utilization, cost and technical advantages, aircraft inlet-engine systems compatibility and test types [AIAA PAPER 72-1034] 24 p3388 A72-45401

ENGINEERING

Book on computer applications to engineering analysis covering mathematical models, numerical techniques, program usage, programming and design 05 p0632 A72-16106

Computer aided engineering - Conference, Waterloo, Canada, May 1971 07 p1024 A72-18776

ENGINEERING DEVELOPMENT

U PRODUCT DEVELOPMENT

ENGINEERING MANAGEMENT

Utility function construction for engineering plants quality criteria 09 p1413 A72-22216

Technological forecasting in venture analysis and planning for long-term growth objectives, engineering project selection and resource allocation [ASME PAPER 72-DE-26] 14 p2174 A72-30868

S-3A aircraft weight control program organization and methods, considering cost and schedule performance [SAWE PAPER 906] 23 p3250 A72-43453

Cost estimation for engineering proposals in competitive bidding, discussing cost variability quantification methods based on PERT assumptions 24 p3468 A72-45478

ENGINEERING TEST REACTORS

Measurements with thermionic fuel elements in the ITR critical facility. 18 p2645 A72-36181

Photoanodic engraving process produced high bit density surface relief holograms on semiconductor crystals for data storage, retrieval and replication applications 21 p3054 A72-40614

ENHANCEMENT

U AUGMENTATION

ENLARGING

U EXPANSION

ENSKOG-CHAPMAN THEORY

U CHAPMAN-ENSKOG THEORY

ENSTATITE

Enstatite chondrite Abec isotopic ratios of Gd, Sm and Eu comparison with terrestrial samples 16 p2457 A72-33566

ENTHALPY

Plasma source with arc stabilized by supersonic air stream, measuring enthalpy, heat flux and potential distribution 01 p0048 A72-10491

Thermodynamic properties of gases at high temperatures, tabulating composition, enthalpy, entropy and thermal conductivity of combustion products with ion seeding 01 p0145 A72-11202

Partial molar enthalpy measurement of oxygen mixture in substoichiometric Zr at 1300 C, using Tian-Calvet microcalorimeter 02 p0170 A72-12167

Compressible boundary layer flow problems, using weighted residuals method with exponentials in velocity and enthalpy approximations 02 p0204 A72-12258

Heat transfer in rectangular annular channel during external heating under supercritical pressure, discussing thermal flux, mass flow rates and enthalpy 03 p0457 A72-14152

Contact surface turbulent mixing instability in free piston high enthalpy shock tunnel waves with test air and argon gases 05 p0644 A72-16548

Electrofluid-dynamic wind tunnel velocity augmentation by enthalpy addition during expansion at constant static pressure and temperature for aerospace vehicles flight conditions simulation [AIAA PAPER 72-166] 05 p0645 A72-16831

Ultrahigh enthalpy gas generation by steady multicomponent flow process with kinetic energy transfer from low molecular weight gas to higher weight working medium [AIAA PAPER 72-167] 05 p0750 A72-16979

Compressibility and total enthalpy difference effects on laminar free shear layer from numerical integration of equations of motion 05 p0653 A72-17011

Binary and ternary alloys of Cr and Fe with Ni, determining interaction coefficient and molar enthalpy for Cr at 1600 C by mass spectrometry 05 p0676 A72-17103

Burning gunpowder surface reactions relative to temperature, chemical enthalpy and acoustic waves of pressure, velocity and density 05 p0751 A72-17211

Enthalpy measurements of niobium silicides at 1200-2200 K by mixing method, using isothermic calorimeter 06 p0833 A72-18431

Radiative cooling effect on enthalpy distribution in air behind incident shock waves produced in explosively driven shock tubes 06 p0904 A72-18529

Cu electrical resistance and heat content oscillographic measurement, using high voltage pulse method 07 p0981 A72-18804

Alpha Ti plastic deformation behavior below 700 K, determining activation area and enthalpy as functions of stress and temperature 08 p1186 A72-21247

Calorimetric measurement of dissolution heat and partial enthalpy limit of Ga in Sn at 969 K 10 p1526 A72-24237

Levitation calorimetry for solid and liquid Mo enthalpy measurement, calculating specific heat and heat of fusion 10 p1496 A72-24243

Vanadium enthalpy and heat of fusion measurement with massive copper calorimeter 10 p1497 A72-24784

Enthalpy measurements of allotrop transformation of Co alloys during hcp-fcc transition with additive elements 10 p1498 A72-24850

Burning gunpowder surface reactions relative to temperature, chemical enthalpy and acoustic waves of pressure, velocity and density 11 p1744 A72-25337

Boundary layer theory for convective heat transfer of two dimensional film cooling systems in turbulent regime, noting momentum, enthalpy and concentration equations 13 p2063 A72-28630

- Vanadium enthalpy and heat of fusion measurement using massive copper calorimeter with isothermal jacket 14 p2113 A72-30222
- Experimental data gathering, processing and presentation for materials enthalpy, heat capacity, thermal conductivity, compressibility and volume over wide pressure and temperature ranges 14 p2130 A72-30599
- Sudden freeze approximation for fluid flow systems relaxation time at constant enthalpy and pressure 17 p2542 A72-35633
- A contribution to the gas dynamics of oblique shocks with change of total enthalpy. 18 p2682 A72-36725
- Enthalpy and heat capacity of boron carbide at temperatures ranging from 273 to 2600 K 18 p2704 A72-37191
- Temperature probes for flows at high enthalpy [ONERA, TP NO. 1074] 19 p2800 A72-37767
- Volume and enthalpy changes at critical point of condensed state, noting Ar enthalpy dependence on temperature 19 p2881 A72-38045
- Temperature distribution in hot wires in high-enthalpy low-density flows [DFVLR-SONDRD-216] 19 p2804 A72-38685
- Total enthalpy measurement from blunt body gas cap emission in arc-heated wind tunnels - Results and application. [AIAA PAPER 72-1021] 21 p2993 A72-41599
- Enthalpy and specific heat of tantalum carbide over the temperature range from 273 to 3600 K 22 p3187 A72-41890
- Velocity, enthalpy and turbulent energy distributions calculation for plane wake behind flat body by asymptotic solution based on turbulence theory 23 p3249 A72-44083
- Electric resistance and enthalpy of molybdenum and tungsten 23 p3272 A72-44167
- ENTIRE FUNCTIONS**
- Infinite series summation in terms of rapidly convergent definite integrals 05 p0682 A72-15808
- Real rational function Cauchy index computed from integral functions of polynomial coefficients and signature of infinite class of matrices 07 p1026 A72-18817
- Time optimal control of distributed systems with random properties, considering n integral relations and flying wing vehicle torsional vibration problems 10 p1421 A72-24427
- Limiting value of the lower indicator, and lower bounds for integral functions with positive zeros 20 p2947 A72-39863
- A note on algebraic differential equations whose coefficients are entire functions of finite order. 22 p3198 A72-41948
- The growth of entire solutions of differential equations of finite and infinite order. 24 p3418 A72-44725
- ENTRAINMENT**
- Ionic winds with restricted entrainment and gauge electrode, considering diffusion flame aeration in combustion systems 07 p1037 A72-19372
- Entrainment interface evolution in turbulent flow, examining surface slope discontinuities and curvature and overall speed of advance 10 p1467 A72-24332
- Axisymmetric turbulent jets local entrainment rate as function of axial distance from nozzle exit, using Ricou-Spalding porous wall technique 10 p1481 A72-24425
- Dislocation damping by point defects entrainment, calculating internal friction force rate dependence based on weak interactions continuum model 10 p1527 A72-24979
- Three dimensional compressible turbulent boundary layer growth prediction, deriving entrainment equations from two dimensional incompressible flow relations 16 p2375 A72-32835
- The intrinsic structure of turbulent jets. 18 p2684 A72-37201
- ENTRENCHED STREAMS**
- U STREAMS**
- ENTROPY**
- Thermodynamic properties of gases at high temperatures, tabulating composition, enthalpy, entropy and thermal conductivity of combustion products with ion seeding 01 p0145 A72-11202
- Pressure drop relation to entropy production in viscous low velocity adiabatic pipe flow, showing analogy with Oswatitsch theorem 01 p0051 A72-11255
- Weather forecasting, discussing statistical entropy, numerical and statistical methods and computer technology utilization 02 p0254 A72-12777
- Aluminum intergranular entropy estimation, neglecting coupling between atomic vibrations 03 p0376 A72-13969

- Superposable and self-superposable MGD flows from nonlinear differential equations, considering entropy, flow velocity and magnetic field strength 05 p0694 A72-16030
- Plane Couette flow of incompressible non-Newtonian viscous fluid between parallel plates, using minimum entropy production variational principle 06 p0798 A72-17779
- Incompressible fluid turbulent flow variational principles, discussing Malkus principle for maximum dissipation rate and minimum entropy production principle for convective and dissipative systems 06 p0800 A72-18116
- Entropy effect in two dimensional conditional reflex decision situations upon rats central nervous analysis-synthesis processes 07 p0925 A72-20661
- Minimal dynamic systems invariant Borel probabilistic measure with metric space and topological entropy equality 08 p1210 A72-22187
- Shock wave profile equation derivation based on minimal entropy rate variational principle for stationary irreversible processes, using local potential for Boltzmann type equation 09 p1295 A72-23473
- Probability density functions shape estimation by deterministic heuristic and entropy maximization algorithms 10 p1442 A72-23798
- Bayes analysis application to Weibull distribution parameters estimation, using entropy concept for figure of merit to assess reliability analysis 10 p1444 A72-23987
- Small scale flow and surface effects in multiphase media hydromechanics, obtaining entropy production in mixture for interphase transformations characterization 10 p1468 A72-24430
- Chernikov approximation for general relativistic thermodynamics nonstationary equations of heat transfer, thermal and viscous stresses and entropy balance 12 p1844 A72-27188
- Lunar rock and mineral shock melting and vaporization from hypervelocity meteoroid impacts, calculating entropy, phase changes and thermal equilibrium 14 p2155 A72-30520
- Nonlinear thermoelasticity theory extension via entropy production inequality theorem, deriving expressions for stress tensor and heat conduction vector 16 p2465 A72-32980
- Entropy waves effect on gas pressure oscillations during powder combustion in semiclosed volume, noting resonant frequencies equation 16 p2475 A72-33096
- French book on thermodynamics of equilibrium and nonequilibrium composite systems covering entropy potentials for n degrees of freedom system 16 p2478 A72-33503
- Entropy and chemical change. I - Characterization of product /and reactant/ energy distributions in reactive molecular collisions: Information and entropy deficiency. 17 p2511 A72-34738
- On the first-exursion probability in stationary narrow-band random vibration. II. [ASME PAPER 72-APM-16] 17 p2628 A72-34800
- Closed rotating cosmologies containing matter described by the kinetic theory - Entropy production in the collision time approximation. 17 p2618 A72-35823
- Caratheodory classical thermodynamics formulation presented in mathematically rigorous form by differential geometry and topology methods 18 p2741 A72-36508
- Method of Lagrange multipliers for exploitation of the entropy principle. 19 p2825 A72-37842
- Muller entropy principle-imposed restrictions on thermodynamic and thermostatic constitutive relations for fluids in electromagnetic fields 19 p2834 A72-37843
- Relativistic thermodynamics development based on invariant entropy concept, considering frictionless heat conduction and Carnot cycles 19 p2835 A72-37928
- Propagation and growth of shock waves in inhomogeneous fluids. 19 p2787 A72-38430
- Pressure propagation rate relation to local sound speed in unsteady anisentropic gas flow with particle-varying specific entropy 19 p2788 A72-38564
- Black hole physics compatibility with thermodynamics second law formulation based on black hole area as entropy measure 21 p3085 A72-41216
- A non-equilibrium thermodynamic theory of simple materials based on a single-integral thermodynamic functional. 21 p3124 A72-41505
- Entropy criterion in the estimation of the dynamic quality of automatic control systems 21 p3039 A72-41803

- Entropy and simple waves in multidimensional gas flow. 22 p3166 A72-42314
- Isobar-isothermal potentials, entropy and formation heat of chromium silicides from thermoelectromotive force measurements of high temperature galvanic elements 23 p3298 A72-43286
- Stimulated entropy /temperature/ scattering and its influence on stimulated Mandelstam-Brillouin scattering 23 p3297 A72-44478
- Necessary conditions for steady state in radiation - Matter interaction and the role of entropy. 24 p3461 A72-44806
- Effect of a flow with a stagnation point on the rate of variation of the total entropy of a fluid mixture 24 p3465 A72-45074
- Information theory and statistical mechanics applications to thermodynamics, discussing entropy and superiority of Georgian to Kelvin temperature scale 24 p3465 A72-45372
- Some reflections on the nature of entropy, irreversibility and the second law of thermodynamics. 24 p3465 A72-45628
- ENUMERATION**
- Algorithms for combinatorial problem optimal solution based on implicit enumeration method, applying to assembly line balancing 12 p1837 A72-28117
- ENVELOPES**
- Peak parametric envelope calculation for hf pulse transients 06 p0773 A72-17571
- Consequences of the Stromgren's theorem for radiative envelope stars. 18 p2728 A72-36760
- Studies of hydrodynamic events in stellar evolution. II - Dynamic instabilities in stellar envelopes. 19 p2854 A72-37234
- Mixing between stellar envelope and core in advanced phases of evolution. IV - Effect of superadiabaticity in convective envelope. 23 p3335 A72-43486
- Effect of envelope limiting in pulse-compression moving-target-indicator radar systems. 24 p3380 A72-45575
- ENVIRONMENT MODELS**
- ATS F/G spacecraft thermal control design verification by chamber thermal balance tests and performance prediction mathematical model of earth viewing module and orbital environment 12 p1877 A72-27527
- Mathematical expression for pilot incapacitation applied to data from high stress/short duration encounters with environmental problems 12 p1775 A72-28284
- ENVIRONMENT POLLUTION**
- NT AIR POLLUTION**
- NT WATER POLLUTION**
- Land pollution remote sensing, discussing economic and political impact in terms of land use, transportation, energy supplies and recreational opportunities [AIAA PAPER 71-1039] 01 p0057 A72-10523
- Environmental pollution sensing by vibrational laser Raman scattering probe measuring species constituency and temperature, discussing fluorescence, scattering cross sections and band shape [AIAA PAPER 71-1084] 01 p0067 A72-10541
- Spaceborne Fourier interference spectrometer for environmental pollutant sensor, discussing IR detection systems, instrument servo, data reduction and handling systems and optical tolerance [AIAA PAPER 71-1108] 01 p0067 A72-10552
- Miniaturized magnetic mass spectrometer for trace contaminants continuous monitoring and control, discussing applications to closed atmospheric systems in spacecraft and undersea environments [AIAA PAPER 71-1122] 01 p0068 A72-10558
- Laser fluorosensor for remote environmental probing, considering applications to oil slick mapping, locating lignin sulphate pollution sources and hydrologic monitoring of tracer dye dispersal [AIAA PAPER 71-1121] 01 p0080 A72-10559
- Air law concept as totality of legal regulations related to atmosphere use by flying devices, discussing relation to international environmental protection 01 p0147 A72-11107
- Artificial satellites for earth resources and environmental contamination control, discussing remote sensing physical problems and earth surface radiative characteristics 02 p0207 A72-11778
- Pollution and environmental quality remote sensing, describing five dimensional sensor/applications matrix for decision guidance 02 p0212 A72-11827
- METROMEX field project to investigate inadvertent weather modification by urban-industrial effects and man-made precipitation changes 03 p0384 A72-13636
- Automated electromagnetic pollution data acquisition systems for environmental ecology, discussing

computer technique and data retrieval, analysis and storage
03 p0328 A72-14040

Pollution free electrical power generation from solar energy, discussing microwave transmission to earth, power shortages, thermal pollution and solar cell manufacture cost
[ASME PAPER 71-WA/SOL-2] 05 p0614 A72-15892

Remote sensing methods applications to environmental protection, discussing microwave, radar, IR, optical and acoustical active and passive methods
[DGLR PAPER 71-132] 06 p0809 A72-18229

Solar energy conversion as pollution-free power source, discussing silicon solar cells, power transmission techniques, satellite solar power stations and system control and guidance
06 p0893 A72-18625

Power generation for electrical, thermal and transportation needs, considering technology use for air, noise, thermal, water and nuclear pollution reduction
06 p0761 A72-18627

National Environmental Policy Act /PL 91-190/ impact on Army aircraft turbine engine development in terms of performance, additional cost and time
07 p1053 A72-18773

Space and atmosphere contamination by industrial wastes, aircraft and spacecraft exhaust and radioactive waste disposal, considering legal safeguards
07 p1104 A72-19466

Classification of mass spectra on computers /COM-SOC/ for compound characterization of complex mixtures with geochemical and environmental applications
07 p0980 A72-20393

Ultrastructural and morphometric studies of beryllium oxide-contaminated environment effect on monkey and dog lung tissue
07 p0925 A72-20686

Turboprop engine trends for short haul conventional and STOL aircraft, considering variable pitch fans, reduction gears, thrust reversal and noise and environmental pollution
[ASME PAPER 72-GT-86] 11 p1705 A72-25661

Acoustical environment pollution control, considering noise annoyance effects due to industry and construction, surface and air traffic, alarm devices, radio and TV, etc
13 p2067 A72-29554

United Nations activity in international space program for earth resources and environmental pollution surveillance by satellites
15 p2220 A72-31227

Satellite observation of earth surface, discussing remote sensing techniques application in pollution control and ecology
15 p2319 A72-31232

Gases and vapors spectral signatures application in correlation spectroscopy and interferometry for aerospace monitoring of earth resources and pollution
16 p2393 A72-33630

Potential applications of NASA-developed technology to problems of the environment.
[ASME PAPER 72-ENAV-23] 20 p2895 A72-39154

Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters
23 p3328 A72-44296

ENVIRONMENT SIMULATION
NT ACOUSTIC SIMULATION
NT ALTITUDE SIMULATION
NT SPACE ENVIRONMENT SIMULATION
NT THERMAL SIMULATION
NT WEIGHTLESSNESS SIMULATION

Laboratory simulation of Jovian atmospheric reactions, observing amino nitriles formation
04 p0572 A72-14764

Acceleration force simulation for altered weight effect on animal tolerance to restraint, discussing body mass loss, reduced lymphocyte count and disorientation
04 p0472 A72-14866

Stress corrosion crack tip electrochemical reactions simulation on Ti and alloy surfaces, using modified rotating disk apparatus with pH measurement
04 p0536 A72-15739

Condenser microphones sensitivity and frequency response characteristics measurement at normal and elevated atmospheric pressures in hyperbaric chamber air and He-air environments
06 p0766 A72-17808

R and D management policies choices with respect to Bayesian decision-theoretic model in simulated environments
07 p1105 A72-19553

Lunar laser reflectors specifications and fabrication procedures, discussing lunar environment simulator and optical test equipment, techniques and results
07 p0947 A72-20261

Astronaut training obtained visually in lunar module simulator via film, spacecraft models and landing site relief models as sources for complex TV system
08 p1147 A72-21335

ATC systems analysis by computerized real time environmental simulation, taking into account new aircraft types, navigation and supervision aids
09 p1348 A72-22782

Venus probes thermal insulation materials development and testing under simulated Venus atmospheric conditions
[AIAA PAPER 72-368] 11 p1744 A72-25393

Safe aircraft fuels crashworthiness evaluation in terms of ignition susceptibility parameter, noting full scale crash environment simulation
[ASME PAPER 72-GT-27] 11 p1702 A72-25623

Simulated gravity environment tests of vertical jump features, recording work performed, body center of gravity upward velocity, potential and kinetic energy changes
12 p1770 A72-27479

Man computer weapons effectiveness and system test environment /WESTE/ instrumentation system with Decca navigation for simulated combat environmental flight tests
12 p1754 A72-27515

Mathematical model for numerical simulation of warm fog modification by seeding hygroscopic particles, taking into account turbulent diffusion and horizontal wind advection
13 p1992 A72-28844

Multiscale numerical model for local weather development simulation, noting forecasting for long distance air travel
13 p1993 A72-28857

Meteorological-astronomical diurnal and seasonal environmental rhythm simulation for psychological stresses alleviation in long term space missions
13 p1910 A72-29322

Surface pressure and vector wind fields computerized analysis from satellite radar radiometer simulation and conventional data
13 p1995 A72-29619

Environmental chamber simulation to show terrestrial microorganisms survival under Jovian atmospheric conditions
15 p2183 A72-31293

Multi-environment reliability test program for airborne electronic systems under simulated temperature, humidity, vibration and shock conditions
15 p2215 A72-32616

Spacecraft boom deployment dynamics environmental simulation and testing for preflight system reliability evaluation
15 p2321 A72-32627

Materials characteristics relevance for USAF technology, discussing processing conditions, environment simulation, real time techniques, ultrasonic and X ray inspection methods, etc
16 p2404 A72-32823

A method for simulating wind conditions during atmospheric stagnation periods.
20 p2947 A72-38965

Computer program to simulate electromagnetic signal densities, data rates and power from land based radar transmitters as functions of time and location
20 p2902 A72-38992

FOSS - A dynamic six degree-of-freedom environmental simulator for evaluation of electro-optical guidance systems.
[AIAA PAPER 72-862] 20 p2911 A72-39135

Simulation in plasma wind tunnels of the environmental conditions for sounding rocket experiments
20 p2912 A72-39928

Application of an agar-agar chamber for the study of electromagnetic waves in an inhomogeneous medium.
21 p3015 A72-40359

Digital computer equipped facility for training simulators environmental simulation capability testing, describing electronics interface, control and display equipment
22 p3164 A72-42928

A sight simulation technique using TV-screen perspective correction for restricted maneuver flight missions
24 p3388 A72-45298

A practical evaluation of earth-backscatter simulation and an estimate of the HF ground-scatter coefficient.
24 p3380 A72-45636

ENVIRONMENT SIMULATORS
NT SOLAR SIMULATORS
NT SPACE SIMULATORS

Hailstone impact simulator for prediction of hail damage to aircraft structures, presenting data on damage to flat metal sheets and spherical caps
[AIAA PAPER 72-163] 05 p0645 A72-16957

Cascade wind tunnel and water table determination for trajectories and velocities of suspended particles in fluid flow through axial compressor stage
07 p0907 A72-18756

Night Carrier Landing Trainer flight and carrier environment simulator for A-7 aircraft pilot training, discussing performance predictions from computer data analysis
07 p0927 A72-19137

Hailstone impact simulator for aircraft damage prediction in testing prospective structural designs
13 p1938 A72-28855

USAF aerospace medical research on human capabilities as limiting factor in defense systems development, discussing environmental simulators and human test facilities
21 p3008 A72-40973

ENVIRONMENTAL CHAMBERS
U TEST CHAMBERS

ENVIRONMENTAL CONTROL
Nonflammable coolants for Saturn instrument unit environmental control systems, considering component materials compatibility with selected dielectric fluids
01 p0091 A72-10769

Mathematical models for man-machine control behavior in biodynamic environments including manual control performance and interface elements
03 p0318 A72-13162

Short haul operating systems in air transportation environments, discussing terminal vs cruise configurations, costs and noise abatement
03 p0309 A72-13422

Supercooled and warm fog dispersion technology, considering air heating, helicopter downwash and seeding methods
04 p0543 A72-14812

Facility for electron microscopy of specimens in controlled environments, observing lattice structure in wet catalase crystals
07 p0993 A72-20586

Malfunction detection for space station environmental/thermal control and life support system, using onboard computer
[AIAA PAPER 72-241] 10 p1423 A72-24447

Hot water ejector application to environmental control, considering noise suppression, air and gas purification and dust particles precipitation
10 p1460 A72-24491

Lungs fibrosis and cancer caused by asbestos fibers inhalation, noting environment control for protection against workers health hazards
11 p1583 A72-25548

Pilots seating active and passive isolation from I.F vibrations in helicopters and jet aircrafts, discussing human factors and dynamic environment
13 p1910 A72-29558

Private and governmental regulatory aspects of environmental noise abatement and control, discussing legal efforts and trends at local, state and federal levels
15 p2340 A72-32614

Aero engines and propulsion systems development contribution to air transport economics and regularity, considering environmental factors
16 p2443 A72-33313

U.S. federal regulation on occupational noise exposure control for hearing loss prevention, discussing noise measurement, reduction and periodic tests
16 p2358 A72-33324

Optimal temperature control for microbial inactivation by composite environment of heat and gamma radiation, using quadratic technique
18 p2649 A72-36313

Canadian program for global environmental and world resources monitoring system, discussing management, technology and user interface
[AIAA PAPER 72-742] 18 p2742 A72-36548

Environmental considerations in airport development.
18 p2743 A72-36778

What's new in airport planning.
18 p2675 A72-36780

Space station prototype environmental/thermal control and life system - A current overview.
[ASME PAPER 72-ENAV-35] 20 p2894 A72-39143

Development of a laboratory prototype spraying flash evaporator.
[ASME PAPER 72-ENAV-28] 20 p2894 A72-39149

Design criteria for the modular space station environmental control and life support system selection.
[ASME PAPER 72-ENAV-25] 20 p2894 A72-39152

Space station atmospheric revitalization system design, covering temperature, humidity, carbon dioxide, contaminant and oxygen generation and composition control and vehicle configuration
[ASME PAPER 72-ENAV-24] 20 p2894 A72-39153

Environmental control and life support subsystem conceptual design studies for shuttle launched 6-12 man crew modular space station
[ASME PAPER 72-ENAV-22] 20 p2895 A72-39155

Significant factors in environmental and thermal control/life support system design for space shuttle orbiter
[ASME PAPER 72-ENAV-21] 20 p2895 A72-39156

Optimal shuttle research applications module /RAM/ environmental control and life support system for sortie missions
[ASME PAPER 72-ENAV-20] 20 p2895 A72-39157

Comparative evaluation of environmental control and life support systems for the space shuttle orbiter.
[ASME PAPER 72-ENAV-19] 20 p2895 A72-39158

Space shuttle environmental temperature control-life support system program changes, discussing air cooled electronic equipment, cryogenic stores, crew size and mission duration
[ASME PAPER 72-ENAV-18] 20 p2895 A72-39159

- Modular environmental control/life support system design for low cost shuttle launched space station, evaluating humidity, carbon dioxide, water and waste management [ASME PAPER 72-ENAV-17] 20 p2895 A72-39160
- Computer simulation of the space shuttle orbiter environmental thermal control system. [ASME PAPER 72-ENAV-12] 20 p2896 A72-39165
- Integration of an automated onboard data management system with a manned spacecraft environmental thermal control and life support system. [ASME PAPER 72-ENAV-6] 20 p2896 A72-39171
- Effects of environment on formation of finished surface in drilling aluminum and aluminum alloys. 21 p3060 A72-40936
- Theoretical model, laboratory experiments and in situ measurements by instrumented sailplane for investigating cloud and precipitation formation physics relationship to atmospheric pollutants cleansing 23 p3311 A72-44263
- R and D on environmental and thermal control/life support system application to lunar base mission, discussing reliability and food regeneration 24 p3375 A72-45164
- The role of the United Nations in earth resources satellites. 24 p3468 A72-45185
- The Space Station Prototype Program - The development of a regenerative life support system for extended-duration missions. 24 p3375 A72-45193
- High level cleanliness maintenance and contamination control for instrument unit ring guidance system in Saturn 5 launch vehicle 24 p3388 A72-45297
- ENVIRONMENTAL ENGINEERING**
- Acoustic echo sounder as real time monitor of airport environmental meteorological parameters 01 p0103 A72-11137
- Environmental research with instrumented aircraft, discussing application to operational forecasting and weather modification experiments in hurricanes and tropical convective clouds 04 p0542 A72-14682
- Remote sensing methods applications to environmental protection, discussing microwave, radar, IR, optical and acoustical active and passive methods [DGI R PAPER 71-132] 06 p0809 A72-18229
- Environmental effects on aircraft and propulsion systems - Conference, Trenton, N.J., May 1971 07 p1052 A72-18751
- Collaboration of World Health Organization and various international astronomical organizations for space technology applications to man-environment relationships and medical and communication sciences 07 p0933 A72-20300
- Sonic boom research facilities and techniques, emphasizing applicability to other environmental problems 09 p1262 A72-23317
- Aircraft pilot seating protection from dynamic environment by active vibration isolation, discussing human frequency response characteristics 11 p1585 A72-26391
- Environmental effects on aircraft structure operational reliability, discussing failure removal and protective coating lifetime 14 p2072 A72-30285
- Environmental progress - Conference, New York, May 1972 15 p2191 A72-32601
- Si solar cell design for high power/weight ratio and extreme environmental operating conditions, describing technological innovations for reliability and efficiency enhancement 19 p2754 A72-37780
- Potential applications of NASA-developed technology to problems of the environment. [ASME PAPER 72-ENAV-23] 20 p2895 A72-39154
- Mathematical model for MOS transistor circuit analysis, noting parameters measurement and environmental effects representation 20 p2909 A72-39783
- Acoustic pressure and sound intensity levels and noise annoyance international standards for civil aircraft noise reduction 20 p2888 A72-39803
- Ground humidity and wind velocity effects on terrestrial scintillation, considering adiabatic temperature stratification factor 21 p3007 A72-40738
- Techniques for dealing with the effects of bad weather in satellite communications systems. 21 p3017 A72-40856
- Flying personnel auditory defects caused by environmental conditions, discussing aircraft noise, vibrations and atmospheric pressure effects 21 p3002 A72-40924
- ENVIRONMENTAL LABORATORIES**
- EOSS - A dynamic six degree-of-freedom environmental simulator for evaluation of electro-optical guidance systems. [AIAA PAPER 72-862] 20 p2911 A72-39135

ENVIRONMENTAL RESEARCH SATELLITES

- Satellite communication regional and domestic applications, discussing educational, earth resources, geological survey, environmental and maritime uses 04 p0487 A72-15073
- NASA developed geostationary weather and environmental satellite for launch in 1973, discussing ground station equipment, antenna system and data collection service 23 p3343 A72-43551

- Weather satellites - Their role in the application of environmental services to the marine industries. 24 p3420 A72-44648

ENVIRONMENTAL TEMPERATURE**U AMBIENT TEMPERATURE****ENVIRONMENTAL TESTS****NT COLD WEATHER TESTS****NT CORROSION TESTS****NT HIGH TEMPERATURE TESTS****NT LOW TEMPERATURE TESTS****NT SALT SPRAY TESTS****NT UNDERWATER TESTS**

- Monograph on stress corrosion failure, covering threshold stresses, fracture mechanics, electrochemical processes, hydrogen embrittlement, corrosion, various steels and alloys, environmental effects, etc 01 p0082 A72-10166

- Interim automatic scanning multichannel data acquisition system for environmental test laboratory, using programmable calculator 02 p0200 A72-12477

- Low temperature liquid bath tests for IC environmental reliability, monitoring wire bonding, metallization, surface contamination, sealing and die bonding 03 p0337 A72-14296

- Microorganism life in extreme high temperature, PH and solute concentration environments, noting salt effect on enzyme activity 04 p0471 A72-14801

- Composite materials testing with four point loading method, studying environmental and creep effects in flexure 04 p0537 A72-15091

- External biodynamic models for human mechanical response to various environmental forces, emphasizing injury mechanisms [AD-736985] 04 p0481 A72-15266

- Ti-Al-Mo-V alloy sustained load stress corrosion crack growth in salt and distilled water environments 04 p0534 A72-15570

- Planar coax micropackaging of minicomputers for aircraft navigation and military systems, noting environmental tests 05 p0632 A72-15772

- Fatigue crack growth rate testing in gaseous environments at nonambient pressure and temperature in test chamber 05 p0643 A72-16186

- Environmental tests on carbon fiber Vulcan air-brake flap, including thermal cycling, sustained loading, immersion, corrosion and lightning strike tests 05 p0681 A72-16998

- Plastic encapsulated transistors and IC moisture resistance tests for reliability under laboratory and field conditions 06 p0782 A72-17363

- JT15D turbofan engine antiicing system development, discussing icing test program and results 07 p1053 A72-18769

- C-54 A/B aircraft engine air particle separator anti-ice system design features, manufacturing techniques and testing 07 p1053 A72-18769

- Turboprop electric igniter climatic test problems and equipment for assessing quality control 07 p0954 A72-19112

- Environmental hydrogen embrittlement of Ti-Al alloy as function of test displacement rate and microstructure variation 07 p1016 A72-19933

- Lunar and terrestrial soil thermal and electrical properties measurement in vacuum and He atmospheres 08 p1232 A72-21150

- Sounding rocket payloads environmental testing, discussing test techniques for shock, vibration, temperature, humidity, pressure, contamination, corrosion effects during handling, storage, launch, flight and recovery 08 p1241 A72-21173

- Adverse environmental effects on epoxy composites resin-glass interface properties, investigating epoxy-compatible silanes contribution to composite performance 08 p1194 A72-21696

- Climatic load effects on carrying capacity of thick walled glass reinforced polymer rings with residual stresses 08 p1195 A72-21765

- Ceramics in severe environments - Conference, North Carolina State University, Raleigh, December 1970 09 p1333 A72-22376

- Silicon nitride ceramics resistance to thermal shock and stress in severe environments 09 p1334 A72-22386

- Sonic booms effects on domestic and wild animals, discussing field and laboratory findings 09 p1267 A72-23322

- Field and laboratory sonic boom simulators, noting required characteristics 09 p1292 A72-23323

- Environment and grain size effect on steady state creep and creep rupture properties of Ni-W solid solution 09 p1331 A72-23381

- Thermal shock and temperature cycling environmental testing, discussing military specifications, components thermal lag characteristics, environmental test chambers and various cooling methods 10 p1459 A72-24144

- Environmental sensitivity effect on crack propagation rates in steels and Al and Ti alloys, discussing corrosion fatigue 10 p1499 A72-24899

- Space and ground environments effect on cryogenic multilayer insulation materials, tabulating mechanical and thermophysical test data [AIAA PAPER 72-286] 11 p1741 A72-25225

- Organic matrices in structural composites, considering mechanical behavior, processability and properties in adverse environments 11 p1674 A72-26230

- High voltage electron microscope applications to materials reactions in gaseous environments, exemplifying by stress corrosion morphology in stainless steel, Al-Zn-Mg and Ti-Al 11 p1668 A72-26945

- Performance and environmental tests of large lightweight solar array unit, measuring structural members displacements with electro-optical instruments [AIAA PAPER 72-569] 12 p1755 A72-27377

- ATS F Environmental Measurements Experiment package for synchronous altitude space environment and electromagnetic-ionospheric interactions studies 12 p1795 A72-27525

- Semiconductor strain gage design and environmental performance for flight control systems 12 p1812 A72-27962

- Solar cells array design and assembly techniques, discussing tests for Esro satellites aerospace environments 12 p1758 A72-28033

- Protective coatings for corrosion prevention of high strength steels under environmental conditions of humidity, salt fog, tap and salt water immersion 12 p1835 A72-28157

- Parotid fluid 17-hydroxycorticosteroid level relation to hyperthermia stress at various heat levels during thermal environmental testing 12 p1768 A72-28335

- Materials selection for contact and clearance type seals for various environment conditions [ASLE PREPRINT 72AM 23] 13 p1964 A72-28975

- Soviet wind tunnel for power plant-environment interactions studies, discussing working sections velocity distributions calibration 13 p1939 A72-29644

- Explosives life limitation due to aging phenomena, discussing chemical and physical processes and environmental effects 14 p2143 A72-30752

- FRAM /failure rate appraisal machine/ concept and application for modular electronic and electromechanical assemblies environmental cycling tests, noting technical and economical effectiveness 14 p2093 A72-31169

- Computerized analytical system for side-looking radar imagery interpretation by isodensitracer scanned density data multivariate analysis applied to environmental discrimination 15 p2198 A72-32064

- Irradiation system for animal and human subjects exposure to controlled microwave radiation in environmental tests 15 p2191 A72-32573

- Computer controlled random environment test systems for large scale off-line data analysis and reduction, using Fourier analyzer 15 p2204 A72-32609

- Prediction models for dynamic environment experienced by cargo during air and rail transportation 15 p2339 A72-32610

- Low temperature environmental chamber for F-111 proof load testing, describing components of cold air forced convection recirculation system with liquid nitrogen injection 15 p2214 A72-32612

- Lunar roving vehicle qualification program to meet performance specifications under lunar conditions, describing testing procedures and project management techniques 15 p2214 A72-32613

- Multi-environment reliability test program for airborne electronic systems under simulated temperature, humidity, vibration and shock conditions 15 p2215 A72-32616

- Organization and management requirements for environmental testing laboratory from viewpoint of test results, data handling, analysis and test reporting 15 p2340 A72-32617

Dynamic input to cargo in turbojet aircraft studied during C141 and C5A flights, discussing instrumentation, test procedures, data reduction processes and results
15 p2181 A72-32625

Spacecraft boom deployment dynamics environmental simulation and testing for preflight system reliability evaluation
15 p2321 A72-32627

Temperature effect on fatigue crack growth in high strength annealed Ti-Al-V alloy in water, oxygen/hydrogen and vacuum environments
16 p2406 A72-33320

Helicopter/ship dynamic interface testing for launch and recovery capabilities under sea environment conditions, discussing visual landing aids, wind, visibility and ship motions
[AHS PREPRINT 650] 17 p2491 A72-34505

Cythere capsule for irradiation of experimental fuel elements under geometric and thermal conditions representative of thermionic converters
17 p2579 A72-34619

Experimental determination of the aeroacoustic environmental about a slender cone.
[AIAA PAPER 72-706] 17 p2486 A72-35482

Blood oxygenating ability of helium- and argon-oxygen environments relative to air, using alveolar gas equation to predict arterial oxygen pressure
18 p2649 A72-36438

The effects of environment on the elevated temperature fatigue behavior of nickel-base superalloy single crystals.
18 p2700 A72-36587

Electrical changes in the surface region of chalcogenide glasses.
19 p2822 A72-37454

Lunar and terrestrial soil thermal and electrical properties measurement in vacuum and He atmospheres
20 p2968 A72-39255

Changes in the wear resistance of polymer surface layers in aggressive and biologically active media
21 p3072 A72-40081

USAF aerospace medical research on human capabilities as limiting factor in defense systems development, discussing environmental simulators and human test facilities
21 p3008 A72-40973

Inert gas effects on embryonic development.
22 p3145 A72-42744

Thermal balance in man during 24 hours in a controlled environment
22 p3145 A72-42747

Influence of a preliminary exposure to carbon monoxide on the development of hypokinetic disturbances in albino rats
23 p3255 A72-43909

Fatigue behavior of a titanium 8Al-1Mo-1V alloy in a dry argon environment.
23 p3304 A72-44261

Friction and adhesive and abrasive wear of ceramics, discussing effect of environmental water and hydrocarbons
15 p2260 A72-32129

ENZYME ACTIVITY

NT FERMENTATION

Hypophysectomy in rats, resulting in prolonged red blood cell survival due to oxygen consumption decrease and altered erythrocyte enzymatic processes
01 p0010 A72-10075

Starvation effects on male rats, mice and guinea pigs hepatic drug metabolism, discussing ethylmorphine, p-nitroanisole and aniline
01 p0015 A72-11262

Alpha-L-fucosidase, beta- and alpha-D-galactosidases and alpha-D-mannosidase activity changes in human placenta at various embryogenesis phases
02 p0163 A72-12294

High altitude hypoxia effects on rat myocardium lactic dehydrogenase isozyme complement and anoxic tolerance
02 p0165 A72-12834

Alpha amino acids proteinoids or thermal polymers enzyme activity, investigating hydrolytic activities and decarboxylation reactions
04 p0483 A72-14776

Biochemical processes and structures interrelation, using nucleoprotein coacervate models and ribonuclease and polynucleotide phosphorylase enzymes
04 p0469 A72-14783

Coacervate drops oxidoreductases and stability in primitive prebiological systems, using polyphenol oxidase-carbohydrate-histone-quinones
04 p0469 A72-14784

Primitive earth model of ion selective enzymatic asymmetric synthetic membrane for accelerated nutrients and metabolites transfer studies
04 p0469 A72-14787

Microorganism life in extreme high temperature, PH and solute concentration environments, noting salt effect on enzyme activity
04 p0471 A72-14801

Serum enzyme activity changes response to constant test exercise, discussing relation to maximum oxygen uptake
04 p0472 A72-14897

Plasma renin activity during supine physical exercise as function of salt loading
04 p0480 A72-15214

Catalytic action in organic catalyst predecessors of contemporary enzymes, discussing polymers of alpha-amino acids and hydrogen cyanide
05 p0624 A72-16128

Myokinase activity determination as diagnostic test for human myocardial infarction, comparing to creatine phosphokinase activity test
05 p0618 A72-16388

Conformal electron interactions in biopolymer and hypermolecular biological systems, discussing calcium ions effects, enzyme activity, muscle contractions and information theory
07 p0915 A72-18803

Kinetics of heat inactivation of phosphoglycerate kinase in soluble fraction from hydrogenomonas facilis
07 p0922 A72-20237

Effect of salt on activity, stability and allosteric properties of catabolic threonine deaminase from extremely halophilic bacteria
09 p1275 A72-22535

Ribonuclease molecule damage and enzyme activity under UV irradiation and repeated freezing and thawing
09 p1274 A72-23594

Parenterally introduced protein hydrolyzates and aminopeptidase influence on human pancreas enzyme secretion activity
09 p1268 A72-23595

In vitro measurements of oxygen tension effect on teleost and amphibian retinal lactate dehydrogenase activity, discussing acetazolamide produced hypoxia effects
10 p1424 A72-23729

Pressure sensitivity of Na-K-Mg ATPase activity from rat intestine, investigating inhibiting effects of oxygen, nitrogen and helium tension increases
10 p1424 A72-23731

Thermolabile triose phosphate isomerase in psychrophilic Clostridium at moderate temperatures
10 p1426 A72-24750

Serum petidase activity determination as enzymatic diagnostic test for myocardial infarction
11 p1579 A72-25851

UV light production of free radicals in proteins and model compounds in vacuum and low temperatures, using EPR techniques
12 p1778 A72-27223

Heart enzyme activity under experimental myocardial ischemia in rabbits determined for blood, left and right ventricles and atrium
13 p1901 A72-28463

Cardiac membrane pain sensitivity in vagotomized cats under sensitizing acetylcholine influence during reduced cholinesterase activity
13 p1905 A72-29329

Epithelial follicle and mast cell role in peroxidase activity of thyroid gland during experimental burn development
13 p1905 A72-29330

Urease-active colloidal organo-complex extraction from Dublin clay loam soil, describing filtration procedure
13 p1913 A72-29399

Mechanical vibration induced physiological changes in rats, determining plasma Ca, Mg and inorganic phosphate concentration and xanthine oxidase activity response to frequency and g-levels
13 p1910 A72-29560

Macaca nemestrina monkey organ tissue concentrations of lactic dehydrogenase /LDH/, creatine phosphokinase and aldolase, with electrophoretic determination of LDH isozymes
13 p1906 A72-29861

Enzyme activity and ascorbic acid concentration as index of rat thyroid gland tissue functional activity during hyperthermia
14 p2077 A72-31098

Succinic dehydrogenase activity in rabbit eye ciliary epithelium during electric stimulation of hypothalamus, using histochemical techniques
14 p2078 A72-31099

Physiological effects on prolonged weightlessness in dogs aboard Cosmos 110 biosatellite, emphasizing body weight loss and enzyme activity and bone tissue mineral concentration changes
16 p2354 A72-33547

Effect of Acetazolamide /Diamox/ at different dose levels on survival time of rats under acute hypoxia and on Na⁺/K⁺-ATPase activity of rat tissue microsomes.
17 p2499 A72-34546

Magnetic field effects in enzymes, tissue respiration and some metabolism characteristics of an intact organism
17 p2503 A72-35003

Dipeptidyl aminopeptidase. I - Application in sequencing of peptides.
17 p2511 A72-35167

Studies of the electron transport chain of extremely halophilic bacteria. VII - Solubilization properties of menadiene reductase.
19 p2755 A72-37649

Hypocapnic hypoxia effects on blood coagulation and fibrinolysis
19 p2756 A72-37880

Renin in differential diagnosis of hypertension.
19 p2757 A72-38144

Peripheral venous renin activity during 70 deg tilt and lower body negative pressure.
19 p2758 A72-38703

Proteinase activity in different regions of the brain during development and inhibition of a conditioned passive-avoidance reflex
20 p2890 A72-38927

Variation of the acetylcholine content and of the cholinesterase activity in the blood under muscular strain
20 p2891 A72-38934

The resonance mechanism of the biological action of vibration
20 p2897 A72-39409

Effects of simulated high altitude on renin-aldosterone and Na homeostasis in normal man.
21 p3005 A72-40422

Blood serum enzymes activity changes in polytraumatized humans injured in automobile accidents
21 p3002 A72-41188

Effect of hypoxia and physical activity on plasma enzyme levels in man.
21 p3003 A72-41522

Lysosomal enzymes of eye tissues during the action of hydrocortisone
22 p3141 A72-42279

Succinic and lactic dehydrogenases activities in homogenates from myocardial tissues of guinea pigs, rabbits and dogs in high altitude environments
22 p3144 A72-42592

Hypoxic acclimation effects on rats heart, liver and kidney mitochondria, measuring cytochrome oxidase and succinic dehydrogenase activities
22 p3144 A72-42673

Increased fluid turnover and the activity of the renin-angiotensin system under various experimental conditions.
23 p3257 A72-43997

Metabolism of angiotensin II in sodium depletion and hypertension in humans.
23 p3257 A72-43998

Lactate dehydrogenase from an extremely thermophilic bacillus.
23 p3259 A72-44450

Influence of elevated partial oxygen pressure on the sympathetic-adrenal and acetyl-choline systems
24 p3371 A72-44595

In vivo hemolysis due to hyperoxia - Role of H2O2 accumulation.
24 p3374 A72-45651

Response to daily lower body negative pressure /LBNP/ exposure /-70mm Hg/, with emphasis on plasma renin activity, sodium and potassium excretion.
24 p3377 A72-45658

ENZYMES

NT CATALASE

NT CHOLINESTERASE

NT COENZYME

NT LYSOZYME

NT OXIDASE

Dipeptidyl aminopeptidase I preparation from beef spleen and rat liver, discussing contamination with catheptic carboxypeptidase C and Ser-Met dipeptidase
07 p0935 A72-18906

Thromboelastographic study of renin and angiotensin effect on blood clotting system of anesthetized and unanesthetized dogs
08 p1121 A72-22095

ENZYMOMOLOGY

Liver and muscle type isozymes of DPN-linked glycerol-3-P dehydrogenase in chickens in terms of tissue distribution, ontogeny and avian evolution
12 p1759 A72-27161

EOLE SATELLITES

Planetary divergence field estimation via Lagrangian tracers and Eole experimental balloons data, developing spatial analysis method
15 p2266 A72-31952

Eole satellite observed meteorological balloon data analysis, obtaining mean zonal velocity, meridional velocity and temperature vs latitude from statistical estimates
15 p2266 A72-31980

Data system in Eole satellites program, discussing balloon localization, UHF information transmission and reception, distance measurement and data acquisition
15 p2268 A72-31981

Eole - The tracking and collection of data applicable to meteorology
17 p2622 A72-35718

Eole program for tracking and gathering information from drifting buoys at sea
17 p2617 A72-35720

FOR [RENDEZVOUS]

U EARTH ORBITAL RENDEZVOUS

EOSS

Zero gravity earth orbital cloud physics facility requirements and design concepts, noting experiments feasibility relative to astronaut performance
13 p1990 A72-28815

EPHEMERIDES

NT PLANET EPHEMERIDES

Solar eclipse timings by photoelectric, photographic and visual observation for comparison of Newcombe sun tables and improved lunar ephemeris reference systems
13 p2041 A72-29527

Star catalog zero-point improvement by Bessel method modification for lunar observation data reduction
14 p2149 A72-30210

Computer calculation of artificial satellite ephemerides from Smithsonian mean orbital elements, comparing observed and computed topocentric equatorial coordinates
14 p2087 A72-30480

Ephemerides determination improvement of celestial bodies with nonperiodic trajectories, relating different observatories measurements
17 p2607 A72-35042

Ephemeris of a highly eccentric orbit - Explorer 28.
20 p2968 A72-39194

Terminal orbit of comet 1937 V /Finsler/
22 p3220 A72-41917

Star catalog zero-point improvement by Bessel method modification for lunar observation data reduction
23 p3333 A72-43240

Compilation of azimuth tables for the North star /for the tropical zone/
24 p3438 A72-44866

EPHEMERIS TIME

Nighttime laser ranging of French reflector for Soviet Lunokhod, discussing universal-ephemeris time difference determination
05 p0721 A72-16771

Ephemeris time, lunar orbital elements and FK4 equinox correction from the observations of the moon by the method of equal altitudes.
17 p2603 A72-34274

Nighttime laser ranging of French reflector for Soviet Lunokhod, discussing universal-ephemeris time difference determination
17 p2611 A72-35274

New measurements of circular polarization and an ephemeris for the variable white dwarf G195-19.
17 p2611 A72-35298

EPICARDIUM

Human epicardial arterial circulation platelet aggregates role in sudden coronary death, discussing relation to atherosclerotic stenosis and acute thrombi.
05 p0616 A72-16013

Baboon heart endocardial structure dynamic behavior, comparing left ventricle septum and epicardium contractile force and intramyocardial pressure changes
15 p2187 A72-32748

EPICYCLOIDS

Generalized epicycloid properties application to fracture mechanics, considering stress fields of constrained plastic zones around cracks in thin elastic plate
03 p0455 A72-14388

EPILEPSY

Cerebral blood flow and metabolic changes during wakefulness, sleep, coma and epileptic seizures in terms of homeostatic mechanisms
16 p2356 A72-33558

EPINEPHRINE

NT NOREPINEPHRINE

Epinephrine and norepinephrine effects on cerebral blood circulation volume and oxygen tension in tissues
02 p0165 A72-12517

Ground and flying activity endurance training effect on urinary excretion of noradrenaline and adrenaline
04 p0478 A72-14868

Adrenaline and noradrenaline metabolic stages and production mechanism under various physiological and pathological conditions, noting application to flight emotional stress detection
21 p3002 A72-41196

EPITAXY

Transferred electron microwave oscillator diodes with n-n structure by liquid phase epitaxy, reducing high resistance layer in interfaces and crystal defects
01 p0036 A72-10629

High power Q-band pulsed Gunn diode microwave oscillator constructed from thin GaAs sandwich layers grown by vapor phase epitaxy
01 p0036 A72-10630

Liquid phase epitaxial GaAs transferred electron microwave oscillators with high dc to rf conversion efficiencies dependent on frequencies
01 p0036 A72-10631

Epitaxial layer preparation on GaSb single crystal by liquid phase method, discussing crystal orientation effects
03 p0402 A72-13859

High purity epitaxial GaAs frequency response, determining heterodyne detection in millimeter and submillimeter regimes
04 p0563 A72-15613

Growth rate of semiconductor epitaxial films obtained by forced cooling from liquid phase
09 p1372 A72-23360

Epitaxy and vacancy structure of TiSe with type B8 ordering
10 p1495 A72-24077

Nonstoichiometry of beta and beta-two aluminas in epitaxial coexistence from crystallographic investigation
10 p1433 A72-24082

Minority carrier diffusion length in liquid epitaxial GaP, noting dependence on dominant impurity and substrate growth orientation from Schottky diode photocurrent technique
10 p1526 A72-24551

Liquid phase epitaxy GaAs growth in rotary reactors from Ga solution, noting thickness, doping uniformity, reproducibility and surface morphology
10 p1526 A72-24556

Book on semiconductors covering electrical properties, energy band structure, impurities, epitaxial growth, silicon dioxide, surface properties, p-n junctions and measurement techniques
10 p1528 A72-25123

Epitaxial InP diode for high efficiency circuit controlled microwave oscillator, discussing solution growth technique, layers electrical properties and I-V performance
12 p1854 A72-27162

Epitaxial and textured Pb films on mica and glass, using reflection electron diffraction, etching and optical microscopy for structure study
12 p1854 A72-27289

K band Read avalanche diodes fabricated by epitaxial deposition and diffusion processes, measuring capacitance-voltage characteristics and oscillator power efficiency
12 p1790 A72-27441

Pulse generation in planar Gunn devices of epitaxially grown GaAs layers, measuring current reduction by domain nucleation
12 p1791 A72-27671

Epitaxial GaAs carrier concentration profile, deep traps detection and properties determination, using Schottky barrier on semiconductors
13 p2024 A72-30035

Solar photosensitive elements prepared p-type GaAs liquid epitaxy on n-type GaAs substrate, measuring dark and light I-V characteristics and spectral response
14 p2142 A72-30225

Epitaxial film system parameters determination based on variational technique of computing electromagnetic waves reflectance and transmissivity in semiconductor structures
14 p2142 A72-30811

Gallium aluminum arsenide light emitting diode thin structures grown on GaP substrates by liquid phase epitaxial method
15 p2290 A72-31381

Epitaxial YIG film separated from conductive plane by thin dielectric layer, considering magnetostatic propagation dispersion and insertion loss
15 p2294 A72-32502

Gallium arsenide-aluminum gallium arsenide double heterostructure wafer fabrication, describing reproducible liquid phase epitaxial growth
15 p2250 A72-32518

Equipment for nondestructive measurements of the resistivity of semiconductor epitaxial layers by the three-point probe technique
17 p2557 A72-35755

Structure and properties of transition layers formed in the epitaxy process.
18 p2718 A72-36340

Behavior of epitaxial bipolar transistors in the strong injection regime
18 p2668 A72-37103

Twinning faults in epitaxial films of germanium telluride and GeTe-SnTe alloys.
19 p2844 A72-37688

Low capacitance high speed lead tin telluride photodiodes via liquid phase epitaxial growth, discussing frequency response to Nd-YAG and carbon dioxide lasers
22 p3159 A72-42620

Interpretation of steady-state surface photovoltage measurements in epitaxial semiconductor layers.
22 p3215 A72-43087

X-band silicon double-drift IMPATT diodes using multiple epitaxy.
23 p3273 A72-44334

EPITHELIUM

Mitotic index and aberrant mitose frequency in mice corneal and intestinal epithelial cells exposed to 50-630 MeV protons, estimating relative biological efficiency coefficients
02 p0161 A72-12055

Myoepithelial mechanism of high frequencies pulsatile discharge of human sweat glands
07 p0930 A72-19444

Mitosis duration and mitotic activity diurnal rhythms in esophageal epithelium of rats given thyroxine
07 p0924 A72-20623

Epithelial follicle and mast cell role in peroxidase activity of thyroid gland during experimental burn development
13 p1905 A72-29330

Succinic dehydrogenase activity in rabbit eye ciliary epithelium during electric stimulation of hypothalamus, using histochemical techniques
14 p2078 A72-31099

EPOCHS

U TIME MEASUREMENT

EPOXIDES

U EPOXY COMPOUNDS

EPOXY COMPOUNDS

Electron impact induced aurore epoxides fragmentation, discussing ion formation, intermediates, thermal rearrangement and mass spectra
13 p1913 A72-29775

A method of improving the physicochemical properties of filled epoxy compounds by treatment in an ultrasonic field
19 p2823 A72-38184

EPOXY RESINS

High temperature strength degradation of graphite and boron reinforced epoxy composites after room temperature aging
01 p0090 A72-10728

Lightning protective coatings for boron/epoxy composite materials, discussing high current damage mechanisms, simulation facility and test results on aluminum foils, meshes, etc
01 p0092 A72-10783

Unidirectional glass/graphite fiber-epoxy resin composite, discussing fabrication and performance tests for mechanical properties
01 p0092 A72-10971

Minimum weight web-core sandwich panels under axial compression loads, presenting numerical results for boron-epoxy and graphite-epoxy composites
01 p0142 A72-11131

Graphite-epoxy conductive polymers as fatigue damage indicators of structures under cyclic strain [SESA PAPER 1915]
02 p0287 A72-11509

Stress and failure analysis of glass-epoxy composite plate with circular hole under uniaxial tension by finite element method
02 p0248 A72-11517

Acoustic emission monitoring of boron epoxy composite, showing crack extension characterization by emission bursts
02 p0249 A72-11993

Epoxy- and polyimide-graphite composites electrical dissipation factor and capacitance measurements as guide to molding quality, describing equipment
02 p0250 A72-12609

Epoxy and polyester resin fatigue fracture tests for cyclic stress and moisture effects
08 p1192 A72-21680

Thermal and mechanical properties of randomly reinforced fiber/resin composites including boron/epoxy, Thorne/epoxy and S glass/epoxy materials
08 p1192 A72-21682

Carbon/epoxy composite reinforced plastic materials feasibility for application to aircraft landing gear wheel fabrication
08 p1193 A72-21686

Graphite reinforced epoxy stiffeners for variable geometry fuel tank to meet light weight requirement, discussing billet fabrication, assembly and installation
08 p1176 A72-21688

Boron-epoxy structure repair technology based on titanium plugs and fiberglass, discussing equipment, graphical design and nondestructive tests
08 p1193 A72-21691

Composite filament wound boron-epoxy rocket motor combustion chamber design, fabrication and hydrostatic tests
08 p1177 A72-21692

Alcyclic dicarboxylic anhydride structure effects on cured epoxidized novolac resin physical and chemical properties
08 p1193 A72-21695

Adverse environmental effects on epoxy composites resin-glass interface properties, investigating epoxy-compatible silanes contribution to composite performance
08 p1194 A72-21696

Water effect at epoxy resin-steel interface on adhesive bond strength as function of vitrification temperature
08 p1196 A72-21863

Carbon fiber reinforced epoxy resin composites, testing fracture behavior in flexural and shear modes under static, fatigue and creep loading
09 p1334 A72-22389

Creep test for microfailures of glass reinforced epoxy and polyester laminates immersed in water at ultimate flexural stress
09 p1336 A72-22537

Fiber orientation effects on physical properties of carbon fiber-epoxy resin composites
[PIPAER 3] 09 p1337 A72-22540

Carbon fiber reinforced epoxy resin composites fracture toughness dependence on fiber strength, diameter, volume fraction, modulus, fiber/matrix interface strength and temperature
09 p1337 A72-22544

Epoxy resin tensile specimen fabrication and testing, discussing factors controlling data scatter
09 p1337 A72-22650

Tensile strength of notched carbon and glass fiber reinforced epoxy resin composites as function of crack size
10 p1500 A72-24253

Elastoplastic analysis of unidirectional filament reinforced boron/aluminum and boron/epoxy composites under longitudinal loading, using finite element techniques
10 p1555 A72-24254

Stress wave surfaces in graphite fiber-epoxy matrix anisotropic plates under transverse impact forces, using Mindlin approximation theory
10 p1555 A72-24255

Fatigue crack propagation in epoxy resin matrix reinforced with discontinuous metal fibers
10 p1501 A72-24261

S glass/epoxy composites strength retention properties under long duration tensile load, proposing use of stress rupture data for reliable safe structural design
10 p1501 A72-24263

Interaction diagram for mixed crack extension modes in unidirectional graphite-epoxy laminates from critical load test data
10 p1501 A72-24265

Gamma ray radiation effects on epoxy resin electric properties, studying electric insulation and arc resistances and dielectric breakdown strength
10 p1502 A72-25149

Colaminated boron-polyimide film effect on strength of graphite fiber-epoxy resin composite double lap bolted joints
[AIAA PAPER 72-382] 11 p1730 A72-25405

Fatigue strength characteristics of boron-epoxy reinforced Al stringers for helicopter airframe
[AIAA PAPER 72-392] 11 p1574 A72-25413

Boron-epoxy reinforced Ti tubular truss for application to space shuttle booster thrust structure, evaluating performance
[AIAA PAPER 72-393] 11 p1730 A72-25414

Boron-epoxy reinforced composite metal shear web design for space shuttle orbiter main engine thrust beam structure
[AIAA PAPER 72-395] 11 p1726 A72-25416

Boron-epoxy composite design for aircraft structures, discussing materials variations, strength prediction inadequacies and full scale tests
11 p1670 A72-25454

Two stress level cumulative fatigue damage prediction for glass fiber-epoxy laminates
11 p1670 A72-25462

Failure modes effect on compressive strength of boron-epoxy composites tested on coupons, honeycomb sandwich columns and beams
11 p1671 A72-25466

Embedded strain gage technique for subsurface tensile testing of boron-epoxy composites
11 p1671 A72-25467

Acoustic emission analysis of deformation and fracture modes under straining of fiber glass-epoxy composite structures, including NOI rings and vessels
11 p1671 A72-25469

Elastic glass and Thornel fiber/epoxy matrix composite material creep tests, determining creep rate dependence on specimen geometry and stress state
11 p1672 A72-25481

Experimental weave pattern for three dimensional continuously woven fiber glass reinforced composite fabric impregnated with epoxy resin
[SAE PAPER 720340] 11 p1673 A72-25597

Fracture surface energy and acoustic emission of boron fiber-epoxy resin composite, using linear elastic fracture mechanics and compliance variation methods
11 p1674 A72-25858

Electrical measurement of moisture effects on adhesive bond strength, insulation resistance and hydrophilicity of cast epoxy and organosilicon adhesives
12 p1833 A72-27449

Particulate fillers bulk effects on epoxy resin compositions flexural, compressive and tensile strengths and moduli
12 p1834 A72-28089

Graphite fiber-epoxy composite systems development for F-5 aircraft landing gear door, speed brake, leading and trailing edge flaps and horizontal stabilizer
12 p1835 A72-28097

Fatigue strength and cumulative damage in fiberglass-epoxy composite specimens under unsteady elastic bending loads, determining loading spectrum effect on service life
13 p1983 A72-28562

Plasticizers and modifiers effect on epoxy polymers structure from electron microscopy and IR spectroscopy, observing chemical reactions between aliphatic resin and hardening agent
13 p1983 A72-28689

A-4 Skyhawk horizontal stabilizer experimental graphite-epoxy composite construction, describing design, manufacturing and testing techniques
[AIAA PAPER 72-358] 13 p2056 A72-28954

Gamma irradiation effects on epoxy-diane resin creep and stress relaxation properties indicated by loaded specimens birefringence patterns
13 p1984 A72-29481

Epoxide resins for application in composite materials, discussing crosslinking reactions, temperature effects on cure, and electrical and physical properties
15 p2260 A72-31441

One dimensional wave pulse propagation, attenuation and dispersion in uniaxially reinforced steel-epoxy resin composites
15 p2325 A72-31528

Temperature effects on stress-strain diagram, tensile strength and creep properties of fiber-epoxy resin composites
15 p2260 A72-32137

Acoustic emission from carbon fiber-epoxy composite during continuous tensile stress cycling
16 p2413 A72-32868

Al alloy welded seams corrosion fatigue strength increase by epoxy polymer coatings under cyclic tensile stresses
16 p2397 A72-33268

Adhesion effects on tensile and thermal expansion properties of aluminum oxide particles filled epoxy-urethane polymer at ambient and liquid nitrogen temperatures
16 p2415 A72-33415

Application of boron/epoxy to the CH-54B Sky crane helicopter.
[AHS PREPRINT 670] 17 p2491 A72-34510

Shape factors for nozzle corner cracks evaluated from epoxy-model pressure vessels.
17 p2630 A72-34814

Failure mechanism for carbon fibers in epoxy novolac matrices under tensile loads
17 p2633 A72-35286

Improving the impact resistance of glass-fibre composites.
18 p2703 A72-36270

Stress wave propagation observation in rigid high modulus epoxy polymer by slow motion photography, noting photoelastic properties and viscosity effect
18 p2734 A72-36380

Studies on flame-resistant epoxy resin - Pyrolysis of tetra-brominated epoxy resin and flame-resistant mechanism.
18 p2704 A72-36519

Losses in high-voltage transformers encapsulated by epoxy resins.
18 p2669 A72-37113

Some results of an experimental study of stress distribution at monofilament tips
19 p2822 A72-37529

Model filament wound epoxy composites.
19 p2808 A72-38164

Machining boron-epoxy composites.
19 p2809 A72-38386

Fatigue behavior of glass filament-wound epoxy composites in water.
21 p3072 A72-40246

Epoxy-thiocol binder viscoelastic deformation under short and long term loads, noting stress-strain linearity limit
21 p3073 A72-41360

Stress-rupture of simple S-glass/epoxy composites.
23 p3305 A72-43492

Mechanics of failure of fibrous composites.
23 p3345 A72-43508

EQUATIONS OF MOTION
NT EULER EQUATIONS OF MOTION
NT HYDRODYNAMIC EQUATIONS

NT KINEMATIC EQUATIONS
NT KINETIC EQUATIONS
NT NAVIER-STOKES EQUATION
NT REYNOLDS EQUATION

Integrability of rotating satellite differential equation of motion in axially symmetric gravitational field.
01 p0122 A72-10008

Solution of N planets equations of motion around sun with recurrent power series in time
01 p0123 A72-10014

Human body dynamics, discussing configuration, modeling techniques, kinematics, equations of motions and various limb motions examples
01 p0016 A72-10110

Brownian motion kinetic equation from Boltzmann equation for two component neutral gas by simultaneous expansion in density and mass ratios
01 p0050 A72-10233

Gravitational potential tensor and equations of motion of relativistic mechanics for isolated system of masses
01 p0127 A72-10345

Controllability of dynamic systems with motion described by nonlinear differential equations
01 p0045 A72-10500

Solar wind plasma spherically symmetrical outflow allowing for equations of motion of velocity components, discussing interplanetary field and single fluid MHD
02 p0278 A72-11914

Computerized series solution of relativistic motion of planet Mercury for Schwarzschild and isotropic coordinates
02 p0260 A72-12306

Hybrid computer simulation of spinning satellite dynamic behavior during flexible booms deployment and attitude control maneuvers, deriving equations of motion from Lagrange equations
02 p0286 A72-12658

Book on celestial mechanics covering Hamiltonian systems and equations of motion for three body problem
02 p0285 A72-12857

Optimal trajectory in phase space, deriving differential motion equations with Euler-Lagrange method
02 p0199 A72-12880

Howe gyroscope mounted on fixed base, deriving equations of motion with Laplace method
03 p0359 A72-13558

Stellar systems existence with positive total energy, using numerical integration of equations of motion for members of Orion Trapezium
03 p0435 A72-13808

Mass changes in restricted quasi-circular variable mass three body problem with particle equations of motion having Jacobi integral
03 p0436 A72-13828

Differential equations of motion for stable member of three-axis gyro stabilized platform
03 p0387 A72-14190

Relativistic equations of motion of charged particle interacting with plane electromagnetic wave propagating at arbitrary angle to uniform magnetic field for magnetosphere model
04 p0554 A72-14406

Plane periodic oscillations of solid body on elliptic orbit, characterizing stability of motion equations periodic solutions
04 p0582 A72-14632

Self adaptive controlled robot velocipedist, discussing speed control and equations of motion
04 p0505 A72-14984

Invariant manifolds in rigid body motion about fixed point, considering Euler-Poinsot, Lagrange-Poinsot and Kovalevskia cases
04 p0549 A72-15197

Differential equations of motion construction from given manifold, determining functional minimization of solution
04 p0550 A72-15544

Single- and many degree of freedom nonlinear structural systems transient dynamic response by presentation of equations of motion, damping and restoring force functions
05 p0736 A72-16082

Motion equations of constrained split fairing for avoiding contamination of sounding rocket payload environment by uncontained explosive actuation device
05 p0724 A72-16102

Gyrostad translational rotational motion equations in canonical form without trigonometric expressions in Hamiltonian
05 p0724 A72-16164

Discrete elasticity theory constitutive and motion equations, considering finite difference and partial differential equations
05 p0737 A72-16297

Equations of motion for stable member of three axis gyro stabilized platform for inertial navigation, including friction, inertia and torque motor effects
05 p0662 A72-16557

Explicit finite difference procedure to solve time averaged equations of motion for unstalled turbulent

duct flows in coordinate system approximating real flow streamlines
[AIAA PAPER 72-43] 05 p0651 A72-16878

Spin dynamics model of space station with counterweight connected by multiple cables, using linearized motion equations
[AIAA PAPER 72-172] 05 p0730 A72-16882

Sonic boom signature by bicharacteristic method, correcting zeroth order [free stream] characteristics to obtain solution to compressible fluid exact equations of motion
[AIAA PAPER 72-195] 05 p0652 A72-16907

Large deflection microstructure continuum model for composite beam flexural wave propagation and free vibration, deriving equations of motion
[AIAA PAPER 72-140] 05 p0741 A72-16937

Charged particle motion equations for fifth order spherical aberration of quadrupole-octupole lens with arbitrary electrode and pole shapes
05 p0638 A72-16989

Compressibility and total enthalpy difference effects on laminar free shear layer from numerical integration of equations of motion
05 p0653 A72-17011

Spacecraft banking control during reentry, deriving dynamic equations of angular motion
05 p0730 A72-17026

Equations of motion for oscillating heavy symmetrical gyroscope with cylindrical cavity partially filled with inviscid incompressible liquid
05 p0664 A72-17145

Longitudinal instability of electron beams interacting with passive resonator, considering Landau damping influence by linear differential equations of motion solution
05 p0701 A72-17243

Variational principles in general relativity, deriving Einstein field equations and equations of motion for charged and uncharged self gravitating fluids
06 p0847 A72-17254

Spinning satellite with rigid central body and flexible appendages, deriving equations of motion and Liapunov stability
06 p0892 A72-17652

Triaxial space station orbit around oblate earth, presenting equations of motion, Hamiltonian and integration methods
06 p0878 A72-17663

Soviet book on qualitative methods in celestial mechanics covering differential equations of motion varying schemes, Newton type convergence method, three body problems, etc
06 p0879 A72-17821

N-body problem equations of motion numerical integration methods supplemented by two body perturbation description and coordinate and time transformations
06 p0885 A72-18072

N-body gravitational problem numerical integration treatment of close approaches, using transformations for eliminating differential equations of motion singularities
06 p0885 A72-18079

Reactive solid or fuel combustion, deriving equations for movement and deformation of reaction front during oxidant diffusion through ash mantle
06 p0902 A72-18155

Autonomous two body system described by nonlinear differential equations of motion, obtaining free relative vibration solution in terms of elliptic functions
06 p0849 A72-18694

Sensitivity functions for differential equations describing aircraft perturbed motion, noting dependence on time derivatives, system parameters and coordinates
07 p1032 A72-18977

Equations of free particle motion, gas energy, distribution evolution and cosmic indeterminacy for Friedmann universe filled with uniform density and pressure ideal gas
07 p1074 A72-19429

Third-order resonance during oscillations of Hamiltonian system of nonlinearly coupled oscillators, obtaining equations of motion and phase portraits
07 p1035 A72-19978

Existence and branching of analytical solutions to equations describing oscillatory-rotatory motions of system of two pendulums with different masses
07 p1036 A72-20217

Elastic body dynamics partial differential equations transformation into boundary value problem for Monge-Ampere equation
07 p1095 A72-20218

Two coupled lasers theory, obtaining fields equations of motion
[AD-739802] 07 p1009 A72-20681

Class of homogeneous polynomial solutions to differential equations of motion of elastic body
08 p1242 A72-20912

Perturbed motion differential equations for stability and integration problems in mechanics
08 p1205 A72-20964

Dynamical equivalence between vehicles with motor-driven constant speed rotor under bearing friction

and freely spinning torque free rotor, deriving equations of motion
08 p1108 A72-21174

Motion equations order reduction for solid body with fixed point
08 p1207 A72-21340

Transformation of integrodifferential equation of motion of heavy solid body about fixed point
08 p1207 A72-21341

Polynomial solutions to integrodifferential equation of motion of solid body with fixed point for Lagrange conditions
08 p1207 A72-21342

Motion of body similar to Lagrange gyroscope, using Kolmogoroff theorem
08 p1207 A72-21343

Algebraic invariant relation of integrodifferential equation of motion of solid body about fixed point for Hess conditions, proving uniqueness
08 p1207 A72-21344

Solutions existence for algebraic invariant relation to integrodifferential equation of motion of solid body about fixed point in trigonometric and exponential polynomials class
08 p1207 A72-21346

Solutions existence for nonlinear invariant relation to integrodifferential equations of motion of solid body about fixed point
08 p1207 A72-21347

Solutions existence conditions for integrodifferential equation of motion of solid body about fixed point
08 p1207 A72-21349

Integrodifferential equation exponential solutions for body motion about fixed point
08 p1208 A72-21353

Goriachev-Chaplygin solution to gyroscopic motion of body around fixed point for periodic motion
08 p1208 A72-21355

Fourth algebraic integral in Kovalevskaya solution of rotating body motion about fixed point regarding angular momentum components
08 p1208 A72-21357

Asymptotically uniform motions of heavy solid body with fixed point, assuming moving hodograph intersections with Staudé cone
08 p1208 A72-21358

Motion equations of gyrostat with nonholonomic constraint under gravitational force
08 p1208 A72-21359

Gyrostat inertial motion under nonholonomic constraint of mass center coincidence with fixed point
08 p1208 A72-21360

Linear invariant solution to gyrostat motion under nonholonomic constraint
08 p1208 A72-21361

Solutions existence and uniqueness for linear invariant relation to gyrostat motion under nonholonomic constraint
08 p1208 A72-21362

Small perturbation stability of discontinuous solution of equations of motion for solid fuel combustion processes
08 p1253 A72-21463

Book on plasticity theory covering stress and strain as basic concepts of continuum mechanics, differential equations of motion, plastic flow, yield criteria, elastic-plastic equilibrium, plane strain, etc
08 p1244 A72-21477

Ritz-Galerkin process applied to coupled differential equations of motion of pretwisted tapered cantilever turbine blade vibrating in flexure
08 p1244 A72-21483

Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation
08 p1110 A72-21603

One dimensional atmospheric turbulent diffusion model and semiempirical equation, considering jumplike changes in particle velocity
08 p1201 A72-21999

Control synthesis equations for aircraft motion on phase space surface
09 p1261 A72-22208

Two independent damping systems impact vibration analysis from solution of equations of motion by Laplace transformation
09 p1399 A72-22695

Numerical integration of primitive equations for barotropic atmosphere, using spherical polar coordinates
09 p1346 A72-22809

Numerical solution of thermal shock equations for incompressible fluid with free convection and of motion equations in gravitational force field
09 p1410 A72-22882

Brittle fracture dynamics, deriving motion equations and stability conditions of surface cracks under stress waves from energy balance and angular momentum conservation law
09 p1404 A72-22916

Motion equations approximate solution for viscous fluid Couette flow instability caused by spiral symmetry vortices
09 p1295 A72-23073

Approximate method for nonlinear differential equations of motion solution in flight dynamics, applying to control surface buzz and slender wing oscillations
09 p1262 A72-23453

Nonlinear mode coupling in equations of motion for thin panel vibration as function of membrane stretching-bending energy ratio
09 p1408 A72-23465

Rectilinear motions in three body problem with null live forces constant, using inequality deduced from virial theorem
09 p1392 A72-23542

Zaidenberg correlation method for nonlinear systems dynamic properties under random excitation, determining statistically equivalent linearized terms for equations of motion
09 p1353 A72-23607

Hartman-Olech theorem to prove asymptotic stability of mechanical system with nonlinear elastic characteristic, analyzing differential equations of motion
09 p1343 A72-23612

Equations of motion for discrete structure fluid, discussing equilibrium pressure and fluid-wall interaction effects
09 p1296 A72-23691

Ion trajectories equations of motion solution for E x B type mass separator, presenting curves for mass species dispersion inside separator channel
10 p1509 A72-23942

Initially axially stressed Timoshenko beam equations of motion derived from three dimensional theories, discussing buckling loads and vibration frequencies
10 p1555 A72-24191

Rectilinear impulsive motion of compressible boundary layer on infinite plate, deriving integration method for differential equations of motion under energy dissipation neglect
10 p1465 A72-24203

Similarity method solution of differential equations of motion for supersonic laminar boundary near symmetry plane of cone at angle of incidence
10 p1418 A72-24236

Equations of motion with gravitational radiation reaction terms for gravitating system as source of asymptotically flat space
10 p1511 A72-24416

Flight vehicle angular velocity measurement by accelerometers, deriving equations of motion
10 p1481 A72-24497

Virtual displacement application to nonholonomic systems with arbitrary constraints to derive Lagrange and Appell equations of motion
10 p1513 A72-24995

Oscillation modes and stability region of harmonic oscillators with homogeneous nonlinear rheological differential equations of motion
10 p1513 A72-24998

Statics, motion equations, deformation, dynamics and classification of Cosserat continua
10 p1513 A72-25000

Equations of motion of steady viscous fluid flow in three dimensional boundary layer on walls of axial flow compressors and turbines, obtaining velocity field
10 p1420 A72-25120

Equations of motion for structural flexibility influence on dual spin spacecraft dynamic response, noting elastic deformations and rotation rates coupling
[AIAA PAPER 72-348] 11 p1725 A72-25377

Variational equations of motion for three layered laminated sandwich beam vibrations, assuming small elastic deformations and axial and bending motion
[AIAA PAPER 72-399] 11 p1731 A72-25420

Extremal feedback control system operation with integral PFM in extremum drift mode, determining equations of motion and steady state regime
11 p1610 A72-25449

Cylindrical panel natural vibrations, describing motion of base with dynamic elasticity equations
11 p1733 A72-25539

Coupled nonlinear equations of motion of large deflections of impacted helical springs, comparing with streak photographs
11 p1688 A72-26061

Inferential structure of variational statements for equations of motion and constitutive relations, noting function space choice
11 p1690 A72-26554

Complete and simplified equations of motion for rate gyro installed in flight vehicle, taking into account bearing torques
[DFVLR-SONDDR-190] 11 p1635 A72-26580

Equations of motion for torsional vibrations in system with nonlinear elastic term and variable moments of inertia, noting analog computer simulation
11 p1739 A72-26982

Laplace-Carson transform solution for integrodifferential equation of motion for droplet suspended in viscous gas slipstream
12 p1796 A72-27093

Finite difference equations of motion for conservative and nonconservative dynamic systems with finite

degrees of freedom, obtaining numerical solution by Hamilton principle 12 p1844 A72-27193

Equations of motion for oriented and multipolar discrete elastic media, noting elements formed by sets of free material points 12 p1845 A72-27394

Numerical integration for many body systems equations of motion, noting Monte Carlo and Boltzmann moment methods for large systems 12 p1873 A72-27895

Computer models for collisionless stellar systems equations of motion, obtaining force from smoothed gravitational field 12 p1875 A72-27920

Lie group theory application to linear differential equations of motion with variable parameters, considering flight vehicle example 12 p1847 A72-28127

Flight vehicle motion described by linear differential equations with variable parameters, discussing programmed optimal control solution by functional analysis 12 p1755 A72-28128

Harmonic functions system for resonant vibrations of liquid in elastic circular cylindrical tank, calculating shells surface pressure from equations of motion 13 p1940 A72-28394

Atmospheric motion equations numerical integration, presenting conservative finite difference approximation for quasi-uniform spherical grids derived from regular polyhedrons 13 p1985 A72-28445

General relativity equation of motion for spherically symmetric surface layer of ideal gas under central gravitational field 13 p2035 A72-28646

Magnetogasdynamics intrinsic equations, determining geometrical and mechanical characteristics of axisymmetric and meridional plane motions 13 p2010 A72-28682

Equations of motion and phase trajectory analysis for resonant oscillations of beam-pendulum system 13 p2003 A72-28721

Quadrature solution for variable mass point motion under perturbing force in trajectory plane normal to velocity vector 13 p2003 A72-28725

Acoustic pressure wave effect on motion of elastic conical shell fastened in rigid screen, using Timoshenko theory 13 p2055 A72-28772

Solar wind plasma spherically symmetrical outflow allowing for equations of motion of velocity components, discussing interplanetary field and single fluid MHD 13 p2039 A72-29226

Directionally reinforced composites treated as homogeneous continuum with microstructure, deriving displacement equations of motion by Hamilton principle 13 p2060 A72-29694

Hypervelocity impact parameters calculated from shock wave equations of motion, discussing viscosity effect on velocity and stress distributions 14 p2164 A72-30297

Error sources in numerical integration of spacecraft equations of motion in solar and planetary gravitational fields, suggesting methods for improving accuracy 14 p2151 A72-30453

Equations of motion for incompressible viscous fluid thin layer on cylinder outer side under gravity, calculating wave number, phase velocity and film thickness 14 p2094 A72-30699

Cooperative direction changing isomer movement on polymer chain lattice describing equations derivation procedure 14 p2125 A72-30962

Approximate periodic solution of satellite equation of motion based on Schwarzschild metric integration, noting relativistic effects 14 p2162 A72-31108

Rectangular plate nonlinear lumped-parameter model for large displacement amplitudes, deriving differential equations of motion via Hamilton principle and Euler equations 14 p2169 A72-31148

Equations of motion and free vibration for trusswork structures under nonperiodic dynamic loads, calculating longitudinal and transverse end forces 15 p2322 A72-31360

Nonlinear differential equations of motion of complex configuration, developing stable solution method 15 p2261 A72-31489

Numerical integration of equations of motion in finite element methods, investigating explicit methods stability 15 p2326 A72-31717

Equations of motion for contactless suspension gyroscope in force field 15 p2235 A72-31726

Partial differential equations of motion for nonlinear mechanical systems solved by Lanczos formula, discussing prismatic cylinder oscillations under uniformly distributed transverse load 15 p2275 A72-31729

Ionized and neutral atmospheres coupled ionospheric continuity and motion equations, discussing nonlinear force effects on F2 height and electron density 15 p2230 A72-32257

MHD instabilities growth rates from diffuse linear pinch equations of motion solution 15 p2287 A72-32416

Lorentz-covariant procedure for equations of structure and motion of particles represented by singularities in Einstein relativistic field theory 16 p2422 A72-32880

Liapunov function application to stability of unperturbed motion of differential equations with respect to part of variables 16 p2422 A72-32940

Perturbation theory for equations of motion of electrically and thermally conducting viscous compressible flow in homogeneous magnetic field, calculating fluctuation modes 16 p2435 A72-33008

Mechanical system nonlinear perturbation effect on equations of motion solutions, deriving boundedness and stability conditions via inequality theorems 16 p2423 A72-33101

Equations of motion for damped vibrating system excited by periodic impulsive forces, calculating minimum residual vibration amplitude and force transmitted to foundation 16 p2423 A72-33121

German monograph on rotating nonround shafts stability under torsion, obtaining equations of motion solution via convergent double series expansion 16 p2469 A72-33399

Equations of motion for small vibrations superposed on time depending deformation of elastic body, discussing acoustic wave propagation 16 p2425 A72-33590

Barium cloud striations deformation in ionosphere explained by equations of motion for plasma cloud thin bar model, discussing pinch effect 16 p2387 A72-33907

Sea level wind and pressure data adjustment to governing dynamical equations by numerical variational analysis, using Sasaki matching technique 16 p2419 A72-33941

Continuity, motion and Maxwell equations for steady MHD flow under constant magnetic flux 17 p2588 A72-34765

Certain motions of micropolar fluids 17 p2538 A72-34771

Three dynamic conical bar theories, solving transient axisymmetrical motion via method of characteristics [ASME PAPER 72-APM-20] 17 p2581 A72-34797

Independent variable transformations for stepwise solution of differential equations of motion power series expansions, considering convergence radius 17 p2609 A72-35105

The flow caused by the differential rotation of a right circular cylindrical depression in one of two rapidly rotating parallel planes. 17 p2540 A72-35189

Russian book - Calculation and analysis of flight-vehicle motion: Engineering handbook 17 p2492 A72-35451

Mathematical solution to equations of turbulent motion in viscous fluids asymptotic to strange attractors 18 p2678 A72-36015

Motion integrals conservation under Hamiltonian function variations, examining gyroscope equations of motion with parameter disturbances 18 p2711 A72-36666

Universe expansion induced electromagnetic wave backscattering absence in Robertson-Walker spacetime as consequence of motion equations conformal invariance 18 p2711 A72-36711

Similarity solutions to nonlinear equations of motion of n dislocations group in slip plane under stress 18 p2719 A72-36745

Plate vibrations and layer potentials 18 p2736 A72-37001

Motion stability of inertial navigation gyroscope system with gyro horizon compass, noting constant and time dependent coefficients of motion equations 19 p2830 A72-37320

Complex systems dynamics and stability problems, deriving equations of motion and boundary conditions from principle of least action 19 p2784 A72-37388

Numerical solution of the problem of the motion of a circular cylinder in a viscous fluid flow 19 p2784 A72-37395

Determination of the motion of a model, possessing a mass and a viscoelastic element, for a given harmonic law of motion of the vibrating support 19 p2871 A72-37427

The motion of a vortex filament with axial flow 19 p2786 A72-37598

Numerical integration method with recurrent power series for motion and variational equations of elliptic restricted three body problem 19 p2862 A72-38019

Third integral of equations of motion in axisymmetric potential field, noting Jeans theorem for phase density in star system 19 p2863 A72-38068

Equations of motion in the linear approximation. 19 p2835 A72-38174

Integration of equations of motion for nonconservative holonomic systems with pulsed coupling forces 19 p2825 A72-38192

Gravitational spin interaction. 19 p2835 A72-38425

A method of realizing servo links imposed on a mechanical system. I 19 p2835 A72-38587

The mechanics of an organized wave in turbulent shear flow. III - Theoretical models and comparisons with experiments. 19 p2789 A72-38794

Method of characteristics for nonlinear equations of perturbed motion of fluid near contact point between shock and diffraction waves 20 p2912 A72-39023

Third-order resonance during oscillations of Hamiltonian system of nonlinearly coupled oscillators, obtaining equations of motion and phase portraits 20 p2956 A72-40034

The theory of motion of the horizontal pendulum with a Zoellner suspension and some indications for the instrumental design. 21 p3084 A72-40495

Stress functions in three-dimensional elastodynamics. 21 p3117 A72-40677

The behaviour of the solutions of the equations of motion of a mechanical system, with a parameter occurring as a coefficient of each derivative. 21 p3084 A72-40812

Numerical stabilization of the differential equations of Keplerian motion. 21 p3106 A72-41050

A method of numerical integration for trajectories with variational equations. [AIAA PAPER 72-910] 21 p3111 A72-41557

Equations of motion for the variable mass flow-variable exhaust velocity rocket. [AIAA PAPER 72-912] 21 p3112 A72-41559

Integrals of the motion for optimal trajectories in atmospheric flight. [AIAA PAPER 72-931] 21 p3112 A72-41570

Interactions between stars and local dust formations 21 p3113 A72-41758

Numerical analysis of wave processes in a three-layer strip with rigid filler 22 p2322 A72-41872

Relation between the first integrals of a non-holonomic mechanical system and a corresponding system freed of constraints 22 p3204 A72-41902

Invariant solutions of the differential equations of the uniform motion of a Hooke medium 22 p2323 A72-42058

Dynamic equations integration with constraint factors, discussing Hamilton-Jacobi method applicability conditions 22 p3205 A72-42100

Quadrature solution for variable mass point motion under perturbing force in trajectory plane normal to velocity vector 22 p3205 A72-42101

Finned missiles nonlinear rolling motion characteristics at large angles of attack, solving differential equation of motion by global nonlinear least squares method [AIAA PAPER 72-980] 22 p3134 A72-42333

Helicopter rotor blade flapping motion stability, applying perturbation technique to linear equations of motion for different advance ratios and Lock numbers [AIAA PAPER 72-955] 22 p3137 A72-42351

Equations of motion appropriate to the analysis of control configured vehicles. [AIAA PAPER 72-952] 22 p3137 A72-42353

Applications of a technique for estimating aircraft states from recorded flight test data. [AIAA PAPER 72-965] 22 p3138 A72-42360

The dynamical effects of stellar mass loss on diffuse nebulae. 22 p3224 A72-42380

Simple thickness modes for laminated composite materials. 22 p2325 A72-42465

Three dimensional thermoelastodynamic theory for elastic beams, deriving nonlinear motion equations by combined expansion and variational methods 22 p2325 A72-42523

The dynamics of the ascending flight of sounding rockets [ONERA, TP NO. 1056] 22 p2321 A72-42582

Steady state equations of motion, equilibrium shape and stability derivatives of elastic airplanes evaluated with finite element methods. 22 p3138 A72-42845

- Rigid-body motions and strain-displacement equations of curved shell finite elements. 22 p3240 A72-42892
- Theory of a gyrohorizon compass with an azimuthally free casing of the sensitive element. 23 p3287 A72-43585
- Equations of motion of nonlinear nonholonomic mechanical systems of variable mass with impulsive constraint factors. 23 p3313 A72-43848
- The topology of the regularized integral surfaces of the 3-body problem. 23 p3309 A72-43982
- Stabilization of the motion of certain nonlinear systems by a linear approximation. 23 p3313 A72-44045
- Scattering of acoustical waves by a prolate spheroidal obstacle. 23 p3313 A72-44118
- Differential equations of motion of two mutually perturbing bodies, noting series expansion of perturbation function for close commensurability of mean motions. 24 p3437 A72-44761
- High order terms diffusion equation derivation for strong fluctuating flows by random walk method, discussing phenomenological analogy with equations of motion. 24 p3390 A72-44994
- Study of dynamic and thermal processes during steady motion of a viscous gas. 24 p3390 A72-44996
- The concept of reference loci applied to four-body dynamics. 24 p3440 A72-45137
- Relative equilibrium positions and their stability for a general gyrostat-satellite in a circular orbit. 24 p3449 A72-45142
- About the first integrals of the generalized problem of translatory-rotary motion of rigid bodies. 24 p3442 A72-45235
- Spinor differential equation of generalized unperturbed Kepler motion, using motor method and Lie algebra. 24 p3442 A72-45238
- The large Reynolds number - Asymptotic theory of turbulent boundary layers. 24 p3392 A72-45248
- Equations of motion of a viscous fluid with relaxation properties. 24 p3393 A72-45256
- Application of plane fixed equations of motion to reentry vehicle flight analysis. 24 p3452 A72-45345
- Perturbation methods in atmospheric flight mechanics. 24 p3368 A72-45350
- Equations for the general motion of a rocket in a resistant medium. 24 p3452 A72-45448
- Inertial effects in motion driven by hydrodynamic fluctuations. 24 p3430 A72-45560
- On the unsteady magnetohydrodynamic flow over yawed infinite cylinder. 24 p3395 A72-45599
- ### EQUATIONS OF STATE
- #### NT HUGONIOT EQUATION OF STATE
- FM communication system multifilter phase lock loop state equations derivation from phase model, predicting noise improvement characteristics by analog and digital simulation. 01 p0044 A72-10328
- Controllable states insufficiency to characterize rigid heat conductors dependence on temperature fields in experimental materials measurements programs. 01 p0146 A72-11389
- Equation of state for porous metals at high temperatures under strong shock compression, considering phase transitions. 02 p0258 A72-11469
- Plasma state variables diagnosis using laser light scattering. 02 p0263 A72-11697
- Extended Thomas-Fermi isolated atom model for pulsar outermost crust magnetic field effects, using pressure-density equations of state. 02 p0277 A72-11903
- Seigel state equation validity limit application to isentropic hydrogen and nitrogen steady and unsteady flow expansions at high pressure. 02 p0206 A72-12597
- State space method application to power servomechanism analysis, discussing transition matrices and state equations. 03 p0338 A72-13645
- Continuous solid medium electroelastic equations of state, obtaining solution by variational principles application. 03 p0390 A72-13916
- Equation of state for matter at 10-500 trillion g/cc, applying to baryon matter and neutron stars. 04 p0571 A72-14557
- Dislocation creep model for work hardening and recovery, deriving mechanical equation of states for various magnitudes and directions. 04 p0589 A72-15160
- Adaptive control algorithm with disturbance prediction for solution of deterministic and stochastic optimization problems of linear equation of state and quadratic performance criteria. 05 p0639 A72-15759
- Hadron era evolution, discussing equation of state, ultimate temperature, galactic formation and adiabatic exponent application to Friedman universes. 06 p0886 A72-18096
- Algorithm for constructing linear and nonlinear differential and algebraic equations of state variables of nonlinear electronic circuits. 07 p0958 A72-18846
- Optimal strategies for decision chain with controllable connections and finite number of states and decisions, deriving existence theorem. 07 p1028 A72-19904
- Stellar structure calculation by real gas equation of state, considering He abundances and solar lines of ionizable metal atoms. 07 p1078 A72-19925
- Interactive graphics technique for design of single input linear feedback systems described by state equations or cascaded transfer functions. 07 p0963 A72-20391
- Equation of state data of solids from shock vaporization, using spectroscopic technique. 09 p1351 A72-22856
- Thermodynamic properties of high temperature and density hydrogen, using Rowlinson equation of state. 09 p1412 A72-23234
- Nonanalytic equation of state formulation at critical point of fluid phase transformation. 09 p1413 A72-23690
- State sensitivity functions in aircraft parameter identification for lateral dynamics under aileron deflection from model response and in-flight test data. 10 p1421 A72-23807
- Equations of state for ultrahigh densities, obtaining relativistic statistical thermodynamics description of hadronic interactions. 10 p1533 A72-23891
- Model for I/O channel traffic in computer systems, obtaining closed solution for stationary probabilities of state. 10 p1446 A72-25148
- Nonlinear differential energy equation of static state stellar atmospheres with radiation and heat conduction terms. 13 p2036 A72-28890
- Expanding hot universe evolution from astrophysical cosmology point of view, emphasizing galaxy formation relation to state of matter and radiation in early universe. 13 p2038 A72-29084
- Work hardening-recovery model of dislocation creep, deriving multiaxial mechanical equation of states for strain/time relationship under arbitrary temperature-stress sequences. 13 p2061 A72-29872
- Mathematical model for magnetized solar wind with one fluid MHD and polytropic state equations, calculating magnetic field variables at earth. 13 p2034 A72-29958
- Computerized determination of cryogenic gas behavior near vapor region, obtaining state equation coefficients from curve fitting program. 15 p2334 A72-31580
- Equations of state and equilibrium for electron gas in strong magnetic field, discussing effects in pulsar crusts and atmospheres. 16 p2460 A72-33929
- State equation for superdense stars treated as perfect degenerate tachyon gas, noting dynamic stability for arbitrarily large central densities. 18 p2726 A72-36715
- Computer method for plasticity theory boundary value problem for medium with unknown equations of state, using complex load simulating device. 19 p2870 A72-37387
- Elasto-visco-plastic constitutive equations for quasi-static structures calculations. 19 p2875 A72-37763
- [ONERA, TP NO. 1089] Numerical calculation of third virial coefficient in equation of state of real gases eliminating errors associated with substitution of integration infinite integral. 19 p2838 A72-38462
- A generalized virial equation of state and its application to vapor-liquid equilibria at low temperatures. 19 p2883 A72-38838
- Introduction of two resolving functions into the equations for nonshallow shells. 20 p2979 A72-39405
- General relativity equations for hydrostatic equilibrium of spherical distribution of mass combined with equations of state for highly relativistic neutron star central regions. 20 p2955 A72-40011
- Two phase stellar structure with polytropic equations of state for shell and core, calculating configuration mass, radius and energy. 21 p3102 A72-40098
- Existence theorems in multidimensional problems of optimization with distributed and boundary controls. 21 p3074 A72-40548
- Thermodynamic parameters and reacting multicomponent mixture composition, using state equations and energy conservation equations for reaction kinetics. 21 p3013 A72-40989
- Extended Kalman filter application to delayed systems for state and time delay estimation, discussing two nonlinear estimators. 21 p3039 A72-41553
- [AIAA PAPER 72-902] Equation of state of a mixture of nonequid chemically reacting gases. 22 p3152 A72-41881
- Caloric state equation for isentropes and temperature calculation of nonequid Cs plasma produced in high density vapors by shock wave compression. 23 p3318 A72-43320
- Linear electronic networks analysis and synthesis via equations of variable states, noting structural features of circuits without component related degeneration. 23 p3271 A72-43844
- Equation of state relating time variations of stress and strain in elastoplastic material under tension. 24 p3459 A72-45069
- ### EQUATORIAL ELECTROJET
- Farley-Buneman instability nonlinear development mechanism in equatorial electrojet, noting turbulent vertical electron flux role. 01 p0062 A72-10901
- Meridional currents intensity in equatorial electrojet region, computing electric and magnetic fields. 01 p0063 A72-10924
- Equatorial ionospheric drift measurements and relation to electrojet from H component geomagnetic field variations. 02 p0221 A72-12459
- Sporadic E disappearance due to temporary reversal of equatorial electrojet current, observing horizontal geomagnetic field component. 03 p0345 A72-12999
- Three frequency radar spectral measurements of two stream and gradient plasma instabilities in equatorial electrojet as function of wavelength. 03 p0349 A72-13521
- F 2 layer anomalies association with equatorial electrojet, investigating midday critical frequencies of sporadic E layer. 04 p0515 A72-14932
- Electrojet effects on critical frequencies in equatorial F region during magnetically quiet and disturbed days. 04 p0516 A72-14936
- Longitudinal wave interaction and excitation by plasma instability in equatorial electrojet, considering energy transfer mechanism. 05 p0656 A72-16242
- Equatorward motion of midday auroras during magnetospheric substorms, using all sky photographs. 06 p0805 A72-17463
- Electroconductivities and electrostatic field structure within equatorial electrojet, observing vertical distribution. 07 p1056 A72-18896
- Wave propagation effects on irregularities observation in equatorial electrojet, presenting velocity profile and typical ray path. 09 p1300 A72-23024
- Lunar variations of Peruvian electrojet, analyzing E region electron drift and geomagnetic field H component data. 11 p1626 A72-26415
- Tropical sporadic E reflections and vertical plasma instabilities as function of equatorial electrojet and electron drift ratio based on ionogram observations. 16 p2382 A72-32867
- F region crossed field instability nonlinear theory based on energy transfer by mode coupling and absorption by linear damping with application to equatorial electrojet. 16 p2384 A72-32976
- Dawn and dusk ionospheric conductivity gradients effects on equatorial electrojet, deriving vertical currents existence. 16 p2385 A72-33377
- Nonlinear theory of crossed field and two stream instabilities of nonthermal plasma motions in equatorial electrojet. 16 p2387 A72-33937
- Nonlinear saturation of 'type I' irregularities in the equatorial electrojet. 18 p2685 A72-35990
- Low latitude equatorial electrojet analysis based on three dimensional electric field equation for ionosphere and magnetosphere. 18 p2687 A72-36854

Some problems of electromagnetic induction in the equatorial electrojet region. II - The analysis of magnetic and telluric variations at Zaria, Nigeria.

19 p2789 A72-37772

Influence of solar flux and the equatorial electrojet on the diurnal development of the latitude distribution of total electron content in the 'equatorial anomaly'.

19 p2794 A72-38868

The interpretation of surface equatorial magnetic daily variations on disturbed days.

20 p2916 A72-39238

Geomagnetic DP-2 variation base level from E region electron drift velocity measurements in equatorial electrojets

22 p3169 A72-42013

The equatorial electrojet according to measurements from the Cosmos 321 satellite

23 p3328 A72-43369

EQUATORIAL ORBITS

NT STATIONARY ORBITS

Scintillation effects on synchronous satellite communications systems at 250 MHz in equatorial region, discussing diversity techniques and composite diffraction refraction theory [ALAA PAPER 72-178]

05 p0631 A72-16906

Liapunov stability of circular equatorial motions of light bodies in Kerr gravitational field of massive rotating body, using geodesic lines equations

08 p1210 A72-22071

Frequency shift and mode shapes for equatorial vibrations of flexible boom on spin stabilized satellite, applying to thermal flutter resonance and nutational stability

15 p2320 A72-31803

Permanent rotations of an equatorial satellite in the geomagnetic field

19 p2869 A72-37437

First order theory of satellite orbit determination with time difference data for synchronous equatorial spacecraft, applying to VLBI experiments with ATS-3 [ALAA PAPER 72-924]

21 p3112 A72-41568

Small oscillations of gravity gradient satellite in circular near-equatorial orbit, discussing operational efficiency of magnetic damping systems

22 p3230 A72-42223

On the utilization of thermonuclear propulsion for an upper stage of the Europa III launcher

24 p3424 A72-45227

EQUATORS

NT MAGNETIC EQUATOR

Equatorial E region short wave oblique incidence propagation experiment showing transmitted impulse delay increase with frequency decrease

01 p0056 A72-10437

Equatorial sporadic E sudden disappearance associated with magnetic field depressions, noting irregularities and electron velocities role

10 p1475 A72-24956

Equatorial Faraday rotation measurements for night ionospheric electron density peak structures during equinoctial months, using ATS-C geostationary satellite radiation

10 p1476 A72-24958

Semiannual equatorial wind oscillations in upper stratosphere and lower mesosphere dependence on temperature variations in high and middle latitudes

14 p2099 A72-30259

Blanketing sporadic E layer latitude seasonal variations near geographic equator, noting spread F occurrence and solar cycle effects

15 p2231 A72-32265

Infrared and radar maps of the lunar equatorial region.

18 p2725 A72-36289

Equatorial stratospheric waves induced by diabatic heat sources.

22 p3201 A72-42508

Accuracy of the determination of the zero points of a fundamental catalog from observations of major and minor planets

24 p3447 A72-45676

EQUILIBRIUM

Axisymmetric MHD equilibria with elliptical cross sections and flat current profile, obtaining criterion for stability to localized modes by numerical computation

09 p1361 A72-23047

Book on structural analysis covering statically indeterminate structures, force and displacement methods, flexibility and stiffness matrices, strain energy, virtual work, energy theorems, etc

15 p2325 A72-31517

Stability analysis of gyrostad satellites possible equilibria under gravitational torques, considering inertia, equilibrium and angular momentum parameters

15 p2321 A72-32586

Instability conditions for holonomic system with stationary constraints, applying to pendulum and to rectilinear motion of material point

20 p2955 A72-40033

Instability of the equilibrium position of a multi-dimensional system consisting of 'neutrally' unstable subsystems

21 p3126 A72-41546

The equilibrium configuration of a slowly rotating mass of liquid in the presence of a poloidal magnetic field.

23 p3322 A72-44306

EQUILIBRIUM DIAGRAMS

U PHASE DIAGRAMS

EQUILIBRIUM EQUATIONS

Homogeneous isotropic thin elastic shells under forces along edge and with faces free of tractions, deriving refined interior equilibrium equations

03 p0447 A72-13882

Potential energy principle in equilibrium stability problems for flexible extendable thread, using Liapunov method

03 p0390 A72-14208

MHD equilibrium equations for axially asymmetric finite beta toroidal plasma with diffuse boundaries

04 p0556 A72-14854

Convergence of iterative schemes for calculating stress state of thin shells with allowance for nonlinear terms in differential equilibrium equations

04 p0587 A72-15048

Asymmetric micropolar elasticity plane problem, solving equilibrium equations with Fourier transformation for displacements, rotation and stresses

05 p0737 A72-16296

Equilibrium equations solution for displacements of inhomogeneous isotropic elastic media

05 p0739 A72-16588

Equilibrium equations for thin walled shallow paraboloid shell of revolution, solving boundary value problem for edge fastened loaded circular planform region

07 p1091 A72-19757

Moment stresses and deflections of rigidly clamped hinged and simply supported square elastic plates beyond elastic limit, deriving equilibrium and strain compatibility equations

07 p1091 A72-19759

Variational principle in equilibrium and stability theory of rotating bodies under magnetic and thermal fields, explaining spiral branch number in galaxies

07 p1077 A72-19806

Anisotropic equilibrium solution to Vlasov equation for high beta theta pinch plasma column

07 p1045 A72-20478

Euler-Lagrange equation construction to obtain phenomenological description of quasi-equilibrium systems in metrics, noting solution coincidence with Onsager equations

07 p1102 A72-20665

Stable equilibrium conditions for linear elastic body, using Reissner functional

08 p1248 A72-21819

Axisymmetric deformation of hollow elongated elastic ellipsoid, using Lamé equilibrium equations

09 p1400 A72-22708

Micropolar thermoelasticity steady state axisymmetric problem solution from equilibrium equations, considering uniform surface temperature and surface heat doublet cases

09 p1403 A72-22749

Bent lever equilibrium and relativistic mass for point body in motion, introducing von Laue energy flow inertia into d'Alembert principle

10 p1505 A72-24074

Stability loss in thin convex shells of revolution under axisymmetric stress, obtaining integrals for equilibrium equations

10 p1557 A72-24630

LTE solutions of relativistic Boltzmann equation in presence of external electromagnetic field

10 p1513 A72-24856

Violation effect of moment equilibrium about normal in shell of revolution and helical shell theory, discussing distribution

10 p1560 A72-25171

Time dependent solutions of Tokamak equilibrium equations for plasma diffusive processes

11 p1694 A72-25787

Equilibrium stability of hyperelastic bodies under finite strain, deriving differential equations and boundary conditions of critical equilibrium states

11 p1686 A72-25916

Nonlocal elasticity theory from global equilibrium and second thermodynamics laws, deriving constitutive equations from Clausius-Duhem inequality and Gibbs thermodynamics

11 p1738 A72-26721

Chemical and ionizational equilibrium equations of heterogeneous gas mixture composition with allowance for condensed phase ionization

11 p1747 A72-26965

Nonlinear equilibrium equations and elastic stability of cylindrical shell weakened by circular hole

12 p1878 A72-27080

Equilibrium equations of infinite strip with circular hole, using plane multiply connected domain method for stress field

12 p1878 A72-27087

Third approximation solution to elastic bending equilibrium equations of Vekua plate theory in form of holomorphic functions

12 p1880 A72-27327

Hybrid cylindrical shell finite element, determining natural frequencies from equilibrium equations, stress functions stress-strain relationships and boundary force transfer matrices

12 p1882 A72-27339

Flux functions and balance laws for linear momentum in continuum mechanics, deriving traction vector and differential equilibrium equation

12 p1846 A72-27570

Iterative solution existence for elastic equilibrium problem of thin plates and shells near boundary layer

12 p1886 A72-27997

Ca and Na ionization equilibrium ratio in dust filled interstellar clouds, considering cosmic ray and charge transfer influence

13 p2040 A72-29405

Elastoplastic equilibrium theorems for solid subjected to variable external effects, considering perfectly plastic and arbitrary hardening materials

14 p2165 A72-30574

Nonlinear equilibrium, stability and vibration equations of shallow sandwich shells with isotropic outer layer and rigid compressible filler obtained by variational method

14 p2166 A72-30700

Slender rotating body aeroelastic behavior under inertial, gravitational, thrust, servocontrol, elastic and aerodynamic forces, presenting equilibrium equations in matrix form

15 p2319 A72-31210

Equilibrium equations for boundary value problems in Vekua theory with moments allowance for plate with circular hole under bending and torsion

15 p2333 A72-32682

Constitutive and equilibrium equations for theory of thin shells with slowly varying curvature based on Novoshilov and Kolter assumptions

16 p2465 A72-33004

Schaefer equilibrium and compatibility equations and Reissner constitutive equations for orthotropic cylindrical shells reduction to four simultaneous third-order equations

16 p2466 A72-33023

Displacements, rotations and stresses equilibrium equations solution for plane micropolar elastic half space, using exponential Fourier transforms

16 p2466 A72-33105

Equilibrium equations and boundary conditions for elastic buckling of open cylindrical sandwich shell under compressive forces applied to freely supported edges

16 p2467 A72-33116

Equilibrium equation for elastic deformation effect on free electricity redistribution in thin electroconductive shells

16 p2469 A72-33271

Stress analysis for brittle body with thermoinsulated crack under mechanical load and temperature field, noting limiting equilibrium equation

16 p2469 A72-33272

Nonlocal fluid dynamics continuum theory with equilibrium and constitutive equations derived by generalizing Stokes Laws, noting steady channel and shear flow

16 p2379 A72-33832

Equations of state and equilibrium for electron gas in strong magnetic field, discussing effects in pulsar crusts and atmospheres

16 p2460 A72-33929

Deflection of plate on elastic support from equilibrium equations based on shell theory

16 p2472 A72-34015

The equilibrium configuration of the gaseous component of the Galaxy.

17 p2611 A72-35312

Variational principle in equilibrium and stability theory of rotating bodies under magnetic and thermal fields, explaining spiral branch number in galaxies

17 p2617 A72-35730

Variational principles of the nonlinear theory of elasticity - Case of superposition of a small deformation on a finite deformation.

19 p2872 A72-37559

Equilibrium equations solution for displacements of inhomogeneous isotropic elastic media

19 p2872 A72-37560

Thick shell and oriented surface theories.

19 p2873 A72-37694

Convergence of a simple iteration scheme in equilibrium problems of flexible plates

19 p2877 A72-38201

Ionisation equilibrium and line intensities for an X-ray heated H I gas.

19 p2852 A72-38509

The equilibrium and the pulsation frequency spectrum of an electron cloud of spherical and cylindrical symmetry

19 p2867 A72-38571

General relativity equations for hydrostatic equilibrium of spherical distribution of mass combined with equations of state for highly relativistic neutron star central regions

20 p2955 A72-40011

- Linear equilibrium stability relationship to wave propagation through elastic medium, considering Hadamard theorem proofs 21 p3085 A72-41102
- Mechanical equilibrium equation of nongray stellar matter, approximating electron pressure vs temperature in early stellar atmospheres 21 p3109 A72-41435
- Nonlinear equilibrium equations for hinged flat circular and spherical membranes under large axisymmetric elastic deformations due to internal pressure 21 p3125 A72-41516
- Equilibrium equations for given stress concentration in circular and annular plates under tensile loads with different yield points in tension and compression 21 p3126 A72-41545
- Equilibrium and elastic deformation equations for closed cylindrical shells with arbitrary cross section and variable wall thickness 21 p3126 A72-41551
- Steady state or periodic solution to initial boundary value problems for heat conduction equation with nonlinear terms and boundary conditions 21 p3131 A72-41667
- Differential rotation of polytropic stellar models by structural equilibrium equations, disproving Porfiriev theory 21 p3114 A72-41775
- Convergence of the homogeneous linear approximation method in problems of plasticity theory of inhomogeneous bodies 22 p3232 A72-41911
- Equilibrium equation for unsteady creep of thin truncated conical shell under internal pressure, solving in successive time steps with Taylor series expansion 22 p3233 A72-42062
- Multilayer shells structural analysis via equilibrium equations transformation into system of equivalent equations 22 p3238 A72-42836
- The method of Muskhelishvili applied to coupled isotropic elastic plates 22 p3242 A72-43202
- Equilibrium equations for vortex lines with allowance for interaction with boundary of ideal superconductor, calculating extremum values of magnetic field 23 p3312 A72-43316
- Equilibrium equations and deformation of elastoplastic thin isotropic cylindrical shell with circular hole, noting nonlinear partial differential equations for plate displacements 23 p3345 A72-43587
- Limiting equilibrium of shallow conical shells of variable thickness 23 p3348 A72-43787
- First order constraints in three dimensional continuous elastic fibrous media and thin shells, presenting equilibrium equations 23 p3349 A72-43825
- Equilibrium and stress resultant displacement equations of thin rings based on virtual work principle, stressing warping and twisting moments 23 p3351 A72-44101
- Equilibrium equations of sandwich shell element with weak core and thin membrane facings under large transverse normal and shear strains, showing analogy to Cosserat surface theory 23 p3351 A72-44103
- Nonlinear sandwich shell and Cosserat surface theory 23 p3351 A72-44107
- Stability of orthotropic stiffened composite plates 23 p3352 A72-44109
- A method for balancing geopotential and wind fields 24 p3420 A72-44765
- Pure antiplane stress and equilibrium of isotropic elastic beams, considering suspended cylinders 24 p3459 A72-44989
- Relative equilibrium positions and their stability for a general gyrostat-satellite in a circular orbit 24 p3449 A72-45142
- A linear asymptotic theory for anisotropic shells 24 p3460 A72-45473
- EQUILIBRIUM FLOW**
- NT FROZEN EQUILIBRIUM FLOW**
- Equilibrium shear flow of stratified brine in cyclically continuous rectangular tank, discussing stable density region erosion by turbulent layers, Richardson numbers, transition layer and entrainment 01 p0051 A72-11228
- Pressure gradient effect on mixing length for equilibrium turbulent boundary layers, calculating eddy viscosity [AIAA PAPER 72-213] 05 p0651 A72-16855
- Solar wind speed variations, examining velocity structure recurrence at various rotations, time interval of steady state flow and temporal velocity effects 06 p0872 A72-17442
- Equilibrium turbulent flow of incompressible fluid in plane diffusers, taking into account channel cross section including viscous sublayer 06 p0801 A72-18144
- Incompressible fluid near equilibrium turbulent flow velocity distribution through plane diffuser, taking into account upstream conditions 07 p0972 A72-20115
- Equations of motion for discrete structure fluid, discussing equilibrium pressure and fluid-wall interaction effects 09 p1296 A72-23691
- German monograph on flow calculation in axial thermal turbomachines covering boundary conditions and field computation for steady state inviscid flow 10 p1415 A72-23772
- Equilibrium state dynamics of Burger turbulence model with two velocity components, using Fourier amplitude representation 11 p1615 A72-25553
- Linear impulsive spin down from rigid body rotational equilibrium of radiation penetrated opaque compressible fluid in circular cylinder 11 p1680 A72-25555
- Eddies memory in turbulent shear flow from experiments on plane turbulent wakes undergoing equilibrium transition under impulsive pressure gradient effect 18 p2680 A72-36476
- A study of the asymptotic behaviour of the external fringes of compressible, laminar boundary layers of a dissociating gas 18 p2683 A72-36937
- Development of the AEDC-VKF tunnel J - A real gas high density, true velocity, hypersonic, aerodynamic test facility. 21 p3040 A72-41579
- A study of loss of radial equilibrium solution in axial-flow blade row design calculations. 24 p3393 A72-45358
- EQUILIBRIUM METHODS**
- Force system axial equilibrium conditions for reference coordinates to eliminate inadmissible axes, deriving theorem for applicability limits 02 p0260 A72-12439
- Finite element displacement field with internal equilibrium application to nine degrees of freedom triangular bending element stiffness matrix calculation 14 p2168 A72-30930
- EQUINOXES**
- Lunisolar precession and equinox motion, discussing determination methods based on proper motions referred to fundamental systems 04 p0575 A72-15026
- Astronomical coordinate system, examining equinox proper motion and precession corrections 04 p0575 A72-15029
- Lunisolar precession and equinox motion from Cepheids proper motion, using recently determined distance values 04 p0576 A72-15038
- Ephemeris time, lunar orbital elements and FK4 equinox correction from the observations of the moon by the method of equal altitudes. 17 p2603 A72-34274
- Equinoctial orbit elements position and velocity vectors partial derivatives matrices for two body problem, discussing application to general and special perturbations 17 p2609 A72-35104
- Equinoctial orbit elements - Application to artificial satellite orbits. 21 p3112 A72-41575
- [AIAA PAPER 72-937] Accuracy of the determination of the zero points of a fundamental catalog from observations of major and minor planets 24 p3447 A72-45676
- EQUIPMENT SPECIFICATIONS**
- ECG telemetry systems parameters, discussing manufacturers specifications and standardized laboratory performance test data 02 p0169 A72-12139
- Pioneer F and G space probe EMC specification limits, comparing computer analysis prediction and system test data 03 p0329 A72-14048
- Proposed ASME procurement standards for gas turbines and generators, with compilation and definitions of specification terms [ASME PAPER 71-WA/GT-2] 05 p0703 A72-15895
- Reliability data collection methods, considering equipment initial design, breadboard models, prototype, production, acceptance, qualification, field installation and operation 10 p1443 A72-23975
- Mathematical model as basis for equipment design-sensitive maintainability prediction technique, using information theory concepts of design interpretation 10 p1503 A72-23979
- Spacecraft electronic equipment design criteria for maintainability and installation, discussing mockup zero g demonstration tests of new packaging concepts [AIAA PAPER 72-235] 10 p1487 A72-24445
- General aviation equipment standards in light of air traffic system safety needs, emphasizing Technical Standard Order system 11 p1748 A72-25571
- MOS specifications and application to shift registers, considering maximum ratings, clock pulse level and width and pulse rate 11 p1611 A72-26387
- Specification requirements for quality assurance of automated data processing systems based on hardware development procedures 11 p1602 A72-26791
- Instrument landing systems specifications for civil and military aviation, suggesting replacement type development based on existing configurations 12 p1842 A72-27110
- Complete aircraft systems reliability and maintainability, discussing extraordinary variances causes, faulty data inferences and operational testing for equipment specifications validation 13 p1896 A72-28358
- Quantified design criteria for vibration and shock test fixtures to insure test repeatability, proposing chart inclusion in military test standards 15 p2215 A72-32619
- Attitude instruments, pitch and roll. I - Minimum performance standard for equipment. 18 p2692 A72-36534
- [SAE AS 1162] Reliable component procurement for Symphonie satellite, discussing parts list, specifications and subcontract monitoring and inspection 18 p2670 A72-37124
- Electronic primary flight control system requirements and equipment characteristics, discussing USAF and NASA fly by wire R and D programs [AIAA PAPER 72-882] 20 p2887 A72-39118
- Analog and digital data recording systems, discussing accuracy, versatility and cost factor tradeoffs in selecting equipment for given applications 22 p3155 A72-42707
- Electrohydraulic stand for vibration strength testing, discussing system design, specifications, frequency-amplitude characteristics and applications 23 p3278 A72-43760
- IR detector specifications, construction and applications to industry science and military 23 p3291 A72-44393
- Time ratio models of equipment availability for using and procuring agencies, considering performance effectiveness criterion and suboptimization risk 24 p3467 A72-44659
- EQUIPOTENTIALS**
- Best fitting triaxial ellipsoid representation of seleno-equipotential surface at Apollo 12 landing site based on observed local gravity and moon angular velocity 15 p2308 A72-31922
- EQUIVALENCE**
- Inertial and gravitational mass equivalence principle verified for aluminum and platinum, using torsional pendulum with large relaxation time 03 p0388 A72-13076
- Gravitational wave detection, discussing equivalence principle and force measurement 03 p0389 A72-13272
- Equivalence of integral equation form and infinite system of linear equations with eigenvalue localization, applying to linear ordinary differential equations. 09 p1342 A72-23367
- Equivalence conditions for optimal control problems for stochastic and deterministic plants in cases of nonrandomized strategies 10 p1457 A72-24637
- German book on gravitation theory and equivalence principle, covering Lorentz invariance in Riemann space, relativity and Einstein effects 10 p1512 A72-24752
- Inertial and gravitational mass equivalence principle verified for Al and Pt, using torsional pendulum with large relaxation time 13 p2004 A72-29426
- Equivalent baseband and passband delay line and transversal equalizers derivation for linear modulation systems, obtaining relationship between tap coefficients 15 p2211 A72-31844
- Minimum norm and gradient projection constrained optimization techniques for iterative solution of trajectory optimization problems, presenting mathematical relations to prove equivalence 17 p2576 A72-35232
- Classical physics treatment combined with constitutive equations for local relativistic equivalence and material indifference principles 21 p3085 A72-41201
- Equivalence conditions for classes of linear and non-linear distributed parameter systems. 23 p3277 A72-44369
- EQUIVALENT CIRCUITS**
- Large-signal IC equivalent circuit model for DC, linear and nonlinear transient time circuit analysis of lateral p-n-p transistors, including isolation junction interactions 01 p0044 A72-10126
- Equivalent current system from measured geomagnetic disturbance vectors, solving Biot-Savart formula

derived nonlinear equations by Newton-Raphson iterative method

01 p0055 A72-10430

Gunn diode microwave oscillator postcoupling to waveguide, deriving theory based on equivalent circuit for load impedance assessment

01 p0037 A72-10640

Equivalent circuit model for electroacoustic surface microwave transducer, discussing radiation properties determination from excitation fields distribution

01 p0041 A72-10704

Equivalent circuits and characteristics of multiwire and small active transistorized antennas including unipoles, loops, Franklin arrays and mast antennas

02 p0191 A72-11685

Antenna If impedance measurements of lower terrestrial plasma wave characteristics, using equivalent impedance probe circuit

02 p0172 A72-11946

TWT small parameters measurement for gain calculation, using equivalent transmission line model

02 p0193 A72-12229

MOS transistor frequency and transient response characteristics for equivalent circuit synthesis, using Bessel functions in differential equation solution

02 p0196 A72-12761

Equivalent circuit models in semiconductor transport for thermal, optical, Auger-impact and tunneling recombination-generation-trapping processes

[AD-740495] Self oscillating dc-dc converter analysis and optimal design, modeling by single loop nonlinear feedback system

03 p0401 A72-13585

Radiative coupling of fed and unfed adjacent antennas in navigation systems rotating beam circular arrays, deriving equivalent circuit via quadrupole theory

05 p0635 A72-16300

N-channel Si MOS microwave transistor, discussing fabrication, design, power gain, stability, noise figure, equivalent circuit and applications

05 p0636 A72-16361

Microwave frequency multiplier construction by hybrid circuits based on quasi-lumped components, calculating characteristics from equivalent circuit

06 p0785 A72-18313

Operational and equivalent circuit characteristics of low noise hf and shf transistors in wideband amplifiers

08 p1139 A72-21052

Two dimensional dynamic model for background noise generation in bipolar transistors, using equivalent circuit

09 p1286 A72-23105

Alternative TEM and waveguide type equivalent circuits for rectangular resonator loaded by lumped capacitance

09 p1289 A72-23365

Interdigital acoustic surface wave transducer immittance characteristics calculation from equivalent circuit, demonstrating effectiveness on delay lines

[AD-743552] 09 p1316 A72-23421

Junction transistor equivalent circuit small signal parameters determination at VHF and UHF

10 p1450 A72-24324

T equivalent circuit magnetic modulator system with split excitation windings on four separate cores magnetized by HF source, noting null drift due to hysteresis

11 p1603 A72-25281

Pump and unloading valve hydraulic system model with waves processes allowance in connecting pipe, discussing liquid mass and leakage effects on stability

11 p1578 A72-25770

Microwave resonators excited in coupled and E sub zero modes, determining equivalent circuit and Sommerfeld resonator Q factor and guide wavelength

11 p1605 A72-26369

Equivalent network for symmetric inductive irises, investigating simultaneous effect of finite thickness and higher order mode interaction by variational approach

11 p1607 A72-26993

Static and impedance characteristics and equivalent circuit of p-n-p-n inductance diode, using ambipolar diffusion length

12 p1790 A72-27499

Channel formation in insulated gate FET, obtaining equivalent circuit

12 p1791 A72-27548

Slow wave structures attenuation effect on dispersion characteristics from equivalent circuit representation at two terminal pair networks

13 p1926 A72-28376

Antenna I.F impedance measurements of lower terrestrial plasma wave characteristics, using equivalent impedance probe circuit

13 p1920 A72-29258

Noise control by Helmholtz resonators, considering equivalent circuits via feedback schemes

13 p2005 A72-29567

Hysteretic motor in steady synchronous operation with nonsinusoidal supply voltage, computing stator winding current based on superposition with two linear equivalent circuits

13 p1900 A72-29975

Equivalent circuit characterization of waveguide-mounted IMPATT diode oscillators and associated circuit parasitics at millimeter wave frequencies

15 p2205 A72-31315

Nodal equations derivation for lumped circuit representation of Gunn diode with steadily propagating domain under steady state and transient conditions

15 p2205 A72-31317

Simplified equivalent circuit analysis for Gunn diode coupling to rectangular waveguide by inductive post, using perturbation approximation

15 p2205 A72-31353

Transistorized microwave amplifiers with dissipative equalizing networks, describing transistor equivalent circuit

15 p2206 A72-31659

Pulsed IMPATT diode oscillators RF oscillations growth rate and frequency shift behavior during build-up period, comparing equivalent circuit derived electrical properties with measurements

15 p2208 A72-32472

A simulation method permitting the direct construction of an integrated fluidic circuit with predetermined frequency response curve

17 p2494 A72-34197

Pulsed Impatt diode oscillator circuit design and operation frequency prediction for high Q coaxial structures from equivalent circuit

17 p2526 A72-34466

Three-dimensional small-signal analysis of bipolar transistors.

17 p2530 A72-35099

Design of nonlinear networks with a prescribed small-signal behavior.

17 p2533 A72-35199

Development of a continuous linear model of a d-c to d-c flyback converter.

18 p2643 A72-36073

Equivalent circuits and oriented graphs for network analysis and synthesis of nonlinear transducers used in control systems

19 p2777 A72-37316

French monograph - Contribution to the study of the behavior of bipolar transistors during high frequency dynamic operation

19 p2772 A72-37485

German monograph - A theoretical and experimental contribution to the equivalent circuits of electrofluidic transducers operating on the nozzle/deflecting plate principle

19 p2754 A72-37653

An analytical equivalent circuit representation for waveguide-mounted Gunn oscillators.

19 p2773 A72-38291

Eigenfrequencies of monolithic filters.

19 p2774 A72-38608

A large-signal theory for current-driven frequency multipliers.

19 p2775 A72-38609

Theory of spontaneous mode locking in lasers using a circuit model.

19 p2813 A72-38690

MOS transistor frequency and transient response characteristics for equivalent circuit synthesis, using Bessel functions in differential equation solution

20 p2907 A72-39067

Temperature-time characteristics of pulse-loaded temperature-measuring resistors

20 p2926 A72-39571

Digital filters with cyclically variable coefficients

21 p3025 A72-40221

Communication receivers interference modeling - Nonlinear transfer functions from circuit analysis - Mild excitations.

21 p3019 A72-40890

Avalanche transistor circuit with controlled S shaped I-V characteristics, discussing equivalent circuits and operating points stability

21 p3034 A72-41119

Quantitative derivation of large signal equivalent circuit of Gunn element in domain mode based on current and space charge characteristics

21 p3034 A72-41401

The distribution of gate-channel capacitance between source and drain in the equivalent circuit of a MOS transistor

21 p3035 A72-41490

General transport theory of noise in pn junction-like devices. I Three-dimensional Green's function formulation.

22 p3160 A72-43083

A solid-state 'flux-drive' control circuit for latching-ferrite-phaser applications.

23 p3275 A72-43574

Excitation of oscillations in transistor oscillators

23 p3271 A72-43840

MOS logic circuit design simplification by replacing series and parallel transistor networks by equivalent single transistor inverter circuit

23 p3271 A72-43843

A single-tuned oscillator circuit for Gunn diode characterizations.

23 p3272 A72-44194

ERBIUM

High resolution atmospheric transmission measurement of wavelength dependence of absorption losses in carbon dioxide of solid state Er laser radiation

02 p0238 A72-12201

Yb and Er cations dominant sites examination in zinc selenide from fluorescence emission spectra

03 p0404 A72-14265

Photoluminescence of Er cations in CdS, observing group I co-dopants sensitizing behavior and broadband emission spectra

04 p0563 A72-15472

Coherent emission lines in visible spectrum from triply ionized Er in barium yttrium fluoride, discussing energy level transitions associated with various lines

16 p2401 A72-33387

ERBIUM ALLOYS

Phase diagrams of Hf-Ce and Hf-Er alloys, plotting hardness and electroconductivity curves

15 p2289 A72-31188

Phase diagram of the neodymium-erbium system

19 p2846 A72-38473

ERBIUM COMPOUNDS

Phase diagrams of yttrium, erbium and ytterbium oxides at 1500-2400 C, using annealing and quenching method with differential thermal analysis

07 p1047 A72-18858

ERECTON

U CONSTRUCTION

ERGODIC PROCESS

Quasi-ergodicity condition of dynamic electromagnetic scattering diagram of flying object in terms of amplitude or phase elements

02 p0183 A72-12765

Fixed level intersection by two stationary ergodic independent random processes in observation time for dynamic control sampling and reliability estimation

05 p0641 A72-16316

Upper bound on rate distortion function for discrete ergodic sources with memory, applying to pictorial data processing

06 p0776 A72-18390

Reliability tests improvement by ergodic processes failure prediction and data storage for high reliability products manufactured in small numbers

08 p1180 A72-22067

Wiener generalized harmonic analysis relationship to steady random functions, emphasizing higher order properties and ergodic process conditions

10 p1504 A72-24063

Fixed level intersection by two stationary ergodic independent random processes in observation time for dynamic control sampling and reliability estimation

11 p1610 A72-25799

Ergodic boundary in initial conditions space for turbulent two dimensional flow, explaining phenomenon in terms of negative temperatures for point vortex model

12 p1797 A72-27183

Ergodic theorems for operators generated by Markov transients, examining asymptotic properties of stochastic learning model

12 p1787 A72-27924

Nonlinear resonating correlator with orthogonal filters, considering cut-off frequency of ergodic random process with constant power spectral density

14 p2090 A72-31125

Automated problem solving in continuous stochastic processes, using nonergodic representation of Gaussian process with continuous spectral density

15 p2204 A72-32588

Nonlinear vibration damper system subject to forced vibrations considered as stochastic processes in form of white noise and stationary and ergodic processes

16 p2467 A72-33144

Atmospheric turbulence statistical theory, discussing random flow field characterization by property expressed in ergodic theorem

17 p2537 A72-34273

Generalized random systems with complete connections

17 p2573 A72-34276

Fatigue life gages use in combination with strain multipliers in field applications with random ergodic cyclic strains

17 p2554 A72-34822

Central probability limit theorems and asymptotic normality in fluid mechanics for random stationary processes with uniform ergodicity and strong mixing

18 p2677 A72-36003

Reliability of simulations of asymptotically steady and strictly ergodic stochastic processes

18 p2704 A72-36467

Negative temperatures in two dimensional vortex motion.

18 p2681 A72-36669

Dynamic electromagnetic scattering pattern of flying object, constructing quasi-ergodicity condition to compute standard statistical descriptions for recognition

20 p2903 A72-39071

On the ergodic coefficients concerning generalized random systems with complete bonds

22 p3199 A72-42637

ERGOMETERS

Maximum oxygen intake during exercise on treadmill compared with bicycle ergometer, analyzing circulatory dynamic factors and cardiac output relation to oxygen transport capacity

07 p0922 A72-20251

Bicycle ergometer measurements of thermoregulation input and output under wide range of work load and climatic conditions, deriving correlation equation

11 p1579 A72-25874

Physical work capacity comparison during bicycle ergometry and treadmill walking tests, measuring oxygen uptake, ventilatory parameters and excess carbon dioxide production

11 p1579 A72-26095

Maximal oxygen uptake and heart rate during ladder climbing, inclined treadmill running and cycling ergometer tests

11 p1586 A72-26612

Correlation between ergometry, ballistocardiography and coronary angiography in 267 patients.

18 p2649 A72-36034

Self-paced ergometer performance - Effects of pedal resistance, motivational contingency and inspired oxygen concentration.

18 p2653 A72-36911

ERGONOMICS

U HUMAN FACTORS ENGINEERING

EROSION

NT WIND EROSION

Ductile metal surface erosion by hard abrasive grains striking at grazing angles

03 p0373 A72-13650

Mechanical and thermochemical erosion during ablation of silicophenolic material

04 p0597 A72-15554

Erosion of materials under drip impact loads, determining wear rate dependence on drop size, impact velocity and material properties

05 p0734 A72-15981

Explosive erosion in Al, Cu, W and Pb electrodes during high current spark discharges, using time resolved photography

05 p0692 A72-16032

Cathode temperature measurement in erosion and heat transport reduction by cesium seeding of Ar plasma arc

06 p0862 A72-18334

Cavitation erosion of Al in liquid oxygen as function of static pressure and ultrasound frequency

07 p1034 A72-18921

Cavitation phenomena role in liquid drop impact erosion of steam turbine blades leading edges

07 p0967 A72-19262

Phase composition changes, crater formation and metal ejection during erosion by pulsed laser beam

07 p1009 A72-20610

Dimensional metal working by material erosion involving stereomechanical energy transmission to surface of nonrigid mechanical body

08 p1173 A72-21027

Electrical erosion efficiency of metal working under increased pressure in discharge gap in air and water

08 p1174 A72-21029

Automatic control of electroerosion machining by process computer, using pulse-voltage-metal removal relation

08 p1174 A72-21030

Electroerosion machining with optimal control of electrical parameters, number of passes and electrode wear, using nonlinear programming and critical path method

08 p1174 A72-21032

Optimization for maximum productivity of electric spark machining with vibrating electrode, noting erosion product removal difficulties

08 p1174 A72-21033

German monograph on model concept for erosion mechanism involved in crystalline material surface bombardment covering particle elastic deformation during impact

09 p1397 A72-22324

Solid teflon pulsed plasma thruster quasi-steady and short pulse discharge operations, discussing propulsion system performance and erosion behavior

[AIAA PAPER 72-459]

11 p1709 A72-26195

Lifetime limitations of ion extraction systems for electron bombardment ion thrusters due to sputter erosion of electrode by ion beam

[AIAA PAPER 72-477]

12 p1860 A72-27421

Relaxation hypothesis of cavitation erosion based on small perturbations, eliminating theory-experiment contradictions

13 p1941 A72-28776

Air dust erosive damage to helicopter gas turbine engine parts, discussing inertial rotorless filtering systems

13 p2026 A72-28786

Mars surface particulate matter eroded by atmospheric winds, noting erosive and settling velocities and yellow clouds distribution

13 p2036 A72-28794

Cavitation erosion of Al in liquid oxygen as function of static pressure and ultrasound frequency

13 p1942 A72-29207

Surface phase transformation during cavitation erosion in Co and Fe alloys, suggesting stacking fault energy effect on erosion resistance

14 p2119 A72-30603

Thermomechanical erosion prediction for ablative, composite material, reentry nosetip applications and model development for heating, pressure and shear forces

[AIAA PAPER 72-299]

14 p2171 A72-30827

Lunar surface microerosion relationship to interplanetary dust particle flux distributions, investigating sputter erosion and lunar rocks lifetimes

15 p2310 A72-31988

Atmospheric organic vapor effects on electric contact erosion, deriving showering arc duration, gap breakdown, arc number and energy

18 p2665 A72-36118

Mechanism for relaxation of cavitation erosion based on small perturbations, eliminating theory-experiment contradictions

21 p3044 A72-40271

Erosion effects on gas turbine engine compressor blades due to dust ingestion, discussing means for alleviating performance and service life losses

[ICAS PAPER 72-02]

21 p3099 A72-41127

Erosion of materials under drip impact loads, determining wear rate dependence on drop size, impact velocity and material properties

24 p3460 A72-45723

ERROR ANALYSIS

Analog computer simulation of automatic control systems containing time delay element in feedback loop, evaluating errors

01 p0044 A72-10152

Error probability distributions in navigational statistics involving single or identical and diverse instruments or operators

01 p0096 A72-10176

Wideband FSK receiver for space telemetry, calculating error probability in multipath signal fading due to planetary surface reflections

01 p0025 A72-10329

Bit error rate estimation for narrow band digital communication in presence of atmospheric radio noise bursts

01 p0025 A72-10334

Accuracy of spacecraft trajectory determination by complex expressions in multidimensional geometric representation

01 p0127 A72-10353

Precision photogrammetric techniques coordinated with classical geodetic surveys for moderate cost control surveys, discussing error sources

01 p0065 A72-10455

Error fluctuation component spectral density determination in closed automatic nonlinear system for controlling random vibration spectrum

01 p0045 A72-10505

Algorithms for object apparent velocity calculation from linear acceleration and angular velocity integrators readings, estimating errors

01 p0135 A72-10507

Invariant imbedding theory of aerosols multiple scattering induced telephotometric errors, determining scattering coefficients relative to optical thickness by Monte Carlo method

[AIAA PAPER 71-1062]

01 p0066 A72-10531

Stellar intensity effect on angular navigation sighting accuracy attainable between star and lunar limb using Apollo T2 sextant

01 p0097 A72-10566

Primary component corrections for global cosmic ray variations from latitudinal expeditions, discussing adaptation to computer

01 p0118 A72-10584

Smith method for radio wave propagation time lag calculation, assessing maximum error by comparing calculated with measured distance/frequency characteristics

01 p0028 A72-10617

Atmospheric radio refractive index computation errors derived from monthly averages of pressure, dry bulb temperature and vapor pressure

01 p0095 A72-10835

Terminal aerodrome forecasts usefulness and accuracy assessment

01 p0095 A72-10864

Cloud temperature determination from satellite IR images, presenting error corrections for various U.S.S.R. locations

01 p0095 A72-10956

Spacecraft attitude determination with single-axis sensor and single natural radiation source with relative mutual motion, deriving error equations

01 p0032 A72-11224

Second order Markov process statistical model for gravity anomalies in local region, applying to error analysis in inertial navigation system computerized simulation

02 p0207 A72-11596

Asymptotic methods application to differential equations in nonlinear solar convection theory at high Rayleigh number, noting discrepancy from numerical integration

02 p0276 A72-11644

Optimal stochastic /Kalman/ filters application to integrated air and submarine navigation systems, discussing measurement errors modeling as bias and colored noise

02 p0256 A72-12050

Bias and spread in extreme value theory performance tests of communications systems, comparing with bit error rate tests

02 p0173 A72-12129

Coherent demodulation of continuous phase binary FSK signals in additive white noise, determining error probability

02 p0174 A72-12135

Steerable receiving antennas L/S band solar calibration error statistical analysis, obtaining 0.5 db uncertainty by monitoring antenna gain-to-noise temperature ratio

02 p0192 A72-12159

Phase error in 136 MHz interferometer due to galactic nucleus passage, obtaining lower bound

02 p0175 A72-12160

Steerable vhf/uhf receiving antennas stellar calibration error analysis, obtaining worst-case uncertainty of 0.4 db by monitoring antenna gain-to-noise temperature ratio

02 p0175 A72-12161

Feedback control dynamic system described by linear differential equation with random coefficients, calculating parameters distribution effect on behavior precision

02 p0197 A72-12339

Extremal system with second control loop for search signal frequency regulation to optimize primary loop operation, determining system dynamic errors under random drift

02 p0197 A72-12340

Low angle monopulse radar tracking errors due to multipath, considering amplitude variation across antenna aperture and reduction by target-image resolution

02 p0178 A72-12391

Distance effects on radio interferometric measurement accuracy, discussing single error source influence on total error

02 p0182 A72-12708

Aircraft trajectory optimization for maximum profit as decisional problem under risk conditions, determining probabilities by Monte Carlo method

02 p0257 A72-12747

Numerical weather prediction, discussing automatic forecasting, error sources, models and four-day validity in Northern Hemisphere

02 p0254 A72-12781

Radar accuracy for precipitation measurements, discussing error sources

02 p0254 A72-12784

Kalman filter divergence due to errors, applying to orbital navigation

02 p0198 A72-12805

Birefringent filter theory and optical properties, discussing transmission profile and error sources

03 p0352 A72-12947

Target motion simulator with photographic recording of image velocity and motion compensation in cameras, discussing errors

03 p0356 A72-13226

Dynamic structural analysis by finite element method, describing error bounds for eigenvalue analysis by elimination of variables

03 p0442 A72-13401

Computer calculation for atmospheric total mass and seasonal redistribution from pressure and temperature field data, discussing error sources

03 p0348 A72-13480

Imperfect thermal modeling of spacecraft based on error states representation in multidimensional Euclidean space, evaluating approximate total error effect

03 p0441 A72-13635

Synchros as electromechanical function generators and receivers for analog computers, examining errors in standard resolvers operation

03 p0328 A72-13841

Mean value, repetition and discontinuity errors of spectral transposition method involving memory storage and compressed signal processing

03 p0338 A72-13892

Linear scheme to calculate errors of incorrectable inertial systems

03 p0387 A72-13911

Soviet book on gyroscopic systems and inertial guidance instruments, emphasizing system motion under various dynamic conditions and systematic errors

03 p0362 A72-14167

Planar phased array antennas with uniform current amplitudes, calculating beam-pointing error dependence on array geometry, phase errors and scan angle

03 p0325 A72-14179

Code performance evaluation over real digital channels, characterizing channel error process by multigap statistics

03 p0325 A72-14183

- Multidimensional Gaussian distribution integrals evaluation for correlator analysis, discussing fix error probability and variance 03 p0387 A72-14189
- PCM/NRZ signal band limiting effect on bit error probability, presenting SNR degradation as function of bandwidth-bit duration product and bit patterns 03 p0325 A72-14192
- Past meteorological data assimilation in dynamical analysis, computing initial condition with time sequential data for error reduction 04 p0541 A72-14455
- Near optimum limiting and blanking levels /error probability/ selection for binary signal matched filter reception in Gaussian and impulse noise, discussing performance simulation 04 p0486 A72-14485
- Iteration method error estimates for thin elastic shell basic stressed state and simple fringe effect relation to boundary stressed state 04 p0586 A72-15012
- Modified quasi-linearization algorithm for solving nonlinear two-point boundary value problems based on performance index and cumulative error in differential equations 04 p0539 A72-15045
- Linear feedback control systems with time lag, calculating integrated squared error by Liapunov function 04 p0506 A72-15110
- Jimsonde high resolution temperature "nsor for FPS-16 Radar/Jimsphere wind system, analyzing rms errors 04 p0522 A72-15157
- Stellar radial velocities observation with photoelectric spectrometer, discussing catalog errors 04 p0577 A72-15280
- Error distribution computation for combined Rayleigh-Gaussian statistics data, applying to antenna radiation beam-pointing example 04 p0500 A72-15303
- Statistical calculation of wear rate in friction pair with linear contact, analyzing errors 04 p0528 A72-15711
- Error bounds on elastic-plastic strain wave measurements, considering one dimensional wave propagation in semiinfinite bar [ASME PAPER 71-MET-W] 05 p0731 A72-15789
- Distributed parameter state regulator system, investigating order of spatial discretization error in finite difference approximation to optimal response, control and performance cost 05 p0639 A72-15805
- Wilt-type quadrature formulas with preassigned nodes, featuring existence of error bound without derivatives 05 p0632 A72-15816
- Pulse and Doppler microwave radars comparison with respect to accuracy of moving targets velocity measurements and power characteristics 05 p0661 A72-16034
- Elastic boundary value problems static and geometric field parameters pointwise upper and lower bounds, determining solution coefficients by error energy minimization 05 p0735 A72-16062
- Artificial earth satellites orbit plane determination accuracy in terms of local vertical sensor errors and gyroscope drift 05 p0717 A72-16441
- Interplanetary spacecraft trajectory error analysis by closed form approximation to state transition matrix, enabling rapid estimation with computer program 05 p0718 A72-16443
- Coefficient rounding effect in digital filters using floating point arithmetic 05 p0633 A72-16576
- Error covariance matrix square root calculation in orbit determination from ground based observations 05 p0720 A72-16752
- Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure 05 p0721 A72-16760
- Polynomial class random process realization based on statistical methods of processing spacecraft orbital measurement data, considering random and systematic errors 05 p0683 A72-16763
- Methodical errors in spacecraft local vertical determination due to variability of physical effects, considering planet oblateness, atmospheric refraction, incident radiation fluctuations, etc 05 p0721 A72-16764
- Group velocity and numerical error propagation in partial differential and finite difference equations of gas dynamics [AIAA PAPER 72-153] 05 p0652 A72-16952
- Decision error estimates applied to detection problem with digital radar, computing upper and lower bounds for error probability 05 p0632 A72-17093
- Binary differentially coherent phase shift keyed system, evaluating error probability performance in presence of thermal noise and intersymbol interference 06 p0772 A72-17408
- Linear system digital simulation by matrix exponentiation with generalized hold order algorithm for accuracy improvement at less computer time 06 p0839 A72-17630
- Reconstruction errors, quantization noise and channel bandwidth in high order digital to analog conversion 06 p0779 A72-17783
- Critical review on data accuracy of maximum principal elastic stresses and deflections of thin initially-flat square isotropic plates under uniform normal pressure 06 p0894 A72-17796
- Hollow rubber impact absorber stiffness and deformation characteristics derivation by classical elasticity theory, noting accuracy 06 p0895 A72-17797
- Book on mechanization and error analysis of inertial navigation systems, stressing terrestrial applications 06 p0845 A72-17944
- Lunar photometric studies, discussing surface light scattering properties, data reduction and relative and systematic errors in brightness 06 p0817 A72-18224
- Longitudinally magnetized fully filled square waveguide reciprocal ferrite phase shifter, predicting frequency characteristics by rotational error analysis 06 p0786 A72-18370
- Block orthogonal M-ary communication over fading dispersive channel with intermittent on-off noiseless feedback, calculating upper and lower bounds on error probability 06 p0776 A72-18389
- Variable length codes using Fano metric for minimum error probability sequential decoding 06 p0776 A72-18393
- Nonlinear self oscillation solution for systems with two degrees of freedom, comparing with harmonic linearization method for error of small parameter method 06 p0851 A72-18721
- Gyroscopic error analysis, solving nonlinear equations by continuous Markov processes theory 06 p0819 A72-18724
- Error analysis of finite element solutions for elastic-plastic sandwich plates 07 p1086 A72-18779
- Coefficient matrix for estimation of numerical solution error bounds for finite element models 07 p1025 A72-18786
- Round-off error analysis in numerical solutions of finite element equations in dynamic models 07 p1025 A72-18796
- Mean square error and bound on relative error for Reissner plate theory, including shear deformation effect 07 p1087 A72-18812
- Complex systems calibration based on computer derived transfer function, discussing theory, Fortran calibration program, error analysis and applications 07 p0949 A72-18818
- Small parameter method application to quasi-linear problems solution in nonstationary heat conduction with substantial nonlinearities and weak perturbation, analyzing error 07 p1098 A72-18937
- Differential equation initial value problem solution error bounds construction by interval arithmetic to guarantee exact solution inclusion 07 p1026 A72-18968
- Aircraft engine test data processing by polynomial relations, assuming normal measurement error distribution 07 p0994 A72-18978
- Influence coefficients method accuracy for design and adjustment of gas turbines, engines and parts 07 p1054 A72-18998
- Signal design for coherent M-ary communication systems by stochastic gradient algorithm for minimizing error rate 07 p0959 A72-19285
- Hyperstable algorithm for multiinput and output systems identification through equation error method, representing scheme as equivalent time varying nonlinear feedback system 07 p1027 A72-19290
- Concatenated coded command system for low error probabilities at moderate SNR, emphasizing spaceborne portions implementation 07 p0949 A72-19299
- Target azimuth and elevation estimation by four beam cluster, analyzing angle estimation accuracy as function of SNR by computerized Monte Carlo simulation 07 p0941 A72-19304
- Radio direction finding with discrete antenna scanning and multilevel beacon signal quantization, investigating accuracy 07 p0943 A72-19523
- Isotope radiometric density measurement errors for thin material sections, presenting mathematical analysis for measurement procedures optimization 07 p0995 A72-19651
- K and Ka bands standard electromagnetic horn gain measurement and error analysis at different wavelengths by two-antenna method 07 p0957 A72-19784
- Disturbing gravity potential and vertical deflection calculation error reduction based on pure gravity anomalies in geodesy 07 p0977 A72-19819
- Spurious physical effects in penetrating cosmic ray showers resulting from momentum measurement errors 07 p1060 A72-19853
- Analog/hybrid simulation of noise effect on adaptive delta modulation system consisting of transmitter, receiver and error simulator 07 p0951 A72-20339
- Statistical analysis of system component error propagation by digital simulation using Continuous System Modeling program, considering strapped down inertial guidance computer 07 p1033 A72-20347
- Stability and local error of difference formulas derived from characteristic polynomial for first order ordinary differential equation solution 07 p1028 A72-20472
- Quantization errors effect on recursive filter design for strapdown inertial navigation systems, developing suboptimal linear minimum variance 08 p1144 A72-20848
- Numerically exact nonlinear filter synthesis, describing confidence intervals for error performance statistical inferences 08 p1144 A72-20850
- Biased estimator as alternative to linear unbiased estimator for dynamic system model states and parameters optimization and regulation, noting squared errors sum 08 p1144 A72-20852
- Jeans escape rate prediction validity for hydrogen atoms in upper atmosphere and error sources in physical models 08 p1159 A72-21401
- Local level and space stable inertial navigation systems, comparing position error propagation 08 p1204 A72-21410
- Sidewall reflection induced borelight error in anechoic chamber used for missile test or simulation 08 p1141 A72-21421
- Feedback control dynamic system described by linear differential equation with random coefficients, calculating parameters distribution effect on behavior precision 08 p1146 A72-21554
- Extremal system with second control loop for search signal frequency regulation to optimize primary loop operation, determining system dynamic errors under random drift 08 p1146 A72-21555
- Vibrotactile warning device effectiveness under auditory and visual loadings, investigating reaction time and errors number 08 p1126 A72-21569
- Systematic errors in scan-and-measure devices for tracking cameras photographs analysis, discussing correction during measurements 08 p1209 A72-21913
- Conjugate gradient method for computerized antenna radiation pattern synthesis using error functional minimization and iterative procedure 08 p1143 A72-21988
- Intense precipitation contour zone distinguishing methods error estimation in seeding experiments on frontal clouds 08 p1201 A72-21994
- Meteorological radar signal reflectivity probability and quantization error dependence on incoherent storage device parameters from computer simulation 08 p1201 A72-21995
- Deviation accumulation conditions and maximum dynamic error of linear automatic control system under perturbation, including theorem for Bellman equation 08 p1146 A72-22177
- Component evaluation of linearity error of measuring instruments 09 p1284 A72-22241
- Lateral refraction dependence on earth rotation and correction formula for angle measurement errors in class I triangulation 09 p1299 A72-22946
- Terrestrial altitude differences effects on photogrammetric data accuracy in two step compensation with models 09 p1311 A72-22966
- Rectification process for transformation of single photograph orientation into setting value, noting reduced accidental residual errors 09 p1311 A72-22967
- Axial thermal stresses in beams, investigating error in elementary calculations 09 p1405 A72-22999

Lunar limb charts comparison, computing corrections to orbital elements and systematic and random errors
09 p1388 A72-23056

Disk diameter errors due to wire thickness in reduction of visual planetary observations
09 p1311 A72-23062

Power series solutions to transition and matrix covariance differential equations, obtaining truncation error bounds and polynomial approximations
09 p1341 A72-23093

Air velocity calculation from hot-wire anemometer measurements in variable density flow, discussing correction factors checking method and application to internal combustion engine
09 p1315 A72-23390

Stationary Kalman-Bucy filter synthesis from filter coefficients and correlation matrix of filtration errors, discussing random process estimation application
09 p1289 A72-23434

Data reduction for photographic catalog of AGK2-AGK3 stars in terms of random and systematic errors in plate constants
09 p1392 A72-23543

Functional analytical formulation of steady creep processes, using error estimations in solution of equations with monotonic potential operators in Banach spaces
09 p1409 A72-23567

Wind and temperature fields periodic updating, considering error reduction as function of time intervals between updates
09 p1348 A72-23659

Measured quantity distribution effect on measurement errors, noting application in mass production process control
09 p1316 A72-23662

Optimum bounding filter design based on error covariance for Kalman-Bucy and Wiener filters with inexactly known parameters, obtaining performance figure of merit
10 p1454 A72-23785

Remotely sensed imagery data photointerpretation by gray tone texture context feature extraction, noting identification accuracy
10 p1442 A72-23812

Software reliability engineering, emphasizing looping, deadlocks and difficulties due to imperfect logic, and error causes
10 p1486 A72-24020

Stereoscopic acuity for photometrically matched background wavelengths at scotopic and photopic levels, plotting variable depth error as function of retinal illuminance
10 p1425 A72-24269

Multichannel integral commutators with MOSFET as switching elements, calculating transmission errors
10 p1449 A72-24288

Electromagnetic wave scattering on inhomogeneities by Born approximation, estimating maximum error for small correlation radius
10 p1436 A72-24503

Error probability and reception stability in synchronous detection of phase manipulated signals with additive Gaussian noise at multiplied carrier frequency
10 p1436 A72-24587

Binary split phase FSK signal noncoherent detection by multiple predetection filtering, noting probability of error per bit
10 p1437 A72-24686

Observation errors effects on satellite attitude best least squares estimate based on direction measurements, using Monte Carlo method computer simulation
10 p1438 A72-24692

Amplitude comparison direction finding systems, calculating error due to clutter from incident signal and noise angular distribution relationship to measured arrival angle
10 p1439 A72-24803

Finite element method for approximate solution of elliptic partial differential equations on unbounded domains, proving error bounds
11 p1675 A72-25271

Predictor-corrector method for stiff linear differential equations, considering truncation error estimation and system stability
11 p1675 A72-25272

Receivers for PPM optical communication and pulsed signal detection in background light, evaluating upper bounds on error probability based on photoelectron Poisson statistics
11 p1591 A72-25311

Russian papers on cybernetic systems accuracy and reliability covering error correction schemes, statistical analysis and computer design
11 p1599 A72-25426

Cybernetic equipment reliability and precision analysis from algorithmic, conversion and instrumental errors, surveying digital, analog and hybrid computers and converters
11 p1608 A72-25427

Computer approximate computation of multidimensional normal distribution, examining error measure, random processes and correlation coefficient
11 p1676 A72-25429

Probabilistic analysis of technological systems precision, estimating distribution functions of random output parameters
11 p1609 A72-25430

Servo systems precision analysis with coefficients of output signal error caused by response inertia
11 p1609 A72-25431

Lower bound estimates of error distributions for analog computer solutions of linear algebraic equations
11 p1600 A72-25433

Accuracy and reliability in engineering design of discrete automata without memory /logic circuits/, using Boolean algebra for mathematical models
11 p1600 A72-25434

Error correlation technique to ensure reliability of discrete automatically controlled digital systems inputs, noting lower redundancy requirement
11 p1600 A72-25438

Narrow pulse optical communication digital systems with PPM and on-off keying, investigating timing error effects on bit error probabilities
11 p1592 A72-25885

Deterministic methods to calculate quantization error in digital control system
11 p1610 A72-25976

Weather stations data analysis with unequally spaced observations, considering errors and variance transfer functions
11 p1680 A72-26076

Satellite orbit tracking data accuracy estimation by partial differentiation, using Doppler and interferometer methods
11 p1593 A72-26097

Computer calculation for atmospheric total mass and seasonal redistribution from pressure and temperature field data, discussing error sources
11 p1623 A72-26250

Error analysis of measurement-type servo systems with constant product /or quotient/ of dependent and independent variables applying to phase loop AFC operation
11 p1595 A72-26301

Statistical analysis of errors in altitude readings of phase comparison AM radio altimeters
11 p1633 A72-26303

Statistical error analysis of phase comparison FM radio altimeter during signal processing, investigating range finding strength distribution of echo reflectance
11 p1633 A72-26305

Digital analog converter output voltage variation coefficient derivation, obtaining operational error statistical characteristics estimates and elements parameter
11 p1602 A72-26447

Trajectory correction problem optimal measurement set, showing solution by linear programming simplex algorithm method
11 p1684 A72-26901

Error bounds for finite element methods and approximation with piecewise polynomials for elliptical differential equations solution
11 p1679 A72-26956

Error bounds relationship to norm in approximate numerical solutions of initial value problems for ordinary differential equations
11 p1679 A72-26957

Probability minimization and detection of errors in computerized analysis of civil engineering frameworks, noting graphical output advantages
12 p1786 A72-27190

Equation difference minimization techniques for ordinary nonlinear differential equations approximate periodic solution generation, noting error bounding procedure validity
12 p1836 A72-27240

Test conduct inaccuracies effect estimation for statistical spread of experimental creep rate and long term strength values
12 p1813 A72-27456

Research measurement error determination for two frequency Doppler measurement of artificial satellites
12 p1782 A72-27532

Active notch filter circuits for extending accelerometers frequency response to near resonance, presenting error analysis of mismatching components
12 p1808 A72-27639

Numerical accuracy of electromagnetic field spherical wave expansions, considering horn antenna radiation pattern
12 p1791 A72-27670

Boundary layer analysis of wide capillary tube, deriving approximate error estimates
12 p1798 A72-27714

Radial bearing placed on journal of Cardan suspension, investigating ball dimension errors effect on gyro drift rate
13 p1962 A72-28385

Computer program analysis of errors in mutual orientation elements on aerial photographs with dif-

ferent lengthwise overlaps, discussing error minimization
13 p1955 A72-28497

Antenna synthesis and inverse problems solution by regularization methods, considering radiation patterns and random error effects
13 p1928 A72-28529

Satellite altimetry based on ocean backscattering, analyzing received signal model and altitude errors
13 p1955 A72-28533

Thermodynamic limiting relations between physical measurement accuracy and measurement performance energy dissipation, considering equilibrium and nonequilibrium dynamic models
13 p2003 A72-28761

Error probabilities estimates for communication systems using orthogonal multiposition signals in information transmission, noting techniques applicability to diversity reception systems with self selection
13 p1918 A72-28893

Ultrasonic inspection effectiveness and equipment errors relationship to a priori acceptability of products
13 p1963 A72-28925

Critique of paper on error distributions in air navigation, noting inappropriateness of Gaussian distribution
13 p1996 A72-29015

Analysis of errors generated by Kotelnikov series representation of finite signals during quantization by delta functions, finite duration sampling and constant amplitude sampling
13 p1919 A72-29044

Overestimation in optimization problems calculated by regressive equation, comparing with actual effect in static process
13 p1936 A72-29158

Optimal multistep sampling procedures for production quality control, discussing methods for minimization of error probabilities and total sampling volume
13 p1965 A72-29167

Noise resistance techniques for calculating linear signal interpolation errors in adaptive quantizers
13 p1931 A72-29268

Error analysis of ionospheric parameter measurement by satellite transmitted or reflected multiple frequency pulsed radiation signal, using perturbation method
13 p1920 A72-29276

Digital computer estimates of random processes spectral density by statistical correlation method, calculating errors in numerical integration techniques
13 p1937 A72-29495

VLF long distance radio propagation in earth-ionosphere waveguide, considering earth magnetic field effects in mode conversion and refraction error calculation
13 p1922 A72-29655

Digital FM signal receiver with postdetector integration, determining error probability as function of input SNR and noise stability
14 p2084 A72-30332

Error sources in numerical integration of spacecraft equations of motion in solar and planetary gravitational fields, suggesting methods for improving accuracy
14 p2151 A72-30453

Holomorphic rational functions involving error bounds without derivatives solution by numerical differentiation procedure
14 p2126 A72-30709

Hemoglobin determination in whole blood with Specol-Zeiss spectrophotometry, comparing accuracy to cyanmethemoglobin measurements
14 p2080 A72-30787

Galerkin method for subharmonic solutions of Duffing differential equation, noting error estimation
14 p2126 A72-31102

Temperature measurement error due to solid body and temperature sensor specific heat differences for unsteady heat transfer
14 p2106 A72-31160

Upper boundary layer conditions effects on atmospheric temperature profile reconstruction, by integro-differential equation substitution for Fredholm equation
15 p2265 A72-31399

Error corrections for UV photometric measurements with light filters involving Bouguer formula
15 p2233 A72-31400

Linear control systems optimal synthesis using AI.GOI, program for digital computers minimizing error square integral
15 p2210 A72-31687

Finite element analysis of circular and elliptical plates with curved boundaries, discussing high precision triangular plate bending element modification for accuracy improvement
15 p2326 A72-31715

Mixed triangular finite element model for plate bending problems including shear deformation effects, discussing error analysis and convergence
15 p2326 A72-31716

Orbit determination strategy, detailing optimization criterion correlation with measurement errors
15 p2307 A72-31817

Computerized Monte Carlo techniques for nonlinear error analysis of system behavior, using random number generators for input distribution simulation 15 p2264 A72-32184

Error analysis for digital avionics system involving Doppler navigation by intermittent scanning of single beam multimode radar, noting optimum statistical data processing 15 p2271 A72-32204

Incoherent receiver noise stability in multichannel system with channel frequency separation, deriving formula for receiver error probability 15 p2209 A72-32668

Mean value, repetition and discontinuity errors of spectral-transposition method involving memory storage and compressed signal processing 15 p2212 A72-32703

Photoelectric measurement of solar photosphere pole-equator temperature differences, analyzing statistical and systematic errors [AD-745809] 15 p2317 A72-32770

Shift register implemented binary transversal filter type digital pulse waveform generators truncation and approximation error spectrum analysis via inverse Fourier transform 16 p2362 A72-32854

Geomagnetic and meteorological elements lunar daily variation calculation by modified Chapman-Miller method, estimating confidence limits for parameters reliability 16 p2384 A72-32972

Angular measurement error for group and repetition techniques as function of observation time, deriving formulas for comparison in terms of economy and efficiency 16 p2389 A72-33030

Carrier synchronization and polyphase signal detection in digital communication network for high speed data transmission, deriving reconstructed noisy signal error probability 16 p2363 A72-33218

Error probability distribution of digital data magnetic recording in computer drum memory 16 p2367 A72-33262

Critique on experiment to measure gravitational constant differences between two elements, discussing errors in statistical analysis 16 p2426 A72-33769

Error analysis of East European triangulation network photographic observations of Echo and Pageos satellites from ground stations 16 p2387 A72-33798

Nomographic correction method for quantization error limited data systems, modifying root-summed-squared error analysis for non-Gaussian distribution 16 p2367 A72-33863

Fixed point computer mean square errors in multiplication as function of number of digital order 16 p2367 A72-33959

Error analysis of dynamic yield point measurements based on residual deformation from impact tests of Al alloy and steel specimens 16 p2472 A72-34016

Error probabilities in digital communication systems subject to mixture of man made or natural impulsive and Gaussian noise 16 p2365 A72-34106

Recursive filtering techniques in space navigation, describing initialization procedure to account for state vector errors correlation 17 p2532 A72-34214

The approximate solution of parabolic initial boundary value problems by weighted least-squares methods. 17 p2573 A72-34217

Statistical analysis of position-fixing general theory for systems with Gaussian errors. 17 p2578 A72-34294

Instrument for Hall and Gauss effects measurement in semiconductors and metals, noting instrument error analysis 17 p2529 A72-34758

An algorithm in arithmetic with a floating point to increase the accuracy of a sum 17 p2575 A72-34906

Gradient methods of parameter estimation during the mathematical treatment of measurements 17 p2522 A72-35038

The fitting, calibration, and validation of simulation models. 17 p2523 A72-35226

Smooth empirical Bayes estimation of observation error variances in linear systems. 17 p2576 A72-35248

Dynamic system observation accuracy in spacecraft trajectory measurement, deriving processing algorithm based on state-estimate error correlation matrix analysis with maximum likelihood procedure 17 p2610 A72-35263

Polynomial class random process realization based on statistical methods of processing spacecraft orbital measurement data, considering random and systematic errors 17 p2576 A72-35266

Methodical errors in spacecraft local vertical determination due to variability of physical effects, considering planet oblateness, atmospheric refraction, incident radiation fluctuations, etc 17 p2610 A72-35267

Correlation functions and reconstruction error for quantized Gaussian signals transmitted over discrete memoryless channels. 17 p2516 A72-35333

Error rate of phase-shift keying in the presence of discrete multipath interference. 17 p2516 A72-35334

Russian book on pyrometry principles covering high temperature measurement, error analysis, heat transfer and brightness temperature 17 p2556 A72-35447

Disturbing gravity potential and vertical deflection calculation error reduction based on pure gravity anomalies in geodesy 17 p2550 A72-35744

Low order model and error rates for two dimensional turbulent motion prediction in atmosphere spectrum 18 p2677 A72-36009

State feedback control law for linear multipoint multioutput time-invariant dynamic system under disturbance to obtain output with zero steady state error 18 p2672 A72-36054

Functional relationships between the conventional steady-state error characteristics and the weighting matrices in the quadratic performance index. 18 p2672 A72-36058

Two sided error estimates for electrodynamic impedance, admittance and scattering matrices in diffraction theory 18 p2657 A72-36104

Octal Reed-Solomon code to obtain decoding error probability approximation improvement over minimum distance bound 18 p2658 A72-36266

Finite word length effects on digital filter implementation. 18 p2663 A72-36303

Error investigation for the location of the sources of atmospheric by radio direction finding. 18 p2706 A72-36429

A basic theorem in the computation of ellipsoidal error bounds. 18 p2705 A72-36602

Error bounds for the Galerkin method applied to singular and nonsingular boundary value problems. 18 p2705 A72-36604

Spatial variations in atmospheric predictability. 18 p2706 A72-36627

Theory of optimum M-ary laser detection. 18 p2661 A72-36683

Calculation of coefficients and error estimation for the interpolation quadrature formulas of simplest Cauchy-type integrals and singular open-contour integrals 18 p2705 A72-36808

Optimal control laws for stochastic problems involving intentional errors, caution and probing 18 p2674 A72-36825

Error arising from experimenter influence on subject behavior and performance, discussing expectancy effects on stimulus presentation and IQ and success-failure judgments 18 p2653 A72-36907

Elastically supported dry two degrees of freedom tuned gyroscopes, analyzing open-loop transfer function for characteristic errors 19 p2794 A72-37280

Errors due to gimbaling system asymmetries and rotor angular offsets effects in multigimbal elastically supported tuned gyroscope, deriving gyro translational transfer function 19 p2794 A72-37281

A method for generalized statistical studies of discrete information transmission systems 19 p2764 A72-37301

Error of the statistical method for determining the dependence of the combustion characteristics of particles upon particle size 19 p2879 A72-37363

A posteriori error bounds for approximate solutions of linear second-order ordinary differential equations. 19 p2824 A72-37372

Numerical methods of solving weather forecasting problems 19 p2828 A72-37386

Error reduction in digitally generated holographic memories via parity sequence interlacing with true data sequence for spectrum shaping 19 p2796 A72-37581

Large object holographic image accuracy tests determining experimental sources of error 19 p2797 A72-37589

Accuracy of outer-planet ephemerides. 19 p2857 A72-37683

Gage-length errors in the resolution of dispersive stress waves. 19 p2800 A72-37729

Evaluation of the coefficients of influence of initial-information and model errors on optimization results 19 p2779 A72-37996

Stationary Kalman-Bucy filter synthesis from filter coefficients and correlation matrix of filtration errors, discussing random process estimation application 19 p2782 A72-38517

Differentially coherent detection scheme with error-correcting capability by means of decision patterns. 19 p2766 A72-38605

An approximate method for inverse Laplace transformation 19 p2828 A72-38853

Cup anemometer response to fluctuating wind speeds. 20 p2920 A72-38966

Interference performance degradation to digital systems. 20 p2901 A72-38984

Double-ended, folded-path and double-reflecting transmissometers operation principles, and measurement error sources consideration for relative merits and disadvantages 20 p2923 A72-39054

Critical frequency computation for partially filled elliptical waveguide with dielectric rod 20 p2902 A72-39058

Error analyses of Euler angle transformations arising in design of precision pointing systems, guidance sensors and instruments with gimbals [AIAA PAPER 72-851] 20 p2949 A72-39078

Error analysis of hybrid aircraft inertial navigation systems. [AIAA PAPER 72-848] 20 p2950 A72-39081

A versatile Kalman technique for aircraft or missile state estimation and error analysis using radar tracking data. [AIAA PAPER 72-838] 20 p2950 A72-39089

Enlarging the region of convergence of Kalman filters that encounter nonlinear elongation of measured range. [AIAA PAPER 72-879] 20 p2907 A72-39121

The observability of unforced physical systems by linear non-sequential estimators in the validation of linear error analysis. [AIAA PAPER 72-876] 20 p2910 A72-39123

Marcum Q function parameters approximations for error probabilities computation in multilevel frequency shift keying and differentially coherent phase shift keying systems 20 p2903 A72-39426

Richardson and effective work functions measurements for thermionic emission from alkali and extended red-sensitive trialkali photocathodes, discussing error minimization 20 p2890 A72-39646

Effects of finite register length in digital filtering and the fast Fourier transform. 20 p2904 A72-39780

Effects of errors in the direction of incidence on the performance of an adaptive array. 20 p2904 A72-39786

Microelectronic component reliability prediction technique with near Wiebull method accuracy in absence of detailed sampling life test results 20 p2930 A72-39857

Errors in static pressure measurements due to protruding pressure taps. 21 p3050 A72-40117

Radiometry error analysis for diffraction at radiation beam limiting screens, calculating corrections for circular source and detector 21 p3050 A72-40149

Assessment of the errors of a version of the hybrid quasi-analog system due to errors in quantization in time in the solution of systems of ordinary differential equations 21 p3024 A72-40158

Dynamic error of storing voltages at capacitors in the storage channel of an integrator of variable structure 21 p3024 A72-40165

Quantization error of the coefficients in digital filters with N shift sequences 21 p3025 A72-40223

Measurement and transformation of two-port S parameters in terms of three-port parameters for a more general characterization of transistors - Errors. 21 p3025 A72-40224

Application of the transmission-line-matrix method to homogeneous waveguides of arbitrary cross-section. 21 p3032 A72-40629

The behaviour of the solutions of the equations of motion of a mechanical system, with a parameter occurring as a coefficient of each derivative. 21 p3084 A72-40812

Diffraction of plane waves by a strip - Exact and asymptotic solutions. 21 p3016 A72-40839

Error probability for multilevel PAM transmission with intersymbol interference, Gaussian and impulsive noise. 21 p3019 A72-40888

ERROR BAND

Statistical analysis of influence coefficients and unbalance forces measurement errors in balancing of rotors 21 p2996 A72-41229

Gaussian elimination with floating point arithmetic, discussing algorithm for least squares scaling of matrices with less error than row and column norms equilibration 21 p3076 A72-41317

Regularized linear problem with perturbed equation as solution, presenting error overestimate 21 p3076 A72-41336

Reissner nonlinear equations for stability analysis of shallow shells of revolution, noting critical loads range and error analysis 22 p3232 A72-41856

Influence of dispersion on the accuracy of estimating the fatigue life from the results of accelerated investigations by the prefracture method. 22 p3232 A72-41928

Binary symmetric channel error effects on PCM color image transmission. 22 p3153 A72-41977

Error incidence probability for system control reliability determination, assuming Markov process 22 p3162 A72-42183

Radiogoniometer error analysis for receiver internal noise and external interference sources, noting sources angular distribution effect on instrument error 22 p3158 A72-42233

Evaluation of flight instrumentation for the identification of stability and control derivatives. [AIAA PAPER 72-963] 22 p3136 A72-42346

Error sensitivity of statistical models with pattern rearrangement for analysis of interplanetary scintillation in ecliptic plane 22 p3218 A72-42402

Prediction error growth computation by test-field model for inertial range atmospheric turbulent flows in three and two dimensions 22 p3167 A72-42501

Adjustment of the wind field to geopotential data in a primitive equations model. 22 p3200 A72-42502

Improved Curtis-Godson approximation in a non-homogeneous atmosphere. 22 p3201 A72-42511

Some effects of cognitive similarity on proactive and retroactive interference in short-term memory. 22 p3142 A72-42548

Error analysis of astronomical-geodetic network compensation methods, noting distortions minimization in polygon nodes by large blocks compensation with computers aid 22 p3173 A72-42721

An approximation to midcourse correction direction errors. 22 p3203 A72-42870

On the drift velocity of electrons in a gas. 22 p3212 A72-42996

The efficiency of the method of the least squares for adjusting observations with non-normal distributions 22 p3199 A72-42998

German monograph - Internal-analytic methods in systems of linear equations with interval coefficients and relations to error analysis. 22 p3200 A72-43061

The effect of geometry on area navigation system errors. 22 p3203 A72-43132

Optimal random disturbance intensity control of dynamic systems, minimizing error with respect to observed and controlled plant coordinates 23 p3274 A72-43221

Ballistic deviations of a gyroscopic navigation system 23 p3311 A72-43417

Spin stabilized ballistic air-to-ground or ground-to-ground rocket, discussing dynamic stability-impact error relationship [SAWE PAPER 928] 23 p3342 A72-43468

Rotating aerospace vehicles dynamic balance error terms due to despun masses misalignment and aerodynamic effects [SAWE PAPER 930] 23 p3342 A72-43470

Stochastic models for block triangulation by bundle approach, comparing theoretical accuracies obtained from different block adjustment methods 23 p3284 A72-43631

Error analysis of linear and nonlinear elements in hydraulic control circuits of flight vehicles, calculating accuracy of frequency response determination 23 p3252 A72-43671

Pointwise displacement errors in linear shell theory resulting from errors in the stress-strain relations. 23 p3347 A72-43720

Effect of fluorescence observation geometry on lifetime measurement, including the development of an approximation to the detector collection efficiency integral. 23 p3288 A72-43884

Study of target edge response viewed through atmospheric turbulence over water. 23 p3289 A72-43896

Potsdam correction from the satellite determined geopotential. 23 p3285 A72-43944

Approximate harmonic linearization method of stability analysis of nonlinear periodic systems, identifying fictitious oscillations due to computation errors 23 p3277 A72-44007

Absolute accuracy of the pulse-echo overlap method and the pulse-superposition method for ultrasonic velocity. 23 p3313 A72-44114

Forward-error correction with decision feedback. 23 p3268 A72-44175

Reciprocal mean-square error and signal-to-noise ratio as distinct performance measures in below-threshold communication. 23 p3265 A72-44177

Performance characterization for L-orthogonal signal transmission and detection, discussing tradeoffs between error probability, SNR and bandwidth by numerical evaluation 23 p3265 A72-44180

Problem of error estimation during solution of internal boundary value problems in microwave electrodynamics 23 p3265 A72-44201

Coronal lines photometry systematic error dependence on aureola spectral intensity, line half width, gradation curve slope, and neutral filter transmission coefficient 23 p3340 A72-44240

Fundamentals of multivariate analysis - Linear regression. 23 p3310 A72-44394

Behavior of the spatial distribution function of shower particles near the axis of a cascade shower 23 p3331 A72-44432

Radiation influences on a white-coated thermistor temperature sensor in a radiosonde. 24 p3401 A72-44620

The application of error control techniques in the design of an advanced augmented inertial surveying system. 24 p3421 A72-44641

Pressure and magnetic field probe measurements in transverse shock waves in ionizing hydromagnetic regimes, investigating bow shock effects on accuracy 24 p3390 A72-44708

Observation error in time determination of solar limb contact with optical instrument hair, noting effect on accuracy of time and longitude measurement 24 p3438 A72-44859

Human observation error effect on astronomical refraction calculation from time determination of solar limbs passages across optical instrument reticle 24 p3438 A72-44863

On an augmentation of the error made by numerical treatment of second-order conservative point transformations 24 p3419 A72-45071

The estimation of accuracy of short-term atmosphere density prediction. 24 p3398 A72-45173

Analysing vibration and shock data. I - Data acquisition and pre-processing. 24 p3382 A72-45287

High order explicit Runge-Kutta methods construction conditions, discussing error bounds and expansions 24 p3419 A72-45299

A general theory of convergence for numerical methods. 24 p3419 A72-45300

Optimal linear inertia-free processing of meter readouts with allowance for control-equipment signals 24 p3403 A72-45316

Pulse transient response function for gyroscopic course indicator with gyrocompass error filtered out and nondistorted directional gyroscope error 24 p3403 A72-45320

Accuracy of the determination of the zero points of a fundamental catalog from observations of major and minor planets 24 p3447 A72-45676

ERROR BAND

U ACCURACY

ERROR CORRECTING DEVICES

Reliable data transmission block coding techniques including burst error, fire, Reed-Solomon and product codes and majority decoding algorithm 01 p0025 A72-10335

Optimal burst correcting codes for bursty channels, comparing with automatic repeat-request 01 p0025 A72-10337

Forward error correction code performance on hf troposcatter and satellite channels, considering adaptive and nonadaptive convolutional and cyclic coding 01 p0026 A72-10338

Nonsystematic quick-look-in convolutional codes for sequential decoding in deep space channels 01 p0026 A72-10339

Digital computer program high speed algorithm for high resolution images geometric correction,

discussing application to ERTS return beam vidicon images 01 p0065 A72-10454

Inspiration time correction factor for pulmonary diffusing capacity measurement by single breath method 01 p0015 A72-11259

Separate and nonseparate arithmetic error detecting and correcting codes for digital computer design, considering cost and effectiveness tradeoffs 02 p0184 A72-11483

Distributed fault-tolerant aerospace digital computer design with duplicated central multiprocessor, triplicated memory and conventional redundancy local processors for error detection and correction 02 p0185 A72-11489

Kinetic energy correction in capillary viscometry, observing pressure drops and mass flow rates 02 p0202 A72-11724

ERTS-A satellite geometric and radiometric received image errors, presenting detection and correction with digital algorithms 02 p0171 A72-11847

One-way error correcting system with 1/3 rate interleaved block code, testing code performance over 1300 km vhf ionosscatter path and 1500 km hf path 02 p0175 A72-12153

Thermal zero signal instabilities and error reduction in devices using reluctance sensors 02 p0231 A72-12562

Gyro drift random error dispersion reduction in compensated closed loop multirotor gyroscopic systems by cross couplings 02 p0231 A72-12566

Correction factors for Aerodynamic Research Institute Goettingen transonic wind tunnel, comparing calculated values with AGARD calibration models test results [DFVLR-SONDDR-167] 03 p0308 A72-13610

Heat transfer coefficients to both sides of finite one dimensional slab subject to phase-change coating technique boundary conditions, deriving thin wing correction factors 03 p0457 A72-13956

Precession from proper motions of stars with respect to galaxies, discussing correction for systematic errors 04 p0575 A72-15027

Divergence prevention in decision directed adaptive recursive estimators in relation to error covariance 06 p0792 A72-17307

Spherical reflector antenna phase aberration correction by planar array feeds, discussing synthesis procedure for mean square error minimization 06 p0781 A72-17344

FSK transmission experiments on uhf satellite link, noting threshold convolutional decoding contribution to SNR 06 p0773 A72-17599

Gravity data free air and Bouguer correction/elevation correction/ by nomographic alignment chart 06 p0809 A72-18148

Aircraft turboalternator governing theory for frequency error detection, comparing performance of mechanical- and electro-hydraulic governors 06 p0868 A72-18249

Measuring device for holographic virtual image reconstruction deformations due to relative orientation errors between reference beam and holographic plate 06 p0818 A72-18329

Weighted acoustic surface wave dispersive microwave filter apodized interdigital array design modification for phase error correction to reduce distortion 06 p0787 A72-18380

Source permutation code optimum encoding for long block length, comparing performance with rate distortion function bound and various quantization schemes 06 p0776 A72-18391

Rate 1/n binary convolutional code free distance upper bound derivation and largest input sequence determination for equal weight 06 p0776 A72-18392

Variable length codes using Fano metric for minimum error probability sequential decoding 06 p0776 A72-18393

TDMA satellite communication system with convolutional encoding and Viterbi decoding, evaluating data buffering and control configurations 07 p0941 A72-19297

Error correcting data decoder assembly for mission independent sequential decoding at all stations in deep space tracking network, discussing design and performance 07 p0949 A72-19298

Concatenated coded command system for low error probabilities at moderate SNR, emphasizing spaceborne portions implementation 07 p0949 A72-19299

Truncation error correction based on Richardson extrapolation in finite difference approximation of nonlinear partial differential operators 07 p1101 A72-20328

Error coding techniques application to communication satellite links, discussing computer simulation results

07 p0948 A72-20495

Error correction in adders with systematic subcodes, preserving AN binary code error control properties

08 p1138 A72-21551

Systematic errors in scan-and-measure devices for tracking cameras photographs analysis, discussing correction during measurements

08 p1209 A72-21913

Paired Gill propeller anemometer response function in generalized wind vector sensor application, proposing algorithm for magnitude and direction errors reduction in output analyses

09 p1307 A72-22434

Interplanetary spacecraft midcourse guidance stochastic control, deriving algorithm for computing optimum velocity correction and execution time with allowance for correction-dependent errors

10 p1508 A72-23778

Random access memory with single error correction circuitry, predicting failure, card and module removal rates by computer simulation

10 p1443 A72-23980

Two-laser optical distance measuring instrument with atmospheric refractivity correction, noting accuracy

11 p1646 A72-25305

Correction to nonlinear refractivity calculation for cubic lattice crystal with allowance for higher induced multipoles

12 p1855 A72-27620

Secondary standard solar cells calibration method based on solar spectral response comparison with primary standard, discussing error correction method

12 p1759 A72-28043

Optimal quantization parameters for pseudonoise signals at radio receiver output, estimating static error in correlation function measurement

13 p1919 A72-29048

Self adaptive two channel iteration servosystems for input reconstruction by successive approximations, determining signal and noise error operators

13 p1936 A72-29155

Cascade section parameters calculation for multisection amplifiers with composite transistors and correction elements

13 p1934 A72-29978

Analog to digital converter for sinusoidal voltage amplitude pickup and subsequent digital coding with correction for conversion characteristic nonlinearity

13 p1934 A72-30020

Correcting electronic transducer for rapidly changing temperature measurement, discussing design peculiarities for superior metrological characteristics

13 p1961 A72-30024

Probability functional formulas for quasi-determinate signal on unsteady normal noise background for use in false alarm and correct detection

15 p2195 A72-31664

Pulsed solid state lasers with large area Si photodiode for output measurement in feedback control system to compensate flash lamp aging

15 p2247 A72-32027

High speed and resolution laser scanning by optomechanical methods, discussing theoretical bandwidth, resolution limits, position error correction measures and performance optimization

15 p2248 A72-32037

Two dimensional acousto-optical light beam deflection system for laser recorder error correction

15 p2248 A72-32038

Single closed loop discontinuous control system, determining discrete correcting element parameters from linear inequalities

15 p2212 A72-32175

Transfer function estimates in random vibration test control, using digital techniques for rapid reduction of statistical errors

15 p2215 A72-32626

Stress-strain curve correction for triaxial stress state and strain rate at arbitrary temperatures, describing instrument for continuous test specimen profile measurement

16 p2469 A72-33232

Random multiple access data transmission systems with feedback for message confirmation and retransmission in event of errors, evaluating channel capacity

16 p2372 A72-33794

Nomographic correction method for quantization error limited data systems, modifying root-sum-squared error analysis for non-Gaussian distribution

16 p2367 A72-33863

Meridian direction determination with angular accelerometer, noting reduction in effects of component imperfections on accuracy

16 p2421 A72-33962

A suboptimal error reduction scheme for a long-term self-contained inertial navigation system

17 p2578 A72-35560

Dynamic errors of a metering system with successive correction of the sensor's time constant for certain types of aperiodic input

17 p2557 A72-35787

Refraction correction of rocket tracking radar inputs in near real time

18 p2661 A72-36636

Error correction in redundant logic circuits without application of majority elements

19 p2769 A72-37758

Differentially coherent detection scheme with error-correcting capability by means of decision patterns

19 p2766 A72-38605

Effectiveness of error-correcting codes during reception on the whole in the presence of additive normal white noise

21 p3014 A72-40310

Correcting effects of corrugated boundaries on coaxial radiators asymmetry and sidelobes, investigating waveguide hybrid modes induced transverse fields

21 p3029 A72-40516

Error correcting codes applied to satellite channels

21 p3018 A72-40874

Correction of diffraction errors in acoustic-surface-wave pulse-compression filters

21 p3034 A72-41464

Q-ary output data transmission channel with burst errors, discussing burst-b distance measure and binary block code decoding algorithm for error correction

22 p3153 A72-41979

Code correcting asymmetric-error bursts during information exchange between computers

22 p3156 A72-42189

Mathematical model for lattice-type error distribution of parallel channels communication system, noting metric for algebraic signal coding method

22 p3154 A72-42234

An attitude reference system with discrete-correction capability

22 p3203 A72-42864

Automatic transmission and application of sky wave corrections with differential OMEGA navigation, discussing test equipment, procedures and results

22 p3203 A72-42948

Closed loop pulsed automatic control system, determining discrete correcting element parameters from linear equalities

22 p3163 A72-43009

Forward-error correction with decision feedback

23 p3268 A72-44175

A method for synthesizing feasible correcting devices with a minimum number of constraints on the optimized transient pulse response function

24 p3386 A72-45318

Application of external information about the linear velocity of an object for correcting inertial navigation systems

24 p3423 A72-45319

Semaphore channel signaling reliability, presenting error protection and correction system

24 p3381 A72-45770

ERROR DETECTION CODES

Reliable data transmission block coding techniques including burst error, fire, Reed-Solomon and product codes and majority decoding algorithm

01 p0025 A72-10335

Convolutional coding and decoding techniques in communication systems, discussing distance properties, optimal decoder in memoryless channel, error probabilities and bit synchronization

01 p0025 A72-10336

Optimal burst correcting codes for bursty channels; comparing with automatic repeat-request

01 p0025 A72-10337

Forward error correction code performance on hf troposcatter and satellite channels, considering adaptive and nonadaptive convolutional and cyclic coding

01 p0026 A72-10338

Nonsystematic quick-look-in convolutional codes for sequential decoding in deep space channels

01 p0026 A72-10339

Optimal metric programmable high speed sequential decoder for convolutional code deep space channels

01 p0026 A72-10340

High speed decision sequential decoder design and tests for digital errors, white noise and real channels

01 p0026 A72-10341

Convolutional coding, Viterbi decoding and binary phase shift keyed modulation for reliable communication on power limited satellite and space channels

01 p0026 A72-10342

Orthogonal convolutional coding with on-off signaling and Viterbi decoding for synchronous multiple access communication with bound bit error rate

01 p0026 A72-10343

Error correction techniques of convolutional coding with Viterbi maximum likelihood decoding for communications systems design, using computer simulation

01 p0026 A72-10344

Time division multiple access systems transmitting and receiving end synchronization control criteria derivation, discussing code pattern selection for reliable detection

01 p0033 A72-11304

Fail-safe sequential machines realization using k-out-of-n code for state assignment and onset and off-set methods for excitation circuit construction

02 p0184 A72-11477

Separate and nonseparate arithmetic error detecting and correcting codes for digital computer design, considering cost and effectiveness tradeoffs

02 p0184 A72-11483

One-way error correcting system with 1/3 rate interleaved block code, testing code performance over 1300 km vhf ionoscatter path and 1500 km hf path

02 p0175 A72-12153

Source permutation code optimum encoding for long block length, comparing performance with rate distortion function bound and various quantization schemes

06 p0776 A72-18391

Rate 1/n binary convolutional code free distance upper bound derivation and largest input sequence determination for equal weight

06 p0776 A72-18392

Variable length codes using Fano metric for minimum error probability sequential decoding

06 p0776 A72-18393

TDMA satellite communication system with convolutional encoding and Viterbi decoding, evaluating data buffering and control configurations

07 p0941 A72-19297

Concatenated coded command system for low error probabilities at moderate SNR, emphasizing spaceborne portions implementation

07 p0949 A72-19299

Error coding techniques application to communication satellite links, discussing computer simulation results

07 p0948 A72-20495

Sequential testing of actual and calculated error covariances consistency in recursive nonlinear estimators, noting method application to linear filters

08 p1197 A72-20857

Error correction in adders with systematic subcodes, preserving AN binary code error control properties

08 p1138 A72-21551

Optimal answer-back communications systems using feedback channel for error checking

09 p1277 A72-22568

Noise threshold improvement of PCM signals for satellite transmission, using quality detector and error detecting codes

10 p1441 A72-23102

Probability minimization and detection of errors in computerized analysis of civil engineering frameworks, noting graphical output advantages

12 p1786 A72-27190

Communication systems design with error control, applying algebraic codes to biphase and multiphase modulation systems

12 p1782 A72-27488

Q-ary output data transmission channel with burst errors, discussing burst-b distance measure and binary block code decoding algorithm for error correction

22 p3153 A72-41979

Code correcting asymmetric-error bursts during information exchange between computers

22 p3156 A72-42189

Mathematical model for lattice-type error distribution of parallel channels communication system, noting metric for algebraic signal coding method

22 p3154 A72-42234

Forward-error correction with decision feedback

23 p3268 A72-44175

ERROR FUNCTIONS

Computerized error function method of wreckage trajectory analysis in aircraft accident investigation, using fundamental equations of motion

03 p0309 A72-13250

Discrete time systems unknown parameter identification, considering unified error function minimization approach

04 p0506 A72-15106

Error covariance matrix evaluation at end of orbit extrapolation in terms of state vectors at measurement, discussing computation and interpretation

05 p0720 A72-16753

Ordinary differential equations convergent solutions growth estimates, computing error function asymptotic growth rate

05 p0683 A72-17000

German monograph on models for automatic radar tracking methods covering error probabilities, reliability and false information reception

09 p1348 A72-22321

Error probability estimates in two channel diversity reception systems with allowance for fading correlation and incomplete signal separation

09 p1278 A72-22572

Electronic filters realization by error function minimization, discussing parameter space algorithmic search and complex plane optimization methods

11 p1606 A72-26550

Algorithm for meteor velocity calculation from radio observation data, noting symmetrical error distribution function of velocities

13 p1924 A72-29014

Table of indefinite and definite integrals of products of error functions with transcendental and special functions

15 p2262 A72-31589

Optimal segment boundaries with composite error function in piecewise approximation chosen by dynamic program in scalar state variable, noting uniqueness properties

15 p2262 A72-31634

A bivariate normal theory maximum-likelihood technique when certain variances are known.

21 p3075 A72-40826

Error probability estimates in two channel diversity reception systems of digital data transmission with allowance for fading correlation and incomplete signal separation

24 p3379 A72-44751

Parametric optimization of the equivalent transfer function of a system with the aid of the error integral

24 p3387 A72-45700

ERROR SIGNALS

Model reference adaptive control system synthesis in presence of random perturbations, considering error signal derivative use to form parameter adjustment algorithm

05 p0640 A72-16208

Average time between successive false target indications in surveillance binary signal detector with variable storage capacity

11 p1595 A72-26295

Saturating nonlinear feedback systems stability under bounded input excitation, discussing error signals magnitude and duration

15 p2212 A72-32246

Frequency stabilization of pure neon laser.

23 p3296 A72-43951

ERTS

U EARTH RESOURCES TECHNOLOGY SATELLITES

ERYTHROCYTES

NT RETICULOCYTES

Hypophysectomy in rats, resulting in prolonged red blood cell survival due to oxygen consumption decrease and altered erythrocyte enzymatic processes

01 p0010 A72-10075

Anaerobic glycolysis and specific gravity of red blood cells in rats exposed to pure oxygen at 600 torr

01 p0015 A72-11297

Normal and germ free rat antibody response to sheep erythrocyte inoculation in He-O atmosphere, analyzing microagglutinin and hemolysis titres

[AD-736324] 04 p0471 A72-14861

Prolonged muscular work effects on erythrocyte 2,3-DPG generation relation to oxyhemoglobin affinity

04 p0472 A72-14898

Holographic measurement of red blood cell rotation in orifice flow, transforming orientation into form distribution data

04 p0479 A72-15140

Physiological effects of transfusing 2,3-diphosphoglycerate (DPG)/depleted red cells with high oxygen affinity in anemic hypoxic patients

04 p0473 A72-15211

Active Na-K transport and passive permeability temperature adaptation in ground squirrel erythrocytes

04 p0475 A72-15546

Sublethal X radiation effects on rat erythropoietic system during altitude hypoxia acclimatization

04 p0476 A72-15721

Light scattering time dependence, erythrocyte aggregation rates and hydrodynamic characteristics in ox. pig and horse blood stream

05 p0621 A72-16230

Human urine regenerated water in various dilutions effect on fish and rat erythropoiesis

05 p0622 A72-16651

Erythrocytes catalase activity and number content relationship in human and albino rats blood, discussing compensatory effects

06 p0764 A72-18060

Hyperoxia effect on kidney blood flow erythropoietic properties in rabbits, noting inhibiting effect on erythroblast cells mitotic activity in bone marrow culture

06 p0765 A72-18061

Plasma erythropoietin concentration in men and mice during altitude acclimatization

07 p0917 A72-19440

Microcirculation study of intravascular erythrocyte aggregation/blood sludge/ in rats

07 p0920 A72-19686

Chinchilla and guinea pig tolerances to hypoxia and hyperoxia in pressure chamber tests, suggesting relation to red blood cell size and number

09 p1265 A72-22647

Erythrocyte hemolysate cataphoresis studies of human hemoglobin changes during stepwise adaptation to high mountain conditions

09 p1266 A72-22880

Picoscale blood diagnostic device for red and white cell count, noting piston principle electronic operation

09 p1272 A72-23257

Erythrocyte life span in mice under normal atmospheric pressure and various degrees of hypoxia acclimatization, using radioactive labeled diisopropyl phosphorofluoridate

11 p1579 A72-26608

Red cell mass plasma volume decrease in Apollo mission crews, indicating erythropoiesis inhibition

12 p1765 A72-28266

Suppression effects of hyperoxic breathing gases on red blood cell and erythropoietin hormone production following blood loss

12 p1766 A72-28298

Supercellular regulators of triggering mechanism of regenerative reaction in sternum erythropoietic bone marrow tissue

13 p1901 A72-28636

Red blood cell reserve mobilization in healthy and chronically irradiated dogs after treadmill exercise

14 p2074 A72-30379

Stepwise altitude acclimatization and subsequent reanimation after blood loss caused clinical death effects on dog peripheral blood erythrocytes, reticulocytes, hemoglobin and hematocrit

14 p2076 A72-30671

Whole blood flow dependence on optical density from light transmission measurement, showing photometric effects of red cell aggregation, deformation and orientation

15 p2185 A72-31639

Light transmission measurements of blood flow to quantify red cell aggregation and dispersion

15 p2185 A72-31640

Red blood cell metabolite 1,3 diphosphoglycerate determination method by rapid deproteinization, concentration by precipitation and enzymatic reaction

15 p2190 A72-32488

Exchange diffusion process contribution to human red blood cell transmembrane cation movement from sodium tracer influx studies

15 p2187 A72-32746

Astronauts red cell mass changes associated with space flight due to space and earth environment differences

16 p2356 A72-33564

Effects of in vivo inhalation of 100% oxygen at reduced pressure on serum and red cell lipids.

[AD-746090] 17 p2508 A72-34553

The effect of chronic erythrocytic polycythemia and high altitude upon plasma and blood volumes.

19 p2757 A72-38028

motion.

20 p2891 A72-38935

Nervous and humoral stimulation and hypoxia effects on erythropoiesis control, studying human blood serum additions to bone marrow cultures

21 p3001 A72-40762

Experimental studies of the production of erythropoietin in relation to the intensity and duration of hypoxia

21 p3002 A72-41189

Studies of renal and extrarenal production of erythropoietin in male and female rats

21 p3002 A72-41190

Influence of intracellular convection on the oxygen release by human erythrocytes.

21 p3003 A72-41625

Control of the circulating blood mass in the case of a functional detachment of various amounts of pulmonary tissue

21 p3012 A72-41825

Modulating effect of limbic brain formations on the blood system

22 p3142 A72-42282

ESAKI DIODES

U TUNNEL DIODES

ESCAPE

Galactic tidal field and multiple encounters role in stellar escape from star clusters, noting escape rates and kinetic energy involved

12 p1873 A72-27898

ESCAPE CAPSULES

Preventive and remedial space flight safety engineering, discussing escape capsules and onboard and earth-launched rescue systems

17 p2620 A72-34427

Spacecrews rescue requirements, considering escape capsules earth-based and orbit-based rescue systems and flight hazards

17 p2620 A72-34438

Development of an inflatable fabric structure for the early stabilization of the B-1 crew escape capsule.

[AIAA PAPER 72-801] 20 p2888 A72-40053

ESCAPE SYSTEMS

Parachute designs and applications to escape systems, paratrooping, supply dropping, aircraft braking, weapons systems stabilization, flight testing aids and sport

01 p0003 A72-10302

Dynamic response index /DRI/ minimization for personnel aircraft emergency catapult escape systems to reduce injury probability

08 p1112 A72-21576

Emergency systems for helicopter crew and passenger survivability improvement, discussing use of ejection seats, extraction systems parachute bail-out and shaped explosive charges

08 p1109 A72-21581

Emergency Life Saving Instant Exit system in aircraft fuselage for use after crash landing, discussing design and ground testing

08 p1109 A72-21583

Manned space flight escape, rescue and survival systems based on onboard, prepositioned aid and earth launched concepts, considering earth orbit, lunar and interplanetary missions

09 p1395 A72-23152

Escape systems evolution for manned space flight, considering X-15, Mercury, Gemini and Apollo programs and future space stations and planetary missions

09 p1395 A72-23153

Lunar landing mission escape and rescue concepts, considering emergencies during earth orbit, translunar, lunar orbit, surface and rendezvous, transearth and earth reentry phases

09 p1396 A72-23157

Chemically strengthened glass for eject-through frangible canopy design in aircraft emergency escape systems, noting protection against ejection injuries

12 p1813 A72-27016

Emergency escape from high performance military aircraft in flight and on ground, using explosive cord for transparent canopy material breakup

12 p1753 A72-27017

Lockheed ADP SR-1 ejection seat system for safe aircrew recovery under zero-zero, high Mach and altitude conditions, describing escape experiences with SR-71 aircraft

13 p1896 A72-28701

Aircraft emergency evacuation systems, discussing door designs, inflatable escape slide and slide/lifeboat combination

22 p3138 A72-42520

Design features of Soyuz life support and launch escape systems and Vostok rocket booster stage

23 p3343 A72-44335

Spacecraft rescue/recovery capabilities, discussing in-flight escape, ground egress and descent systems, performance and technical and human factors

24 p3450 A72-45147

ESCAPE VELOCITY

Particle escape within Newtonian gravitational system of three point masses, discussing necessary conditions

01 p0122 A72-10007

Optimal control algorithm for spacecraft descent in atmosphere at speed near escape velocity, using game theory

01 p0135 A72-10298

Fragment velocity for bursting gas containers in vacuum

02 p0295 A72-12473

Analytic solution for optimal control circular orbit escape with constant thrust rocket, using Euler-Lagrange equations and perturbation technique

03 p0437 A72-13839

Jeans escape rate prediction validity for hydrogen atoms in upper atmosphere and error sources in physical models

08 p1159 A72-21401

Electrostatic ion thruster ESKA 28 for interplanetary missions, calculating earth escape and optimal transfer orbits

11 p1707 A72-26177

Spacecraft motion control algorithm for reentry at escape velocity based on object motion model

11 p1684 A72-26900

Nuclear electric propulsion systems performance evaluation for various escape missions

17 p2606 A72-34577

Analysis of the possibility of planetary escape by means of the solar sail

22 p3230 A72-43072

Relativistic test particle escape from circular orbit around central mass due to mass loss, considering orbiting body corrections due to general relativity

23 p3335 A72-43265

Saturn-Jupiter rebound - A method of high-speed spacecraft ejection from the solar system.

23 p3340 A72-44323

ESCHERICHIA

Intestinal disbacteriosis and autoinfection occurrence in guinea pigs and rats under magnetic field effect, noting Escherichia population changes

05 p0622 A72-16647

Isolation of a polyvalent bacteriophage for *Escherichia coli*, *Klebsiella pneumoniae*, and *Aerobacter aerogenes*.

19 p2755 A72-37650

SG (GYROSCOPES)

U ELECTROSTATIC GYROSCOPES

ESRO SATELLITES

NT AZUR SATELLITE

NT COS-B SATELLITE

NT HEOS B SATELLITE

NT HEOS SATELLITES

ESRO polar orbiting meteorological satellite, discussing design features and operational instruments

01 p0126 A72-10186

Industrial challenge of European space R and D programs, discussing ELDO Europa 1 launcher vehicle and ESRO-HEOS satellite technological problems

01 p0146 A72-10948

European Space Research and Technology Center satellite project control system, describing critical path network analysis, work package cost control and project planning

02 p0304 A72-12035

ESRO satellite power supply solar paddles deployment mechanism, describing simulated zero gravity tests

02 p0286 A72-12713

Organizational structure and functions of ESTEC /ESRO branch/ concerned with scientific research and application satellites development

02 p0305 A72-12724

Celestial gamma rays arrival direction and energy spectra measurement and spectrum analysis using ESRO satellite COS-B data

03 p0408 A72-13029

Gimbaled telescope/UV spectrophotometer combination with star tracking facilities for use on ESRO TD-1 A satellite

03 p0355 A72-13061

ESRO program in imaging detector development for UV and soft X ray space missions, presenting image storage target details

08 p1171 A72-21971

Solar cells array design and assembly techniques, discussing tests for Esro satellites aerospace environments

12 p1758 A72-28033

ESRO satellites solar array performance under orbital environmental conditions, discussing radiation damage and earth albedo effects

12 p1759 A72-28047

Auroral spectra recorded at 2000-3000 A with fast Ebert Fastie scanning spectrometer aboard ESRO rockets

14 p2098 A72-30139

ESRO IA satellite observations of trapped and precipitated proton energy spectrum as function of invariant latitude on 8 March 1970

14 p2146 A72-30141

UV stellar spectra observation with orbiting stellar spectrophotometer aboard ESRO TDI A satellite, noting Mg II lines

15 p2308 A72-31927

Geomagnetic field aligned electron anisotropies at high latitudes for energies 1 and 6 keV observed by ESRO satellite, noting two regions of maximum occurrence frequency

15 p2226 A72-31928

ESRO report to COSPAR on satellites in orbit and under development and on 1971 sounding rocket program

15 p2338 A72-32016

Minimisation of the solar array generated electrical interference on the GEOS satellite.

20 p2889 A72-38990

ESRO 1 SATELLITE

ESRO 1 satellite residual gas outgassing rate and composition measurements during thermal heat balance tests, using mass spectrometer

09 p2163 A72-23260

Esro 1 /Aurorae/ satellite electron intensity measurements, explaining disparities between different experiments by detectors low-energy thresholds difference

22 p3173 A72-42648

ESRO 2 SATELLITE

Solar proton flux and energy spectra from 1968-1969 ESRO 2 satellite measurements, detailing 18 November 1968 event

02 p0273 A72-12073

ESSA SATELLITES

Snow lines determination from ESSA-APT weather satellite pictures, comparing with ground data

09 p1303 A72-23295

NT URETHANES

Organophosphorus antiwear additives in neopentyl polyol ester lubricants on 440C stainless steel surfaces, using four ball wear test machine

[AD-740055] 02 p0250 A72-12849

Mass spectrometric studies of solvent extractable acid methyl esters of oil shale from Colorado Green River Formation

03 p0320 A72-13742

Esters and amides participation in prebiotic polymers, discussing ribosome bonds and messenger RNA

04 p0468 A72-14767

Cholesterol esters polymorphic and mesomorphic behavior, using differential scanning calorimetry, X ray powder diffractometry and positron annihilation techniques

04 p0484 A72-15262

Synthetic fire resistant hydraulic fluids, comparing chlorinated hydrocarbons and phosphate esters chemical properties with water based products

08 p1197 A72-22160

Capillary gas chromatography with two moderately high temperature phases, testing esters and hydrocarbons resolution ability

12 p1778 A72-27225

Allyl esters of phosphoric acid preparation and application as substitutes for heavy metal sulfides and silver compounds in single operation photographic process

16 p2392 A72-33363

ESTIMATES

NT COST ESTIMATES

Estimation and control relations separation for discrete time stochastic systems, considering assumptions on linearity, criteria, information pattern, constraints and noise distributions

01 p0047 A72-11306

Fading medium transfer function estimation via homomorphic and Kalman filtering, considering multiplicative noise

03 p0326 A72-14195

Extended iterative weighted least squares estimation of coefficients for linearly independent component signals in linear model

04 p0539 A72-14913

Quantitative and qualitative reliability estimates for electronic and mechanical products, obtaining conditional probabilities of flawless operation

08 p1179 A72-22052

Reliability estimates for continuously inspected recoverable systems, determining readiness factor for periodic checkout

08 p1180 A72-22054

Probability estimates of aircraft encounters with hail, discussing variations with locality, hailstone size and height and supersonic transport experience

09 p1346 A72-23423

Optimal estimates for nonlinear dynamic systems with time delay, using calculus of variations

10 p1454 A72-23784

Brightness estimates of Markarian galaxies on photographic plates, measuring light variation amplitude

10 p1546 A72-24831

Numerical algorithm for guaranteed minimax /max-min/ estimates for multistep decision making processes, using ALGOL 60

13 p1924 A72-28708

Minimum phase systems application for linear estimation of steady random sequences of signals, obtaining transfer function for optimal frequency filter

13 p1937 A72-29999

Bayesian estimation for nonlinear filtration of nonstationary non-Gaussian radio signals, deriving second central moments and parameter estimate errors

15 p2195 A72-31656

Asymptotically optimal procedures for certain types of moments of cutoff and terminal decisions in sequential estimation

17 p2576 A72-35419

A priori estimates and nonlinear parabolic equations of arbitrary order.

17 p2577 A72-35796

Condition for the equivalence of two important adaptation algorithms and its relationship to effective estimates of probability-distribution parameters

19 p2825 A72-37439

Weight estimation methods.

19 p2871 A72-37451

French monograph - Linear estimation of the parameters of multidimensional dynamic systems and statistical validation of the model - Applications to process identification

19 p2778 A72-37486

Parameter identification of a class of multiple input/multiple output linear discrete-time systems.

19 p2826 A72-38269

Mean value of noisy signal quantized by analog/digital converter, noting input noise level relation to estimate accuracy

20 p2904 A72-39785

Limiting value of the lower indicator, and lower bounds for integral functions with positive zeros

20 p2947 A72-39863

Best-fit estimate of relativistic effects in time-delay experiments.

20 p2972 A72-39871

An estimation algorithm with learning feature for an adaptive bit synchronizer.

21 p3021 A72-40908

Techniques for power spectrum moment estimation.

21 p3021 A72-40911

Statistical estimation of the signal-to-noise ratio beyond a linear detector

21 p3022 A72-41073

Regularized linear problem with perturbed equation as solution, presenting error overestimate

21 p3076 A72-41336

Location estimation for spacecraft landed on Mars surface via statistical techniques application to earth based radio tracking data, taking into account ephemeris biases

21 p3082 A72-41554

A comparison of the effects of small nonlinearities on several estimation schemes.

21 p3076 A72-41555

Investigation of the stability and vibrations of beams of variable rigidity by the method of bilateral estimates

22 p3234 A72-42147

Estimation and prediction of Gumbel and Frechet distribution parameters, noting statistical decision in tests, sequential analysis and graphical procedures

22 p3199 A72-42968

The application of Monte Carlo methods to the nonlinear filtering problem.

23 p3274 A72-43541

Estimates of unknown parameter from quantized observations given as sequence of evenly distributed random values, noting optimal grouping equations for general distribution function

23 p3266 A72-44218

Boundary value problems for multidimensional hyperbolic equations with degeneration

23 p3310 A72-44487

A priori estimates at the boundary for solving second-order elliptic integrodifferential equations

24 p3420 A72-45648

ESTIMATING

NT ORBITAL POSITION ESTIMATION

Estimation method for surface pressure distribution on cascade airfoil in retarded flow, applying to axial flow turbomachines design with suction performance and efficiency

01 p0001 A72-10396

Learning-identification of unknown nonlinear discrete systems, using local estimation results for global function learning

01 p0046 A72-11199

Point estimate calculation of underlying distribution function for probability plot, developing confidence coefficient for Weibull model

02 p0252 A72-11557

Computerized estimation of deformation parameters for Sellars-Tegart equation relating stress, strain rate and temperature in creep and hot torsion testing of metals

07 p1090 A72-19736

Nonlinear estimation theory and applications - Conference, San Diego, September 1971

08 p1143 A72-20843

Recursive and nonrecursive real time spline methods for nonlinear estimation of independent trajectory parameters for vehicle entering earth atmosphere

08 p1197 A72-20862

Algorithms for spatially varying parameters estimation in nonlinear partial differential equations from noisy observations, noting diffusivity in heat equation

10 p1506 A72-24457

Asymptotic solutions to dynamic problems of thermoelectricity estimation under homogeneous boundary conditions

13 p2062 A72-30067

Computational difficulties reduction in optimal control and estimation problems, discussing controllability and observability

17 p2574 A72-34417

Role of recursive estimation in statistical image enhancement.

18 p2658 A72-36260

Two dimensional recursive filter for Bayesian estimate of pictorial data represented by dynamic model of random field with exponential autocorrelation

18 p2658 A72-36261

Book - Fundamentals of pattern recognition.

20 p2905 A72-39575

Linear estimation stochastic filtering and deterministic linear optimal regulation duality concept extension to problems with inequality constraints

21 p3074 A72-40228

A recursive least-squares approach to the on-line adaptive control problem.

21 p3037 A72-40640

A design procedure for intermediate-order observer-estimators for linear discrete-time dynamical systems

22 p3161 A72-41994

Parameter estimation of reflected signal in multichannel communication system with discrete readings, considering receiver with optimal signal processing under low noise level

22 p3154 A72-42239

Control and estimation separation in stochastic optimization, discussing Wonham observer matrix reversibility and replacement in closed and closed-open loop systems

22 p3163 A72-42740

Aerospace vehicle passive thermal protection systems heat shield and bulk insulation estimation by weight prediction in conceptual phases of design

[SAWE PAPER 934] 23 p3356 A72-43474

An estimate of expected critical-path length in PERT networks.

23 p3308 A72-43806

Reliability estimation in life testing in the presence of an outlier observation.

23 p3309 A72-43807

ESTIMATORS

System natural frequency standard deviation estimator, using Monte Carlo method

[ASME PAPER 71-WA/APM-8] 05 p0734 A72-15972

Divergence prevention in decision directed adaptive recursive estimators in relation to error covariance

06 p0792 A72-17307

Sequential testing of actual and calculated error covariances consistency in recursive nonlinear estimators, noting method application to linear filters

08 p1197 A72-20857

Discrete-time nonlinear estimators digital implementations by computerized Monte Carlo method, comparing with alternative techniques

08 p1145 A72-20864

Failure rate function nonparametric estimators comparison on basis of asymptotic and Monte Carlo mean square errors

13 p1985 A72-28364

Smooth empirical Bayes estimation of observation error variances in linear systems.

17 p2576 A72-35248

Radar cross section fluctuation statistics description by generalized chi-square distribution, discussing target detection probabilities maximum likelihood estimates

19 p2763 A72-37293

State-feedback-controllers and state-estimators design for roll-pitch-horizontal motions of helicopter near hover, using rotor dynamics model

[AIAA PAPER 72-778] 19 p2752 A72-38137

Receiver processing for direct-detection optical communication systems.

21 p3017 A72-40859

Extended Kalman filter application to delayed systems for state and time delay estimation, discussing two nonlinear estimators

[AIAA PAPER 72-902] 21 p3039 A72-41553

Optimal, on-line linear filtering with noisy, time-delayed observations.

23 p3276 A72-43855

ESTUARIES

Chesapeake Bay aquatic ecosystems observations, using satellite remote sensing multispectral photography and imagery

02 p0215 A72-11885

ETCHANTS

Chemical etchants and etching procedure for decorating areas of residual tensile elastic surface stresses in ultrahigh strength steels without aging

22 p3183 A72-43045

ETCHING

Electron microscope examination of freeze-etched air-filled lung alveoli extracellular lining layer, discussing sample preparation techniques

05 p0623 A72-16787

Etch pit technique for titanium and zirconium crystal orientation determination, discussing etch pit locations and polycrystalline specimen goniomicroscopic observation

05 p0679 A72-17124

Chemically etched notches effect on Al-Mg alloy mechanical properties

07 p1018 A72-20139

Gas etching of Ge and Si semiconductors with vapors of chemical elements, emphasizing hydrogen chloride

11 p1700 A72-25776

Semiconductor materials etching and surface coating with protective silicon dioxide film in low temperature oxygen plasma

11 p1700 A72-25777

Metal surface layer and microetching process along grain boundaries during electrochemical precision processing, verifying steel microcrack depths with mathematical model

11 p1640 A72-26260

Ordered growth and etching of uranium and zirconium oxide-tungsten fiber refractory composites, using X ray diffraction and scanning electron microscopy

11 p1668 A72-26943

Nitride phase microstructure in ferrochromium nitrided in liquid state, comparing electrolytic etching and film coloration methods

12 p1829 A72-27454

Fatigue crack growth rate in precracked steel samples observed at 100 C by etching technique, noting flow stress and yield in plastic zone

14 p2119 A72-30608

Freeze etching techniques in electron microscopic investigations of biological cells molecular structure

18 p2653 A72-36829

Regeneration metering methods and equipment for acidic and alkaline etching of normal plated circuit boards.

20 p2929 A72-39491

A study of the vestigial records of cosmic rays in lunar rocks using a thick section technique.

23 p3341 A72-44459

Chemically etched notches effect on Al-Mg alloy mechanical properties

24 p3417 A72-45764

ETHERS

NT ANISOLE

NT DIETHYL ETHER

Electron impact induced fragmentations of o-, m- and p-hydroxyalkylphenones and trimethylsilyl/TMS/ether derivatives, using high resolution mass spectrometry, metastable defocusing and deuterium labeling

07 p0936 A72-19499

ETHYL ALCOHOL

Dry spot formation in nonboiling ethanol thin film on horizontal surface heated from below

04 p0595 A72-14597

Transient gain measurements on laser dyes of flashlamp pumped rhodamine 6G-ethanol solutions with air and nitrogen

07 p1002 A72-19208

Surface active medium effect on free surface energy and strength of pyrographite in ethyl alcohol solution, using crack kinetics experiment

08 p1197 A72-22182

Hydrodynamics of turbulent free convection boundary layer on vertical flat plate and ethyl alcohol film

11 p1743 A72-25258

Ethanol liquid fuel counterflow diffusion flame stabilization and thermal structure determination by interferometry

13 p1913 A72-29306

Aluminum oxide chromatography for ethanol-amine acetyl derivatives detection and separation in animal tissue extracts, using water-butanol solution as solvent

14 p2077 A72-30972

Effects of different alcohol dosages and display illumination on tracking performance during vestibular stimulation.

17 p2508 A72-34554

ETHYL COMPOUNDS

Gaseous diethyl peroxide spontaneous ignition during decomposition in cylindrical vessel, investigating diluents and temperature effects on self heating

02 p0301 A72-12027

Dinitroxydiethyl nitramine burning, describing experimental facilities used to determine temperature profile of combustion front

09 p1411 A72-22884

Anodic oxide films separation from Al alloy surface using ethyl bromide at temperatures below 40 C

16 p2397 A72-33274

ETHYLENE

Noble and molecular gases addition in reactions induced in ethylene by carbon dioxide-nitrogen-helium laser

07 p1009 A72-20693

Ethylene-vinyl acetate-asphalt thermoplastic material properties, filler effects, application methods and commercial uses

12 p1835 A72-28094

Carbon dioxide power laser effects on IR spectra of HCl-ethylene and sulfur dioxide-ethylene mixtures, focusing with Ge lens

13 p1971 A72-29870

Hydrogen atom exchange in ion-molecule reactions of methane and ethylene determined from reaction products distribution, using ion cyclotron resonance techniques

14 p2084 A72-30522

ETHYLENE COMPOUNDS

Free and dissolved water contents determination in light petroleum products by modified Karl Fischer method using ethylene glycol solvent mixture

05 p0702 A72-16669

Methyl alcohol-ethylene glycol self mixing antifreeze solution for precipitation gages

11 p1682 A72-26088

ETIOLOGY

Age related diminutions in ballistocardiographic and electrocardiographic amplitudes, observing relation to heart position lateralization and size reduction

03 p0314 A72-13144

Cauchy problem for nonlinear biharmonic equation in Euclidean n-space, deriving a priori inequality estimate by logarithmic convexity of functional F

04 p0539 A72-15044

Optimality conditions for safe time in linear pursuit problems within n-dimensional Euclidean space

05 p0683 A72-16584

Markov type isotropic random Gaussian field analysis in n-dimensional Euclidean space

08 p1198 A72-20999

Theorem of pursuit game with curvature constraints during two points motion in Euclidean space

11 p1675 A72-25320

Criteria for nonlinear systems controllability in terms of state variable analytic function and derivatives, implying strong accessibility for manifolds including Euclidean spaces

18 p2673 A72-36616

Convergence of Rothe's method in the construction of bounded almost periodic and periodic solutions to a parabolic boundary value problem

19 p2824 A72-37433

Optimality conditions for safe time in linear pursuit problems within n-dimensional Euclidean space

19 p2825 A72-37555

Existence theorems in multidimensional problems of optimization with distributed and boundary controls.

21 p3074 A72-40548

EUGLENA

Euglena cell division timing control by endogenous circadian rhythm, showing direct entrainment by low frequency dark-light cycles

07 p0919 A72-19539

EULER BUCKLING

Random temperature variations effect on life of Euler column with sandwich cross section under constant axial compressive load, using Norton nonlinear creep law

15 p2324 A72-31494

Euler method limitations in static stability analysis, noting criterion for follow-type problem of buckling

16 p2466 A72-33016

EULER EQUATIONS OF MOTION

Energy release and accelerating inner stream effects on flow field near fuel injection in gas core reactor, basing Euler equations energy diffusion term on radial radiative transport

01 p0100 A72-11351

Spacecraft trajectories optimization by gradient method combination with Euler equations in calculus of variations

04 p0571 A72-14631

Angular velocity vector active damping during spin-up of electrically supported gyro with mass-unbalance readout, using Euler equations of motion

07 p0986 A72-19691

Motion of heavy solid body about fixed point for Hess conditions, analyzing Euler-Poisson equations solution properties

08 p1207 A72-21345

Distribution theory application to fixed end point problem in variational calculus for extremal containing corners, obtaining Euler equation

12 p1885 A72-27849

Gradient method and Euler equations application to low thrust earth-to-Mars spacecraft orbital transfer trajectory optimization

13 p2034 A72-28438

Delaney case of Kovalevskaja gyroscope motion, analyzing Euler equations time dependence

13 p1956 A72-28722

Shock wave propagation in gas with discrete velocity distribution, comparing solutions based on Euler, exact and Navier-Stokes equations respectively 16 p2375 A72-32861

Delauney case of Kovalevskaya gyroscope motion, analyzing Euler equations time dependence 22 p3176 A72-42098

Inverse problems of the dynamics of a ponderous solid with one fixed point 23 p3312 A72-43219

Hydrodynamic equations for incompressible fluid in steady relativistic state extended to nonrelativistic velocities case, noting transition from Euler to Predvoditelev equations 23 p3279 A72-43686

EULER-LAGRANGE EQUATION

Variational perturbation problem solution in power series form for elliptic functional description of elastic continuous medium state by Euler-Lagrange equations 02 p0259 A72-12233

Elastic continuous media nonlinear models approximation, obtaining Euler-Lagrange functions 02 p0259 A72-12234

Variational solutions of nonlinear free boundary integrodifferential Euler equations for rotating star models 02 p0252 A72-12540

Optimal trajectory in phase space, deriving differential motion equations with Euler-Lagrange method 02 p0199 A72-12880

Analytic solution for optimal control circular orbit escape with constant thrust rocket, using Euler-Lagrange equations and perturbation technique 03 p0437 A72-13839

Linear nongyroscopic conservative system stability from modified Lagrange equations of motion, using pseudo degree of freedom concepts and vibration method 03 p0362 A72-14394

Euler-Lagrange equation construction to obtain phenomenological description of quasi-equilibrium systems in metrics, noting solution coincidence with Onsager equations 07 p1102 A72-20665

Beecham-Kryloff-Bogoliubov approximation method application to a degree of freedom nonlinear systems, using averaged kinetic energy and virtual work terms in Lagrange equation 09 p1342 A72-23454

Virtual displacement application to nonholonomic systems with arbitrary constraints to derive Lagrange and Appell equations of motion 10 p1513 A72-24995

Multiple index Lagrange equations of motion of second kind, proving analogy between mechanical and stereomechanical effects 12 p1844 A72-27318

Averaging variational Euler-Lagrange equation for nonlinear waves with dispersion in nonconservative system 13 p2003 A72-28774

Lagrange equations of second kind for rigid systems, using balances of linear and angular momenta for mass point or rigid body 16 p2466 A72-33021

Variational principles application to nonlinear heat transfer problems, using Euler-Lagrange equation 16 p2478 A72-33435

Invariance problems in terms of Lagrangian domain of definition and Euler-Lagrange mapping intrinsic geometric characterization, reviewing theory of fiber bundles 20 p2954 A72-40006

Russian book - Introduction to the theory of gyroscopes. 21 p3052 A72-40349

Explicit series solutions for the frequencies of motion around the Lagrangean points in the restricted problem of three bodies. 24 p3440 A72-45136

EUROPA

Photometric radii of Io and Europa. 17 p2619 A72-35946

EUROPA LAUNCH VEHICLES

Guiana Space Center launch complexes for Diamant B and Europa satellite launchers and rocket probes, discussing trajectory, telemetry and safety measures 03 p0339 A72-12912

Small power nuclear propulsion engines for Europa launching systems, discussing heat exchange reactor using hydrogen propellant 15 p2273 A72-31812

Integrated systems design procedures as exemplified by Europa 1, 2 and 3 rockets and Symphonie communication satellite development 19 p2869 A72-38302

EUROPA 1 LAUNCH VEHICLE

Industrial challenge of European space R and D programs, discussing ELDO Europa 1 launcher vehicle and ESRO-HEOS satellite technological problems 01 p0146 A72-10948

EUROPA 2 LAUNCH VEHICLE

Europa 2 launcher F 11 flight test review concerning countdown, flight plan and trajectory and organizational details 02 p0286 A72-12034

Dynamic test facility and methods for Europa 2 launch vehicle inertial guidance system 05 p0643 A72-16433

Europa 2 launch vehicle standardized PCM/FM and FM/PM telemetry system compared with Europa 1 05 p0630 A72-16751

Launch center for solid-liquid propellant rocket probes, Diamant and Europa 2, describing payload preparation hall [DGLR PAPER 72-0137] 13 p1939 A72-28962

EUROPA 3 LAUNCH VEHICLE

Europa 3 candidate propulsion modules system analysis, considering payload, mission flexibility, orbital injection precision, synchronous satellite design influence, satellite-booster interfaces and costs 02 p0287 A72-12731

Europa 3 booster rocket development for future European space programs, discussing performance characteristics, project management and international cooperation aspects 05 p0724 A72-16310

Europa III preparatory phase. 17 p2621 A72-34899

Viking 2 rocket engines for Europa 3 first stage propulsion, describing engine components design and functions and performance test results 22 p3216 A72-42649

On the utilization of thermonuclear propulsion for an upper stage of the Europa III launcher 24 p3424 A72-45227

EUROPEAN AIRBUS

European A300B airbus flying control hydraulic system and landing gear design for safety and reliability, fatigue life, weight and maintenance 01 p0005 A72-10724

European A300B airbus flap and slat systems and tailplane actuator for longitudinal pitch trim control 01 p0006 A72-10725

A-300B European Airbus cantilever wing design and manufacture, discussing skin forming, skin-stringer and torsion-box assembly, automatic riveting and root-end profile machining procedures 03 p0365 A72-14301

European passenger aircraft Airbus program, discussing various configurations performance, economic factors and technical support 12 p1753 A72-27108

European Airbus program, noting international cooperation juridical sources, content and organization, aircraft performance, financing, project chronology and Franco-German agreement 13 p2067 A72-28795

Airlines requirements for European airbus, discussing design of aircraft structure, control, pressurized cabin and propulsion system 21 p2994 A72-40174

EUROPEAN SPACE PROGRAMS

Frequency planning for Symphonie German-French telecommunication satellite microwave equipment 01 p0030 A72-10710

Organization, management, contract placement and financing of CECLIS/ELDO European multinational program for launcher development 01 p0146 A72-10947

Industrial challenge of European space R and D programs, discussing ELDO Europa 1 launcher vehicle and ESRO-HEOS satellite technological problems 01 p0146 A72-10948

Organizational structure and functions of ESTEC /ESRO branch/ concerned with scientific research and application satellites development [DGLR PAPER 71-048] 02 p0305 A72-12724

German ground operation system for satellites and space probes, discussing telemetric data processing, handling and flow [DGLR PAPER 71-123] 02 p0201 A72-12742

Faust project history, scientific objectives and present status, discussing stars, nebulae, quasars point sources and galactic photometry 04 p0583 A72-15691

Europa 3 booster rocket development for future European space programs, discussing performance characteristics, project management and international cooperation aspects 05 p0724 A72-16310

Automatic control of ESRO drag-free deep space probe for measuring Robertson matrix beta and gamma constants [ONERA, TP NO. 952] 05 p0727 A72-16468

European Space Research and Technology Center /ESTEC/ results in cosmic rays, ionospheric physics and surface physics 05 p0644 A72-16754

European space organization with scientific and technological research objectives, noting jurisdictional status 07 p1105 A72-19474

Satellite communication activities on French national level, European multinational level /Symphonie/ and worldwide level /Intelsat/ 08 p1132 A72-21202

ESRO program in imaging detector development for UV and soft X ray space missions, presenting image storage target details 08 p1171 A72-21971

European Special Space Tug electronic subsystem requirements, considering strapdown inertial measuring unit, remote sensors, computer and fail-safe backup system 09 p1396 A72-23258

European Special Space Tug structural and configurational layouts and problems 09 p1396 A72-23259

German-French DIAL aeronomy satellite project, describing geocoronal radiation, electron density and equatorial electrojet measurements 10 p1535 A72-24029

DIAL aeronomy satellite design and operational features, describing in-flight behavior 10 p1551 A72-24030

ESRO sounding rockets program survey, discussing launchings in terms of number, vehicle types and sites, member participation, payload integration policy and success rate 10 p1551 A72-24197

ESRO electric propulsion systems R and D, discussing various concepts in terms of weight, cost, thrust level, efficiency, simplicity, exhaust velocity and development potential [AIAA PAPER 72-478] 11 p1710 A72-26207

Meteorological satellite information and communication aspects, stressing METEOSAT European project for permanent cloud cover observation in visible and IR bands [AIAA PAPER 72-547] 12 p1839 A72-27370

British defense and civil communications satellite program, discussing Skynet, INTELSAT, ESRO and New Space Technology Program activities [AIAA PAPER 72-548] 12 p1781 A72-27371

Franco-German Symphonie project of point to point communication and TV distribution by satellite, describing spacecraft and ground station characteristics [AIAA PAPER 72-549] 12 p1794 A72-27372

Dynamical motion simulation facility for Symphonie satellite, using sensors, attitude control electronics and analog computer in closed loop system [DFVLR-SONDDR-201] 12 p1795 A72-27659

ESRO findings on optimal resistance welding of solar cell interconnections for silver coated metals and pure silver 12 p1814 A72-28030

European programs on space stations, tugs, shuttles, propulsion and avionics and consideration for participation in NASA programs for 1970s and 1980s 14 p1715 A72-31137

European space project priority in terms of technological competition, budget limitation and participation in NASA post-Apollo program 14 p1715 A72-31138

European space program for remote sensing techniques application, noting earth resources survey satellites 15 p2220 A72-31229

International programs for simultaneous ecological study via remote sensing techniques, discussing European and Italian space programs 15 p2220 A72-31230

Economic analysis of satellite network construction program, suggesting Italian national center formation for space exploration 15 p2319 A72-31231

European synchronous meteorological satellite system Meteostat, discussing mission, control and data acquisition 15 p2265 A72-31345

Second generation European multi-mission launcher system for scientific and application satellites, using high energy propulsion modular design 15 p2320 A72-31804

Report to COSPAR on Polish space program covering artificial satellites tracking, aerospace medicine, meteorology and bioastronautics 15 p2337 A72-32004

Report to COSPAR on UK ground based, rocket and satellite-borne space research experiments and 1971-1972 programs 15 p2337 A72-32005

Report to COSPAR on Swedish space research, discussing activities of astronomical, ionosphere and geophysical observatories and space technology, physics and cosmic ray groups 15 p2338 A72-32008

Norwegian report to COSPAR on space scientific activities and application program, including satellite geodesy and earth resources research 15 p2338 A72-32009

Report to COSPAR on Netherlands space research covering solar and stellar radiation, cosmic gamma and X rays, photometry and satellite geodesy 15 p2338 A72-32010

Report to COSPAR on East German space program covering ionosphere, geomagnetic phenomena and solar physics

15 p2338 A72-32013

Report to COSPAR on West German space program covering meteorology, aeronomy, ionospheric physics, magnetosphere, solar wind and radiation, solar system and life sciences

15 p2338 A72-32014

ESRO report to COSPAR on satellites in orbit and under development and on 1971 sounding rocket program

15 p2338 A72-32016

Europa III preparatory phase.

17 p2621 A72-34899

Present state of development and extension plans of the German satellite earth station at Raisting.

17 p2536 A72-35431

Controversy surrounding Sirio satellite project related to microwave atmospheric propagation above 10 GHz with possible application in earth-to-space communication systems

17 p2623 A72-35918

Incore thermionic reactor application to meet European TV broadcasting satellite and submarine and underwater laboratory power requirements

18 p2644 A72-36166

TD-1A - Europe's largest and most advanced satellite.

18 p2731 A72-37011

European co-ordination activities with particular reference to the Space Components Co-ordination Committee.

18 p2743 A72-37130

CNET Reliability Center and its activities in the field of aerospace devices

18 p2676 A72-37135

Heos-A2 satellite polar orbit mission to study electron, proton and alpha particle population outside magnetosphere and in neutral point region

19 p2857 A72-37783

Observations of the solar wind with the European satellite Heos-1

19 p2850 A72-37785

ESOC-Darmstadt - ESRO's European center of operations for space exploration

20 p2988 A72-39415

European participation in space shuttle and space tug programs, discussing funding and technical aspects

21 p3103 A72-40456

Mission model for European communication satellite system based on estimated future traffic requirements

21 p3017 A72-40853

Space shuttle mission and orbiter element description, discussing European participation

23 p3343 A72-44366

HEOS-2 in orbit - Its technical performance.

24 p3449 A72-45108

Government, military safety, police permission and insurance regulations for European rocket activities

24 p3467 A72-45124

Design and operation objectives and constraints for German scientific spacecrafts, discussing orbital performance and reliability and quality control requirements

24 p3451 A72-45205

The Franco-German telecommunications satellite Symphonie

24 p3451 A72-45230

EUROPEAN SPACE RESEARCH ORGANIZATION

SAT

NT AZUR SATELLITE

NT COS-B SATELLITE

EUROPIUM

Lunar basalt Eu abundance anomaly in Apollo 11 and 12 samples, considering partial melting with or without plagioclase

10 p1537 A72-24162

Eu and Sr distribution between coexisting feldspars in acidic rocks, using mass spectroscopic isotope dilution method

10 p1472 A72-24166

Sm and Eu binary alloys, investigating physicochemical interactions and phase diagrams

15 p2289 A72-31187

Eu, La and Sm in sunspot spectra.

20 p2973 A72-39884

EUTECTIC ALLOYS

Ductility enhancement in directionally solidified Ni base Mar-M200 alloy by Hf additions increasing gamma-gamma prime eutectic

01 p0089 A72-11104

Eutectic Ni-Cr alloy temperature effects on deformation rate on plasticity, noting superplasticity point

02 p0244 A72-12243

Visual investigation of semibounded axisymmetric MHD flow of liquid eutectic K-Na alloy under strong magnetic field effect

03 p0399 A72-14014

Al-AiCu intermetallic unidirectionally solidified eutectic composite structure and heat treatment effects on room temperature tensile properties

05 p0676 A72-17104

Ni-NiNb intermetallic unidirectional eutectic alloy crystal structure and high temperature behavior, considering mechanical twinning relationship to strain hardening and ductility

05 p0677 A72-17108

Directionally solidified Al-AlNi intermetallic eutectic composites creep tests, identifying time dependent fracture mechanism

05 p0678 A72-17114

Directionally solidified Al-AlNi intermetallic eutectic alloy microstructural characteristics and effects on creep fracture

05 p0678 A72-17115

Impurities effect on microstructure alignment in unidirectionally solidified Al-AlNi eutectic intermetallic, noting fiberless region defects

05 p0679 A72-17123

Interfacial dislocations and failure in tension of directionally solidified Al-Cu-Mg eutectic

07 p1016 A72-19937

Microstructure and high temperature mechanical properties of unidirectionally solidified pseudobinary Fe-Cr-Nb eutectic alloy

07 p1016 A72-19938

Al and Al-Si alloy thermal expansion at low temperatures, noting near-eutectic crystalline composition

07 p1019 A72-20156

Nonferrous metals melting, discussing solid and gaseous impurities removal, halide function and grain and Al-Si eutectic refinement method

07 p0999 A72-20570

Cr-Tb alloys monotectic, eutectic and eutectoidal phase transformations study with differential thermal, metallographic, X ray structural and durometric analysis

08 p1187 A72-21781

Ti-Ce-S alloys phase equilibria with isothermal cross section, discussing eutectic alloys anomalous structure and cerium monosulfide preparation method

08 p1187 A72-21784

Microstructure and mechanical behavior of unidirectionally solidified magnesium-magnesium nickelide eutectic composite over range of solidification rates

09 p1330 A72-23376

Micrograin superplasticity in eutectoid steel, discussing effect of transformation to austenite

09 p1330 A72-23380

Micrographic observation of Al and Al-Cu intermetallic dendrites shape at birth in liquid of nearly eutectic composition

10 p1496 A72-24239

Fracture energy and deformation of unidirectionally and randomly oriented lamellar Al-Cu eutectics from surface microstructure studies

10 p1499 A72-24893

Austenitizing condition effect on lower bainite transformation in eutectoid carbon steel

11 p1656 A72-25515

Temperature and strain rate effects on superplasticity of Ni-Cr eutectic alloy

11 p1659 A72-26129

Slip and mechanical twinning in nickel-nickel nitride directionally solidified eutectic alloy, showing variation with temperature of stress-strain curves

11 p1667 A72-26935

Low cycle fatigue deformation of lamellar eutectic and cast Ni-Sr alloys, noting microstructure and chemical composition effects on fracture energy

11 p1668 A72-26939

Two phase structure solidification of monovariant eutectic Co-Cr-C alloys near pseudobinary cut

13 p1976 A72-28674

Carbon distribution effect on cast Mo and alloys fracture studied by electron microscopy, microdiffraction and X ray analysis, noting annealing from eutectic temperature

15 p2255 A72-31575

Isotropic fiber coarsening in unidirectionally solidified eutectic alloys, showing effect on alloy microstructure

16 p2409 A72-33802

Ultrasonic velocity measurement of elastic constants of Al-Al3Ni unidirectionally solidified eutectic.

18 p2701 A72-36591

Fracture behavior of stainless steel fibers in Sn-Pb alloy matrix.

19 p2820 A72-38373

Unidirectionally oriented pseudobinary eutectic solidification in ternary systems, investigating crystallographic and mechanical characteristics of ZrCuSi fibers embedded in Cu matrix

20 p2940 A72-39441

Crystallization and structure of hypereutectic iron-carbon-chromium alloys

21 p3071 A72-41788

Contact interaction between high-melting compounds and liquid metals. I - Interaction between subgroup IVA metals and metals of the iron family

23 p3299 A72-43287

Desulfurization of cobalt, nickel, and their eutectic carbon alloys during noncrucible zone melting in vacuum

23 p3300 A72-43647

EUTECTIC DIAGRAMS

U PHASE DIAGRAMS

EUTECTICS

NT EUTECTIC ALLOYS

Experimental hybrid rocket engine combustion chamber with solid oxidizer lining of ammonium nitrate and perchlorate eutectic mixture

05 p0702 A72-17249

Modified Al-Si eutectic solidification behavior and microstructure, investigating LF mechanical vibration effects

14 p2120 A72-30617

Phase diagrams of Ni-C and Co-C systems with metastable equilibrium lines, investigating microstructure and microhardness of carbide eutectic

14 p2123 A72-30990

EVACUATING [TRANSPORTATION]

General aviation patient transportation, investigating military helicopter airlift performance

01 p0139 A72-10778

Psychiatric preventive intervention in emotional crisis situations during patients aeromedical evacuation and transportation, discussing personnel shortage

10 p1429 A72-23743

Helicopter search, rescue and transportation of wounded and ill persons in Denmark, discussing accidental hypothermia treatment

19 p2759 A72-38714

EVACUATING [VACUUM]

Space shuttle cryogenic tanks self evacuating multilayer insulation, evaluating thermal and dynamic performance

01 p0139 A72-10778

Hydrogen evacuation with He condensation pump in ultrahigh vacuum region

06 p0795 A72-17698

Analytical prediction of pressure-time relationship during evacuation of multilayer insulation thermal protection systems, taking into account outgassing effects

14 p2172 A72-30925

Study of the solidification of cryogenic fluids by means of evacuation

19 p2881 A72-38039

EVAPORATION

NT PROPELLANT EVAPORATION

NT TRANSPIRATION

Radiative, segregation and evaporation processes of ice particles surrounding early type stars of Orion association, justifying ice particle model for dust grains

01 p0129 A72-10794

Heat transfer during liquid film evaporation in centrifugal vaporizer, noting agreement between theory and experiment

03 p0458 A72-14158

Heat pipe evaporation zone length based on desiccation length calculations for various capillary cross sections and thermal loads

05 p0743 A72-15853

Biological phosphate origin through atmosphere-hydrosphere interrelations, discussing concentrative processes, dehydration mechanics and evaporation

05 p0617 A72-16129

Thermodynamic analysis of heat of evaporation of sweat, considering ambient temperature and humidity effects, body heat storage and presence of solutes

11 p1586 A72-26610

Weight loss due to respiratory tract evaporative water loss during exercise, from humidity change, ventilatory exchange and oxygen uptake data

11 p1586 A72-26613

Three dimensional heat propagation problem of copper electrode destruction under concentrated heat flux with allowance for metal evaporation

12 p1890 A72-28175

Mass spectroscopic determination of vapor composition during GaAs and GaP single crystals exposure to ruby laser radiation

14 p2109 A72-30316

Mass transfer effect on heat transfer to evaporating droplet, considering mass efflux shielding effect and forced convection flow field

14 p2172 A72-31051

Liquid drop evaporation in stagnant environment at high temperature and pressure, noting gas phase nonideal behavior effects

14 p2173 A72-31066

Velocity distributions of molecular beams evaporating into vacuum from polycrystalline hexachlorobenzene and sulfur surfaces

16 p2429 A72-33058

H I region molecular formation on interstellar dust grains, discussing nonequilibrium evaporation mechanism for adsorbed particles

16 p2452 A72-33128

Effect of evaporation of the volatile component on the electrical properties of CdSb

19 p2845 A72-38402

The film vaporization combustor and its physical principles. I - The vaporizer section of the combustor. II - The reaction chamber and the combustion [DFVLR-SONDDR-194]

20 p2963 A72-39074

Sensitivity enhancement of atom absorption measurements by the method of pulse vaporization from the microprobe into the flame

22 p3176 A72-42174

- Radiation, evaporation and the maintenance of turbulence under stable conditions in the lower atmosphere. 22 p3201 A72-42597
- Spacecraft functional properties degradation due to surface contamination with outgassing vapors, discussing contaminant materials transport and sorption characteristics 23 p3254 A72-43619
- Evaporation of metallic targets by intense optical radiation 23 p3297 A72-44485
- Pulsating conditions in the evaporation of optical materials under the influence of CO2 laser radiation. 24 p3411 A72-45610
- EVAPORATION RATE**
- Heat transfer for water at pressures near atmospheric in wicks formed of stainless steel screen layers, obtaining steady and maximum evaporation rates [ASME PAPER 71-WA/HT-12] 05 p0744 A72-15872
- Evaporation and combustion of liquids injected into high temperature supersonic flow, considering interrelation with pressure variations 08 p1253 A72-21454
- Two mechanism model for anomalous field ion microscope images in W, noting end form difference in high and low evaporation rates 09 p1370 A72-22803
- Exospheric temperatures in hydrogen dominated planetary atmospheres for evaporative loss rates estimation, noting two component diffusive equilibrium model 09 p1393 A72-23661
- Stefan problem of metal evaporation duration after intense heat flux termination as function of thermophysical properties 15 p2334 A72-31504
- Impulse liquid jet pressure reduction in closed vessel under adiabatic conditions and evaporation intensity dependence on jet velocity 16 p2476 A72-33259
- Lifetime nomogram for evaporating drop at vapor combustion, applying thermomechanical and aerodynamic decay to jet engine combustion chamber [DFVLR-SONDDR-203] 16 p2477 A72-33422
- Experimental investigation of the influence of acoustic oscillations on the evaporation intensity of liquid droplets 20 p2987 A72-40037
- Electron beam evaporator with multiple source suitable for use in ultrahigh vacuum, noting control of evaporation rate 21 p3051 A72-40205
- EVAPORATIVE COOLING**
- NT FILM COOLING
- NT SWEAT COOLING
- Capillary evaporation cooling system with water as working medium, measuring effectiveness in terms of heat flux density vs water consumption [DFVLR-SONDDR-112] 10 p1561 A72-24023

- Human patients with chest pain and normal ECG, examining diagnostic value of graded exercise test, history and lipid levels with coronary arteriography data 01 p0010 A72-10146
- Human cardiocirculatory responses to submaximal physiologically paced bicycle ergometry, recording prejection period, isovolumic contraction, left ventricular ejection and pulse transmission time 01 p0010 A72-10147
- Exercise and denervation effects on intrafusal muscle fibers morphology, noting 25-33 percent cross-sectional area atrophy in nuclear bag and chain fibers 04 p0472 A72-14895
- Exercise ECG multichannel radio telemetry equipment, discussing sources of malfunction and unreliability and remedial procedures 05 p0621 A72-16610
- Human temperature regulation during upright and supine exercise, showing nonlinear relationships between perspiration and skin and core temperatures 07 p0922 A72-20275
- Endurance exercise effect on respiratory capacity in white, red and intermediate muscles in rats, relating fiber type to oxidative capacity 08 p1115 A72-21083

Physiological and subjective responses of physically fit young men to combined exercise-carbon dioxide stress tests

12 p1767 A72-28311

ECG amplifier and cardiographometer for exercise studies, using digital algorithm for heart rate computation and ECG signal preprocessing for R wave detection

14 p2080 A72-30707

Human plasma free fatty acids relation to lactic acid concentration and maximum aerobic power, noting carbohydrate availability as exercise capacity limiter

21 p3003 A72-41520

EXERTION

U PHYSICAL WORK

EXHAUST DIFFUSERS

Curved-wall annular exhaust diffusers for hot engine parts IR shielding, evaluating performance tests for swirl flow and ejector secondary flow effects on pressure recovery

[ASME PAPER 71-WA/FE-35] 05 p0646 A72-15922

Small radial inflow turbines for space applications, considering blade-shroud clearance, blade loading and exit diffuser design

[ASME PAPER 72-GT-42] 11 p1704 A72-25636

EXHAUST FLOW SIMULATION

NT ATMOSPHERIC ENTRY SIMULATION

NT FLIGHT SIMULATION

Simulated testing of turbojet engine ingestion of missile exhaust, determining design criteria for aircraft engine inlets from altitude chamber test data

07 p1052 A72-18758

High pressure annular combustor with continuous analytical and sampling system for simulated gas turbine engines emission measurements

[ASME PAPER 72-GT-88] 11 p1705 A72-25663

Simulation model test for effects of cooling air exhaust into gas flow area on turbine blading efficiency, obtaining dimensionless expression for experimental data generalization

12 p1862 A72-28148

The use of an expansion tube with cold gas to determine rocket engine starting transient pressures during silo launch

[AIAA PAPER 72-997] 21 p3040 A72-41583

The simulation of high pressure hydrogen/oxygen rocket engines

[AIAA PAPER 72-1027] 21 p3042 A72-41606

EXHAUST GASES

Aircraft gas turbine engine emission reduction, showing nitrogen oxide control with water injection

[ASME PAPER 71-WA/GT-9] 05 p0704 A72-15902

Diffusion and fallout of polluting particulates emitted by aircraft engines, discussing effect of wing-tip vortices, plume visibility and monitoring, simulation and modeling

[ASME PAPER 71-WA/AV-2] 05 p0704 A72-15950

Diffuser for altitude simulation in rocket motor operation, featuring film cooling with water inflow by motor exhaust gas ejector action

05 p0704 A72-16004

Rocket plume contamination effect on transmitting and reflecting materials optical properties, noting predominant absorption and scattering effects

[AIAA PAPER 72-56] 05 p0750 A72-16967

Aircraft gas turbine engines smoke emission sampling by stained filter technique, comparing Navy specifications AS 1833 with SAE method ARP 1179

07 p1053 A72-18770

Space and atmosphere contamination by industrial wastes, aircraft and spacecraft exhaust and radioactive waste disposal, considering legal safeguards

07 p1104 A72-19466

Nitrogen oxide emission control in gas turbine combustion by lowering flame temperature

[ASME PAPER 72-GT-22] 11 p1744 A72-25620

Gas turbine engines emission data correlation based on combustor theoretical model, proposing correction factors for data reduction to standard test conditions

[ASME PAPER 72-GT-60] 11 p1704 A72-25651

Propulsion system design for military VTOL aircraft, emphasizing subsonic cruise to maximum thrust ratio and exhaust downwash characteristics

[ASME PAPER 72-GT-73] 11 p1704 A72-25655

Aircraft gas turbine engines exhaust emission characteristics identification, considering ambient temperature and humidity effects

[ASME PAPER 72-GT-75] 11 p1705 A72-25657

High pressure annular combustor with continuous analytical and sampling system for simulated gas turbine engines emission measurements

[ASME PAPER 72-GT-88] 11 p1705 A72-25663

Combustion research for reducing jet aircraft pollutant emissions, discussing fuel atomization improvement, smoke reduction and combustor design techniques

11 p1705 A72-26037

Exhaust composition and smoke emission reduction from aircraft with gas turbine power plants

12 p1860 A72-27270

Estimated peak regional concentration of SST exhaust in stratosphere from expected flight operation levels

13 p1991 A72-28837

Future projections of commercial jet aircraft fuel demands, estimating engine exhaust effects on air quality

13 p1897 A72-28879

Aromatic hydrocarbons and fuels, investigating engine parameters effects on combustion and exhaust gases temperatures

13 p2025 A72-29074

Climatic changes due to stratospheric perturbation by propulsion effluents of high altitude aircraft flights

[AIAA PAPER 72-658] 16 p2388 A72-34076

SST contrails stratospheric dispersion by aircraft wake, atmospheric turbulence and exhaust gases temperature induced buoyancy

[AIAA PAPER 72-650] 16 p2388 A72-34084

Stratospheric pollution by SST exhaust gases, discussing water vapor and nitrogen oxides effects on ozone concentration

17 p2597 A72-35327

Atmospheric composition to 40 km altitude from balloon-borne particle impacted electron microscope screens, discussing pollution effects from high flying aircraft exhaust gases

17 p2551 A72-35935

Procedure for the continuous sampling and measurement of gaseous emissions from aircraft turbine engines

[SAE ARP 1256] 18 p2721 A72-36532

Numerical prediction of the diffusion of exhaust products of supersonic aircraft in the stratosphere

19 p2748 A72-37824

Influence of cooling-air exhaust into the air-gas flow area on the flow-rate characteristics of cooled profiles

20 p2963 A72-39923

Backscattering of desorbed gas molecules from spacecraft

23 p3284 A72-43618

Aircraft gas turbine engines environmental effects, considering thermal radiation, acoustic emissions and exhaust gases in relation to propulsion system design parameters

23 p3328 A72-44296

Linear theory of a solid propellant rocket motor with modulated exhaust

24 p3433 A72-45116

EXHAUST JETS

U EXHAUST GASES

EXHAUST NOZZLES

NT CONVERGENT-DIVERGENT NOZZLES

NT PLUG NOZZLES

NT TURBINE EXHAUST NOZZLES

Capacitive electret pressure sensors calibration for interior measurements in turbine engines, jets and exhaust nozzles

[ONERA, TP NO. 982] 09 p1310 A72-22815

Turbojet simulator for supersonic wind tunnel models, simulating inlet mass flow ratio and exhaust nozzle pressure ratio

[ASME PAPER 72-GT-89] 11 p1705 A72-25664

Solid propellant rocket engine thrust vector control by four movable exhaust nozzles, nozzle exit cone secondary injection and flexible bearing nozzle

13 p2026 A72-28928

Three dimensional supersonic nozzle exhaust flow field numerical analysis based on reference plane characteristics, deriving difference equations for three coordinate systems

[AIAA PAPER 72-704] 16 p2344 A72-34040

Effect on supersonic jet noise of nozzle plenum pressure fluctuations

17 p2597 A72-35243

Servo pump nozzle area controls for gas turbines

18 p2694 A72-36048

Nonlinear equations solutions for interior ballistics parameters of solid rocket propellants combustion during rocket engine nozzle opening

19 p2878 A72-37352

Erosion combustion effect on unsteady solid rocket propellant burning stability during engine nozzle opening, noting combustion velocity and surface temperature

19 p2879 A72-37353

Thrust stand for evaluation of thrust vectoring nozzle performance

[AIAA PAPER 72-1029] 24 p3389 A72-45406

EXHAUST SYSTEMS

Concorde engine performance, reviewing control, reheat and exhaust systems

[SAE PAPER 710775] 01 p0116 A72-10267

Shock wave propagation from channel in free space for various Mach numbers, using method of characteristics

02 p0202 A72-11590

Electrical analog simulation of internal combustion engines intake and exhaust systems nonstationary gas flow, considering cylinder, turbine and supercharger operation

13 p2027 A72-29136

EXHAUST VELOCITY

Fluorine-ammonia as high energy liquid bipropellant for rocket engines, presenting ground test results regarding velocity and specific impulse characteristics as functions of mixture ratio

01 p0114 A72-11220

Hydrogen resistojet design and testing with Re heat exchanges, noting appropriate power efficiency and exhaust velocity for synchronous communication satellites orbital transfer

[AIAA PAPER 72-449] 11 p1708 A72-26186

Electrothermal thruster supersonic convergent-divergent nozzle performance with lithium vapor propellant, predicting exhaust velocity by isentropic flow equations

[AIAA PAPER 72-453] 11 p1708 A72-26189

Capillary fed annular colloid thruster operating characteristics, considering I-V relationship, thrust and exhaust velocities and propulsive efficiency

[AIAA PAPER 72-490] 11 p1710 A72-26215

EXHAUSTION

Human performance and exhaustion predictive model from responses to exercise and environmental stresses, considering circulation, thermal regulation, work load and oxygen pressure effects

07 p0934 A72-20358

Sweating relation to body temperature after exhaustive exercise for various oxygen uptakes and ambient temperatures

14 p2079 A72-30702

EXISTENCE

One dimensional conductive and radiative heat transfer through gray medium bounded by two diffuse surfaces, noting solutions existence and uniqueness

09 p1412 A72-23586

EXISTENCE THEOREMS

Soviet book on theory of differential equations with deviating argument covering step methods, existence and uniqueness theorems, solutions stability, approximations, etc

02 p0252 A72-12124

Periodic solution existence for second order differential equation

03 p0382 A72-14250

Mass service process differential equations with losses, annihilation and multiplication processes, demonstrating unique solution existence

04 p0538 A72-14627

Distributed parameter control system optimal control problems, formulating existence with minimum norm technique

04 p0505 A72-14667

Isolated fixed points existence in area preserving mappings considered with normal form for periodic Hamiltonians in celestial mechanics

04 p0576 A72-15041

Shooting method and contraction mapping application to existence-uniqueness theorem derivation for numerical solution of second order delay differential equations boundary value problems

04 p0539 A72-15042

Implicit equations in nonlinear network analysis, deriving conditions for existence of unique solutions

04 p0540 A72-15695

Time optimal control of system with distributed moments, deriving conditions for existence of fast response solution

05 p0683 A72-17134

Incompressible micropolar fluid flow equations, deducing stable periodic solutions existence by energy method

06 p0799 A72-17917

Lens antennas for amplitude and phase transformations, examining existence of solutions and bounds in terms of parameters

07 p0985 A72-19404

Sufficient conditions definition for existence of solution for heat conduction equation coupling to telegrapher equation

07 p1028 A72-19897

Optimal strategies for decision chain with controllable connections and finite number of states and decisions, deriving existence theorem

07 p1028 A72-19904

Time independent incompressible micropolar fluid flow existence

07 p0970 A72-20082

Theorems for averaging of first order linear hyperbolic system with time lag, proving existence and uniqueness of solution to Cauchy problem

07 p1028 A72-20214

Radial gas bearing air lubrication theory, proving existence and uniqueness theorems for Reynolds equation periodic solution

07 p0998 A72-20473

Liapunov theorem for polynomial solution existence for first order inhomogeneous system of linear partial differential equations

08 p1205 A72-20958

Solutions existence for nonlinear invariant relation to integrodifferential equations of motion of solid body about fixed point

08 p1207 A72-21347

Solutions existence and uniqueness for linear invariant relation to gyrostat motion under nonholonomic constraint

08 p1208 A72-21362

Nonflat central configuration N point masses existence for any integer greater than four, disproving Wintner conjecture of finite number of integers

08 p1236 A72-21639

Boundary value problem for degenerate quasi-linear parabolic differential equation, showing solution existence and smoothness dependence on region width
09 p1342 A72-23485

Existence and uniqueness theorem for weak solution of clamped elastic plate equilibrium problem, using micropolar flat plate bending theory
10 p1555 A72-24202

Small cross section steady vortex rings existence in inviscid uniformly dense ideal fluid, deriving asymptotic formulas for rings shape and properties
10 p1467 A72-24333

Kinetic equations solution for homogeneous multiatomic gas relaxation, proving solution existence and uniqueness
10 p1516 A72-24629

Dynamic logic control systems theory based on axiomatic concepts of models, deriving conditions for existence and uniqueness of solution for differential logic equations
10 p1457 A72-24636

Universal mathematical model of n-complete atomic theory, obtaining existence criterion for prehomogeneous relation in relation age
10 p1506 A72-24851

Function space linear bounded phase coordinate control problems under regularity and normality conditions discussing solution existence and uniqueness conditions
11 p1608 A72-25322

Nonlinear differential equations cycle properties and frequency, using Leray-Schauder theorem for cycle existence proof
11 p1675 A72-25325

Sufficient conditions for existence, uniqueness and finite-dimensional approximation of solution to first order infinite-dimensional vector differential equation
11 p1676 A72-25357

Geometric interpretation of solution existence for nonlinear ordinary differential equations with linear and nonlinear boundary conditions, analyzing funnel of solutions
11 p1676 A72-25503

Boundary value problems in boundary layer theory, discussing Falkner-Skan equation similar solutions existence theorems
11 p1677 A72-25525

McShane belated stochastic integral existence theorem with quasi-martingale process for sample continuity assumption
11 p1678 A72-26156

Oscillation criteria for fourth order differential equation conjugate point location relationship in terms of existence of solution with two double zeros
11 p1678 A72-26159

Existence and uniqueness of general solutions of initial value problem for nonlinear Maxwell-Boltzmann equation with finite time interval
12 p1836 A72-27122

Two heat conducting phases free boundary problem with temperature distribution within phases, proving existence and uniqueness theorems
12 p1836 A72-27124

Variational problems in automatic control theory, presenting existence theorems for solution of boundary value problems for nonlinear differential equations with deviating argument
12 p1837 A72-27995

Uniqueness and existence theorems for nonideal thermal contact between three dimensional solid parts in heat conduction theory, noting case of two dimensional body
12 p1889 A72-27996

Regularizing time transformation for conservative systems reduction to normal coordinates, studying normal configurations existence in terms of Hamiltonian structural properties
13 p2002 A72-28714

Boundary value problem solution uniqueness relation to existence for nonlinear differential equations of arbitrary order satisfying solution compactness condition
15 p2263 A72-31753

Regge calculus representation existence for solutions of initial value problem for spaces with axial symmetry
16 p2422 A72-32879

Solution existence for singular boundary value problem involving swirling flow, corresponding to problem of axisymmetric flow above rotating disk
16 p2377 A72-33186

Heat equation kernel functions existence proof based on Harnack selection principle and inequality
16 p2476 A72-33187

Existence and uniqueness theorems for Cauchy problem solution for linear singular integrodifferential operator equation
16 p2417 A72-34010

Existence of multiple solutions for nonlinear elliptic boundary value problems.
17 p2575 A72-34936

Boundary value problems for second order, ordinary differential equations involving a parameter.
18 p2705 A72-36619

Existence theorems for dynamical systems admissible controls for avoidance of given set of state spaces, considering control process governed by ordinary differential equations
19 p2778 A72-37723

Investigation of the solution of a two-dimensional nonlinear Volterra integral equation
19 p2825 A72-38203

Approximate integration of a nonlinear system of differential equations with time lag
19 p2827 A72-38468

Three body problem second kind periodic orbit existence proof based on Weinstein theorem
19 p2867 A72-38553

Proof of existence theorems for the principal dynamic problems of thermoelasticity
20 p2978 A72-39317

Existence theorems in multidimensional problems of optimization with distributed and boundary controls.
21 p3074 A72-40548

Propagation rate and the existence range of turbulent flame
21 p3131 A72-41660

Differential equation solution existence in complete locally convex topological Hausdorff vector space defined by saturated seminorms
21 p3076 A72-41783

Navier-Stokes evolution inequality bounded solution existence and uniqueness theorems for two dimensional space
22 p3200 A72-43201

Existence and uniqueness theorems of elliptic equations with eigenfunction exponential decrease at infinity and 2m order self adjoint differential operator in n-dimensional Euclidean space
23 p3307 A72-43223

Sufficient condition formulation for Lure type nonlinear continuous control system exponential absolute stability
23 p3309 A72-43854

Nonlinear nonautonomous dynamic systems practical stability conditions for specified settling time, verifying constant matrix Hurwitz property
23 p3309 A72-43858

Linear inequalities and P matrices, with applications to stability of nonlinear systems.
23 p3309 A72-43859

A priori bounds and upper and lower solutions for nonlinear second-order boundary-value problems.
23 p3309 A72-43980

Multistage rocket optimal control, deriving conditions for existence of minimum of performance index function of mass, position and velocity initial and final values
23 p3343 A72-44264

Necessary conditions for steady state in radiation - Matter interaction and the role of entropy.
24 p3461 A72-44806

EXOBIOLOGY

Industrial and biological processing possibilities under weightless condition, considering crystal growth, metal processing, vaccine production and electrophoresis in space manufacturing
02 p0278 A72-11961

Life origin in space from point of hydrocarbons, cyanides, abiogenetic organic synthesis and probiotics evolution
04 p0467 A72-14752

Comet collisions in planetary nebulae as source of organic compounds in universe in preplanetary era, noting nucleic acid bases in carbonaceous meteorites
04 p0471 A72-14802

Extraterrestrial life on Mars and Venus and Jupiter atmospheres, discussing abiogenesis failures on life-supportable planets
04 p0471 A72-14805

Extraterrestrial life origin and evolution, estimating possibilities on Mars, Venus and Jupiter
04 p0471 A72-14806

Papers on exobiology theory and experiments, considering extraterrestrial organic compound detection, Jupiter atmosphere, porphyrins, radiation production of life molecules, etc
05 p0617 A72-16126

Porphyrin exobiology, discussing organic and random biosynthesis and extraterrestrial existence based on interstellar spectral evidence
05 p0617 A72-16130

Apollo 11 lunar samples carbon compound geochemical analysis, using sequential scheme with minimum handling of solids and extracts
05 p0714 A72-16131

Exobiology research objectives, discussing planetary exploration data on origin, nature and distribution of life, spacecraft contamination, manned and unmanned missions and specific mission targets
05 p0714 A72-16133

Papers on exobiology covering abiogenesis, extraterrestrial life, primordial organic chemistry, biochemical evolution electronic factors, membranes origin, molecular chirality, protein and cellular evolution, etc
08 p1119 A72-22001

Cosmic sources of organic compounds from chemical evolution viewpoint, discussing comets, interstellar space, prestellar nebulae and cool stellar atmospheres
08 p1120 A72-22014

Terrestrial life origin understanding by investigating life possibilities in nonterrestrial environments
08 p1120 A72-22015

Review of NASA Ames Research Center 1971 conference on interstellar molecules and origin of life
09 p1265 A72-22645

Mars biology likelihood from long winter model, suggesting north polar cap summer remnant vaporization as atmosphere, liquid water and greenhouse effect source
10 p1424 A72-23717

Biological experiments of Viking Mars lander 1975 mission regarding Oparin-Haldane evolution hypothesis
10 p1430 A72-24384

Biological experiments on plants, animals and bacteria aboard Zond 5, 6 and 7 space probes, noting flight conditions effect on physiological functions and hereditary structures
11 p1579 A72-25941

Environmental chamber simulation to show terrestrial microorganisms survival under Jovian atmospheric conditions
15 p2183 A72-31293

Spacecraft bacteria population resistance to simulated Jovian trapped radiation belt electrons and solar wind protons, noting dependence on isolate, dose and electron energy
15 p2186 A72-31993

Report to COSPAR on French space program covering ionospheric and magnetospheric physics, meteorology, earth resources and exobiology
15 p2337 A72-32003

Complex organic molecules in interstellar space, discussing molecular identification reliability, prebiological organic synthesis, interstellar and planetary biology and UV natural selection
18 p2657 A72-36620

Survival of common terrestrial microorganisms under simulated Jovian conditions.
19 p2755 A72-37721

Scientific problem resolution during Jupiter missions, discussing Pioneer probes, trapped particle belts, Red Spot, atmosphere, biological activity, internal heat sources and radio emission
19 p2864 A72-38381

Russian book - Problems of the stability of biological system.
20 p2891 A72-38957

Adaptability limits on protein-nuclein-water life under exobiological extremal conditions, considering macromolecules, extraterrestrial life search and origin
20 p2891 A72-38958

Thermodynamic properties and mathematical modeling of complex biological systems, considering energy and mass exchange in photosynthesizing organisms for exobiological life support
20 p2891 A72-38960

Life sciences and space research X; Proceedings of the Fourteenth Plenary Meeting, Seattle, Wash., June 21-July 2, 1971.
23 p3253 A72-43381

Development of planetary quarantine in the United States.
23 p3259 A72-43382

Biological instrumentation for the Viking 1975 mission to Mars.
23 p3259 A72-43396

An integrated multi-purpose biology instrument utilizing a single detector, the mass spectrometer.
23 p3287 A72-43397

Viking Mars exploration project, discussing orbiter and lander design and operational features and scientific experiments relevant to existence of life
24 p3440 A72-45123

Biological aspects of communications with extraterrestrial intelligence, discussing life existence possibility on wandering planets
24 p3372 A72-45127

EXOSPHERE

Positive H, HE and O ions in exosphere from mass spectrometers mounted on Elektron 4 satellite
01 p0053 A72-10368

Rotating and nonuniform planetary exosphere model, examining density profiles
04 p0579 A72-15333

Diffusion model applicability to lateral transport in terrestrial and lunar exospheres, using kinetic theory
07 p1056 A72-18902

Exosphere geocoronal hydrogen density, vertical structure and diurnal variability from Lyman spectra observational data, discussing polar wind origins
07 p0978 A72-20041

High energy charged particles angular distribution measurements in equatorial region cosmic radiation above atmosphere by Proton 2 satellite
08 p1226 A72-20799

Exospheric temperatures in hydrogen dominated planetary atmospheres for evaporative loss rates esti-

mation, noting two component diffusive equilibrium model

09 p1393 A72-23661

Thermosphere and lower exosphere density and temperature variations from satellite decay

11 p1621 A72-25843

Non-Maxwellian collisionless transport properties of neutral gas constituents in planetary exospheres, discussing ballistic particle and heat transport and escape fluxes

11 p1716 A72-25846

Semiannual exospheric temperature and density variations from satellite observation and ionosonde measurements

11 p1626 A72-26420

ATS F/G radio beacon experiments for study of exosphere and ionosphere integrated electron content, spatial structure and time dependent behavior

12 p1782 A72-27526

Number density, particle, momentum and energy fluxes in model ion-exosphere with open magnetic field and asymmetric Maxwellian velocity distribution

13 p1948 A72-29115

Satellite measurements of exospheric density variations during June 1968-December 1970 at 1070 and 900 km, discussing solar activity effect

13 p1952 A72-29803

Explorer 19 satellite drag evidence for neutral exosphere He concentration asymmetry between Northern and Southern Hemispheres over entire solar activity cycle

15 p2228 A72-31977

Exobase atomic hydrogen densities for zero ballistic net flux as function of temperature distribution, noting support of McAfee hypothesis by OGO-4 polar UV observations

16 p2384 A72-32979

A calculated hydrogen distribution in the exosphere.

22 p3168 A72-42004

EXOTHERMIC REACTIONS

Blast wave techniques for exothermic processes in relation to propulsion systems, using shock or detonation tubes, point explosions, reflected shocks and implosion vessels

[AD-737415] 01 p0117 A72-10939

Supersonic oxygen molecules nozzle beam reactive scattering on barium atoms, detailing exothermic reaction energy in barium oxide formation

02 p0170 A72-11912

Thermal theory of criticality for spontaneous explosion of exothermic reactant mass in bodies of arbitrary shape

03 p0457 A72-13972

Heat transfer from burning gas mixture flow to receiver wall, taking into account exothermal reactions due to catalytic effects

03 p0458 A72-14166

Plane symmetrical exothermic reaction center dynamic behavior, deriving system nonlinear transfer function-pressure pulse and unit mass heat release relationships

[AIAA PAPER 72-67] 05 p0750 A72-16934

Differential equations describing dynamic behavior of unsteady plane exothermic reaction front in gasless system

06 p0903 A72-18204

Bounds estimation for thermal explosion critical parameters for exothermic reaction, using geometric transformation

07 p1098 A72-19364

Exothermic capture processes with ionization during nonelastic ion atom collisions, discussing cross sections of He ion collisions with Ar, Kr and Xe atoms

08 p1210 A72-20837

Population inversion in exothermal decomposition reactions of multiatomic molecules for chemical and collision laser systems

13 p1912 A72-28778

Potential energy curves for exothermic reaction between oxygen cations and nitrogen molecules to form nitric oxide and atomic nitrogen

16 p2360 A72-32921

Intense emission from high pressure pulsed carbon dioxide chemical transfer laser by flash photolysis initiated deuterium-fluorine exothermic chain reactions

16 p2401 A72-33392

Energy distribution among reaction products. VI - F + H₂, D₂.

19 p2763 A72-38804

Induction period, particle size distribution and medium temperature effects on thermal ignition of metal particles under exothermal oxidation reaction on surface

20 p2987 A72-40040

Propagation of the front of an exothermic reaction in condensed mixtures whose components interact through a high-melting layer

22 p3245 A72-43177

A kinetic-theory description of a chemically reacting gas.

23 p3357 A72-44272

Propagation of blast waves in a combustible gas.

24 p3462 A72-45034

Periodicity in exothermic hypersonic flows about blunt projectiles.

24 p3463 A72-45035

EXPANDABLE STRUCTURES

NT BALLOONS

NT BEACON SATELLITES

NT BELLOWS

NT GAS BAGS

NT HIGH ALTITUDE BALLOONS

NT INFLATABLE STRUCTURES

NT METEOROLOGICAL BALLOONS

NT TETHERED BALLOONS

EXPANSION

NT GAS EXPANSION

NT KARHUNEN-LOEVE EXPANSION

NT PRANDTL-MEYER EXPANSION

NT THERMAL EXPANSION

Expansion formulas for Kampe de Fariet and radial wave functions application to heat conduction and quantum mechanics problems

15 p2336 A72-32398

Shear-layer flow regimes and wave instabilities and reattachment lengths downstream of an abrupt circular channel expansion.

[ASME PAPER 72-APM-2] 17 p2538 A72-34811

Simple analyses for the non-symmetric dynamic expansion of cylindrical cavities.

22 p3240 A72-42893

EXPANSION WAVES

U ELASTIC WAVES

EXPECTANCY HYPOTHESIS

Analog and digital computers for automatic statistical analysis of unsteady random process recorded data, calculating correlation functions and expectancy

13 p1925 A72-29165

Mathematical models for passenger aircraft market forecast, discussing stock measurement and life expectancies

13 p2067 A72-30125

Allowance for correlation in the prediction of reliability parameters for radio equipment

23 p3270 A72-43767

EXPECTATION

Cyclic phenomena periodicity by expected mean square deviation statistical analysis of observational data samples, using null hypothesis and unequally spaced sample intervals

04 p0574 A72-14908

Upper and lower bounds for expected value and variance of minimum material weight necessary for random resistance structure able to support assigned loads

04 p0593 A72-15648

Conditional expectation and integral of random closed convexity in probability space

06 p0839 A72-17555

Safety factor distribution function for plastic collapse of structure with random resistance members, discussing variance-expected value ratio

09 p1406 A72-23075

Expected value of two dimensional Gaussian random array gain, assuming two dimensional isotropic noise field of single frequency

11 p1604 A72-26040

Analysis of discrete automatic control systems with variable parameters by the method of orthogonal expansions. I, II

19 p2778 A72-37438

EXPERIMENTAL DESIGN

NT FACTORIAL DESIGN

High speed tensile impact test for polymers at large loading rate, describing equipment design and test technique

01 p0048 A72-10782

Laser satellite range measurement at Ondrejov astronomical observatory, describing radar system and experiment design

03 p0326 A72-14332

ALSEP passive seismic experiment design, discussing instrument operation and performance parameters

04 p0508 A72-15095

ALSEP active seismic experiment design, investigating lunar subsurface geologic structure

04 p0508 A72-15096

Submodel similarity relations in single indirect experiment design

08 p1257 A72-22176

ALSEP heat flow experiment design and calibration, presenting independent vertical temperature gradient and thermal conductivity measurements in regolith

12 p1869 A72-27331

Viking mission gas exchange experiment for life detection in Martian soil, covering design of experiment

14 p2084 A72-30876

Notch toughness criteria of metals with S shape transition temperature curve, considering experimental design and impact test model

16 p2406 A72-33322

Acoustic emission experiments design based on piezoelectric transducer, discussing signal detection and data acquisition methods

20 p2924 A72-39278

Optimal planning of an experiment in a study of the properties of Ti-V-Al alloys

20 p2942 A72-39825

Variation analysis and design of experiments as an aid to design quality assurance.

20 p2930 A72-39856

Kullback-Leibler information function and the sequential selection of experiments to discriminate among several linear models.

21 p3075 A72-41187

Experiment design - An organized approach to data collection.

22 p3245 A72-41935

Experimental design algorithm based on information quantity optimization, noting measuring instrumentation synthesis adaptable to operational conditions

23 p3292 A72-44463

Lifetime estimation, optimal experimental design and stress level severity prediction in parametric and nonparametric accelerated life tests

24 p3406 A72-44671

New space processing experiments for the Skylab missions.

24 p3407 A72-45125

Skylab project participation by students to stimulate interest in science and technology, giving winning experiment proposals

24 p3467 A72-45158

Mariner Mars 1971 adaptive mission planning for scientific objectives flexibility based on planetary features observed, discussing plan change implementation

24 p3444 A72-45439

Unmanned OAO spacecraft series and experiment packages, discussing space astronomy scientific achievements, mission plans and space shuttle role

24 p3453 A72-45535

HEAO satellite to carry instruments required in high energy astrophysics missions, discussing observational objectives, configuration and experiments

24 p3453 A72-45538

EXPIRATION

Plethysmographic and laryngoscopic investigation of glottis opening and airway resistance relation to lung volume during panting and continuous slow expiration

11 p1586 A72-26611

Inspiration, expiration and hand muscle control comparison in psychophysical category production method for human voluntary breathing regulation investigation

12 p1763 A72-27843

EXPIRED AIR

Gaseous nitrogen production in humans under steady-state conditions, relating expired nitrogen minute volume increase after protein consumption to possible gastrointestinal and metabolic effects

08 p1122 A72-20882

Four-parallel-compartment lung model for emptying pattern study, using expired nitrogen concentration data to calculate alveolar dilution ratio and emptying rate

14 p2079 A72-37003

Myth of nitrogen equality in respiration - Its history and implications.

19 p2758 A72-38708

Expired air as a source of spacecraft environment carbon monoxide contamination

24 p3375 A72-45120

EXPLODING CONDUCTOR CIRCUITS

U CIRCUITS

U EXPLODING WIRES

EXPLODING CONDUCTORS

U EXPLODING WIRES

EXPLODING WIRES

Exploding wire restriking mechanisms, discussing shock generation for arc channels

02 p0260 A72-12362

Emission spectra of exploding copper wires in air and vacuum in IR, UV, visible and vacuum UV regions

05 p0691 A72-16991

Hot wire ignitor modeling including measured H value and heat generation by explosive chemical reaction

08 p1219 A72-20754

Emergency escape from high performance military aircraft in flight and on ground, using explosive cord for transparent canopy material breakup

12 p1753 A72-27017

Emission spectra of exploding copper wires in air and vacuum in IR, UV, visible and vacuum UV regions

12 p1843 A72-27134

Supersonic dense low temperature plasma jet generation by pulse mode accelerator based on dielectric erosion and electrically exploded conductor

13 p2011 A72-29007

Helium use to minimize deflection of modulated laser beam in measurement of free surface motion of expanding annular cylinder loaded by exploding wire

13 p1960 A72-29765

- Hot wire and exploding bridgewire detonators, design characteristics, handling safety and hazard situations 16 p2442 A72-33358
- German monograph - Behavior of an electric arc produced by an exploding wire in a granular medium 19 p2834 A72-37483
- Neutron production in exploding-wire discharges. 21 p3089 A72-40338
- An arrangement for the holographic study of electrical explosions of wires 21 p3058 A72-41742

EXPLORATION

- NT LUNAR EXPLORATION
- NT OIL EXPLORATION
- NT SPACE EXPLORATION
- Type of equations for the solution of some gravitational prospecting problems from the anomalies on a complex relief, using a correlation model 23 p3285 A72-43847

EXPLORER SATELLITES

- NT RADIO ASTRONOMY EXPLORER SATELLITE

Earth bow shock nonuniform structure observation correlation with interplanetary field orientation, using Explorer 33 and 35 data 11 p1722 A72-26395

Explorer satellites and Pioneer space probes development program, discussing launching rockets, reentry tests, payloads, radio communication, Van Allen belts discovery, etc 23 p3358 A72-44353

Analysis of the Radio Astronomy Explorer lunar orbit mission. [AIAA PAPER 72-940] 24 p3444 A72-45437

EXPLORER 28 SATELLITE

Ephemeris of a highly eccentric orbit - Explorer 28. 20 p2968 A72-39194

EXPLORER 34 SATELLITE

Internal neutral sheet in geomagnetic tail from Explorer 34 magnetic field experiment, noting quasi-periodic structure and magnetic loop formation 06 p0803 A72-17450

Explorer 34 satellite orbit perturbation, noting earth gravitational tesseral harmonic effect on perigee passage time 24 p3399 A72-45557

EXPLORER 35 SATELLITE

Explorer 35 observations of solar wind electron density and temperature, noting anisotropy direction correlation with magnetic field vector alignment 11 p1713 A72-26392

EXPLORER 38 SATELLITE

RAE-1 measurements of lf radio phenomena in magnetosphere, solar corona and Galaxy, discussing design, calibration and performance 08 p1137 A72-21984

EXPLOSIONS

- NT AERIAL EXPLOSIONS
- NT CHEMICAL EXPLOSIONS
- NT GAS EXPLOSIONS
- NT NUCLEAR EXPLOSIONS
- NT THERMONUCLEAR EXPLOSIONS
- NT UNDERGROUND EXPLOSIONS

Explosion induced plane shock wave propagation in gas medium with exponential density distribution, determining gas flow behavior by difference approximation method 02 p0201 A72-11578

Thermal theory of criticality for spontaneous explosion of exothermic reactant mass in bodies of arbitrary shape 03 p0457 A72-13972

Repeated explosions mechanism in nuclei of galaxies and quasars due to instability in twisted magnetic fields, noting clouds and relativistic plasma ejection 05 p0717 A72-16379

High speed photography and radiography applications to high explosives research, discussing shock wave visualization, illumination techniques for rapid processes time resolution, etc 06 p0813 A72-17436

High intensity laser beams for solid surface material removal by vaporization and explosion, noting surface and subsurface temperature relations 07 p1002 A72-19210

Bounds estimation for thermal explosion critical parameters for exothermic reaction, using geometric transformation 07 p1098 A72-19364

Aerodynamic characteristics of hypersonic velocity meteor traveling in earth atmosphere and shock wave propagation generated by explosion in air and on ground 07 p1081 A72-20094

Pyrotechnic hazard classification for property and personnel protection in event of accidental explosion 08 p1220 A72-20768

Developing cumulus clouds annihilation, considering ascending and descending spontaneous convective streams initiated by explosions 12 p1841 A72-27989

Siberian Popigay river basin hollow as meteoritic explosion crater, discussing pseudovolcanic properties 13 p1947 A72-28754

Shock wave propagation produced by explosive detonation in contact with inert solid, considering spallation occurrence and prevention 16 p2469 A72-33356

Instrumentation for space-time correlated measurement of explosion induced dynamic effects, discussing framing cameras, flash X-ray systems, pin switches and piezoresistive gages 16 p2392 A72-33360

Critical conditions of thermal explosion in the presence of chemical and mechanical heat sources 19 p2879 A72-37357

Determination of the parameters of a fluid in the neighborhood of the junction of wavefronts by the Legras method 22 p3165 A72-41927

Simple analyses for the non-symmetric dynamic expansion of cylindrical cavities. 22 p3240 A72-42893

Developing cumulus clouds annihilation, considering ascending and descending spontaneous convective streams initiated by explosions 22 p3202 A72-43003

Small disturbances propagation effect on self similar flow due to point explosion in medium with density varying according to distance from center 24 p3390 A72-44786

Electrical discharge-produced explosions aboard supertankers during cleaning operation and electrostatic charging of supersonic aircraft during passage through heavy rain, noting water drop disintegration 24 p3368 A72-44979

International Colloquium on Gasdynamics of Explosions and Reactive Systems, 3rd, Marseille, France, September 12-17, 1971, Proceedings. 24 p3461 A72-45016

Gas dynamics of the flight and explosion of meteorites. 24 p3439 A72-45020

EXPLOSIVE DECOMPRESSION

Medical and physiological hazards for SST passengers and crews, discussing cumulative cosmic radiation and high altitude decompression risks 11 p1583 A72-25816

Case report of rapid decompression in supersonic trainer aircraft pressurized cabin, discussing physical and blast effects, pressurization safety, decompression sickness and hypoxia 11 p1584 A72-26020

Influence of prolonged starvation on the frequency of occurrence of decompression-induced pulmonary hemorrhage. 17 p2508 A72-34545

Explosive instability temporal development, noting linear damping role in nonlinear wave interaction under conservation laws of energy and momentum 23 p3282 A72-44318

EXPLOSIVE DEVICES

- NT BOOSTERS [EXPLOSIVES]
- NT DETONATORS
- NT INITIATORS [EXPLOSIVES]
- NT PRIMERS [EXPLOSIVES]
- NT SHAPED CHARGES
- Lunar seismic profiling experiment, describing explosives package, electronics and SAFE/ARM assembly 04 p0509 A72-15104

Computerized numerical nodal analysis of heat transfer away from bridgewire of electroexplosive device to meet all- and no-fire requirements 08 p1219 A72-20761

Long life aerospace explosive components, examining material degradation mechanisms and effects of pressure, temperature, moisture, chemical reactions and impurities 08 p1219 A72-20761

Fast rise high current constant trigger circuit for electroexplosive devices, using flat two-conductor transmission line to minimize inherent inductance 08 p1219 A72-20761

Aerospace type electroexplosive devices gross sensitivity to short damped rf energy burst 08 p1220 A72-20765

Missile destruct systems explosive transmission line manifolds, discussing designs for high reliability under severe environmental conditions 08 p1221 A72-20782

Blast and detonation wave phenomena applications in war and peace, discussing hypervelocity launchers, shock tubes and explosive weapons 08 p1146 A72-21014

Electroexplosive devices firing energy parameters determination by capacitor discharge system providing exponential pulses terminated at adjustable width 14 p2143 A72-30200

Low-explosive actuated mechanical devices to actuate switches and valves, sever cables or bolts, dispensing fluids, inflating bags or starting engines 16 p2442 A72-33359

Aerospace vehicle explosive components initiation, separation and destruct systems 16 p2443 A72-33361

EXPLOSIVE FORMING

High energy rate compacting methods in powder metallurgy, considering use of high explosives in water or air and impulse pressing of metal powders 02 p0233 A72-11438

Explosive loading effect on Cr-Ni stainless steel structure with electron microscope study of gamma, alpha and epsilon phases 08 p1187 A72-21780

Explosive compaction of metal powders by direct method with emphasis on W 11 p1643 A72-26833

Testing method for materials exposed to explosive forming, noting applications in study of formability, heat treatment effects and crack initiation 16 p2391 A72-33235

Liquid and solid explosives detonation, initiation and shock interaction with inert materials for precision work 16 p2476 A72-33352

Technical and economic aspects of explosive metal fabrication, considering requirements for close tolerances, nonsymmetrical shapes, large size workpieces and unusual material properties 16 p2398 A72-33354

Explosive charge design to drive metal by detonation in terms of impulse, acceleration and final velocity, using Gurney model 16 p2398 A72-33355

Material thinout in deformed metal sheet specimens under explosive forming, using air cell effect 16 p2399 A72-33775

Al powder bonding during compaction by explosively driven plates, measuring shock wave amplitudes, pressure drop, layer separation and critical pressures in spall plane 22 p3184 A72-43183

Electron diffusion across a shock wavefront in metals 22 p3208 A72-43184

Non-steady shock waves in metals with phase transitions and hardening by explosion. 24 p3414 A72-45025

EXPLOSIVE WELDING

Bond zone wave formation in explosion cladding, predicting critical collision velocity and angle with fluid flow model 01 p0077 A72-11031

Electrical resistance and thermal joint conductance measurements at perfect contact interfaces from electroplating, soldering and explosive bonding [AIAA PAPER 72-19] 05 p0666 A72-16859

Bond zones morphology and composition in Invar-based explosive welds, using metallographic and electron microprobe techniques 06 p0820 A72-17707

Metals toughness under impact loading from explosive welding process, using optical metallographic techniques 06 p0822 A72-18214

Explosive welding of heat exchanger tubes and detonation produced compressive joining of cables as applications of explosive metalworking procedures 07 p0994 A72-18931

Al alloys welding with Pb sheathed linear ribbon RDX explosives by parallel plate process, achieving high weld strength 08 p1173 A72-20779

Thermal behavior of explosively welded metals, describing test facility for temperature measurements of joints 09 p1319 A72-22891

Magnetic-explosive welding /magneweld/ process using capacitor discharge through wire coil, noting sintered Al powder and Zircaloy 2 applications 09 p1321 A72-23638

Bonding conditions effects on wave mode formed at explosive bonded interfaces from experiments with bullets fired at thin metal targets 09 p1321 A72-23642

Mechanical properties and residual stresses in and adjacent to interface of explosively welded Al-Zn-Mg alloy with steel, noting microcracks effect on weld strength 15 p2257 A72-32111

Slurry explosives for metal cladding, discussing applications to pipe joints, bearing sleeves, recoil rods, gun barrels and cylinder liners 16 p2398 A72-33357

Thermal effects in the seam area during impact welding 19 p2809 A72-38461

Fabricating aluminum matrix composites. I - A survey of aluminum matrix composites. 22 p3182 A72-41996

EXPLOSIVES

- NT CELLULOSE NITRATE
- NT RDX
- NT TETRYL
- NT TRINITROTOLUENE

- Active ingredient oxidizing potential and pressure effects on burning rate of explosive substances
02 p0302 A72-12292
- Confined small diameter PETN, RDX and tetryl columns longitudinal detonations, using focused Q switched ruby laser
03 p0367 A72-13604
- Cumulative jet formation in elliptical cavity, investigating effect on liquid explosives ignition
06 p0799 A72-17909
- Explosives and pyrotechnics - Conference, Philadelphia, September 1971
08 p1218 A72-20751
- Loading current density effect on normal lead stypnate ignition in primary explosive hot wire initiation, using capacitor discharge and constant current activation signals
08 p1218 A72-20752
- Hot wire ignitor modeling including measured H value and heat generation by explosive chemical reaction
08 p1219 A72-20754
- Explosive/pyrotechnics performance monitoring for acceptance, lot qualification, comparison testing and system design guidelines
08 p1219 A72-20760
- Aerospace explosive components accelerated storage life and stability tests, basing method on Arrhenius reaction rate equation modification
08 p1220 A72-20762
- High neutron absorption doping material selection for enhancing explosive mixtures neutron radiographic image without interference with chemical reaction
08 p1220 A72-20769
- Direct detonation of insensitive PETN, RDX and tetryl explosives with Q switched ruby laser radiation
08 p1220 A72-20771
- Explosives injection molding into stainless steel, aluminum, plastic and rubber tubes, considering applications to fuse and detonation transfer trains and small warheads
08 p1221 A72-20781
- Simple composite propellant modelled by ammonium perchlorate-wax mixtures, noting stoichiometric composition effects on explosive properties
09 p1373 A72-23142
- Active ingredient oxidizing potential and pressure effects on burning rate of explosive substances
10 p1561 A72-23767
- One dimensional blast wave theory for trajectory analysis of shocks driven by solid explosives in linear shock tubes
14 p2093 A72-30179
- Rocket propellants, propulsive charges and explosives lifetime - Conference, Karlsruhe, Germany, September-October 1971
14 p2143 A72-30751
- Explosives life limitation due to aging phenomena, discussing chemical and physical processes and environmental effects
14 p2143 A72-30752
- Polyester bonded explosives mechanical and thermal properties, noting need for desensitizing against shock and friction effects
14 p2145 A72-30768
- Explosives in engineering design - Conference, University of New Mexico, Albuquerque, March 1972
16 p2398 A72-33351
- Liquid and solid explosives detonation, initiation and shock interaction with inert materials for precision work
16 p2476 A72-33352
- Initiation mechanisms for explosive materials and experiments for hazard evaluation, discussing subdetonation reactions and mathematical models of explosive processes
16 p2442 A72-33353
- A computation method for the determination of thermodynamic values and performance data of rocket propellants, propellant charges for cannons, and ignition mixtures
17 p2596 A72-35418
- Ignition, unsteady burning and flame collapse of a unitary fuel particle
19 p2882 A72-38453
- Burning rates of organic perchlorates of aliphatic, aromatic and heterocyclic amines and amidines with explosive compounds containing nitrogen dioxide group as oxidizer
22 p3153 A72-43181
- Condensed liquid explosive detonation pressure from free surface velocity measurement, noting pressure curve dependence on charge diameter and wall thickness
24 p3463 A72-45036
- Crack growth dependence on applied high stress level cycle number, showing fatigue life inversely proportional to stress exponential function
05 p0673 A72-16304
- Exponential conduction increase of semiconductors in strong magnetic fields, determining three dimensional random network resistance with percolation theory
07 p1047 A72-18918
- Integrodifferential equation exponential solutions for body motion about fixed point
08 p1208 A72-21353
- Orthonormalized exponential functions use in hydrometeorology
08 p1202 A72-22119
- Exponential signal reconstruction sampling rate restriction derivation based on pole-zero cancellations in Z transform
16 p2365 A72-33756
- Automatic computation of exponentials, logarithms, ratios and square roots.
18 p2705 A72-37021
- Exponential conduction increase of semiconductors in strong magnetic fields, determining three dimensional random network resistance with percolation theory
20 p2960 A72-39384
- Existence and uniqueness theorems of elliptic equations with eigenfunction exponential decrease at infinity and 2m order self adjoint differential operator in n-dimensional Euclidean space
23 p3307 A72-43223
- Exponential type equation for carbon steel stretched sample necking profile curve
23 p3348 A72-43753
- Regulator vector selection algorithm for largest estimate of exponential absolute control stability region based on Popov frequency condition reformulation
23 p3276 A72-43853
- Sufficient condition formulation for Lure type non-linear continuous control system exponential absolute stability
23 p3309 A72-43854
- The automatic computation of exponentials, logarithms, ratios, and square roots.
24 p3383 A72-45668
- EXPORTS**
U INTERNATIONAL TRADE
- EXPLOSURE**
Aircrews tolerance to cold water and life raft exposure, discussing prediction model based on thermal insulation effectiveness, assumed metabolism and body surface area and mass
10 p1428 A72-23734
- Exposure conditions and film processing parameters effects on sensitivity, diffraction efficiency and SNR of holograms recorded with continuous and pulsed radiation sources
11 p1637 A72-26796
- Holographic recording systems stabilization with intermittent exposure control for interference patterns fidelity
12 p1806 A72-27263
- Optical feedback exposure control mechanism of high resolution CRT film recorder intended for tactical military usage
12 p1810 A72-27932
- Aerial survey camera with automatic exposure control, discussing film emulsions sensitivity characteristics, object light intensity range and measuring methods
14 p2105 A72-30839
- EXPRESSIONS [MATHEMATICS]**
U FORMULAS [MATHEMATICS]
- EXPULSION BLADDERS**
Life prediction of expulsion bladders through fatigue test and fold strain analysis.
24 p3455 A72-44672
- EXTARS**
X ray stars atmospheric ionization effects by vlf phase tracking relative to Omega navigation accuracy, diurnal shift variations and astrophysical data
04 p0486 A72-14877
- Cyg X-1 type X ray sources evolution, discussing white dwarf and supernovae stages, parent mass and angular momentum
04 p0568 A72-15508
- X ray pulsations mechanism in Cyg X-1 related to high magnetic fields produced by flare-like events
06 p0873 A72-17636
- X ray pulsar observed near Crab Nebula by balloon-borne telescope, discussing identification with NP 0527 or NP 0532
07 p1070 A72-19122
- GX3 plus 1 identification by sounding rocket during lunar occultations, discussing magnitude
07 p1070 A72-19123
- Cen X-3 model with X ray emission from atmosphere heated by shock waves generated by surface pulsations of white dwarf
10 p1544 A72-24668
- High density models for ambient gas of eta Carinae star from X ray observations
10 p1530 A72-24947
- Bright stars X Per and HD 77581 as candidates for X ray sources 2U 0352plus30 and 2U 0900minus40 respectively
13 p2041 A72-29413
- White dwarf background radiation and optical emission variations due to thermal bremsstrahlung from stellar coronae
14 p2147 A72-30554
- X ray emitting component Centaurus X-3 mass limit in close eclipsing binary system with regard to Roche lobe principle
14 p2156 A72-30569
- Low mass neutron star source of pulsed X radiation in binary Centaurus X-3 ejected during low energy supernova explosion
14 p2156 A72-30570
- Variable circular polarization of X ray star SCO X-1 optical radiation due to Thomson scattering in magnetoeactive plasma shell
15 p2304 A72-31328
- Emission line star WRA 795 as optical counterpart of Cen X-3 occulting binary system
16 p2456 A72-33474
- Uhuru satellite data on periodic pulsating X ray source in Hercules, interpreting intensity variations as occulting binary star system effect
16 p2446 A72-33475
- Stellar X ray emission flux calculation for UV Ceti flares, using similarities between solar and stellar flares
16 p2450 A72-34161
- X ray flux anomalous minima observations in Cen X-3 with rocket-borne argon-methane proportional counter
16 p2461 A72-34162
- Pulsating X ray sources with 1 sec periods as stars with central densities between neutron stars and white dwarfs
17 p2599 A72-35074
- Soft X-rays from Cygnus X-2 and from Cygnus X-1 /in eclipse/.
17 p2600 A72-35297
- Radio detection of Cygnus X-3.
17 p2612 A72-35366
- Radio observations of Cygnus X-3.
17 p2612 A72-35367
- X ray spectrum analysis of Sco X-1 type sources, showing plasma sheath with high electron temperature
17 p2617 A72-35727
- Observation of a hard X-ray flare in Cyg X-1.
18 p2721 A72-36649
- The primary spectrum of the eclipsing binary LR Centauri.
19 p2856 A72-37505
- On the optical search for Centaurus X-3.
19 p2856 A72-37506
- The association of X-ray sources with bright stars.
19 p2856 A72-37507
- Eclipsing and spectroscopic binary beta Persei radio star, suggesting X ray source nature
19 p2851 A72-37889
- Interferometer detection of radio sources near pulsating extar Hercules X-1 during low X ray luminosity period
20 p2963 A72-38918
- Search for high frequency optical variability in X-ray sources.
21 p3100 A72-40685
- Accretion disc models for compact X-ray sources.
24 p3435 A72-44828
- A further high-resolution search for Fe XXV line emission from Scorpius X-1.
24 p3438 A72-44838
- Transfer effects on X-ray lines in optically thick celestial sources.
24 p3435 A72-44843
- Centaurus X-3 - Possible reactivation of an old neutron star by mass exchange in a close binary.
24 p3439 A72-44976
- EXTENSOMETERS**
Eddy current extensometer for monitoring long term creep in diameter of pressurized tubular stainless steel specimens
11 p1613 A72-25821
- Continuous volume-temperature dilatometer measurement of small liquid samples in biological application
13 p1959 A72-29752
- A ten-inch extensometer measuring small low-frequency strains.
21 p3052 A72-40234
- EXTERNAL STORES**
Weapon firing and external store separation tests by flight test methods for determining safe weapon release envelope
06 p0759 A72-18499
- Simulator for physical forces experienced by carrier aircraft during catapult launches and arrested landings, considering external stores safe suspension
15 p2215 A72-32620
- Aerodynamic interference between aircraft components - Illustration of the possibility for prediction. [ICAS PAPER 72-49]
21 p2992 A72-41174

The application of non-planar lifting surface theory to the calculation of external-store loads. [AIAA PAPER 72-971] 22 p3135 A72-42340

EXTINCTION

NT INTERSTELLAR EXTINCTION

Double 45 degree z cut KD P electro-optic Q switch simulation with programmable desk top computer, deriving extinction ratio dependence plot graphs 02 p0224 A72-11746

Spherical scatterers extinction efficiency effect on photometer optical systems transmittances, using Mie equation and numerical methods 07 p0987 A72-19831

EXTINGUISHERS

U FIRE EXTINGUISHERS

EXTINGUISHING

Flame quenching limits in narrow channels, considering effect of gas expansion during combustion on flame arresters use possibility 07 p1099 A72-19369

EXTRACTION

NT ION EXTRACTION

NT SOLVENT EXTRACTION

Slag powdery material moisture content determination by absolute pyridine adsorption method of moisture extraction 12 p1813 A72-27450

Heat resistant alloys conjugate phases extraction, separation and chemical analysis, discussing control of minor phases as precipitation products 13 p1978 A72-29443

EXTRAGALACTIC LIGHT

U EXTRATERRESTRIAL RADIATION

U LIGHT [VISIBLE RADIATION]

EXTRAGALACTIC MEDIA

U INTERGALACTIC MEDIA

EXTRAGALACTIC RADIO SOURCES

NT RADIO GALAXIES

Flux density variations incidence among extragalactic sources found by 3.8 cm sky survey 13 p2048 A72-29830

Electromagnetic emission in universe, discussing background radiation spectrum, extragalactic source brightness, intergalactic gas and energy density 14 p2152 A72-30479

Radio maps of extragalactic sources at 2.7 and 5.0 GHz presented with physical data for various components 16 p2458 A72-33718

Compact extragalactic nonthermal sources. 17 p2604 A72-34519

Decametric radio identification of an extragalactic X-ray source. 17 p2604 A72-34520

Interpretation of rotation measures of radio sources. 17 p2606 A72-34573

Extragalactic radio source 3C 1202 microwave flux density variations suggesting superrelativistic expansion 17 p2611 A72-35295

Cosmological models interpretation of extragalactic radio source counts 17 p2612 A72-35350

Flux densities, positions, and structures for a complete sample of intense radio sources at 1400 MHz. 21 p3105 A72-40575

Statistical studies of the evolution of extra-galactic radio sources. I, II, & III. 21 p3105 A72-41026

Extragalactic object categorization according to IR luminosities, considering radiation mechanism models and IR spectra relation to radio spectrum 22 p3228 A72-42571

Interpretation of rotation measures of radio sources. II. 23 p3337 A72-43828

Energy sources for extragalactic explosive phenomena in galactic nuclei and quasars, considering gravitation and double radio sources 24 p3439 A72-45018

Observation of M 82 in the near infrared 24 p3446 A72-45487

EXTRAPOLATION

Larson-Miller parameter application to N6 base alloys creep rupture data, discussing extrapolation method limitations 01 p0084 A72-10748

Survey and bibliography of extrapolation processes in numerical analysis based on polynomial or rational functions 02 p0252 A72-11546

Geomagnetic field extrapolated spherical data for years 1600 to 1800 from declination and inclination analysis, giving Gaussian coefficients and errors 02 p0218 A72-11953

Creep rupture test program for Al alloys, circumventing parametric methods limitations by extrapolation procedure with graphical extension of isostress curves 03 p0378 A72-14174

Ni alloy stress rupture data correlation and extrapolation from computerized evaluations of time-temperature parameters relative abilities [ASME PAPER 71-WA/MET-4] 05 p0670 A72-15905

Error covariance matrix evaluation at end of orbit extrapolation in terms of state vectors at measurement, discussing computation and interpretation 05 p0720 A72-16753

Wide angle lenses off-axis modulation transfer function measurement, explaining extrapolation method with MTF and conversion diagrams 06 p0813 A72-17439

Optimal control of lumped and distributed parameter systems with time lag, considering approach with extrapolator insertion and suboptimal solution based on system dynamic equation 07 p0962 A72-19718

Filtration and extrapolation of multivariable random processes described by linear differential equations system, examining adaptive filter synthesis 09 p1283 A72-23436

Individual melts stress rupture strength extrapolation based on limited number of tests, comparing results with parametric method 12 p1831 A72-28231

Geomagnetic field extrapolated spherical data for years 1600 to 1800 from declination and inclination analysis, giving Gaussian coefficients and errors 13 p1949 A72-29265

Filtration and extrapolation of multidimensional random processes described by linear differential equations system, examining adaptive filter synthesis 19 p2770 A72-38519

Prediction displays based on the extrapolation method. 21 p3010 A72-41409

Heat resistant steels long time strength determination by graph-analytical time-temperature extrapolation 23 p3301 A72-43739

EXTRASENSORY PERCEPTION

Exploratory test of extrasensory perception to identify random order of symbols in space during Apollo 14 flight with four subjects on earth 04 p0565 A72-14888

EXTRASOLAR PLANETS

Extraterrestrial life and civilization possibility in other planetary systems in universe, suggesting communication by hydrogen line frequency low harmonics 02 p0276 A72-11642

Extrasolar planets UVB color indices calculation, noting relative reflectivity and primary star color 04 p0570 A72-14507

Pulsar planetary systems observation from perturbation of pulse arrival time 05 p0712 A72-15771

Distant stellar satellites existence possibility based on maximum distance estimation for material particle motion stability with respect to sun or another star 08 p1231 A72-21133

NT PLANETARY ENVIRONMENTS

NT SOLAR ATMOSPHERE

NT STELLAR ATMOSPHERES

Porphyin exobiology, discussing organic and random biosynthesis and extraterrestrial existence based on interstellar spectral evidence 05 p0617 A72-16130

Extraterrestrial environment utilization, describing space power plants, manufacturing operations in earth orbit and planetary mineral resources 12 p1871 A72-27625

Space technological advance effects on human extraterrestrial, scientific, economic and sociological progresses 19 p2867 A72-38545

EXTRATERRESTRIAL LIFE

Molecular processes in interstellar space and life origin, discussing radio astronomy observations, catalytic action and hydroxyl radicals in galaxies 01 p0128 A72-10398

Terrestrial biosphere back contamination from outer space organisms, discussing microbiologic control and prevention requirements 01 p0020 A72-10825

Mariner 1969 Mars mission, emphasizing planetary encounter, surface and atmospheric data and search for extraterrestrial life 01 p0130 A72-10930

Extraterrestrial life and civilization possibility in other planetary systems in universe, suggesting communication by hydrogen line frequency low harmonics 02 p0276 A72-11642

Extraterrestrial life on Mars and Venus and Jupiter atmospheres, discussing abiogenesis failures on life-supportable planets 04 p0471 A72-14805

Extraterrestrial life origin and evolution, estimating possibilities on Mars, Venus and Jupiter 04 p0471 A72-14806

Astrogenic and planetogenic environments characteristics examination for stellar spectral classes effect on intelligent life evolutionary pace and existence probability 04 p0573 A72-14887

Ti leaching from granitic rocks by Penicillium, simplicissimum, discussing extraterrestrial life detection 05 p0616 A72-15809

Papers on exobiology theory and experiments, considering extraterrestrial organic compound detection, Jupiter atmosphere, porphyrins, radiation production of life molecules, etc 05 p0617 A72-16126

Papers on exobiology covering abiogenesis, extraterrestrial life, primordial organic chemistry, biochemical evolution electronic factors, membranes origin, molecular chirality, protein and cellular evolution, etc 08 p1119 A72-22001

Extraterrestrial life origin and development possibilities from earth chemical and biological evolution description, noting external conditions requirements 08 p1119 A72-22002

Terrestrial life origin understanding by investigating life possibilities in nonterrestrial environments 08 p1120 A72-22015

Life beyond solar system, discussing planetary formation and prebiological organic chemistry developments and interstellar communication 08 p1120 A72-22016

Extraterrestrial abiogenic organic hollow spheres of Orgueil meteorite evaluated according to intrinsic and extrinsic criteria 09 p1385 A72-22640

Book on astronomy and cosmology covering big bang, steady state and oscillating universe theories, radio sources, galaxies, interstellar meteor relativity and extraterrestrial life 09 p1389 A72-23248

Life detection on earth from satellite 100 meter resolution photographs, discussing potential false positives and implications for Mars probes 10 p1471 A72-23718

Viking Mars 1975 mission with spacecraft orbiters and landers, describing experiments with emphasis on life detection 10 p1539 A72-24376

Biological experiments of Viking Mars lander 1975 mission regarding Oparin-Haldane evolution hypothesis 10 p1430 A72-24384

Viking Lander carbon 14 assimilation experiment for life detection in Martian soils 10 p1540 A72-24385

Viking Lander detection of metabolically produced radioactive labeled gas in Mars surface samples 10 p1540 A72-24386

Viking Lander light scattering experiment to detect microbial growth from aqueous turbidity changes in contact with Martian soil 10 p1430 A72-24387

Antarctica dry valley microbiology investigation for Martian life model 12 p1802 A72-27258

Life on Mars, investigating ground based and probe observations of atmospheric composition and pressure, surface temperature and features and UV radiation 12 p1761 A72-27624

Mars 1975 Viking mission profile, describing soft landing/orbiter probes and life detection experiments 12 p1877 A72-27687

Viking orbiter/lander spacecraft instrumentation for Mars soil biological life experiments, discussing pyrolytic and labeled release, light scattering and gas exchange techniques 13 p1956 A72-29024

Extraterrestrial life search, noting radio contact with civilizations, bioastronautics, Martian conditions and physicochemical parameters 14 p2076 A72-30694

Viking mission gas exchange experiment for life detection in Martian soil, covering design of experiment 14 p2084 A72-30876

Extrasolar civilization search via possibly used electromagnetic signal types, discussing frequency and time domains 15 p2302 A72-31292

Environmental chamber simulation to show terrestrial microorganisms survival under Jovian atmospheric conditions 15 p2183 A72-31293

Book on stellar astronomy covering H-R diagram, solar system, nuclear energy sources, Milky Way Galaxy, quasars, cosmology, planetology, etc 16 p2453 A72-33275

Soviet book on extraterrestrial civilizations and problems of interstellar communication 19 p2868 A72-38674

- Adaptability limits on protein-nuclein-water life under exobiological extremal conditions, considering macromolecules, extraterrestrial life search and origin 20 p2891 A72-38958
- Thermodynamic properties and mathematical modeling of complex biological systems, considering energy and mass exchange in photosynthesizing organisms for exobiological life support 20 p2891 A72-38960
- An integrated multi-purpose biology instrument utilizing a single detector, the mass spectrometer. 23 p3287 A72-43397
- Biological aspects of communications with extraterrestrial intelligence, discussing life existence possibility on wandering planets 24 p3372 A72-45127
- State of the art in the detection of intelligent extraterrestrial signals. 24 p3441 A72-45190
- Linguistic message decoding algorithms for communication with extraterrestrial intelligences, considering unified procedure and key problems solutions 24 p3382 A72-45226

- Magnetic fluctuations in elf and vlf waves in space, discussing whistler phenomena and applications to magnetospheric probes 08 p1158 A72-21189
- Spectral indices of extragalactic radio sources at 1.4 GHz independent on flux density 10 p1545 A72-24807
- Optical and physical properties and energy content of extragalactic radio sources, discussing radio galaxies and quasars 10 p1547 A72-24941
- F 2 layer spread reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease 19 p2791 A72-38366
- EXTRATERRESTRIAL RESOURCES**
- Lunar mineral resources from analyses of moon samples, discussing solar cell and vacuum process manufacturing 05 p0722 A72-17099
- United Nations proposals concerning legal principles for use of natural resources of celestial bodies and ocean floor 07 p1103 A72-19464
- Extraterrestrial environment utilization, describing space power plants, manufacturing operations in earth orbit and planetary mineral resources 12 p1871 A72-27625
- Implications of new transport vehicles and cost analysis of supplying and maintaining a manned lunar laboratory. 24 p3441 A72-45209
- EXTRATERRESTRIAL ROVING VEHICLES**
- U ROVING VEHICLES
- EXTRAVEHICULAR ACTIVITY**
- Apollo 15 mission report, discussing lunar module powered descent, surface exploration with LRV, scientific instrument module, extravehicular activity, etc 08 p1230 A72-21007
- Extravehicular life support systems for shuttle, space station, lunar base and Mars missions, considering thermal control, carbon dioxide control and oxygen supply subsystems 10 p1430 A72-24441
- [AIAA PAPER 72-231]
- Electrostatic adhesive devices for zero-g intra/extravehicular activities, noting applications to astronaut and cargo maneuvering, worksite restraint, tool and equipment tiedown, etc 10 p1431 A72-24650
- Calculation procedures for some parameters of space suit gas medium supply systems 21 p3006 A72-40449
- EXTREMA**
- U RANGE [EXTREMES]
- EXTREMELY HIGH FREQUENCIES**
- Phase stable locked local oscillators for K band radiometers for long baseline interferometric measurements, emphasizing construction technique 01 p0044 A72-11307
- Millimeter wave and laser space-to-space communication links comparison, considering ehf system based on size, weight, power consumption and communication parameters calculations 04 p0493 A72-15609
- K band Gunn oscillator with high frequency stability, discussing construction, performance, output power and frequency saturation effect 06 p0786 A72-18375
- GaAs IMPATT diodes technology and performance at C, X and K band frequencies 06 p0788 A72-18466
- K beta emission spectrum of metallic Cr, discussing structural X ray analysis revealed cubic structure 14 p2116 A72-30414
- Focusing properties and efficiency of EHF waveguide lens with Al honeycomb as guiding medium, noting design considerations and performance test results 17 p2525 A72-34368
- K-band high power single-tuned IMPATT oscillator stabilized by hybrid-coupled cavities. 19 p2771 A72-37263
- EXTREMELY LOW FREQUENCIES**
- Magnetic storm strength ELF electromagnetic field effects on rabbits, dogs and bacteria, discussing changes in EEG, ECG and blood characteristics 12 p1763 A72-28214
- ELF and VLF waves propagation, deriving ionospheric field stable solutions by modified matrix multiplication technique for vertical geomagnetic field and large local refractivity 13 p1921 A72-29337
- Characteristic features of ELF-noise spectra during the excitation of the earth-ionosphere resonator by cosmic sources 18 p2662 A72-36861
- EXTREMELY LOW RADIO FREQUENCIES**
- Sudden enhancement and decrease of elf atmospherics, investigating diurnal variations for frequencies 03 p0321 A72-13090
- Magnetic field effect on elf radio wave attenuation during propagation under six ionospheres, showing dependence of minimum on propagation path geomagnetic latitude 08 p1131 A72-21103
- OGO 4 satellite observed band limited ELF hiss characteristics explanation by model based on generation at large wave normal angle in equatorial region 09 p1279 A72-23008
- Laboratory simulation of VLF/ELF radio waves transpolar ionospheric propagation, taking into account polar cap absorption 09 p1279 A72-23016
- ELF wideband noise receiver for atmospherics waveshape magnetic tape recording, computer processing and system simulation 12 p1791 A72-27637
- ELF wave propagation velocities in earth-ionosphere waveguide, studying fast and slow modes 12 p1784 A72-27789
- Quasi-static and full wave calculation of VLF/ELF input impedance of arbitrarily oriented loop antenna in cold collisionless multicomponent magnetoplasma 13 p2009 A72-28542
- Worldwide thunderstorm activity model selection from Schumann resonance observations, using ELF

noise measurements in lowest earth-ionosphere cavity modes

13 p1988 A72-28600

Low energy auroral electron precipitation associated ELF noise band observation by polar-orbiting satellite INJUN 5

17 p2517 A72-35593

Numerical solution to the problem of propagation of ELF electromagnetic waves in the lower ionosphere

19 p2767 A72-38651

A satellite survey of vector electric fields in the ionosphere at frequencies of 10 to 500 hertz. II - The electric component of ELF hiss.

19 p2768 A72-38743

A satellite survey of vector electric fields in the ionosphere at frequencies of 10 to 500 hertz. III - Low-frequency equatorial emissions and their relationship to ionospheric turbulence.

19 p2768 A72-38744

A small ELF electric field probe.

20 p2921 A72-38994

Polar ionosphere ELF/VLF noise distribution from Alouette 2 electric dipole observations

20 p2903 A72-39538

Worldwide thunderstorm activity model selection from Schumann resonance observations, using ELF noise measurements in lowest earth-ionosphere cavity modes

24 p3380 A72-45100

EXTREMUM VALUES

NT LIMITS (MATHEMATICS)

NT MINIMA

French monograph on extremum values of function with two variables and nonlinear feedback control systems stability, using associate recurrence solutions properties

01 p0044 A72-10164

Bias and spread in extreme value theory performance tests of communications systems, comparing with bit error rate tests

02 p0173 A72-12129

Extremal problems of natural vibration spectrum optimal control in mechanical systems with constraints, using mathematical programming methods

04 p0586 A72-15004

Extremum of satellite orbit perigee or apogee height in Hohmann transfer

05 p0713 A72-16006

Run length encoding for removing redundancy from video signals, determining upper bound on compression ratio based on first order Markov model

06 p0773 A72-17488

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption

06 p0758 A72-17727

Upper bound on rate distortion function for discrete ergodic sources with memory, applying to pictorial data processing

06 p0776 A72-18390

Rate 1/n binary convolutional code free distance upper bound derivation and largest input sequence determination for equal weight

06 p0776 A72-18392

Coefficient matrix for estimation of numerical solution error bounds for finite element models

07 p1025 A72-18786

Differential equation initial value problem solution error bounds construction by interval arithmetic to guarantee exact solution inclusion

07 p1026 A72-18968

Multichannel communication system in adaptive system based on random parameter extremum criterion, deriving average usage time of extremal channel

07 p0938 A72-19008

One- and two-conductor transmission lines electromagnetically coupled to rocket, deriving current bounds in load impedances under incident plane monochromatic wave

07 p0956 A72-19556

Heat exchange extremum boundary value problems for flow direction reversal, considering thermal treatment of porous materials

08 p1253 A72-21457

Variational solutions to linear integral equations and extremal functions in physical gas dynamics problems, using stepwise constant trial functions

08 p1150 A72-21620

Extremal mechanical properties directions in orthotropic glass fiber reinforced plastics symmetry planes

08 p1196 A72-21866

Asymptotic analysis of activation energy limit for radiant ignition of reactive solid with in-depth absorption

08 p1255 A72-22044

Multidimensional function extremum for sectioned resonator type gyroamplifier efficiency optimization

08 p1172 A72-22050

German monograph on optimum principle for numerical representation of surfaces, discussing association with elasticity theory extremal requirements

09 p1340 A72-22319

Optimal temperature gradients determination over thickness of shell of revolution under axisymmetric heating, formulating variational problem for conditional extremum of elastic energy functional

09 p1399 A72-22706

Algorithms for optimal adaptive control of steady motions of single channel discrete extremal systems with independent search, studying quality functional behavior

09 p1291 A72-23437

Rayleigh-Ritz method supplement for optimal evaluation of eigenvalue bounds for semibounded self adjoint operators

09 p1353 A72-23484

Numerical computation of bilateral bounds for arbitrary vectorial and tensorial field quantities of elastic bodies eigenvibration states, applying to thin rectangular plate

09 p1409 A72-23566

Pressure jumps lower bounds across supersonic transports induced shock waves in homogeneous atmosphere, using Whitham function in terms of Riemann integral

10 p1420 A72-24846

Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption

11 p1574 A72-25329

Error bounds for finite element methods and approximation with piecewise polynomials for elliptical differential equations solution

11 p1679 A72-26956

Error bounds relationship to norm in approximate numerical solutions of initial value problems for ordinary differential equations

11 p1679 A72-26957

Lowest natural vibration frequencies of conical shell for various boundary conditions, using finite difference scheme

12 p1878 A72-27081

Maximum transmission delay in microwave TWT delay lines as function of electron beam size, current, shape and velocity distribution

12 p1782 A72-27436

Distribution theory application to fixed end point problem in variational calculus for extremal containing corners, obtaining Euler equation

12 p1885 A72-27849

Extremum search algorithm in multicompartment mixture optimization problem, using gradient method adaptation

13 p1924 A72-28460

Differential games extremal strategies with player control action subject to integral constraints

13 p2002 A72-28712

Statistical superoptimal search strategies of self optimizing systems, applying to one dimensional step type and multiextremal problems

13 p1936 A72-29160

Extremal correlation algorithm for automatic control of two image congruent superposition, using digital simulation and statistical trial techniques

13 p1924 A72-29161

Signal discretization frequency upper bounds determination to satisfy prescribed level of mean square error in continuous signal restoration

13 p1925 A72-30021

Green operator first invariant upper bound for free oscillations eigenvalue upper limit, exemplifying for quadratic plate with two free and two clamped edges

15 p2274 A72-31459

Dual extremum principles in functional analysis, including applications in nonlinear programming, networks, optimization, control theory, fluid mechanics, etc

15 p2262 A72-31630

Modified Rayleigh-Ritz method to obtain lower bounds of eigenvalues, applying to uniform cantilever column buckling

15 p2275 A72-31710

Electron impact low energy cross sections for transitions between highly excited states, obtaining upper bound via quantal impact parameter theory

15 p2315 A72-32715

Upper and lower bounds of effective thermal conductivity for statistically homogeneous composite materials, using variational principles

17 p2638 A72-35285

The bounding theory of turbulence and its physical significance in the case of turbulent Couette flow.

18 p2677 A72-36006

A basic theorem in the computation of ellipsoidal error bounds.

18 p2705 A72-36602

Error bounds for the Galerkin method applied to singular and nonsingular boundary value problems.

18 p2705 A72-36604

Extremal problems arising in the substantiation of heuristic procedures

19 p2824 A72-37381

Necessary and sufficient conditions for differentiable non-scalar-valued functions to attain extrema.

19 p2824 A72-38244

Algorithms for optimal adaptive control of steady motions of single channel discrete extremal systems with independent search, studying quality functional behavior

19 p2782 A72-38520

A statistical information theory for extremum search of a function

19 p2827 A72-38576

Simple algorithm for a search of the global extremum of a function of several variables and its application to the functional approximation problem

19 p2828 A72-38582

An advanced concept of the Woehler diagram and a new calculating procedure for the application of the extreme-value method to experimental data in the calculation of fatigue strength

20 p2926 A72-39572

Differential games extremal strategies with player control action subject to integral constraints

22 p3198 A72-42090

The branch and boundary method as a regular method of solving irregular problems of mathematical programming. I

22 p3198 A72-42188

Extremum principles for a class of dynamic rigid-plastic problems.

22 p3235 A72-42522

Impulsive loading in structural plasticity, obtaining displacement bounds via deformation theory based on extremum paths

22 p3237 A72-42759

Widely convergent method for finding multiple solutions of simultaneous nonlinear equations.

23 p3308 A72-43400

Lower and upper bounds for the lowest characteristic value of the elastically supported membrane

23 p3347 A72-43717

Extreme value analysis of flight load measurements.

24 p3367 A72-44737

On an augmentation of the error made by numerical treatment of second-order conservative point transformations

24 p3419 A72-45071

Dual extremum variational principles relevant to nonlinear heat transfer, applying to temperature distribution on thin walled spherical spacecraft surface

24 p3465 A72-45474

EXTROVERSION

Noise effects on human attention and work efficiency in extroverted and introverted individuals

08 p1128 A72-22137

Circadian rhythm effects on introverts and extroverts biochemistry, physiology and performance, suggesting arousal mechanism differences

11 p1581 A72-26693

Extraversion, neuroticism, and color preferences.

18 p2653 A72-36903

EXTRUDING

Coextruded Be fiber-Ti alloy matrix composite sheets for light weight structures, describing ultrasonic inspection and mechanical properties

01 p0084 A72-10734

Metallurgical defects in hot extruded aluminum alloys, describing investigation methods and remedies

01 p0077 A72-11041

Extruded anodized AlMgSi alloy matrix precipitate surface defects, noting wood grain effect, segregated bands, microstructural stains and heterogeneous zones

01 p0077 A72-11042

Two component flow and optimal strength ratios between core and shell materials during extrusion of composite bimetallic specimens into circular tubes

01 p0077 A72-11078

Ti powder technology, discussing pressed and sintered parts, forging and extrusion preforms and composites

02 p0233 A72-11437

Coextrusion of metal powder and ceramic dispersions clad alloyed Al as function of cartridge density and reactor core length

02 p0233 A72-11456

Transition metal oxides hot extrusion sintering, discussing temperature and pressure effects on compacting density

02 p0244 A72-12349

Tubular and rod extruded age hardenable Al alloys, determining mechanical anisotropic properties from yield loci and r values

03 p0369 A72-12957

Slip line field for plane strain extrusion of strain hardening material, calculating shear stress

03 p0363 A72-13708

Large length-to-diameter ratio two layer blank bimetallic hard alloy product manufacture by extrusion die method, noting mechanical properties

05 p0666 A72-16098

Hot pressing/extrusion/ of rods from metal-ceramic Ti, using pure and cermet powders with tungsten carbide

06 p0822 A72-18426

Nonheat treated extruded Mo alloy under tension and vacuum conditions at various temperatures, in-

- vestigating cylindrical samples size effects on mechanical properties 06 p0833 A72-18635
- Extruded superalloy powder structural shapes preparation by filled billet technique for improved chemical and mechanical properties 07 p0994 A72-19483
- Explosives injection molding into stainless steel, aluminum, plastic and rubber tubes, considering applications to fuse and detonation transfer trains and small warheads 08 p1221 A72-20781
- Thermal diffusivity and conductivity and specific heat of hard electrode graphite intermediate medium in hydraulic hot extrusion of metals 08 p1181 A72-22072
- Viscoplasticity techniques application to deforming portion strain and strain rate fields of axisymmetric Al alloy extrusion with various flow patterns 08 p1250 A72-22194
- High strength Ni alloy hot working properties evaluation from extrusion simulation by torsion testing, considering stress-strain-time relations, microstructure, recrystallization and ductility 08 p1190 A72-22199
- Pultrusion process for carbon fiber reinforced plastic, compared with wet lay up technique, noting mechanical properties [PI PAPER 10] 09 p1318 A72-22545
- Al alloys degree of deformation dependence on pulse energy during extrusion by pulsed magnetic field, showing hardening effect 09 p1319 A72-22865
- Flow rate limits increase and near homogeneous stress concentration in active hot extrusion of Al alloys 12 p1814 A72-27644
- Microfiber extrusion of plasticized mixtures based on titanium and silicon carbides, showing optimum extrusion rate dependent on deformation and strengthening 13 p1967 A72-30102
- Pressed and sintered preforms of Ti and alloys for forge and extrusion operations, noting processing time reduction and smooth surface 13 p1982 A72-30120
- Commercial and laboratory Mg alloys for die and sand casting, high strength and extruding applications 14 p2113 A72-30269
- Electron-microscopic investigation of the development of a cellular structure in molybdenum during hydroextrusion 17 p2569 A72-35524
- Metallurgical aspects in the development of AlMgSi alloys with a low sensitivity to quenching 18 p2699 A72-36224
- Precipitation caused surface defects on Al-Mg-Si alloy extrusions, considering segregation streaks, cooling induced microstructural stains and cold working-annealing produced heterogeneous zones 18 p2699 A72-36225
- Influence of hydraulic extrusion on the composition and properties of the Nb3Sn compound 23 p3323 A72-43597

- Suppression of visual evoked responses to low intensity light flashes and shifting stripe patterns during saccadic eye movements 07 p0926 A72-19025
- Extraretinal inflow eye position information awareness from experimental load application to eyes in total darkness 07 p0926 A72-19026
- Dynamic visual acuity and eye movement data for moving targets, deriving retinal target image position and velocity errors during ocular pursuit 07 p0926 A72-19030
- Afterimage apparent motion preceding smooth eye movement association with target tracking, noting unequal impairment occurrence over entire visual field 07 p0927 A72-19034
- Computer graphics system simulation of saccadic eye movement made for time optimal control behavior study, incorporating eye muscle characteristics 07 p0928 A72-19309
- Human binocular visual system fusional information processing, evaluating compensatory eye movements role in overcoming retinal image disparity 07 p0929 A72-19314
- Field and intracellular potentials in cat trochlear nucleus following vestibular nerve and nuclei stimulation for synaptic organization study of vestibulo-ocular reflex 07 p0923 A72-20501
- Stochastic model for eye movements during fixation on stationary target 10 p1429 A72-23795
- Stimulus complexity effect on amplitude of human cyclofusional response, evaluating relative roles of compensatory eye movements and central responses 10 p1427 A72-25180

Image visual recognition during voluntary saccadic eye movements, noting stimuli visible luminance change effect

12 p1760 A72-27310

Computer analysis of helicopter pilots eye movement patterns dependence on visual task skill and performance time

12 p1770 A72-27475

Human electrophysiological changes during perceptual isolation from EEG, EMG, vertical eye movements and electrodermal measurements

12 p1771 A72-27484

Nystagmus eye movements relationship to ocularly induced illusion from test involving vestibular stimulation and visual stimuli velocity estimates

12 p1776 A72-28304

Foveal and nonfoveal afterimages effects on saccadic behavior of eye movement

13 p1907 A72-29971

Eye movements and dynamic visual acuity as function of tracking velocity, analyzing pursuit and saccadic component by electrooculography

13 p1912 A72-30043

Voluntary saccade length dependence on visual field nontarget stimuli number, locus and distance from target

14 p2077 A72-30966

Voluntary eye movement and convergence effects on relation between binocularly perceived and physical distance ratios

16 p2358 A72-33647

The effect of target contrast variation on dynamic visual acuity and eye movements.

17 p2508 A72-34876

Eye movement pattern monitoring to investigate retinal afterimage role in release of pursuit movements

17 p2508 A72-34886

Russian book - Eye movements as the basis of spatial vision and as a model of behavior

17 p2509 A72-35459

REM period functional maintenance of coordinated eye movement facilitation and binocular depth perception accuracy following sleep

17 p2509 A72-35462

Optokinetic thresholds in the normal monkey.

18 p2651 A72-36610

Vergence eye movements to pairs of disparity stimuli with shape selection cues.

18 p2651 A72-36612

Personality correlates of lateral eye movement and handedness.

18 p2653 A72-36905

Hering's law of equal innervation and the position of the binoculus.

19 p2756 A72-37828

Parallel swing with affixed luminous disks test for induced vestibular stimulation effects on moon illusion, noting eye movement factors

20 p2893 A72-38900

Fixation eye movements and the processing of visual information.

21 p3007 A72-40740

Parametric adjustment to a shifting target alternating with saccades to a stationary reference point.

21 p3009 A72-41250

Role of eye movements in the perception of apparent motion.

23 p3259 A72-43804

Involuntary eye movements during the performance of mental tasks

23 p3260 A72-44077

Conjugate and disjunctive optokinetic eye movements in the rabbit, evoked by rotatory and transitory motion.

23 p3257 A72-44243

Visual sensitivity measurement in retinal areas with stepwise change from one monochromatic light to another, discussing eye movements effects and perception thresholds

23 p3258 A72-44385

Eye movements evoked by collicular stimulation in the alert monkey.

24 p3371 A72-44906

Perception smear suppression during saccadic eye movements in terms of metacontrast determined by post-saccadic accumulated luminance relation to stimuli masking

24 p3373 A72-45377

EYE PROTECTION

Automatic laser tracking and ranging system for cooperative retroreflective aircraft targets, discussing design, performance, eyesafe distance and atmospheric attenuation [CLEA PAPER 9.3]

07 p0942 A72-19385

Industrial safety rules recommendations for lasers based on radiation biological effects and eye optical and physiological properties

12 p1771 A72-27615

Visual acuity restoration improvement after flash blindness by monocular shielding and ingestion of vitamin complexes containing ATP with pyridoxal, considering twilight vision

21 p3012 A72-41748

EYEPIECES

Oculomotor accommodation and convergence as distance perception cues, showing size perception change relation to glasses adaptation

06 p0765 A72-17411

Oculomotor cue-based distance perception, discussing glasses adaptation-caused accommodation and convergence changes in stereoscopic depth perception

06 p0765 A72-17414

F

F CENTERS

U COLOR CENTERS

F DISPLAYS

U F REGION

F REGION

Topside electron density profile from empirical relation between ionospheric slab thickness and mean gradient temperature in F region, using Saint Santin scatter data

01 p0052 A72-10085

Ionospheric horizontal drifts during large vertical convection of mid dip-latitude postmidnight F region, using spaced antenna measurements

01 p0052 A72-10087

Lindauer electron density profile for maximum F layer over sunspot cycle using frequency dependent radio ground echo in satellite ionograms

01 p0054 A72-10421

Ionogram observations of F layer electron rarefaction wake disturbance during small rocket ascent

01 p0054 A72-10423

Neutral gas wind effect on Doppler shifts in frequency spectrum of atmospheric gravity waves in F region with resultant phase altitude dependence alteration

01 p0054 A72-10426

Log normal random fluctuations of ionospheric electron concentration in F region from vertical sounding and incoherent scatter data

01 p0059 A72-10609

Sizes, shapes and temporal characteristics of small scale inhomogeneities in F region, using vertical sounding, space diversity reception and radio astronomy

01 p0059 A72-10610

Daytime and nighttime sporadic F layer regularities correlation with other ionospheric phenomena based on vertical sounding data

01 p0059 A72-10611

Daytime bottomside polar F layer latitudinal cross section construction from ionograms recorded in aircraft [AD-738278]

01 p0061 A72-10900

Ionospheric F region heating by hf transmitter, obtaining electron temperature maps and heating/cooling time constants

01 p0062 A72-10910

F region neutral thermosphere temperature perturbation and circulation pattern due to global wind with anomalies of ionization calculated from two dimensional dynamic model

01 p0096 A72-11283

Long range satellite signal Faraday fading rate revealing electron density profile near F layer peak

04 p0486 A72-14883

Electronic collision frequency relationship with radio frequency in F region, investigating height, diurnal and seasonal variations

04 p0516 A72-14933

Electrojet effects on critical frequencies in equatorial F region during magnetically quiet and disturbed days

04 p0516 A72-14936

Statistical analysis of low latitude F 2 layer disturbances associated with sudden commencement type geomagnetic storms, investigating critical frequencies

04 p0516 A72-14937

Small scale F region irregularities at Varanasi, plotting horizontal drift velocities and directions, axial ratios and orientations and rms random velocity values histograms

04 p0517 A72-14954

Diurnal and seasonal variations of F region irregularities drift and anisotropy parameters during IQSY from aerial fading records, noting magnetic activity effect

04 p0517 A72-14955

Molecular nitrogen dayglow emission in F region, noting volume emission rates, integrated overhead intensities and solar activity effects

04 p0518 A72-14959

Van Rhijn height and intensity variations of 5577 A emission in night E layer airglow

04 p0518 A72-14960

Intensity-height profiles for molecular oxygen first and second negative bands in F region, using equilibrium velocity distribution of photoelectrons

04 p0518 A72-14963

Oxygen ions vertical flux altitude distribution in F layer from incoherent scatter radar measurements, noting existence in protonosphere during daytime [AD-737929]

05 p0629 A72-16616

Latitudinal, diurnal, seasonal and solar cycle variations in vhf-uhf scintillation producing irregularities in F layer electron density

05 p0630 A72-16617

Lf instability mode in partly ionized plasma due to electron temperature gradient aligned perpendicular to magnetic field, applying to E and F regions [AD-737931]

06 p0804 A72-17460

Sunspot cycles effect on F region drifts and irregularities from observations at Ibadan during 1966/67, noting seasonal and diurnal variations

06 p0806 A72-17643

Midlatitude F region wavelike disturbances detection by hf radio echo techniques, discussing correlation with jet stream associated tropopause wind patterns

07 p0974 A72-18885

Quantum efficiency at 6300 and 6364 A of recombination mechanism in nighttime F layer, obtaining ionospheric electron density profiles

07 p0974 A72-18893

F region electron density variation above North America during geomagnetic disturbance on 28 May 1970 [AD-739792]

07 p0976 A72-19162

Ionospheric F region storms model accounting for global electron density changes due to abundance ratio of atomic oxygen to molecular oxygen or nitrogen

07 p0979 A72-20047

Radio wave alternating electric field heating of ionospheric plasma electrons with density increase below 200 km and decrease at F layer maximum

08 p1152 A72-20703

Ring current growth effects on midlatitude F region electron density change during large magnetic disturbances

08 p1152 A72-20706

F region ionization anomalous evening enhancement, discussing seasonal variations, solar activity and geomagnetic coordinates maximum in Yakutsk

08 p1153 A72-20707

F region electron-ion gas dynamic model with stability dependence on periodic solutions convergence of continuity equations

08 p1153 A72-20725

Quarter thickness variation and particle temperature dependence on height and frequency in summer daytime F region

08 p1155 A72-20815

Horizontal neutral winds meridional component from incoherent scatter measurements of F region ionization drifts, noting diurnal variations

08 p1156 A72-21098

Polar orbiting satellite ESRO-1A 1-13 keV electron measurements compared to bottomside ionosonde measurements for auroral particle precipitation and F region electron density

08 p1226 A72-21099

F region irregularity contours from correlation analysis of satellite amplitude scintillations, showing axially symmetric field-aligned and north-south elongated planes

08 p1156 A72-21105

Auroral F region electron density enhancement relation to sporadic F2 and red oxygen emission

08 p1226 A72-21111

F region disturbances, explaining critical frequency changes on basis of neutral winds, electrodynamic drift and temperature and chemical composition variation

08 p1158 A72-21222

Nocturnal F region electrodynamic drift at conjugate point sunrise time, discussing dynamo electrostatic field normal component change as cause of ionosphere vertical movement

09 p1297 A72-22576

Rocket sounding of auroral zone F region low energy electron precipitation and excitation and ionization processes

09 p1298 A72-22585

E and F region apparent and true drifts over magnetic equator correlated to solar activity, comparing electron density sensitivity to geomagnetic range

11 p1623 A72-26104

Anomalous F region ionization in darkened high latitudes during solar activity growth and abatement

11 p1623 A72-26270

F region critical frequencies deviation from median due to solar cycle phase, latitude and time, discussing short waves radio communications reliability

11 p1593 A72-26271

F region N/h/ profiles and parameters deviations during ionospheric and magnetic storms, discussing perturbation index

11 p1594 A72-26275

Noontime N/h/ profiles forecasts and annual variation in F region, relating solar activity levels to vertical distribution of electron concentration

11 p1594 A72-26277

Time and space characteristics of F scattering, investigating maximum appearance probability, intensity and seasonal and diurnal variations

11 p1595 A72-26280

Magnetic field line connection between F region irregularities causing scintillation and ionospheric conditions inducing spread E

11 p1625 A72-26405

Ionosonde observations and Faraday rotation measurements of E and F region total electron content during two solar eclipses

12 p1801 A72-27154

F region parameters relationship to night sky optical emission, considering electron distribution produced by dissociative recombination

12 p1802 A72-27308

F region mean electron density profile seasonal and solar cycle dependence, using Chapman function for nighttime F layer description

12 p1803 A72-27775

Ion velocity height profiles, ion temperature and electron density measurement with Thomson scatter facility during F region traveling ionospheric disturbance/gravity waves/

12 p1803 A72-27777

Subauroral zone F region disturbances latitudinal variations catalogs from vertical sounding data, taking into account ionospheric states

13 p1946 A72-28598

Virtual height dependence of ionospheric F region parameters including angular divergence of reflected radio waves, heterogeneity coefficient and random and drift motions velocity

13 p1948 A72-29038

Equatorial F region photoionization and chemical loss rates for electrons from simultaneous observations of vertical drift velocity and electron concentration, deriving plasma transport

13 p1949 A72-29336

E and F regions plasma horizontal drift measurements by oblique incidence incoherent scatter radar system, suggesting solar semidiurnal tidal oscillation dynamo action

13 p2031 A72-29386

Gravity wave observation in nighttime F region by measuring phase path length changes of stable CW signal reflected obliquely from ionosphere

13 p1953 A72-29814

Vertical distribution of atomic nitrogen ions in F region produced by dissociative photoionization and charge transfer, suggesting undiscovered source at 300 km altitude

13 p1954 A72-29815

Daytime F region inverse relationship between electron density and temperature, determining energy input profile and thermal flux

14 p2097 A72-30127

Seasonal features of nocturnal 6300 Å emission variation and decay coefficient in nightglow related to recombination coefficient for F layer ionization

14 p2097 A72-30132

Global electron concentration disturbances in low and middle latitude F2 during magnetic storm

14 p2100 A72-30635

Dipolar coordinate system for geomagnetic field dipole approximation in studies of diffusion and heat conduction in F region and outer ionosphere

14 p2102 A72-30652

Atmospheric gravity waves effects in ionosphere, discussing F region traveling ionospheric disturbances, sporadic E layer and D region radar scattering

15 p2222 A72-31285

Ion chemistry and heating of daytime ionosphere E and lower F regions, calculating neutral atmosphere densities, ion production rates and solar EUV radiation absorption

15 p2192 A72-32253

Nighttime F region vertical velocity estimation, using electron density profiles vs true height

15 p2231 A72-32267

F region plasma one dimensional nonisothermal diffusion for positive ions with allowance for ionization and recombinations and gravitational forces

15 p2232 A72-32731

Semidiurnal variation in O I 5577 Å nightglow due to lunar tidal dynamics effect in E and F regions

16 p2383 A72-32971

F region crossed field instability nonlinear theory based on energy transfer by mode coupling and absorption by linear damping with application to equatorial electrojet

16 p2384 A72-32976

Geomagnetic effect on the neutral temperature of the F region during the magnetic storm of September 1969,

17 p2549 A72-35603

Atomic oxygen green line emission in nightglow from OGO-F photometer observations, calculating tropical F region electron density spatial distribution

17 p2549 A72-35604

Calculations of electron-profile disturbances in the F region during the passage of a neutral wave

17 p2551 A72-35861

Certain characteristics of ionospheric disturbances in the F region during type A red colored polar auroras

17 p2551 A72-35866

Occurrence frequency of F2 layer sporadic ionization in auroral zone, noting solar activity effect

17 p2551 A72-35867

Models for F region and topside ionospheric storms morphology, discussing electric current disturbance at polar region

18 p2685 A72-35994

Radio wave alternating electric field heating of ionospheric plasma electrons with density increase below 200 km and decrease at F layer maximum

19 p2790 A72-38331

Ring current growth effects on midlatitude F region electron density change during large magnetic disturbances

19 p2794 A72-38334

F region ionization anomalous evening enhancement, discussing seasonal variations, solar activity effects and maximum value dependence on geomagnetic latitude and longitude

19 p2790 A72-38335

F region electron-ion gas dynamic model with stability dependence on continuity equations periodic solutions convergence

19 p2791 A72-38353

Nightglow observations and ionospheric soundings for red oxygen line intensity relation to F region parameters

19 p2792 A72-38638

Comparison between observed and numerically calculated atmospheric gravity waves in the F-region.

19 p2794 A72-38864

Diurnally varying neutral wind effects on lower F region ionization distribution, noting Appleton anomaly disappearance time

19 p2794 A72-38865

Seasonal, diurnal and magnetic dependence of ionospheric scintillation at 64 deg invariant latitude.

20 p2916 A72-39226

Simultaneous F-region conjugate point dawn effects at two mid-latitude stations.

20 p2916 A72-39234

High latitude variations of F-region electron temperature.

20 p2918 A72-39535

Horizontal and vertical electron drifts in the F-region at Thumba.

21 p3049 A72-41324

Aspect-sensitive reflections from ionization irregularities in the F-region.

22 p3154 A72-42364

Theoretical calculations of the F-region tropical ultraviolet airglow intensity.

22 p3171 A72-42418

Geomagnetic storm and seasonal effects on spread of monthly distribution and average behavior of midlatitude F region electron peak density and slab thickness

22 p3172 A72-42434

Source and identification of heavy ions in the equatorial F layer.

23 p3286 A72-44516

Subauroral zone F region disturbances latitudinal variations catalogs from vertical sounding data, taking into account ionospheric states

24 p3398 A72-45098

Computer simulation of the F-region seasonal anomaly.

24 p3400 A72-45586

Phenomena associated with very high power, high frequency F-region modification below the critical frequency.

24 p3400 A72-45596

F 1 REGION

F 1 layer appearance and critical frequencies average daily variations at Tsumeb, Southwest Africa, as function of sunspot cycle phase

01 p0055 A72-10428

F1 region ion structure during ionospheric magnetic disturbances by numerical simulation of quiet and disturbed conditions based on electron concentration profiles

05 p0656 A72-16247

Atmospheric composition and temperature effects on F1 region ion concentration structure from 140 to 220 km for low solar activity conditions

05 p0657 A72-16261

F1 layer diurnal and seasonal model for medium to high latitudes, comparing calculated and observed electron density diurnal variations

06 p0804 A72-17458

Beamed radio waves interaction in E and F1 regions propagation, noting beam width and field amplitude changes caused by defocusing

13 p1945 A72-28579

Variations of F1 layer thickness and maximum ionization height for high and low solar activity periods obtained from vertical ionospheric sounding

13 p1946 A72-28595

Beamed radio waves interaction in E and F1 regions propagation, noting beam width and field amplitude changes caused by defocusing

24 p3397 A72-45079

Variations of F1 layer thickness and maximum ionization height for high and low solar activity periods obtained from vertical ionospheric sounding

24 p3398 A72-45095

F 2 REGION

Magnetic declination effect on elevation control of F2 layer maximum, considering east component of geomagnetic field from Capetown and Canberra observations

01 p0054 A72-10427

Magnetoinic component with fluctuating elliptical polarization during wave reflection from F2 layer, discussing suppression mechanism

01 p0028 A72-10593

Cross correlation characteristics of deviations in critical frequencies of F2 region

01 p0059 A72-10594

F2 layer critical frequency variations relation to solar radio flux intensity, using mathematical approximations

01 p0059 A72-10613

Time between noontime and evening maxima in F2 layer critical frequency compared with evening maximum period, showing dependence on noontime solar zenith angle

01 p0059 A72-10615

F2 region maximum electron density level height and molecular temperature diurnal variations at equatorial latitudes from Ibadan station data

02 p0218 A72-11941

Vertical motions of midlatitude F2 layer during magnetospheric substorms, investigating electric field distribution

03 p0349 A72-13519

Thermospheric neutral-air wind effects on ionospheric F2 layer from atmospheric model

04 p0514 A72-14876

F2 layer anomalies association with equatorial electrojet, investigating midday critical frequencies of sporadic E layer

04 p0515 A72-14932

F2 layer 6300 Å night airglow emission photometric data on 31 January 1968, showing large electron content and movements

04 p0517 A72-14958

Elliptical polarization and depolarization coefficients for monochromatic radio waves reflected from F2 ionosphere using Stokes parameters

05 p0656 A72-16241

Latitudinal distribution of electron temperature in F2 layer during summer daytime period of low solar activity from electron density profile geometrical parameters

05 p0656 A72-16248

Magnetic storm disturbing effect on integral electron density in F2 layer and in topside ionosphere

05 p0657 A72-16262

F2 region electron density spatial and temporal distribution, investigating plasma vertical drift effects

05 p0657 A72-16263

F2 layer critical frequency deviations and negative disturbance zones during solar eclipse of 22 September 1968

05 p0657 A72-16264

Ionospheric storms features based on F2 critical frequency data, investigating magnetosphere during geomagnetic storms

06 p0810 A72-18280

F2 ionization distribution diurnal variations from airborne ionosonde measurements during June-July 1966 over Tamanrasset meridian, correlating magnetic activity with wind variations

06 p0810 A72-18731

Lower F2 region positive oxygen ion distribution with allowance for vertical motions, production and recombination processes, using atmospheric models

08 p1152 A72-20705

Unified coordinate system for earth planetary distribution of F2 and sporadic E layer transmission parameters, suggesting geomagnetic longitude and modified magnetic inclination

08 p1153 A72-20726

F2 layer diffuse reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease

08 p1154 A72-20738

F2 region magnetic disturbances conjugacy mechanisms, considering vertical ionization profiles

08 p1155 A72-20801

Perturbation effects on F2 layer and outer ionosphere electron density profiles during successive magnetic storms from Alouette 1 satellite data

08 p1157 A72-21145

Ionization movement of charged and neutral particles in F2 region coupled to air movement by collision drag forces

11 p1621 A72-25839

Ionospheric disturbances and prediction dependence on solar and geophysical activities, discussing SID, pca, auroral absorption and F2 region

11 p1623 A72-26267

Ionospheric disturbances relation to interplanetary positive ion and proton fluxes intensity and velocity

- from Mariner 2, Venus 3 and Vela 2 observations, discussing F 2 region
11 p1713 A72-26268
- F 2 region critical radio frequencies forecasts from solar cycles, ionospheric disturbances data, latitude and annual and diurnal variations
11 p1594 A72-26272
- Diurnal variations of F 2 region critical frequencies and quiet and perturbed ionosphere N/h profiles during solar cycle, estimating signal reflection altitudes
11 p1594 A72-26274
- F 2 layer midlatitude local centers of anomalous nighttime ionization during winter and summer solstices
11 p1623 A72-26283
- Predawn effect on hot and cold electrons at magnetoconjugate point in F 2 layer, discussing electron shock wave speed and thermal collisionless wave energy dissipation
11 p1628 A72-26916
- Seasonal atmospheric composition changes relation to midlatitude F 2 layer seasonal anomaly during high solar activity
12 p1803 A72-27776
- Electric field nature required for DP current system development in disturbed high latitude ionosphere, discussing F 2 region ionization drift
13 p1946 A72-28596
- F 2 layer parameter forecasting by computer based on series coefficients dependence on Wolf number
13 p1946 A72-28597
- F 2 region maximum electron density level height and molecular temperature diurnal variations at equatorial latitudes from Ibadan station data
13 p1949 A72-29253
- Magnetic apex coordinate system for plasma density organization in low and middle latitude F 2 region
13 p1951 A72-29395
- F 2 layer electron concentration and maximum height variation with interplanetary magnetic field direction
15 p2226 A72-31920
- Ionized and neutral atmospheres coupled ionospheric continuity and motion equations, discussing nonlinear force effects on F 2 height and electron density
15 p2230 A72-32257
- Real height variations of the ionospheric F2-layer above some pairs of geomagnetically conjugate stations.
17 p2545 A72-34689
- Time delay measurements in the Athens/Greece/Roma /Lesotho/ VHF trans-equatorial propagation circuit.
17 p2515 A72-34693
- Atmospheric model synthesis of observed electron temperatures and concentrations in tropical ionosphere during 8 March 1970 magnetic storm, noting F 2 region features
18 p2686 A72-36296
- Lower F 2 region positive oxygen ion distribution with allowance for vertical motions, production and recombination processes, using atmospheric models
19 p2790 A72-38333
- Unified coordinate system for global distribution of F 2 and sporadic E layer transmission parameters, suggesting geomagnetic longitude and modified magnetic inclination
19 p2791 A72-38354
- F 2 layer spread reflections and critical frequencies increase on ionogram recordings during Northern Hemisphere nighttime magnetic storm of 2 December 1967, noting cosmic radio emission decrease
19 p2791 A72-38366
- Quasi-periodic variation in F 2 layer reflected signal field strength, noting predominance during periods with type 4 bursts, auroras and geomagnetic disturbances
19 p2792 A72-38639
- Perturbation effects on F 2 layer and outer ionosphere electron density profiles during successive magnetic storms from Alouette 1 satellite data
20 p2916 A72-39250
- The anomaly of the neutral wind at a height of approximately 200 km at high latitudes.
20 p2918 A72-39536
- Magnetospheric interactions with topside ionosphere in terms of polar wind ion flows and density related to plasma temperature, F 2 region and cusp observations
20 p2918 A72-39537
- Oxygen ion anticorrelation to molecular ion concentrations fromOGO 6 observations in F 2 region
22 p3169 A72-42016
- A method for determining the electron density distribution about the F2 peak of the ionosphere.
22 p3174 A72-42992
- Geometrical dimensions and effective number of large scale ionospheric inhomogeneities by F 2 critical frequency variability analysis
23 p3283 A72-43360
- Variations of the planetary values of the F2 layer thickness and the parameters of the neutral atmosphere
23 p3284 A72-43375
- Solar control over the evolution of F2-layer after sunrise.
24 p3395 A72-44822
- Electric field nature for DP current system development in disturbed high latitude ionosphere, discussing F 2 region ionization drift
24 p3398 A72-45096
- F 2 layer parameter forecasting by computer based on series coefficients dependence on Wolf number
24 p3398 A72-45097
- F-4 AIRCRAFT**
Buccaneer Mk 2 and F-4K Phantom takeoff and landing performance improvement due to boundary layer control by leading and trailing edge blowing
09 p1262 A72-22973
- Pilot and back-seat man physiological responses during high-g aerial combat maneuvers in F-4E aircraft, discussing ECG, respiratory rate and minute volume
12 p1767 A72-28317
- Electromechanical redundant activating mechanism for F-4 aircraft dual tandem hydraulic power servo, noting application to fly by wire control
14 p2072 A72-30422
- Synthesis and analysis of a fly-by-wire flight control system for an F-4 aircraft.
[AIAA PAPER 72-880] 20 p2887 A72-39119
- F-5 AIRCRAFT**
Graphite fiber-epoxy composite systems development for F-5 aircraft landing gear door, speed brake, leading and trailing edge flaps and horizontal stabilizer
12 p1835 A72-28097
- F-8 AIRCRAFT**
NF-8D aircraft variable stability system ground/in-flight calibration for determination of flight control system dynamics effects on flying qualities
05 p0611 A72-16660
- Design and flight experience with a digital fly-by-wire control system using Apollo guidance system hardware on an F-8 aircraft.
[AIAA PAPER 72-881] 20 p2889 A72-40060
- F-14 AIRCRAFT**
F-14A fighter accelerated flight test program with 18-month saving and 3600 flight time hours before 1973 operability
04 p0464 A72-14591
- Automated telemetry system providing real time analytical capability and reduction of flight test time for F-14
04 p0486 A72-14592
- F-14 Tomcat test program for hydraulic systems, spinning, low speed performance, stalling, afterburning turbofan engines, in-flight refueling and automatic telemetry equipment
06 p0758 A72-17582
- F-14 naval fighter aircraft flight test programs, discussing instrumentation and low-speed test results
08 p1108 A72-21005
- F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc
17 p2597 A72-34390
- Real time flight flutter testing via Z-transform analysis technique.
[AIAA PAPER 72-784] 19 p2749 A72-38101
- Direct lift control feasibility for integration into F-14A automatic carrier landing system /ACLS/, using moving-base six-degree-of-freedom simulation
[AIAA PAPER 72-873] 20 p2951 A72-39127
- F-15 AIRCRAFT**
F-100 and F-401 turbofan engine design and development for F-15 and F-14, discussing impingement cooling, Ti alloys, powder metallurgy and metal composites, etc
17 p2597 A72-34390
- F-28 TRANSPORT AIRCRAFT**
Dynamic aspects of Fokker F-28 aircraft design.
22 p3138 A72-42831
- Fatigue testing of the F.28 Fellowship.
24 p3366 A72-44729
- F-104 AIRCRAFT**
Human, technical and environmental factors in accidents of naval F-104 squadron, considering temporal distribution of accidents and pilot physical condition
12 p1772 A72-27820
- F-111 AIRCRAFT**
Relative cost comparisons of composite applications with conventional material components selected from F-111A supersonic fighter bomber
03 p0310 A72-14234
- F-111 aircraft landing gear and speedbrake hydraulic system control by single dual-function valve, describing design features and performance characteristics
08 p1111 A72-21024
- Composite F-111 fuselage design, analysis and testing, considering graphite, boron and glass-epoxy and boron-aluminum systems
11 p1575 A72-25453
- Low temperature environmental chamber for F-111 proof load testing, describing components of cold air forced convection recirculation system with liquid nitrogen injection
15 p2214 A72-32612
- F-111 stall inhibitor system with angle of attack limitation, describing interface with stability augmentation system
17 p2493 A72-35577
- F-111A inlet nozzle dynamic distortion diagnostics for airframe-propulsion integration based on flight and transonic wind tunnel tests

- FABRICATION**
NT SPACE MANUFACTURING
CW and pulsed InP transferred electron microwave oscillators, discussing fabrication techniques and electrical properties
01 p0036 A72-10633
- Metal matrix fabrication processes, considering plasma sprayed and diffusion bonded tapes and consolidated sheet material
01 p0074 A72-10733
- Fe, Ni and Co based high temperature thin gauge sheet alloys, discussing chemical and mechanical properties, fabrication and availability
01 p0084 A72-10742
- Graphite filament reinforced plastics strength, performance properties, fabrication processes and tooling concepts
[SME PAPER EM 71-205] 01 p0076 A72-10968
- Space vehicles development and fabrication cost estimation, deriving statistical-analytical formulas with allowance for technical complexity and learning factor
01 p0147 A72-11219
- Low cost metal matrix composition fabrication techniques, considering plasma spraying and continuous casting
03 p0364 A72-14236
- Asbestos fiber reinforced plastics composites fabrication techniques, discussing possible applications
04 p0537 A72-15086
- Si monolithic multispectral image photosensor array for satellite application, presenting fabrication and spectral response data
04 p0500 A72-15304
- Bulk type variable resistors with properties controlled by composition during fabrication, evaluating inorganic binders with optimal properties
05 p0701 A72-15754
- Si planar unijunction transistor fabrication, operation principles, parameter measurements and applications
05 p0635 A72-16196
- N-channel Si MOS microwave transistor, discussing fabrication, design, power gain, stability, noise figure, equivalent circuit and applications
05 p0636 A72-16361
- Refractory metal multilevel interconnection systems, comparing materials fabrication, yield and circuit performance with diffused Si planar runs and polycrystalline Si films
05 p0636 A72-16362
- Vapor-grown GaAs transfer electron microwave oscillator, discussing design, fabrication and CW power conversion efficiency
05 p0637 A72-16366
- Refractory materials fabrication characteristics for aerospace technology, presenting listing of synergic agents for use with inhibitors
05 p0681 A72-16774
- Microwires and microstrips fabrication from high strength deformation resistant aluminum alloys
05 p0680 A72-17207
- High temperature GaAs bipolar transistor n-p-n junction fabrication by vapor phase growth technique, considering I-V characteristics dependence on procedure
06 p0783 A72-17607
- Circuit boards contact assembly by special type rivets, discussing technical and economic advantages for prototype or small series fabrication of printed circuit devices
06 p0784 A72-18192
- GaAs IMPATT diodes performance improvement, describing fabrication methods to achieve 6.7 watts output at 15 percent efficiency
06 p0789 A72-18474
- Thin film materials and fabrication methods, discussing substrate requirements, surface properties, chemical stability, thermal conductivity and preparation of various resistors and capacitors
06 p0790 A72-18572
- Porous materials fabrication from chromium carbide powders, considering compaction procedures involving sinusoidal and pulsating vibrations
07 p1017 A72-19968
- Electron microscope interfaced computer for generating, registering and fabricating microelectronic device and circuit patterns
10 p1459 A72-23955
- Computer controlled electron beam machine for microcircuit fabrication, using digital technique capable of working on complex patterns
10 p1459 A72-23956
- Corrosion resistant fabrication methods in jumbo jetliners components to reduce maintenance and

repair downtime, discussing clad wing and fuselage skins 10 p1487 A72-24025

Homogeneous computing media, examining microelectronic fabrication, interconnection and control problems for MOSFET, bipolar transistors and IC structures 10 p1448 A72-24277

Magnetic integrated circuits design and fabrication problems involving branched and logic circuits and solid state structures controlled domains 10 p1448 A72-24279

Integrated circuits fabrication and design, describing internal physical processes, input and output signal values, functional operations and topological features 10 p1448 A72-24283

Schottky barrier crystal microwave video diodes design and fabrication to maximize burnout resistance and dynamic range for given detection sensitivity 10 p1450 A72-24553

High strength steel strip reinforced aluminum, discussing fabrication techniques and mechanical properties 10 p1498 A72-24839

Thermal diode heat pipe for advanced thermal control flight experiment, discussing engineering model analysis, design, fabrication and test [AIAA PAPER 72-260] 11 p1739 A72-25205

Constituents, processing, fabrication and structure effects on artificial graphic materials ablation performance in sublimation regime from high temperature tests 11 p1742 A72-25235

Multichannel photomultiplier matrix anode design for various tube types fabrication 11 p1631 A72-25687

Microwires and microstrips fabrication from high strength deformation resistant Al alloys 11 p1660 A72-26142

P-n junction diodes fabricated by ion implantation doping, calculating I-V characteristics for comparison with measured breakdown voltages 12 p1789 A72-27312

Fast response thermal compensation system for gas laser resonator length and frequency stabilization, discussing fabrication and design calculation 12 p1822 A72-27607

Solid state array camera based on diffused junction phototransistors, discussing sensor technology and fabrication 12 p1810 A72-27931

Cadmium sulfide solar cells stress analysis in relation to degradation caused by fabrication technology, discussing barrier layer formation process 12 p1757 A72-28020

Silicon solar cell fabrication technology developments for long mission life performance reliability over wide temperature and radiation intensity ranges 12 p1757 A72-28029

Plywrap process for low cost automated fabrication of fiber reinforced plastic composites, noting applications from missile interstages to modular housing 12 p1815 A72-28081

Composite materials fabrication, emphasizing high strength/stiffness to weight ratio as critical performance requirements 12 p1815 A72-28082

Fabrication, and physical, mechanical and ablation properties of three dimensional carbon-carbon cylinder composite materials 12 p1834 A72-28086

Addition type polyimide-graphite fiber composites fabrication from monomeric reactant solutions to improve mechanical properties and thermal stability 12 p1834 A72-28091

Resin bonded B-Al composites, discussing fabrication techniques and mechanical properties 12 p1815 A72-28098

DC 10 aircraft wing stringers fabrication and processing, discussing stress relieving and stretch form contouring techniques, aging and tempering processes and flaw detection [ASM PAPER W 72-31.3] 12 p1817 A72-28161

Chalcogenide semiconductor monostable threshold and bistable memory switching devices, discussing fabrication and performance 13 p1934 A72-30090

Back surface electric field Si cell characteristics and fabrication using alloyed-through contact process 15 p2182 A72-32130

Thermoplastic photoconductor media for holographic recording, discussing structure fabrication techniques and performance 15 p2239 A72-32359

Screen printed large thick film multilayer interconnection board assemblies for electronic packaging, discussing fabrication and feasibility 16 p2368 A72-33194

Plastic composite container cylindrical wall fabrication by two stage procedure combining radial and cross winding of glass fiber rovings 16 p2398 A72-33305

Silicon solar energy conversion for electrical power generation on spacecraft 17 p2494 A72-34186

Fabrication of refractory metals.

Design features, fabrication technology and in-pile testing of thermionic reactor fuel elements 17 p2559 A72-34187

Fabrication and testing of tungsten heat pipes for heat pipe cooled reactors. 17 p2636 A72-34596

Cylindrical diode characteristics with sublimed electrode surfaces. 17 p2527 A72-34607

An investigation of amorphous semiconductor memory devices utilizing thick film fabrication techniques. 17 p2527 A72-34682

NAND gate logic transistor circuit design, layout, fabrication and electrical parameters, noting base and resistors diffusion welding 17 p2530 A72-35069

Refractory materials fabrication characteristics for aerospace technology, presenting listing of synergic agents for use with halogenous inhibitors 17 p2571 A72-35277

Fabrication of boron/aluminum tubes, I-beams, and other structural shapes from tape materials. 17 p2560 A72-35664

Multicell thermionic fuel element fabrication technology. 18 p2708 A72-36152

Organization of fabrication to obtain high-reliability hybrid circuits 18 p2669 A72-37118

Industrial production of high-quality active semiconductor components 18 p2670 A72-37123

Fabrication of Hastelloy B sheet by powder metallurgy using blends of elemental powders and homogenization/deformation processing. 19 p2815 A72-37596

Boron and carbon fibers fabrication and properties for composite materials reinforcing elements, noting strength and stiffness dependence on stress orientation 20 p2944 A72-39437

Fiber arrangements for one, two and three dimensional ideal composite materials, discussing fabrication processes 20 p2940 A72-39446

Burn-in technique cost effectiveness in semiconductor and IC reliability enhancement, noting failure rate relationship to operating time 20 p2909 A72-39770

Processing of carbon/carbon composites - An overview. 21 p3072 A72-40552

Fabrication studies of Nb3Al superconductors. 21 p3097 A72-41182

Masking techniques for thin film and semiconductor devices and ICs fabrication, discussing conventional and computerized optical and electron beam systems 22 p3159 A72-42634

Fabrication and properties of graphite fiber reinforced magnesium. 22 p3193 A72-43035

German monograph - A contribution to the fabrication of thin-film transistors. 22 p3160 A72-43069

Automation of high reliability multilayer printed circuit board fabrication. 22 p3184 A72-43173

FABRICS

NT PARACHUTE FABRICS

Static and dynamic load measurements for stress-strain behavior and load-time characteristics of aerodynamic decelerator canopy fabrics, using metal foil strain gages 02 p0287 A72-11507

Orthotropic glass fabric laminate creep under combined torsion and tension, describing test facility 02 p0250 A72-12677

Heat transfer through fabrics by convection, conduction, radiation and vaporization related to skin temperature and thermal injury 03 p0319 A72-13700

Stress-strain characteristics of nylon-polyurethane coated fabric under biaxial tension and shear forces 05 p0736 A72-16108

Fire resistant fibrous materials for potential military and transportation applications, considering aromatic polyamide polybenzimidazole, fluorocarbon resin polymer, phenolic and glass fibers and fabrics 08 p1191 A72-21586

Manufacturing process for glass fiber chopped strand mats, discussing physical and electrical properties and applications to filament winding 16 p2414 A72-33303

Tridimensional textiles for composites. 17 p2571 A72-34935

Bending vibration test of glass-textolites, noting temperature effect on vibration damping properties 21 p3073 A72-41357

Asbestos-textolite coating required thickness calculation with allowance for aerodynamic heating, discussing softening mechanisms 21 p3074 A72-41709

FABRY-PEROT INTERFEROMETERS

Fabry-Perot interferometer application as filter with transmission windows at regular intervals in wave numbers to detect Raman scattered radiation from atmospheric gases 01 p0067 A72-10537

Fabry-Perot interferometer for studying spatial distribution of plasma electron concentration, discussing resolution using solid state gas laser light source 02 p0223 A72-11403

Fabry-Perot interferometer employing gas laser for plasma bursts electron concentrations measurements at 3.39 micron wavelength 02 p0223 A72-11404

Solid state Q switched laser emission frequency drift from Fabry-Perot rings interferograms 02 p0237 A72-12108

Fabry-Perot interferometers as narrow band optical filters, discussing transmission and construction for various wavelengths 03 p0355 A72-13059

Scanning Fabry-Perot interferometer for He-Ne laser spectral composition, discussing transmission coefficient, resolution, resonator dissipative losses, active medium saturation and light field spatial nonuniformity 03 p0356 A72-13190

Ruby ring laser single mode operation with Fabry-Perot etalons for selective feedback, discussing laser emission spectrograms 03 p0366 A72-13194

Pressure scanning Fabry-Perot magnetometer using KDP crystal and Glan-Thompson prism with echelle interferometer spectrograph for polarized Zeeman components 03 p0356 A72-13283

Asymmetrical profile calculation of spherical multiple wave interference patterns at finite distance with nonparallel mirror Fabry-Perot interferometer 05 p0662 A72-16193

Unmodulated He-Ne laser output frequency stabilization, using quartz Fabry-Perot etalon 05 p0669 A72-16670

Holographic information storage with reference wave modulation by Fabry-Perot interferometer, using two coherent sources 07 p0985 A72-19417

Wavelength tunable dye laser pumped by dual pulse lamps with Fabry-Perot interferometer in resonator 07 p1009 A72-20614

Defocused confocal Fabry-Perot spherical interferometer for analysis of Q switched visible and near IR lasers longitudinal mode outputs 10 p1481 A72-24564

Twilight and nighttime ionospheric temperatures from oxygen 6300 and 5577 A spectral line profiles obtained with Fabry-Perot interferometers 11 p1625 A72-26406

Magnetic field direction measurement in Tokamak toroidal plasma by laser light scattering, using Fabry-Perot interferometer 11 p1697 A72-26583

Dual resonant cavity absorption cell composed of Fabry-Perot interferometers excited by microwave sources, observing spectroscopic double resonance effects 12 p1806 A72-27264

Astronomical spectroscopy using ultraviolet resolution single Fabry-Perot interferometer in tandem with echelle Hilger monochromator 12 p1811 A72-27942

GaAs laser array Fabry-Perot structure to produce uniform TE polarization in emitted light 12 p1827 A72-28223

Fabry-Perot interferometer for line structure of helical TEA-carbon dioxide laser, noting variable frequency single mode emission 13 p1968 A72-28687

Methane absorption stabilized 30 meter laser strain meter with Fabry-Perot geometry for earth tide, nuclear explosion and free earth oscillation observation 14 p2109 A72-30323

Diffraction analysis of Fabry-Perot interferometer with metal mirror gratings for oblique incident polarized plane electromagnetic wave reception 15 p2233 A72-31413

Plasma electron density measurements using flat plate and semicircular millimeter wave Fabry-Perot interferometers [AIAA PAPER 72-672] 16 p2440 A72-34067

Fabry-Perot interferometer measurements of Brillouin scattering from He-Ne laser excited low temperature condensed gases 21 p3051 A72-40151

Compensation of Fabry-Perot surface defects. II - Silicon oxide compensating layers. 21 p3053 A72-40608

Use of air bearings in the construction of a scanning Fabry-Perot interferometer. 21 p3054 A72-40621

Space applications of Fabry-Perot modulator as alternative to mechanical devices, presenting optical

and electrical performance data for different temperatures
21 p3055 A72-40824

The effect of an interferometer selector on the spectrum of the characteristic frequencies of a dispersion resonator
22 p3176 A72-42245

Flat optical surfaces production methods for Fabry-Perot interferometers, describing Otte polishing process and quality test methods
22 p3177 A72-42446

Investigation of several nebulae in Cassiopeia with a Fabry-Perot interferometer.
23 p3333 A72-43233

Digitally pressure-scanned Fabry-Perot interferometer for studying weak spectral lines.
23 p3289 A72-43891

A differential laser Doppler velocity meter employing a Fabry-Perot interferometer
23 p3292 A72-44472

On the use of a Fabry-Perot interferometer for the study of Raman spectra of gases under high resolution.
24 p3426 A72-44904

Rhodamine laser emission spectral band control by plane parallel plates and polarizing prisms, noting band widening by resonator loss modulation with Fabry-Perot interferometer
24 p3410 A72-45418

FABRY-PEROT LASERS
U LASERS

FABRY-PEROT SPECTROMETERS
Precision frequency calibrator for Raman spectrometers, using Fabry-Perot etalon
07 p0983 A72-19318

Fabry-Perot spectrometer/premonochromator assembly integral transmissivity as function of spectral tuning noting selectivity by amplitude modulation
08 p1172 A72-22035

Spectral transmittance enhancement in Fabry-Perot narrow band light filter by wavelength shifted dielectric mirror technique
15 p2233 A72-31414

Fabry-Perot spectrometer adjustment for the compensation of Doppler shift from rapidly rotating and rapidly flowing sources.
21 p3053 A72-40607

Pressure-scanned echelle grating plus Fabry-Perot stellar spectrophotometer.
21 p3053 A72-40609

FACE [ANATOMY]
NT CHIN
NT NOSE [ANATOMY]
Post-synaptic potentials of motor neurons of the facial nerve nucleus evoked by afferent and corticofugal pulse stimulation
23 p3257 A72-44091

FACE CENTERED CUBIC LATTICES
Carbon atoms thermodynamic properties in bcc and fcc Fe-Si-C solid solutions from equilibrium measurements with hydrogen-methane gas mixtures as function of temperature and carburizing gas composition
01 p0083 A72-10207

Binary alloys ground state energy and superstructures, examining bcc and fcc Ising model systems with first and second neighbor interactions
01 p0083 A72-10210

Magnetic transformation effect on creep behavior of fcc nickel-cobalt alloy compared with self diffusion data in Curie temperature vicinity
01 p0083 A72-10391

Cobalt and lanthanum with face and body centered lattices, studying plastic deformation during allotropic transformations under sliding friction and gripping
01 p0074 A72-10579

Ultrasonic bond formation between soft fcc metals, observing dislocation processes
04 p0526 A72-14837

Quaternary Mo-Zr-Cr-C system, investigating fcc phase ligation from phase diagram by chemical, metallographic and X ray analyses
05 p0666 A72-16099

Vacancy effects on residual electrical resistance of binary ordering fcc lattice alloys as function of composition and annealing temperature
06 p0832 A72-18422

Jerky flow /serrated yielding/ in Co-Ni-Cr-C fcc alloys during tensile testing, noting no correlation to dislocation-precipitate interactions
07 p1016 A72-19940

Ni-Cr-Ti alloy hardening during intermetallic phases precipitation, discussing atom segregations, Guinier-Preston zones and fcc and hcp lattices
07 p1019 A72-20152

Isotope effect calculation hydrogen and deuterium solubility in fcc metals, analyzing elastic vibrational spectrum of crystal with impurity atom in internode
10 p1498 A72-24873

Dislocation bands in electrolytically hydrogen charged fcc Ni-Co alloy, describing band structure in terms of band axis and planes and Burgers vector
11 p1669 A72-26947

Ordering in fcc lattice ternary alloys with allowance for atoms interactions, noting phase transformation critical temperature and superlattices existence
13 p1976 A72-28691

Fcc lattice ferronickel alloys para-process susceptibility anomalous increase explanation by phase transition thermodynamic theory
13 p1977 A72-28911

Microscopic substructure in high temperature fatigued fcc austenitic steel and aluminum, studying cross slip lines and crack initiation
13 p1979 A72-29448

Binary ordering alloys with fcc lattice, studying volume effects on solubility of impurity atoms in interstices
13 p2023 A72-29907

Electron microscope study of precipitated fines of austenitic steel containing V and N, noting heat treatment effect on fcc crystal structure
15 p2254 A72-31523

Fcc metal defect structure due to ultrasonic fatigue observation via transmission electron microscopy for dislocations
15 p2256 A72-31836

Face centered solid crystal cell spatial distribution effect on body surface-reflected molecular beam intensity distribution
16 p2430 A72-33046

Fcc in thin films and bcc in thick vacuum condensates deposited from Nb molecular beams obtained by evaporation and condensation in mass spectrometer
16 p2407 A72-33528

Crystal lattice disarrangement by melting In-Tl alloy, noting fcc and bcc metastable phases formation during rapid crystallization
16 p2441 A72-33536

Geometric/chemical model of lattice dimensions of Laves phases of binary alloy bcc and fcc structures
16 p2409 A72-33801

Tensile deformation of Co single crystal in high temperature fcc phase, noting dislocations effect on work hardening
16 p2410 A72-33819

Effects of disorientation of grains on the viscoplastic behavior of fcc polycrystals
17 p2634 A72-35407

Viscoplasticity of face-centered-cubic metals
18 p2703 A72-37017

Microscopic substructure in face centered cubic metals fatigued at elevated temperatures.
20 p2935 A72-38880

Antiferromagnetic dispersion, absorption and light scattering in NiO and other face centered cubic crystals.
20 p2960 A72-39458

A study of the effect of grain orientation misfit on the viscoplastic behavior of polycrystalline metals /fcc system/
24 p3414 A72-45251

FACETS
U FLAT SURFACES

FACSIMILE COMMUNICATION
Molnaya-Orbit communication satellite system, discussing operational quality, maintenance, television transmission facsimile, sound broadcast and multichannel telephony
01 p0023 A72-10046

Facsimile bandwidth compression by picture elements reduction with contrast preservation, discussing analog processing algorithm and application to weather satellite photographs
06 p0772 A72-17406

High speed facsimile transmission system based on LR70 laser scanner, presenting typical system output image
15 p2248 A72-32041

Intraframe coding for picture transmission.
18 p2657 A72-36252

FACSIMILE TRANSMISSION
U FACSIMILE COMMUNICATION

FACTOR ANALYSIS
Statistical methods application to parachute materials evaluation, using factorial experiments for multiple variables simultaneous effects analysis
01 p0005 A72-10317

Factor analysis of frontal and occipital brain regions EEG indices interzonal variability, relating autocorrelation function parameters to neuron ensembles force level
06 p0764 A72-18057

Application of factorial analysis of correspondences to the compression of image signals
17 p2517 A72-35671

Dual amplitude construction possibility from general field theory couplings and propagators, considering factorization on multiperipheral configuration in translational and rotational modes
18 p2713 A72-36516

FACTORIAL DESIGN
Factorial design model of materials fatigue failure under narrow band random vibrations
01 p0140 A72-10942

Welded machine component service history effects on residual fatigue life from statistical evaluation of factor experiment
14 p2107 A72-30278

FACTORIES
U INDUSTRIAL PLANTS

FACULAE

Brightness correlation and mapping of weak photospheric magnetic fields and faculae using CN 3883-A spectroheliograms
03 p0414 A72-12927

High resolution magnetographic and spectrographic observations of plage fields and photospheric effects in weakly active regions
03 p0429 A72-13308

Plage magnetic fields associated with downward velocities from magnetograph filtergrams of opposite circular polarizations in CA I absorption line
03 p0429 A72-13312

Solar magnetic field sector boundaries, discussing photospheric field direction, activity regions, flares, coronal enhancements, faculae and geomagnetic response [AD-734627]
03 p0433 A72-13359

Solar photospheric facula blue light limb photographs, determining spatial variation in contrast levels
03 p0434 A72-13494

Solar activity asymmetry on two hemispheres in 1959-1969, considering spots, faculae, prominences and corona
05 p0718 A72-16511

Photospheric network, magnetic fields, Ca emission and continuum faculae from multichannel magnetograph observations
13 p2045 A72-29705

Solar video magnetographic observations of magnetic and H alpha plage correspondence on 21 March 1971
13 p2045 A72-29707

Sunspot energy deficit relation to model depth, deriving facular model with two dimensional radiative transfer analysis
13 p2045 A72-29712

Alfven wave transmission in sunspot umbral magnetic flux tube, noting standing progressive waves and energy dissipation in facular regions
13 p2049 A72-29937

Eleven year period solar photospheric magnetic field evolution, comparing latitudinal variation with sunspots, faculae and prominences distribution and green-line corona intensity
15 p2317 A72-32778

Sunspot area east-west asymmetry dependence on location in chromospheric facula or plage, considering solar atmosphere optical and geometric depth changes
15 p2318 A72-32787

Doppler shift of solar photospheric spectral lines related to downward motions over plages
17 p2617 A72-35705

Photospheric faculae brightness influence on solar gravitational oblateness determination, considering criticism of Dicke-Goldenberg argument on Mercury excess perihelion motion
19 p2855 A72-37239

Faculae and the solar oblateness.
19 p2855 A72-37240

Behavior of carbon monoxide in the upper photosphere
21 p3114 A72-41777

FAHRENHEIT TEMPERATURE SCALE
U TEMPERATURE SCALES

FAIL-SAFE SYSTEMS
Fail-operational automatic landing system for Boeing 747 aircraft, noting reduction in allowable minimum weather conditions in U.S. and UK
01 p0098 A72-10961

Fail-safe sequential machines realization using k-out-of-n code for state assignment and onset and off-set methods for excitation circuit construction
02 p0184 A72-11477

Fault-tolerant digital computer logic design for dynamic and interactive recovery with data integrity after error, discussing hardware and software functions requirements
02 p0184 A72-11480

Mathematical reliability modeling for fault tolerant digital computers, summarizing error masking and standby sparing reliability equations
02 p0184 A72-11481

STAR self testing and repairing fault tolerant digital computer for outerplanet exploration spacecraft, discussing architecture, reliability analysis, software and peripheral system automatic maintenance
02 p0184 A72-11482

Soviet progress and bibliography on fault tolerant digital computers design, emphasizing redundancy application to achieve high reliability
02 p0184 A72-11484

Ultrareliable fault-tolerant digital computer design with protective standby replacement and hybrid redundancy, presenting mathematical models for system reliability evaluation
02 p0185 A72-11487

Three-failure-tolerant digital computer system design using adaptive majority voting in hardware and software for real time control application
02 p0185 A72-11488

Distributed fault-tolerant aerospace digital computer design with duplicated central multiprocessor,

- triplicated memory and conventional redundancy local processors for error detection and correction 02 p0185 A72-11489
- Hardware and software parallel digital computer system described by flow table model, calculating output hazard for unbounded line delay effects 02 p0185 A72-11490
- Government role in widebody aircraft introduction to air carrier service, discussing aircraft maintenance, design and fail-safe structural configurations 07 p0911 A72-18831
- Engine out flight training safety, recommending certification requirements or training procedures changes 07 p0911 A72-18834
- Lunar landing mission escape and rescue concepts, considering emergencies during earth orbit, translunar, lunar orbit, surface and rendezvous, transearth and earth reentry phases 09 p1396 A72-23157
- European Special Space Tug electronic subsystem requirements, considering strapdown inertial measuring unit, remote sensors, computer and fail-safe backup system 09 p1396 A72-23258
- N fail-safe logics for circuit fault restoration, comparing with failure probability of majority voting scheme and quadded logic 09 p1283 A72-23420

- System reliability improvement technique for identification and prevention of failures, using Experience Storage Program for design problem documentation collecting, storage and retrieval 10 p1486 A72-24021
- System diagnosis based on ordered statistical samples, discussing Kolmogoroff-Smirnoff detector use for on-line computers in testing noisy systems 10 p1482 A72-24597

Approximate stress intensity factor for corner flaw emanating from quarter infinite solid edge, based on Smith solution for semicircular flaw

10 p1559 A72-24898

Russian book on aircraft engine reliability covering defects, fractures and failure analysis, service life prediction, production deficiencies and operational conditions

11 p1706 A72-26068

Theoretical fatigue test procedure for reliability analysis of machine parts, calculating fatigue probability in load carrying components

11 p1640 A72-26244

Automatic search for Huffman sequential logic circuit breakdown detection sequence, using VEGA program through matrices and graphs utilization

11 p1612 A72-26549

Onboard localization of aircraft electrical equipment failures, using list checkout, automatic indication and dynamic programming method

11 p1578 A72-26895

Fatigue failure information in structural design, considering low cycle, cumulative damage and time dependent conditions

12 p1884 A72-27641

Reliability lower confidence limit estimation for serial systems with failure in any subsystems resulting in overall failure

13 p1962 A72-28362

Failure rate function nonparametric estimators comparison on basis of asymptotic and Monte Carlo mean square errors

13 p1985 A72-28364

Mathematical models for complex system debugging in initial life period, noting maximum likelihood estimates for failure rate functions

13 p1962 A72-28365

Finite time element method for failure probability prediction in multiple load-path system with random loads, noting flow chart for suggested computer program

13 p2052 A72-28369

High temperature low cycle fatigue of alloys as process of crack nucleation and growth to ultimate failure

13 p2058 A72-29445

Failure phenomena relationship to kinetic equation for defect buildup from brittle fracture analysis of composite glass plastic in uniaxial eccentric tension

14 p2164 A72-30426

Stress relieving heat treatment for service failure prevention of stressed austenitic stainless steel components of high temperatures, noting cracking regulation by oxidation mechanism

14 p2117 A72-30538

Solid rocket propellants storage life analysis and prediction by mathematical modeling of physical-chemical failure generating processes

14 p2145 A72-30762

Product reliability prediction from failure mode analysis, examining component design, quality control, engineering analysis configuration selection and product testing

[ASME PAPER 72-DE-17]

14 p2108 A72-30863

IC reliability assessment based on defects and failure mechanisms analysis instead of MTBF estimations

14 p2091 A72-31166

FRAM /failure rate appraisal machine/ concept and application for modular electronic and electromechanical assemblies environmental cycling tests, noting technical and economical effectiveness

14 p2093 A72-31169

Time to failure under axial tension determined for gallium selenide single crystals at constant temperatures, noting tensile strength dependence

15 p2290 A72-31387

Soft gyro and accelerometer failure detection for redundant gimbaled inertial measurement units by skew sensors

15 p2270 A72-32187

Optimal algorithm for failure detection and identification in redundant gyro-accelerator sensor systems, including Monte Carlo simulation

15 p2270 A72-32188

Failure detection techniques for Space Shuttle redundant multiple gimbaled inertial measurement units, using simulated boost and entry trajectories

15 p2270 A72-32189

Particulate composite model deformation and failure behavior under plane uniaxial compressive stress, using finite element method

15 p2258 A72-32556

Mathematical model for reliability analysis of modularly redundant electronic systems with unequal failure rates for operating and standby units

16 p2398 A72-33344

Weibull distribution parameters estimation for general device class from limited failure data through regression models, using least squares method

16 p2398 A72-33349

Russian book on metal fatigue and inelasticity covering structural inhomogeneities, static and dynamic loading, failure mechanisms, deformation, temperature effects and test methods

17 p2566 A72-34649

Development of electronic part failure rates for long-duration space missions.

17 p2527 A72-34684

Weibull life tests of Kemet solid tantalum chip capacitors at high accelerated voltages.

17 p2527 A72-34685

Techniques for control of long-term reliability of complex integrated circuits. II - A technique for the prediction of failure rates for MSI and LSI devices.

17 p2528 A72-34687

Failure analysis of plastic and ceramic packaged IC, describing plastic encapsulants chemical removal and radiographic failure detection procedures

17 p2528 A72-34707

On the measurement of mechanical tension in plastic encapsulated devices by means of piezo-resistance.

18 p2669 A72-37112

Production and test facilities availability effect on costs involved in obtaining item at required quality level, examining component rejects and defectives

18 p2670 A72-37133

A model of a nonlinear viscoelastic medium allowing for the effects of cumulative damage

19 p2871 A72-37528

Regularities in the deformation and failure of commercial iron in a complex stress state under low-temperature conditions

19 p2818 A72-38005

Interpreting electron fractographs of stress corrosion in aluminum alloys.

19 p2821 A72-38387

Maximum likelihood failure detection for redundant inertial instruments.

[AIAA PAPER 72-864]

20 p2923 A72-39133

Creep-fatigue interaction interpretation for austenitic stainless steels from crack growth viewpoint, investigating time and cycle dependent failure at elevated temperature

20 p2937 A72-39213

The broad range detection of incipient failure using the acoustic emission phenomena.

20 p2925 A72-39286

Probability model and causal approach to failure mechanisms and reliability of control systems applied to IC

21 p3024 A72-40711

Failure diagnostics in mathematical models of automatic control systems

21 p3038 A72-40712

Miniaturized IC semiconductor device fabrication and failure under electrical load, using scanning electron microscope

21 p3035 A72-41492

Investigation of fatigue-failure mechanisms and inelastic deformation of metals in torsion

21 p3071 A72-41703

Signal classification through quasi-singular detection with applications in mechanical fault diagnosis.

22 p3158 A72-41976

Computer-operated data acquisition and control system for automatic diagnostic monitoring of propulsion research instrument

22 p3216 A72-42684

Fracture analysis for linear elastic material in antiplane strain, discussing fast moving cracks propagation, flint knapping and equations of motion

22 p3237 A72-42801

Transport aircraft wing compression panel failure in bending test due to stringer interruptions, analyzing structural deficiency via column and beam bending theories

22 p3183 A72-42827

Dangerous structural failure characteristics due to idealized design optimization, discussing shell buckling instabilities

22 p3240 A72-42895

Statistical method of failure analysis for redundancy forms selection, noting aircraft safety and reliability

22 p3139 A72-42973

Prediction of thermal-shock resistance during heating at very high rates.

22 p3241 A72-43000

Man serviced spacecraft systems reliability and maintainability optimization methodology, developing parametric data based on failure modes analysis, components MTBF, duty cycles, redundancy and costs [SAWE PAPER 943]

23 p3343 A72-43483

Fracture mechanics of composites.

23 p3345 A72-43509

Asymptotic reliability estimates of monotonically structured complex logic systems with low and high component failure rates equivalent with exponential or Weibull distributions

23 p3267 A72-44004

Electron fractography of fatigue failure and macrocrack propagation in dual phase Ti alloy during cyclic loading at minus 140 to plus 150 C

23 p3303 A72-44097

Charts for confidence limits and tests for failure rates.

23 p3294 A72-44395

Logical groupings of preventive maintenance and replacement policies for stochastically failing items to reduce cost under continuous surveillance

24 p3406 A72-44653

An interactive approach for the generation and verification of test sequences in a logic system

24 p3382 A72-44662

Robert Bruce's spider problem extended - Reliability of adaptive experimental systems.

24 p3406 A72-44666

The problems of reliability growth and demonstration with military electronics.

24 p3384 A72-44670

Reliability analysis based on time to the first failure.

24 p3455 A72-44727

Automatic software diagnostic package for airborne computer, using testing computer for decision making based on received data

24 p3383 A72-45669

Fault-tolerance experiments with the JPL STAR computer.

24 p3383 A72-45671

Composite materials durability and strength estimations, using reliability theory for failure rate characteristic

24 p3418 A72-45733

Mechanical properties of heat treated hardened high strength steel, investigating microstructure relationship to failure characteristics

24 p3416 A72-45734

Graphites fracture under thermal stresses, considering stress-strain relations calculation method for annular samples

24 p3418 A72-45762

FAILURE MODES

Failure modes of IC containing MOS devices, considering threshold voltage variations, oxide and silicon defects and leakage

02 p0194 A72-12443

High intensity ionizing gamma ray pulsed radiation effects on Gunn diode microwave oscillator failure modes

03 p0334 A72-14089

Anodized aluminum metallization for reducing electromigration induced failure modes in silicon wafers

03 p0365 A72-14286

Thermal deformation effects on metal bond fatigue failure modes in small signal transistors, micro and LSI circuits

03 p0365 A72-14291

Bonding mechanisms and failure modes in thermocompression bonds of Au plated leads to Ti-Au metallized substrates, discussing Cu lead frames plated with Ni and Au

03 p0365 A72-14292

Anodic layer thickness effect on fatigue crack initiation and fracture mode in mono and polycrystalline aluminum

05 p0672 A72-16015

MOS IC reliability based on p-channel enhancement mode transistors, discussing failure modes and mechanisms

08 p1142 A72-21588

Laser radiation effects on optical glass volume and surface, discussing failure characteristics

08 p1182 A72-21655

Reliability analysis of redundant and nonredundant systems with different component failures, using probability theory

08 p1180 A72-22053

Functional readiness of periodically inspected recoverable systems with different failure causes

08 p1180 A72-22055

Helically bound wire reinforced sprayed Al tubes and rings, investigating failure mechanism dependence on fracture modes from tensile and bending tests

09 p1330 A72-23174

Failure modes, effects and criticality analysis method for evaluating spacecraft reliability characteristics

10 p1485 A72-23974

Failure mode control in plastic packaged IC for screening and quality assurance

10 p1447 A72-24010

Fatigue failure modes of composite materials, considering fiber breakage, delamination, matrix cracking, interface debonding and void growth

11 p1670 A72-25461

Failure modes effect on compressive strength of boron-epoxy composites tested on coupons, honeycomb sandwich columns and beams

11 p1671 A72-25466

Mathematical model for digital systems reliability, determining probability of success and of various failure modes

13 p1923 A72-28356

Axisymmetric ductile rotating shaft failure modes, considering fatigue, buckling and impact stress factors [ASME PAPER 72-DE-40]

14 p2167 A72-30873

Mechanical properties of composite materials, discussing elastic deformation and failure modes

15 p2260 A72-31442

Local buckling analysis for triangular-corrugated core sandwich panels in compression, noting buckling mode nodal line features

15 p2326 A72-31709

Electronic circuit reliability prediction model with statistical dependence for detailed failure modes

16 p2371 A72-33345

- Stress and parametric change analysis for failure mode identification and reliability screen tests of LSI circuits, noting MOS inverter operation and RAM mechanization
17 p2528 A72-34706
- Observations of failure modes in carbon composite materials.
17 p2571 A72-35288
- Reliability analysis of an intermittently used system with N types of failure.
18 p2693 A72-36024
- Composite materials crack propagation and failure modes leading to fracture instability, discussing maximum strength conditions and fatigue
18 p2703 A72-36394
- Reliability assurance of space equipment components, discussing drift and failure modes, computerized simulation and thermal maps
18 p2743 A72-37127
- Test structures - Powerful technique for quality evaluation and reliability assessment of MSI and LSI /medium and large scale integrated circuits/
18 p2671 A72-37143

20 p2935 A72-39139
- Designing to avoid stress-corrosion and/or fatigue failures.
[AICHE PAPER 15C] 21 p3116 A72-40125
- Cyclic stress-strain induced buckling and fatigue failure in cold-rolled steel and tabulating and diagramming mechanical properties
21 p3065 A72-40233
- Low carbon steel S-N diagram for stresses ranging to fatigue limit, noting cyclic creep, macroplastic cyclic stress and fatigue failure
21 p3122 A72-41353
- Non-linear rotor bearing behavior.
21 p3061 A72-41518
- Ti based beta alloy strain hardening and failure characteristics, emphasizing initial deformation phase and microdefect onset and development
21 p3071 A72-41716
- Thermoplastics fatigue life dependence on stress with allowance for heating laws, noting heat accumulation effect on thermal failure
22 p3196 A72-42164
- Boundary value problems for concentrated forces acting inside semiinfinite anisotropic plate under plane stress, investigating failure modes of unidirectional composites
23 p3344 A72-43495
- Aluminum matrix composites fracture mechanism dependence on static loading conditions and reinforcing filament type, investigating failure modes in tension and compression tests
23 p3299 A72-43497
- Elastomers fracture strength and failure modes under tension, tearing, ozone cracking, fatigue and abrasive wear associated with viscous resistance energy losses
23 p3305 A72-43506
- Mechanics of failure of fibrous composites.
23 p3345 A72-43508
- Accelerated life testing of thick film resistors.
24 p3384 A72-44668
- Cumulative damage stochastic models and distributions of strength of steels and graphite.
24 p3412 A72-44673
- FAIRCHILD MILITARY AIRCRAFT**
U MILITARY AIRCRAFT
- FAIRINGS**
Motion equations of constrained split fairing for avoiding contamination of sounding rocket payload environment by uncontained explosive actuation device
05 p0724 A72-16102
- FALKNER-SKAN EQUATION**
Reversed flow solutions of Falkner-Skan equation in boundary layer theory
11 p1676 A72-25361
- Boundary value problems in boundary layer theory, discussing Falkner-Skan equation similar solutions existence theorems
11 p1677 A72-25525
- Falkner-Skan problem extension to MHD flow past nonconducting body by imposing magnetic field with lines of force parallel to undisturbed streamlines
15 p2287 A72-32405
- Numerical check on boundary layer equations asymptotic expansion solutions for Falkner-Skan reverse flow and unit Prandtl number compressible boundary layer with blowing
15 p2219 A72-32589
- Unsteady Falkner-Skan flow solution by finite difference method for pressure gradient effect on transient response of laminar boundary layer
16 p2376 A72-33015
- Falkner-Skan flows with slip.
23 p3281 A72-44068
- FALLING SPHERES**
Extraterrestrial magnetic spheroid concentrations observed in October 1967 and 1969 proposing relationship to rainfall frequency
08 p1226 A72-21109
- Nonstable oscillating motions positive measure set in dynamic system with noncompact phase space, considering elastically rebounded falling sphere on horizontal plate
08 p1210 A72-22188
- Atmospheric density variations from meteorological rocket soundings, discussing data reduction methods and error sources for bead thermistor and inflatable falling sphere instruments
11 p1626 A72-26473
- FAN IN WING AIRCRAFT**
Fan-in-wing model noise due to cross flow generated in- and outflow distortions and unsteady rotor blade forces
[ASME PAPER 72-GT-92] 11 p1571 A72-25666
- Flow distortion and performance measurements on a 12-inch fan-in-wing model for a range of forward speeds and angle of attack settings.
22 p3134 A72-42323
- FANLIFT DEVICES**
U LIFT FANS
- FANS**
Fan noise estimation from equation involving delivery volume and pressure to correct ratings to generated sound power levels
16 p2377 A72-33323
- Investigations on the stability of the characteristic of radial flow fans.
24 p3363 A72-45356
- Application of cascade and actuator disc theories to computer aided design of fans.
24 p3363 A72-45359
- An approximate method for the calculation of the characteristics of axial-flow fans.
24 p3363 A72-45369
- FAR FIELDS**
Far field patterns of hourglass reflector phased array for electronic despin of communications antenna on spin stabilized satellite
01 p0029 A72-10666
- Corrugated conical horn antennas with arbitrary groove depth, considering far field radiation patterns
01 p0040 A72-10680
- Far field diffraction due to annular apertures of plane wave light rendered partially coherent by atmospheric turbulence
01 p0103 A72-11166
- Spherical aberration effect on far field Fraunhofer diffraction for circular aperture illuminated by quasihomochromatic partially phase coherent light
01 p0103 A72-11188
- Fraunhofer hologram for recording square of modulus of far field radiation pattern due to mixture of known and unknown source distributions
02 p0224 A72-11548
- Gas dynamic laser analysis based on phase cancellation model, showing flow induced phase nonuniformity minimization for far field intensity improvement
[AIAA PAPER 72-217] 05 p0669 A72-16857
- Subsonic wind tunnel investigation of aircraft wake far field structure, measuring trailing vortex decay by yawhead pressure probe
[AIAA PAPER 72-40] 05 p0607 A72-16902
- E-plane dielectric slabs symmetrical loading effects on horn aperture efficiency enhancement from far field calculation
[AD-738714] 06 p0781 A72-17347
- Radio waves arrival angles distribution function in Fraunhofer diffraction zone upon plane wave normal incidence on inhomogeneous scattering layer
07 p0938 A72-19017
- Displacement and profile diffractographic measurement using changes in far field diffraction patterns of slit aperture between test and reference object
[CLEA PAPER 11.5] 07 p0984 A72-19390
- Antenna optimal radiation patterns, discussing antenna synthesis based on desired far field characteristics
08 p1138 A72-20743
- Gain function for planar phased array far field pattern, deriving calculation method for excitation pattern for prescribed radiated beam behavior
08 p1132 A72-21328
- Far field radiation pattern from magnetic line source covered with moving uniaxial or isotropic nondispersive dielectric or cold plasma sheaths
08 p1137 A72-21985
- Atmospheric refraction effects on IR far field irradiance distribution based on model of nonlinear interaction including absorption, transverse flow and vibrational relaxation effects
09 p1350 A72-22607
- Monograph on slotted circular waveguide analysis covering boundary value problem solution by Wiener-Hopf and Galerkin procedures and application to far field determination
09 p1279 A72-22925
- Electromagnetic wave scattering by arbitrarily oriented circular ice cylinders, deriving far field intensities for linearly polarized incident waves
09 p1280 A72-23341
- Hypersonic vehicle far field behavior for sonic boom strength, position and positive phase duration
11 p1617 A72-26002
- Far field diffraction of Gaussian light beam passing through ultrasonic cylindrical standing waves
11 p1687 A72-26052
- Radiation resistance of baffled beam modes from far field acoustic power intensity
11 p1687 A72-26058
- Radiation resistance for natural modes of rectangular panel from far field acoustic radiation energy distribution
11 p1687 A72-26059
- Diffraction coefficients of scalar field for higher order edges and vertices, noting far field behavior of boundary layer expansion
11 p1617 A72-26158
- Near and far field energy and power density distributions of multi-transverse mode double discharge TEA laser beam
[AD-743823] 11 p1651 A72-26671
- Microwave antenna radiation patterns from far field measurements by radio holograms with probe
11 p1598 A72-26718
- Radiation patterns of circular loop antenna in isotropic compressible plasma, discussing far fields for electromagnetic and electron plasma waves
12 p1790 A72-27491
- Torsional waves far-field structure in infinite elastic rod of elliptical cross section, using perturbation method
13 p2057 A72-29004
- Beam divergence prediction for multiple transverse laser modes, proposing tables and graphs to determine angular spread in far field
15 p2247 A72-32031
- Plane electromagnetic wave diffraction on periodic arbitrary profile array, presenting near and far field asymptotic characteristics
15 p2202 A72-32660
- Far field sonic boom approach effects, describing Whitham theory extension for ultimate N wave deviations for body configurations with continuous or discontinuous tangent
16 p2347 A72-33010
- Radiation from a magnetic line source covered with an anisotropic warm plasma slab.
17 p2587 A72-34386
- Theoretical analyses on Apollo lunar surface electrical properties experiment transmitter antenna.
17 p2515 A72-34423
- Focused irradiance fluctuations beyond a layer of turbulent atmosphere.
17 p2518 A72-35754
- Transient acoustic point source disturbance transmission in two dimensional idealized jet, noting velocity profile effects on noise radiated to far field
18 p2679 A72-36406
- Diffraction by an aperture between two wedges.
18 p2712 A72-36938
- A theoretical calculation of edge smear in far-field holography.
19 p2797 A72-37610
- Plane TE polarized electromagnetic wave diffraction on infinite conducting cylinder in nonhomogeneous medium, calculating far field diffraction patterns
19 p2768 A72-38656
- Integral equation and optics methods for far field radiation characteristics calculation of plane antennas with arbitrary reflector-source configurations
21 p3029 A72-40522
- Eigenvalues associated with balanced hybrid modes expressed in closed form to derive conical scalar horn antenna far field radiation patterns
21 p3032 A72-40630
- Single transverse mode operation of a pulsed volume excited atmospheric pressure CO₂ laser using an unstable resonator.
21 p3064 A72-41197
- Diffraction by an infinite corner reflector transversely loaded by concentric dielectric slabs.
22 p3159 A72-42301
- Machine code for finite difference solution of wake vortex governing equations and far flow field prediction in trailing vortices, developing turbulent energy model
[AIAA PAPER 72-989] 22 p3134 A72-42326
- Master oscillator/power amplifier laser systems output beam divergence and far field brightness, comparing to Gaussian plane waves
23 p3296 A72-43901
- Time variations in the far-field diffraction patterns of spatial modes from electron-beam-pumped semiconductor lasers.
24 p3409 A72-44712
- FAR INFRARED RADIATION**
Far IR Fourier spectrometer with built-in real time digital computer for routine physical and chemical spectroscopy
04 p0520 A72-14523

Gallium-doped Ge bolometers and triglycine sulfate pyroelectric far IR detector, testing performance as functions of frequency and temperature
04 p0525 A72-15601

Photoconductive detection and generation of far IR radiation in high purity epitaxial GaAs
04 p0563 A72-15605

Far IR molecular laser variable interference filter for optimization of output coupling conditions and maximum power output
04 p0532 A72-15616

Ruling defects of echelette diffraction gratings for far IR high luminosity spectrometers
05 p0689 A72-16192

CW gas laser operating in far IR, discussing water vapor excitation by dc discharges
07 p0946 A72-19961

Transmission and passband properties of polyethylene echelette gratings and combined filters for long wave IR spectrum
08 p1210 A72-22038

Michelson interferometer application for continuous gas analysis in far IR
10 p1480 A72-24174

Ground based IR astronomical telescope detectors, relating F number and optical requirements to near, far, and intermediate IR observation
10 p1481 A72-24249

Spherical specularly reflecting nonresonant cavities for use as absorption cells in far IR spectroscopy, predicting performance
11 p1629 A72-25301

Far IR filters for rocket-borne radiometer, discussing UH theory and characteristic impedance determination
11 p1629 A72-25310

Upper atmosphere mm emission spectrum from aircraft observation, comparing with rocket and ground based data
13 p1923 A72-29963

Cooperative enhanced scattering cross section of far IR laser radiation from nonthermal theta pinch plasmas in weak magnetic field
15 p2288 A72-32417

Hydrogen to helium mixing ratio in giant planets from far IR spectroscopy for atmospheric thermal models and greenhouse effect calculations
15 p2315 A72-32727

Variable output coupling device for far infrared laser.
17 p2562 A72-34643

Low temperature interference filter design for atmospheric windows far IR photometers based on selective reststrahlen reflection of crystals
19 p2796 A72-37586

Far-infrared and uvby photometry of V 1057 Cygni.
20 p2973 A72-39887

Pure and compensated Ge and Si far IR spectral properties at liquid He temperatures for bolometer detector application
21 p3013 A72-40822

Optical properties of transmission echelette high-pass filters.
21 p3055 A72-40823

Absolute measurement of the solar brightness in the spectral region between 100 and 500 microns.
22 p3225 A72-42389

Directional far IR emission from sunlit lunar surface, determining brightness temperature as function of observer and sun elevation angles and surface parameters
22 p3226 A72-42537

FAR ULTRAVIOLET RADIATION

NT LYMAN ALPHA RADIATION

NT LYMAN BETA RADIATION

Photometric calibration of long wavelength vacuum UV standards by synchrotron and plasma black body radiation
01 p0073 A72-11399

Stabilized hydrogen plasma arc spectral radiation as light source for vacuum UV radiometry, comparing output with W strip and carbon sources
01 p0073 A72-11400

Solar flares far UV radiation time structure correlation with hard X rays
02 p0272 A72-11773

EUV and soft X ray images of sun from sounding rocket experiments
03 p0415 A72-12934

Solar flare EUV flashes from sudden ionospheric frequency deviation observations
03 p0407 A72-12946

High spatial resolution solar X-ray and far UV instruments, employing glancing incidence optics
03 p0353 A72-13045

Far UV astronomical studies with moderate spectral and spatial resolution instruments, discussing Lyman alpha line background
03 p0417 A72-13049

Integral image tube optical systems for far UV narrow band and broad bandpass photography from spacecraft outside atmosphere
03 p0355 A72-13063

Vacuum UV spectra of free plasma column in microwave field at high pressures for discharge in helium-deuterium mixture
03 p0394 A72-13084

Extreme UV observations of solar chromosphere-corona transition region, evaluating various theoretical and empirical models
03 p0422 A72-13205

Solar far UV spectrum observations for chromospheric coronal structure determination, reviewing ionization balance, relative abundances and limb/disk ratios
03 p0423 A72-13216

Late twilight airglow vacuum UV spectra from sounding rocket observation, noting conjugate-point electron excitation role in O I emissions
03 p0350 A72-13525

Oso-3 satellite observation of solar flare associated EUV bursts, comparing with microwave radio bursts [AD-739641]
03 p0413 A72-13529

Formaldehyde photoionization and absorption spectrum measurements in vacuum UV region, using single configuration self consistent field procedure for Rydberg states and model
03 p0321 A72-13856

Vacuum UV irradiation of silicon dioxide, discussing positive charging for photon energies above threshold for electron-hole pair creation
03 p0403 A72-14080

Early type supergiant far UV spectrum observations, showing broad absorption feature near 1720 Å
04 p0578 A72-15315

Extreme UV observations of flare surge at solar limb
05 p0710 A72-16520

Interstellar extinction curves for stellar far UV radiation, discussing required multicomponent interstellar dust model
05 p0720 A72-16717

Neutral B I vacuum UV spectra from hollow cathode light source, remeasuring electron transitions to higher accuracy
06 p0852 A72-17896

Carbon like spectra and ground energy levels of Sc, Ti and V ions in 16-22 Å range, using vacuum spark source
07 p1037 A72-19833

Far UV Al line spectra from laser produced plasma in 35-50 Å range
07 p1038 A72-19835

Thermal plasma origin of solar X-ray emission and far UV flash observation during 28 August 1966 proton flare
07 p1060 A72-20013

Far UV view of Orion from Aerobee rocket-borne monochromatic camera photographs of Orion-Monoceros-Canis Major region
08 p1164 A72-20994

Atomic, ion and electron transition pulsed gas discharge lasers, considering power efficiency factors, vacuum UV region and gas density
08 p1182 A72-21644

Extreme UV absorption cross sections ratios for atomic oxygen in upper atmosphere, observing solar radiation attenuation with satellite instruments
09 p1297 A72-22578

Molecular gases absorption coefficients measurement in extreme UV, analyzing photoionization curves in energy range far beyond threshold
09 p1356 A72-22829

Absorption by Nd laser generated ionized Al plasma of extreme UV radiation due to inverse bremsstrahlung and photoionization
09 p1360 A72-22831

Vacuum UV excitation cross sections measurement by electron impact on nitric oxide, tabulating threshold energies and transition probabilities
09 p1357 A72-22857

EUV resonance radiation from He atoms and ions in geocorona, comparing model calculation based on solar radiation resonance scattering with rocket experiments
09 p1378 A72-23010

Early phase time development of far UV line radiation from plasma production by focusing Q switched ruby laser onto solid Mg target
09 p1325 A72-23232

Double beam scanning vacuum UV spectrometer and logarithmic radiometer for reflectivity and transmission measurements on solids, liquids and gases [AD-745497]
09 p1313 A72-23329

Relative intensity of solar XUV emission lines of Li isoelectronic sequence ions, taking into account transitional collision strengths
09 p1391 A72-23532

Electron impact excitation of nitric oxide in vacuum UV, measuring absolute cross sections for emission features [AD-742536]
10 p1515 A72-24341

Programmed electro-optical systems of multichannel solar spectrometer for ground observations of X ray and EUV emission regions
11 p1630 A72-25680

Fluorescence and absorption spectra from oxygen sulfur dichloride photodissociation in vacuum UV, discussing So formation
11 p1590 A72-26012

Auroral spectrum analysis in 1200-4000 Å band, obtaining photon emission rates
11 p1624 A72-26402

Stimulated laser emission in vacuum UV by liquid Xe excitation with electron beam, determining threshold current density, radiation divergence and line half width
12 p1820 A72-27582

Extreme UV solar images televised in flight with rocket-borne SEC vidicon system, noting pictures reconstruction enhancement
12 p1810 A72-27930

Vacuum UV spectra of free plasma column in microwave high pressure discharge in helium-deuterium mixture
13 p2015 A72-29434

Aerobee rocket far UV flash spectrum observations of chromosphere and corona during 7 March 1970 solar eclipse
13 p2042 A72-29539

Wavelength, intensity and spatial distribution identification of far UV solar coronal forbidden lines observed during 7 March 1970 solar eclipse
13 p2043 A72-29540

E region ionosonde observations to reconstruct ionizing X ray and far UV radiation source distribution over solar disk during March 1970 total solar eclipse
13 p2044 A72-29552

Flare related impulsive EUV solar emission lines enhancement in chromosphere-corona transition region
13 p2032 A72-29720

Solar transition zone and corona EUV lines formation heights measurement from OSO-4 spectroheliograms
13 p2050 A72-29939

Bond dissociation energy calculation for carbon disulfide in vacuum UV from fluorescence threshold energy of incident photons, measuring absorption coefficient at 1200-1400 Å
13 p1914 A72-30060

Spectral line identifications and classifications of Li like spectra of elements K through Mn in extreme UV region, detailing extrapolation procedures
14 p2133 A72-30563

K-2 astrophysical rocket observatory for far UV and X ray solar radiation recording, discussing trajectory, orientation and stabilization, electric and spectrophotographic instrumentation
14 p2163 A72-30970

EUV open channel photomultipliers satellite-borne long term performance degradation, attributing sensitivity loss to grating contamination
15 p2235 A72-31645

Geocorona and interplanetary He glow EUV emission altitude distribution measured by exospheric sounding rocket-borne thin film photon counters
15 p2231 A72-32327

Solar O VI, Ne VIII and Mg X spectral lines intensity ratios from XUV rocket measurements, comparing data with Jordan-Allen-Dupree ionization equilibrium calculations [AD-745811]
15 p2318 A72-32783

Solar white light flares relationship to EUV emission based on sudden frequency deviations observations, noting coincidence with H alpha flare areas
15 p2302 A72-32789

Solar vacuum UV flux measurement by photon ion chambers aboard WRESAT I satellite, obtaining 4600 K brightness temperature
16 p2452 A72-33040

K2 III star Arcturus far UV chromospheric emission line spectrum observation with rocket-borne spectrometer, identifying hydrogen L alpha and O I
16 p2453 A72-33136

OSO 1 observation of 300 second oscillation in solar transition region and coronal extreme UV emission line intensity
16 p2453 A72-33137

Dissociative excitation of vacuum ultraviolet emission features by electron impact on molecular gases. III - CO2
17 p2585 A72-34734

Photoionization of a gas by far ultraviolet radiation of a laser-created plasma
17 p2588 A72-34872

Solar chromosphere-corona transition region structure and energy balance calculation by static planar model compared with XUV resonance line observations
17 p2608 A72-35083

Attachment for studying optical properties of highly cooled crystals in the vacuum ultraviolet region
17 p2555 A72-35309

EUV observations of solar quiet region with OSO 6 spectroheliometer, noting chromospheric network structure
17 p2616 A72-35703

Solar flares in the extreme ultraviolet. I - The observations.
17 p2602 A72-35710

- Solar flares in the extreme ultraviolet. II - Comparisons with other observations. 17 p2602 A72-35711
- Rocket observation of Ar XII-XVI, Ca XIV-XVIII, and Fe XIV, XV, XXIV in the extreme-ultraviolet spectrum of a solar flare. 20 p2963 A72-38913
- Properties of metal interference filters for 1200-3000 Å, of dichroic mirrors for 1700-3000 Å and of multi-electric narrow passband interference filters for 2000-3000 Å. 20 p2923 A72-39051
- Apollo 16 far-ultraviolet camera/spectrograph - Earth observations. 21 p3105 A72-40600
- Absorption spectra in the far ultraviolet of Be, B, C, N, Mg, Al, and Si. 21 p3013 A72-40818
- OSO-4 observations of coronal EUV hole, considering association with regions of diverging magnetic fields. 21 p3106 A72-41042
- Photometric analysis of X-ray photographs of sun obtained with rocket-borne zone plate camera in XUV region. 21 p3108 A72-41289
- Atomic, ion and electron transition pulsed gas discharge lasers, considering power efficiency factors, vacuum UV region and gas density. 21 p3064 A72-41301
- Far UV radiating hot dense microplasma production by laser heating for measuring by resonant absorption small quantities of gaseous element. 21 p3093 A72-41341
- Theoretical calculations of the F-region tropical ultraviolet airglow intensity. 22 p3171 A72-42418
- Vacuum ultraviolet absorption measurements on ionized species. 23 p3316 A72-44330
- Excitation of vacuum ultraviolet radiation by electron impact on carbon monoxide - Some unresolved questions near threshold. 24 p3379 A72-45313
- FARADAY EFFECT**
- Ionspheric total electron content measurement with geostationary ATS 3 satellite during solar eclipse of 7 March 1970, plotting Faraday rotation as function of time. 01 p0059 A72-10838
- Electron density measurements for traveling ionospheric disturbances by Thomson scatter technique using Faraday rotation. 01 p0031 A72-10922
- Pulsar PSR 0833-45 linear polarization measurements at 300 and 1420 MHz, showing frequency invariance with interstellar scattering and Faraday rotation allowance. 01 p0133 A72-11119
- ATS Faraday rotation measurement data on total electron content during geomagnetic storms, giving first midlatitude ionosphere average storm patterns and seasonal influence analysis. 02 p0216 A72-11900
- Manual reduction of Faraday rotation observations of ionospheric electron density at low latitudes, comparing with computer ray trace analysis. 02 p0221 A72-12462
- Faraday rotation as perturbation for analytic solution of system of differential equations for line formation in inhomogeneous magnetic fields. 03 p0427 A72-13295
- Low birefringent orthoferrites for optical devices, considering improvement in Faraday rotation detection of magnetic domains in single crystal platelets [IEEE PAPER 10,10]. 03 p0360 A72-13760
- Long range satellite signal Faraday fading rate revealing electron density profile near F layer peak. 04 p0486 A72-14883
- Interstellar electron density and magnetic field fluctuations effects on Faraday rotation and signal dispersion measure in radio band. 04 p0487 A72-14901
- Radio propagation from transmitter moving through irregular stationary ionospheric plasma, obtaining fluctuation dispersions for Faraday rotation angle and rate, phase, Doppler shift and refractions. 04 p0489 A72-15395
- Weak magnetic moments measurement under pressure and over wide temperature range by Faraday method, discussing magnetometer and cryogenic equipment modifications [AD-740076]. 04 p0522 A72-15478
- Anisotropic effects use in passive semiconductor magnetoplasma for submillimeter isolators and circulators development, describing transmission devices based on Faraday rotation. 04 p0563 A72-15600
- Ionspheric electron content from Faraday rotation observed on satellite radio signals at various frequencies. 05 p0659 A72-17095
- Ionspheric electron content diurnal and latitudinal variations from differential Faraday effect, discussing solar elevation and geophysical mechanisms. 06 p0805 A72-17640
- Electron density distribution inhomogeneities from vhf Faraday rotation measurements, noting diurnal, seasonal, sunspot cycle and geomagnetic activity effects. 06 p0806 A72-17642
- Faraday rotators acting as optical isolators for high power giant pulse lasers used for plasma production. 07 p1008 A72-20368
- Ionspheric electron content determination at different latitudes from geostationary satellite signal Faraday rotation. 10 p1475 A72-24955
- Equatorial Faraday rotation measurements for night ionospheric electron density peak structures during equinoctial months, using ATS-C geostationary satellite radiation. 10 p1476 A72-24958
- Transmittance and Faraday effect characteristics of Te doped InSb samples with free carriers measured at 10.6 microns. 11 p1648 A72-26338
- Interferometer investigations of Cassiopeia linear polarization at centimeter wavelengths, explaining results by source model incorporating Faraday depolarization. 12 p1865 A72-27094
- Ionosonde observations and Faraday rotation measurements of E and F region total electron content during two solar eclipses. 12 p1801 A72-27154
- Polarization modes of anisotropic optical traveling wave resonator using half wave plate and Faraday rotation cell. 12 p1824 A72-27870
- Metagalactic magnetic field contributions to observed Faraday rotation measurements for distant extragalactic radio sources. 13 p2039 A72-29088
- Nonequilibrium Faraday MHD generator performance examined by double diaphragm shock tube within ionization region. 13 p2013 A72-29357
- Linear polarization and depolarization observation of quasar red shift explained as Faraday dispersion in or near source. 15 p2313 A72-32365
- Crystallographic structure, phase transformations, Curie temperature and Faraday rotation of Ti-substituted MnBi films. 15 p2294 A72-32522
- Faraday ring currents induction by radial magnetic field in low pressure plasma supersonic ring channel flow driven by inductive hydrodynamic shock tube. 16 p2437 A72-33749
- Polarization modes and phase shifts of normal oscillation modes in anisotropic optical traveling wave resonator with Brewster winders half wave plate and Faraday rotation cell. 16 p2403 A72-33979
- Magnetic materials. 17 p2595 A72-34571
- Interpretation of rotation measures of radio sources. 17 p2606 A72-34573
- Satellite beacons observations from 1964 to 1970. 17 p2547 A72-35125
- Faraday rotation in connection with Hoyle theory of intergalactic magnetic field existence in steady state cosmology, considering cosmological model with cosmic magnetic field. 17 p2614 A72-35504
- Observation of linear polarization of solar microwave bursts. 18 p2722 A72-36997
- Nature of losses introduced into a ring resonator by a nonreciprocal phase-shifting device that employs the Faraday effect. 19 p2814 A72-38788
- D-region electron densities and collision frequencies from Faraday rotation and differential absorption measurements. 19 p2793 A72-38858
- Faraday rotation by cosmic magnetic field in cosmology based on scalar-tensor theory of gravitation. 20 p2969 A72-39264
- Faraday rotation dual-mode ferrite reciprocal phaser with performance and cost advantages over toroidal type for microwave phased array applications. 20 p2909 A72-39733
- Polarization follower tracking linear vector transmitted by satellite with high precision, noting spacecraft attitude control and Faraday rotation measurements applications. 21 p3021 A72-40907
- Faraday rotation of linearly polarized radio waves from the Crab Nebula by the solar corona. 21 p3109 A72-41327
- Magneto-microwave free-carrier absorption in germanium in the Faraday configuration. 21 p3097 A72-41379
- Faraday depolarization of extragalactic radio sources. 23 p3335 A72-43268
- Faraday effect of incoherently scattered radar signals. 23 p3263 A72-43365
- Influence of the imperfection of resonator elements on the characteristics of a triangular ring laser with a 90-degree Faraday rotator. 24 p3408 A72-44622
- FARADAY ROTATION**
- UT FARADAY EFFECT**
- FARM CROPS**
- Crop discrimination with manual and automatic computerized side-looking radar imagery analysis for microtexture pattern recognition. 01 p0065 A72-10451
- Crop classification by airborne multispectral observations, suggesting sample regions selection method for spectral signatures identification based on statistical similarities. 11 p1628 A72-26985
- Crop surface albedo measurements, taking into account cloudiness, zenith angle and day period effects. 20 p2915 A72-38970
- FAST NEUTRONS**
- Fast neutron radiation damage to glass ceramics and amorphous semiconductors electrical properties. 09 p1336 A72-22405
- EPR for point defects produced in Si by fast neutron irradiation, emphasizing damage cluster model. 12 p1858 A72-28060
- Effect of fast-neutron irradiation on ceramics and ceramic-metal seals. 17 p2559 A72-34591
- Radiation damage to refractory metals as related to thermionic applications. 17 p2566 A72-34595
- Breeder reactor testing of fast neutron irradiation effect on alumina and yttria cylinders for thermionic fuel rod designs. 18 p2708 A72-36161
- Fast-neutron-compensated n-germanium as a model of amorphous semiconductors. 20 p2961 A72-39853
- Polyacrylonitrile based carbon fiber strengthening by fast neutron irradiation at high temperatures. 22 p3196 A72-41965
- Effect of voids on angular correlation of positron annihilation photons in molybdenum. 22 p3187 A72-41967
- FASTENERS**
- NT BOLTS**
- NT RIVETS**
- NT SCREWS**
- Space shuttle mechanical fastener design, discussing drives, threads, manufacturing and refractory alloys. 01 p0075 A72-10751
- Aerospace vehicle high tensile strength fasteners stress corrosion cracking and hydrogen embrittlement [AIAA PAPER 72-385]. 11 p1653 A72-25407
- Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners. 11 p1632 A72-25823
- Inertia welded bimetallic fasteners for aerospace industrial applications, noting cost advantages [ASM PAPER W 72-32,5]. 12 p1817 A72-28166
- Hi-Shear and Hi-Lok fastening systems for aircraft manufacture, comparing strength and weight with conventional rivets and bolts [SAWE PAPER 901]. 23 p3293 A72-43451
- FATIGUE [BIOLOGY]**
- NT FLIGHT FATIGUE**
- NT MUSCULAR FATIGUE**
- Environmental noise induced human fatigue, considering physiological and psychological effects. 01 p0016 A72-10050
- Extracardiac chronotropic effects on cardiac rhythm variations during fatigue, using variational pulsometry and autocorrelation and spectral analysis. 02 p0164 A72-12513
- Fatigue factors in aircrew related to shift working and technological advances, considering implications for industry and work-rest cycles. 10 p1432 A72-24988
- IR pupillography for screening narcotics and fatigue prone individuals from driver and pilot training applicants. 12 p1777 A72-28323
- Work capacity evaluation from fatigue, biological rhythm, tissue respiration and oxygen consumption studies, discussing pharmacological stimulation effects. 14 p2078 A72-30376
- The role of inhibition in the fatigue phenomenon. 17 p2503 A72-35015
- Changes of the catecholamine content in the brain of albino rats under overstrain caused by running in a rotating drum. 19 p2757 A72-38034
- FATIGUE [MATERIALS]**
- NT BENDING FATIGUE**
- NT METAL FATIGUE**
- NT THERMAL FATIGUE**
- Boeing 707 rapid decompression at 25,000 feet, noting rivet hole fatigue damage. 02 p0167 A72-11715

Structural inhomogeneities effect on fatigue phenomenon in rolling motion, discussing stress cycles preceding active surface degradation
04 p0526 A72-14473

Rotating shaft fatigue under variable stress cycles, determining safety, bending and torque coefficients
04 p0594 A72-15750

Subcritical crack extension in elastoplastic or viscoelastic-plastic matrix, showing similar mathematical representations for fatigue crack propagation and creep rupture under sustained loads
05 p0737 A72-16302

Fiberglass reinforced plastics fatigue failure prediction based on test demonstrated correlation between static and cyclic strainability
08 p1195 A72-21856

Static fatigue of borosilicate glass, fused silica and polycrystalline alumina, presenting log stress vs log failure time plots
09 p1335 A72-22398

Energy balance criterion application to crack growth under cyclic fatigue loading, considering stress-strain behavior of plastic deformation energy
09 p1404 A72-22911

Papers on design for high temperature environments covering structural fatigue, creep interaction and ratcheting deformation and inelastic stress analysis
09 p1406 A72-23196

Metallic coatings effect on high-strength steels fatigue properties, noting beneficial effect of shot peening
10 p1494 A72-24024

Fatigue crack propagation in epoxy resin matrix reinforced with discontinuous metal fibers
10 p1501 A72-24261

Material testing by holographic interferometry, discussing application to early detection of delayed cracking, fatigue damage and bond imperfections
10 p1482 A72-24575

Inspectability criteria for airframes with fatigue fail safe design requirements for small airplane certification
11 p1575 A72-25574

Fatigue certification of general aviation aircraft in Australia, describing ground taxi load spectra and endurance and radiographic inspection of laminated spar caps
11 p1734 A72-25575

Turbine blade alloys vibrational fatigue and creep properties under high and low frequency axisymmetric loads at room and elevated temperatures
11 p1662 A72-26798

Cooling efficiency and load endurance of aircraft turbine engine blades as function of ambient temperature and air flow rates
11 p1712 A72-26892

Boron and carbon reinforced fiberglass plastics tensile strength characteristics, presenting static fatigue curves vs Poisson coefficient and elastic modulus for various fiber contents
13 p1982 A72-28552

Stress levels and fatigue in aircraft structures subjected to jet noise, noting stress calculation for skin panels and control surfaces
13 p1898 A72-29579

Macroparametric, microstructural and general rationales methods for fatigue resistant materials, noting crack propagation and fracture mechanics
14 p2120 A72-30612

Axisymmetric ductile rotating shaft failure modes, considering fatigue, buckling and impact stress factors [ASME PAPER 72-DE-40]
14 p2167 A72-30873

Load cycle frequency and time characteristic effects on plastics fatigue behavior, considering relaxation, retardation and internal damping induced heating effects
16 p2416 A72-34145

Shape factors for nozzle corner cracks evaluated from epoxy-model pressure vessels.
17 p2630 A72-34814

Composite materials crack propagation and failure modes leading to fracture instability, discussing maximum strength conditions and fatigue
18 p2703 A72-36394

An advanced concept of the Woehler diagram and a new calculating procedure for the application of the extreme-value method to experimental data in the calculation of fatigue strength
20 p2926 A72-39572

Elastic wave energy absorption in structures under dynamic loads, noting fatigue fracturing decrease with energy transfer into damping medium
21 p3126 A72-41540

Reliability analysis in the estimation of transport-type aircraft fatigue performance.
22 p3241 A72-42971

Optimal fleet reliability under fatigue and chance overload in service.
24 p3365 A72-44656

Aircraft fatigue: Design, operational and economic aspects.
24 p3366 A72-44726

Reliability analysis based on time to the first failure.
24 p3455 A72-44727

Optimum design of joints - The stress severity factor concept.
24 p3455 A72-44728

The importance of service inspection in aircraft fatigue.
24 p3367 A72-44740

Structural fatigue cost penalties in airline operations, considering inspection, maintenance and carrying capacity reduction
24 p3367 A72-44743

Structural fatigue cost in aircraft maintenance and repair, considering inspections, defect rectification, preventive modifications, replacements and NDT
24 p3367 A72-44744

Observations on designing to combat fatigue and its effects on the economics of civil transport aircraft.
24 p3368 A72-44745

Evaluation of the danger of damage to mechanical systems exposed to random vibrations
24 p3459 A72-45449

FATIGUE DIAGRAMS
U - S-N DIAGRAMS
FATIGUE LIFE
European A300B airbus flying control hydraulic system and landing gear design for safety and reliability, fatigue life, weight and maintenance
01 p0005 A72-10724

Al-Mg alloy under reverse bending fatigue in aqueous sodium chloride with constant load and potentiostatic control, determining anodic polarization effect on fatigue life
01 p0087 A72-11033

Precipitation hardened Al-Cu alloy microstructure relation to fatigue and tensile properties, emphasizing particle size and distribution, moving dislocations and grain boundary effects
01 p0088 A72-11044

Fatigue crack initiation and growth in sharply notched mild steel, showing specimen size, geometry and loading effects on fatigue life
01 p0142 A72-11098

Misalignment effect on load distribution and fatigue life of tapered roller bearings
02 p0234 A72-11532

Rolling element fatigue lives of through hardened bearing materials, noting alloying percentage effect [ASME PAPER 71-LUB-13]
02 p0235 A72-11535

Asymmetrically loaded cylindrical roller bearings, describing hollow ended design for fatigue life improvement [ASME PAPER 71-LUB-14]
02 p0235 A72-11536

Heat resistant alloys thermal microstresses effect on creep and fatigue life under thermal cycling conditions
02 p0242 A72-11633

Heat treated carbonized, cyanided, nitrided and boronized steel fatigue strength dependence on static strength, residual stress, brittleness and stress concentration from test data
02 p0244 A72-12242

Metal fatigue time and cycle dependent deformation and fracture mechanisms in creep range from cumulative damage law standpoint for lifetime prediction
02 p0295 A72-12497

Metal fatigue damage avoidance, control and repair, considering design, metallurgical and service factors
02 p0296 A72-12500

Al-Mg-Si alloy fatigue, vibration creep and creep strength tests at room temperature, determining mean stress effects on fatigue strength and cumulative damage
02 p0297 A72-12536

Cumulative damage in metal fatigue, suggesting unified theory applicable to stress or strain controlled conditions
03 p0442 A72-12922

Austenitic steel under combined bending and torsion, showing fatigue strength dependence on temperature, load cycle asymmetry and stress concentration
03 p0371 A72-13469

Fatigue failure under cyclic stress, analyzing surface and temperature effects
03 p0372 A72-13588

Secondary fatigue curves for determining service life of metal specimens under unsteady loads
03 p0445 A72-13592

Ti alloys for aircraft structures, emphasizing weldability, tensile fatigue and residual strengths, shear-carrying qualities and fuselage shell design
03 p0373 A72-13616

Steels fatigue life tests as function of stress level, confirming Woehler curves mathematical model
03 p0373 A72-13673

Cu single crystal fatigue life explanation by work hardening using statistical theory of slip
03 p0379 A72-14258

Polymethyl methacrylate fatigue strength at elevated temperatures, discussing sample preparation, test equipment and procedures
04 p0537 A72-14750

Mean stress and overload effects on mild steel service life, using fatigue damage summation method
04 p0592 A72-15475

Anodizing effect on corrosion fatigue strength of sheet duralumin under low and high bending stress
04 p0535 A72-15662

Titanium alloy microstructure effect on fatigue strength under symmetric bending load cycles in air and NaCl solution
04 p0535 A72-15663

Fatigue strength optimization of bonded double strap metal joints, attributing stress concentration to plastic relaxation
05 p0731 A72-15791

Crack growth dependence on applied high stress level cycle number, showing fatigue life inversely proportional to stress exponential function
05 p0673 A72-16304

Fatigue limit amplitude diagram schemes and formulas
05 p0740 A72-16625

Mo- and Ta-base refractory alloys creep tests, determining interactions between creep strength, fatigue life and strain aging by fatigue vibration application
05 p0677 A72-17111

Dynamic overstressing and annealing effects on fatigue life of convoluted metal bellows, using dynamic model and strain gage measurements
05 p0742 A72-17245

Hardened and tempered Ni-Cr-Mo steel, testing rest periods caused fatigue life increase in terms of cycles to failure
06 p0895 A72-17802

Fatigue damage factor and failure probabilities in structural design for multilevel repetitive cyclic stresses
06 p0896 A72-17965

Fatigue life and creep tests of refractory materials under programmed thermal cycling for different stress levels
06 p0831 A72-18351

Nb and Nb-Zr alloy tubular and sheet samples cyclic loading tests, determining heat treatment effects on notch sensitivity and fatigue strength
06 p0834 A72-18646

Milling, band grinding, final manual polishing and tumbling polishing effects on fatigue life and surface finish of steel compressor blades
06 p0824 A72-18651

Plastic deformation fatigue theory extended to tests at stresses below elastic limit, explaining cyclic loading frequency effect on fatigue life
06 p0899 A72-18652

Aircraft performance parameters in terms of effect on lifting system service and fatigue life and on design
07 p0912 A72-19111

Static and fatigue strength in tension of welded joints composed of low carbon and austenitic steel
07 p0996 A72-19767

Stress variation effect on strength values obtained by low cycle fatigue tests involving bending with rotation
07 p1014 A72-19847

Fatigue life gages to determine cumulative fatigue damage due to variable cyclic strain history on unmatched materials
08 p1163 A72-20915

Fatigue life gages planning and application to airplane cyclic fatigue test, describing automatic data acquisition system
08 p1163 A72-20916

Fatigue strength and life estimation method for thick walled cylinders under pulsating internal pressure, using fracture mechanics crack propagation law [ASME PAPER 71-PVP-15]
08 p1244 A72-21482

Mechanical surface strengthening effect on small cycle fatigue life of Ti alloy weakened by stress raiser
08 p1186 A72-21725

Turbine blade root attachment service life determination from fatigue tests with T shaped models
09 p1373 A72-22300

Unidirectional and orthogonally cross-ply carbon fiber reinforced plastics laminates, determining interlaminar shear strength and fatigue life [PI PAPER 8]
09 p1337 A72-22543

Fatigue strength of heat resistant materials under thermal cyclic loads leading to sign variable plasticity and creep
09 p1402 A72-22732

Metal creep fatigue analysis and life prediction by inelastic strain ranges partitioning into reversed tensile and compressive plasticity and creep components
09 p1406 A72-23198

Fatigue fracture of polymethyl methacrylate at room temperature under uniaxial failure cyclic loading
09 p1339 A72-23244

Cumulative fatigue damage in Al-Zn-Mg alloy fillet welded joints, analyzing constant amplitude and programmed load fatigue test results
09 p1332 A72-23618

Data scatter reduction in Al-Zu-Mg welded specimens cumulative fatigue damage testing, noting fatigue life improvement by shot peening and static or dynamic prestressing
09 p1332 A72-23619

Carbon steel fatigue crack propagation rate dependence on strength and stress history, discussing conditions for crack nonpropagation

10 p1499 A72-24889

Fatigue strength characteristics of boron-epoxy reinforced Al stringers for helicopter airframe [AIAA PAPER 72-392]

11 p1574 A72-25413

Locati and Prot methods for metal fatigue limits evaluated by axial and rotating bending tests on steel specimens

11 p1657 A72-25824

Polycrystalline Mo fatigue behavior under cyclic stresses, discussing grain size effect on fatigue life and relationship between cycle dependent yield and French damage line

11 p1658 A72-25830

Fatigue life cumulative damage prediction procedure for engineering metals subjected to complicated stress-strain histories, noting errors in average mean stress method

11 p1658 A72-25831

Heat treated carbonized, cyanided, nitrided and boronized steels fatigue limit dependence on static strength, residual stress, brittleness and stress concentration

11 p1659 A72-26128

Statistical analysis of strain criteria and stochastic relations for Al alloy fatigue life and minimum creep rate at 175-250 C

11 p1663 A72-26800

Tungsten alloy wires strength, creep properties and fatigue limit, investigating fracture characteristics

11 p1663 A72-26807

Diamond burnishing effect on surface quality and fatigue strength of steel, noting work hardening increase and compressive residual stresses buildup in surface layer

11 p1642 A72-26811

Fatigue failure information in structural design, considering low cycle, cumulative damage and time dependent conditions

12 p1884 A72-27641

Ball bearings lubricated with oils and fire-resistant fluids, testing fatigue life relationship to steel quality, fluid film thickness and viscosity

12 p1816 A72-28108

Electroslag and vacuum remelted maraging steel rolling contact, investigating fatigue life as function of lubricant film thickness/surface roughness ratio

12 p1816 A72-28109

Deep groove ball bearing endurance tests to determine running conditions and lubricant film thickness/surface roughness ratio effects on fatigue life

12 p1816 A72-28112

Heat resistant blade alloy test temperature effects on fatigue life, tensile strength, hardness and chemical composition

12 p1831 A72-28230

Gas turbine engine compressor blade and materials fatigue strength dependence on pressure under contact friction corrosion

12 p1831 A72-28244

Metal fatigue strength testing under programmed temperature regimes, using HF induction generator

12 p1796 A72-28247

Material fatigue failure criterion during cyclic loading, noting energy dissipation and resonant frequency roles

12 p1888 A72-28250

Fatigue strength and cumulative damage in fiberglass-epoxy composite specimens under unsteady elastic bending loads, determining loading spectrum effect on service life

13 p1983 A72-28562

Steels shafts fatigue failure under cyclic loading and fretting corrosion, indicating fatigue strength increase through surface layer wear resistance augmentation

13 p1979 A72-29476

Chromium stainless steel fatigue life reduction due to embrittlement in gaseous hydrogen atmosphere at room temperature, noting alleviating effect of atmosphere contaminants

13 p1979 A72-29484

Fatigue limit and Woehler curve determined from notch tests, noting relation between fatigue damage and residual stresses in notched parts

[ONFRA, TP NO. 1083] 13 p1980 A72-29673

Airframe and wing fatigue life testing, discussing results recomputation for changed operating conditions

14 p2092 A72-30276

Welded steel airframe residual fatigue life tests by nonstationary random loading, applying to jet trainer aircraft landing gear

14 p2107 A72-30277

Welded machine component service history effects on residual fatigue life from statistical evaluation of factor experiment

14 p2107 A72-30278

Aircraft engine components fatigue life assessment under small cycle temperature conditions, including temperature field and stress-strain determination in critical spot

14 p2145 A72-30279

Fatigue life tests of structural sandwich plates with honeycomb layer, considering temperature effects, material scattering and defects inside honeycomb by nondestructive methods

14 p2164 A72-30280

Computer algorithms and programs contribution to aircraft structure operational reliability and fatigue life calculation

14 p2164 A72-30288

Refractory material blade alloys fatigue life up to 950 C under nonstationary loading, noting log-normal law distribution

14 p2116 A72-30428

Ni-Cr-Ti steel aircraft structural element fatigue life calculation based on failure mechanism involving crack propagation

14 p2164 A72-30429

High modulus composites structural design applications, considering fatigue performance vs cost [ASME PAPER 72-DE-24]

14 p2167 A72-30866

Adhesive bonding of L-1011 body shell panels for improved fatigue strength and corrosion resistance

15 p2245 A72-32429

Aircraft gas turbine engine Ni base alloy disks and shafts thermomechanical treatment, considering yield strength and high and low cycle fatigue resistance

16 p2406 A72-33299

Cumulative damage probability in dynamic or static fatigue failure of brittle graphite materials as function of stress

16 p2414 A72-33321

Incoloy low cycle fatigue tests at high temperatures and different strain rates, discussing fatigue life at 10 and 60 min hold times

16 p2410 A72-33820

Welded Al joints fatigue resistance from iterative nonlinear regression analysis with multiparameter endurance curves

16 p2412 A72-34141

Definition of the fatigue limit on the basis of the distribution of the resistance over the set of elementary volumes of which the sample is composed

17 p2565 A72-34196

Fretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase

[AHS PREPRINT 672] 17 p2626 A72-34512

The use of airborne magnetic tape recorders for fatigue life monitoring.

17 p2553 A72-34812

Fatigue life gages use in combination with strain multipliers in field applications with random ergodic cyclic strains

17 p2554 A72-34822

Fatigue crack initiation and propagation in welded structures, considering low and high cyclic stresses, microstructure and environment effects

17 p2635 A72-35919

Creep damage role in governing elevated temperature strain cycling fatigue lives of heat resistant stainless steel and cobalt alloy

19 p2817 A72-37712

Stress calculations for lifetime prediction in turbine blades. [ONERA, TP NO. 1097]

19 p2875 A72-37770

Fatigue limits of cylindrical test pieces in rotative bending and in tension-compression, investigating strain gradient effect

19 p2875 A72-37788

Static and dynamic fatigue behavior of glass filament-wound pressure vessels at ambient and cryogenic temperatures.

19 p2823 A72-38832

Relation between the reliability and allowable stress amplitude in fatigue design.

20 p2977 A72-38879

Fatigue strength of welded aluminum-connections - Investigation with the aid of multiparameter life length lines

20 p2930 A72-39941

Designing to avoid stress-corrosion and/or fatigue failures. [AICHE PAPER 15C]

21 p3116 A72-40125

Fatigue behavior of glass filament-wound epoxy composites in water.

21 p3072 A72-40246

Fatigue damage of aluminum alloy at high temperature.

21 p3066 A72-40716

Temperature and strain rate dependences of low cycle fatigue life at high temperatures of austenitic stainless steel, examining crack behavior and stress-strain relations

21 p3069 A72-41010

Fatigue strength of overloaded stiffeners in cracked panels, evaluating stress intensity factor and overload coefficients for fatigue crack propagation via finite element method [ICAS PAPER 72-40]

21 p3120 A72-41165

The influence of grain and twin boundaries in fatigue cracking.

21 p3069 A72-41350

Creep test diagrams plotted to estimate heat resistance for turbine blades design, predicting fatigue life with allowance for loading cycle form and duration

21 p3123 A72-41366

Resonant frequency, fatigue and energy dissipation relations for endurance limit determination in Al alloy specimens under vibrational loads

21 p3070 A72-41368

Investigation of fatigue-failure mechanisms and inelastic deformation of metals in torsion

21 p3071 A72-41703

Influence of dispersion on the accuracy of estimating the fatigue life from the results of accelerated investigations by the prefracture method.

22 p2322 A72-41928

Thermoplastics fatigue life dependence on stress with allowance for heating laws, noting heat accumulation effect on thermal failure

22 p3196 A72-42164

An advanced strain level counter for monitoring aircraft fatigue.

22 p3179 A72-42688

Strain multiplier with S-N fatigue life gages, discussing design and performance

22 p3179 A72-42708

Fatigue strength and fail-safe aspects of lug joint in aircraft structures, considering tension-compression load, fretting corrosion, prestress and residual stress

22 p3239 A72-42851

Testing procedures for the design and life estimation of fatigue-sensitive structures.

22 p3241 A72-42974

German monograph - Contribution to the investigation of the fatigue strength of sintered iron.

22 p3194 A72-43066

Book - Effect of notches on low-cycle fatigue: A literature survey.

22 p3242 A72-43145

Gas turbine blade models of heat resistant Zr56K alloy under operational temperature variations, observing fatigue strength

23 p3347 A72-43735

Heat treatment effect on tensile and bending fatigue strength of Al alloy thin sheet

23 p3301 A72-43743

Fatigue strength of two phase Ti alloys, considering work hardening, electrochemical finishing, electropolishing and protective media

23 p3301 A72-43757

Fatigue fracture and crack propagation in aluminum alloys. II.

23 p3302 A72-43973

Bonded joints - Squeeze-out /flash/ effect on fatigue strength.

23 p3353 A72-44248

Low cycle fatigue under biaxial strain controlled conditions.

23 p3354 A72-44259

A comparison of the axial and reversed-torsional strain cycling low-cycle fatigue strength of several structural materials.

23 p3304 A72-44397

The fatigue strength under varying mean stress.

24 p3455 A72-44629

Development of a push-pull fatigue testing machine under high pressure, and the results of preliminary fatigue tests.

24 p3401 A72-44630

Life prediction of expulsion bladders through fatigue test and fold strain analysis.

24 p3455 A72-44672

The New Zealand light aircraft fatigue meter program.

24 p3401 A72-44735

Aircraft structures fatigue life expectancy under random acoustic excitation, describing testing methods and equipment

24 p3367 A72-44739

Fatigue design and test program for the American SST.

24 p3367 A72-44741

Design against fatigue failure in thermoplastics.

24 p3457 A72-44816

Ultrasonic detection of fatigue damage.

24 p3457 A72-44820

Austenitic steel under combined bending and torsion, showing fatigue strength dependence on temperature, load cycle asymmetry and stress concentration

24 p3414 A72-44944

Fatigue life and creep tests of refractory materials under programmed thermal cycling for different stress levels

24 p3416 A72-45738

Hydraulic sand blasting and annealing effects on Ti alloy sheet bending fatigue strength

24 p3416 A72-45744

FATIGUE TESTING MACHINES

Fatigue test machine for alternating cantilever bend and torsion testings at 50 Hz and 1.5-300 K

01 p0049 A72-11381

Combined bending/torque fatigue test machines design, operation, calibration and results, developing probabilistic S-N diagram from cycles-to-failure data statistical analysis

02 p0199 A72-11514

Automatic device for thermal and thermomechanical fatigue tests of steel specimens, noting crack

02 p0199 A72-11514

- nucleation and growth by hardening due to lattice defects
02 p0200 A72-11996
- Resonance type rotating bending fatigue testing machine using specimens with attached inertial mass, presenting test results with carbon steel specimens
02 p0201 A72-12823
- Cyclic deformation and fatigue testing equipment and techniques for biaxial stress, stress concentration and pure bending
03 p0339 A72-14168
- Fatigue testing machine for material behavior under elastoplastic bending loads with constant or smoothly varying programmed vibration frequency and amplitude
12 p1795 A72-27463
- Mathematical model for hydraulic fatigue testing machine, analyzing nonlinear control stability of vibratory loading process
12 p1796 A72-27978
- Design and operation of experimental facility for thermal fatigue testing of heat resistant materials
13 p1939 A72-29145
- Testing machine for creep resistance of foam plastics under simultaneous static and vibration loads
14 p2092 A72-30591
- Equipment for low cycle fatigue bending, torsion and tension-compression tests, considering design and performance
16 p2394 A72-33846
- The use of airborne magnetic tape recorders for fatigue life monitoring.
17 p2553 A72-34812
- Fatigue life gages use in combination with strain multipliers in field applications with random ergodic cyclic strains
17 p2554 A72-34822
- Device for fatigue testing of fiberglass-reinforced plastic samples in a symmetrical tension-compression regime at acoustic oscillation frequencies
20 p2920 A72-38944
- Quadrisectional facility for studying creep and fatigue strength under deep freezing conditions
21 p3057 A72-41719
- Fatigue test equipment for 293-233 K and 50-100 ton static or 25-50 ton cyclic loads, using Freon 22 as coolant
23 p3278 A72-43759
- Machine with programmed load control for studying the fatigue and inelasticity of metals at room and elevated temperatures
23 p3278 A72-43969
- Development of a push-pull fatigue testing machine under high pressure, and the results of preliminary fatigue tests.
24 p3401 A72-44630
- Self oscillating system resonant vibrations excitation for fatigue tests, determining frequency and amplitude relationship
24 p3458 A72-44931
- FATIGUE TESTS**
- Nondestructive radioactive gas penetrant tests for porosity and fatigue damage in jet engine castings
01 p0069 A72-10813
- Factorial design model of materials fatigue failure under narrow band random vibrations
01 p0140 A72-10942
- Cast high temperature Ni base alloy Udimet 500 low cycle fatigue, determining total stress and strain range vs fatigue life at elevated temperatures
01 p0087 A72-11030
- Ti-Al-V alloy under vacuum fatigue tests, examining temperature and chemical environment effects on fatigue crack growth
01 p0087 A72-11034
- Graphite-epoxy conductive polymers as fatigue damage indicators of structures under cyclic strain [SESA PAPER 1915]
02 p0287 A72-11509
- Temperature-time dependent torsional strength and fracture failure of Cr-Ni steel microalloyed with La and Ce as function of grain boundaries
02 p0243 A72-12010
- Heat treated carbonized, cyanided, nitrided and boronized steel fatigue strength dependence on static strength, residual stress, brittleness and stress concentration from test data
02 p0244 A72-12242
- Tension-compression cycling effects on fatigue crack growth in high strength alloys
02 p0294 A72-12469
- Papers on metal fatigue damage covering basic mechanisms, detection, field practices for repair, avoidance and control
02 p0295 A72-12495
- Metal fatigue damage nondestructive detection, discussing inspection methods, equipment, advantages, limitations and test results
02 p0296 A72-12498
- Al-Mg-Si alloy fatigue, vibration creep and creep strength tests at room temperature, determining mean stress effects on fatigue strength and cumulative damage
02 p0297 A72-12536
- Self oscillating system resonant vibrations excitation for fatigue tests, determining frequency and amplitude relationship
03 p0443 A72-13456
- Temperature dependence of low temperature endurance of Cr-Ni steels in bending fatigue tests
03 p0371 A72-13463
- Endurance tests of D16AMO alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading
03 p0371 A72-13470
- Cyclic deformation and energy dissipation during fatigue breakdown in steels under tension-compression and torsion
03 p0372 A72-13590
- Crack propagation rates during bending fatigue tests on flat hardened steel as function of stress intensity and plasticity area
03 p0445 A72-13593
- Fatigue crack onset and propagation from bending behavior of revolving flat specimens
03 p0445 A72-13594
- High temperature fatigue crack growth studies by compliance calibration test method, evaluating temperature and cycle rates effects
03 p0339 A72-14169
- Approximate S-N fatigue testing/digital computer method for quasi-static boundary value problems in plasticity theory, applying to continuum models
03 p0453 A72-14210
- Impact fatigue testing apparatus, presenting results for stainless steel
04 p0524 A72-15549
- Fatigue crack growth rate testing in gaseous environments at nonambient pressure and temperature in test chamber
05 p0643 A72-16186
- Silicate glasses fatigue in dynamic and static tests, discussing fracture stress dependence on time of loading
05 p0681 A72-16422
- INCO 713C and IN 100 cast Ni base alloy gas turbine blades under thermal fatigue tests
05 p0675 A72-16497
- Fatigue failure tests of soldered joint in solar cell interconnector designs under extended temperature cycling
05 p0615 A72-16552
- Test conditions, specimen batch and method effects on accuracy of rapid fatigue limit tests with increasing stress amplitude
05 p0741 A72-17085
- Fatigue test curves of notched Al alloys under bending with rotation
05 p0676 A72-17086
- Concorde airframe testing for thermal effects on structural strength and fatigue life, discussing facilities for flight conditions simulation
05 p0614 A72-17197
- Accelerated fatigue limits for Al and Mg alloys from transverse bend test data
06 p0827 A72-17398
- High purity polycrystalline Al hf low strain fatigue measurements by piezoelectrically driven exponential horn, estimating critical point defect concentration
06 p0893 A72-17420
- Fatigue crack formation speed relationship to stress intensity factor, investigating crack propagation by fracture mechanics methods
06 p0895 A72-17810
- Fatigue behavior of notched or cracked aircraft structure parts, examining service life prediction problem
06 p0895 A72-17811
- Al and Ti alloy fatigue after temperature reduction to 253, 77 and 4 K as function of surface purity after machining
06 p0831 A72-18356
- Airloads and structural integrity flight testing /U.S. Air Force/, noting dynamic response, fatigue tests and temperature data acquisition
06 p0759 A72-18490
- Gas turbine blades thermal fatigue test and analysis, investigating static tensile loading effects on heat resistance under thermal cycling
06 p0899 A72-18556
- High temperature fatigue test assembly for symmetric tension compression cycles at 10 kHz with specimen heating in resistance furnace
06 p0797 A72-18568
- Plastic deformation fatigue theory extended to tests at stresses below elastic limit, explaining cyclic loading frequency effect on fatigue life
06 p0899 A72-18652
- Fatigue testing machines for axial and torsional loadings at low temperatures in vacuum
06 p0797 A72-18667
- Sheet metal fatigue test method for transverse 100-1000 Hz bending at normal and high temperatures, applying to 1.5 mm Ti alloy sheet
06 p0900 A72-18671
- Stress variation effect on strength values obtained by low cycle fatigue tests involving bending with rotation
07 p1014 A72-19847
- Stepwise fatigue testing of high temperature alloy, noting strain hardening phenomena in prestressed samples
07 p1017 A72-20129
- Ni based superrefractory alloy high temperature fatigue tests, studying creep as function of stress load and frequency and temperature
07 p1022 A72-20487
- Fatigue life gages planning and application to airplane cyclic fatigue test, describing automatic data acquisition system
08 p1163 A72-20916
- Wilga 3 aircraft structure service life from structural fatigue theory and tests, emphasizing operational load distribution measurement
08 p1110 A72-21634
- Epoxy and polyester resin fatigue fracture tests for cyclic stress and moisture effects
08 p1192 A72-21680
- Setup to determine sonic creep and acoustic fatigue in polymers under symmetrical and asymmetrical load cycles at sonic and ultrasonic oscillation frequencies
08 p1147 A72-21763
- German monograph on computerized statistical analysis of Al alloy fatigue test data, considering welded samples and thin plates
08 p1188 A72-21848
- Metric swaged pipe coupling design and development for aircraft hydraulic systems, presenting fatigue test results
08 p1179 A72-21940
- Turbine blade root attachment service life determination from fatigue tests with T shaped models
09 p1373 A72-22300
- Fatigue failure mechanism in short fiber reinforced plastics, determining crack growth rates under cyclic loading
09 p1336 A72-22539
- Propagating crack properties characterization during fatigue cycling, using ultrasonic flaw detection and acoustic emission
09 p1310 A72-22922
- Quenched and tempered Ni carbon steel retained austenite transformation and crack observation by X ray diffraction under low cycle fatigue testing
09 p1329 A72-23149
- Ni carbon steel microstructure changes in retained austenite phase and crack observation during low cycle fatigue testing
09 p1330 A72-23150
- DC-10 aircraft structural design, flight handling characteristics and fatigue tests
09 p1262 A72-23446
- Welded high strength maraging steels fatigue performance, stressing nondestructive testing technique
09 p1332 A72-23617
- Cumulative fatigue damage in Al-Zn-Mg alloy fillet welded joints, analyzing constant amplitude and programmed load fatigue test results
09 p1332 A72-23618
- Data scatter reduction in Al-Zu-Mg welded specimens cumulative fatigue damage testing, noting fatigue life improvement by shot peening and static or dynamic prestressing
09 p1332 A72-23619
- Tensile and fatigue tests of dissimilar metal joints made by friction pressure welding
09 p1321 A72-23640
- Power transistor thermal cycling ratings and fatigue testing under operating conditions
10 p1447 A72-24011
- Crack toughness tests of fiber composite laminates, using linear elastic fracture mechanics
10 p1500 A72-24258
- Tensile, plane strain fracture toughness and fatigue tests of high strength Al alloy cylinders, discussing unstable crack growth conditions
10 p1498 A72-24887
- Calibration procedure for crack length determination based on in test crack opening displacement monitoring
10 p1559 A72-24900
- Statistical evaluation of welded airframe component fatigue damage increment during cyclic loading with constant force amplitude
10 p1559 A72-24922
- Cumulative shock loading fatigue in solids, describing experimental setup and fracture morphologies
10 p1560 A72-25124
- Fatigue failure modes of composite materials, considering fiber breakage, delamination, matrix cracking, interface debonding and void growth
11 p1670 A72-25461
- Two stress level cumulative fatigue damage prediction for glass fiber-epoxy laminates
11 p1670 A72-25462
- Soviet papers on high temperature metallography techniques and equipment covering test assemblies for fatigue and microhardness measurements
11 p1654 A72-25489
- Aircraft wing structure fatigue life estimates based on flight load time histories from counter accelerometers
11 p1733 A72-25569

Crack initiation detecting and recording instrument with optical strain gages for double shear fatigue tests of aircraft fasteners

11 p1632 A72-25823

Locati and Prot methods for metal fatigue limits evaluated by axial and rotating bending tests on steel specimens

11 p1657 A72-25824

Heat treated carbonized, cyanided, nitrided and boronized steels fatigue limit dependence on static strength, residual stress, brittleness and stress concentration

11 p1659 A72-26128

Theoretical fatigue test procedure for reliability analysis of machine parts, calculating fatigue probability in load carrying components

11 p1640 A72-26244

Udimet 500 alloy dislocation substructure and fracture surface topography during deformation to failure in low cycle fatigue at high temperatures

11 p1667 A72-26938

Fatigue failure criteria under combined stress conditions, considering complex form, thin and thick welded cylinders as test specimens

12 p1828 A72-27317

Fatigue failure tests of low carbon Mn steel, analyzing structural damage under cyclic loads in relation to temperature curve

12 p1829 A72-27458

Fatigue testing of blade materials at high temperatures with periodic spray moistening by liquid corrosive medium

12 p1829 A72-27459

Metal fatigue strength testing under programmed temperature regimes, using HF induction generator

12 p1796 A72-28247

Accelerated reliability, life, fatigue and performance tests of automatic systems components, noting mathematical models for minimum time techniques

13 p1965 A72-29172

Unsteady loading effects in high temperature fatigue tests of refractory alloys for turbine blades, noting steady and programmed notch tests

13 p1980 A72-29494

Literature survey of fatigue behavior of Al alloy welded joints, discussing testing and analysis methods

14 p2113 A72-30250

Airframe and wing fatigue life testing, discussing results recomputation for changed operating conditions

14 p2092 A72-30276

Resonance type facility using dynamic hysteresis loop method to test metal fatigue and anelasticity in torsion at room and high temperatures

14 p2092 A72-30443

Fatigue crack growth rate in precracked steel samples observed at 100 C by etching technique, noting flow stress and yield in plastic zone

14 p2119 A72-30608

Mill annealed Ti alloy fatigue at 600 F and room temperature, noting critical local stress for slip bands formation and cracking

14 p2120 A72-30611

Metal fatigue tests at various frequencies to observe surface structure, dislocations in crack vicinity, plastic deformation and ultrasonic resonance techniques

15 p2257 A72-31839

Rotating bending fatigue limit correlation with non-propagating crack for steel specimens with hole

15 p2329 A72-32140

Cost-saving techniques in helicopter structural test methods, suggesting system simulation, component replacement time calculation and computer techniques

16 p2373 A72-33221

Crack depth measuring instrument for fatigue crack propagation study in notch tests, noting application at high temperatures

16 p2391 A72-33234

Nondestructive vibration tests of fatigue crack damage in composite structures, investigating glass reinforced epoxy and polyester laminates

16 p2414 A72-33318

Cyclic compressive fatigue cracking tests of prenotched fiber reinforced epoxy materials at low stress

16 p2414 A72-33319

Incoloy low cycle fatigue tests at high temperatures and different strain rates, discussing fatigue life at 10 and 60 min hold times

16 p2410 A72-33820

Deformation substructures in stainless steels under low cycle high strain fatigue tests evaluation for application as fuel cladding for fast breeder reactors

16 p2411 A72-33825

Automatic recording instrument for crack initiation time and breakdown curve for low carbon and stainless steel corrosion-fatigue tests under bending and tensile loads

16 p2394 A72-33849

Results of preliminary studies of a bearingless helicopter rotor concept.

[AHS PREPRINT 600]

Full scale airframe fatigue testing of the CH-46.

[AHS PREPRINT 671]

17 p2489 A72-34490

17 p2491 A72-34511

Fretting corrosion fatigue prevention by barrier approach, discussing test program and application to helicopter part fatigue life increase

[AHS PREPRINT 672]

Use of special gauges for determining crack growth rate in fatigue in the AU4G1 aluminum alloy

17 p2626 A72-34512

Static and tension fatigue and free edge delamination damage induced by uniaxial tensile loads in flat graphite/epoxy laminate coupons

17 p2567 A72-34890

An approach to the analysis of the nonlinear deformation and fatigue response of components subjected to complex service load histories.

18 p2733 A72-36355

The effect of high vacuum on the low cycle fatigue law.

18 p2700 A72-36582

Comparison of experimental and theoretical thermal fatigue lives for five nickel-base alloys.

19 p2815 A72-37639

Evaluation of the tendency to brittle fracture of turbine rotors made from steels of medium strength

19 p2876 A72-38001

Heat resistant alloys stress-rupture strength tests for operating temperatures based on equivalent high temperatures damageability

19 p2818 A72-38008

Effect of the loading frequency on the fatigue strength of metals

19 p2818 A72-38012

Influence of the structure of VTZ-1 and VT-18 alloys on the fatigue strength for an asymmetrical loading cycle

19 p2819 A72-38017

On a method of analysis of the strain energy changes taking place during the rotary bending fatigue test of carbon steels and an effect of the pearlite patches to these changes.

20 p2935 A72-38881

On the fatigue crack propagation in polymeric materials.

20 p2943 A72-38886

On the cumulative fatigue damage of glass fiber reinforced plastics subjected to repeated tensile impact load.

20 p2943 A72-38888

Environmental acceleration of fatigue-crack growth in a high-strength steel.

20 p2935 A72-39140

The octahedral shear strain theory and its relation to biaxial cumulative fatigue damage.

20 p2978 A72-39202

The matrix fatigue behaviour of fibre composites subjected to repeated tensile loads - Application to B/Al 6061 composites.

20 p2936 A72-39208

Effect of thickness and orientation on fatigue crack growth rate in 4340 steel.

20 p2937 A72-39294

Fatigue tests at low cyclic loads of smooth and notched Ti alloy specimens, noting surface hardening effect on service life

20 p2941 A72-39580

Thermal fatigue resistance of KhN70VMuT boronized alloy

20 p2941 A72-39585

Possibility of determining the fracture toughness of materials on the basis of the form of static bend test fracture samples.

20 p2941 A72-39714

Review - Fatigue-crack propagation in metallic and polymeric materials.

20 p2980 A72-39793

Fatigue strength of welded aluminum-connections - Investigation with the aid of multiparameter life length lines

20 p2930 A72-39941

Fatigue-crack propagation characteristics of aluminum alloys in thick sections.

20 p2942 A72-39951

Criteria for valid plane strain fracture toughness testing dealing with straightness of fatigue crack front of metal specimens

20 p2981 A72-39958

Effect of notch root radius on the initiation and propagation of fatigue cracks.

20 p2981 A72-39960

Study of fatigue crack initiation from flaws using fracture mechanics theory.

20 p2981 A72-39961

Crack arrest and crack initiation in a titanium alloy.

20 p2942 A72-39962

Cyclic stress-strain induced buckling and fatigue failure in cold-rolled steel and tabulating and diagramming mechanical properties

21 p3065 A72-40233

Fatigue damage of aluminum alloy at high temperature.

21 p3066 A72-40716

Isothermal deformation behavior of structural metals in laboratory creep, relaxation and low cycle fatigue tests at high temperatures

21 p3119 A72-41009

Non-destructive examination of fibre reinforced polymers with special reference to continuous carbon fibre reinforcement.

[ICAS PAPER 72-44]

Influence of the cycling frequency and directional anisotropy on the fatigue strength of AMg6BM aluminum-alloy sheet

21 p3073 A72-41169

Facility for measuring and recording the electrical resistance of metallic samples during mechanical tests

21 p3043 A72-41718

Fatigue properties of 18-8 stainless steel at cryogenic temperatures.

21 p3071 A72-41845

The accumulation of damage in a glass-reinforced plastic under tensile and fatigue loading.

22 p3196 A72-42456

Testing procedures for the design and life estimation of fatigue-sensitive structures.

22 p3241 A72-42974

Effect of cyclic stress wave form on corrosion fatigue crack propagation in Al-Zn-Mg alloys.

22 p3194 A72-43043

Book - Effect of notches on low-cycle fatigue: A literature survey.

22 p3242 A72-43145

Influence of the cycling frequency on the fatigue and corrosion fatigue of steel samples with bushings

22 p3242 A72-43155

Investigation of the kinetics of low-cycle fatigue of steels in a hydrogen atmosphere and in vacuum

22 p3195 A72-43161

Heat treatment effectiveness criteria for thermomechanically strengthened steels, using creep rupture, fatigue, bending and tensile tests

23 p3300 A72-43643

Utilization of computers in mechanical strength studies

23 p3345 A72-43644

Some preliminary observations on the extension of cracks under static loadings at elevated temperatures.

23 p3301 A72-43712

Gas turbine blades of cast ZrSiO₂ heat resistant alloy, investigating structural strength from fatigue test data

23 p3347 A72-43734

Failure and crack formation in gas turbine engine compressor disks under variable stresses from fatigue tests, considering safety factors

23 p3347 A72-43736

Energy dissipation in metals during high-frequency fatigue tests. I

23 p3302 A72-43963

Energy dissipation in metals during high-frequency fatigue tests. II

23 p3302 A72-43964

High-frequency fatigue testing facility, U-20P, with programmed control of the sample's vibration amplitude

23 p3278 A72-43970

Electron fractography of fatigue failure and macrocrack propagation in dual phase Ti alloy during cyclic loading at minus 140 to plus 150 C

23 p3303 A72-44097

Fatigue behavior of a titanium 8Al-1Mo-1V alloy in a dry argon environment.

23 p3304 A72-44261

The difference in the plastic deformation of the surface and bulk layers of polycrystalline iron under fatigue loading

23 p3304 A72-44490

The stress-strain relation in the low-cycle fatigue of metallic materials under rotating-beam bending.

24 p3454 A72-44626

Mean stress effects on fatigue crack propagation rate from tests at various temperatures, assuming initial, tensile and shear modes and final propagation stages

24 p3454 A72-44627

The cyclic plastic strain and cumulative fatigue damage - Fatigue damage caused by the stress below the fatigue limit.

24 p3454 A72-44628

The fatigue strength under varying mean stress.

24 p3455 A72-44629

Polymer fatigue failure mechanism examination on constant deflection type testing machine, investigating applied stress and temperature effects on crack propagation rate

24 p3455 A72-44631

Life prediction of expulsion bladders through fatigue test and fold strain analysis.

24 p3455 A72-44672

Fatigue testing of the F.28 Fellowship.

24 p3366 A72-44729

Fan jet Falcon design and certification tests.

24 p3366 A72-44731

The fatigue and fail-safe program for the certification of the Lockheed Model 286 rigid rotor helicopter.

24 p3366 A72-44733

Aircraft structures fatigue life expectancy under random acoustic excitation, describing testing methods and equipment

24 p3367 A72-44739

Economic and operational aspects of fatigue - Figures of a Swiss ground attack/fighter aircraft. 24 p3367 A72-44742

Plane-stress fracture toughness testing using a crack-line-loaded specimen. 24 p3456 A72-44810

Fatigue crack closure at positive stresses. 24 p3457 A72-44819

Ultrasonic detection of fatigue damage. 24 p3457 A72-44820

Temperature dependence of low temperature endurance of Cr-Ni steels in bending fatigue tests. 24 p3413 A72-44938

Endurance tests of D16AMO alloy sheets under high intensity acoustic, harmonic and electrodynamic vibrator loading. 24 p3414 A72-44945

Al and Ti alloy fatigue after temperature reduction to 253, 77 and 4 K as function of surface purity after machining. 24 p3416 A72-45743

Stepwise fatigue testing of high temperature alloy, noting strain hardening phenomena in prestressed samples. 24 p3416 A72-45755

FATTY ACIDS

NT OLEIC ACID

Tobacco tissue cultures with Apollo 12 lunar material, determining endogenous sterols and fatty acids concentrations by gas chromatography and mass spectrometry. 07 p0920 A72-19850

Glucose and fatty acid metabolic response during impending myocardial infarction in animals. 07 p0921 A72-20175

Dose dependent hyperglycemia and hypolipemia response to pentobarbital sodium injection in rats from plasma glucose and fatty acid analysis. 08 p1116 A72-21187

Myocardial infarction stress effect on serum cortisol, plasma free fatty acid and urinary catecholamine levels. 11 p1582 A72-26787

Induction of ventricular arrhythmias by elevation of arterial free fatty acids in experimental myocardial infarction. 17 p2502 A72-34997

Dietary regulation of fatty acid synthesis in rat liver and hepatic autotransplants. 19 p2757 A72-38147

Human plasma free fatty acids relation to lactic acid concentration and maximum aerobic power, noting carbohydrate availability as exercise capacity limiter. 21 p3003 A72-41520

FAULT MECHANICS

U FRACTURE MECHANICS

FAULTS

Nondestructive testing of electroexplosive devices, considering bridgewire-explosive interface and faults-abnormalities interrelationship. 08 p1220 A72-20764

FAYALITE

Activity-composition relations in the fayalite-forsterite solid solution between 900 and 1300 C at low pressures. 20 p2915 A72-39178

FBFM [MODULATION]

U FEEDBACK FREQUENCY MODULATION

FCC LATTICES

U FACE CENTERED CUBIC LATTICES

FEAR

Hypothalamic stimulation conditioned negative fear reflex in cats before/after neocortex isolation. 07 p0920 A72-19859

FEASIBILITY

Radial inflow compressor feasibility, discussing blade loadings for various pressure ratios and efficiency of rotor and diffuser. 11 p1570 A72-25644

FEDERAL REPUBLIC OF GERMANY

U GERMANY

FEED SYSTEMS

Tunnel diode quartz oscillator frequency stability improvement and dc power requirement reduction using nonlinear feed circuits. 03 p0331 A72-13555

Satellite electrical power, discussing energy converters, satellite feeder subsystem and voltage requirements. 03 p0311 A72-13639

Design and performance characteristics of ion thruster feed system components including high voltage isolator, liquid Hg flowmeter and W vaporiser. 11 p1710 A72-26213

Miniaturized electronic system for controlling methanol concentration in aqueous electrolyte during fuel cell operation. 12 p1755 A72-27723

Investigation of the dynamic characteristics of the speed governor of a hydropneumatic feed drive. 23 p3253 A72-44022

FEEDBACK

NT NEGATIVE FEEDBACK

NT NONLINEAR FEEDBACK

NT POSITIVE FEEDBACK

NT SENSORY FEEDBACK

Motivation in vigilance, studying effects of subject self evaluation and experimenter /knowledge of results/ controlled feedback. 06 p0766 A72-17711

Hollow dielectric waveguide for distributed feedback lasers. 17 p2564 A72-35346

On a feedback communication system having iteration control in the forward channel. 21 p3039 A72-41826

FEEDBACK AMPLIFIERS

Balanced negative feedback circuits for reducing nonlinear distortions in distributed gain power amplifiers. 02 p0193 A72-12223

Superregenerative linear mode amplification in Q switched He-Xe laser as function of resonator phase, length and signal angle. 04 p0531 A72-15147

IMPATT diode avalanche region microwave self oscillation mechanism explanation by cavity resonator and feedback theories. 06 p0787 A72-18383

LF noise generator with Rice variable amplitude probability distribution law, using shielded vacuum tube superregenerative amplifier. 09 p1285 A72-22345

Noise characteristics of regenerative amplifier with direct coupling to load. 13 p1929 A72-28897

Selectivity evaluation for regenerative amplifiers of complex design. 13 p1929 A72-28898

Forward loop signal attenuation and phase shift diagrams for design of feedback amplifier and compensation network for dc flyback converter. 13 p1899 A72-29110

Forced oscillations in RC amplifier with negative feedback through nonlinear bandpass filter with varicaps. 13 p1931 A72-29266

Feedback ac compensating amplifier design for automatic AM signal envelope conversion, noting truncated equivalent transfer function expandability. 13 p1933 A72-29972

Theoretical model for computer calculation of transients in oscillator consisting of nonlinear amplifier with feedback through sequence of matched LC circuits. 16 p2371 A72-33280

High precision electrostatic feedback transducer for very low differential pressure measurement in gas media, suggesting low pressure standard role. 16 p2394 A72-33638

Optimal number of parallel transistor connections in feedback amplifier to improve SNR. 18 p2665 A72-36108

Regenerative nonlinear RC amplifier oscillations due to series opposed varicap diode capacitance. 18 p2783 A72-36109

Design considerations of a 3.1-3.5 GHz GaAs FET feedback amplifier. 19 p2771 A72-37269

Optimal delay control circuit adjustment by approximate calculation with quadratic error integral and ITAE criterion dependence on loop amplification. 19 p2783 A72-38643

Calculation of two- and three-stage broadband amplifiers with parallel correction from the standpoint of a maximum quality factor with an optimally flat amplitude characteristic. 21 p3027 A72-40477

Amplification cascade designs for harmonic and pulsed signals with a high frequency emitter correction. 21 p3033 A72-40946

SNR improvement by negative feedback and deterioration by positive feedback in amplifiers, discussing input circuit thermal noise. 21 p3034 A72-41123

FEEDBACK CIRCUITS

Motional feedback systems comparison for ultrasonic transducers operated as resonant emitters, describing circuitry for self excitation. 01 p0070 A72-11019

Coding for analog and digital data transmission over channels with noiseless and noisy feedback links. 02 p0197 A72-11680

Ruby ring laser single mode operation with Fabry-Perot etalons for selective feedback, discussing laser emission spectrograms. 03 p0366 A72-13194

Self oscillating dc-dc converter analysis and optimal design, modeling by single loop nonlinear feedback system. 04 p0465 A72-14571

Human neuromuscular coordination control optimization, discussing preprogrammed open-loop control with feedback monitoring loop. 04 p0477 A72-14705

M-ary orthogonal signal phase noncoherent detection in sequential decision feedback, comparing performance with optimal coherent reception. 06 p0773 A72-17596

Block orthogonal M-ary communication over fading dispersive channel with intermittent on-off noiseless feedback, calculating upper and lower bounds on error probability. 06 p0776 A72-18389

Frequency discriminator like two-channel device with greater sensitivity by crossed feedback, calculating variable frequency emf effect on operation. 07 p0938 A72-18853

Trajectory properties of roots of characteristic equations with complex coefficients for two dimensional systems with feedforward and feedback cross couplings. 08 p1200 A72-21768

Optimal answer-back communications systems using feedback channel for error checking. 09 p1277 A72-22568

Thermal and electric fields interaction in LF integrated circuits design, applying thermal feedback loops to bandpass filter, delay circuit and Schmidt-trigger oscillator. 10 p1448 A72-24280

Sequential machine realization with trigger or flip-flop elements and Boolean function feedback. 10 p1445 A72-24401

Capture range and acquisition time analysis of phase locked loop with active filter. 10 p1458 A72-24934

Wide dynamic range analog multiplier with variable transconductance divider in operational transistor amplifier feedback path. 11 p1603 A72-25742

Feedback and feedforward circuits to double operational amplifier output voltage swing with increased slew rate. 11 p1604 A72-25746

Transistorized measuring amplifiers optimal initial regimes calculation with generalized junction voltage method, noting circuits analysis and internal feedback loops. 11 p1605 A72-26467

Noise control by Helmholtz resonators, considering equivalent circuits via feedback schemes. 13 p2005 A72-29567

Nonlinear microwave circuit feedback model analysis by describing function in control theory, applying to oscillator phase locking problem. 15 p2210 A72-31355

Feedback averaging procedure application to M-ary polarization modulated laser communication system, obtaining error rate improvement over systems without feedback. 16 p2362 A72-33215

Noise stability of frequency-time adaptive transmission systems for discrete information, using resolving feedback circuits. 16 p2363 A72-33266

Random multiple access data transmission systems with feedback for message confirmation and retransmission in event of errors, evaluating channel capacity. 16 p2372 A72-33794

Data transmission systems with decision feedback in presence of burst noise, calculating statistical relations among received sequences as function of duration and spacing. 16 p2372 A72-33795

Linear negative feedback dc current magnetic transducers for telemetry input signals, discussing operation principles and design. 16 p2370 A72-33862

Ac voltage squaring with semiconductor power amplifier based on electronic servo principle and feedback circuit. 16 p2370 A72-33958

Transmission line with feedback, deriving Nyquist stability from Michailov criterion with application to liquid fuel rocket model. 17 p2621 A72-35100

One path ultrasonic flowmeter using electroacoustic feedback. 17 p2556 A72-35427

Development of a continuous linear model of a d-c to d-c flyback converter. 18 p2643 A72-36073

Digital simulation for radio frequency interference and specular multipath effects on FM spread spectrum demodulation with feedback and phase lock loops. 18 p2659 A72-36317

Feedback circuitry for dc amplifiers voltage drift compensation, discussing performance criteria in terms of residual offset voltage, system stability, correction and measurement time. 18 p2671 A72-37150

Effect of nonlinearity in the feedback circuit of a recirculation-type comb filter. 20 p2906 A72-38893

Feedback quantization noise effects on differential PCM systems, showing SNR relation to noise optimized prediction. 21 p3017 A72-40860

Phase locked feedback circuit for FM demodulation, discussing all digital circuit design and voltage controlled oscillator algorithm to avoid analog implementation problems. 21 p3018 A72-40873

- SNR improvement by negative feedback and deterioration by positive feedback in amplifiers, discussing input circuit thermal noise 21 p3034 A72-41123
- Effect of feedback and protective circuits on the reliability of electronic equipment 22 p3158 A72-42118
- Influence of a nonlinearity in a coherent accumulator of pulse signals on the gain in the signal-to-noise ratio 23 p3264 A72-43762
- Optimum reception algorithms in communication systems with decision feedback in presence of noise in forward and return channel 24 p3379 A72-44747

FEEDBACK CONTROL

- NT CASCADE CONTROL
- Analog computer simulation of automatic control systems containing time delay element in feedback loop, evaluating errors 01 p0044 A72-10152
- French monograph on extremum values of function with two variables and nonlinear feedback control systems stability, using associate recurrence solutions properties 01 p0044 A72-10164
- Information feedback application to AM laser communication system, predicting multiplicative error, background shot noise and photon arrival fluctuation effects on continuous parameter transmission [AD-736731] 01 p0025 A72-10326
- Frequency conditions of absolute stability for closed automatic control system with nonlinear unsteady units 01 p0045 A72-10499
- Plasma column equilibrium position feedback control based on combination principle, analyzing system stability 01 p0109 A72-10502
- Error fluctuation component spectral density determination in closed automatic nonlinear system for controlling random vibration spectrum 01 p0045 A72-10505
- Scientific satellite with simple inertial system, deriving discrete feedback reentry guidance algorithms based on closed-form equations solvable by onboard computer 01 p0098 A72-10944
- Human short term thermoregulation feedback-feedforward control mechanism, using hypothalamic temperature as set point 02 p0168 A72-12036
- Feedback control dynamic system described by linear differential equation with random coefficients, calculating parameters distribution effect on behavior precision 02 p0197 A72-12339
- Extremal system with second control loop for search signal frequency regulation to optimize primary loop operation, determining system dynamic errors under random drift 02 p0197 A72-12340
- Human operator dynamic characteristics measurement, using pseudorandom binary signals and mathematical models in closed loop control system 02 p0169 A72-12660
- Stochastic linear-quadratic-Gaussian problem role in optimal closed loop control system design, emphasizing philosophy, modeling and problem formulation [AD-738763] 02 p0198 A72-12801
- Optimal limited state variable feedback controllers design for static and dynamic linear systems [AD-738770] 02 p0198 A72-12809
- Linear multivariable interacting feedback control system optimal design by heuristic approach to determine input-output pairing and controller settings for satisfactory disturbance attenuation 03 p0337 A72-12905
- Neighboring optimal feedback control for multi-input nonlinear dynamical systems with discontinuous control, applying to minimum time satellite attitude acquisition problem solution 03 p0338 A72-13407

- Linear feedback control systems with time lag, calculating integrated squared error by Liapunov function 04 p0506 A72-15110
- Large linear time invariant dynamic control system optimum simplified model based on performance index connecting feedback errors 04 p0506 A72-15113
- Integrated PFM feedback control system, investigating stable periodic oscillation based on nonlinear discrete equivalence 04 p0506 A72-15114
- Multiple-input multiple-output linear time invariant feedback systems stability, investigating continuous-time case 04 p0507 A72-15694
- Analytical inversion of quasi-orthogonal matrix for Simpson method of state feedback gains calculation in multiloop linear mode control systems 05 p0639 A72-15807
- Linear single and multiloop control system synthesis for sensitivity reduction by introducing signals proportional to sensitivity functions with analyzer 05 p0640 A72-16207
- Optimal closed loop control of stochastic nonlinear systems by expanded cost function applied to reduced terminal error atmospheric entry problem 05 p0685 A72-16462
- Closed loop fluidic bidirectional jet flap airfoil lift control system, considering application to helicopter rotor blades 05 p0603 A72-16659
- Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts [AIAA PAPER 72-124] 05 p0612 A72-16922
- Low density plasma flute oscillations stabilization by feedback system with potential sensors and electrodes, deriving dispersion equation 05 p0697 A72-16983
- Linear time-varying control systems with one feedback nonlinearity, determining combined time-frequency condition for stability 05 p0642 A72-17090
- Adaptive control for linear discrete time stochastic systems with unknown gain parameters, considering open loop feedback optimal control using quadratic performance index [AD-739126] 06 p0791 A72-17305
- Parameter adaptive self organizing control of linear discrete time systems, presenting stochastic approximation algorithms for feedback systems identification 06 p0791 A72-17306
- Optimally sensitive closed loop control synthesis for systems containing uncertain time varying parameters, applying to stochastic systems 06 p0792 A72-17309
- Third order nonlinear systems phase plane analysis, noting applicability to unity feedback closed-loop systems with linear memory 06 p0792 A72-17313
- Suboptimal feedback control for nonlinear dynamic processes, presenting control algorithm based on linear plant optimal solution 06 p0792 A72-17314
- On-off control system stability with feedback proportional to square of velocity, determining system frequency response 06 p0793 A72-17316
- Q-machine plasma column drift instability passive feedback control, regulating feedback drive current phase and amplitude by varying resonance circuit characteristics 06 p0857 A72-17532
- Second variational algorithm for iterative solution of unconstrained optimal control problems, examining linearized feedback control 06 p0839 A72-17592
- Optimal final value control systems in phase-variable canonical form, discussing feedback gain singularity structure for single and multiple input systems 06 p0793 A72-17954
- Noise, delay and interruption caused communication degradation effects on feedback control system performance, considering air navigation and computer aided command and control on battlefield 06 p0794 A72-18242

- German book on time variable multiparameter control systems covering reduction, canonical forms, decoupling, feedback stabilization, observers, inversion and multiloop synthesis 06 p0794 A72-18517
- Adaptive control system synthesis by steepest descent method, obtaining algorithms for parameters self adjustment loop construction 06 p0795 A72-18661
- Motion dynamics of aircraft-autopilot closed loop system under influence of atmospheric turbulence and electric circuitry thermal noise 07 p0911 A72-18990
- Phase lock loop receiving system digital simulation for estimating mean time to indicate lock and probability distribution function for wide SNR range 07 p0939 A72-19065
- Hybrid carrier and modulation tracking loops exploiting sideband coherency for phase coherent tracking, telemetry and command system performance improvements 07 p0939 A72-19066
- Real time near optimal closed loop control solution to fixed time nonlinear differential game by periodically updating to two point boundary value problem 07 p1027 A72-19278
- Aircraft optimal terminal guidance nonlinear feedback control law, deriving maximum principle by digital computer program 07 p1033 A72-19287
- Ultrasonic measurement technique for low microwave susceptibility on ferrite samples featuring feedback scheme for signal klystron locking 07 p0955 A72-19320
- Model-following algorithm and equicontrollability in multivariable feedback control systems, considering application to decoupling problem 07 p0960 A72-19698
- Linear multivariable systems feedback invariant structure of controllable matrix pair under rich transformation group including regular linear coordinate and state-feedback transformations 07 p0960 A72-19700
- Frequency response design for interactive multivariable feedback control systems, using characteristic transfer functions 07 p0960 A72-19704
- Linear time-invariant controllable plant, determining semiclosed loop nominally equivalent control realization for reduced sensitivity to plant parameter perturbations 07 p0961 A72-19705
- Linear multivariable system design based on relationship between performance index parameters and optimal response in frequency domain, exemplifying gas turbine feedback controller design 07 p0961 A72-19710
- Eigenvalue sensitivity in optimal feedback control systems with state estimation 07 p0962 A72-19716
- Linear multivariable feedback control system design techniques 07 p0963 A72-19723
- Absolute stability region of linear portion of single loop automatic control system with one nonlinear element determined by frequency criteria 07 p0963 A72-19723
- Control system stability with nonlinear feedback in steady equilibrium state 07 p0963 A72-20321
- Interactive graphics technique for design of single input linear feedback systems described by state equations or cascaded transfer functions 07 p0963 A72-20391
- Aircraft altitude two-loop feedback control system designed by compensation parameter variation technique, determining correlation between system sensitivity computations and observations 07 p0963 A72-20592
- Zero velocity lag servomechanism transient response sensitivity from intuitive approach to convolution problem, noting feedback compensation advantages in sensitivity reduction 07 p0964 A72-20593
- Time optimal closed loop control system synthesis by phase space technique verifying results by state variable approach 07 p0964 A72-20595
- Closed loop covariances prediction in reentry vehicle tracking and data compression, presenting simulation results 08 p1144 A72-20846
- Self excited oscillations and transient responses of spacecraft stabilization relay system with delayed feedback, analyzing time delay effects in actuator circuit 08 p1241 A72-21170
- Algorithm to compute inertial navigation system altitude and vertical velocity by closed feedback loop with accelerometer output mixed with pressure altitude reference 08 p1204 A72-21411
- Feedback control dynamic system described by linear differential equation with random coefficients,

calculating parameters distribution effect on behavior precision

08 p1146 A72-21554

Extremal system with second control loop for search signal frequency regulation to optimize primary loop operation, determining system dynamic errors under random drift

08 p1146 A72-21555

Adaptive statistical system with feedback loop for weather analysis and forecasting, examining learning process features

08 p1202 A72-22113

Hydraulic actuator servomechanism performance dependence on asymmetrical spool valve lap and closed loop system stability

08 p1113 A72-22153

Nonlinear closed loop system reduction of differential trajectory sensitivity to continuous variations or external disturbance

09 p1340 A72-22245

Linear multivariable system stabilization by output feedback technique based on gradient approach

09 p1290 A72-23097

High power Ar laser frequency stabilization technique using multiple feedback loop with optical cavity discriminator stabilized against iodine vapor absorption line

09 p1325 A72-23337

Stability degree analysis of linear feedback control systems with dead time, presenting proportional and integral compensation diagrams produced with digital computer program

09 p1291 A72-23370

Digital computer prepared optimal controls setting diagrams for single loop, linear and concentrated parameter control circuit design

09 p1291 A72-23372

Homogeneous plasma internal feedback mechanism and structure, discussing instabilities control by external feedback

09 p1365 A72-23474

Quadratic performance index generation for optimal design of completely controllable, scalar linear system with state feedback

10 p1454 A72-23783

Computer aided design of linear time-invariant multivariable feedback control systems, given specifications in frequency domain in stability margin form

10 p1455 A72-23789

Nonlinear programming and parameter optimization algorithms for constrained feedback control system design

10 p1441 A72-23790

Near optimal closed loop control laws for fixed time pursuit-evasion differential game between two aircraft in vertical plane, using dynamic modeling

10 p1421 A72-23805

Minimax feedback control of uncertain discrete time dynamic systems with set description, using dynamic programming

10 p1456 A72-23806

Optimal closed loop control of discrete stochastic nonlinear systems, considering guidance and navigation for space and terrestrial vehicles

10 p1456 A72-23811

Sensitivity comparison of equivalent open and closed loop optimal control systems, extending performance index formulas to instantaneous and isoperimetric constraints

10 p1456 A72-24456

Optimal closed loop control of discrete stochastic nonlinear systems, obtaining solution by cost function in power series around deterministic trajectory

10 p1457 A72-24499

YIG tuned Gunn oscillator phase locking and shifting over 3 GHz range in X band, using feedback control

10 p1451 A72-24596

Steady state operation of automatic control system to stabilize random vibration spectra, noting maximum control accuracy at optimum loop gain

10 p1457 A72-24635

Closed and open loop transfer function coefficients relationship for steady state linear system with proportional elements in feedback and parallel paths

10 p1457 A72-24724

Optimal control of linear stochastic feedback systems described by functional differential equations

10 p1458 A72-25145

Discrete time systems with periodic feedback gain, deriving stability conditions and Nyquist plot from linear operator spectral theory

11 p1608 A72-25318

Stationary weighting pattern synthesis by linear time varying dynamic system, noting feedback system input-output mapping properly

11 p1608 A72-25321

Input-output stability of linear time invariant multivariable closed loop control systems

11 p1608 A72-25327

Extremal feedback control system operation with integral PFM in extremum drift mode, determining equations of motion and steady state regime

11 p1610 A72-25449

Asymptotic stability of astatic pulse frequency modulated feedback control systems with discrete correction, obtaining sufficient conditions in closed form with Liapunov method

11 p1610 A72-25450

Suboptimal feedback control law synthesis for nonlinear systems, using second order approximation to optimal control

11 p1610 A72-25872

Computer aided iterative design of nonlinear single loop control system with sinusoidal describing function and time response display capability

11 p1601 A72-26042

Extremal feedback control system for IR and sub-millimeter range laser emission frequency stabilization

11 p1650 A72-26358

Closed loop system stability, considering small gain and passivity theorems interrelationship and scattering matrix

11 p1612 A72-26470

Hydraulic feedback servomechanism for dynamic response characteristics control, discussing design parameters and fluid properties influence on system performance

11 p1578 A72-26981

Low density plasma flute oscillations stabilization by feedback system with potential sensors and electrodes, deriving dispersion equation

12 p1850 A72-27127

Hydrofluidic stability augmentation system /HYSAS/ development for military helicopters, discussing test program and technical feasibility

12 p1754 A72-27407

Flight tests of stability augmentation system for light airplane improving pilot control during IFR encounter

12 p1754 A72-27513

Optical feedback exposure control mechanism of high resolution CRT film recorder intended for tactical military usage

12 p1810 A72-27932

Spurious oscillations in external excitation oscillators due to internal feedback in transistor, investigating frequency dependence of stability coefficient in cascade with common emitter

13 p1929 A72-28896

Random vibration statistics of lifting rotors with feedback controls, solving response variance matrix by random inputs shaping filters

13 p2057 A72-29096

Computerized synthesis technique for nonlinear feedback control systems, incorporating circle and Popov criteria

13 p1936 A72-29107

Ionization stabilization in MHD generators by sensing electron density perturbation with linear feedback into nonequilibrium plasma

13 p2014 A72-29369

Nonsingular feedback control system phase-amplitude frequency response graphical analysis using real circle diagram

13 p1937 A72-29974

Russian book on high precision servo systems synthesis covering combined feedback and open loop controls, accuracy improvement and root-mean-square errors minimization

15 p2210 A72-31273

Book on phase locked and frequency feedback systems covering FM and multiple loop principles, limiter-discriminator operation, phase detection techniques, etc

15 p2210 A72-31500

Optimal feedback controller design based on cooperative game described by quadratic cost functional under linear differential equation constraints, applying to satellite terminal rendezvous

15 p2267 A72-31789

Optimal thrust direction for planetary escape at residual speed, using approximate explicit closed loop guidance scheme

15 p2268 A72-31821

Suboptimal feedback control for aircraft gust alleviation design, using indirect perturbation information through normal acceleration factor measurement

15 p2181 A72-32025

Pulsed solid state lasers with large area Si photodiode for output measurement in feedback control system to compensate flash lamp aging

15 p2247 A72-32027

Single closed loop discontinuous control system, determining discrete correcting element parameters from linear inequalities

15 p2212 A72-32175

Infinite dimensional system optimal discrete-time feedback controller calculation by n-dimensional system approximation using recurrence relations with functional analysis

15 p2212 A72-32245

Flexible launch vehicle optimal and constrained-optimal control for performance index minimization, using sensors and constant feedback gains

15 p2321 A72-32585

Flexible space vehicle multiple closed loop attitude control system design, discussing stability, structure interaction and performance by analog simulation

15 p2321 A72-32587

Digital computer studies of control loop parameters and configurations effects on performance of synchronous turbogenerator with two field windings

15 p2183 A72-32793

Limit cycle stability of third and higher order feedback systems predicted from negative slope of describing function

15 p2213 A72-32796

Limit set configuration of optimal nonlinear feedback control scheme in n-dimensional state space

15 p2213 A72-32797

Discrete system feedback design based on complex number plane mapping, determining gain

15 p2213 A72-32800

Flutter instability control in continuous elastic system via feedback

16 p2463 A72-32843

Automatic systems design for monitoring dynamic control systems, noting feedback control system performance prediction based on subsystems characteristics

16 p2371 A72-33085

Hydrofluidic three-axis stability augmentation system to improve UH-1B helicopter damping and handling qualities during high speed gunfiring missions

16 p2350 A72-33650

Extremal feedback control system for IR and sub-millimeter range laser emission frequency stabilization

16 p2403 A72-33711

State dependent state variable feedback method to control multiple input multiple output nonlinear and/or time varying systems

17 p2532 A72-34420

Stabilization of magnetohydrodynamic flows by a distributed feedback system

17 p2587 A72-34459

Hingeless rotor - Experimental frequency response and dynamic characteristics with hub moment feedback controls.

17 p2489 A72-34494

[AHS PREPRINT 612] Constant voltage and constant emitter-temperature control schemes dynamics in thermionic reactor, showing closed loop responses to load changes, converter failures and reactivity perturbations

17 p2494 A72-34581

Modularized digital controller for closed loop systems using MOS, MSI and LSI components

17 p2521 A72-34703

Hydrofluidic stability augmentation system for U.S. Army helicopters, emphasizing reliability, maintainability and reduced cost

17 p2492 A72-34928

Controllability, observability and optimal feedback control of affine hereditary differential systems.

17 p2533 A72-34950

Equivalent predictions of the circle criterion and an optimum quadratic form for a second-order system.

17 p2577 A72-35534

Stability of linear time-invariant distributed parameter single-loop feedback systems.

17 p2534 A72-35535

Design of simple control loops in the time domain by simulation of the hybrid mode

17 p2534 A72-35756

State feedback control law for linear multiinput multioutput time-invariant dynamic system under disturbance to obtain output with zero steady state error

18 p2672 A72-36054

Nonlinear dynamic feedback control systems modeling by parameter estimation scheme with polynomial representation for state variables

18 p2672 A72-36057

Functional relationships between the conventional steady-state error characteristics and the weighting matrices in the quadratic performance index.

18 p2672 A72-36058

Feedback controller synthesis from nonlinear system modeling by linear equations, proving theorem relating stability properties

18 p2672 A72-36060

Closed loop dynamics of in-core thermionic reactor systems.

18 p2644 A72-36173

Feedback synthesis of an incore thermionic reactor control system for space.

18 p2645 A72-36186

Optimal signal design for digital center of gravity feedback communications over white noise channels, using energy ratio functions

18 p2659 A72-36316

Digital controller for high pressure rocket engine.

18 p2721 A72-36335

Second order differential guidance game, formulating strategy for optimal feedback control

18 p2673 A72-36660

Optimal control of plants whose transfer functions contain zeros.

18 p2673 A72-36724

Feedback influence coefficient on amplifier gain, using recurrent difference concept

19 p2777 A72-37314

Choice of parameters for measuring devices in a closed-loop linear control system

19 p2777 A72-37319

A fluidic sensor for closed loop engine acceleration control.

19 p2849 A72-38049

State-feedback-controllers and state-estimators design for roll-pitch-horizontal motions of helicopter near hover, using rotor dynamics model

[AIAA PAPER 72-778] 19 p2752 A72-38137

Digital programming techniques for maximum utility and flexibility in filament winding.

19 p2808 A72-38170

Optimal selection of stability augmentation parameters for excellent pilot acceptance.

19 p2752 A72-38227

The output control of linear time-invariant multivariable systems with unmeasurable arbitrary disturbances.

19 p2779 A72-38231

Algorithm for linear multivariable systems synthesis via combined dynamic feedforward compensation and linear state variable feedback

19 p2779 A72-38232

A circle criterion for nonlinear stochastic feedback systems.

19 p2779 A72-38235

Invariant poles feedback control of flexible, highly variable spacecraft.

19 p2869 A72-38240

Control theory stability criteria applied to discrete time feedback systems, investigating numerical integration methods for initial value problems solution

19 p2826 A72-38250

Recent results concerning a graphical test for checking the stability of a linear time-invariant system.

19 p2826 A72-38251

On-line identification of multivariable stochastic feedback systems.

19 p2781 A72-38270

Decoupling and synthesis of certain nonlinear systems.

19 p2827 A72-38275

The dynamic modeling technique for obtaining closed-loop control laws for aircraft/aircraft pursuit-evasion problems.

19 p2753 A72-38276

Feedback loop equations and discrete measuring point methods for synthesis of optimal control systems with location dependent controlled variables

19 p2782 A72-38311

Decoupling of linear discrete time systems by state variable feedback.

19 p2827 A72-38563

Study of the stability of a polar coordinate compensator

19 p2783 A72-38581

Problems and solutions related to the design of a control augmentation system for a longitudinally unstable supersonic transport.

[AIAA PAPER 72-871] 20 p2887 A72-39128

Synthesis of feedback systems with large plant ignorance for prescribed time-domain tolerances.

21 p3037 A72-40643

Bounded-input bounded-output stability of nonlinear discrete systems by a method of comparison.

21 p3037 A72-40645

Linear distributed parameter systems modal analysis and design for low sensitivity optimal feedback control, using linear differential operators

21 p3037 A72-40646

Certain features of the use of controllable-gain transistors

21 p3033 A72-40944

Linear analog to pulsewidth converter insertion into control loop in dc/dc regulators for space applications to permit high sampling frequencies

21 p2997 A72-41081

Effect of single-bit digitization in adaptive array control loops.

21 p3034 A72-41085

Lectures on theory of manual-vehicle control.

21 p3011 A72-41418

Some contributions to the theory of linear models describing the control behaviour of the human operation.

21 p3011 A72-41419

A method for the development and optimization of controller-models for man-machine systems.

21 p3011 A72-41420

Automatic measurement of microwave-cavity parameters using stable sampled control loops.

21 p3034 A72-41465

Investigation of the stability of a hydraulic servo motor with rigid feedback

22 p3139 A72-41858

Stabilities and settling times of nonlinear and time-varying feedback systems.

22 p3161 A72-41937

Compatible controllers for time-varying linear plants.

22 p3161 A72-41939

Development and optimization of a nonlinear multiparameter human operator model.

22 p3149 A72-41949

Construction of Liapunov functions for time-dependent systems containing inertialess nonlinearities

22 p3205 A72-42176

Liapunov function method in control problems of distributed parameter systems [Survey]

22 p3205 A72-42180

Low frequency measurement of mechanical impedance and frequency response.

22 p3164 A72-42700

Synthesis of linear stationary systems with the aid of proportional elements

22 p3162 A72-42738

Limitations on the synthesis of control systems in the case of incompletely accessible state variables

22 p3162 A72-42739

Choice of loop gain for a hydraulic servo system

22 p3140 A72-42921

Closed loop pulsed automatic control system, determining discrete correcting element parameters from linear equalities

22 p3163 A72-43009

Infinite-time reachability of state-space regions by using feedback control.

23 p3274 A72-43538

Extension of analytical design techniques to multivariable feedback control systems.

23 p3274 A72-43539

An improved general algorithm for arbitrary pole assignment.

23 p3275 A72-43546

Output-feedback control law for randomly distributed multivariable system.

23 p3275 A72-43608

Design of controllers for open-loop unstable multivariable system using inverse Nyquist array.

23 p3275 A72-43609

Decoupling and diagonalization conditions determination for nonlinear multivariable time-varying differential equations system by state feedback, giving illustrative examples

23 p3275 A72-43611

Optimally sensitive control for distributed parameter systems.

23 p3275 A72-43612

A direct method for computing optimal feedback control for linear systems.

23 p3275 A72-43613

Molecular-beam-stabilized argon laser.

23 p3296 A72-43817

Recent results in convolution feedback systems.

23 p3276 A72-43861

Digital filter design using observers.

23 p3276 A72-43864

An inertially balanced servo.

23 p3311 A72-43866

Forward-error correction with decision feedback.

23 p3268 A72-44175

A method for synthesizing feasible correcting devices with a minimum number of constraints on the optimized transient pulse response function

24 p3386 A72-45318

Algorithmic description of the generalized operational characteristic of a human operator

24 p3376 A72-45515

Estimate of the operational efficiency of a human operator in the follow-up mode of a closed-loop control system

24 p3376 A72-45516

Experimental determination of the distribution rule for the time of failure-free operator action in the tracking mode /with pursuit/

24 p3377 A72-45521

Allowable regions for stability multiplier characteristics.

24 p3420 A72-45787

FEEDBACK FREQUENCY MODULATION

Wideband modulation feedback technique for IMPATT diode oscillator AM-FM noise suppression

01 p0037 A72-10647

Signal frequency distortions in frequency-modulated oscillators with feedback delay

23 p3266 A72-44209

FEEDFORWARD CONTROL

Human short term thermoregulation feedback-feedforward control mechanism, using hypothalamic temperature as set point

02 p0168 A72-12036

Conventional open and closed loop servo analysis methods applied to Naval aircraft approach power compensator systems, using pilot model concepts

[AIAA PAPER 72-124] 05 p0612 A72-16922

Feedback and feedforward circuits to double operational amplifier output voltage swing with increased slew rate

11 p1604 A72-25746

Algorithm for linear multivariable systems synthesis via combined dynamic feedforward compensation and linear state variable feedback

19 p2779 A72-38232

Multiloop piloting aspects of longitudinal approach path control.

[ICAS PAPER 72-46] 21 p2995 A72-41171

FEEDING [SUPPLYING]

Feeder for the supply of powder materials to spraying setups

23 p3278 A72-43293

FEEDING DEVICES

U ANTENNA FEEDS

FEEL

U SENSORY FEEDBACK

FELDSPARS

Excess Xe 131 in lunar Ba feldspar rocks, discussing results of reactor irradiation experiments with fast and epithermal neutrons

03 p0414 A72-12901

Fossil track densities and thermoluminescence measurements of Luna 16 feldspar crystal samples compared to Apollo 12 samples

09 p1381 A72-22270

Lunik 16 samples trace element concentration, suggesting feldspar excess and local regolith derivation

09 p1381 A72-22272

Eu and Sr distribution between coexisting feldspars in acidic rocks, using mass spectroscopic isotope dilution method

10 p1472 A72-24166

Crystallization experiments on Apollo 11 magmas of K and Rb-rich basalt, discussing plagioclase characteristics

11 p1723 A72-26523

Brief review of thermoluminescence studies in lunar samples.

20 p2970 A72-39402

Phase transformations and exsolution in lunar and terrestrial calcic plagioclases.

20 p2970 A72-39480

A re-examination of relationships among pyroxene-plagioclase achondrites.

20 p2900 A72-39840

Minerals discovered in meteorites, tabulating formula and occurrence and plagioclase composition

23 p3262 A72-44132

Quartz and feldspar glasses produced by natural and experimental shock.

23 p3285 A72-44136

FELSITE

U IGNEOUS ROCKS

FEMUR

Stress distribution analysis of femoral neck, using three dimensional photoelastic model

03 p0318 A72-12952

Local and cardiac complications of selective percutaneous transfemoral coronary arteriography, noting hemorrhages thromboses, embolisms, myocardial infarction, bradyarrhythmia and ventricular fibrillation

09 p1267 A72-23325

FENCES [BARRIERS]

Scale model tests of high thrust engine blast deflection fence combinations for protection of adjacent roadway traffic

16 p2374 A72-33698

FERMENTATION

Carbohydrate metabolism, glycolytic ferment activities and leukocyte size under ionizing radiation, showing compensatory bone marrow cell formation with leukopenia

04 p0467 A72-14609

FERMI STATISTICS

U QUANTUM STATISTICS

FERMI SURFACES

Noninteracting Fermi gas in finite square-well potential, obtaining quantum mechanical solution of Schroedinger equation

02 p0262 A72-11671

Quantum oscillations of minority Fermi surface carriers as function of magnetic field in Hall effect and thermoelectric power in pressure-annealed pyrolytic graphite

02 p0268 A72-11673

Positive and negative deviations of linear electrical resistance of d-transition metals at high temperatures as function of Debye temperature and Fermi level

02 p0242 A72-12006

Local level filling and Fermi distribution in metal semiconductor contact as function of voltage and level location

09 p1372 A72-23355

Fermi level and scattering phase function nomograms for semiconductors with parabolic and isotropic energy bands, noting charge transfer effects

11 p1700 A72-25781

Rare earth metals and alloys technology assessment and utilization covering quantum mechanics concepts application to Fermi surface

15 p2289 A72-31184

Transition metals thermal conductivity periodic variations relation to free Fermi surfaces and valence electrons localization variations

21 p3070 A72-41646

FERMI-DIRAC STATISTICS

U QUANTUM STATISTICS

FERMIONS

NT BARYONS

NT FAST NEUTRONS

NT LEPTONS

NT NEUTRONS

NT PROTONS

NT RECOIL PROTONS
NT SOLAR PROTONS
NT THERMAL NEUTRONS
Correlation energy calculation for system of fermions by means of variational method
05 p0702 A72-16785
Neutron star properties, formation theories, crust composition and internal structure, examining interior neutron behavior, fermion systems superfluidity, magnetic field effects and stellar dynamics
10 p1533 A72-23890

FERRIC IONS
Ferric ion traces evidenced in lunar and meteoritic titanates by charge transfer bands observations during heating, interpreting origin as caused by cosmic radiation
14 p2154 A72-30515

FERRITES
High chromium ferritic stainless steels weldability and mechanical properties, showing C, N, Ti and residuals effects on recrystallization, toughness, tensile behavior and corrosion resistance
01 p0083 A72-10283
Nonreciprocal microwave ferrite device design, out-lining loss-free, cyclic symmetrical, multiport junction circulator theory
01 p0041 A72-10695
Ferrite microwave devices design, covering non-reciprocal circuit and electrical tuner
01 p0041 A72-10696
Ferrite-loaded waveguide Y-junction field mode identification by eigenvalue phase-frequency characteristics measurement, applying to millimeter wave circulator synthesis
01 p0041 A72-10697
Hot-rolled low-carbon Mn-Mo-Nb acicular ferrite steels with high strength, toughness and impact resistance
02 p0246 A72-12559
Ferrite rod antennas calibration for radio frequency measurements up to 1 MHz
02 p0195 A72-12606
Ferrite core memory for space flight devices, comparing 1 bit storage capacity power consumption with MOS cell
02 p0196 A72-12734
Garnet crystal structure type microwave ferrites with V and In ions, investigating ferromagnetic resonance linewidth reduction effect
03 p0400 A72-12971
Self consistent junction circulator theory, considering lossless ferrite loaded symmetric n-port junction and numerical design procedures
03 p0330 A72-13232
Low birefringent orthoferrites for optical devices, considering improvement in Faraday rotation detection of magnetic domains in single crystal platelets
03 p0360 A72-13760
Computerized design algorithm for ferrite core memory system, considering cross-temperature effect under worst driving conditions
03 p0327 A72-13766
Functional speed measurements of propagating devices based on cylindrical domains in orthoferrites and garnets, noting storage capability
03 p0333 A72-13783
Sigma phase formation in chromous ferrite, investigating vacuum diffusion, hot and cold working, welding and additives effects
03 p0375 A72-13940
Ferritic steel nil-ductility transition temperature data analysis correlating irradiation results with activation fluences and temperature
04 p0547 A72-14430
Low cost ferrite remanence microwave phase shifter design using periodic loading structures
04 p0497 A72-14716
Bandwidth widening of waveguide H-plane Y-circulator with cylindrical ferrite post coated by dielectric sleeve
04 p0499 A72-15244
Mathematical model for reciprocal and nonreciprocal magneto-optical effects in magnetized ferrite-filled microstrip transmission lines
04 p0502 A72-15434
Fe-Cr-Al and Fe-Cr-Si type ferritic steels, investigating additives effects on ductile-brittle transition temperature
05 p0672 A72-16012
Solidification, microsegregation and homogenization of austenitic stainless steels containing delta ferrite
05 p0672 A72-16142
Hardening of Fe-Mn-Ti ferritic and martensitic alloys, investigating microstructure and mechanical properties
05 p0672 A72-16144
Electromagnetic wave propagation in rectangular waveguide with periodic ferrite structure, presenting computer graphics for stop bandwidth vs magnetic field strength
05 p0627 A72-16342
Ferritic stainless steel roping /buckling/ morphology and texture explanation by anisotropic plastic flow
05 p0677 A72-17105

Dissipative magnetic parameters measurement in ferrite and insertion loss measurement in waveguide Y-circulators below microwave resonance
06 p0786 A72-18367
Longitudinally magnetized fully filled square waveguide reciprocal ferrite phase shifter, predicting frequency characteristics by rotational error analysis
06 p0786 A72-18370
Rectangular and orthogonal circular waveguides hybrid junction with magnetized ferrite resonators along axes, discussing design and applications
07 p0952 A72-18844
Welding thermal energy effect on residual ferrite of austenitic chrome-nickel steel deposits
07 p1010 A72-18971
Ultrasensitive measurement technique for low microwave susceptibility on ferrite samples featuring feedback scheme for signal klystron locking
07 p0955 A72-19320
High Cr ferritic steels intergranular and stress corrosion properties and resistance to sea water, organic and inorganic acids and acid mixtures
07 p0995 A72-19572
Austenite-martensitic steel with 25 percent delta ferrite, examining microstructural changes due to aging at 550 C by thin slide electron microscopy
07 p1021 A72-20484
Magnetic spectra measurement of powdered hexagonal ferrites in millimeter wavelength range during grinding and after heat treatment
08 p2128 A72-21875
Ferrites electrical conductivity variations with time caused by cations distribution modification after cooling
10 p1525 A72-24121
X band high power ferrite phase shifter design and performance
10 p1451 A72-24595
Transitional ferrite phase formation in Fe-Cr-Ni alloy evidenced on electron micrographs and diffraction patterns
11 p1657 A72-25760
Ferrite core memory for storage of Helios probe perisolar space data before transmission to telemetry system
11 p1601 A72-25806
Optimal flexible ferrite keeper for ferromagnetic thin film memories performance improvement, noting requirements for high permeability, low loss factor and dielectric constant, etc
11 p1601 A72-25899
Ferritic stainless weld metal ductility, investigating yield and fracture stresses after heat treatment
11 p1661 A72-26494
Austenite formation kinetics in Fe-C ferritic-pearlitic structure at 855 C, comparing experimental data with theoretical calculations
11 p1662 A72-26744
Decoupled formulation of vector wave equation in orthogonal curvilinear coordinates, applying to ferrite-filled and curved waveguide of general cross section
11 p1607 A72-26995
Ferrite loaded X band waveguide Y junctions eigenvalue frequency dependence measurement to identify modal resonance and arrange displacement for circulator operation
12 p1790 A72-27508
Ferrite microwave limiter-filters and circulators using resonant rotation of polarization plane
13 p1927 A72-28409
X ray and Mossbauer spectral analyses of thermomagnetically treated nickel ferrite samples containing Co, investigating ordering mechanism
13 p2020 A72-28490
Mossbauer and X ray structural analysis of nickel ferrite-chromite magnetic moments, comparing with theoretical data
14 p2141 A72-30171
Ferrite powder relative density as function of temperature, sintering time and pressure during hot pressing, noting creep activation energy and vacancy motion
14 p2107 A72-30775
Ferrite materials for microwave applications, discussing frequency and temperature limit extension, power level increase and loss reduction
14 p2088 A72-30833
Ferrite and dielectric element waveguide phase shifters with rectangular hysteresis loop, deriving differential phase and attenuation constants for wave propagation
15 p2202 A72-32662
Bilateral tunnel-diode amplifiers using ferrite transformers.
18 p2665 A72-36306
Slotted-line measurement of insertion loss in three-port ferrite junction circulator.
19 p2775 A72-38636
Faraday rotation dual-mode ferrite reciprocal phaser with performance and cost advantages over toroidal type for microwave phased array applications
20 p2909 A72-39733
Spectral analysis of microwave pulses by a ferrite transducer
22 p3158 A72-42119

Recent advances in diode and ferrite phaser technology for phased-array radars. I.
23 p3270 A72-43572
A solid-state 'flux-drive' control circuit for latching-ferrite-phaser applications.
23 p3275 A72-43574
Ferrite component for waveguide commutator used as microwave switching element and modulator, noting application in navigation instruments and avionics
23 p3270 A72-43768

FERRITIC STAINLESS STEELS
Stress corrosion cracking of 18% Cr ferritic stainless steels.
19 p2820 A72-38300
Correlation of irradiation data using activation fluences and irradiation temperature.
21 p3083 A72-40763
Decarburization kinetics of low alloy ferritic steels in sodium.
22 p3194 A72-43042
Differentiating stress corrosion cracking from hydrogen cracking of ferritic 18-8 stainless steels.
22 p3195 A72-43127

FERROCENES
Polymerization characteristics of 4-ferrocenyl-1, 3-pentadiene monomer, discussing synthesis on molar scale
17 p2512 A72-35934

FERROELECTRICITY
Electrical control of fixation and erasure of holographic patterns in ferroelectric materials
07 p0981 A72-18880
Strain biased transparent ferroelectric electro-optic ceramics for coherent transducers /page composers/ for holographic memories and optical data processing [CLEA PAPER 18,6]
07 p0950 A72-19401
Ferroelectrics with strong hydrogen bonds, deriving self consistent optical phonon frequency and coupled proton-phonon vibration spectrum
09 p1366 A72-22221
Stimulated emission and spectroscopic properties of activated ferroelectric crystal laser, noting Stark effect
09 p1323 A72-22981
Recording holographic networks in polycrystalline transparent ferroelectric ceramics of lead and lanthanum titanate-zirconate system
10 p1480 A72-24111
Sintered prepolarized perovskite type ferroelectric ceramics adiabatic depolarization and energy conversion under shock wave action
10 p1422 A72-24128
Polarization characteristics of ferroelectric barium strontium titanates in solid solution at 4-100 K
10 p1527 A72-24984
Photovoltaic effects in CdS films evaporated onto barium titanate single crystal and ceramic ferroelectric substrates
12 p1856 A72-28014
Ferroresonant circuit with inductor, resistor, nonlinear ferrocapacitor and voltage source, deriving oscillation stability condition
14 p2090 A72-31119
Ferroelectric nature of superficial layer on barium titanate crystals from scanning electron microscope and optical observations
15 p2291 A72-31681
Optically induced variation of birefringence in ferroelectric materials.
20 p2959 A72-39045
Raman scattering techniques applied to problems in solid state physics.
21 p3096 A72-40602
Stress induced birefringence in an isolated and a shortcircuited KH₂PO₄ crystal.
23 p3324 A72-44322

FERROMAGNETIC FILMS
Data holder made of three thin ferromagnetic coupled films for magneto-optic computer memory
01 p0035 A72-11317
Superferromagnetism in thin polycrystalline Gd and Gd-Au films having Curie points near room temperature
03 p0401 A72-13583
Magnetostatic interactions of cylindrical magnetic domain propagation circuits in ferromagnetic overlay without in-plane fields
03 p0331 A72-13752
Ferroelectric thin film magnetometers operation and performance characteristics for magnetic field measurement
09 p1308 A72-22467

FERROMAGNETIC MATERIALS
NT FERROMAGNETIC FILMS
NT MAGNETITE
NT PERMALLOYS [TRADEMARK]
Gravitational convection by magnetocaloric effect in incompressible nonconducting ferromagnetic fluid
03 p0457 A72-13993
Wind tunnel six component magnetic balance system, describing ferromagnetic body forces and moments relationship to applied magnet fields and gradients
05 p0645 A72-16829
[AIAA PAPER 72-164]

Quantum coherent spin wave interactions in ferromagnetics, showing retained electric field
07 p1007 A72-20125

Transition metal superconductors transition temperatures survey, considering d-band solid solution alloys and intermetallics and ferromagnetic element compounds
09 p1367 A72-22552

Dislocation structure analysis in ferromagnetic materials by magnetic techniques, discussing methods based on magnetization curve static properties and magnetic relaxation phenomena
10 p1487 A72-24574

Magnetovariometers design, operation and applications, discussing ferromagnetic materials properties effect on performance characteristics
12 p1792 A72-27739

Modulation oscillations in ferromagnetic core-based LF signal generators and frequency doublers, deriving differential equations for converter operation and formulas for static characteristics
13 p1930 A72-29049

Normal mode formulation of spin wave-helicon wave interactions in ferromagnetic semiconductors.
18 p2718 A72-36452

Special features of the operation of ferroprobes with low-permeability core moulds at small excitation fields.
19 p2804 A72-38760

Electron-electron collision induced anomalous Hall effect in ferromagnetic d metals at low temperatures
20 p2959 A72-39309

Ferromagnetic tau phase structure of Mn-Ac alloy with powder anisotropy related to platelet formation and twinning orientation
21 p3068 A72-40965

Spontaneous magnetization of Ni foils in high pressure H gas, noting Hall voltage measurement in ferromagnetic foils and thin plates
23 p3324 A72-44140

Approaches to verification and solution of magnetic particle inspection problems.
24 p3407 A72-44903

FERROMAGNETIC RESONANCE

Garnet crystal structure type microwave ferrites with V and In ions, investigating ferromagnetic resonance linewidth reduction effect
03 p0400 A72-12971

Variable flux reset ferroresonator voltage regulator with adjustable terminal characteristics using magnetic and thyristor circuits
03 p0311 A72-13770

Double shunt feedback controlled ferroresonant voltage regulator using magnetic component with simulated core saturation
03 p0311 A72-13772

Mathematical model for mechanical and electrical hysteresis, noting application to nonlinear ferromagnetic resonant circuit with saturable inductor
14 p2132 A72-31105

Oscillations in ferromagnetic resonant circuit of parametric amplifier with constant capacitance and periodically variable inductance modulated by input signal
14 p2089 A72-31107

Variable saturation of series LC circuit, discussing current response, ferroresonant jump, symmetry and subharmonic oscillations
14 p2090 A72-31116

Ferromagnetic and paramagnetic resonance spectra of lunar material - Apollo 12.
18 p2724 A72-36276

FERROMAGNETISM

Flow characteristics, wave propagation and thermal stability of ferrofluids within uniform magnetic field
01 p0050 A72-10235

Heisenberg ferromagnet thermodynamic properties in external magnetic field near Curie temperature, studying magnetization, susceptibility, entropy and magnetocaloric effect
08 p1217 A72-21520

Synthetic diamond single crystals, investigating impurities and inclusions effects on ferromagnetic properties and heat resistance
12 p1833 A72-27768

Landau orbital ferromagnetism appearance likelihood in white dwarf stars, noting temperature requirements of noninteracting electron gas
19 p2859 A72-37891

Self-excited parametric oscillations at the second harmonic in a parametric system with a triple-post ferromagnetic core
19 p2774 A72-38586

Direct fitting of spin wave energies to interatomic exchange parameters in the ferromagnetic rare earth metals.
21 p3097 A72-40625

Slow electromagnetic waves in antiferromagnetics near the point of transition to the ferromagnetic phase
21 p3098 A72-41685

FERROUS METALS

Plate microcracking of ferrous martensites containing Mn, Cr and Ni, discussing austenite grain size variations
05 p0678 A72-17119

Contact interaction between high-melting compounds and liquid metals. I - Interaction between subgroup IVA metals and metals of the iron family
23 p3299 A72-43287

FET (TRANSISTORS)

U FIELD EFFECT TRANSISTORS

FETUSES

Tentorium cerebelli microstructure and leaflets strength in study of chronic and acute hypoxia injury to fetus during pregnancy and labor
09 p1266 A72-23193

Irreversibility mechanism in postpartum ductus arteriosus closure in guinea pigs, studying vessel cellular changes and smooth muscle response to oxygen pressure
12 p1762 A72-27826

Intravascular injection and histology studies of human embryonic and fetal choroidal vasculature development
19 p2755 A72-37398

FIBER OPTICS

Southern radio sources optical identification by photography using fiber optics image tube
02 p0285 A72-12795

Kitt Peak 40 channel magnetograph using fiber optic probe for spectral and spatial resolution in weak photospheric field detection
03 p0356 A72-13282

Mie scattering by spherical particles in low loss glasses for fiber optic waveguides, discussing angular dependence
03 p0359 A72-13445

Optical communication technique based on fiber optic light pipes and time, space or wavelength division multiplexing
03 p0325 A72-14050

High resolution electrons image intensifier for particle spectrographs, using channel plate, scintillator and fiber optics
04 p0524 A72-15536

Emitting-absorbing flames diagnostics, measuring spectrally resolved radiant energy with fiber optic probe data
05 p0661 A72-15915

Fiber optics system for H beta line shape measurement in transient high temperature plasma, using narrow slits at spectrograph exit plane
05 p0663 A72-16816

Optical data transmission system with dielectric single-mode glass fiber waveguide, PCM semiconductor laser diode transmitter and avalanche photodiode receiver
06 p0774 A72-17770

Wave propagation in single mode clad glass fiber light waveguide, discussing fiber core minimum diameter and various loss mechanisms
06 p0825 A72-17773

Optical image transfer functions characteristics and modulation in isolated retinas and retinal receptors, noting similarity to optical fiber bundles
07 p0916 A72-19027

Picosecond pulse distortion under multimode conditions in optical fiber communication systems
07 p0940 A72-19231

Linear and circular birefringence of low loss single mode glass fiber dielectric optical waveguide as function of length
07 p0940 A72-19232

German monograph on sky scanner for short term sky spectral density distribution using glass fiber bundles for spectral components simultaneous measurement
07 p0983 A72-19266

Remote ignition with noncoherent light from pyrotechnic, electric and explosive sources through fiber optics
08 p1219 A72-20757

Laser pulse propagation measurements on multimode glass fibers to evaluate communication potential
09 p1323 A72-22868

Material dispersion contribution to signal envelope delay distortion in weakly guiding dielectric optical fiber waveguides
09 p1314 A72-23340

Power transfer in optical fiber with nonuniform refractivity in mode propagation direction, using coupled mode theory
12 p1779 A72-27164

Light power coupling efficiency from GaAs injection laser into single- and multimode fibers
12 p1820 A72-27507

Surface wave propagation mechanism on dielectric bodies noting compatibility with physical properties involved with optical cables for commercial transmission systems
12 p1782 A72-27556

Multimode millimeter waveguides and optical fibers, deriving signal transmission distortion from transfer function and corresponding impulse response statistics
15 p2193 A72-31351

Multimode optical fiber waveguide theoretical model to predict pulse propagation dispersion for comparison with measurements
15 p2194 A72-31546

Multimode fiber optics data transmission through high electrical noise environments for send-receive communication links
15 p2198 A72-32059

Night photography at 10,000 feet.
17 p2557 A72-35556

German monograph - Wave propagation in glass-fiber light waveguides
18 p2697 A72-36249

Free vibration mode shapes mapping of spherical and paraboloidal plastic shells under acoustic excitation via noncontact fiber optics instrumentation
18 p2690 A72-36372

Series solution for electromagnetic wave propagation in radially and axially nonuniform media - Geometrical-optics approximation.
18 p2712 A72-37024

Monocular and biocular magnifiers for night vision equipment.
20 p2921 A72-39030

Solid state laser sources, light modulators and silicon avalanche photodiode detectors for fiber optical communication, discussing performance and limitations from system design viewpoint
21 p3018 A72-40866

Hybrid digital transmission systems based on optical fiber waveguides and analog repeaters, noting YAG laser light modulation by phase shift keyed sub-carrier
21 p3018 A72-40868

Ground, satellite, terrestrial glass fiber channel and waveguide radiation systems for laser communications
21 p3023 A72-41398

Image intensifier systems and their applications to astronomy.
22 p3181 A72-42989

Fiber optics development and physical foundations, discussing reflection, optical waveguides, vibrational modes during light transmission and fabrication from inhomogeneous glass and mixed monomers
24 p3425 A72-44782

Transmission losses in glass and plastic single mode and liquid core optical fibers for long distance data links and image transmission
24 p3380 A72-45252

FIBER STRENGTH

Test equipment for glass and polymer fibers strength and lifetime in vacuum and inert bases under static loads
01 p0093 A72-11382

Surface damage effect on strength of c-axis sapphire filaments, assessing impact on sapphire reinforced metal technology
02 p0249 A72-11992

Potential energy principle in equilibrium stability problems for flexible extendable thread, using Liapunov method
03 p0390 A72-14208

Fiber flexural stiffness determination from bending moment and deflection relation, using bend test
03 p0365 A72-14300

Fiber pull-out from elastic matrix, calculating shear stress and load distribution dependence on elastic properties and fiber length
06 p0897 A72-18152

Alumoborosilicate glass fibers vacuum tensile strength tests, noting fiber strength increase with vacuum and exposure time
07 p1023 A72-19778

Mechanical strength and microstructural characterization of sapphire ribbons and continuous filaments for composite materials
07 p1023 A72-19929

Heat stretching-induced changes effect on strength, sorption and structural properties of polyformaldehyde fibers, noting structural orientation enhancement and porosity growth
08 p1194 A72-21757

Test procedures and apparatus for short and long term creep of polymer monofilaments under radial compression
08 p1194 A72-21758

Repeated stretching effect on triaxial fibers thermal destruction in vacuum after hot air or steam thermosetting
08 p1194 A72-21759

Morphology and physicochemical properties of carbonized polyacrylonitrile fibers by scanning electron microscopy, discussing macro and microdefects effects on strength characteristics
08 p1195 A72-21762

Fiber thermoplastics matrix breakdown and mechanical properties enhancement, examining lateral and longitudinal strain during uniaxial tensile creep and recovery
09 p1337 A72-22541

Aligned fibrous composites microstructural parameters, showing fiber thickness effect on fracture, fabrication, matrix cracking, creep resistance and fatigue
09 p1338 A72-23163

Stress concentration in elastic composite reinforced by two dimensional continuous parallel fiber array with one broken fiber
09 p1339 A72-23172

Torsion of embedded infinite elastic circular cylindrical fiber with penny shaped crack, investigating breaking behavior from Fredholm integral equation iterative solution
10 p1553 A72-24094

Molded carbon technique-produced carbon fiber/carbon composites, discussing flexural strength, toughness, crack resistance and rocket nozzle application
10 p1500 A72-24200

Fiber toughening mechanisms in continuous filament unidirectionally reinforced composites with elastoplastic matrices, discussing tensile energy storage in debonded region
11 p1671 A72-25463

Boron fibers tensile and transverse strengths, relating severe anisotropy to residual stress pattern from preexistent flaws
11 p1672 A72-25484

Layered anisotropic fiber composite (Tetra-Core) for sandwich construction and aircraft applications, discussing design, fabrication and strength characteristics [SAE PAPER 720343]
11 p1638 A72-25599

High temperature metal fiber reinforced ceramic matrix composites for turbine vanes, showing strength toughness and crack depths dependence on interfacial bond [ASME PAPER 72-GT-51]
11 p1704 A72-25643

Graphite fiber with high tensile strength and modulus and good elongation at low cost for aerospace applications
12 p1834 A72-28084

Chemical vapor deposition of boron on carbon monofilament substrate to eliminate fracture and boron damage and achieve good strength
12 p1834 A72-28085

Flexural strength of Pyco-bond polyacrylonitrile/PAN/ precursor carbon fiber substrates for carbon-carbon composite fabrication
12 p1835 A72-28092

Chemical interaction effects on single crystal sapphire filament strength in Ni and Ni alloy matrices during heat treatment in inert atmosphere
13 p1974 A72-28661

Brittle continuous and crazed anodic oxide coatings effect on Al filament stiffness, comparing with Dow analysis
13 p1974 A72-28663

High porosity nichrome fiber materials sintering at 1000-1350 C, considering size, electric conductivity, shear strength, interfibrillar contact and briquet quality
13 p1967 A72-30105

Steady state creep measurements of lead-phosphor bronze discontinuous fiber composites under nonuniform deformation, comparing to fiber and matrix alone
15 p2261 A72-32299

Steady state creep theory for discontinuous fiber composites, considering rigid and creeping fibers and sliding interface
15 p2261 A72-32300

Griffith equation applicability to graphite fiber fracture strength by measurement of work to break and critical flaw
16 p2413 A72-32871

Failure mechanism for carbon fibers in epoxy novolac matrices under tensile loads
17 p2633 A72-35286

Fracture of boron filaments in an aluminum matrix
17 p2571 A72-35655

High strength-high modulus boron vapor deposited on a carbon monofilament substrate
17 p2572 A72-35657

Sapphire filament mechanical property considerations of importance to Al₂O₃ reinforced metals
17 p2572 A72-35658

High performance graphite ribbon - An advanced reinforcement material
17 p2572 A72-35659

Carbon fiber structure at graphitization temperatures to 3100 C in terms of surface energy and internal stress accounting for low shear strength
17 p2572 A72-35660

Contractile and muscle-like fibers and autopolusation systems for polymer engine and spring action studies
19 p2760 A72-38200

Strength properties of highly porous materials made of metallic fibers
19 p2820 A72-38288

Fracture behavior of stainless steel fibers in Sn-Pb alloy matrix
19 p2820 A72-38373

Influence of technological factors upon the mechanical reliability of composite-material structures
20 p2943 A72-38945

High modulus fiber composites development from viewpoint of reinforcement patterns and material properties
20 p2943 A72-38946

Strength factors of fiber reinforced composites under tension, compression, shear, bending and plane stress
20 p2944 A72-38947

Longitudinal tensile failure of unidirectional fibrous composites.
20 p2944 A72-39789

An interpretation of radiation effects on mechanical properties of carbon fibres based on a 'sheath' and 'core' model of fibre structure.
20 p2944 A72-39794

Probabilistic model for tensile strength of brittle fibers, discussing clamping effects at various gage lengths and Weibull flaw structure
23 p3305 A72-43490

Mechanics of failure of fibrous composites.
23 p3345 A72-43508

Book - A review of the science of fibre reinforced plastics.
24 p3417 A72-44674

The fracture toughness of fibre composites.
24 p3417 A72-44899

Fiber and filament reinforcement of plastic and brittle matrix materials
24 p3414 A72-45276

FIBER GLASS

U GLASS FIBERS

FIBERS

- NT CARBON FIBERS
- NT GLASS FIBERS
- NT HAIR
- NT MICROFIBERS
- NT NYLON [TRADEMARK]
- NT REINFORCING FIBERS
- NT SYNTHETIC FIBERS

Thermally stable organic polymer fiber production methods and performance evaluation in high temperature environments, discussing structure types, flammability and tensile properties
02 p0248 A72-11771

Flame resistance requirements of high temperature resistant and highly chlorinated fibers [PI PAPER 11]
03 p0380 A72-13245

Fibrous structure of precipitates produced at bottom of trace due to friction in work hardened Al-Cu alloy solid solution
03 p0376 A72-13970

Trimethylchlorosilane film boiling for silicon carbide deposit on vertical heated tungsten filaments, investigating mass transport rate
04 p0595 A72-14600

Elastic deformations of porous Cu, Mo and W fiber materials after pressing and sintering due to residual stress relaxation
14 p2106 A72-30151

Wave propagation in a viscoelastic fiber subjected to transverse impact.
17 p2570 A72-34791

Physicomechanical properties of fiber carbides
23 p3299 A72-43291

Scattering of obliquely incident waves by inhomogeneous fibers.
24 p3379 A72-44710

FIBERS [MATHEMATICS]

Invariance problems in terms of Lagrangian domain of definition and Euler-Lagrange mapping intrinsic geometric characterization, reviewing theory of fiber bundles
20 p2954 A72-40006

Equivariant integrality theorems for differentiable manifolds.
22 p3199 A72-42310

Trajectory bundles in metric space for objects motion study in dynamic pursuit games, noting Pontryagin and Pshenichnii methods for differential games solution
23 p3308 A72-43415

FIBRILLATION

Electrode system for ventricular defibrillation, noting current density role and rounded edge effectiveness
11 p1588 A72-26628

FIBRIN

Dietary lipid effect on platelet adhesion and aggregation, blood coagulation and fibrinolysis and relation to atherosclerosis and thrombosis
08 p1117 A72-21543

Hypocapnic hypoxia effects on blood coagulation and fibrinolysis
19 p2756 A72-37880

FIBROBLASTS

NT COLLAGENS

FIBROSIS

Lungs fibrosis and cancer caused by asbestos fibers inhalation, noting environment control for protection against workers health hazards
11 p1583 A72-25548

FIBROUS MATERIALS

U FIBERS

FIELD EFFECT TRANSISTORS

Low driving power resistive gate MOSFET microwave switch with performance approaching P-I-N diode
01 p0038 A72-10658

Lateral photoelectric effect in junction FET under homogeneous illumination, detailing current-voltage characteristics
01 p0114 A72-10859

Dual gate GaAs microwave FET, measuring second gate voltage effects on power gain and noise
02 p0191 A72-11893

X band gallium arsenide field effect transistor, noting applications for radar receivers, microwave communication links and electronic countermeasures
02 p0193 A72-12184

Czech FET properties in low temperature region, measuring static characteristics, electrical parameters and noise levels at 4.2-296 K
02 p0195 A72-12670

Book on field effect electronics covering junction and insulated gate transistors and allied devices, monolithic and film IC and design techniques
03 p0333 A72-13846

Matched Si junction FET under neutron burst and pulsed gamma radiation, investigating device parameters degradation
03 p0335 A72-14093

Charged transfer devices and IGFT bucket brigade structures, discussing design measures and fabrication procedures for increased reliability
03 p0336 A72-14280

Two section model of junction-gate field effect transistor with short channel length
04 p0498 A72-15134

Carrier mobility field dependence effects on validity of gradual channel approximation in insulated-gate field effect transistors, discussing velocity field relationship
04 p0498 A72-15135

N-channel MOS FET, measuring X ray irradiation effects on drain current and transfer characteristics at room temperature
05 p0634 A72-16033

Direct coupled circuits in memory cell prototype with normally-off GaAs MESFET at 4.2 K
05 p0638 A72-17096

FET devices stacking faults induced leakage currents, pinpointing critical processing steps by diagnostic X ray charts
06 p0782 A72-17364

Si MOSFET substrate resistivity effect on surface state noise spectra
06 p0783 A72-17609

Moderate power GaAs FET switching experiment, obtaining rise and fall times
07 p0952 A72-18826

Low noise GaAs Schottky barrier FET for X and Ku bands applications
07 p0955 A72-19257

Normally off Si MESFET for simple dc coupled circuits, computing threshold voltage with two dimensional device model
08 p1141 A72-21426

Junction and MOS FETs noise sources interaction with small signal model parameters and signal source admittance parameters, investigating amplifier If performance
08 p1141 A72-21428

Multichannel junction gate FET /Gridistor/ for microwave power amplifier, discussing design, fabrication and performance
08 p1141 A72-21429

Acoustic wave detection in strain transducer consisting of silicon insulated gate field effect transistor with piezoelectric film incorporated in insulator region
08 p1168 A72-21556

Low level current operation in insulated gate FET, obtaining analytical expression for voltage
08 p1142 A72-21744

Junction FET drain source capacitance theory based on two-region physical model, taking into account carrier drift velocity saturation effect
08 p1142 A72-21745

Background noise in FETs with junction gate, formulating hypothesis of warm carriers for transistor channel
09 p1287 A72-23110

Excess, shot and channel thermal noises performance-limiting effects on junction FETs in high input impedance applications, considering minimization method
09 p1287 A72-23111

Ion implantation doping of MOSFET and IC for wafer production, using automatic vacuum pumpdown and cycle control
10 p1447 A72-23950

Homogeneous computing media, examining microelectronic fabrication, interconnection and control problems for MOSFET, bipolar transistors and IC structures
10 p1448 A72-24277

Multichannel integral commutators with MOSFET as switching elements, calculating transmission errors
10 p1449 A72-24288

MOSFET for input impedance measuring amplifier, discussing input stage temperature drift and protection from overvoltage
10 p1482 A72-24599

German book on HF semiconductor electronics covering planar and field effect transistors, varactors, n-p, p-i-n, avalanche and Schottky barrier diodes, Gunn devices, etc
10 p1452 A72-24699

Bipolar insulated gate FET IC buffer driver, discussing input and output interface capacitance and impedance characteristics and application to transistor-transistor logic

11 p1603 A72-25269

Schottky barrier gate FET design, device packaging and low noise characteristics

12 p1788 A72-27294

Spatial and time dependence of electron velocity in short channel microwave FET, using Monte Carlo method

12 p1790 A72-27434

Semiinsulated gate GaAs FET fabrication by proton bombardment

12 p1790 A72-27438

Noise behavior of GaAs Schottky barrier FET with short gate length, showing channel thickness effect on intervalley scattering noise

12 p1790 A72-27439

Channel formation in insulated gate FET, obtaining equivalent circuit

12 p1791 A72-27548

Integrated metal-nitride-oxide-silicon /MNOS/ semiconductor storage units characteristics, design and operation in FETs

12 p1791 A72-27574

Ge field effect dependence on surface roughness and finishing, noting relief elements dimensions ratio and orientation to current flow direction

12 p1855 A72-27859

Fetron high voltage hybrid junction field effect (J-FET) devices for direct replacement of vacuum tubes in unchanged circuits

13 p1928 A72-28431

Computer model study of FET with submicrometer gates, noting gain-bandwidth product increase with decreasing gate length

15 p2205 A72-31544

Junction field-effect transistor circuits for prescribed output functions.

18 p2665 A72-36307

The effects of electron bombardment on the noise properties of field effect transistors.

18 p2666 A72-36322

FET noise at high temperatures.

18 p2666 A72-36324

Thermal effects in JFET and MOSFET devices at cryogenic temperatures.

18 p2666 A72-36453

Temperature dependence of low-frequency excess noise in junction-gate FET's.

18 p2666 A72-36454

Si MOSFET elementary channel resistances before saturation onset from one dimensional theory, investigating current noise

18 p2668 A72-37037

Low noise high power bipolar and field effect transistors monolithic integration potentials for microwave applications

19 p2771 A72-37261

Design considerations of a 3.1-3.5 GHz GaAs FET feedback amplifier.

19 p2771 A72-37269

Single and dual gate GaAs FET integrated amplifiers in C band.

19 p2771 A72-37270

Self excited LC and RC oscillator networks based on FETs, discussing frequency tuning and FM methods

20 p2906 A72-38899

Measurements of the field-effect and effective mobilities in MOS transistors.

20 p2907 A72-39272

Control of high-field domain in GaAs by the field effect and its application to functional devices.

20 p2960 A72-39706

Differential negative resistance /DNR/ in n-channel MOSFETs of silicon.

20 p2961 A72-39711

Some results of testing M.O.S. transistors at elevated temperatures.

20 p2909 A72-39774

Hybrid monostable delay circuit based on bipolar and low threshold voltage MOSFET transistor

20 p2910 A72-39788

Voltage controlled miniaturized n-type negative resistance circuit based on junction transistor and FET without internal bias

21 p3038 A72-40998

Measurement of substrate impurity profile of MIS field-effect transistors.

21 p3035 A72-41488

Frequency dependent deep level trap admittance and field effect transparency of p-n junctions calculated by truncated space charge approximation

22 p3161 A72-43086

Cross-modulation dynamic range of amplifiers used in the input stages of receiver equipment

23 p3271 A72-43839

The field-effect modified transistor - A high-responsivity photosensor.

23 p3273 A72-44455

Circuit analysis and operation of analog multipliers with MOSFET, applying to industrial automatic control systems and measuring instruments

24 p3384 A72-44896

Shielded silicon gate complementary MOS integrated circuit.

24 p3385 A72-44972

Characteristics of P-channel MOS field effect transistors with ion-implanted channels.

24 p3385 A72-44981

FIELD EMISSION

CdS single crystal field emission spectral characteristics at room and cryogenic temperatures, discussing intrinsic and impurity levels

02 p0269 A72-12888

Two mechanism model for anomalous field ion microscope images in W, noting end form difference in high and low evaporation rates

09 p1370 A72-22803

High electric field effects on I-V characteristics of Te-As-Ge-Si type chalcogenide thin film, noting Poole-Frenkel emission and electron tunneling roles

15 p2291 A72-31641

Optical field emission effects on photoelectron emission nonlinearity from metal cathode using ultrashort mode locked laser pulses

15 p2250 A72-32303

Triode electron gun design for narrow electron beam under highly convergent lens action, using field emission source

19 p2775 A72-38611

Image point formation in field ion microscopy of metal surfaces, using atom probe detection of noble gas apex adsorption

21 p3050 A72-40086

Field emission from carbon fibres - A new electron source.

22 p3208 A72-41966

FIELD INTENSITY METERS

Field mill measurement of atmospheric electric space charge density, discussing effects of snow melting and artificial charge sources

13 p1952 A72-29666

Airplane-borne cylindrical field mill type instrument to record atmospheric electric field

13 p1961 A72-30085

FIELD IONIZATION SOURCES

U BRUSHES

FIELD MODE THEORY

Ion electromagnetic cyclotron modes growth rates in multicomponent magnetospheric plasmas, discussing instabilities enhancement

01 p0062 A72-10906

FIELD STRENGTH

NT ELECTRIC FIELD STRENGTH

NT MAGNETIC FLUX

Electromagnetic wave propagation anomalies over sea, comparing calculated and measured field strengths based on simultaneous refractivity vertical distribution measurement

01 p0026 A72-10405

Nighttime hf radio wave field intensity measurement and absorption observation by narrow band receiver

02 p0184 A72-12874

Hf circularly polarized field strength and plasma density self consistent stationary distribution in weakly inhomogeneous constant magnetic field

04 p0558 A72-15175

Self induced electron beam collapse prevention by external magnetic field, determining required field strength by scaling law based on simple orbit model

06 p0854 A72-17418

Geomagnetic micropulsations on ground and magnetic field fluctuations in tail, noting field strength changes

06 p0804 A72-17455

UHF band satellite TV broadcasting system with FM, calculating required field strength and transmitter power

10 p1435 A72-24033

Parametric instability of magnetoactive plasma relative to nonpotential oscillations excitation, deriving threshold value of HF field strength

13 p2016 A72-29601

VLF and LF electromagnetic waves amplitude and phase velocity in spherical earth-ionosphere waveguide, discussing wave hop method

13 p1923 A72-29661

Solar coronal magnetic field structure and energy content from synoptic data analysis, noting differential rotation effects

13 p2050 A72-29938

Radio waves field strength measurement and recording for D region behavior during partial solar eclipse of 25 February 1971

13 p1961 A72-30050

Single point thunderstorm ranging method based on two radio frequencies field intensity spectral components ratio

14 p2129 A72-30639

Ionospheric electron density changes caused by strong radio waves induced plasma heating

14 p2102 A72-30657

Short period geomagnetic pulsations with gradual amplitude increase and abatement, noting latitudinal variation

14 p2103 A72-30665

Electromagnetic waves penetration through conducting gasket used to protect sensitive devices in aircraft, investigating field strength variation with distance from gasket

15 p2202 A72-32571

Multiphoton ionization of atomic hydrogen in the presence of an intense electromagnetic field.

17 p2586 A72-35827

Anomalous motion of radiating particles in strong fields.

18 p2713 A72-36712

Observational evidence for strength and structure of intergalactic magnetic fields, discussing primordial fields effects on galaxy formations and early universe evolution

18 p2726 A72-36728

Quasi-periodic variation in F 2 layer reflected signal field strength, noting predominance during periods with type 4 bursts, auroras and geomagnetic disturbances

19 p2792 A72-38639

Parametric instability of magnetoactive plasma relative to nonpotential oscillations excitation, deriving threshold value of HF field strength

21 p3091 A72-40655

Detection of whistler mode signals from VLF transmitter in Australia.

21 p3023 A72-41386

A comparison of field-strengths of 164 kHz radio waves transmitted from Tashkent and received at Ahmedabad with flare-time solar X-ray emissions measured in satellites.

23 p3262 A72-43275

FIELD THEORY [ALGEBRA]

NT QUADRATIC EQUATIONS

Linear interpolation for homogeneous isotropic random field observed on denumerable system of spheres, deriving explicit formula analogous to Kotelnikov-Shannon

01 p0094 A72-11266

Compensating fields of homomorphic imaging problems in space symmetry, discussing quasi-tensors, covariant derivatives and Poincare group

23 p3312 A72-43336

FIELD THEORY [PHYSICS]

Stepped reflector image region fields at plane wave incidence angle to reflector axis, determining field components as Fourier series

01 p0035 A72-10115

Aligned fields in MHD shock polar equation, obtaining magnetic induction polar variables

01 p0106 A72-10135

Optimal flight of material point in central field of forces subject to controlled small thrust

01 p0127 A72-10356

Limited scan microwave antenna design, discussing angular coverage, feed motion and focal field distribution

01 p0039 A72-10670

Large aperture antenna feed design, calculating focused and unfocused amplitude and phase field distributions in front of circular aperture

01 p0029 A72-10674

Electric field induced splitting of drift shells composed of trapped particles, taking into account non-dipole field components to lowest order

01 p0062 A72-10905

Soviet book on electromagnetic fields and waves covering propagation in anisotropic media, waveguides and cavity resonators, diffraction interactions, etc

01 p0031 A72-11200

Materials science historical development from ancient theories of structure of matter to modern atomic and field theories leading to general theory of elastic continuum

02 p0297 A72-12611

General theory of relativity, examining differences between singularities in stationary and nonstationary fields from gravitational equations solutions

02 p0261 A72-12675

Transverse fields effects on electron dynamics and energy conversion in O-type linear beam devices of traveling wave amplifiers

03 p0330 A72-13231

Homogeneous isotropic elastic medium free vibration in unbounded space, obtaining relativistic relations in wave field from mathematical model

03 p0389 A72-13425

Dc flow through p-n junction by modified Melehy force field method, discussing space charge variation in depletion layer

03 p0338 A72-13866

Oxygen and oxygen-nitrogen mixtures dc and hf discharges, evaluating traveling low field domains in positive column

03 p0400 A72-14350

Rotationally symmetric force free magnetic field boundary value problem, using linear elliptic differential equation

03 p0400 A72-14352

General relativistic generalized field equations for scalar dependent tetrad, noting identity with Brans-Dicke theory

04 p0549 A72-15021

- Gyroresonance devices efficiency increase, discussing magnetostatic field distribution optimization in interaction space 04 p0502 A72-15575
- Elastic boundary value problems static and geometric field parameters pointwise upper and lower bounds, determining solution coefficients by error energy minimization 05 p0735 A72-16062
- Periodic model of time evolving universe, examining stability of Einstein static solution to field equations 05 p0723 A72-17180
- Variational principles in general relativity, deriving Einstein field equations and equations of motion for charged and uncharged self gravitating fluids 06 p0847 A72-17254
- General theory of relativity for symmetric field, discussing DE Donder incompressible fluid model and Tolman-Schwarzschild metrics 06 p0847 A72-17682
- Unsolved fluid dynamic problems, considering viscous fluids, epihydrodynamics, magnetohydrodynamics, relativistic field dynamics and interstellar gas dynamics 06 p0800 A72-18112
- Field-dynamic equilibrium of macroparticle motion in central field, comparing with Schroedinger equation 06 p0890 A72-18418
- Elementary particle theory and field equations in cosmological spaces, using four dimensional conformal imbeddings 06 p0891 A72-18421
- Neutral rotating mass shell surrounding concentric stationary electrically charged insulation, calculating induced dipole-like magnetic field from coupled linearized general relativity field equations 06 p0853 A72-18423
- Parametric solution of Brans-Dicke cosmological equations for flat Friedmann type expanding universe for time, density, expansion parameter and scalar field 07 p1074 A72-19525
- Field approach to gravitation accounting for energy release and nonthermal radiation occurrence in pulsars and quasars 07 p1075 A72-19576
- Modified Riemann geometry for scalar-tensor theory of gravitation, emphasizing scalar field role relation to vector length change during point-to-point transport 07 p1036 A72-20196
- Wightman field theory generalization for application to gravitational field quantization, describing curved space-time by strongly geodesically complete manifolds 07 p1036 A72-20198
- Atom interactions with rf field, using quantum mechanical interpretation in terms of photons 07 p1038 A72-20433
- Markov type isotropic random Gaussian field analysis in n-dimensional Euclidean space 08 p1198 A72-20999
- Variational principle of Hamiltonian type for classical field theory, noting application to nonlinear heat transfer and fluid flow in Eulerian description 08 p1252 A72-21287
- Stationary motions stability of four rotor vertical gyroscopic system on satellite in circular orbit in Newtonian central force field 08 p1205 A72-21804
- Toroidal gravitational waves in general relativity, considering analog to imploding-exploding cylindrical waves, linear field equations and symmetric metric 08 p1210 A72-21922
- Mass-zero spin-two particle field theory of gravitational interaction with covariance under full conformal group 09 p1355 A72-22684
- Star catalogs comparison and stellar positional differences and motion studies using random field theory 09 p1388 A72-23052
- Einstein field equation representing static fluids in general relativity, obtaining all solutions with degenerate Weyl tensor 10 p1511 A72-24349
- Collective self fields generated from intense electron beams for high energy positive particle acceleration and Astron hot plasma confinement for fusion control 10 p1523 A72-24788
- Field and geodesic line equations for light rays in open and closed isotropic radiative universe model 10 p1549 A72-25059
- Baroclinic wave field distributions and balances in rotating annulus with free surface in atmospheric circulation study, noting Ekman layer features 11 p1680 A72-25765
- Steady state plasma interactions with electromagnetic force field in plasma accelerators, showing shock wave formation [AIAA PAPER 72-413] 11 p1706 A72-26163
- Geomagnetic invariant coordinates and related field line parameters calculation via field model and fast numerical method 12 p1803 A72-27771
- Noncovariant gravitation theory field equations based on preferred reference frame applied to homogeneous isotropic cosmological model, finding conservation law for total energy 12 p1875 A72-28154
- Radiative properties of charged particles moving in attractive Coulomb fields related to repulsive fields by symmetry relationships 12 p1848 A72-28155
- Numerical analysis methods for solution stability of reduced field equations describing perturbed motion of body under nonconservative loads 13 p2001 A72-28485
- Mobility-field characteristics of GaAs below Gunn threshold with magnetoresistance technique, relating to device performance and other material parameters 13 p2021 A72-28573
- Convection instability in viscous incompressible liquid layer with free boundaries under modulated external force field 13 p2064 A72-28723
- Eigenstate field parameter bounds in elastomechanics natural vibration problems 13 p2059 A72-29598
- Microinhomogeneous solid bodies elastic fields and effective moduli calculation method within framework of random field theory, using singular approximation 13 p2062 A72-29884
- Lunar gravitational field expansion coefficients C20 and C22 calculation, using Cassini equator inclination and radial bulk density distribution 14 p2149 A72-30213
- Distortion corrections in geophysically traced gravitational, magnetic and geoelectric field maps, discussing automation 14 p2101 A72-30642
- Kinematic equations derivation for traveling displacements field in Cosserat continuum by Lagrange formalism, noting analogy with Maxwell equations 15 p2274 A72-31474
- Thermodynamic perturbation and scaling theory for multidimensional spherical models of lattice structure in terms of field of critical phenomena 15 p2293 A72-32219
- Angular force models with electron-ion interaction applied to bcc and fcc metals, calculating phonon dispersion curves for V, Nb and Ta 15 p2258 A72-32226
- Mechanical models in thermoelasticity associated with boundary problems of classical physical fields with postulated laws of variation and periodicity 15 p2330 A72-32288
- Wave packet theory application to multimode laser cavity electromagnetic/optical field analysis 15 p2251 A72-32649

FIGHTER AIRCRAFT
NT HARRIER AIRCRAFT
NT JAGUAR AIRCRAFT

- Trainer-combat turbojet or turbofan aircraft characteristics, comparing flight, weight, size, maintenance and development costs 05 p0611 A72-16178
- Combat aircraft lateral aiming performance optimization and evaluation based on criterion of bullet stream response to pilot roll commands 05 p0611 A72-16657

- Fighter pilots training by simulators, determining learning effectiveness by mathematical model based on renewal theory
[AIAA PAPER 72-161] 05 p0644 A72-16827
- Fighter/attack aircraft turbojet and turbofan engines testing with/without afterburners 06 p0868 A72-18495
- Airstart flight testing for single engine fighter/attack aircraft, including flight conditions, windmilling, fuel flows, gas temperature, ignition and acceleration 06 p0868 A72-18496
- VAK 191 B V/STOL reconnaissance fighter prototype test program, describing simulations, bench, ground, static, hovering and flight tests 07 p0912 A72-19249
- V/STOL weapon system VJ-101, describing He-231 design development from tailsitter concept to canard configuration with tilting wing-tip engines 07 p0912 A72-19251
- Interactive computer graphics with three dimensional real time CRT display of air combat maneuvers for fighter pilot training 11 p1613 A72-26291
- Fighter aircraft maneuverability, range and armament requirements, discussing canard vs delta configurations 11 p1577 A72-26657
- German VAK 191B V/STOL fighter aircraft design, development and flight tests, noting redundant control systems 12 p1753 A72-27166
- General Dynamics model 401 air superiority single engine fighter design stressing light weight structure and maneuverability at high speeds and angles of attack 13 p1896 A72-28575
- Large amplitude flight simulator for fighter design refinement, noting extensive computer commitment 13 p1938 A72-28757
- Optimum low noise engine selection for transport and combat aircraft relative to range or payload performance, considering CTOL, VTOL, SST and fighter aircraft 15 p2297 A72-32127
- Multimode flight control for precision weapon delivery. 17 p2493 A72-35561
- Pilot-fighter aircraft system mathematical model relating pilot performance to air to ground weapon delivery accuracy 17 p2493 A72-35564
- Development of the Saab-Scania Viggen. 19 p2748 A72-37749
- The VAK 191 B VTOL fighter and reconnaissance aircraft 19 p2748 A72-37825
- Design for air combat. 19 p2751 A72-38124
- Naval air test center participation in development of air-to-air combat simulation. 19 p2783 A72-38130
- [AIAA PAPER 72-765] 19 p2783 A72-38130
- Optimum turns to a specified track for a supersonic aircraft. 19 p2753 A72-38277
- Advanced fighter controls flight simulator for all-systems compatibility testing. 20 p2911 A72-39090
- [AIAA PAPER 72-837] 20 p2911 A72-39090
- Maneuver load control and relaxed static stability applied to a contemporary fighter aircraft. 20 p2887 A72-39129
- [AIAA PAPER 72-870] 20 p2887 A72-39129
- Development of design criteria for predicting departure characteristics and spin susceptibility of fighter-type aircraft. 22 p3136 A72-42330
- [AIAA PAPER 72-984] 22 p3136 A72-42330
- Development and evaluation of an energy-oriented guidance logic for air combat models. 22 p3137 A72-42354
- [AIAA PAPER 72-949] 22 p3137 A72-42354
- Game theoretical modeling of fighter aircraft turning tactics competition in pursuit combat, using minimax technique 22 p3138 A72-42359
- [AIAA PAPER 72-950] 22 p3138 A72-42359
- Life estimation and prediction of fighter aircraft. 22 p3139 A72-42972
- Control requirements for control configured vehicles. 24 p3368 A72-45349
- Control configured fighter and bomber aircraft based on flight control technology, discussing development programs 24 p3369 A72-45386
- Military aircraft construction, design and economic requirements, discussing fighter payloads, armament efficiency and fire control systems 24 p3369 A72-45450
- FIGURE OF MERIT**
- Optical distortion induced by heated windows in high power laser systems, deriving figures of merit for window materials 02 p0237 A72-11470
- Optimum bounding filter design based on error covariance for Kalman-Bucy and Wiener filters with inexact known parameters, obtaining performance figure of merit 10 p1454 A72-23785
- Bayes analysis application to Weibull distribution parameters estimation, using entropy concept for figure of merit to assess reliability analysis 10 p1444 A72-23987
- Communication satellite systems reliability assessment using figure of merit method 10 p1435 A72-23991
- Thermoelectric cooling devices materials figure of merit upper limits above room temperature, using semiconductor parameters experimental values 12 p1755 A72-27722
- Magneto-optics materials for use in data storage, discussing quality evaluation based on figure of merit reflecting heat sensitivity and readout requirements 15 p2203 A72-32352
- Helicopter design figure of merit weight ratios definition in terms of rotor thrust coefficient, substituting pure airframe structure weight for conventionally used empty weight [SAWE PAPER 916] 23 p3250 A72-43463
- FILAMENT WINDING**
- Yield-fracture criterion for angle ply laminate cylinders wound with filament in biaxial tension 01 p0090 A72-10521
- Fiber reinforced filament wound composites for pressure vessel applications, investigating mechanical properties 01 p0090 A72-10741
- Acoustic emission evaluation of damage of filament wound composite materials under tensile loading applied to spherical test shapes 01 p0069 A72-10804
- Torsional stiffness /shear modulus/ of glass fiber reinforced plastic tubes as function of filament winding angle 01 p0141 A72-10999
- Material design for filament wound graphite-graphite fiber/matrix composite heat shields for improved performance during reentry 08 p1245 A72-21597
- Composite filament wound boron-epoxy rocket motor combustion chamber design, fabrication and hydrostatic tests 08 p1177 A72-21692
- Uniaxial, biaxial and shear loading tests on filament wound carbon-carbon composite tubes and rings 11 p1670 A72-25458
- Heating rate effects on residual stresses in thick walled cylinders produced by winding heated binder impregnated fiberglass tape on cold spool 13 p1982 A72-28553
- Manufacturing process for glass fiber chopped strand mats, discussing physical and electrical properties and applications to filament winding 16 p2414 A72-33303
- Plastic composite container cylindrical wall fabrication by two stage procedure combining radial and cross winding of glass fiber rovings 16 p2398 A72-33305
- Mechanical properties of carbon filament wound carbon matrix composite from tensile tests, noting reinforcement efficiency 17 p2573 A72-35669
- Calculation of residual stresses in wound materials produced by a layer-on-layer solidification process 19 p2872 A72-37532
- Model filament wound epoxy composites. 19 p2808 A72-38164
- Filament winding techniques for rotor blade applications. 19 p2808 A72-38165
- Filament wound cylindrical pressure vessel design and development for operation under cyclic-loaded high hydraulic pressure in underwater environment 19 p2877 A72-38166
- Inflatable mandrels use to manufacture filament wound casings examined in terms of suitable mandrel materials and required mechanical properties 19 p2808 A72-38167
- Mandrel design for the filament winding process. 19 p2808 A72-38168
- Digital programming techniques for maximum utility and flexibility in filament winding. 19 p2808 A72-38170
- Investigations into the impregnating behaviour of various reinforcing materials in the filament winding process. 19 p2808 A72-38171
- Static and dynamic fatigue behavior of glass filament-wound pressure vessels at ambient and cryogenic temperatures. 19 p2823 A72-38832
- Influence of technological factors upon the mechanical reliability of composite-material structures 20 p2943 A72-38945
- High modulus fiber composites development from viewpoint of reinforcement patterns and material properties 20 p2943 A72-38946
- Fatigue behavior of glass filament-wound epoxy composites in water. 21 p3072 A72-40246
- Boron polyimide composite development. 21 p3072 A72-40553
- Filament wound pressure vessel isotensoid theory, considering composite material as macroscopically homogeneous anisotropic continuum 22 p3238 A72-42838
- Stress-strain state in tension of orthogonally stiffened fiberglass-reinforced plastic with cracks in transversely stiffened layers 24 p3460 A72-45754
- FILAMENT WOUND CONSTRUCTION**
- U FILAMENT WINDING**
- FILAMENTS**
- Reduction of governing equation for thin non-stretching vortex filament in incompressible inviscid fluid to nonlinear Schrodinger equation describing helical motion propagation 10 p1466 A72-24293
- Solar activity correlation with filaments disintegration during transit across solar disk, analyzing statistical data 15 p2318 A72-32782
- Finite core infinite extent helical vortex filament stability to small sinusoidal displacements of centerline 21 p3045 A72-40649
- Errors caused by hot-wire filament vibration. 24 p3402 A72-44949
- FILLERS**
- Refractory alloy weldability and brazing, discussing manual and automatic tungsten arc and electron beam processes and fillers 01 p0075 A72-10752
- Three layer plates stability with light fillers, noting filler thickness effect on approximate solutions accuracy 03 p0454 A72-14377
- Polyfluoroethylene-based composite materials mechanical properties, discussing strengthening mechanism of filler additions 05 p0682 A72-15989
- Electron beam welding with filler metal, describing spot and butt welding applications 06 p0819 A72-17498
- Filler metal compositions and procedures for Al alloys vacuum brazing, describing experimental vacuum furnace apparatus 07 p0997 A72-20000
- Filler metal paste application effect on Hastelloy sheet brazing quality, describing results in terms of mechanical properties and microstructural characteristics 11 p1637 A72-25342
- Filler wires development for inert gas welding of stainless maraging steel 11 p1660 A72-26488
- Particulate fillers bulk effects on epoxy resin compositions flexural, compressive and tensile strengths and moduli 12 p1834 A72-28089
- Ethylene-vinyl acetate-asphalt thermoplastic material properties, filler effects, application methods and commercial uses 12 p1835 A72-28094
- Stability of transversely isotropic cylindrical shell with elastic filler under axial compression, deriving approximate equations for transverse shear stress effect 13 p2055 A72-28556
- Filler influence on critical load and buckling zone size in circular elastic three layer ring under uniformly distributed vertical load in rigid cavity 15 p3238 A72-31745
- Fillers effect on polytetrafluoroethylene friction properties, electroconductivity and thermal conductivity, noting friction coefficient reduction by laminar filler structures 16 p2413 A72-33269
- Filler wire composition effects on solidification cracking resistance in weldable Al-Zn-Mg alloy 18 p2699 A72-36426
- Electron microscope investigation of the effect of fillers on the formation of supramolecular structures and on the type of breakdown in amorphous and crystalline polymers 21 p3072 A72-40084
- Numerical analysis of wave processes in a three-layer strip with rigid filler 22 p3232 A72-41872
- Filler quantity and type effects on mechanical energy losses in polymers, discussing molecular interaction and chemical bond influences 23 p3306 A72-43731
- Polyfluoroethylene-based composite materials mechanical properties, discussing strengthening mechanism of filler additions 24 p3417 A72-45731
- FILLETS**
- Disk fillets stressed state, determining concentration coefficient and bearing capacity effect 23 p3347 A72-43747
- FILM BOILING**
- Vapor bubble growth on heated surface with random temperature distribution and liquid microfilm for water and boiling potassium 02 p0303 A72-12862

- Heat transfer during liquid film evaporation in centrifugal vaporizer, noting agreement between theory and experiment 03 p0458 A72-14158
- Trimethylchlorosilane film boiling for silicon carbide deposit on vertical heated tungsten filaments, investigating mass transport rate 04 p0595 A72-14600
- Dry areas occurrence on heating surface in pool boiling near burnout heat flux, discussing nucleate and film boiling stability and hysteresis 07 p1099 A72-19621
- Boundary layer model for laminar transient forced convection film boiling on isothermal flat plate, noting one dimensional conduction, intermediate and steady state regions [AIAA PAPER 72-289] 11 p1741 A72-25227
- Heat transfer during film and transition boiling on vertical surfaces, taking into account time dependence 11 p1746 A72-26537
- Momentum and energy equations for pool film boiling heat transfer from horizontal cylinder to saturated liquids, using integral boundary layer analysis 14 p2173 A72-31067
- German monograph on heat transfer and stability limits for boiling and nonboiling falling films covering surface and bubble boiling conditions 15 p2334 A72-31503
- Investigation of heat exchange during film boiling of underheated liquid under conditions of forced flow in channels 19 p2881 A72-38036
- Unconstrained liquid mass /Leidenfrost phenomenon/ pool and forced convective film boiling at cryogenic temperature 19 p2883 A72-38841
- A review of physical models and heat-transfer correlations for free-convection film boiling. 19 p2883 A72-38842
- The film vaporization combustor and its physical principles. I - The vaporizer section of the combustor. II - The reaction chamber and the combustion [DFVLR-SONDDR-194] 20 p2963 A72-39074
- Film boiling correlations for stable natural convection heat transfer for various heater substances and pressures 20 p2983 A72-39487
- Saturated liquid film boiling on vertical surface, calculating local heat transfer rates as function of height and superheat from turbulent vapor flow model [ASME PAPER 72-HT-38] 20 p2986 A72-39668
- Wall temperature, thermal conductivity and acoustic vibration frequency as function of critical heat flux density for unstable water film boiling conditions 21 p3130 A72-41063
- Diffusive and radiative effects on vaporization times of drops in film boiling. 21 p3130 A72-41185
- FILM CONDENSATION**
- Pitting and film deposits with organic fluid by electrolysis and fluid flow, discussing electrokinetically produced corrosion [ECS PAPER 84] 07 p1010 A72-18802
- Two phase boundary layer flow for laminar two dimensional steady forced film condensation with pressure gradients for fluids of small Prandtl numbers [ASME PAPER 71-HT-Y] 08 p1251 A72-20878
- Perturbation analysis for forced flow past semi-infinite flat plate parallel to uniform mainstream, calculating two dimensional laminar film condensation by boundary layer theory 10 p1469 A72-24563
- Noncondensable gas and forced convection effects on laminar film condensation for two phase flows 11 p1743 A72-25261
- An integral analysis of condensing annular-mist flow. 18 p2682 A72-36720
- Condensation on a downward-facing horizontal rippled surface. [ASME PAPER 72-HT-33] 20 p2983 A72-39485
- Theory of laminar film condensation of flowing vapor. 21 p3128 A72-40950
- FILM COOLING**
- Diffuser for altitude simulation in rocket motor operation, featuring film cooling with water inflow by motor exhaust gas ejector action 05 p0704 A72-16004
- Film and convection cooling interaction and effect on wall cooling efficiency for gas turbine applications [AIAA PAPER 72-8] 05 p0748 A72-16873
- Film cooled turbine vanes external heat transfer distribution in turbulent gas stream, measuring heat transfer coefficients with and without blowing [AIAA PAPER 72-9] 05 p0707 A72-16877
- Air injection from wall slot into turbulent boundary layer of high temperature gas channel flow, calculating film cooling effectiveness in flat plate 08 p1252 A72-21316
- Thin liquid surface water film cooling tests for mass loss under simulated reentry heating and shear conditions 10 p1563 A72-24648
- Double slot laminar film cooling, considering tangential gas injection velocities into laminar boundary layer and heat transfer to wall [AIAA PAPER 72-290] 11 p1741 A72-25228
- Parabolic boundary layer finite difference model for predicting film cooling and heat transfer near flush injection slots in gas turbine combustors [AIAA PAPER 72-291] 11 p1614 A72-25229
- Film cooling effectiveness for air-gas flow section of gas turbine engine under actual operating conditions 12 p1890 A72-28170
- Heat transfer measurement during flat plate cooling by air film, using electrical calorimetric technique 12 p1890 A72-28176
- Boundary layer theory for convective heat transfer of two dimensional film cooling systems in turbulent regime, noting momentum, enthalpy and concentration equations 13 p2063 A72-28630
- Thermal protection by liquid-gas laminar flow near critical point with coolant film liquid oxygen injection incident on blunt body 16 p2343 A72-33156
- A study of film-cooling effectiveness of some gas-turbine stator surfaces. 17 p2597 A72-34468
- Air film cooling in a nonadiabatic wall conical nozzle. 17 p2638 A72-35493
- Supplemental internal gaseous film cooling combined with external cooling of combustion chamber walls, analyzing effectiveness via nonadiabatic model [AICHE PREPRINT 3] 18 p2741 A72-36550
- A review of physical models and heat-transfer correlations for free-convection film boiling. 19 p2883 A72-38842
- Film cooling effect on surface heat transfer in laminarizing mainstream turbulent boundary layer for injection through flush angled two dimensional slots [ASME PAPER 72-HT-11] 20 p2986 A72-39682
- Arbitrary length thin liquid film cooling mass transfer data correlation, accounting for film roughness and entrainment effects 22 p3243 A72-41960
- An experimental study of film cooling through a rearward-facing slot. 23 p3356 A72-43971
- An experimental study of heat transfer downstream of a rearward-facing step with small coolant injection. 23 p3357 A72-44271
- FILM THICKNESS**
- Microwave emission characteristics of oil slicks, showing dependence on oil type, film thickness and sea state [AIAA PAPER 71-1071] 01 p0057 A72-10533
- Nb alloy silicide coating thickness data correlation by thermoelectric, metallographic and pointed micrometer techniques, discussing state of art in thickness control, penalties and substrate independence 01 p0075 A72-10750
- NbN film superconducting properties measured as function of thickness, discussing transition temperature, critical current and magnetic field 04 p0562 A72-15294
- Isothermal elastohydrodynamic theory for full range of pressure-viscosity coefficient, considering film thickness effect 06 p0821 A72-17805
- Hydrodynamic lubricating films with viscosity variations perpendicular to direction of motion, evaluating friction coefficient changes for constant film thickness and load carrying capacity [ASME PAPER 72-LUB-E] 06 p0821 A72-17806
- Thin film resistors and capacitors design, considering stability, power, size, film thickness, parasitic inductance capacitance and resistance and dielectric loss properties 06 p0790 A72-18573
- Resin bonded solid lubricant film thickness optimization from statistical analysis of bench and machine element test data 06 p0823 A72-18591
- Self lubricating polytetrafluoroethylene and polyimide composites transfer film formation tests, studying film thickness and uniformity 06 p0824 A72-18596
- Random vibrations and antitorque moments of rigid shaft with precision bearings, considering effects of geometrical fabrication defects and nonuniform film thickness 06 p0824 A72-18722
- Short time film stability followed by dry spot formation in thin heated draining liquid films on vertical walls, discussing minimum thickness 07 p1098 A72-18842
- Photometric monitoring of film thickness of stacked structures for high strength and laser flux resistance 07 p1049 A72-20126
- Quartz crystal oscillator device for continuous monitoring and controlling thin film thickness in optical and electronic applications, noting temperature effects on crystal oscillating frequency 07 p0990 A72-20284
- Thin films thickness control by piezoelectric quartz crystal, discussing electrically excited oscillations wavelength and damping characteristics 07 p0990 A72-20285
- Thin films thickness and refraction index calculation from curves of specularly reflected X ray intensity vs grazing angle, obtaining surface roughness variance 07 p1050 A72-20405
- Elastohydrodynamic lubrication of soft elastic-deformed contact surfaces, determining lubricant film thickness as function of inlet and outlet parameters 07 p0998 A72-20530
- Ball bearing rolling contact lubricating oil film thickness theoretical prediction compared with experiment 09 p1318 A72-22850
- Capacitance depth gage for thin liquid films thickness measurement, noting application to interface waves amplitude and frequency measurements 09 p1316 A72-23410
- Magnetic domains in cobalt and cementite observed by electron microscopy, investigating thin film thickness effect on temperature 10 p1496 A72-24088
- Velocity slip effect on squeeze film between porous rectangular plates, calculating pressure, load carrying capacity, film thickness and response time 10 p1488 A72-24820
- Metallic foils effects on thermal joint resistance of interface between lathe turned and optically flat surfaces, noting optimal thickness 11 p1685 A72-25223
- Ball bearings lubricated with oils and fire-resistant fluids, testing fatigue life relationship to steel quality, fluid film thickness and viscosity 12 p1816 A72-28108
- Electroslog and vacuum remelted maraging steel rolling contact, investigating fatigue life as function of lubricant film thickness/surface roughness ratio 12 p1816 A72-28109
- Deep groove ball bearing endurance tests to determine running conditions and lubricant film thickness/surface roughness ratio effects on fatigue life 12 p1816 A72-28112
- Contact potential difference effects on lubricant film thickness in electronic equipment joints, noting molecules orientation in electric field 13 p1930 A72-29052
- Equations of motion for incompressible viscous fluid thin layer on cylinder outer side under gravity, calculating wave number, phase velocity and film thickness 14 p2094 A72-30699
- Dynamic in situ thin film thickness monitoring during vacuum deposition by holographic interferometry, noting independence from high quality optical components 15 p2240 A72-32381
- Contribution to the study of creep in thin permalloy films. 17 p2596 A72-35759
- Structure and properties of transition layers formed in the epitaxy process. 18 p2718 A72-36340
- An integral analysis of condensing annular-mist flow. 18 p2682 A72-36720
- Thickness dependence of the electrical transport properties of germanium films. 19 p2844 A72-37685
- Dependence of critical supercurrent on normal layer thickness in S-N-S structures. 19 p2846 A72-38631
- Condensation on a downward-facing horizontal rippled surface. [ASME PAPER 72-HT-33] 20 p2983 A72-39485
- Transparent film thickness, refractivity and birefringence measurements by white light interferometric gage, noting performance insensitivity to chemical composition, film temperature and haze level 21 p3053 A72-40601
- Optimization of the structural parameters of galvanic laminar heat-flux sensors 21 p3056 A72-41058
- Asbestos-textolite coating required thickness calculation with allowance for aerodynamic heating, discussing softening mechanisms 21 p3074 A72-41709
- The direct study of crack formation in metals in a high-voltage electron microscope 24 p3401 A72-44717
- FILMS**
- Automatic device using tetragonal conducting film sheets to feed graphic information into computer 02 p0187 A72-12279
- Automatic device using tetragonal conducting film sheets to feed graphic information into computer 11 p1601 A72-25704
- Hemispherical elastic nonexpandable weightless film fastened along equator to inner wall of closed cylindrical vessel under hydrostatic pressure, determining film axisymmetric equilibrium shapes 13 p1940 A72-28392

Blackness degree calculation for semitransparent film on nontransparent substrate with layer temperature gradients, allowing for polarization emission and multiple reflections 14 p2130 A72-30296

Minimum ion source temperatures for glow discharge ion flux deposition of films and coatings on metallic and nonmetallic substrates 15 p2244 A72-31573

FILTERING

U FILTRATION

FILTERS

Porous stainless steels as filter medium, describing manufacturing techniques, properties and applications 02 p0233 A72-11449

Automatic switched Shuman filter for shock waves numerical computation, noting third and fourth order accurate finite difference schemes 11 p1619 A72-26668

FILTRATION

NT SPATIAL FILTERING

Solute rejection in hyperfiltration of sodium chloride and urea with porous glass ion exchange membrane as function of pressure, temperature and concentration 07 p0937 A72-20601

Nucleic acid hybridization with RNA immobilized on filter paper. 24 p3379 A72-45773

FIN STABILIZERS

U FINIS

U STABILIZERS [FLUID DYNAMICS]

FINANCE

National and international legal aspects relative to levying user fees for flight safety services in Germany 11 p1748 A72-26560

Swiss franc revaluation effect on Warsaw Treaty liability limits, discussing legal problems 11 p1749 A72-26562

FINANCIAL MANAGEMENT

Mathematical model for research payoff estimation by internal rate of return method used by large corporations for project evaluation 02 p0305 A72-12695

Airport financing, discussing funds, long term planning, commercial principles, finance enterprise, loans and revenue 05 p0753 A72-16698

Interflug national economic control system, discussing objectives, costs, labor, science and technology, material and price management plans 05 p0753 A72-16778

Military systems cost reduction via civil avionics procurement techniques, discussing cost-reliability design criteria 15 p2338 A72-32215

Financial methods employed in creating Brazilian aircraft industry via mixed public-private ownership 16 p2481 A72-33375

Economics of a new regional airport. 18 p2743 A72-36779

FINE STRUCTURE

Multichannel hf spectrograph for decimeter wave solar burst spectrum fine structure analysis, noting operation at any desired frequency and channel separation 01 p0065 A72-10416

Shielding and semitransparent sporadic E layer fine structure characteristics from summer observations data analysis 02 p0222 A72-12523

H alpha spectra and combined filtergram observations of chromospheric fine structure, using Becker model 03 p0414 A72-12929

Solar chromosphere fine structure at limb, measuring spicules and bright mottles lifetime 03 p0415 A72-12930

Prominent Zeeman multiplets in photosphere, penumbra, umbra and sunspot spectra, presenting ratios for temperature sensitivity measurements 03 p0415 A72-12933

Gyroresonance plasma wave absorption in corona, investigating solar radio bursts fine structure 03 p0415 A72-12935

Turbulent flow internal intermittency and fine structure distribution as function of Reynolds number, using hot-wire anemometer for velocity field measurements 03 p0340 A72-13156

Sunspot and active region magnetic fields and thermodynamic structure from umbral and penumbral models, discussing magnetic fine structure 03 p0427 A72-13296

Fine structure of magnetic field distribution in umbra and penumbra of sunspots 03 p0428 A72-13299

Magnetic field fine structure in undisturbed photosphere for high latitude solar regions, constructing model to explain magnetograph response 03 p0428 A72-13306

Solar magnetic field measurement with 10,830 A He I line photoelectric spectroheliograms, observing filamentary fine structure in active regions 03 p0429 A72-13310

Solar magnetic field fine structure from filter magnetograms, tabulating magnetic elements frequency distributions 03 p0429 A72-13315

Fine structure features of sunspot magnetic fields and umbral dots, showing magnetic and thermal or mechanical forces interaction 03 p0430 A72-13334

Solar magnetic field origin in fine structure elements of photosphere and sunspots 03 p0431 A72-13340

Solar polar and general magnetic field fine structure and statistical nature, discussing time fluctuations and interplanetary field 03 p0432 A72-13353

Linear polarization of pulsar PSR 22 18 plus 47 radio emission pulses, attributing periodic fine structure of spectrum to rotation of polarization plane in interstellar medium 03 p0436 A72-13824

Fine structure of Mo-Re alloys single crystals in solid solution region as function of Re content 03 p0377 A72-14019

Transverse shock waves fine structure and saturation of ion-acoustic turbulence in collisionless plasma, using magnetic field probe and MHD equations 03 p0399 A72-14068

Statistical investigations of solar burst time dependent fine structure, giving data for multichannel spectrograph and recording system design 05 p0708 A72-15767

Fine H alpha fibrils in middle chromosphere, discussing optical thickness and absorption features 05 p0718 A72-16506

H alpha fine structure, investigating chromospheric magnetic field distribution 05 p0718 A72-16507

Solar chromospheric fine structure at active region, magnetic polarity boundaries from high resolution H-alpha filtergrams 05 p0718 A72-16508

Solid bodies crack development theory, emphasizing crack tip fine and hyperfine structures concepts and time dependent effects 06 p0898 A72-18554

Fine structure elements of chromosphere, discussing spicules, fibrils and thermal effects 07 p1077 A72-19808

Hardening mechanisms during plastic deformation of pure bcc metals, discussing stresses relation to fine structure and crystal dislocation paths 07 p1018 A72-20142

Radio sources fine structure survey at 81.5 MHz, finding angular diameters by interplanetary scintillation technique 07 p1081 A72-20231

Fine structure of Pseudomonas saccharophila at early and late log phase of growth, using electron microscopy and various culture techniques 07 p0922 A72-20238

Solar cosmic rays propagation between shock front and solar flare hot plasma, examining fine structure from Explorer 34 and Venera 6 data 07 p1063 A72-20628

Fine structure of energy distribution function for electron beam interacting with plasma 08 p1215 A72-21722

X ray study of martensite fine structure produced by plastic deformation in Fe-Ni alloy 08 p1188 A72-21788

Solar general magnetic field nature, origin, fine structure and temporal variations, evaluating sunspots and active plage areas as field sources 09 p1387 A72-22752

Ta and W X ray spectra fine structure measurement, providing electron states density in unoccupied regions of energy bands of solids 09 p1370 A72-22842

Defects high temperature diffusion effect on Mossbauer spectral lines width and positions in crystals with quantum transfer between multiplet sublevels in fine structure 09 p1372 A72-23038

Positive ions excitation cross sections calculated for proton impact induced transitions among fine structure states 10 p1543 A72-24619

Fine structure and IR transmission functions of carbon dioxide absorption bands at high pressure and temperature, calculating transition lines strength and position 11 p1620 A72-25275

Near-ground daytime temperature and humidity fine structure relation to heat flux, net radiation and temperature and wind gradients 12 p1841 A72-27711

Slit spectrogram and direct photograph observation of inner corona fine structure during 7 March 1970 solar eclipse, describing line and continuum intensities 13 p2042 A72-29533

Solar magnetic field fine structure from chromospheric morphology, using high resolution H alpha filtergram and magnetogram 13 p2046 A72-29731

Spectroheliograph study of fine structure of Evershed effect, determining radial velocity in penumbra along dark filaments and interfilamentary space 13 p2047 A72-29739

Time varying magnetospheric electric field spatial distribution effect on plasmasphere temporal evolution, considering fine structure due to periodic gusts in convection electric field 13 p1953 A72-29804

Methane spectral band tetrahedral fine structure analysis, using vibration-rotation Hamiltonian 14 p2084 A72-30523

Quiescent solar prominences internal motions from fine structure wavelength shift observations in Ca II K line spectra 15 p2318 A72-32780

Atmospheric transmittance calculation from 0.76-micron oxygen band fine structure parameters 16 p2417 A72-33289

Balloon flight observation of charge composition fine details and gross features of isotopic abundance in near relativistic cosmic rays 16 p2447 A72-33729

Deformed Cu-Au single crystal surface slip bands fine structure, determining separation distance between individual slip lines 16 p2408 A72-33774

Fine structure similarities between solar flares and current sheath in laboratory hot plasma coaxial accelerator, noting X ray and high energy particles production mechanism 16 p2438 A72-33919

Microphotometric chemiluminescence measurement for analysis of turbulent flame fine structure for homogeneous air-fuel mixtures at high Reynolds numbers 16 p2479 A72-34005

Ultrastructure and geologic relations of some two-aeon old Nostocacean algae from northeastern Minnesota. 17 p2544 A72-34336

Solar mottles characteristics as seen on large scale H alpha filtergrams 17 p2616 A72-35700

Periodic intensity oscillations in center of H alpha supergranulation network, in rosette centers and in plage granules 17 p2616 A72-35701

Frequency separation in structure of solar continuum radio bursts. 17 p2602 A72-35713

Fine structure elements of chromosphere, discussing spicules, fibrils and thermal effects 17 p2617 A72-35733

Some measurements of the fine structure of large Reynolds number turbulence. 18 p2678 A72-36020

Satellite measurements of the moon's magnetic field - A preliminary report. 18 p2724 A72-36287

On the reflection of whistler mode waves from model lower ionospheres. 18 p2660 A72-36430

Physical parameters and structure of microwave power transistors, noting scanning electron microscope analysis of fine structure 18 p2671 A72-37144

Complex vortex core fine structure around propeller tip observed via smoke and stroboscopic lighting, presenting photographs 19 p2786 A72-37747

L-S coupling interpretation of high-resolution LMM Auger spectra of Cu and Zn. 19 p2846 A72-38597

Fine structure in quenched Fe-Al-C steels. 20 p2938 A72-39300

Flux densities, positions, and structures for a complete sample of intense radio sources at 1400 MHz. 21 p3105 A72-40575

H II region fine structure from 11 and 3.7 cm observations, deducing physical parameters from continuum spectra 21 p3105 A72-41031

Gravitational wave detector design based on fine components of scattered light spectrum 21 p3086 A72-41696

Frequency correlation measurement of pulsar spectral fine structure due to radio emission scattering by interstellar plasma 21 p3101 A72-41752

Observation procedures in high resolution spectrophotometry of solar chromospheric spectral fine structures 22 p3221 A72-42031

Some aspects of flare properties versus magnetic boundary morphology. 22 p3217 A72-42038

Ionization structure and coarse and fine analyses in planetary nebulae spatial spectroscopic diagnostics based on line profile monochromatic intensity integral equation inversion 23 p3339 A72-44236

Method of measuring the fine structure of detonation fronts in solid explosives. 24 p3463 A72-45039

Solar atmosphere fine structure observation limitations in terms of solar telescope angular resolution 24 p3404 A72-45529

FINENESS RATIO

Aerodynamic characteristics of bodies of revolution with large fineness ratios at Mach numbers ranging from 0.2 to 6.0 22 p3134 A72-42286

Correlation of Magnus force data for slender spinning cylinders. [AIAA PAPER 72-966] 22 p3135 A72-42344

FINES

Dunitite-norite olivine-rich microbreccia in Apollo 14 lunar fines sample 14002.8, discussing origin and chemical composition 01 p0126 A72-10106

Apollo 11 lunar fines behavior and gas evolution characteristics from high vacuum differential thermal analysis and mass spectroscopy 04 p0569 A72-14504

Lunar regolith top surface polarimetric properties of sunlight-exposed rocks and fines compared to terrestrial rocks and meteorites 06 p0887 A72-18225

Carbon chemistry of Apollo 14 size-fractionated fines, noting solar wind activity effect 07 p1082 A72-20290

Simulation study of lunar carbon chemistry, noting hydrocarbon production by solar wind interaction with fines 07 p1082 A72-20291

Igneous and microbreccia lithic fragments, glasses and chondrules from Luna 16 fines, confirming lunar surface melting and igneous differentiation 09 p1379 A72-22253

Rare gas concentrations in Luna 16 fines, using stepwise heating technique 09 p1380 A72-22266

Apollo lunar fine samples total emittance as function of temperature, using spectral emittance measurement technique 09 p1388 A72-23028

Thermoluminescent and luminescent properties of Apollo 12 lunar fines, core tube samples and rock chips 10 p1537 A72-24163

Apollo 12 lunar rocks and fines sulfur concentrations and isotope ratios measurement 10 p1538 A72-24168

Apollo 12 fines thermal conductivity in vacuum at 200-400 K, using least squares technique for curve fit 14 p2154 A72-30509

Rock size, mineralogy and fines size distribution in lunar regolith 17 p2615 A72-35683

The distribution of carbon in lunar samples from Apollo 11, 12 and 14. 17 p2615 A72-35685

Analysis of vegetable seedlings grown in contact with Apollo 14 lunar surface fines. 17 p2505 A72-35925

Ferromagnetic and paramagnetic resonance spectra of lunar material - Apollo 12. 18 p2724 A72-36276

Measurements of radon emanation from Apollo 11, 12, and 14 fines. 18 p2728 A72-36970

Spectral emittance of Apollo-12 lunar fines. 20 p2970 A72-39486

The carbon chemistry of the moon. 23 p3339 A72-44149

FINGER LAKES

U LAKES

FINGERS

Choice reaction task times for responses to signals by middle, little and index fingers 10 p1432 A72-24985

FINISHES

NT GLAZES

NT LACQUERS

Deposition of finishes and dyes in materials dried using microwave heating. 22 p3183 A72-42480

FINITE DIFFERENCE THEORY

Two dimensional transient inviscid flow field from secondary injection in missile control, describing distribution with artificial viscosity finite difference method 01 p0097 A72-10940

Finite difference technique for heat transfer rate in laminar flow in tube with step change in cross section, discussing velocity profiles 02 p0301 A72-11723

Circular cone in supersonic flow, obtaining self similar solution for effect of angle of attack on laminar boundary layer by finite difference method 02 p0150 A72-12095

Laminar flow between stationary and rotating disk with mass flow through concentric circular opening by finite difference method 02 p0203 A72-12098

Two dimensional underexpanded jet plumes flow distribution determination using time dependent finite difference method 02 p0301 A72-12257

Improved finite difference solutions for stress in thin cylindrical shells, using Donnell assumptions [ASME PAPER 71-PVP-24] 02 p0295 A72-12475

Finite difference schemes for grid and planetary boundary layer solutions using grid spacings proportional to mixing length and eddy viscosity 03 p0386 A72-14337

Finite difference scheme for collision of two axially symmetric liquid jets with free boundary in cylindrical coordinate system 03 p0344 A72-14370

Internal atmospheric gravity waves transient two-dimensional finite difference model, including nonlinear, viscosity and thermal conduction terms 04 p0544 A72-15119

Distributed parameter state regulator system, investigating order of spatial discretization error in finite difference approximation to optimal response, control and performance cost [AD-738401] 05 p0639 A72-15805

General MHD duct flow problems solution using machine transformation and finite difference technique supplemented by successive overrelaxation [ASME PAPER 71-WA/APM-15] 05 p0694 A72-15965

Stability characteristics of finite difference schemes based on lumped-parameter model and numerical integrator for wave propagation in continuous media 05 p0735 A72-16081

Laplace equation under Robin boundary conditions over unit square, discussing numerical solution by difference approximation and iterative procedure 05 p0682 A72-16100

Similarity and finite difference solutions of parabolic differential equations, exemplifying by heat conduction and boundary layer equations [ASME PAPER 71-WA/APM-6] 05 p0682 A72-16151

Discrete elasticity theory constitutive and motion equations, considering finite difference and partial differential equations 05 p0737 A72-16297

Finite difference calculations for two dimensional unsteady inviscid expanding flow of perfect gas through nozzle, obtaining flow field patterns 05 p0603 A72-16539

Hyperbolic boundary layer displacement interaction and surface curvature effects, employing implicit finite difference methods [AIAA PAPER 72-76] 05 p0603 A72-16803

Finite difference integration based on theoretical model analysis of three dimensional turbulent boundary layer on sharp cone at angle of attack in supersonic flow [AIAA PAPER 72-187] 05 p0650 A72-16842

Numerical analysis of three dimensional inviscid supersonic flow field about complex vehicle geometry, using finite difference technique and Rankine-Hugoniot relations [AIAA PAPER 72-192] 05 p0606 A72-16847

Space shuttle flow field fluid dynamic hyperbolic equations numerical solution by noncentered finite difference schemes, noting advantages in programming logic simplicity and multidimensional generalizations [AIAA PAPER 72-193] 05 p0729 A72-16848

Explicit finite difference procedure to solve time averaged equations of motion for unstalled turbulent duct flows in coordinate system approximating real flow streamlines [AIAA PAPER 72-43] 05 p0651 A72-16878

Transient compressible heat and mass transfer in porous media, solving coupled nonlinear partial differential equations in finite difference form by iterative technique [AIAA PAPER 72-23] 05 p0749 A72-16914

Nonlinear effects of inviscid supersonic flow field surrounding bodies in coning motion, using shock capturing finite difference technique [AIAA PAPER 72-27] 05 p0607 A72-16918

Multidimensional time dependent flow field analysis by split finite difference operator technique, using star mesh of quadrilateral cells [AIAA PAPER 72-154] 05 p0609 A72-16950

Finite difference model application to supersonic planar viscous near wake, determining parameter range by physical and numerical restraints [AIAA PAPER 72-115] 05 p0609 A72-16971

Finite difference method for transonic airfoil design for wide range of angles of attack and Mach numbers 06 p0755 A72-17629

Large deflection of rectangular thin elastic plates with unsupported edges, using finite difference technique based on dynamic relaxation methods 06 p0895 A72-17799

Numerical solution of supersonic flow past blunt bodies with large mass injection, deriving finite difference equations 06 p0756 A72-18114

Finite difference schemes with splitting operator for mixed type differential equations systems, considering solutions stability and convergence properties 06 p0839 A72-18117

Lax finite difference scheme application to transonic two dimensional Laval nozzle and supersonic blunt body flow with detached shock wave, considering inviscid thermally nonconducting 06 p0756 A72-18126

Convergent finite difference schemes for Navier-Stokes equations initial boundary value problems, using Temam systems approximation method 06 p0840 A72-18132

Hollow waveguide performance numerical solution review covering finite difference and element methods, polynomial approximation, point matching, integral equations and conformal transformation 06 p0784 A72-18237

Finite element and finite difference formulations for solid continua by variational principles, including potential energy, complementary energy and Reissner principles 07 p1087 A72-18792

Hollow and dielectric loaded waveguide modes solution, comparing finite element and finite difference methods based on coefficient matrices and computing time considerations 07 p0952 A72-18793

Quasi-static stability of sandwich plates hinged over edge in finite difference formulation 07 p1094 A72-20213

Truncation error correction based on Richardson extrapolation in finite difference approximation of nonlinear partial differential operators 07 p1101 A72-20328

First boundary value problem solution of nonlinear Poisson equation in rectangular region by finite difference equations approximation 08 p1198 A72-20902

Convergence and stability criteria of monotonic difference schemes for linear parabolic differential equations with interface boundary conditions 08 p1199 A72-21286

Conductive heat transfer equation solved by finite difference scheme with uniform rapid convergence 08 p1253 A72-21458

Finite difference method explicit solution of Cauchy problem for system of heat conduction differential equations 08 p1254 A72-21464

Sound refraction by sinusoidal point source in subsonic jet flow, obtaining solution by finite difference method for comparison with ray tracing results 08 p1152 A72-21894

Laplace operator eigenvalue computation for simply connected region with homogeneous Dirichlet and Neumann boundary conditions and finite difference problem 09 p1340 A72-22296

Filtered-equation pressure coordinate numerical weather prediction model in finite difference formulation, discussing various initialization procedures and boundary value specifications 09 p1343 A72-22427

Two point boundary value problems solved by finite difference method using optimal sequence of nodes 09 p1341 A72-22464

Axisymmetric grid plate bending and torsion under normal forces and moment vectors loads, determining stress-strain state from finite difference equations 09 p1398 A72-22692

Finite difference analysis of dynamic deformation of thin elastoplastic shells of revolution under intense heating 09 p1401 A72-22728

Confined three dimensional boundary layers prediction, describing finite difference methods for flow equations solution 10 p1464 A72-23871

Rigidly connected rectangular plates stress-strain calculation with finite difference method 11 p1733 A72-25538

Finite difference method application to axial flow compressors rotating stall nonlinear analysis, taking into account blade row characteristics [ASME PAPER 72-GT-3] 11 p1568 A72-25606

Characteristic finite difference method for solution of two dimensional wave equation represented by one parameter differential systems 11 p1677 A72-25863

Finite difference method for free vibration of axisymmetric shells, using inertia force terms in shell bending theory equilibrium equations 11 p1737 A72-26429

Finite difference approximation of eigenvalues of singular differential operators in Hilbert space 11 p1678 A72-26556

Automatic switched Shuman filter for shock waves numerical computation, noting third and fourth order accurate finite difference schemes 11 p1619 A72-26668

Finite difference method for bending stresses calculation in rotating disks subjected to irregularly dis-

tributed temperature, deriving digital computer program algorithm 11 p1712 A72-26976

Finite difference equations for plate and shell calculations with various boundary conditions 12 p1878 A72-27089

Finite difference equations of motion for conservative and nonconservative dynamic systems with finite degrees of freedom, obtaining numerical solution by Hamilton principle 12 p1844 A72-27193

Finite difference calculations for structure of finite amplitude thermal convection within self gravitating fluid sphere with uniform heat release 12 p1889 A72-27715

Finite difference approximation and Fourier analysis to determine mechanical system eigenfrequency, studying string and membrane vibration 13 p2000 A72-28417

Numerical methods for inverse solution to turbulent swirling boundary layer combustion flow problem 13 p2063 A72-28420

Atmospheric motion equations numerical integration, presenting conservative finite difference approximation for quasi-uniform spherical grids derived from regular polyhedrons 13 p1985 A72-28445

Nonuniform inlet velocity profile effect on laminar flow development between parallel plates, solving equations by finite difference method 13 p1941 A72-28706

Homogeneous difference schemes stability for ordinary differential equation of arbitrary order with discontinuous coefficients, analyzing positive definite operators class 13 p1986 A72-29076

Coefficient stability of homogeneous difference schemes using irregular networks for fourth order differential equation with discontinuous coefficients 13 p1986 A72-29081

Difference scheme application to Laplace operator eigenvalues determination for regions composed of rectangles, using summary representation formulas 13 p1986 A72-29082

Orr-Sommerfeld equation solution by variable mesh finite difference method, applying to plane Poiseuille flow 13 p1986 A72-29112

Eigenvalues examination for self adjoint singular differential operators in Hilbert space by finite difference methods 14 p2126 A72-30619

Classical and finite difference methods for diffusion and heat conduction problems 15 p2334 A72-31298

Finite difference solution to Navier-Stokes equations for axisymmetric flow of incompressible viscous fluid 15 p2216 A72-31446

Two dimensional incompressible turbulent boundary layer in arbitrary pressure gradient, obtaining mathematical model for solution by implicit finite difference method 15 p2217 A72-31718

Converging plane-walled channels, calculating laminar flow development and heat transfer by finite difference method 15 p2336 A72-32481

Sharp flat plate laminar, transitional and turbulent skin friction via finite difference integration of compressible boundary layer equations 15 p2180 A72-32596

Time dependent finite difference /fluid-in-cell/ method for supersonic aerodynamic problems concerning inviscid compressible flow with contact surface and shock discontinuities 16 p2342 A72-32884

Unsteady Falkner-Skan flow solution by finite difference method for pressure gradient effect on transient response of laminar boundary layer 16 p2376 A72-33015

Differential boundary value problem solution by FORTRAN program using finite difference method 16 p2416 A72-33524

Numerical finite difference prediction of inert turbulent boundary layer swirling jet flow, using nonisotropic energy-length model [AIAA PAPER 72-699] 16 p2380 A72-34044

Transonic airfoil section design to given surface pressure distribution, applying finite difference procedures to transonic small disturbance equations [AIAA PAPER 72-679] 16 p2346 A72-34062

Describing equations derivation by implicit finite difference scheme for chemically nonreactive two dimensional symmetric and axisymmetric jet and wake problem 16 p2381 A72-34170

Use of fast Fourier transforms for solving partial differential equations in physics 17 p2575 A72-34645

Self-adjusting hybrid schemes for shock computations 17 p2575 A72-34648

Study of circular arc airfoils with asymptotic critical Mach number. II 17 p2484 A72-34745

Constitutive equations to characterize rubberlike nonlinear viscoelastic materials under finite deformation stress, obtaining numerical solutions via finite difference technique 17 p2633 A72-35401

Relationship between finite differences and quadratures of a Green's function for a second-order ordinary differential operator 17 p2577 A72-35803

Recent extensions to Eulerian methods for numerical fluid dynamics. 18 p2682 A72-36803

Calculus of variations and finite difference method for combined free and forced convective heat transfer through vertical noncircular ducts, calculating Nusselt number 18 p2741 A72-36926

Hopscotch algorithm for numerical integration of nonlinear hyperbolic partial differential equation systems based on finite difference method 18 p2705 A72-37020

Convergence and accuracy of three finite difference schemes for a two-dimensional conduction and convection problem. 18 p2741 A72-37170

Steady state heat transfer in one dimensional flow involving simultaneous convective and diffusive transport via finite difference formulation 18 p2741 A72-37171

Solution of the equations of the compressible boundary layer (laminar, transition, turbulent) by an implicit finite difference technique. 19 p2785 A72-37521

A technique for numerical solution of boundary value problems in the plane theory of elasticity by the finite-difference method 19 p2878 A72-38204

Fractional steps method of difference schemes for approximate numerical solution of parabolic and elliptic initial boundary value problems 20 p2945 A72-39327

Simplified conservation laws for finite-difference computations. 20 p2946 A72-39637

Finite difference boundary value method for solving one-dimensional eigenvalue equations. 21 p3074 A72-40107

Finite difference calculus development of method to express thermodynamic limit of statistical-mechanical average as power series in number density, noting advantages and applicability 21 p3087 A72-40562

The effects of frictional drag on missile vibrations - A finite difference solution. 21 p3118 A72-40929

A calculation procedure for heat, mass and momentum transfer in three-dimensional parabolic flows. 22 p3243 A72-41954

Finite difference theory for Lamé equations of elastic waves propagation in two dimensional body under mixed boundary conditions 22 p3234 A72-42144

On the comparison of phase and multi-layer techniques for numerical solution of the scattering problems. 22 p3154 A72-42305

Machine code for finite difference solution of wake vortex governing equations and far flow field prediction in trailing vortices, developing turbulent energy model [AIAA PAPER 72-989] 22 p3134 A72-42326

Finite difference and extended Newton methods application to transient and steady state creep deformation in shells of revolution under high temperature and high stress 22 p3235 A72-42482

Large deflections of flat arbitrary membranes. 22 p3235 A72-42604

Nonlinear buckling of cylindrical shells. 22 p3236 A72-42607

On the efficient reduction of truncation error in numerical weather prediction models. 23 p3311 A72-43675

Stress state of arbitrary contour body of revolution under torsion using finite difference method 23 p3347 A72-43744

Integration scheme for two-dimensional impulsive waves in a linear acoustic medium. 23 p3314 A72-44250

Dynamic blast loads on preheated and prestressed thin plates. 24 p3454 A72-44607

Stability and oscillation characteristics of finite-element, finite-difference, and method of weighted residuals for transient two-dimensional heat conduction in structures. 24 p3461 A72-44608

One-level fine-mesh limited-area grid numerical weather prediction atmospheric model, evaluating various finite difference schemes, boundary conditions and initialization methods 24 p3420 A72-44619

Use of characteristics for boundaries in time dependent finite difference analysis of multidimensional gas dynamics. 24 p3359 A72-44879

Some experiences with the solution of potential flow in the plane cascade on the computer. 24 p3393 A72-45365

A finite-difference method for boundary layers with reverse flow. 24 p3395 A72-45789

FINITE ELEMENT METHOD

Airport apron surface pavement strain measurements under field loading conditions, considering static and dynamic loads with finite element method 01 p0047 A72-10192

Finite element method for determining transient response of box-type structure to traveling sonic pressure wave 01 p0136 A72-10219

Curved beam finite elements comparison for structural vibration problems, obtaining ring natural frequencies 01 p0136 A72-10222

Finite element analysis of creep due to stress and strain in double edge notched plates and round bars 01 p0138 A72-10519

Trapezoidal isoparametric and triangular singularity elements for crack tip elastic stress intensity factor for mesh having small number of degrees of freedom 01 p0140 A72-10992

Two-layered plane strain elastic cylinder with cracked inner bore under internal pressure loading, obtaining stress intensity factors by finite element method 01 p0141 A72-10994

Finite element method extension using computer program for solving problems of elastic bodies in contact with stiffness method advantages 01 p0141 A72-11047

Clearance, friction and load effects on turbine blade root fastening stress distribution, comparing finite element method with photoelastic experimental results 01 p0141 A72-11048

Stress concentration factors for fiber and matrix in axially loaded unidirectional composite with discontinuous fiber, using linearly elastic finite element analysis 02 p0292 A72-11987

Finite element technique for stress analysis of rotating bodies under axially symmetric stresses 02 p0293 A72-12343

Vertical thin circular cylindrical shells partially or completely filled with stationary liquid, determining free vibration characteristics with finite element theory 02 p0293 A72-12371

Shells finite element analysis, discussing inplane and normal displacements interpolation schemes and convergence rates [AD-739747] 02 p0296 A72-12532

Finite element formulation for nonlinear large deflection elastic analysis of displacements and stresses in thin plate structures 02 p0298 A72-12657

Finite element discrete model for large aspect ratio wing transverse vibrations, using inhomogeneous elements with various stiffness-length relations 03 p0442 A72-13189

Dynamic structural analysis by finite element method, describing error bounds for eigenvalue analysis by elimination of variables 03 p0442 A72-13401

Elastic-plastic stress-strain analysis of beams with uniform cross section under combined loadings by finite element method 03 p0449 A72-13975

Dynamic analysis of shallow shells with doubly-curved triangular finite element, investigating natural frequencies, mode shapes and convergence 04 p0585 A72-14844

Computational efficiency of minimization algorithm for solving eigenvalue problem arising from dynamic structural analysis by finite element method 04 p0585 A72-14845

Conforming rectangular and triangular finite elements for plate free vibrations analysis in bending 04 p0585 A72-14846

Ring finite elements use in analysis of shells of revolution under axisymmetric loads [ASME PAPER 71-WA/HT-22] 05 p0732 A72-15880

Nonlinear transient coupled thermoviscoelasticity problems solution by finite element method and iterative solution for integrodifferential equation 05 p0736 A72-16085

Vibration mode shapes and frequencies determination by finite element method using consistent and lumped masses formulations in differential equation solution, considering convergence rate [AD-739820] 05 p0736 A72-16086

Finite element micromechanical analysis of porous and filled ceramic composites for internal stresses and deformations 05 p0738 A72-16423

Bounds on condition number for irregular meshes of finite elements expressed in terms of extremal eigenvalues of element matrices
[AD-739416] 05 p0682 A72-16540

Triangular /KLI/ and quadrilateral /KQT/ thin shallow shell elements with 20 degrees of freedom, basing bending behavior on discrete Kirchhoff formulation
05 p0739 A72-16549

Finite element algorithm derived for partial differential equation system governing laminar three dimensional boundary layer flow of multicomponent compressible fluid
[AIAA PAPER 72-108] 05 p0604 A72-16817

Finite element analysis of hydroelastic properties of Saturn 5 full scale S-2 LOX tank, comparing with water tests
[AIAA PAPER 72-173] 05 p0740 A72-16833

Column axial load carrying capacity optimization vs structural weight, using finite element displacement method for buckling load, mode shape and strain energy density
[AIAA PAPER 72-141] 05 p0740 A72-16894

Axissymmetric stress analysis in various weld configurations of stub end high pressure pipe connections, using finite element method
06 p0820 A72-17709

Hollow waveguide performance numerical solution review covering finite difference and element methods, polynomial approximation, point matching, integral equations and conformal transformation
06 p0784 A72-18237

Porous cooling unsteady state problem approximation based on elementary thermal balance concept, solving differential equations by computerized Euler method
06 p0904 A72-18513

Error analysis of finite element solutions for elastic-plastic sandwich plates
07 p1086 A72-18779

Dual stress, strain and displacement formulations of linear finite element elasticity, showing Finzi stress function applicability
07 p1087 A72-18780

Large elastic deformation problems analysis by incremental finite element technique, using variational principles
07 p1087 A72-18782

Algorithm selection for optimization solutions by finite, ad hoc, conjugate, Newton and restricted step methods
07 p1025 A72-18783

Coefficient matrix for estimation of numerical solution error bounds for finite element models
07 p1025 A72-18786

Finite element and finite difference formulations for solid continua by variational principles, including potential energy, complementary energy and Reissner principles
07 p1087 A72-18792

Hollow and dielectric loaded waveguide modes solution, comparing finite element and finite difference methods based on coefficient matrices and computing time considerations
07 p0952 A72-18793

Finite element solution for Boussinesq approximation of two dimensional viscous fluid dynamic problems, using variational principle
07 p0965 A72-18794

Numerical methods for parabolic, hyperbolic and elliptic flows in fluid mechanics and heat transfer, considering finite element method
07 p1097 A72-18795

Round-off error analysis in numerical solutions of finite element equations in dynamic models
07 p1025 A72-18796

Finite element solutions for buckling of columns and beams, investigating restraints and cross section partial plasticity effects
07 p1088 A72-19117

Finite element method application to fracture mechanics problems of stress concentration and intensity factors and elastoplastic response to cyclic loading
07 p1088 A72-19130

Finite element method for elastic plastic sandwich plates analysis, presenting Lagrange multipliers interpretation
07 p1093 A72-19951

Axially nonuniform thin cylindrical shells dynamic analysis, obtaining free flexural vibration characteristics by hybrid of finite element and classical shell theories
07 p1097 A72-20531

NASTRAN /NASA structural analysis/ program for computer stress analysis based on finite element method, noting vibration, acoustics, transient motion and random response applications
08 p1138 A72-21325

Nonlinear modal response analysis of plate structures under random acoustic excitation, using finite element method and perturbation technique
08 p1245 A72-21607

Nonlinear large amplitude vibration of beams for various support conditions, using finite element matrix displacement method
08 p1245 A72-21626

Consistent finite element method to analyze random response of complex structures based on standard modal approach
08 p1248 A72-21823

Optimal gradient minimization scheme for finite element eigenvalue and eigenvector problems, including effect of round-off errors and termination criterion
08 p1200 A72-22140

Quadrilateral four node nonconforming plate bending finite elements for structural vibration and stability analysis
08 p1250 A72-22142

Plastic deformation friction fracturing, stress concentration, free surface changes and load displacement analysis with upper bound, slip line and finite element methods
08 p1250 A72-22197

German monograph on finite element method for elastic impact at half space, analyzing elasticity and inertia effects on energy absorption and contact time
09 p1397 A72-22338

Algorithm for automatic construction of finite element approximation to Laplace equation, noting convergence
10 p1502 A72-23719

Gradient iterative techniques application to finite element vibration and stability analysis of skew plates
10 p1558 A72-24878

Solid body elastic deformation potential energy and structure calculation on computer by finite element method and calculus of variations
10 p1559 A72-24924

Plate and thin and thick walled shells treated as three dimensional solids, noting finite element method limitation
10 p1559 A72-24925

Finite element generalization of plate displacement functions to shell analysis, using strain energy tensor concept
10 p1560 A72-25187

Finite element method for boundary value radiative and convective heat transfer problems
[AIAA PAPER 72-274] 11 p1740 A72-25214

Finite element method for approximate solution of elliptic partial differential equations on unbounded domains, proving error bounds
11 p1675 A72-25271

Computerized structural design of aerospace vehicle, stressing automated routines for finite element models generation
[AIAA PAPER 72-332] 11 p1727 A72-25367

Finite element structural analysis for local buckling stresses in flat plates, panels and thin walled columns, deriving elastic and geometric stiffness matrices
[AIAA PAPER 72-354] 11 p1729 A72-25383

Elastic finite element analysis for stress distribution in gripped thin walled tubular anisotropic three dimensional composite specimens
11 p1731 A72-25457

Anisotropic graphite composite laminates cutouts stress analysis by finite element method, predicting structural reinforcement behavior
11 p1672 A72-25475

Two dimensional elastoplastic finite element analysis of structural members under cyclic thermal-mechanical loadings
[ASME PAPER 72-GT-1] 11 p1734 A72-25604

Finite element method application to hydromagnetic plasma stability analysis, considering cylindrical plasma immersed in axial magnetic field and bounded by conducting shell
11 p1695 A72-25794

Curved cylindrical shell finite element with reduced stiffness matrix, noting convergence for symmetrical and unsymmetrical loading
11 p1735 A72-25896

Finite element method for buckling coefficients of isotropic rectangular plate subject to linearly varying axial compression, using general linear geometric matrix
11 p1736 A72-25999

Error bounds for finite element methods and approximation with piecewise polynomials for elliptical differential equations solution
11 p1679 A72-26956

Representational method for evolution type partial differential equations numerical solution, noting relationship to finite element method
11 p1679 A72-26961

Finite element method application to variable thickness circular and annular plates free transverse vibration
12 p1879 A72-27191

Convergence of plate bending eigenvalue solutions from conforming displacement finite elements based on thick plate free vibration conversion to isoperimetric variational problem
12 p1879 A72-27194

Mixed variational formulation and finite element method for axisymmetric cylindrical, conical, spherical and ellipsoidal shells
12 p1879 A72-27195

Finite element equations for hybrid coordinate dynamic analysis of interconnected rigid bodies with elastic flexible appendages for use in spacecraft simulation
12 p1876 A72-27257

Book on finite element method application to boundary value problems, nonlinear continuum thermodynamics and thermoviscoelasticity
12 p1882 A72-27325

Hybrid cylindrical shell finite element, determining natural frequencies from equilibrium equations, stress functions stress-strain relationships and boundary force transfer matrices
12 p1882 A72-27339

Nonlinear fracture toughness determination via three point bending test simulation by elastic-plastic finite element computer program
12 p1830 A72-27731

Structural system dynamic instability regions determination by finite element and conjugate gradient methods
12 p1884 A72-27847

Finite time element method for failure probability prediction in multiple load-path system with random loads, noting flow chart for suggested computer program
13 p2052 A72-28369

Finite element method for calculating vibrations of thin rectangular plate with four degrees of freedom
13 p2000 A72-28466

Lagrange multiplier method derivation of variational functional for finite element method and applications to plate and shell problems
13 p2055 A72-28623

Finite element method for in-plane free vibrations of shear wall type structures, noting rectangular plate elements with six degrees of freedom per node
13 p2057 A72-29092

Axissymmetric geometry and load finite element structural analysis of isotropic elastic materials for parametric and optimization studies
13 p2062 A72-29875

Modified finite element method application to plane elastic area elementary triangles strained and stressed state description by polynomial algebraic expressions and harmonic functions
14 p2163 A72-30188

Variational problem solution for solid strained body with nonlinear stress-strain relation, applying finite element method
14 p2130 A72-30189

Finite element method application to dynamic stability of thin plates and shells, noting nuclear reactor structural analysis
[SMRT PAPER M 2/1] 14 p2166 A72-30723

Finite element method for nonlinear analysis of nuclear reactor structures, noting elasticity, viscoelasticity and elastoplasticity problems
[SMRT PAPER M 2/2] 14 p2166 A72-30724

Finite element method with compliance equations determining energy release rates and stress intensity factors for complex crack configurations and loadings
14 p2168 A72-30908

Sandwich beams structural optimization for given deflection by iterative finite element procedure
14 p2168 A72-30927

Gaseous species diffusion in carrier gas under various geometries and flow conditions, using finite element method
14 p2095 A72-30928

Finite element displacement field with internal equilibrium application to nine degrees of freedom triangular bending element stiffness matrix calculation
14 p2168 A72-30930

Structural systems stability and natural frequency analysis eigenvalue problems solution by Sturm sequence method, using finite element technique
14 p2168 A72-30931

Matrices and permutation rules for tetrahedral polynomial finite elements for Helmholtz equation, commenting on computer time and convergence rate
14 p2126 A72-30932

Thin elastic plates finite displacement flexure behavior, using piecewise linear finite element incremental stiffness technique
14 p2168 A72-30933

Honeycomb sandwich beams dynamic analysis by finite element method with three degrees of freedom per discrete element, obtaining flexural, in-plane and shearing modes
14 p2169 A72-31146

Variational principle based Pian hybrid finite element procedure for static cylindrical shell analysis extended to plate and shell vibration
14 p2169 A72-31149

Cylindrical shell rectangular finite element from generalized independent strain functions and corresponding displacement functions
14 p2169 A72-31174

Rectangular, elliptical and parabolic waveguides TM and TE modes relation and cutoff wavelength analysis by finite element method, suggesting mode classifying system

15 p2205 A72-31354

Approximate values for elastic body stresses and displacements based on finite element method and virtual displacements and minimum potential energy principles equivalence

15 p2323 A72-31477

Shape functions for finite element analysis in n-dimensional space, examining completeness of polynomial interpolation and computational efficiency

15 p2326 A72-31713

Finite element analysis of circular and elliptical plates with curved boundaries, discussing high precision triangular plate bending element modification for accuracy improvement

15 p2326 A72-31715

Mixed triangular finite element model for plate bending problems including shear deformation effects, discussing error analysis and convergence

15 p2326 A72-31716

Numerical integration of equations of motion in finite element methods, investigating explicit methods stability

15 p2326 A72-31717

Isentropic perfect gas steady compressible flow finite element analysis through nonlinear equations linearization based on perturbation theory

15 p2217 A72-31719

Finite element method application to thin plate bending problem to illustrate efficiency of sector elements for sectorial and annular plates

15 p2326 A72-31720

Finite element method for discrete models of composite materials, discussing nonlinear dynamic problems

15 p2330 A72-32296

Unsymmetrical coupled columns stability under nonconservative lateral and end loading, using finite element method

15 p2331 A72-32557

Structural averaging of stresses in finite element method hybrid stress model, using additional equilibrium equations

15 p2332 A72-32597

Finite element method application to nonlinear dynamic problems exemplified by study of plastic deformation behavior of cylindrical billet under impact of heavy rigid body

16 p2466 A72-33019

Finite element method matrices in least squares approximation and elliptic partial differential equations, discussing numerical stability properties

17 p2573 A72-34219

Buekner formulation combined with finite element method for arbitrary shaped cracked bodies stress intensity factors in framework of linear fracture mechanics

17 p2623 A72-34253

Book - Approximation of elliptic boundary-value problems

17 p2574 A72-34622

Free vibrations analysis of linear aerodynamic conservative structures in elastic range by finite element method, applying to transient or random forced responses calculation

17 p2626 A72-34742

Elastic-plastic medium with doubly periodic square array of circular cylindrical voids, obtaining finite element solution for uniaxial deformation by variational principle

[ASME PAPER 72-APM-36] 17 p2628 A72-34784

Finite element analysis of elastoplastic structures with temperature dependent mechanical properties

17 p2631 A72-34947

A comparison of numerical methods for determining stress intensity factors.

17 p2631 A72-34973

Stress analysis of axisymmetric solids with asymmetric properties.

17 p2632 A72-35227

Fracture mechanics approach to adhesive joints.

17 p2633 A72-35282

The transverse Poisson's ratio of composites.

17 p2571 A72-35289

Finite element solutions for laminated thick plates.

17 p2633 A72-35292

Finite element analysis of the axisymmetric vibrations of cylinders.

17 p2634 A72-35409

Monograph - The finite-element method in plate bending analysis

17 p2634 A72-35547

Monograph - The elastic flexural-torsional buckling of beam-columns by discrete element techniques

17 p2634 A72-35548

Steady state response of nonlinear beam under periodic loading, using finite element techniques for nonlinear differential equation

18 p2732 A72-36078

Variational principle of linear differential equations.

18 p2705 A72-36717

On the numerical solution of a class of nonlinear problems in dynamic coupled thermoelasticity.

18 p2738 A72-37078

A finite element approach to optimal design of plastic structures in plane stress.

18 p2739 A72-37165

Combined finite element-weighted residuals method for linearized BGK Boltzmann kinetic theory equation, considering cylindrical Couette flow

18 p2684 A72-37168

Finite element models with rigid displacement for nonrigid structure analysis, noting curved beam and shells

18 p2739 A72-37173

Bounds on the extremal eigenvalues of the finite element stiffness and mass matrices and their spectral condition number.

18 p2705 A72-37202

Timoshenko finite element beam theory application to flexural vibration problems, considering shear deformation and rotary inertia effects

18 p2740 A72-37206

German monograph - Finite elements according to a theory of the second order on the basis of an extended variational principle with an application to the stability and stress computation of simple symmetrical I-beams under consideration of the deformation of the cross-section

19 p2871 A72-37479

Computerized finite element three dimensional stress analysis, taking into account mechanical and thermal stresses

19 p2878 A72-38649

Application of the finite element method to torsional flutter analysis on an analog computer

20 p2980 A72-39907

Finite element large deflection analysis of elastic-plastic shells of revolution subjected to axisymmetric loading.

20 p2982 A72-40064

Three-dimensional photoelastic and finite-element analysis of a propellant grain.

21 p3052 A72-40237

Free vibrations of finite element plates subjected to complex middle-plane force systems.

21 p3116 A72-40330

Geometrical non-linear analysis of structures by finite elements.

21 p3120 A72-41204

Study on an incremental variational principle and its applications to finite element method and incremental thin shell theory.

21 p3121 A72-41240

Mixed finite element analysis of elasto-plastic plates in bending.

21 p3124 A72-41502

On the application of the mixed finite element methods to the stress concentration problems of cylindrical shells with a circular cutout or a crack.

22 p2322 A72-41942

The use of simple three-dimensional acoustic finite elements for determining the natural modes and frequencies of complex shaped enclosures.

22 p3206 A72-42464

Continuum and finite element branching studies of the circular plate.

22 p3235 A72-42603

Symmetrical bending of circular plates using finite elements.

22 p3236 A72-42605

On the effect of the form of the strain energy function on the solution of a boundary-value problem in finite elasticity.

22 p3236 A72-42606

Wing flutter prevention in SST structural design, using finite element model and lifting surface aerodynamic theory

22 p3237 A72-42760

The application of the finite element displacement method to problems of elastoplastic deformation.

22 p3238 A72-42832

Steady state equations of motion, equilibrium shape and stability derivatives of elastic airplanes evaluated with finite element methods.

22 p3138 A72-42845

Rigid-body motions and strain-displacement equations of curved shell finite elements.

22 p3240 A72-42892

Finite element method optimization of orthotropic layered shells of revolution under mechanical and thermal loadings, considering stress-strain relationships

[SAWE PAPER 939] 23 p3344 A72-43479

Structural mass properties mathematical modeling for dynamic structural analysis, describing matrix notation for finite element methods application

[SAWE PAPER 944] 23 p3344 A72-43484

Combined mode crack extension in adhesive joints.

23 p3305 A72-43493

A finite element stress analysis of a crack in a bi-material plate.

23 p3346 A72-43707

Triangular element for multilayer sandwich plates.

23 p3351 A72-44108

Three-dimensional finite element analysis for fracture mechanics.

23 p3353 A72-44235

Vibration characteristics of cylindrical shells with several axially equispaced constraints.

23 p3355 A72-44371

Laminated thick plate and shell analysis by the assumed stress hybrid model.

24 p3453 A72-44601

Stability and oscillation characteristics of finite-element, finite-difference, and method of weighted residuals for transient two-dimensional heat conduction in structures.

24 p3461 A72-44608

Mixed-displacement finite-element analysis with particular application using plane-stress triangles.

24 p3455 A72-44789

Triangular facet finite element application in thin cylindrical shell analysis by displacement method

24 p3456 A72-44792

Computation of post-yield behaviour in notch-bend and tension testpieces.

24 p3456 A72-44796

Linear fracture mechanics in orthotropic materials.

24 p3457 A72-44818

A finite element model for shells based on the discrete Kirchhoff hypothesis.

24 p3457 A72-44876

Dual analysis for heat conduction problems by finite elements.

24 p3461 A72-44877

Multi-node elements model of isoparametric thin shell vibration for turbine blade application

24 p3457 A72-44881

Wave propagation in a thin hollow cone by a finite element method.

24 p3458 A72-44886

Best finite elements distribution around a singularity.

24 p3420 A72-45786

FINITE-STATE MACHINES U TURING MACHINES

FINNED BODIES

Hot versus shielded aerodynamic surfaces trade study for space shuttle booster wings and fins design, considering materials, structural weight and cost estimates

[AIAA PAPER 72-390] 11 p1726 A72-25411

Wind-tunnel Magnus testing of a canted fin or self-rotating configuration.

17 p2486 A72-35254

Aerodynamic characteristics of the slotted fin.

21 p2992 A72-41262

Finned missiles nonlinear rolling motion characteristics at large angles of attack, solving differential equation of motion by global nonlinear least squares method

[AIAA PAPER 72-980] 22 p3134 A72-42333

FINS

NT COOLING FINS

Shape factors of heat conduction for fin arrangements with isothermal boundaries, using conformal mapping

09 p1412 A72-23688

Unsteady-state temperature distribution in a connecting fin of constant area.

18 p2741 A72-36935

FIRE CONTROL

Tethered flying rotor platform for reconnaissance, fire control and radio transmission assignments in naval missions, discussing system characteristics

04 p0465 A72-15652

Combat aircraft lateral aiming performance optimization and evaluation based on criterion of bullet stream response to pilot roll commands

05 p0611 A72-16657

Low level light TV camera with Si intensifier target tube for fire control system to improve AH-1G Cobra helicopter night reconnaissance and attack capabilities

17 p2557 A72-35555

FIRE EXTINGUISHERS

Biomedical effects on air crews of chemical fire suppression agent Halon 1301/bromotrifluoromethane/ during simulated aircraft cabin fires

12 p1776 A72-28308

Destructive effect of combustion and pyrolysis products in intake air on fire extinguishers foam production

14 p2084 A72-30339

Tetrafluorodibromoethane - A new fire extinguishing agent in civil aviation

17 p2512 A72-35793

Investigation of Freon fire-extinguishing systems with a nucleonic gage.

18 p2648 A72-36674

Evaluation of film forming foams for the suppression of fuel fires in aircraft hangars.

[WSC1 PAPER 72-16] 20 p2982 A72-38974

FIRE FIGHTING

Flame resistant materials for aircraft fire fighter protective clothing from systems approach tests

08 p1126 A72-21585

Inert gas-oxygen mixtures fire retardant properties under atmospheric and hypobaric pressures, measuring effectiveness by standard fabric burning rate
12 p1890 A72-28309

FAA implemented airport certification legislation covering minimum safety standards, operation manual, emergency plan, fire and rescue service and pavement requirements
18 p2675 A72-36785

Apollo/Saturn 5 spacecraft liquid propellants safety procedures in event of fire on explosion in operations building at Kennedy Space Center
23 p3343 A72-43552

FIRE PREVENTION
Additives and reactive retardants flame inhibiting properties for polymers, discussing various testing techniques
01 p0090 A72-10286

Aircraft interior materials selection relative to fire hazards and smoke emission properties
[PI PAPER 18] 03 p0380 A72-13249

UV sensitive fire detector in manned space vehicle, discussing simulation in aircraft flying zero gravity parabolas
06 p0814 A72-17584

Antimisting kerosene fuels for aircraft crash fires reduction
07 p1050 A72-18837

Antimony-halogen synergistic reactions in fire retardants, noting antimony oxychloride role
07 p0935 A72-19056

Aircraft fuel system gunfire vulnerability and fire and explosion protection techniques
08 p1112 A72-21579

Jet engine fuel fire hazard evaluation by controlled laboratory tests, analyzing ignition characteristics under simulated survivable aircraft crash accidents
[SAE PAPER 720324] 11 p1702 A72-25587

Jet engine fuel modification to decrease fire hazard in survivable aircraft crashes
[ASME PAPER 72-GT-25] 11 p1702 A72-25621

Crash safe turbine fuel to reduce fire probability and severity during aircraft ground crash, investigating physical and chemical properties
[ASME PAPER 72-GT-28] 11 p1702 A72-25624

Procedure for the calibration of photoelectronic components in the IR spectral range
18 p2693 A72-37005

Static electricity in fueling of superjets.
21 p3040 A72-41375

FIREBALLS
Liquid propellant rocket abort fireball model, specifying heat flux as function of time
03 p0457 A72-13953

He plasma generation by transversely excited carbon dioxide laser, determining density and temperature profiles of luminous fireball
04 p0558 A72-15345

Shock front radius of subsonic radiation front driven by plasma fireball during final stages of decaying laser spark
20 p2934 A72-39844

Multifireball theory of particle production in inelastic high energy interactions, using elastic scattering amplitude for inelastic processes model
23 p3316 A72-44412

Study of high-energy hadron interactions by the nuclear photoemulsion method
23 p3330 A72-44416

FIREPROOFING
Flame resistance requirements of high temperature resistant and highly chlorinated fibers
[PI PAPER 11] 03 p0380 A72-13245

Fire retardant capabilities of bromine and chlorine compounds in polymers
[PI PAPER 13] 03 p0380 A72-13247

Aircraft crash fire protection, using passenger compartment heat shield of fire-retardant polyisocyanurate foam and intumescent paint
03 p0310 A72-13484

Flame resistant materials for aircraft fire fighter protective clothing from systems approach tests
08 p1126 A72-21585

Fire resistant fibrous materials for potential military and transportation applications, considering aromatic polyamide polybenzimidazole, fluorocarbon resin polymer, phenolic and glass fibers and fabrics
08 p1191 A72-21586

Chlorendic acid based Hetrion 92C fire retardant chemical resistant polyester for fiberglass reinforced structure applications
08 p1192 A72-21677

Synthetic fire resistant hydraulic fluids, comparing chlorinated hydrocarbons and phosphate esters chemical properties with water based products
08 p1197 A72-22160

Polyglycol aqueous solutions selection as fire resistant hydraulic fluid from hydraulic bench tests performed with various type pumps
08 p1197 A72-22161

Refractory materials fabrication characteristics for aerospace technology, presenting listing of synergic agents for use with halogenous inhibitors
17 p2571 A72-35277

FIREWORKS
U PYROTECHNICS
FIRING [IGNITING]
NT ROCKET FIRING
Weapon firing and external store separation tests by flight test methods for determining safe weapon release envelope
06 p0759 A72-18499

Secondary explosive spark detonators design and performance, determining ambient pressure variations effects on firing characteristics
08 p1219 A72-20758

Firing characteristics of insensitive electroexplosive devices under impulsive waveforms, discussing theory, design and application of waveform generators
08 p1220 A72-20763

Electroexplosive devices firing energy parameters determination by capacitor discharge system providing exponential pulses terminated at adjustable width
14 p2143 A72-30200

FIRING TIME
U BURNING TIME
FISH
U FISHES
FISHES
Fish electroreceptor system morphology, physiology and evolution, considering electric current action, peripheral coding activity and central subsystems
02 p0157 A72-11545

FISHTAILING
U YAW
FISSILE MATERIALS
U FISSIONABLE MATERIALS
FISSION
Fission origin of cosmic ray fossil tracks in augite achondrite high-uranium-concentration meteorite Angra dos Reis
05 p0714 A72-16078

FISSION PRODUCTS
Pu-244 fission Xe isotopic composition parameters in achondrite meteorites, using lunar spallation systematics
01 p0124 A72-10058

Space crew radiation dosage calculation from Mars mission high impulse gas core nuclear rocket engine exhaust plume fission fragments
01 p0022 A72-11353

High altitude thermonuclear explosion fission fragments localization mechanism, considering magnetogravitational trap as potential well for heavy charged fragments
11 p1713 A72-25950

Release of fission products from high temperature fuel materials
18 p2707 A72-36137

Xenon isotope fission component due to extinct Pu-244 in lunar breccia, noting storage details in terms of crustal material dating
20 p2967 A72-39182

FISSIONABLE MATERIALS
Ballistic piston fissioning plasma production involving compression of uranium hexafluoride
01 p0111 A72-11333

FITNESS
NT FLIGHT FITNESS
NT PHYSICAL FITNESS
FITTING
Flight helmet optimal fitting technique, using automatic recording audiometer and noise source for acoustic leakage detection
04 p0479 A72-14873

FITTINGS
Stainless steel circular tubes size and fittings effects on pneumatic pulse wave distortion and attenuation in fluidic pulse generation system
08 p1111 A72-20928

FITZGERALD-LORENTZ CONTRACTION
U LORENTZ CONTRACTION
FIXED POINTS [MATHEMATICS]
Isolated fixed points existence in area preserving mappings considered with normal form for periodic Hamiltonians in celestial mechanics
04 p0576 A72-15041

Computational mean square error due to roundoff in digital filters implemented on fixed point computers
07 p1033 A72-20346

Fixed point smoothing of sequentially correlated processes by extending filtering technique to simultaneous estimation of state and process noise contribution
11 p1610 A72-25871

Small change sensitivity of autonomous neutral functional differential equations in neighborhood of equilibrium point
15 p2263 A72-31752

Fixed point computer mean square errors in multiplication as function of number of digital order
16 p2367 A72-33959

Square root least squares and filtering solutions for fixed point and interval smoothing problems, comparing computational stability and precision and computer requirements
[AIAA PAPER 72-877] 20 p2910 A72-39122

FIXED WINGS
Wing-fuselage combination aerodynamic coefficients, comparing experimental data with subsonic linear and nonlinear theoretical results
[DGLR PAPER 71-115] 02 p0153 A72-12723

An aerodynamics model applicable to the synthesis of conventional fixed-wing aircraft.
[SAWE PAPER 908] 23 p3250 A72-43455

FIXED-WING AIRCRAFT
U AIRCRAFT CONFIGURATIONS
U FIXED WINGS
FIZEAU EFFECT
Interferometric testing of optical systems, discussing test plates, Fizeau, Lloyd moire, transmission, Twyman-Green, shearing, Ronchi, scatter fringe, grazing and holographic methods
10 p1482 A72-24567

FLAGELLATA
Metabolic control of temperature compensation in circadian rhythm of *Euglena gracilis* strain
07 p0919 A72-19538

FLAKING
Iron content and stress level effect on flaking corrosion of Al alloy sheets, describing experimental technique
13 p1980 A72-29826

FLAME FRONTS
U FLAME PROPAGATION
FLAME INTERACTION
U CHEMICAL REACTIONS
U FLAME PROPAGATION
FLAME IONIZATION
Additive and natural ionization in combustion reactions, discussing flame chemistry, ionic species and measurements
05 p0751 A72-17224

Recombination coefficient, ionization rates and average lifetime of ions in rarefied carbon-air flames, investigating pressure and additives effects
06 p0904 A72-18213

Experimental investigation of the effect of an electric field on a laminar flame
22 p3243 A72-41889

Ionization mechanism and condensed and gas phase kinetics of oxidizer burning during ammonium perchlorate combustion
22 p3215 A72-43140

Ionization zone formation and condensed and gaseous phase kinetics during ammonium perchlorate burning in nitrogen atmosphere
22 p3215 A72-43179

FLAME PROBES
Measurement techniques for electrically heated temperature probes in flames, considering wire sensor diameter and radiative transfer
03 p0456 A72-13925

Emitting-absorbing flames diagnostics, measuring spectrally resolved radiant energy with fiber optic probe data
[ASME PAPER 71-WA/FU-1] 05 p0661 A72-15915

Single and double probe measurements of electron temperatures in flames, discussing difficulties in obtaining reliable I-V characteristics
08 p1129 A72-22043

Heatable chamber burners design to increase sensitivity of flame spectrophotometry, separating solvent from aerosols
13 p1958 A72-29525

Flame probe sampling process effects on gas composition concentration gradient for two dimensional cylindrical and rectangular probes
16 p2361 A72-34004

I-V characteristics of electric noise generated by flame between double probe electrodes during coke particle burning in air flow
19 p2882 A72-38458

Nozzle beam-mass spectrometer system for studying one-atmosphere flames.
[WSCI PAPER 72-9] 20 p2921 A72-38975

Sensitivity enhancement of atom absorption measurements by the method of pulse vaporization from the microprobe into the flame
22 p3176 A72-42174

FLAME PROPAGATION
Flame spread rate over combustible polymer fuel specimens as function of surface, sample, composition, pressure and oxygen mole fraction
02 p0301 A72-11965

Flame propagation and overdense heating in laser beam created plasma, calculating density and temperature profiles by one dimensional continuum hydrodynamic theory
02 p0238 A72-12363

Dichlorodifluoromethane-fluorine flame structure, taking samples by molecular beam sampling system for analysis by mass spectrometry
02 p0303 A72-12483

Laminar flame front surface area determination, presenting graphical constructions from generatrix of arbitrary segment number
03 p0455 A72-13099

Angular momentum conservation law compliance of generalized triple configuration model for spin-detona-

tion nucleus, assuming transverse Chapman-Jouguet wave

03 p0342 A72-13734

Flames vibratory propagation appearance conditions at constant volume, considering expansion and compression waves amplitude

03 p0456 A72-13794

Combustible fuel-air mixture laminar and turbulent flame propagation mathematical model, with reference to detonation and prevention

03 p0456 A72-13876

Three dimensional transverse wave structure effect on detonation wave and Chapman-Jouguet gross properties, using planar model

04 p0510 A72-14410

Monograph on head-on collision of combustion wave with shock wave and rarefaction wave covering gas dynamics, interactions, reflection process, etc

05 p0746 A72-16046

Turbulent diffusion flame model in Couette flow, including wall effect

[AIAA PAPER 72-214]

05 p0748 A72-16856

Nonuniform potential and dissipation flow structure of turbulent diffusion flame front at high Reynolds numbers

06 p0902 A72-18104

Photorecorder for burning rate measurements, consisting of electric motor driven film carrying rotating drum in slitted housing and flame front imaging optical system

06 p0817 A72-18215

Pulsating flame spread on liquid alcohol surface over range of liquid temperatures, using shadow streak photography

07 p1099 A72-19375

Detonation propagation through tubes coated with thin liquid fuel films, considering boundary layer displacement effect on propagation speed, pressure ratio and reaction zone length

07 p1100 A72-19728

Boundary value solutions and computer programs for one dimensional laminar flame propagation equations

08 p1129 A72-22040

Bromine additions effect on normal laminar flame propagation velocity of methane-air mixture at high pressures

09 p1411 A72-22889

Oscillatory gas combustion mechanism and stability boundary characteristics, determining burning time from flame height and flow rate

11 p1745 A72-25753

Oscillatory relaxation combustion regions determination in high pressure gas injection tubes, noting flame propagation rate relationship with mixing concentration

11 p1745 A72-25754

One dimensional pulsating detonations calculation with induction zone kinetics, obtaining Chapman-Jouguet steady solution profiles

11 p1745 A72-25983

Solid combustibles flame spread rates in compressed atmospheres, noting dependence on oxygen concentration

14 p2170 A72-30340

Pressure increase induced by heat release for laminar flame sheet in hypersonic stream, considering fuel injection through semiinfinite porous flat plate

15 p2337 A72-32590

Aerogel combustion kinetics and continuous flame formation on coal, Mg, Al and Al alloy powders, using track method

16 p2476 A72-33252

Microphotometric chemiluminescence measurement for analysis of turbulent flame fine structure for homogeneous air-fuel mixtures at high Reynolds numbers

16 p2479 A72-34005

Flat flame deflagration tube measurements of laminar flame velocities for propane-ammonia-air mixtures in fuel rich region

16 p2480 A72-34006

Combustion of solid-propellant layer in contact with a solid-oxidizer layer

18 p2720 A72-36239

Acceleration of burning by a shock wave interacting with the flame

18 p2740 A72-36240

Influence of an electrical discharge in a flame on the propagation of the flame

18 p2740 A72-36244

Combustion propagation in cylindrical aluminum alloy specimens and some peculiarities of the aluminum combustion mechanism

19 p2847 A72-37362

Luminance profiles photometry for axisymmetrical propagation in propane-air turbulent flow combustion with turbulence level control in jet core

19 p2879 A72-37366

Hydrodynamic stability of periodic burning front for ideally conducting incompressible fluids in longitudinal or transverse magnetic field

19 p2882 A72-38457

Influence of water vapor on the normal flame velocity of a methane-air mixture at high pressures

19 p2882 A72-38459

Burke-Shumann-Zeldovich model for aerodynamic characteristics of straight jet laminar diffusion flames, considering free, semibounded and slipstream types

19 p2882 A72-38460

Measurements of burning velocity in a flat flame front

19 p2883 A72-38872

Laser power and pulse duration requirements for hot plasma production by flame propagation in solid DT targets for controlled thermonuclear fusion

20 p2931 A72-39354

Optical measurements in a pulsating flame. [ASME PAPER 72-HT-8]

20 p2926 A72-39679

Aerodynamic structure analysis of steady flame of homogeneous gas mixtures, noting streamlines, isotherms, isobars and flame front curves

21 p3129 A72-40979

Determination of the concentration range of flame propagation at elevated temperatures

21 p3129 A72-40984

Problem of oscillation self-excitation due to the dependence of the normal velocity of a flame on the thermodynamic parameters of a gas

21 p3129 A72-40985

Propagation rate and the existence range of turbulent flame

21 p3131 A72-41660

German monograph - The transfer behavior of premixed flames.

22 p3244 A72-43076

Propagation of the front of an exothermic reaction in condensed mixtures whose components interact through a high-melting layer

22 p3245 A72-43177

Two-dimensional supersonic flow with flame sheets.

24 p3360 A72-44988

Shock wave velocity, combustion front and pressure measurements of unstable detonations in propane-oxygen-nitrogen mixtures, comparing with double discontinuity theory

24 p3462 A72-45030

Chapman-Jouguet surface characteristics in flow field behind steady gaseous detonation wave, using schlieren photography

24 p3462 A72-45031

Determination of the detonation velocity of isoatomic mixtures

24 p3462 A72-45032

One dimensional theory of electric discharge detonation effects in flame propagation within square duct with combustible gas mixture, applying to electrochemical pulse jet engine

24 p3464 A72-45064

The shock-combustion /expansion-combustion/ polar with allowance for variation of the specific heat ratio of a gas passing through a flame front

24 p3465 A72-45446

FLAME QUENCHING

U EXTINGUISHING

U QUENCHING [COOLING]

FLAME SPRAYING

Electrical properties of thick-film barium titanate dielectrics produced by flame spraying.

19 p2846 A72-38616

Structural features of plasma and gas-flame deposited aluminum oxide coatings

19 p2810 A72-38680

Chemical composition, refractivity and temperature dependence of blackness levels of aluminum oxide-chromium oxide-phosphorus oxide ceramic coatings flame sprayed on steel

21 p3072 A72-40384

Particle temperature and flight velocity during gas-powder buildup

22 p3182 A72-42194

FLAME STABILIZATION

Flame autostabilization mechanism during gaseous oxygen-liquid ammonia mixture combustion in liquid fuel rocket engine chamber, measuring mean burnout time

08 p1224 A72-22091

Flame structure studies of stabilizing region of near stoichiometric laminar burner methane-air flame

09 p1411 A72-23147

Hydrogen chloride addition effect on hydrocarbon flammability under reduced pressure, studying flame stability limits of methane, ethylene, acetylene and n-butane in oxygen

10 p1562 A72-24236

Flow phenomena, mixing and stability of high speed enclosed multijet turbulent diffusion flames fed by propane and air

10 p1563 A72-25139

Ammonia-air opposed reacting jet /ORJ/ for flame stabilization, solving partial differential equations for flow field

10 p1564 A72-25141

Soviet papers on vibrational combustion systems covering flames relaxation in annular combustion chambers

11 p1745 A72-25751

Open-air jet engine test stand for flame stabilization, jet and compressor noise studies, noting provisions for rapid installation changes

12 p1795 A72-27416

Optical anemometers for mean and fluctuating velocities in premixed flame of town gas-air combustion system, noting velocity probability density distribution

13 p1955 A72-28546

Ethanol liquid fuel counterflow diffusion flame stabilization and thermal structure determination by interferometry

13 p1913 A72-29306

Ultrasonic wave excitation in potassium seeded flame, showing amplitude proportional to harmonic perturbation frequency imposed on plasma

14 p2170 A72-30417

Rotating flow introduction effects on jet noise levels, combustion and turbulent mixing processes and flame stability

[AIAA PAPER 72-645]

16 p2480 A72-34087

Flame autostabilization mechanism during gaseous oxygen-liquid ammonia mixture combustion in liquid fuel rocket engine chamber, measuring mean burnout time

17 p2597 A72-34662

Ignition, unsteady burning and flame collapse of a unitary fuel particle

19 p2882 A72-38453

Book - Combustion aerodynamics.

19 p2882 A72-38722

FLAME TEMPERATURE

Measurement techniques for electrically heated temperature probes in flames, considering wire sensor diameter and radiative transfer

03 p0456 A72-13925

Self absorption and temperature gradient effects on fluorine-hydrogen flame spectroscopic temperature determination, comparing calculated and theoretical Lorentz intensity profile

04 p0596 A72-14890

Flame temperatures, composition profiles and burning rates in liquid n-heptane droplet and sphere combustion

07 p1051 A72-19362

Analog simulation of normal thermal explosions and cool flames, observing oscillations limits, time dependence of parameters and effect of changes in activation energy or initial temperature

07 p1098 A72-19366

Nitrogen oxide emission control in gas turbine combustion by lowering flame temperature

11 p1744 A72-25620

Collisional ionization cross sections measurement for gaseous metal atoms in hydrogen-oxygen flames at 2000-2800 K

11 p1591 A72-26659

A mathematical model of cold propane flames

18 p2741 A72-37016

Discussion of the thermal state of an open air premixed methane-oxygen flame.

19 p2883 A72-38871

Electron attachment and compound formation in flames. V - Negative ion formation in flames containing chromium and potassium.

22 p3244 A72-42717

Measurement of the temperature of flames containing scattering particles on the basis of IR radiation

23 p3356 A72-43678

FLAMES

NT DIFFUSION FLAMES

NT PREMIXED FLAMES

Heat transfer from augmented flames and plasma jets based on magnetically rotated arcs, measuring transfer rate as function of electromagnetic torque

02 p0301 A72-12031

Solid propellant flame spectral and temporal details during unstable and stable combustion, using middle infrared spectrometer

[AIAA PAPER 72-32]

05 p0703 A72-16896

Wall thermal radiation influence on solid propellants burning rate in electrically heated tube furnace, noting correlation with laminar flame theory

[AIAA PAPER 72-35]

05 p0703 A72-16938

Vibrational laser Raman scattering from flame gases for nitrogen, oxygen and water vapor

09 p1276 A72-22978

Recirculation criteria for confined jet flames in cylindrical combustion chamber, using Thring-Newby number

09 p1411 A72-23144

Flame photometric detection of small concentrations of sulfur compounds in ambient air, describing spectrum scanning detector, rotating interference filter and correlation detector

10 p1480 A72-24101

Quasi-steady state combustion theories compared with observations of hydrocarbon fuel droplet and flame zone diameters, noting underestimation of burning rate

13 p2063 A72-28545

Competition criteria for chemical reactions selection in nonequilibrium computer calculations on combustion systems properties, noting seeded flames and rocket exhausts

13 p1912 A72-28548

Determination of the excess air coefficient with the aid of electrical properties in the case of laminar flames of gaseous fuels

17 p2636 A72-34931

Mean emissivity of a luminous flame - Spray combustion of liquid fuel.

18 p2740 A72-36148

The physically defined flame and its representation in the water model

18 p2656 A72-36242

Comparison of theoretical and experimental limits of detection in atomic absorption spectrometry using air-acetylene and nitrous oxide-acetylene flames.

19 p2762 A72-37725

Velocity distribution in turbulent mixing of compressible reacting gases, noting flame length measurement of submerged H jet

21 p3129 A72-40981

FLAMMABILITY

Additives and reactive retardants flame inhibiting properties for polymers, discussing various testing techniques

01 p0090 A72-10286

Flammability tests for polymer materials used in computers and business machines, evaluating procedures in terms of reproducibility, difficulty and equipment requirements

01 p0145 A72-10287

Polyethylene and polypropylene combustion, investigating additives and surrounding gaseous composition effects on flammability and volatile products during thermal degradation

02 p0248 A72-11767

Flammability smoke hazards and combustion product toxicity tests of plastics

03 p0379 A72-13243

Flame retardant mechanism in hydrocarbon polymer combustion, discussing halogen adverse effect on thermal stability

03 p0380 A72-13244

Plasticized PVC compounds, investigating chlorine based fire retardants role in increasing flame resistance

03 p0380 A72-13248

Polybenzimidazole fabric treatment for flammability reduction in oxygen atmospheres

07 p1023 A72-19055

Furan resins and chemically resistant furan-fiberglass composites flame resistance, heat distortion and physical properties at high temperatures

08 p1192 A72-21678

Hydrogen chloride addition effect on hydrocarbon flammability under reduced pressure, studying flame stability limits of methane, ethylene, acetylene and n-butane in oxygen

10 p1562 A72-24236

Polymers flammability tests for research, safety and acceptance purposes, noting ignition limits, decomposition and testing procedures

11 p1746 A72-26044

Glass reinforced thermoplastic resins flammability resistance, discussing test methods and flame retardant additives

16 p2415 A72-33419

Flame retardant glass reinforced thermoplastic polyester Celanex processing and performance, considering flammability, and electrical/mechanical properties

16 p2415 A72-33420

Combustible materials ignition temperature, time lag and burning rate in oxygen enriched atmosphere, deriving activation energy for fire resistance estimates

17 p2571 A72-35276

Studies on flame-resistant epoxy resin - Pyrolysis of tetra-brominated epoxy resin and flame-resistant mechanism.

18 p2704 A72-36519

Structure-property relationships in flame retardant systems - Relative effects of alkyl phosphates, phosphonates and phosphites on cellulose flammability.

20 p2987 A72-39698

Comparative evaluation of zinc borate 2:3:3.5 with antimony oxide using various fire testing methods.

20 p2898 A72-39699

FLAMMABLE GASES

NT PYROGEN

FLANGES

Circumferential undulations of flanges from theory of nonsymmetrical bending of circular plates

04 p0584 A72-14472

Secondary normal stresses in fixed flange zone of thin walled nonlinearly elastic pipe under bending moment and torsion

08 p1249 A72-22096

Numerical description of electromagnetic radiation from open-ended flanged waveguides, giving truncation corrected expressions for field behavior in aperture perimeter vicinity

13 p1915 A72-28520

FLAP CONTROL

U AIRCRAFT CONTROL

U FLAPS [CONTROL SURFACES]

FLAPPING

Articulated rotor blade flapping at 0-0.24 advance ratios and constant lift, discussing effects of shaft tilt and collective pitch variations

07 p0910 A72-20205

Hingeless blades flap-lag oscillations linear stability characteristics in hovering flight, examining precone, elastic and pitch-lag coupling and induced inflow aerodynamic effects

14 p2072 A72-30289

Hingeless elastic helicopter blades coupled flap-lag motion under quasi-steady aerodynamic loads, reducing equations of motion to coupled nonlinear differential equations

15 p2180 A72-31211

Parametric studies of instabilities associated with large, flexible rotor propellers.

[AHS PREPRINT 615] 17 p2490 A72-34496

Unsteady wake effects on progressing/regressing forced rotor flapping modes.

[AIAA PAPER 72-957] 22 p3137 A72-42350

Helicopter rotor blade flapping motion stability, applying perturbation technique to linear equations of motion for different advance ratios and Lock numbers

[AIAA PAPER 72-955] 22 p3137 A72-42351

FLAPPING HINGES

Flap-lag induced nonlinear oscillations in torsionally rigid helicopter blade, solving nonlinear equations of motion by multiple time scales asymptotic expansion

[AIAA PAPER 72-956] 22 p3137 A72-42356

FLAPS [CONTROL SURFACES]

NT JET FLAPS

NT LEADING EDGE SLATS

NT SPLIT FLAPS

NT TRAILING-EDGE FLAPS

NT WING FLAPS

European A300B airbus flap and slat systems and tailplane actuator for longitudinal pitch trim control

01 p0006 A72-10725

Externally blown flaps for STOL characteristics in medium and heavy jet transport aircraft, demonstrating aerodynamic and flight mechanical feasibility

02 p0155 A72-12502

Large scale high aspect ratio multielement suppressor nozzle arrays testing for augmentor wings and internally blown flaps

[AIAA PAPER 72-131] 05 p0612 A72-16888

Jet peak velocity decay in single and multielement nozzles for STOL aircraft externally blown flaps, noting noise reduction due to flow mixing

[AIAA PAPER 72-48] 05 p0608 A72-16927

Aerodynamic characteristics of STOL aircraft with externally blown jet augmented flaps, predicting interference between lifting surfaces and turbofan engines

[AIAA PAPER 72-63] 05 p0609 A72-16953

Environmental tests on carbon fiber Vulcan air-brake flap, including thermal cycling, sustained loading, immersion, corrosion and lightning strike tests

05 p0681 A72-16998

Book of aircraft design illustrations covering three view and perspective form low drag airfoil, aspect ratio, plain split, slotted and multiple flaps

14 p2167 A72-30776

FLARED BODIES

Dynamic behavior of M-4S rocket devices for strap-on booster separation and nose cone and flare deployment

22 p3232 A72-43143

FLARES

Flare spectra of AD Leo during strong burst, comparing Balmer discontinuity and line widths with UV Cet stars

06 p0883 A72-18020

Laser flare luminosity front displacements and atom density at surfaces of transparent dielectrics as function of pulse intensities

07 p1007 A72-20123

Dynamics of flare formation by pulsed laser beam at surface of alkali halide crystals

07 p1007 A72-20124

Simultaneous observations of radio flares from beta Persei on 25-25 January 1972 at 2.8, 3.7 and 11.1 cm, noting spectral characteristics difference from quasi-steady component

10 p1547 A72-24945

Flare spectra of AD Leonis during strong burst, comparing Balmer discontinuity and line widths with UV Cet stars

11 p1718 A72-25956

Pleiades slow flareup in photosphere, comparing with Orion flare stars

15 p2304 A72-31329

Flare mechanism of pulsar radiation near magnetic poles of rotating neutron stars

15 p2298 A72-31627

Observation of a hard X-ray flare in Cyg X-1.

18 p2721 A72-36649

Energy variation curves for direct flare radiation and reflection from eruptive star atmosphere, discussing color variations

19 p2858 A72-37808

Non-thermal bremsstrahlung of fast electrons and flare of stars.

20 p2974 A72-39894

FLASH

Optimal flash rate and duty cycle for flashing visual indicators, testing observer ability to determine indicator state

01 p0018 A72-10565

Fragmentation and closure in afterimages of bright flash stimuli

03 p0317 A72-13938

Scintillator crystal system with monitoring streak camera for flash X ray burst time measurements

04 p0523 A72-15482

Human dark adaptometric visual threshold recovery and electroretinograms in response to double light flashes, using Fourier analysis of oscillatory potentials

07 p0916 A72-19024

Flicker and flash threshold experiments, discussing flicker cut-off frequency and flash duration relations and visual sensitivity

07 p0926 A72-19028

Occipital electroencephalographic response to slowly repeated aperiodic light flashes, discussing alpha wave and rhythmic afteractivity amplitude changes

07 p0916 A72-19041

Rod-cone interaction in human scotopic vision, presenting test flash threshold as function of conditioning flash interval

08 p1116 A72-21460

Average evoked potentials correlates of two flash perceptual discrimination in cats, discussing parallel changes as function of interflash intervals and peripheral level

10 p1427 A72-25178

Visible light flash emission due to strong shock wave of laser spark, investigating strong external magnetic field effect and time variation of luminous intensity

13 p1972 A72-29983

Light flashes observed by astronauts on exposure to primary cosmic radiation during transatlantic flights, investigating effect upon retina in man and animal

15 p2189 A72-31917

Analytical model of the flash produced in aluminum-aluminum hypervelocity impacts.

22 p3207 A72-42867

FLASH BLINDNESS

Flash blindness effects during flight simulation, investigating recovery time

[AD-742863] 01 p0022 A72-11296

Physiological effects of intense anticollision flash light backscatter pulses on instrument rated pilots

12 p1775 A72-28303

Visual acuity restoration improvement after flash blindness by monocular shielding and ingestion of vitamin complexes containing ATP with pyridoxal, considering twilight vision

21 p3012 A72-41748

The suppression-recovery effect in relation to stimulus repetition and rapid light adaptation.

24 p3372 A72-44909

FLASH LAMPS

High stability electrodeless discharge lamps with less than 0.1 percent intensity variation, discussing construction and quality control procedures

04 p0509 A72-15485

Flashlamp pumped dye-doped polymethyl methacrylate laser thermal and photochemical effects decrease and peak power output increase by light converter

07 p1002 A72-19206

Fast coaxial flash lamp pumped liquid dye laser (LDL) for photolysis and biophysical and biochemical applications

09 p1326 A72-23406

Superradiant laser emission from organic dyes rhodamine 6G and B with coaxial flashlamp pumping source, relating input threshold energy to dye concentration

13 p1971 A72-29864

Xenon filled coaxial pulse tube for pumping organic dye solutions, obtaining intensive light flashes

13 p1971 A72-29923

Pulsed solid state lasers with large area Si photodiode for output measurement in feedback control system to compensate flash lamp aging

15 p2247 A72-32027

Flashlamp pumped cryptocyanine Q switched high peak power ruby lasers, noting UV radiation responsible for methanolic solution photochemical decomposition

15 p2249 A72-32156

Short flash characteristics of spiral pumping lamp for dye laser

16 p2400 A72-33079

Flash lamp optimal operating parameters determination by impedance matching to driving circuit and spectral matching to material of optically pumped solid state pulsed lasers

21 p3061 A72-40204

Flashlamp-pumped dye lasers for investigations of the upper atmosphere.

24 p3409 A72-44948

FLASH TUBES

U FLASH LAMPS

FLASH WELDING

German monograph - Improvement of the ductility characteristics of flash butt welding joints involving carbon steels by pulse normal annealing and hot heading in the welding machine

19 p2807 A72-37659

FLAT CONDUCTORS

Computed performance of ILS glide slope transmitting arrays sited over flat ground planes of one dimensional perfectly conducting strips in free space

05 p0686 A72-16559

Reliable interconnections for U.S. Army avionics, determining best technique for terminating flat conductor cables with electrical connectors

10 p1447 A72-24012

FLAT PLATES

Alternating directional implicit numerical solution for three dimensional steady low density hypersonic flow over finite width flat plate

[AD-736572] 01 p0049 A72-10230

MHD boundary layer calculation for conducting fluid along semiinfinite flat plate with transverse magnetic field, deriving momentum and kinetic energy integral equations

01 p0113 A72-11383

Unsteady compressible free convection near infinite vertical flat plate with temperature and velocity variations in boundary layer

01 p0146 A72-11392

Sonic line neighborhood of uniform axisymmetric supersonic air jet impinging on perpendicular flat plate, measuring shock shapes and surface pressures

01 p0002 A72-11398

Nozzle boundary layers effect on reattachment position of two dimensional jet to adjacent flat plate, noting Reynolds number influence

02 p0150 A72-11729

Dynamic and plastic behavior of mild steel and Al wide beams and rectangular flat plates

02 p0291 A72-11964

Flat plate incompressible smooth surface boundary layer examination emphasizing turbulence production near wall, using hydrogen-bubble and hot-wire measurements with dye visualization

02 p0203 A72-11975

Aeroelastic stability of flat anisotropic sandwich plates in supersonic compressible fluid flow

02 p0297 A72-12614

Unsteady flow in laminar boundary layers along infinite porous flat plate with time dependent suction

02 p0206 A72-12620

Heat transfer and temperature profiles in separated flow generated by transverse rectangular notch in flat plate

02 p0303 A72-12700

Time dependent unsteady flows visualization around circular cylinders and flat plates decelerated from steady speed

02 p0206 A72-12773

Laminar two dimensional hypersonic flow over stepwise accelerated flat plate at zero angle of attack, obtaining time dependent velocity and temperature profiles by linearized flow equations

03 p0442 A72-13236

Transition on plane plate in presence of vortices detached from cylinder in free flow

03 p0342 A72-13788

Flat plate in turbulent shear flow polymer solution, predicting maximum drag reduction with interactive layer concept

03 p0343 A72-14322

Velocity and shear stress in laminar boundary layer flow on flat plate with narrow suction slot

04 p0461 A72-14461

Optimum variable thickness reinforcement around circular hole in flat elastic sheet under radial tension

04 p0583 A72-14463

Forced and free transverse vibrations of flat rectangular plates with attached concentrated masses

04 p0584 A72-14521

Laminar viscous flow past finite flat plate at high Reynolds numbers, solving Navier-Stokes equations

04 p0511 A72-14859

Flat plate wing autorotation experiments about spanwise axis in low speed wind tunnel

04 p0462 A72-15117

Turbulence intensities and shear stress measurements in wake of thin flat plate by rotating single hot-wire anemometer

04 p0524 A72-15498

Holographic interferometer for heat transfer measurement, studying free convection thermal boundary layer on heated isothermal vertical flat plate

04 p0524 A72-15531

Flat plate, sphere and circular cylinder drag and lift coefficients in free molecular flow

04 p0463 A72-15645

Turbulent flow and heat transfer characteristics of non-Newtonian fluids on flat plate, measuring velocity and temperature distributions

05 p0648 A72-16003

Load or compression eccentricity effect on buckling and postbuckling behavior of flat plates, presenting stress distribution curves

05 p0737 A72-16116

Thin circular flat plate simply supported at three points on circumference, obtaining vibration mode shapes and eigenvalues

05 p0738 A72-16532

Jet interaction induced supersonic turbulent boundary layer separation, obtaining flat plate pressure measurements and jet plume shadowgraphs

05 p0602 A72-16537

Free convection flow along infinite vertical flat plate under periodically varying suction and with fluctuating plate temperature, analyzing mean velocity and temperature profiles

05 p0747 A72-16668

Turbulent boundary layer on yawed flat plate, measuring velocity profiles and flow directions

[DFVLR-SONDDR-177] 05 p0603 A72-16703

Concentration profile equations for finite length flat vertical plate moving in viscous incompressible fluid

05 p0650 A72-16783

Current collection characteristics of flush mounted electrostatic probes on sharp flat plate in ionized hypersonic flows

[AIAA PAPER 72-104] 05 p0696 A72-16814

Numerical solution method for laminar, time dependent and three dimensional boundary layer equations, applying to rotating flat plate in forward flight

[AIAA PAPER 72-109] 05 p0652 A72-16944

Environment acoustic resonant frequencies effect on flat steel plate vibration under direct and air flow vortex shedding excitations

06 p0894 A72-17768

Two dimensional flow attachment to flat plates, investigating Coanda effect

06 p0798 A72-17776

Critical review on data accuracy of maximum principal elastic stresses and deflections of thin initially-flat square isotropic plates under uniform normal pressure

06 p0894 A72-17796

Supersonic flow patterns near yawed obstacles around flat plate sharp leading edge with high pressure regions in reversed separated flow zone

06 p0756 A72-18122

Difference method for numerical integration of Navier-Stokes equations for two dimensional incompressible steady flow along flat thin plate

07 p0908 A72-19170

Flexure analysis of isotropic Reissner flat plates bonded by adhesive layer, deriving stress distribution equations in general tensor form

[AIAA PAPER 71-148] 07 p0189 A72-19688

Buckling under uniaxial compressive load of structural sections and stiffened flat plates reinforced with laminated composites

07 p0190 A72-19732

Thermal conductivity and thermal diffusion coefficients determination for plane plate heated unilaterally from above under fourth kind boundary conditions

08 p1252 A72-21313

Air injection from wall slot into turbulent boundary layer of high temperature gas channel flow, calculating film cooling effectiveness in flat plate

08 p1252 A72-21316

Molecular beam continuum model for calculation of hypersonic flow past flat plate at zero incidence angle

[AD-746387] 08 p1254 A72-21609

Laminar thermal boundary layer analysis, comparing heat transfer characteristics of continuous surface and semiinfinite plate

08 p1254 A72-21613

Flat plate boundary layer transition equations for supersonic wind tunnels, taking into account free stream turbulence

08 p1150 A72-21616

Boundary condition for plane or axisymmetric stagnation point flow of micropolar fluid over flat plate, giving numerical solutions for turbulent characteristics

09 p1293 A72-22621

Static pressure tube calibration for surface pressure measurements in flow over flat plate and airfoil

09 p1261 A72-22937

Parametric instability of flat rectangular plates under periodic or shear sinusoidal in-plane boundary loads

09 p1408 A72-23463

Forced convection heat transfer for turbulent flow over flat surface with attached protrusion for varying Reynolds number and boundary layer thickness

10 p1561 A72-23882

Existence and uniqueness theorem for weak solution of clamped elastic plate equilibrium problem, using micropolar flat plate bending theory

10 p1555 A72-24202

Rectilinear impulsive motion of compressible boundary layer on infinite plate, deriving integration method for differential equations of motion under energy dissipation neglect

10 p1465 A72-24203

Unsteady laminar boundary layer on semiinfinite flat plate induced by small free stream velocity fluctuations, showing far downstream double layer structure via asymptotic and numerical solutions

[AD-745486] 10 p1467 A72-24334

Uniform flow past semiinfinite flat plate for large Reynolds numbers and strong blowing, noting injected

fluid region separation from free stream by shear boundary layer

10 p1467 A72-24369

Thermal radiation effects on natural convection boundary layer adjacent to vertical flat surface with uniform heat flux input

10 p1562 A72-24466

Heat transfer process in boundary layer of transparent gas flowing past plane emitting plate with prescribed surface heat flux

10 p1418 A72-24540

Perturbation analysis for forced flow past semiinfinite flat plate parallel to uniform mainstream, calculating two dimensional laminar film condensation by boundary layer theory

10 p1469 A72-24563

Boundary layer model for laminar transient forced convection film boiling on isothermal flat plate, noting one dimensional conduction, intermediate and steady state regions

[AIAA PAPER 72-289] 11 p1741 A72-25227

Hydrodynamics of turbulent free convection boundary layer on vertical flat plate and ethyl alcohol film

11 p1743 A72-25258

Viscous liquid impulsive flow past semiinfinite plate, showing leading edge effects and boundary layer singularity existence

11 p1614 A72-25351

Finite element structural analysis for local buckling stresses in flat plates, panels and thin walled columns, deriving elastic and geometric stiffness matrices

[AIAA PAPER 72-354] 11 p1729 A72-25383

Linearized method of characteristics application to supersonic flow past oscillating flat plate cascades with supersonic leading edge locus

[AIAA PAPER 72-377] 11 p1730 A72-25401

Laminar viscous flow past semiinfinite flat plate at zero incidence, using Oseen approximation in matching leading edge and potential flow regions

11 p1615 A72-25522

High strength steel flat plates brake formability from bend tests on sheared edges specimens, noting Hutchinson method sensitivity for different crack propagation propensities materials

11 p1657 A72-25819

Single spiral vortex cavity termination model for second order solution of flat plate hydrofoil cavitation flow

11 p1616 A72-25879

Viscous effects on turbulent diffusion shear flow past semiinfinite flat plate, using Wiener-Hopf equations

[DFVLR-SONDDR-171] 11 p1617 A72-26370

Double passed Michelson interferometer with polarizing beam splitter, quarter wave plates and cube corner reflectors to obtain immunity to mirror misalignment

11 p1635 A72-26500

Rayleigh problem in presence of magnetic field, discussing transpiration effects on MHD flow near oscillating flat plate

11 p1696 A72-26542

Unsteady aerodynamic forces on flat plate in locally perturbed incompressible potential flow, investigating angle of attack frequency response to periodic local perturbations

11 p1573 A72-26579

Dynamic and thermal laminar compressible boundary layers on flat plate, noting interaction of two quasi-steady flows

[ONERA, TP NO. 1068] 12 p1797 A72-27167

Mean velocity distribution and Reynolds stresses in turbulent wake behind flat plate in uniform incompressible flow

12 p1798 A72-27718

Nonstationary interaction flow field between subsonic and composite jet on flat plate with vortex formation and reverse currents, using finite difference technique

12 p1799 A72-28168

Vorticity and energy transfer equations for subsonic jet impingement on flat plate, noting turbulent jet effect on friction factor

12 p1799 A72-28171

Heat transfer measurement during flat plate cooling by air film, using electrical calorimetric technique

12 p1890 A72-28176

Turbulent mixing length velocity, temperature pulsations and viscous sublayer thickness in steady incompressible fluid flow past infinite plate

12 p1799 A72-28179

Combined radiation-convection interaction for slow speed gas flow over flat plate, comparing with two dimensional and axisymmetric stagnation point geometries

13 p2064 A72-28631

Infinite plane plates sound radiation due to bending waves interactions with density and stiffness fluctuations in material

13 p2004 A72-29094

Hall currents effect on unsteady MHD flow of electrically conducting fluid past flat plate imbedded in uniform external transverse magnetic field

13 p2012 A72-29225

Wind tunnel investigation of supersonic air flow behavior on rotatable right dihedral formed by two plane plates with sharp edges

13 p1894 A72-29636

Numerical integration of boundary layer equations through region of reverse flow past parallel flat plate with negative surface velocity

13 p1944 A72-30033

French monograph on velocity profile in laminar boundary layer on semiinfinite flat plate in harmonic oscillation of uniform incompressible flow

14 p2095 A72-30949

Laminar to turbulent boundary layer transition in supersonic flow over flat plate investigated in supersonic wind tunnels, noting unit Reynolds number effect

14 p2069 A72-31004

Liquid film condensation of low pressure metal vapors on isothermal vertical flat plates, obtaining equations for heat transfer rate prediction

14 p2173 A72-31059

Heat transfer in MHD boundary layer flow of conducting incompressible fluid with aligned magnetic field on flat plate at high Prandtl number

14 p2141 A72-31068

Two dimensional viscous flow past semiinfinite flat plate and smooth obstacle, using Navier-Stokes equations for lift force relationship investigation

15 p2216 A72-31312

Navier-Stokes equation for unsteady asymptotic suction flow over flat plate, plotting velocity distribution profiles

15 p2178 A72-31406

Blade characteristics of axial flow fan with orifice fan guide investigation by theoretical model with flat plate parallel to wing tip surface

15 p2179 A72-32142

Holographic determination of local convective mass transfer coefficients over flat plate normally impinged with laminar air jet, using swollen polymer transparent coating

15 p2239 A72-32349

Thermal force exerted on spherical particle between two flat plates in stagnant monatomic rarefied gas, using moment solution to Boltzmann equation

15 p2336 A72-32403

Singularity method treatment of vortex distribution induced velocity perturbations on flat plate at angle of attack, noting results similarity to lifting surface theory

15 p2180 A72-32466

Streaming MHD flow past semiinfinite flat plate in presence of perpendicular uniform magnetic field, obtaining velocity field at large distances

15 p2288 A72-32480

Sharp flat plate laminar, transitional and turbulent skin friction via finite difference integration of compressible boundary layer equations

15 p2180 A72-32596

Simultaneous hypersonic skin friction and heat transfer measurements on sharp-edged flat plate, using thin-skin heat transfer gages and boundary layer pitot rake

15 p2219 A72-32598

Power law fluids impulsively started flow over plate, presenting analytical expressions for velocity distribution, shear stress and boundary layer thickness

16 p2375 A72-32833

Blowing and suction effects on free convection boundary layer on semiinfinite vertical flat plate, taking into account temperature difference between plate and fluid

16 p2477 A72-33429

Wall and ambient temperature distribution effects on free convection heat transfer from nonisothermal vertical flat plate in temperature stratified medium for Prandtl number range

16 p2477 A72-33434

Pohlhausen type integral method for dissociative binary mixture nonequilibrium laminar boundary layer on flat plate, using Crocco relationship between enthalpy and velocity profile

16 p2378 A72-33436

Temperature field in flat plate with selective radiation absorption coefficient, using asymptotic representations for internal heat flux radiation component

16 p2479 A72-33858

Flat plate leading edge blunting and wall cooling effects on supersonic laminar flow ramp-induced separation

[AIAA PAPER 72-716] 16 p2344 A72-34032

Perturbation methods for density stratified viscous flow past flat plate, using boundary layer and low Reynolds number approximations

[AIAA PAPER 72-646] 16 p2381 A72-34086

Effects of yielding and size upon fracture of plates and pressure cylinders.

17 p2565 A72-34251

Certain motions of micropolar fluids

17 p2538 A72-34771

Contact pressure between an elastic spherical shell and a rigid plate.

[ASME PAPER 72-APM-31] 17 p2628 A72-34788

Asymptotic character of turbulent boundary layer longitudinal velocity distribution along flat plate at low Reynolds number, using Hirsch theory for potential flow

17 p2539 A72-34908

Flow near an accelerated porous flat plate.

17 p2540 A72-35054

Downstream effects of discontinuous injection of foreign gases in inert laminar boundary layer flows.

17 p2542 A72-35632

Viscous hypersonic flow over a flat plate at angle of attack with leeside boundary layer separation.

[AD-744593] 17 p2486 A72-35634

Turbulent boundary layer with discontinuity in wall temperature and concentration

17 p2638 A72-35746

Flat plate withdrawal at high speed from quiescent liquid baths, calculating velocity profile via boundary condition transformation and eigenfunction expansion method

18 p2678 A72-36122

Strain measure determined plastic stress concentrations around discontinuities in flat plates compared with incremental theory

18 p2733 A72-36359

Drag of a flat plate with transition in the absence of pressure gradient.

18 p2641 A72-36775

Response of heat transfer from a moving flat plate in a parabolic flow.

18 p2741 A72-36798

Transition to a turbulent flow mode in the boundary layer of a plane plate with various turbulence scales in the incident flow

18 p2682 A72-36889

Clamped flat skew plates stability under inplane stresses in terms of oblique components, calculating elastic buckling coefficients via energy method

18 p2736 A72-36931

The forces on a flat plate in a Couette flow.

18 p2683 A72-36996

Drag of a finite flat plate set parallel to a uniform flow.

18 p2683 A72-37045

Alternate singular perturbation theory of high Reynolds number flow over flat plate to eliminate asymptotic matching and composite solution for accuracy improvement

18 p2684 A72-37083

Bending waves diffraction and scattering by mass impedance loadings of infinite plane plate, considering point load and semiinfinite rib arrays

18 p2739 A72-37203

Flow equations for flat plate turbulent boundary layer with Reynolds, continuity and energy components, deriving semiempirical differential equation for turbulence scale

19 p2785 A72-37471

Experimental investigation of nonstationary heat exchange for flow around a flat plate

19 p2880 A72-37665

Creep-buckling of flat rectangular plates when the creep exponent ranges from 3 to 7.

19 p2875 A72-37717

The enhancement of heat transfer by waves in stratified gas-liquid flow.

19 p2787 A72-38398

Hypersonic unsteady compressible boundary layer dependence on Prandtl number.

19 p2787 A72-38429

Compressible laminar wake behind a thin flat plate.

19 p2747 A72-38798

The prediction of compressible turbulent boundary-layer flows with mass addition.

[ASME PAPER 72-HT-58] 20 p2914 A72-39658

An analytical solution of wall-temperature distribution for transpiration and local mass injection over a flat plate.

[ASME PAPER 72-HT-57] 20 p2985 A72-39659

Theory of laminar film condensation of flowing vapor.

21 p3128 A72-40950

Laminar and turbulent boundary-layer studies at hypersonic speeds.

[ICAS PAPER 72-09] 21 p2990 A72-41134

The motion of a viscous fluid past an impulsively started semi-infinite flat plate.

21 p3046 A72-41316

Steady radiating gas flow past a semi-infinite flat plate at a constant temperature for an optically thick case.

21 p3131 A72-41497

Flat compressible turbulent boundary layers of air, predicting foreign gas injection effects on mass and heat transfer Stanton numbers and skin friction

22 p3165 A72-41958

Variational formulation and computer solution for thermal boundary layer flow over flat plate in entrance region, assuming temperature dependent thermal conductivity and viscosity

22 p3156 A72-41959

Bending waves propagation through flat plate forming rigid sound bridge between two parallel plates, calculating energy transfer at LF oscillations

22 p3234 A72-42128

Large deflections of flat arbitrary membranes.

22 p3235 A72-42604

Acoustic shock wave diffraction at moving or stationary flat plate immersed in ideal gas

22 p3206 A72-42732

Supersonic flow past a suddenly set plate

22 p3136 A72-42906

German monograph - Cooling of geometrically simple bodies /flat plate, cylinder, sphere/ by convection and radiation.

22 p3244 A72-43062

Free flexural vibrations of an elliptical plate with simply supported edge.

23 p3352 A72-44121

An experimental study of heat transfer downstream of a rearward-facing step with small coolant injection.

23 p3357 A72-44271

Laminated thick plate and shell analysis by the assumed stress hybrid model.

24 p3453 A72-44601

Dynamic blast loads on preheated and prestressed thin plates.

24 p3454 A72-44607

Post-buckling of axially compressed plates.

24 p3455 A72-44632

A numerical experiment on two-dimensional turbulent separation.

24 p3389 A72-44687

Measurement of the velocity distribution in the boundary layer over a flat plate with a diffusion flame.

24 p3464 A72-45062

Stability of the laminar flow of a 'power-law' non-Newtonian fluid in the boundary layer on a flat plate

24 p3393 A72-45255

Study of a turbine type flowmeter with helical blades.

24 p3404 A72-45354

FLAT SURFACES

Previous loading effect on contact area and prints number and size distribution and thermal conductance for two nominally flat surfaces in contact

[ASME PAPER 71-LUB-M] 02 p0234 A72-11528

Velocity, enthalpy and turbulent energy distributions calculation for plane wake behind flat body by asymptotic solution based on turbulence theory

23 p3249 A72-44083

FLATTENING

Jupiter equatorial radius and oblateness at atmospheric level from timings of 13-14 May 1971 occultations of beta Scorpi

04 p0571 A72-14615

FLAW DETECTION

U NONDESTRUCTIVE TESTS

FLEET BALLISTIC MISSILES

NT POSEIDON MISSILES

FLEXIBILITY

Potential energy principle in equilibrium stability problems for flexible extendable thread, using Liapunov method

03 p0390 A72-14208

Vibrational characteristics dependence on structural flexibility in gimbal bearings and supporting structure of two axis free gyroscopes and single axis rate gyroscopes

08 p1173 A72-22129

Short fiber reinforced thermoset composite materials for engineering construction, tabulating flexural properties and Charpy impact strengths

09 p1338 A72-23165

FLEXIBLE BODIES

Dynamic response of infinitely wide perfectly flexible foil bearings to small sinusoidal tensile variations

[ASME PAPER 71-LUB-20] 02 p0235 A72-11540

Flexible surface effects on shear stress fluctuations beneath turbulent boundary layer, using fiber optic displacement probe

03 p0343 A72-14324

Relay systems stability in orientation control of flexible satellites

05 p0725 A72-16439

Flexible elastic plate nonlinear vibration response and noise transmission from turbulent boundary layer by Monte Carlo technique, discussing subsonic and supersonic flow regions

[AIAA PAPER 72-199] 05 p0651 A72-16850

Liapunov direct method based approaches to hybrid dynamical systems stability, applying to attitude stability of flexible earth pointing satellite

[AIAA PAPER 72-18] 05 p0729 A72-16867

Rotational perturbation of three bodies in space tied by flexible elastic ropes, relating physical parameters to stable motion regions boundaries

08 p1240 A72-21141

Aerodynamic and gravitational effects on relative motion of two orbiting point masses connected by flexible nonexpandable thread

08 p1240 A72-21143

Equations of motion for structural flexibility influence on dual spin spacecraft dynamic response, noting elastic deformations and rotation rates coupling

[AIAA PAPER 72-348] 11 p1725 A72-25377

Unsteady aerodynamic loadings of flexible aircraft with nonplanar wings and wing-tail surfaces in supersonic flow

[AIAA PAPER 72-378] 11 p1574 A72-25402

British thin Si solar cells for large flexible lightweight arrays, considering radiation resistance, specific mass, area, contact material and antireflection coatings 12 p1756 A72-28004

American and European solar generator technology development review, discussing roll-up arrays, flexible panels, and stowage and deployment system components 12 p1756 A72-28005

Flexible solar cell array module design technique, discussing electric welding procedure and equipment parameters effects on breaking strength and reliability 12 p1758 A72-28036

Flexible space vehicle multiple closed loop attitude control system design, discussing stability, structure interaction and performance by analog simulation 15 p2321 A72-32587

Survey regarding present views, directives and standards, and the customary approaches for balancing flexible rotors 18 p2731 A72-36065

Orthogonal functions application to flexible rotors balance, expressing deflections vs angular velocity as sum of eigenvectors 18 p2731 A72-36066

Comparison of the balancing of a flexible rotor following the methods Federn-Kellenberger and Moore. 18 p2731 A72-36067

Flexible rotors balancing theory based on Fredholm integral equations, considering two- and three-bearing supported shafts with arbitrary mass distribution 18 p2731 A72-36068

Flexible rotor balancing over operational rotational speeds, deriving matrix equation for general conditions based on distributed and concentrated unbalance concept 18 p2732 A72-36071

Balancing of a flexible rotor by means of mode separation. 18 p2732 A72-36072

Flexible cable in uniform flow field, calculating coupling between longitudinal and transverse modes to obtain centripetal acceleration effects on tension 18 p2734 A72-36418

Astroelasticity in design and analysis of flexible space vehicles, presenting dynamics and control considerations 18 p2738 A72-37082

Convergence of a simple iteration scheme in equilibrium problems of flexible plates 19 p2877 A72-38201

Invariant poles feedback control of flexible, highly variable spacecraft. 19 p2869 A72-38240

Attitude dynamics of a three-axis stabilized satellite with a large flexible solar array. 20 p2976 A72-39137 [AIAA PAPER 72-857]

Rotational perturbation of three bodies in space tied by flexible elastic ropes, relating physical parameters to stable motion regions boundaries 20 p2977 A72-39246

Aerodynamic and gravitational effects on relative motion of two orbiting point masses connected by flexible nonexpandable thread 20 p2977 A72-39248

Determination of flexural-vibration deflections of structural elements with allowance for internal friction damping 20 p2981 A72-39921

A form of the translational dynamical equations for relative motion in systems of many non-rigid bodies. 22 p3205 A72-42113

A simple algorithmic method for the simulation of a spacecraft with flexible appendages. 23 p3343 A72-44552

Dynamics of spin-stabilized satellites having flexible appendages. 24 p3449 A72-45140

FLEXIBLE WINGS NT PARAWINGS

Inclined wind tunnel test section for free gliding investigation and aerodynamic design of flexible wing two body system 15 p2213 A72-31403

Flexible wing applications to passenger and cargo transport, discussing gliding and soaring sport, emergency use, powered flight, rocket payload recovery, etc 16 p2347 A72-33182

FLEXING

Composite materials testing with four point loading method, studying environmental and creep effects in flexure 04 p0537 A72-15091

Postbuckling behavior of cantilever columns with variable flexural rigidity, basing solution method on buckling mode assumption and principle of minimum total potential 04 p0591 A72-15278

Aircraft ejection simulation by human thoraco-lumbar spine flexion dynamic model, using strength of materials theory and shear effects for curved elastic beam [ASME PAPER 71-WA/BHF-7] 05 p0620 A72-15947

Flexure of micropolar elastic beams. 17 p2631 A72-35056

Torsion and flexure of curved, thin-walled beams or tubes. 19 p2874 A72-37696

Reduction of the effect of mount deformation on the flexure of the telescope mirror 19 p2801 A72-37967

FLICKER

Darkness enhancement measurement in intermittent light as function of flicker frequency, describing experimental assembly 06 p0762 A72-17605

Light variation threshold amounts for flicker and flickering pattern detection as function of variation frequency 09 p1269 A72-22615

Transistor I.F. flicker background noise generation mechanism in terms of bulk effect due to temperature fluctuation or phonon electron interactions 09 p1286 A72-23107

MOS transistor low level background flicker noise equivalent voltage relationship to gate voltage and input capacitance and interface state density 09 p1286 A72-23108

I.F. excess flicker noise in metal semiconductor Schottky barrier diodes due to barrier height fluctuation 09 p1287 A72-23114

Flicker adaptation, discussing intermittent lights effect on apparent brightness 10 p1427 A72-25181

Hue shifts accompany phase induced modulation enhancement of sinusoidally flickering lights. 18 p2651 A72-36613

Error search reading tasks to investigate practical applicability of blinking display coding techniques, noting reading speed reduction compared to steady display 21 p3008 A72-41018

FLICKER FUSION FREQUENCY U CRITICAL FLICKER FUSION

Aerial triangulation for optimum photogrammetric project parameters, discussing flight altitude, bridging distance and control points for computerized optimization 01 p0066 A72-10462

Minimum safety flight altitudes for aircraft landing systems and lateral deviations for correction maneuver 12 p1842 A72-27269

Low flight altitude atmospheric parameters spatial and temporal variability effects on aircraft flyover noise measurement 13 p1991 A72-28841

High cruise altitude operational advantages for commercial transport aircraft utilizing technological innovations in structures, propulsion, controls, avionics and aerodynamics 13 p1996 A72-28875

Low-altitude flight imposed psychophysiological stresses due to air turbulence discomfort, instrument dial vibration and ground-based navigational objects recognition difficulty 14 p2080 A72-30747

Aircraft geodetic coordinates computation from radar range measurements and flight altitude over earth ellipsoid 15 p2224 A72-31601

Analytical assessment of the accuracy of autonomous space navigation from measurements of the flight altitude and zenithal distance of one reference star 22 p3202 A72-42222

Aircraft longitudinal stability under conditions of varying atmospheric density, thrust force and velocity, determining critical altitude for vanishing oscillations [AIAA PAPER 72-951] 22 p3138 A72-42358

FLIGHT CHARACTERISTICS

Externally blown flaps for STOL characteristics in medium and heavy jet transport aircraft, demonstrating aerodynamic and flight mechanical feasibility 02 p0155 A72-12502

Soviet book on in-flight studies of aircraft stability and controllability covering dynamic characteristics, measurements, balancing curves, aerodynamic forces and limiting and special flight regimes 02 p0155 A72-12542

Control technique and flight quality for crew workload reduction to improve military and civil aircraft flight safety 03 p0310 A72-13640

Pilot evaluation of Boeing 747 handling, directional stability, stall, rudder feel forces, landing, inertial navigation and reliability 05 p0614 A72-16992

Aeromechanical analysis of flight conditions for conventional aircraft, including kinematics of curvilinear motions with constant speed 07 p0913 A72-20372

Dassault Falcon 10 turboprop powered executive aircraft, attributing safe stall characteristics to wing design optimization 08 p1108 A72-21274

Mystere business jet aircraft flight instruments, acceleration, control and stall characteristics 08 p1110 A72-21900

DC-10 aircraft structural design, flight handling characteristics and fatigue tests 09 p1262 A72-23446

Combat jet helicopter maneuverability, considering aircraft flying characteristics, pilot capability, flight configuration, altitude and load factor 10 p1421 A72-24923

Aft center of gravity travel effects on aircraft longitudinal control response characteristics [SAE PAPER 720318] 11 p1575 A72-25581

Fighter aircraft maneuverability, range and armament requirements, discussing canard vs delta configurations 11 p1577 A72-26657

L-1011 flight test program, discussing aircraft design, flight station, controls, flying qualities, etc 12 p1754 A72-27519

Aircraft flight characteristics for landing approach by spoiler-elevator deflection coupling, considering pitch, flight path angle and speed 16 p2343 A72-33423

Integrated airborne-ground based instrumentation system for variable stability X-22A aircraft flying qualities research, discussing telemetry, mobile van, landing aids and airplane design 16 p2348 A72-33628

Relationship between static pressure error /position error/ and measurable flight parameters for different aircraft weights and configurations 16 p2393 A72-33637

Flight test instrumentation system for measurement of aircraft performance, stability and control characteristics during nonsteady flight 16 p2349 A72-33639

Aircraft instrumentation system accuracy relation to aerodynamic derivatives evaluated from flight data, proposing input and transient response measurement system 16 p2394 A72-33640

Russian book on flight dynamics covering horizontal flight, takeoff, climb and landing characteristics, meteorological conditions, helicopters, trajectory problems, stability and controllability analysis, etc 16 p2349 A72-33874

Sailplane performance measured in flight. 17 p2487 A72-34215

The flight mechanics of STOL aircraft. 17 p2488 A72-34241

An integrated system of airborne and ground-based instrumentation for flying qualities research with the X-22A airplane. 17 p2536 A72-34486 [AHS PREPRINT 654]

Critical review of Mil-F-83300 V/STOL flying qualities specifications as applied to helicopter design and missions, suggesting inappropriateness for Navy helicopters [AHS PREPRINT 643] 17 p2490 A72-34503

Structural mode vibration control system design for B-1 aircraft to improve ride during atmospheric turbulence and terrain following 17 p2493 A72-35563

The fly-by-wire systems approach to aircraft flying qualities. 17 p2493 A72-35575

The Dassault Mystere 20. 19 p2748 A72-37900

Flight test report on L-1011 aerodynamic characteristics, discussing high and low speed performance, stability and control, stall behavior, etc 19 p2748 A72-38030

Aerodynamic design and development of the Lockheed S-3A Viking. 19 p2751 A72-38122 [AIAA PAPER 72-746]

An exploratory study of flying qualities of very large subsonic transport aircraft in landing approach. [ICAS PAPER 72-07] 21 p2995 A72-41132

Low-drag artillery projectile aerodynamic characteristics and dynamic flight behavior from wind tunnel, spark range and instrumented flight tests, describing mathematical trajectory simulation [AIAA PAPER 72-979] 22 p3134 A72-42334

Delta wing separation can dominate shuttle dynamics. [AIAA PAPER 72-976] 22 p3230 A72-42336

Analysis of the fundamental parameters and flight properties of aerobatic aircraft in a statistical framework 23 p3252 A72-44336

Effects of variations in lift and drag response to longitudinal control on the ease and quality of landing. 24 p3368 A72-45333

FLIGHT CLOTHING

Flight helmet optimal fitting technique, using automatic recording audiometer and noise source for acoustic leakage detection 04 p0479 A72-14873

FLIGHT CONDITIONS

Storm effects on SST operations, discussing wave initiation at storm top and tropospheric propagation 04 p0542 A72-14683

CAT inducing atmospheric conditions effects on SST flight, discussing turbulence in convective clouds and kinetic energy spectra of atmospheric motions

04 p0543 A72-14693

Interstellar flight conditions in photon vehicle

05 p0713 A72-15979

Aviation weather forecasting improvements due to radar, computer, satellites and high speed communications contributions

07 p1029 A72-18838

Head-up display flying under IMC and VMC flight conditions, considering takeoff, landing and navigation modes

08 p1204 A72-21004

Interdiction bombing mission effectiveness model for bad and good weather aircraft type selection depending on weather conditions at target site

13 p1896 A72-28400

Aircraft flight conditions effect on low altitude critical air turbulence in terms of gust velocity components for CAT prediction

13 p1993 A72-28861

Magnetic compass use in instrument flight conditions, suggesting emergency procedures during aircraft system failures

15 p2238 A72-32212

Aerodynamic analysis of various flight conditions of conventional aircraft. III - Mechanical fundamentals /Dynamics of a point mass/

17 p2492 A72-35440

Russian book on aircraft design covering flight conditions, structure and control characteristics, production and stress analysis

17 p2492 A72-35448

Flight-mechanical analysis of various flight conditions of conventional aircraft. V - Mechanical foundations /Dynamics of the rigid body/

21 p2994 A72-40175

Russian book - Aviation meteorology.

22 p3200 A72-42024

Aircraft longitudinal stability under conditions of varying atmospheric density, thrust force and velocity, determining critical altitude for vanishing oscillations

[AIAA PAPER 72-951] 22 p3138 A72-42358

Minimum operational costs of passenger and cargo transport aircraft, considering effects of flight distance, wind conditions and optimum speed and altitude

23 p3252 A72-44338

Raindrop breakup in the shock layer of a high-speed vehicle.

24 p3395 A72-45780

FLIGHT CONTROL

NT AUTOMATIC FLIGHT CONTROL

NT AUTOMATIC LANDING CONTROL

NT FLY BY WIRE CONTROL

NT POINTING CONTROL SYSTEMS

NT THRUST VECTOR CONTROL

Hybrid computer simulation program used in development and software design validation of digital flight control system for Titan 3C space booster

02 p0186 A72-11655

Scientific balloon data management system, discussing airborne and ground station equipment for telemetry, command and flight control

03 p0327 A72-13725

Feedback gains for STOL aircraft display pilot interactive flight director design, using computerized approach-touchdown simulation and optimal control theory

[ASME PAPER 71-WA/AUT-9] 05 p0684 A72-15956

Optimization algorithms for jet transport aircraft inertially based flight trajectory control in turbulent atmosphere, comparing with ILS

05 p0685 A72-16472

NF-8D aircraft variable stability system ground/in-flight calibration for determination of flight control system dynamics effects on flying qualities

05 p0611 A72-16660

Aircraft flight control system MTBF field operational and MIL-STD-781 testing, establishing data baseline for reliability predictions

05 p0638 A72-16662

Flight test evaluation of A-7D/E emergency backup flight control system, describing hydraulic power control systems design and function

05 p0687 A72-16664

Unmanned systems flight testing by test bed vehicle conversion to man operated mode, discussing T-33A jet trainer conversion to drone operation

05 p0623 A72-16665

Flight control systems development, discussing on-board computers use in subsystems functional integration, stabilization and landing systems, inertial navigation and flight simulation

05 p0687 A72-16736

Adaptive model following control systems design by hyperstability approach for flight control and simulation

[AIAA PAPER 72-95] 05 p0613 A72-16956

S-3A Viking land based antisubmarine warfare maritime and reconnaissance aircraft, describing flight

controls, structural design, underslung podded engines and operational equipment

06 p0758 A72-17583

Aircraft optimal control for case of continuous data flow on time variable flight conditions

07 p1032 A72-18979

Apollo manned mission real time ground support computer simulation for NASA flight controller training to maximize flight crew safety

07 p0933 A72-20329

Hybrid computer simulation for telemetry data collected during missile flight control system model post-flight verification and hardware performance analysis

07 p1085 A72-20332

Space shuttle flight crew/computer interface display and control functional requirements optimization by real time digital simulation

[AIAA PAPER 72-226] 10 p1460 A72-24437

Stochastic control theory application to flight problem, discussing aircraft identification and adaptive control over wide environmental range

10 p1458 A72-25146

Flight tests of combination flight director displayed and attitude command control system effect on and attitude command control system effect on general aviation aircraft handling qualities during ILS approach

[SAE PAPER 720316] 11 p1575 A72-25580

Terminology definitions for redundant flight control systems

11 p1684 A72-26031

German VAK 191B V/STOL fighter aircraft design, development and flight tests, noting redundant control systems

12 p1753 A72-27166

Semiconductor strain gage design and environmental performance for flight control systems

12 p1812 A72-27962

Shoran systems with onboard computers for aircraft position and trajectory parameters, noting coordinate plotting for flight path recovery maneuvers

13 p1996 A72-28785

Jaguar powered flight controls, discussing wing spoilers, slab tailplane, rudder, autostabilization system and integrated packaging of actuators

16 p2353 A72-34144

V/STOL flight control - Trend and requirements.

17 p2487 A72-34240

Ballistic-damage-tolerant composite flight control components.

[AHS PREPRINT 674] 17 p2626 A72-34514

Flight vehicle, control system and perturbations models synthesis from variational problem solution via control functions improvement

17 p2621 A72-35037

Multimode flight control for precision weapon delivery.

17 p2493 A72-35561

Hybrid mechanical-electrical mechanizing techniques for aircraft flight control systems

17 p2493 A72-35576

Dynamic verification of a digital flight control system.

18 p2673 A72-36336

Integrity of flight control system design.

18 p2643 A72-37032

Survivable flight control system compatibility test program.

[AIAA PAPER 72-761] 19 p2752 A72-38143

Optimal selection of stability augmentation parameters for excellent pilot acceptance.

19 p2752 A72-38227

An optimal model-following flight control system for manual control.

19 p2753 A72-38228

A simulation technique used in the development of a flight control system for an aerodynamically controlled missile.

[AIAA PAPER 72-858] 20 p2976 A72-39136

Failsafe hydraulic actuator flight control for jet aircraft.

20 p2890 A72-39351

High subsonic transport aircraft design development based on supercritical aerodynamic configuration and advanced structural, flight control and propulsion system technologies

[AIAA PAPER 72-756] 20 p2889 A72-40056

Real-time launch vehicle steering program selection.

[AIAA PAPER 72-830] 20 p2977 A72-40058

Unique features of the B-1 flight control systems.

[AIAA PAPER 72-872] 20 p2889 A72-40062

Design, operation and testing of integrated STOL flight control system, noting approach accuracy and passenger comfort improvement

21 p3080 A72-40292

High performance jet aircraft variable feel flight control systems for simulation of aerodynamic reaction forces proportional to dynamic pressure

21 p3039 A72-41069

Application of the head-up display /HUD/ to a commercial jet transport.

21 p3060 A72-41256

Problems arising in the transfer of training from simulated to real control systems.

21 p3010 A72-41412

Equations of motion appropriate to the analysis of control configured vehicles.

[AIAA PAPER 72-952] 22 p3137 A72-42353

A sight simulation technique using TV-screen perspective correction for restricted maneuver flight missions

24 p3388 A72-45298

Control configured fighter and bomber aircraft based on flight control technology, discussing development programs

24 p3369 A72-45386

FLIGHT CREWS

Spacecraft and aircraft crew survival after emergency landing in adverse environments, discussing water and food requirements, survival supplies and medical and first aid equipment

05 p0621 A72-16629

Transmeridian flight psychological effects on aircrews, discussing anxiety, stress, circadian rhythm disruption and sleep loss effects on performance deterioration

06 p0766 A72-17816

Crew members handling of emotionally disturbed aircraft passengers

07 p0926 A72-18836

Sleep pattern relation to duty hours of aircrew operating worldwide east-west routes

07 p0932 A72-20178

Physiological evaluation of crew piloting qualities, considering nervous/emotional stress, ECG, arterial pressure and breathing frequency recorded on simulator

07 p0934 A72-20375

Asthmatics evolution and treatments in armed forces aircrews, noting acetylcholine test

08 p1125 A72-21270

Hyperuricemia, gout and lithiasis among operating aircrews, discussing diagnosis and relation to arteriosclerosis

08 p1125 A72-21271

Dazzle glare effects and acuity recuperation among aircrew, noting civil and military aircraft accidents during daytime and nighttime flights

08 p1125 A72-21272

Permanent flight unfitness attributable to air service, noting orthopedic traumatic sequelae, cardiovascular illnesses, psychological and ophthalmological causes

08 p1125 A72-21273

Custom fit oxygen mask for life support of crew members

08 p1126 A72-21567

Aircrews tolerance to cold water and life raft exposure, discussing prediction model based on thermal insulation effectiveness, assumed metabolism and body surface area and mass

[AD-740276] 10 p1428 A72-23734

Work-rest schedules endocrine and metabolic effects on aircrews during 50 hour flight missions in C-141 aircraft, using urinary test techniques

[AD-740992] 10 p1428 A72-23737

Fatigue factors in aircrew related to shift working and technological advances, considering implications for industry and work-rest cycles

10 p1432 A72-24988

Hemodynamic criteria for physical fitness in airmen, discussing age dependent variations in heart beat, arterial pressure and body temperature

11 p1590 A72-26987

Flight crew training programs cost and quality, emphasizing safety and flight simulator application

11 p1590 A72-26998

Life support equipment and pressure suit operational requirements from viewpoint of flight crews and test pilots

12 p1771 A72-27516

Pilot selection criterion for replacement air group /RAG/, using scored maneuver item correlations for flight crew and pilot training

12 p1774 A72-28262

Multivariate algorithms of optimum content and form for cardiovascular risk assessment in pilots and air transport personnel

12 p1764 A72-28264

Biomedical effects on air crews of chemical fire suppression agent Halon 1301 /bromotrifluoromethane/ during simulated aircraft cabin fires

12 p1776 A72-28308

USAF aircraft accidents/incidents involving aircrewmembers with medical waiver on various visual, cardiopulmonary and other chronic pathological and psychiatric conditions

12 p1776 A72-28315

Place of tropical pathology in medical assessment of aircrew

19 p2757 A72-37882

Hemodynamic indices in flight crew personnel during hypertonic sickness and atherosclerosis of coronary arteries

20 p2892 A72-39391

The Macruz index and its clinical evaluation in electrocardiography with regard to the selection and control of air crews

21 p3009 A72-41193

FLIGHT FATIGUE

- Heuristic procedure solution for least cost commercial airline crew scheduling, emphasizing combinatorial space size reduction 24 p3466 A72-44584
- FLIGHT FATIGUE**
- Prolonged jet flight effect on passenger interstitial and intracellular fluid volumes from plasma, extracellular and total body water measurements, noting dehydration and foot swelling 06 p0767 A72-17866
- Psychological principles of active rest during long space flights 21 p3006 A72-40446
- FLIGHT FITNESS**
- Student naval aviator selection by multiple correlation technique using noncognitive college and flight background questionnaire to reduce attrition rate 02 p0166 A72-11704
- Psychological tests of airmen with performance error histories, considering psychic characteristics for limited assignment readjustment 03 p0316 A72-13723
- Pilot in-flight incapacitation probability from airline reports, career termination studies and questionnaire responses 04 p0479 A72-14870
- Physiological evaluation of crew piloting qualities, considering nervous/emotional stress, ECG, arterial pressure and breathing frequency recorded on simulator 07 p0934 A72-20375
- Flight personnel statistical survey of clinical, physical and psychic causes of temporary and permanent flight service unfitness 07 p0923 A72-20447
- Permanent flight unfitness attributable to air service, noting orthopedic traumatic sequelae, cardiovascular illnesses, psychological and ophthalmological causes 08 p1125 A72-21273
- ECG diagnostics for arrhythmia assessment in flying personnel flight fitness examination 12 p1775 A72-28294
- Sight impairment-caused flight personnel disqualification analysis, establishing eye disease structure, sight damage preconditions and ophthalmological practice inadequacies 14 p2080 A72-30748
- Medical factors in air racing accidents, investigating drug, fatigue and gastrointestinal symptoms effects on pilot reaction to emergency 14 p2081 A72-31089
- Active leisure effect on pilot work efficiency, health maintenance and job longevity 19 p2760 A72-38148
- Professional capabilities activation of flying personnel, discussing psychological training for flight fitness 21 p3004 A72-40172
- The prediction of the condition of man during a space flight 22 p3149 A72-42067
- FLIGHT HAZARDS**
- NT METEOROID HAZARDS**
- Effective dose change after repeated radiation exposures as function of time intervals between fractions, evaluating space flight radiation hazards [CERN-71-16] 02 p0161 A72-12059
- CAT, cloud cover and icing forecasting for aviation in terms of numerical model and real atmosphere 04 p0542 A72-14689
- Medical and physiological hazards for SST passengers and crews, discussing cumulative cosmic radiation and high altitude decompression risks 11 p1583 A72-25816
- Aviation hazards due to stably stratified shear and turbulence zones, discussing meteorological analysis of 747 jumbo jet turbulence incident 13 p1994 A72-28865
- Stapedectomy postoperative complications as flying hazard, discussing pilot reaction to middle ear pressure changes 14 p2082 A72-31094
- Long range planning for the development of space flight emergency systems 17 p2620 A72-34428
- Spacecrews rescue requirements, considering escape capsules earth-based and orbit-based rescue systems and flight hazards 17 p2620 A72-34438
- Airline management and flight crew role in prevention, detection and dealing with airline pilot incapacitation in flight, noting physiological and psychological factor recognition 17 p2508 A72-34555
- Head-up display performance in Falcon fan-jet aircraft during taxiing, takeoff, cruise, descent and landing approach, noting low-visibility hazards reduction during landing phase 20 p2952 A72-39744
- Electrostatic charge on an aircraft and lightning striking the aircraft 21 p2994 A72-40171

FLIGHT INSTRUMENTS

A-690

- NT FLIGHT TEST INSTRUMENTS**
- NT GYRO HORIZONS**
- NT HORIZON SCANNERS**
- NT RADIO ALTIMETERS**
- Space shuttle orbiter flight instrumentation, data handling and communication requirements, discussing data gathering methods, crew displays, computer processing, recording and digital data bus telemetry 02 p0179 A72-12406
- Flight display systems current state and future developments, discussing dual attitude indicators and automatic chart systems CRTs, engine displays and malfunction warning systems 03 p0357 A72-13423
- Airline crew familiarization with DC-10 Computerized Flight Guidance System to calculate steering signal from raw data to follow flight path 19 p2831 A72-37899
- Area navigation and its affect on aircraft operation and systems design 19 p2831 A72-38125
- [AIAA PAPER 72-754] The evolution of head-up displays 20 p2925 A72-39333
- Variometer system for sailplanes sinking or climbing rates direct readout, describing pressure difference measuring concept based on reservoir-capillary system 21 p3051 A72-40225
- Aircraft instrument panel redesign to alleviate crew task, proposing integral displays and controls for flight information 21 p3080 A72-40291
- A new concept of flight displays compatible with digital airborne computers 21 p3012 A72-41426
- Evaluation of flight instrumentation for the identification of stability and control derivatives 22 p3136 A72-42346
- [AIAA PAPER 72-963] Variometer system for sailplanes sinking or climbing rates direct readout, describing pressure difference measuring concept based on reservoir-capillary system 23 p3292 A72-44451
- FLIGHT LOAD RECORDERS**
- Extreme value analysis of flight load measurements 24 p3367 A72-44737
- FLIGHT MECHANICS**
- Approximations and bifurcations in flight dynamic system, investigating singular point motion over trajectory during partition process 05 p0611 A72-16582
- Flight mechanics derivative transformations by matrix methods for changing coordinate or independent variable systems [DFVLR-SONDDR-175] 05 p0612 A72-16706
- Optimal design of dynamic system with universality for series of maneuvers with various degrees of informativeness, considering flight mechanics of limited power engine system 06 p0848 A72-18299
- Book on dynamics of atmospheric flight covering unsteady motion, small disturbance theory, aerodynamic characteristics, aircraft stability and control, handling qualities, etc 08 p1109 A72-21491
- Nonlinear dynamics of flight vehicle - Conference, University of Technology, Loughborough, England, March 1972 09 p1407 A72-23451
- Nonlinear dynamic motion response analysis of flight vehicles typified by continuously changing vibration damping and frequency 09 p1262 A72-23452
- Approximate method for nonlinear differential equations of motion solution in flight dynamics, applying to control surface buzz and slender wing oscillations 09 p1262 A72-23453
- Flight mechanics of point with limited power propulsion system and energy storage unit, investigating variational maximum payload problem with singular control optimization 11 p1727 A72-25932
- Lie group theory application to linear differential equations of motion with variable parameters, considering flight vehicle example 12 p1847 A72-28127
- Optimal design of dynamic system with universality for series of maneuvers with various degrees of informativeness, considering flight mechanics of limited power engine system 13 p2052 A72-29439
- Control function improvement method for flight dynamics variational problems solution, discussing dynamic programming, trajectories with uncontrolled elements and coordinate transformation 17 p2607 A72-35036
- Conventional aircraft flight mechanics, reviewing vector analytical treatment of rigid body statics 17 p2493 A72-35794
- Approximations and bifurcations in flight dynamic system, investigating singular point motion over trajectory during partition process 19 p2748 A72-37553

Flight-mechanical analysis of various flight conditions of conventional aircraft. V - Mechanical foundations /Dynamics of the rigid body/ 21 p2994 A72-40175

Flight mechanics of spin stabilized rotating disks for special ordnance delivery, considering aerodynamic parameters relation to dynamic stability and orientation [AIAA PAPER 72-982] 22 p3134 A72-42332

Flight mechanics analysis of various flight conditions for conventional aircraft. V - Mechanical foundations /Dynamics of rigid bodies/ 23 p3251 A72-43641

Flight mechanics aspects in space transportation system for international rescue, analyzing potential crises situations requiring emergency action 24 p3451 A72-45217

Atmospheric Flight Mechanics Conference, 2nd, Palo Alto and Moffett Field, Calif., September 11-13, 1972, Informal Papers. 24 p3361 A72-45326

Perturbation methods in atmospheric flight mechanics. 24 p3368 A72-45350

FLIGHT OPTIMIZATION

- Minimum flight time routes model at SST altitudes, taking into account temperature, meteorological and wind factors 04 p0542 A72-14678
- Time optimal trajectory graphical construction procedure from energy state approximation as basis of computational algorithm for real time onboard flight optimization [AIAA PAPER 72-123] 05 p0688 A72-16968
- Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption 06 p0758 A72-17727
- Aircraft performance and flight path optimization algorithms for minimum fuel-fuel range, using calculus of variations 07 p0912 A72-19091
- Extremal field properties in optimal control problem applied to aircraft flight over assigned distance with minimum fuel consumption 11 p1574 A72-25329
- Jet lift VTOL flight path optimization for minimum landing transition distance, evaluating deceleration as function of incidence and thrust vector angles 15 p2272 A72-32323
- Optimum turns to a specified track for a supersonic aircraft. 19 p2753 A72-38277
- Optimization of the wing parameters of a glider hovercraft 20 p2888 A72-39902
- Supersonic aircraft energy turns. 23 p3252 A72-44196
- Energy management during the space shuttle transition. 24 p3452 A72-45347
- Maximum principle and penalty function technique for flight optimization, noting optimal control for climbing flight 24 p3369 A72-45444

FLIGHT PATHS

- NT GLIDE PATHS**
- Soviet book on course-indicating systems and automatic navigation aids for civil aviation aircraft covering design, operation principles, error analysis and reliability 02 p0256 A72-12298
- Minimum flight time routes model at SST altitudes, taking into account temperature, meteorological and wind factors 04 p0542 A72-14678
- Pilot perception tests on estimating flight path inclination, ground image and touchdown time under poor visibility 05 p0684 A72-16180
- Sign behavior of switching function defined for plane fuel-optimal flight on elliptical coast trajectories 05 p0728 A72-16705
- Automated ATC guidance technique for aircraft curved flight trajectories, describing flight profiles synthesizing algorithms and computerized simulation technique [AIAA PAPER 72-121] 06 p0845 A72-17922
- Cockpit instrumentation for jet transport aircraft flight path management, emphasizing dependability, safety and economy 08 p1168 A72-21524
- Hypersonic vehicles lateral dynamics during great circle flight, using linearized equations of motion and Newtonian theory for stability derivatives estimation 08 p1110 A72-21603
- Shoran systems with onboard computers for aircraft position and trajectory parameters, noting coordinate plotting for flight path recovery maneuvers 13 p1996 A72-28785
- Thunderstorm encounter probability at SST altitudes for selected cross country routes, using radar observation data 13 p1992 A72-28853

Air Force Global Weather Central computer simulation of specific aircraft flight plans, using update weather information for specified route profile
13 p1924 A72-28873

Head-up display for aircraft three dimensional sky path observation during navigation and landing, discussing computer units, CRT and image generating subsystems
15 p2268 A72-32042

Great circle intermediate waypoint computation method for inertial navigation equipped aircraft
15 p2271 A72-32205

Jet lift VTOL flight path optimization for minimum landing transition distance, evaluating deceleration as function of incidence and thrust vector angles
15 p2272 A72-32323

Theoretical and experimental studies of the focus of sonic booms.
18 p2642 A72-36506

Optimum turns to a specified track for a supersonic aircraft.
19 p2753 A72-38277

Test of direct lift control in the case of the experimental aircraft DFVLR-HFB 320
20 p2888 A72-39934

VTOL aircraft noise reduction through design methods and flight path management in terminal area, evaluating acoustical annoyance to surrounding community
[ICAS PAPER 72-34] 21 p2995 A72-41159

Multioop piloting aspects of longitudinal approach path control.
[ICAS PAPER 72-46] 21 p2995 A72-41171

The effect of geometry on area navigation system errors.
22 p3203 A72-43132

Optoelectronic flight path tracking systems
24 p3380 A72-45274

Lateral flight path control during aircraft landing in gusty cross-winds by lateral thrust deflection, discussing design optimization
24 p3368 A72-45330

An investigation of parameters and factors governing manual control of STOL aircraft in landing approach.
[AIAA PAPER 72-987] 24 p3369 A72-45415

Lifting entry optimization equations for fixed angle of attack with path control for roll modulation of lift, considering space shuttle orbiter configuration
[AIAA PAPER 72-933] 24 p3443 A72-45435

FLIGHT PERFORMANCE
U FLIGHT CHARACTERISTICS
FLIGHT PLANS

Europa 2 launcher F 11 flight test review concerning countdown, flight plan and trajectory and organizational details
02 p0286 A72-12034

Flight planning by ATC, discussing problems due to runway feeding from several converging airways
03 p0386 A72-13415

MARS digital simulation model in GPSS for determining scheduled flight operations and maintenance resources effects on aircraft availability and usage rates
06 p0779 A72-17976

Automation in planning and execution of flights, considering navigation, communication, flight instruments monitoring, control/stabilization and warning systems
09 p1269 A72-22780

Military weather forecasting requirements by 1980, discussing decision making, data processing, satellite data, mission and terminal forecasts, display and computer flight planning
10 p1508 A72-25096

Air Force Global Weather Central computer simulation of specific aircraft flight plans, using update weather information for specified route profile
13 p1924 A72-28873
